Captain, John McArthur; 1st Lieut., Alexander W. Raffin; 2d Lieut., J. T. Young; 3d Lieut., Andrew Quade; 4th Lieut., Robert Wilson; Secretary, T. McFarland; Treasurer, John Wood.

(Mustered into the service of Government in 1861, as Company E, 19th Illinois Volunteer Infantry.)

TWENTIETH ODD BATTALION.

(Transferred to W. I. Regiment February, 1856.)

Major, George W. I. Cone; Adjutant, John Short; Quartermaster, P. A. Taylor; paymaster, Oliver P. Booth.

The COMPANIES of BATTALION were:

"GUARD OF LIBERTY."

(Organized May, 1855.)

Captain, George W. I. Cone.

(1856.)

Company A (Rifles)—Captain, William C. Leyburn; 1st Lieut., Judson W. Reed; 2d Lieut., Frederick Lyman.

Company B (Rifles)—Captain, Henry M. Kirke; 1st Lieut., Charles M. Helliker.

Company C (Dragoons)—Captain, Reuben Cleveland; 1st Lieut., James T. Hoyt; 2d Lieut., William E. Judd; 3d Lieut., E. R. Brown.

No farther record.

WASHINGTON GRENADIERS.

(1856.)

Captain, Theodore Weiler; 1st Lieut., George Reifschneider; 2d Lieut., Henry Willin; 3d Lieut., John Schmidt.

WASHINGTON RIFLES.

(1856.)

Captain, Antony Sten; 1st Lieut., Frederick Mattern; 2d Lieut., Martin Zieland.

CHICAGO GRENADIERS.

Captain, Augustus Haggerman; 1st Lieut., John Diversy; 2d Lieut., Peter Rink.

WASHINGTON LIGHT GUARDS.

(Organized November 30, 1855.)

Captain, John Kerber; 1st Lieut., William Heil; 2d Lieut., John Brown.

(1857.)

Captain, William Heil; 1st Lieut., Ernad Adams; 2d Lieut., John Bolman; 3d Lieut., George Rosenbergen.

CHICAGO ARTILLERY COMPANY (German).

(Organized December, 1856.)

Captain, Michael Mueller; 1st Lieut., August Freuer; 2d Lieut., Franz Ehlbrucht; 3d Lieut., Iaios Link.

WASHINGTON LIGHT CAVALRY (German).

(Organized July 19, 1858.)

Captain, Frederick Schambeck; 1st Lieut., William T. Stoeber; 2d Lieut., Alexander Weite.

(The Washington Independent Regiment was offered entire to Governor Yates at the breaking out of the Rebellion, and accepted—many of the German companies doing service at Cairo.)

RELIGIOUS HISTORY.

PRE-CHURCH PERIOD.

The religious zeal of the Jesuits carried their missionaries first to many of the heathen races. They were first to visit the Indians of the great Northwest; but on account of the meagerness of data, it is difficult to decide positively with reference to the first missionary or priest who set foot on the soil of the then future city of Chicago. It seems certain, however, that the author of "Pioneers of Illinois" repeats an error in the sentence: "It is said Father Nicolet, a French Jesuit priest, preached to the Indians at the mouth of the Chicago River in 1640, and in all probability he was the first white man that ever rowed a canoe on the waters of Lake Michigan, or trod the soil of Illinois." The researches of Benjamin Sulté, of Ottawa Canada, prove the inaccuracy of the above quotation, with reference to the time of John Nicolet's visit to the mouth of the Chicago River. Mr. Sulté says:

"Nicolet is at Three Rivers (Canada) again on the 26th of January, 1640. He died two years after that date; and during all that time we trace him month by month in the parish register at Three Rivers. In brief, Nicolet must have traveled to the Mississippi in the year 1634-35, from July to July, because that period is the only one during which we cannot find him on the shore of the St. Lawrence."

But if in 1634-35, Nicolet visited the mouth of the Chicago River, he did not then, nor at any other time or place, preach to the Indians. The following quotations from the same author is conclusive on this point:

"At Quebec, 7th of October, 1637, Nicolet marries Marguerite Couillard. The marriage contract is dated in that city, 22d of October, 1637. . . . From that moment his wife is present at church every month in Three Rivers up to 1642, the date of Nicolet's death, as the register shows."

The fact of Nicolet's marriage proves that he was not a priest, and Mr. Sulté says he was not a Jesuit. The name "Father Nicolet," is therefore a misnomer. Hence it is necessary to look to later times for the first Chicago priest, or missionary. His visit to the Indian tribes of the Northwest was made in the cause of commerce, not religion.*

The gentle, earnest and courageous Father Jacques Marquette was the first priest appointed to the Illinois mission. It is probable, however, that he never celebrated mass, preached or gave religious instruction to the Indians on any portion of the territory now comprised within the limits of Chicago; but one of his biographers says of him: "Upon returning from his last expedition† he took up his residence and pursued the vocation of a missionary among the Miamis in the neighborhood of Chicago." Supposing this to be authentic, the missionary services of this zealous and pious Jesuit father must have been rendered to the Miami Indians in the fall of 1673, as he started on his return up the Mississippi July 17 of that year. As has been said of him: "It was the lofty aim of Marquette to be of enduring service to his fellow-men; it was his integrity, his unselfishness, his untiring zeal, his gentle

and uncomplaining disposition, and his early self-sacrifice near akin to martyrdom, that command our sympathies, and these are what made him truly great." Marquette died May 18, 1675, and Father Claude Allouez succeeded to the Illinois mission. After journeying, in the months of March and April, 1676, seventy-six leagues on Lake Michigan, Allouez, with his Indian companions and guides, entered the Chicago River, probably about the 10th of April. Upon landing he was met and handsomely received by about eighty Indians. The chief of this band advanced to meet him with a fire-brand in one hand and a feathered calumet in the other. He led the reverend father to his cabin and thus addressed him:

"Father! take pity on me; let me return with thee, to accompany thee and lead thee to my village; my meeting with thee to-day will be fatal to me unless I profit by it. Thou bearest to us the gospel and the prayer; if I lose the occasion of hearing thee, I shall be punished by the loss of my nephews, whom thou seest so numerous, but who will assuredly be defeated by the enemy. Embark then with us that I may profit by thy coming into our land."

Father Allouez, unfortunately, fails to mention who it was that thus addressed him; and thus the name of the orator who delivered this, the first reception speech in this locality, and the first to allude to "the gospel and prayer" within the limits of Chicago, is lost forever. The father and the chief at once embarked and soon reached the village of the latter.

Father Claudius Dablon, who was Superior-General of the Missions of the Society of Jesus, who founded Sault Ste. Marie and visited Green Bay, came as far as the Wisconsin with Allouez, but does not appear to have reached Chicago. Of Father Louis Hennepin it may also be said that he probably never visited Chicago, although in 1679, in company with LaSalle, he perhaps sailed along the western shore of the lake on the way to St. Joseph, Mich. It is not easy to determine who was the next after Allouez to visit Chicago, but it seems credible that it was one or both of the Rev. Fathers Pinet and Bineteau. This appears from the journal of Rev. John Francis Buisson de St. Cosme, who was a member of the party which, in 1699, under the leadership of M. de Montigny, visited Chicago on their way to the Mississippi. This party disembarked half a league from Chicago, and a few of them, M. de Montigny, St. Cosme and Davion, went by land to the house of the Jesuit fathers. St. Cosme says:

"We found the Rev. Father Pinet and Rev. Father Bineteau, who had recently come in from Illinois, and were slightly sick. I cannot explain to you, Monseigneur, with what cordiality and marks of esteem these reverend Jesuit fathers received and caressed us during the time that we had the consolation of staying with them. Their house is built on the banks of the small lake, having the lake on one side and a fine large prairie on the other. The Indian village is of over one hundred and fifty cabins, and one league on the river there is another village almost as large. They are both of the Miamis. Rev. Father Pinet makes it his ordinary residence, except in the winter, when the Indians all go hunting, and which he goes and spends at the Illinois."

From this extract it would appear that Father Pinet, at least, had been in this part of the country some years, as it had become his custom "to make his ordinary resi-

* See chapter on Early Explorations.

† His famous expedition of discovery down the Mississippi River in 1673.

dence" with the Miamis, and "to spend his winters with the Illinois." And, as in 1685, at the time when it is alleged De la Durantaye erected a fort at the mouth of the Chicago River, which became a kind of depot, Father Allouez revisited the place, there can have been no long time when the Indians were without the presence of some zealous Jesuit among them during the latter part of the seventeenth century. Besides those already mentioned as accompanying M. de Montigny on his journey to the Mississippi, there were the Rev. Fathers de la Ribourde, Membre, Gravier and LaSource, all of whom may have ministered to the spiritual necessities of the Indians, though what was the nature of their religious exercises and duties, or how long they were continued, is not known.

There now occurs an hiatus in the religious history of this vicinity of nearly one hundred years. The next name to be found is that of Rev. Stephen D. Badin, who first visited Chicago in 1796. He was ordained in 1793, at Baltimore, and was the first Catholic priest ordained in the United States. He does not appear to have become a resident priest. But in 1822 he again visited Chicago, and during his visit baptized Alexander Beaubien, in Fort Dearborn, which was the first baptism in Chicago of which there is any definite knowledge. The above mentioned missionaries were all Catholics.

The next to arrive, and the first Protestant to preach a sermon in Chicago, was the Rev. Isaac McCoy, a Baptist clergyman, who had established and was conducting the mission school at Carey, near Niles, Mich. With reference to this first sermon his own language is as follows:

"In the fore part of October I attended, at Chicago, the payment of an annuity by Dr. Wolcott, United States Indian Agent, and, through his politeness, addressed the Indians on the subject of our mission. On the 9th of October, 1825, I preached in English, which, as I am informed, was the first sermon ever delivered at or near that place."

So far as is known this was the only sermon preached by Mr. McCoy in Chicago.

Rev. Jesse Walker, who was at the time superintendent of the Fox River Methodist mission, came up on his boat from Peoria to Chicago, in the spring of 1826, for

Jesse Walker

the purpose of preaching. It is not known that he preached, but, as he remained some time, it is probable that he did. On the way up from Peoria, according to the Rev. Stephen R. Beggs, "He had all the hands on board cease work till they could attend prayers, and all joined in singing, and then a fervent prayer was offered up in their behalf, asking the merciful protection of a divine Providence throughout the day."

In 1828 Rev. Jesse Walker was succeeded as superintendent by the Rev. Isaac Scarritt. About midsummer of that year Mr. Scarritt, as he says in a letter to Mr. Beggs:

"Planned a trip to Chicago, distant some seventy or eighty miles. The next evening we entered Chicago, which, in addition to the buildings constituting Fort Dearborn, contained the old Kinzie house, a new house of Colonel Hamilton's, with perhaps one or two others in that quarter, and those of J. Kinzie and J. Miller up at the Point. The latter two gentlemen seemed to be upon a strife with each other, which should excel in honor of popularity, whereby to promote their individual interests. I took up

my residence at Miller's, who, with laudable generosity, undertook to administer to my comfort and further my views. The next day was the Sabbath, and I sent word to the Lieutenant that if it were his wish the superintendent of the Indian mission would preach to the soldiers and others, at such place and hour as he might appoint. Answer was returned that he should not forbid the preaching, but that he should neither authorize nor make any arrangements for it. Not to be outdone by the honorable Lieutenant on the point of independence, I declined going to the garrison under such circumstances, and made an appointment for preaching at Miller's at night. Most of the citizens and some of the soldiers were present, and gave respectful attention; but in the matter of congregation we received rather more than we bargained for. During religious services a gang of boatmen, with their vociferous 'yo-hes,' commenced landing and rolling up barrels, etc., near the door. This was a trick of Kinzie's, so Miller said, out of spite to him for having the honor of entertaining the missionary, and for the agency he took in promoting the religion of the place."

In 1830 the Illinois Conference had a "Chicago Mission District." In the fall of this year the Rev.

Stephen R. Beggs

Jesse Walker was appointed to this mission as its superintendent; and in June, 1831, accompanied by Rev. Stephen R. Beggs, set out on horse-back from Plainfield to Chicago, forty miles distant. With reference to this visit Mr. Beggs writes:

"When we arrived, Brother Walker gave out an appointment for me to preach in the garrison, in old Dr. Harmon's room. After the sermon was over, he gave it out that I was to preach again next morning at nine o'clock; and this was the beginning of a happy time here. I opened the door for the reception, and I think ten joined the church."

These two sermons were preached, the one on the evening of the 15th, the other on the morning of the 16th of June, 1831. Among the number of those who joined this, the first, church society or class organized in Chicago, were: Rev. William See and wife, Elijah Wentworth, Jr., his mother and two sisters, and Mrs. Dr. Elijah D. Harmon. Rev. William See, a regularly ordained clergyman of the Methodist Episcopal Church, in the absence of other clergymen, preached as occasion offered or required. He was by trade a blacksmith and poor in purse, but of good moral character and highly esteemed. Rev. Jesse Walker, being superintendent of the mission work from Peoria to Chicago, could preach in the latter place only a few times a year, and so, at his request, Bishop R. R. Roberts, in the fall of 1831, appointed Rev. Stephen R. Beggs to the mission at Chicago. Probably in October, Mr. Beggs came to this field, and found awaiting him the small class he had formed the preceding June. No house of worship having been as yet erected, religious services were generally conducted in the fort. In January, 1832, the first quarterly meeting was held; and an ox-team was employed, and driven by T. B. Clark, to draw provisions from Plainfield to assist in sustaining the people during the continuance of the meeting. Mr. Beggs says:

"The meeting commenced with power, and increased in interest till Sunday morning. My first sermon was preached on Sabbath morning, at ten o'clock, after which Brother Walker invited the people around the sacramental board. It was a season long to be remembered. Every one seemed to be baptised and consecrated anew to the great work to be accomplished in the village that was destined to become a mighty city."

Mr. Beggs brought Mrs. Beggs to Chicago in May, 1832, and made the village his home, nearly or quite a year. A number of additions was made to the membership of his class or society; six in the early winter of

1831-32. A portion of the time meetings were held in the log school-house. In the year 1832, Rev. Jesse Walker was appointed to the Chicago mission to succeed Mr. Beggs. As soon as practicable he moved to Chicago, and entered upon his labors. His first quarterly meeting was held in a log building, subsequently known as "Father Walker's" log cabin. It stood on the West Side, near the bank of the river where the North and South branches meet, near what is now the southwest corner of Kinzie and Canal streets. This building was used by Mr. Walker as a parsonage, parlor, kitchen and church. At his first quarterly meeting, held in the fall of 1833, there were present, besides himself, Rev. John Sinclair, presiding elder, Rev. William See, local elder, Henry Whitehead, who was licensed to preach at that meeting, Charles Wisencraft, Mrs. R. J. Hamilton, and Mrs. Harmon. Mr. Whitehead was the first minister licensed in Chicago to preach. Mr. Walker became superannuated in 1834 and died in 1835.

Aside from the religious services outlined above, and in connection with a debating society, a religious meeting was held generally once a week at the house of Mark Noble, Sr., who had arrived in Chicago in August, 1831, and moved into the old cabin of the Kinzies'. These meetings were held to provide for those who had no taste for literary matters and dancing then indulged in at Fort Dearborn, and were the first prayer meetings in Chicago. In conducting them Mr. Noble was assisted by his wife and two daughters, and Mrs. R. J. Hamilton, all of them being members of the Methodist Episcopal Church. Mrs. Hamilton contributed very largely to the interest and success of the meetings, being a lady of great intelligence, comprehensive views and devoted piety. She was for many years among the first in all religious and benevolent enterprises, and furnished the first pulpit in Chicago with necessary articles. Mr. Noble also, was very zealous in his piety, and was the principal speaker at these meetings. He was a man of large experience, and of great practical common sense. Thus it will be seen that the Methodists, when continued effort is considered, were the pioneers in Christian work, though they did not have the first completely organized society, nor erect the first church edifice.

In addition to the efforts made to improve the religious characters of adults, the moral and religious training of the children was not neglected. A Sunday school, the first in Chicago, was organized on the 19th of August, 1832, by Luther Childs, Mrs. Seth Johnson, Mrs. Charles Taylor, the Misses Noble and Philo Carpenter. The school first assembled in a small frame building then lately erected on the Reservation, near Mr. Noble's house, by Mark Beaubien. At this time the building was not completed; it had a floor, was sided up, and had on some of the roof-boards, but it was not shingled and had neither windows nor doors. The school afterward met in the fort, at the house of Rufus Brown, at Rev. Jesse Walker's cabin, and in the upper

but as there were only thirteen children in the school, each scholar and teacher could have a book. John S. Wright acted as secretary and librarian, and was accustomed to carry the library to and from the temporary place of meeting in his pocket handkerchief. The poverty of the library in volumes was observed by two gentlemen from New York, Charles Butler and Arthur Bronson, visiting in Chicago, who upon their return home sent two hundred volumes as a donation.

Having thus traced the religious movements of Chicago from the time of the noble and self-sacrificing Jacques Marquette, in 1673, down to that of the equally zealous and laborious "Pathfinder," Rev. Jesse Walker, in 1833, it will now be our province to trace, with such attention to detail as the nature of this work will admit of, the inception of the original religious societies in Chicago, leaving the local societies to be described in their appropriate places in the histories of the towns of which they form an essential part.

CATHOLICISM.

In 1833, the first year in which regular church organizations existed in Chicago, three churches were formed—a Catholic, a Presbyterian and a Baptist, in the order named; the first in May, the second in June, and the third in October.

ST. MARY'S CHURCH.—This was the first Catholic society organized in Chicago. Its first priest was Father John Mary Irenaeus St. Cyr, who was born at Lyons, France, November 2, 1803, and educated in that country. He left France in June, 1831, reached St. Louis August 1, of the same year, and was there made a sub-deacon. He was ordained at St. Mary's the Barrens by Bishop Rosatti in 1832, and on April 6, 1833, was by the same Bishop ordained priest. The period between these two dates was spent by St. Cyr in studying the English language. In the meantime Catholics were increasing in numbers in Chicago, and were becoming desirous of receiving the ministrations of a resident Catholic priest. To accomplish their desires they prepared and forwarded to St. Louis the following petition:

"To the Right Rev. Catholic Bishop of the Diocese of Missouri, of St. Louis, etc., etc.

"We, the Catholics of Chicago, Cook Co., Ill., lay before you the necessity there exists to have a pastor in this new and flourishing city. There are here several families of French descent, born and brought up in the Roman Catholic faith, and others quite willing to aid us in supporting a pastor, who ought to be sent here before other sects obtain the upper hand, which very likely they will try to do. We have heard several persons say were there a priest here they would join our religion in preference to any other. We count about one hundred Catholics in this town. We will not cease to pray until you have taken our important request in consideration."

This petition was signed by the following persons for themselves and their families, the number of members in each individual's family being appended to his name: Thomas J. V. Owen, 9; J. Bt. Beaubien, 14; Joseph Laframboise, 7; Jean Pothier, 5; Alexander Robinson, 8; Pierre LeClerc, 3; Alexis Laframboise, 4; Claude Laframboise, 4; Jacques Chassut, 5; Antoine Ouilmet; Leon Bourassa, 3; Charles Taylor, 2; J. Bt. Miranda and sisters, 3; Louis Chevalier, 3; Patrick Walsh, 2; John Mann, 4; B. Caldwell, 1; Bill Saver, 1; Mark Beaubien, 12; Dill Vaughn, 1; James Vaughn, 1; J. Bt. Rabbie, 1; J. Bt. Roulx; J. Bt. Tabeaux, 1; J. Bt. Duvocher, 1; J. Bt. Brodeur, 1; Mathias Smith, 1; Antoine St. Ours, 1; Bazille Deplat, 1; Charles Monselle, 1; John Hondorf, 1; Dexter Assgood, 1; Nelson Peter Perry, 1; John S. C. Hogan, 1; Anson H. Taylor, 1; and Louis

story of P. F. W. Peck's store, as occasion offered. Since that 19th of August, 1832, few Sundays have passed without witnessing the assembling of children for religious and moral instruction. The library of this first Sunday school contained about twenty small volumes,

Francheres, 1; a total of 122. The original petition written in French bears on its back the memoranda, "Received April 16, 1833." "Answered April 17, 1833."

*Very respectfully Yours
J. M. J. Saint Cyr, Priest*

In response to this petition, Bishop Rosatti appointed St. Cyr priest of Chicago, in the following language :

JOSEPH ROSATTI, of the Congregation of Missions, by the grace of God and of the Apostolic See, Bishop of St. Louis, to the Rev. Mr. John Irenaeus St. Cyr, priest of our diocese; health in the Lord:

Rev. Sir:—Whereas, not a few Catholic men inhabiting the town commonly called Chicago, and its vicinage, in the State of Illinois, have laid before me that they, deprived of all spiritual consolation, vehemently desire that I should send thither a priest, who, by the exercise of his pastoral gifts, should supply to them the means of performing the offices of the Christian religion and providing for their eternal salvation. Wishing, as far as in me lies, to satisfy such a desire at once pious and praiseworthy, by virtue of the powers of Vicar-General to me granted by the most illustrious and most reverend Bishop of Bardstown (Ky.), I depute you to the mission of Chicago and the adjoining regions within the State of Illinois, all of which have hitherto been under the spiritual administration of the said most illustrious and most reverend Bishop of Bardstown, grant you, until revoked, all the powers as described in the next page, with this condition, however, that as soon soever as it shall become known to you that a new Episcopal See shall have been erected and established by the holy Apostolic See from the territory of other Sees now existing, to that Bishop within the limits of whose diocese the aforesaid Chicago mission is included, you shall render an account of all those things which shall have been transacted by you, and surrender the place to such priest as shall be by him deputed to the same mission, and you, with

God's favor, shall return to our diocese from which we declare you to be by no means separated by this present mission.

Given at St. Louis, from the Episcopal buildings, the 17th day of April, 1833.

JOSEPH,
Bishop of St. Louis.

Jos. A. LUTZ, Secretary.

From the date of this appointment, Catholics consider that the organization, or establishment, of their church in Chicago should be reckoned, although St. Cyr did not reach the city until Wednesday, May 1, accomplishing the journey part of the way on horseback and part of the way on foot. Having made the necessary arrangements, St. Cyr collected together the Catholics and celebrated his first mass, in a little log cabin, twelve feet square, belonging to Mark Beaubien, on Sunday, May 5, 1833. On the 22d of May occurred his first baptism, the subject being George Beaubien, son of Mr. and Mrs. Mark Beaubien. Father St. Cyr immediately commenced preparations for building a church. The first site selected was on Lake Street, near Market, upon which stood the log cabin above referred to. This lot was promised St. Cyr by Colonel J. B. Beaubien for the nominal sum of \$200, but being unable to raise that amount among the one hundred Catholics who petitioned for his appointment, and others, he was obliged to look for another location. About a year afterward the same lot was sold by Colonel Beaubien for \$300, to Dr. William B. Egan, who, in 1836, sold it to Tertius Wadsworth, of Hartford, Connecticut, for \$60,000. According to the advice of Colonel Beaubien and Thomas J. V. Owen, St. Cyr selected a canal lot near the southwest corner of Lake and State streets, near the military reservation, where now (1883) stands the printing establishment of Cameron, Amberg & Co. The privilege was accorded St. Cyr of buying this lot at the canal commissioners' valuation; but when that price was announced it was still farther beyond the reach of the Catholics than was that first selected, and it was purchased by Dexter Graves for \$10,000. In the meantime, not anticipating the high price at which the lot would be appraised, they erected thereon a church building, twenty-five by thirty-five feet in size. The lumber for this building was brought in a scow across the lake from St. Joseph, Mich., where it cost \$12 per thousand. The lumber having arrived, Anson Taylor, a brother of Augustine Deodat Taylor, with his own team, hauled it from the schooner to the site of the prospective church. Augustine D. Taylor was the architect and builder. The total cost of the edifice was about \$400, but though small and inexpensive it was not completed sufficiently for occupancy and dedication until in October. Catholic Indians assisted at the first mass celebrated therein. Indian women had cleaned and prepared the modest building for the celebration of the sacred rite, and Deacon John Wright, a strong supporter of Rev. Jeremiah Porter, pastor of the First Presbyterian Church, had, in August, assisted in raising the frame of the building. At this dedication-service there were present about one hundred persons. The church itself was not plastered, it had only rough benches for pews and the simplest of tables for altar and pulpit. The outside of the building was not painted and it had neither steeple nor tower. Some time afterwards, it was surmounted by a low, open tower, in which a small bell was hung, being the first bell used in Chicago to call the pious together for religious worship. It was about the size of an ordinary locomotive bell of the present, and could be heard only for a short distance. It was of no use for sounding an alarm in case of fire, and nearly ten years elapsed before the first one which

could be used for that purpose was hung in the steeple of the Unitarian church. The church building stood on this lot until sometime during the priesthood of Father O'Meara, when it was removed by him to a lot at the southwest corner of Michigan Avenue and Madison Street. Here it was enlarged and soon afterward, was moved to the southwest corner of Wabash Avenue and

ST. MARY'S CHURCH.

Madison Street. When the new St. Mary's, a brick building, was erected the frame church was again moved, this time to the westward in the same block. The removal from the corner of Lake and State streets to Michigan Avenue and Madison Street, by Father O'Meara, together with the circumstances of the removal, caused great dissatisfaction to a portion of the Catholics. The dissatisfied ones refused to accompany the church to its new location, and engaged a room of Charles Chapman, in the second story of a building standing at the corner of Randolph and Wells streets, in which mass was celebrated during the summer by Rev. Maurice de St. Palais. Among those who thus separated themselves from the church under Father O'Meara were Augustine D. Taylor, A. M. Talley, Samuel Parry and John Davlin. After the trouble caused by Father O'Meara's course had been overcome, the two portions of the church were re-united, under Rev. de St. Palais.

St. Xavier Academy, at 131 Wabash Avenue, stood on the adjoining lot south of the church. St. Palais, in 1843, commenced the erection of St. Mary's brick church, corner of Madison Street and Wabash Avenue. This edifice had a substantial stone foundation, and was fifty-five feet wide by one hundred and twelve feet long, including a portico twelve feet wide, supported by four Ionic columns, and cost \$4,000. The brick work was done by Peter Page, and the wood work by Augustine D. Taylor. This church was opened for divine service December 25, 1843. It was consecrated by Bishop Quarter, December 5, 1845. In September, 1845, Felix Inglesby, a wealthy merchant of New York City, donated a bell to this church worth \$185.

St. Cyr remained in Chicago until 1837, when he

went to St. Louis. From the latter part of October, 1836, he was assisted by Rev. Leander Schaffer, who attended the German Catholics. He was himself succeeded for the English-speaking Catholics by Rev. Father O'Meara, who was succeeded, in 1840, by Rev. Maurice de St. Palais. St. Palais was succeeded, May 5, 1844, by Rt. Rev. William Quarter, Chicago's first Catholic Bishop, who died April 10, 1848. According to his desire his remains were deposited in the cathedral he had consecrated, which ceremony had occurred October 5, 1845. Bishop Quarter was eminently successful in the management of the affairs of his diocese. Under him its growth was remarkable. When he arrived at Chicago there were less than twenty priests in the State of Illinois, and only two priests in Chicago—Rev. Maurice de St. Palais and Rev. Mr. Fischer, and only two seminarians—Patrick McMahon and B. McGorish. These two students were immediately ordained and raised to the priesthood May 16, 1844. Two years later there were present at the first diocesan synod thirty-two priests, and nine others from sickness and other causes, were unable to attend. In 1844 there was but one Catholic church in Chicago; in 1846 three new Catholic churches were erected—St. Patrick's, St. Peter's and St. Joseph's, the last two for the Germans. In 1848, when the bishop died, thirty new churches had been erected in the diocese, ten of them being either brick or stone, making a total number of sixty-eight. These were presided over by fifty-three priests.

To Bishop Quarter is also due the credit of establishing the University of St. Mary's of the Lake, the germ of which, the college, was established within thirty days from the time of his arrival in Chicago, and for which a charter was granted in December of the same year. The university building, with seminary attachment, was completed in June, 1845, and was opened with appropriate ceremonies July 4, following. This was the first institution for higher learning in the city.

Bishop Quarter also instituted the first community of nuns. This community was established with six Sisters of Mercy, whose names will be elsewhere found, who came from Pittsburgh, Penn., in 1848 from the first house of the Sisters of Mercy opened in the United States.

To Bishop Quarter is due the credit of having secured the passage of the law under which the Catholic Bishop of Chicago was incorporated as a "Corporation Sole," with power to "hold real and other property in trust for religious purposes."

Bishop Quarter was succeeded in 1848, by the Rt. Rev. James Oliver Van de Velde, who was formally installed as Bishop of the See, in the Cathedral of St. Mary's, in 1849. Bishop Van de Velde was a member of the Society of Jesus, in which he held many important positions. He was a man of great learning and zeal, but the active duties of the bishopric were not congenial to his tastes and he constantly yearned after the quiet and seclusion of a religious life. His administration, moreover, of the affairs of the diocese was troubled with dissensions and difficulties, which were in part the reason of his resignation and of his assignment to another field—the See of Natchez, where his labors were less arduous, and where he could devote himself entirely to study and preaching. He left Chicago for his new field of labor November 4, 1853, and died in 1855.

Bishop Van de Velde was succeeded in Chicago by the Rt. Rev. Anthony O'Regan, who was consecrated Bishop of Chicago July 25, 1854. Bishop O'Regan, like his immediate predecessor, found the administration of the affairs of the diocese an arduous task. His labors

constantly increased. Besides the care of the diocese of Chicago, he was charged with the administration of the new See of Quincy, erected in 1852, but which continued to be administered by the Ordinary of Chicago, until the erection of the See of Alton, in 1857. His administration of the affairs of the diocese of Chicago was soon marred by difficulties with some of the leading Catholic priests of the city, in consequence of which Rev. Fathers Kinsella, Clowry and Breen left the diocese. But the troubles continuing, Bishop O'Regan sought peace by following the example of his predecessor. He resigned, and was assigned to a See, *i. p. i.*, in Ireland with which he had been connected in his early days, and where he spent the remainder of his life, dying in London, England, in 1865. He was succeeded by Rev. Matthew Dillon, an amiable and popular clergyman, who filled the post of administrator until succeeded by the Rt. Rev. Clement J. Smythe, Bishop of Dubuque, who remained until 1859, when he gave place to the Rt. Rev. James Duggan, an account of whose labors will be found in the succeeding volume of this History.

Besides the bishops and priests already mentioned as being connected with the parish of St. Mary's, were the following, each of whom officiated for a time: Fathers DePontevieux, Quequew and Lawrence Hoey in 1844; Father P. T. McElhearne, with the occasional assistance of Father Fitzgerald, from 1852 to July 9, 1854. In 1854 Rev. Matthew Dillon was assisted by Fathers Michael Hurley, Fitzgibbon and Carrol; in 1855 Fathers Patrick Sherry, Magan, and McGuire officiated, in 1856 Fathers John Waldron, Tierman, and Bolger, and in 1857 Fathers T. D. Butler and Thomas Burke.

The Catholic Church in its earlier days had a more serious difficulty to contend with than any of those incidentally referred to in connection with the names of some of its bishops. Cupidity appears to have taken possession of one of its early priests, Rev. Father O'Meara. Rev. Father St. Cyr refers to Father O'Meara, in a letter to Henry H. Hurlbut, under date of February 8, 1875, in the following not very complimentary terms: "I was succeeded for the English speaking congregation by Father O'Meara, who proved to be a notorious scoundrel. May God preserve Chicago from such a priest."

The following extract from the pen of Hon. J. S. Buckingham, Member of the English Parliament, who was in Chicago at the time (1840) gives an account of the troubles with their result:

"Considerable excitement was occasioned during our stay here by an unexpected riot among the Irish Catholics, on behalf of a priest," (Father O'Meara), "who was a great favorite with them. It appears that this reverend father had in some manner caused the church of which he was pastor, and certain lands, house and furniture attached to it, to be made, by legal instrument, his own individual and exclusive property; and deeming himself thus in secure and immovable possession, he defied all his ecclesiastical superiors. He had been for some time habitually intemperate, and it was alleged that he had also committed extensive frauds. This is certain, the Catholic Bishop of the diocese, and the Vicar-General from St. Louis, had come on to Chicago, from the south, for the purpose of forcing the priest to surrender the property which he unlawfully held, and then publicly excommunicating him. The expectation of this ceremony drew crowds of Protestants on the Sunday morning it was appointed to take place; and the sympathy felt by the Irish laborers on the canal, here pretty numerous" (for the priest), "who freely drank whisky with them, was such that they had declared they would clear the church if any attempt were made to excommunicate their favorite. The Bishop and Vicar-General hearing this, went among these men, and addressed them upon the subject, reminding them of their allegiance to the Church, and of the duty of their obedience to its decrees; told them they knew no distinction of nation or habit among Catholics, but that the only distinction which must be maintained, was between the worthy and unworthy, the faithful and unfaithful sons of the Church; and con-

cluding by warning them that if they offered the slightest resistance to any public ceremony enjoined by the Church, they would themselves incur the guilt of sacrilege, and be accordingly subjected to the very pains and penalties of excommunication which they wished to avert from another. This had the effect of calming them into submission, and the priest, learning this, consented to assign over to his superiors the property of the Church which he had unlawfully withheld from it, and to leave the town on the following day, so that all proceedings were stayed against him."

RIGHT REV. WILLIAM QUARTER, D.D., the first Bishop of Chicago, was born at Killurine, Kings County, Ireland, January 21, 1806. His father's name was Michael Quarter, and his mother's maiden name Ann Bennett, who were the parents of four sons; John, the eldest of the four; Walter Joseph, Vicar-General of the diocese of Chicago, and administrator of the diocese after the death of his brother William; William, the subject of this memoir, and James. The Quarter family was a most respectable one, the maternal branch of it especially having given many priests and bishops to the Church. Mrs. Quarter devoted herself to the early training of her children in the path in which she desired them to walk; and besides the principles and precepts she continuously instilled into their minds, her life itself was a continual precept, and her virtuous example, pious life and tender love made a deep and ineffaceable impression upon the hearts of her children. Bishop Quarter was frequently heard to say, "I owe all to my mother; I should never have been a priest, never have been a bishop, but for her." Mrs. Quarter, having received an excellent education in the schools of a religious community, assumed the task of instructing young William, believing that the common schools were to the moral like a Siberian desert to the tender plant, transplanted thither from a sunny clime. He was as assiduous in his studies as she was earnest and industrious in her teaching, and he overcame the difficulties he found in his way with an ease that indicated the possession of a high order of mind. At the age of eight years he was prepared to enter a boarding school at Tullamore. Before leaving home to enter this school he partook of his first communion, and at the same time expressed his determination to live henceforth for God alone, and to enter the holy order of the priesthood. He immediately left home for Tullamore, and there entered the academy of Rev. Mr. Deran, a retired Presbyterian clergyman, one of the best classical scholars in Ireland. Here he commenced his mathematical and classical studies, and after spending about two years with Mr. Deran, he entered the academy of John and Thomas Fitzgerald in the same town. With the Messrs. Fitzgerald he completed his course of study preparatory to entering the college of Maynooth, and in his sixteenth year satisfactorily passed his examination with this purpose in view. During his preparatory course his demeanor had been so remarkable that his companions styled him the "little bishop." During the vacation between his examination preparatory to entering Maynooth College and his proposed entry therein, the Rev. Mr. McAuley, brother of County McAuley, of Frankford, Kings County, Ireland, returned to Ireland from the United States. This gentleman spent much time at Michael Quarter's house, and there young William heard given a full description of the condition of the Catholic missions in America, of the thousands of Catholic children growing up in a land where Mammon was the deity most generally worshiped—of the wandering away from the sheepfold of so many that had been sealed to the one holy church at the baptismal font in their native land—of the extent of the harvest and the paucity of the gleaners, and he at once determined to forego his contemplated course of study at Maynooth College, to forsake his mother, and all in his native country he so dearly loved, and to devote his life in America to the salvation of souls from eternal perdition. He therefore embarked for North America, April 10, 1822. The vessel landed him at Quebec. To the Bishop of Quebec he immediately applied for reception as an ecclesiastical student, but was rejected on account of his youth. The same fate awaited him at Montreal; but at Emmetsburg, Md., the reason that caused his rejection in Canada proved his first and best recommendation. The Rev. Mr. Dubois, President of St. Mary's College at Emmetsburg, himself an exile, received young Quarter as a father would receive a son. Mr. Dubois at once placed him in the seminary, which he entered September 8, 1822. So thorough was found his scholarship that he was given charge of the classes in Greek, Latin and algebra, and the second year of his residence there he was appointed professor of the Greek and Latin languages. On the 29th of October, 1826, the Rt. Rev. Dr. Dubois was consecrated Bishop of New York, and in 1829 on the completion by young Quarter of his theological studies, Dr. Dubois called him to New York as his assistant priest. On the 14th of September he left the retirement of his mountain home and started to New York, reaching there on Wednesday evening the 16th of the same month. On Thursday morning the 17th, he received at the hands of Bishop Dubois the Clerical Tonsure, Minor Orders and Sub-Deaconship, and on Saturday morning he was

raised to the dignity of the priesthood. The next morning Bishop Dubois started for Europe, leaving his diocese in charge of the Very Rev. Dr. Power, pastor of St. Peter's, of which parish Rev. William Quarter was appointed assistant pastor. During the ravages of the cholera which visited New York with great severity in 1832, Rev. Mr. Quarter devoted himself, almost day and night, to relieving as much as was practicable the sufferings of its victims, and he gathered together the children of the dead members of his Church, placing them under the charge of the Sisters of Mercy, and contributing all of his own means to their support. St. Mary's new church building was dedicated June 9, 1833, by the Rt. Rev. Dr. Dubois, and at the close of the service the Bishop announced the appointment of Rev. William Quarter as pastor of the Church. He remained pastor of this Church until his consecration to the new See of Chicago. St. Mary's Church in New York is indebted to him for the introduction among them of the daughters of St. Vincent and St. Peter's in New York for the establishment there of the first colony of the Sisters of Charity. One of the most remarkable results of his labors in that city was the conversion from the Lutheran Church to Catholicism of the Rev. James Maximilian Oertel. The Provincial Council which met at Baltimore, in May 1843, found it necessary, on account of the great spread of Catholicism, to increase the number of bishops, and passed a decree recommending the formation of the Sees of Chicago, Little Rock, Hartford and Milwaukee, and the Apostolic Vicarate of Oregon Territory. The Court of Rome immediately acted upon the recommendation of the council. Apostolic letters for the consecration of three new bishops arrived in New York early in 1844, and on the 10th of March, three new bishops were consecrated in St. Patrick's Cathedral, by the Rt. Rev. John Hughes, Bishop of New York. The three newly consecrated bishops were Rt. Rev. William Quarter for the Diocese of Chicago; Rt. Rev. Andrew Byrne, for the Diocese of Little Rock, and Rt. Rev. John McCloskey, Coadjutor Bishop of New York. Bishop Quarter, not however without many a regret, left his parish, St. Mary's in New York, for his new field of labor, the Diocese of Chicago, in which St. Mary's was the principal church, and the only one within the city limits. On the 18th of April, accompanied by his brother, Very Rev. Walter J. Quarter, he left New York for Chicago, arriving there on Sunday, May 5, 1844. On the day of his arrival he said mass in the old church and preached in the new one, then unfinished and afterward the cathedral. Not only was the church building unfinished, but worse than all, the congregation was burdened with a debt, on their church of \$3,000, on an adjoining lot, where afterward stood the Convent of Mercy, of \$1,000, and on the graveyard of \$400, thus making an aggregate indebtedness of nearly \$5,000, upon some of which from ten to twelve per cent interest was being paid. Then the congregation was very poor, and it seemed impossible for them to pay off this indebtedness and to finish the church. Therefore Bishop Quarter and his brother, the Very Rev. Walter J. Quarter, united their funds and paid all the debt with their private means. The Bishop's noble example was not without its effect upon his congregation, for so harmoniously and successfully did they labor that within a year they had the satisfaction of kneeling before their new altar in their finished church, whose glittering spire and golden cross reflected the first rays of the morning sun as it rose from the bosom of Lake Michigan, and which was the first and then the only steeple in Chicago. After the departure of the two priests, Rev. Maurice de St. Palais and Rev. Mr. Fischer, at the peremptory command of the Bishop of Vincennes, Bishop Quarter was without a priest to watch over the district. However, before the end of June he ordained three, Rev. Jeremiah A. Kinsella being one of them. By the close of the year 1844, the cathedral was finished, and the college and seminary were commenced. Upon the completion of the latter, he next set about furnishing facilities for the education of the female portion of his flock. He was deeply impressed with the necessity of a proper training of young women, knowing that upon them, as wives and mothers, depends in great measure the character of the people. In order to supply this want, Bishop Quarter applied to Bishop O'Connor, of Pittsburgh, for the establishment in Chicago of a branch of the order of the Sisters of Mercy. In response to this appeal, five members of the order, accompanied by their superior, Sister Mary Francis Ward, and Very Rev. Walter J. Quarter, arrived in Chicago on the 23d of September, 1846. On the day of their arrival the bishop conducted them to his own residence, a low, one-story, frame house, which, with many fears as to their satisfaction with it, he resigned to them as their convent, retiring himself to an abode, compared with which, the one abandoned by him was a palace. On the 11th of November he established the Theological conferences, the first in America. In order to enhance the spiritual welfare of his flock, he directed the Sisters of Mercy to establish a sodality of the Blessed Virgin, by means of which the female children might the more thoroughly be instructed in their religious duties. He also directed the instructors

in the Academy of St. Joseph to form among the male children a St. Joseph's Society, that the members of it might be taught to emulate the exalted virtues of St. Joseph. He originated the Chicago Hibernian Benevolent Emigrant Society, the object of the association being to welcome the Irish immigrant to his new home, to furnish him, if need be, with timely assistance, to advise and direct him, and guard him against imposition by sharpers who were ever ready to plunder him the moment he set foot upon our shores. In this way was the life of Bishop Quarter spent, in establishing and furthering works of charity, benevolence, improvement and progress even up to the day before his death, which occurred April 10, 1848. During Lent he was engaged in delivering a series of lectures on the "Marks of the True Church," and on Passion Sunday he lectured at last mass at the cathedral on the Apostolicity of the True Church. This was his last lecture. On leaving the pulpit he was much fatigued, and at vespers his voice

FIRST CATHOLIC CATHEDRAL.

wanted its usual fullness of tone. About two o'clock next morning, Mr. McElhearn, who resided in the house with him, was awakened by his moans, and hurrying to his apartment, found him sitting on the edge of his bed, and complaining of a severe pain in his head. Although medical aid was immediately summoned, his strength rapidly failed, and having received the consolations of religion, he sank into what seemed to those around him a deep sleep, uttering as his last words, "Lord have mercy on my poor soul." From this sleep he did not awaken, but died of cerebral congestion about three o'clock in the morning of the 10th. For two days his remains, dressed in full pontificals, lay exposed at his residence, where they were visited and viewed by Catholic and Protestant alike. At two o'clock on the 12th, they were removed to the Cathedral and placed immediately without the sanctuary in front of the altar. At three o'clock on Friday, the Feast of the Seven Dolors, the funeral ceremonies commenced and concluded about five o'clock, the funeral oration being delivered by Rev. Mr. Feely, of Peoria. The body was deposited at the rear of the church in a tomb prepared for it, beneath the sanctuary and in front of the altar he himself had reared. The body of the Bishop was embalmed by Prof. John E. McGill, of the University of St. Mary's of the Lake, and inclosed in three coffins. The inner one was black walnut with a silver cross upon it, bearing the following inscription: "Rt. Rev. William Quarter, D. D., First Bishop of Chicago, Consecrated March 10, 1844. Died April 10, 1848. *Requiescat in Pace.*" Over the vault, which was of brick and lined with waterproof cement, was a beautiful white marble cross about six feet high, with engravings in bas-relief of the Bible, Missal, Crosier, and Miter on the top; on the horizontal part the same inscription as was on the coffin, except the "*Requiescat in Pace,*" which was on the lower part. On the riser of the marble step leading to the altar was a scroll bearing the inscription: "*Pretiosa in Conspectu Domini, mors Sanctorum ejus.*" Within the cathedral was erected to his memory a beautiful cenotaph, to defray the expense of which Protestants contributed liberally, as did the Catholics. A young Protestant poetess of rare talents, Miss Mary A. Merritt, gave a volume of her poems, the proceeds from the sale of which was added to the

contributions. On Sunday, April 30, 1848, an address was delivered by the Very Rev. Jeremiah A. Kinsella, on the necessity of transmitting to posterity the memory and virtues of this distinguished man, whose life had been so beneficial to society. Rev. Kinsella requested the gentlemen to meet in the afternoon in the basement of the cathedral to deliberate on the matter. In obedience to this request a large number of citizens assembled. D. L. Gregg was appointed chairman, T. J. Kinsella secretary, and a committee of five was designated to procure subscriptions. This committee suggested that a committee be appointed in each block of each ward of St. Mary's parish. The suggestion was acted upon, and John Breen was made treasurer. A central or executive committee was appointed to co-operate with and direct the different committees, and also to communicate with all who might be willing to assist. This executive committee consisted of the following gentlemen: The Very Rev. Jeremiah A. Kinsella, Rev. Mr. McElhearn, Rev. Mr. Scanlan, D. L. Gregg, and Thomas J. Kinsella. The following were appointed to act as committees in the several blocks for the procuring of subscriptions: Michael Byrne, William Flemming, John Davlin, John McGoven, Philip Carlon, James Carney, James Fitzsimmons, John Serehan, Captain Parker, James McMullen, William Corrigan, John Young, John Quinn, C. McDonnell, Michael Gleeson, John Taylor, Michael Lantry, Bartholomew Ford, John Bush, Michael Diversy, Dennis Skely, Peter Turbot, Michael O'Brien, Michael McGuire, William B. Snowhook, George Brown, Thomas Roche, A. Getzler and B. Blasey. The monument was designed by Mr. Van Osdel, and constructed at the marble manufactory of A. S. Sherman, and a bust was taken after his decease, at considerable pains and expense, by R. N. White.

ST. PATRICK'S CHURCH.—This Church was established early in 1846, by the Very Rev. Walter J. Quarter, V. G. A church building was erected by Augustine D. Taylor the same year, on Desplaines Street, between Randolph and Washington streets, which was opened for religious services on Easter Sunday, April 12. The parish at that time embraced the whole of the West Side of the city. In 1848 the lots upon which it stood were purchased of the canal commissioners for \$3,000. The first church building, which originally cost \$750, was enlarged by Rev. P. J. McLaughlin, who became pastor in August, 1846. In 1850, at the suggestion of the assistant pastor of the parish, the property at the corner of Desplaines and Adams streets was purchased, and also at his suggestion a house was purchased of Mr. Gleeson by Bishop Van de Velde in 1850, in which the parochial school was established. The school was opened in October of that year by Patrick Dillon, afterward the well known and popular president, for many years of Notre Dame University, Indiana. In 1854 Rev. P. J. McLaughlin commenced the erection of the present brick and stone edifice on the new lots, at the corner of Desplaines and Adams streets. This building was completed by the Very Rev. Dennis Dunne, V. G., sufficiently to be used for religious purposes in the summer of 1856. He continued to improve it until he made it one of the finest church edifices in the city at the time. Its style of architecture was the Romanesque. Stained glass windows were used, and the interior was, for the time at which the church was erected, elegantly frescoed. It is a two-story building, basement of stone, and upper story containing the main auditorium, of brick. The auditorium, including the large gallery facing the pulpit, has a seating capacity of about 1,200. Originally it was the design to ornament the building with a high spire on each front corner, but this has not yet been accomplished. The old church building was moved on to the lots at the corner of Desplaines and Adams streets and employed for the purposes of the parochial school. The first baptism in St. Patrick's parish was that of Edward Carroll, son of Owen and Elizabeth Carroll, March 12, 1846; and the first marriage that of John McCuniff to Sarah Ladan, February 11, 1846. The successor of Very Rev. Walter J. Quarter was Father McLaughlin, who remained with the Church until he was himself suc-

ceeded by the Very Rev. Dennis Dunne, in September, 1854. Mr. McLaughlin's assistants were as follows: Revs. P. L. Scanlan and John O'Reilly, in 1848; Revs. Thomas Canada, James A. Drew and Francis Darwin in 1849; Rev. Patrick Terry from September, 1850, until June, 1852, and Rev. Michael Donohue from this time until the close of his term of service. The Very Rev. Dennis Dunne, V. G., became pastor September 11, 1854. His assistants were as follows; Rev. Michael Donohue until 1855; Rev. Edward O'Neil from 1855 to 1857; Rev. Michael Downey and Edward Kenney from the beginning of 1856 to the latter part of 1857; Revs. P. Gaffney, Michael P. Lyons and John Magan in 1857.

ST. PETER'S CHURCH.—German Catholics began coming to Chicago, though not in large numbers, before the Revolution of 1848, but in 1846 they were sufficiently numerous to sustain two churches of their own nationality, and hence the organization of two German Catholic churches—St. Peter's on the South Side, and St. Joseph's on the North Side—in the latter year. Previously all the Catholics had assembled in St. Mary's church. Father John Jung was given permission by Bishop Quarter to build a church. Bishop Quarter gave a lot for the purpose on Washington Street, between Wells and Franklin, and here in the spring of 1846, a few industrious German Catholics began to erect an edifice for St. Peter's Society. Among them were John Gross, Joseph Yager, John Glasen, Andrew Schall, Andrew Schaller, Nicholas and Peter Reis, Joseph and Anton Berg, Hubert Maas, Michael Gleinhans, Joseph Schumacher, John Paul, Adam Amberg, John B. and Frank Bush, Casper Pfeifer, Michael Eule, and Mr. Hahn. The dimensions of the lot received by the society were eighty feet on Washington Street by one hundred and eighty on Wells. Father Jung was the first priest in charge, and through his energetic management the society succeeded in erecting not only their church, but also a rectory and school-house—all frame structures. The church was a one-story building, forty by sixty feet, capable of seating about seven hundred people; was surmounted by a small steeple containing a bell, and cost about \$900. The rectory stood on the southeast corner of the lot, back of the church, and the school-house on the southwest corner. In 1850, as speculation increased and railroads commenced to be built into the city, a large portion of the members were compelled to move south toward Twelfth Street, and also into the southern part of the city. The removal of the inhabitants rendered necessary the removal of the church property. Permission was given to Father Plathe, then priest in charge, to remove to a lot on the southwest corner of Clark and Polk streets, where the church now stands, and to this lot, in the latter part of 1853, the society removed its buildings. Here the first services were held on Christmas Day, 1853. At that time the surroundings of the church were uninventing, being swamps and wilderness, but during succeeding years improvements were made, and in 1863 the society had so increased in numbers by immigration that Father Maeger, priest in charge, erected the brick church which still stands upon the lot. The first priest in St. Peter's was Father John Jung, who officiated temporarily for both this and St. Joseph's, saying high mass on alternate Sundays in each church, and celebrating low mass when not celebrating high mass. This arrangement lasted but a few months, when Rev. Hermann Liermann became priest and remained about two years. Father Liermann was succeeded in 1849 by Rev. Antonius Volker, who remained until 1852, when Rev. James

Bernard Weikamp became priest. Father Weikamp remained until 1854, when Rev. G. H. Plathe succeeded him, and remained until September 23, 1855, when he was succeeded by Rev. C. Schilling. Rev. Father Schilling remained until the 5th of the following October, when Rev. G. H. Oslangerberg became priest, and was himself succeeded by Rev. Hermann Liermann, who returned to the church on the 6th of January, 1857, and remained three years. The membership of this Church, which at first consisted of about thirty families, increased until when most prosperous, previous to the removal, it comprised about one hundred and fifty families. Besides a Sunday school there was a day school connected with St. Peter's Church, which was first taught by John Kribler, who continued with the school six or seven years, when it was taken charge of by Frederick Pryor, who remained about the same length of time.

ST. JOSEPH'S CHURCH (German) was established early in 1846. Among the original members of the society were Peter Gebel, Michael Diversy, Augustine Gauer, Jacob Miller, Maurice Baumgarten, John S. Vogt, Frank Spohr, Motts Kriezer, Mathias Miller, Michael Hoffman, Peter Annen, Mr. Lauks, Jacob Ras-kop, and Henry Gherkin. The society purchased a lot at the northeast corner of Chicago Avenue and Cass Street, upon which they erected a frame building thirty-six by sixty-five feet in size, capable of accommodating about six hundred people, at a cost of nearly \$900. Upon this edifice was erected a small steeple, in which a bell was hung. The church building served the purposes of the congregation until after the Benedictine Fathers took charge of the organization in 1861. The first pastor was Father John Jung, who remained between one and two years, when he left the city and was succeeded by Schaeffer Platte and Father Kopp, who remained about seven years. During the most of Father Jung's pastorate he was without assistants. The records of this Church made previous to 1856 having been lost or destroyed, it is difficult to give a complete history of it previous to that time; but in September of this year Rev. John Baptiste Mager became its priest. His assistant was Rev. E. B. Kilroy, a member of the Order of the Holy Cross. In May, 1857, Father Mager was superseded by Rev. Andrew Tusch, who was replaced by Rev. Bernard J. Force, who remained until August, 1858, and who during a portion of his pastorate was assisted by Rev. J. Hoefflinger. Rev. B. Schnyder became pastor in August, 1858; Rev. N. H. Gillespie in January, 1859; and in September, 1859, Rev. John Baptiste Mager returned to the pastorate. He was assisted by Rev. P. Exel, a member of the Order of the Holy Cross, from February, 1860, to June following, when he was succeeded by Rev. Peter Hartlaub, who remained until October of that year. Father Hartlaub was succeeded in October, 1860, by Father Storr, who remained until May, 1861, when Rev. Charles Schafooth became pastor and remained until June 15, when the Church passed under the care of the Benedictine Fathers, who still remain in charge. During the pastorate of Father Kopp the Church grew until its membership, in 1850, was about sixty families, or nearly three hundred and sixty individuals. Under his successors, on account of the frequent change of pastors, the Church, while it did not decline, remained about at a standstill. In addition to the Sunday school which was started immediately on the organization of the Church, a day school was established, in a small building, about twenty by thirty feet in size, erected for the purpose, contiguous to the church building. The

first teacher in this school was Joseph Stommell, who was succeeded in regular order by Mr. Weinmann, Mr. Schmidt, Conrad L. Niehoff, who taught from May, 1850, to May, 1852, and by John Ketter, who taught until the school passed into the hands of the Sisters of the Holy Cross, in 1861, at the time the Church passed into the charge of the Benedictine Fathers.

ST. MICHAEL'S CHURCH.—Early in the year 1852, a number of members of St. Joseph's Church desired the formation of a new society. This was on account of the crowded condition of their own congregation. The fulfillment of their desires was facilitated by Michael Diversy, who, at the suggestion of Henry Gherkin, donated to the proposed new Church, a lot, eighty-seven and one-half by one hundred and thirty feet in size, on the northwest corner of North Avenue and Church Street; he having in that vicinity fourteen acres of land. Thus encouraged, those who favored the enterprise held their first regular meeting June 20, 1852, at the invitation of Rev. Anthony Kopp, then priest of St. Joseph's Church, acting as Vicar-General for the German Catholics. At this meeting a committee of collectors was appointed, who collected \$750 for the purpose of erecting a church building on the lot donated. With the approbation of Bishop Van de Velde, a frame building forty by sixty feet in size was erected at a cost of \$730. On the 17th of October, 1852, this church was dedicated by Rev. Father Kopp. Upon the church was erected a tower in which a small bell was hung, and in about six years from the time of its erection, it was enlarged by an addition at the north end. As thus enlarged it served the purposes of the congregation until the erection of the new brick church at the corner of Hurlbut and Eugenie streets, when it was used as a school-house until destroyed by the fire of 1871. Among the original members of this Church were William Dussmann, William Faymoville, Michael Diversy, John Kuhn, John Fossel, Christian Kuhn, Nicholas Hansen, John Schummer, Mathias Miller, Conrad Folz, Peter Brachtendorf, Peter Schimberg and Mr. Franzen. At the time of the dedication of the church the number of parishioners had increased to eight hundred. Rev. Anthony Kopp first celebrated mass in this church, and served temporarily as pastor until in November, 1852, when Rev. August Kroemer was appointed its pastor. He remained but a short time. On the 15th of May, 1853, Rev. Eusebius Kaiser, took charge of the congregation and remained until September 29, 1854, when he was succeeded by the Rev. Joseph Zoegel, from Alsace. According to a German historian of this Church, his management was marred, and there were literally "sorrowful appearances against him and the Church directors, in consequence of which he was dismissed in November, 1858." The successor of Father Zoegel was Rev. Anthony Saeger, who came about the 1st of December, 1858, and with the permission of the Bishop left in the beginning of April, 1859. His successor was Rev. Alois Hatala, an Hungarian, who on account of difficulties remained but nine months. The society was then for a long time without a pastor, until in February, 1860, the Redemptorist Fathers took charge of the church. Soon after the building of the church, the lot on the corner of North Avenue and the alley was bought of Michael Diversy for \$250. Of this amount \$115 was collected among the parishioners, and at the solicitation of the pastor, Cardinal Reisach, of Munich, Bavaria, donated \$240. Upon this lot the priest's house was erected. During the pastorate of Rev. Eusebius Kaiser, another lot was purchased, to the north of those already in possession of the congregation. On this a

school-house was built. The first teacher was a German from Milwaukee, named Gartner, who could not speak English. He remained until 1854, and was succeeded by Charles Ranker, who taught the school until 1858, commencing with forty scholars and closing with one hundred and eighty. Mr. Ranker was succeeded by a Mr. Homes, under whom the number of scholars increased to two hundred and fifty. Mr. Homes's successor remained until the school passed into the hands of the Redemptorist Fathers in 1860.

ST. LOUIS' CHURCH was established as an independent organization in 1850. For about two years previous to the building of their own church, quite a number of French Catholics had worshiped in St. Mary's old church building, which then stood in the rear of St. Mary's Cathedral, recently completed by Bishop Quarter, and was used as a convent by the Sisters of Mercy. Rev. Isidore A. Lebel, came to Chicago in 1848; under authority from Bishop Van de Velde, he commenced the erection of a church for his congregation, on a lot leased for the purpose, of Captain Bigelow. This lot was on the east side of Clark Street, between Adams and Jackson. The church was a one-story frame, twenty-five feet wide by seventy-five feet in depth, and cost about \$3,000, of which sum P. F. Rofinot contributed \$2,000. For about two years it remained in an unfinished condition, but in 1852 the congregation became able to complete it, and made it a very neat and comfortable house of worship. The Democratic Press of December 1, 1852, said: "This little edifice on Clark Street, under Rev. Isidore A. Lebel, has lately been refitted and completely altered and renovated. It has been decorated interiorly in the neatest and most appropriate manner, and with the taste and artistic effect which are natural to the French." The body of the church, sanctuary and galleries were neatly painted and papered, and on the whole it was considered one of the prettiest churches in the city. A fine organ was built in the church by Mr. Helinkamp and for the building and completion of the church, for the erection of the organ and of the priest's house, great credit was accorded to Mr. Lebel. In the latter part of 1856, Father Lebel was dismissed by Bishop O'Regan. He went to the Bishop of Michigan at Detroit, and was immediately given one of the best churches in that diocese at Kalamazoo, where he remained until his death in 1878. He was succeeded in the St. Louis Church by Father Le Meister, in October, 1857, who declined to have anything to do with the management of the financial affairs of the Church, and to relieve himself therefrom appointed a committee to act as collectors and disbursers of the funds of the Church. This committee consisted of Daniel Franchere, Toussaint Menard, Narcisse Lebeau, J. B. Valiquette and P. F. Rofinot; the latter of whom was elected chairman of the committee. In May, 1857, the pews were sold for six months, and on the first Sunday of November, Father Le Meister announced from the pulpit that immediately after mass they would be again sold for the ensuing six months, Mr. Rofinot attended to the sale, and collected the money, as the priest would have nothing to do with the finances. Money enough was realized from the sale of the pews to pay off the church debt, and to pay the rent upon the lot, so liberal was the response, and besides this, Mr. Rofinot paid the agent for putting up the organ, and took his receipts for the money expended and the balance of money on hand to Bishop O'Regan, who complimented him very highly for the ability manifested in the management of the business. In May, 1858, the pews were sold again, but this time the money received did not exceed the expenses, and the Bishop told Father

Le Meister that the church would have to be moved from the lot on which it then stood, because he did not want it to stand on a leased lot. Learning that the church was to be moved, Mr. Donahue and others who had property near the corner of Polk and Sherman streets, persuaded the Bishop to purchase two of their lots on Sherman Street, north of those fronting on Polk Street, for which the Bishop paid the money. He then wanted the church moved to the lots bought by him. One Sunday some of the communicants remained after church to consult with the priest. As a result of the consultation, the priest went to the Bishop with the advice that a committee be appointed to act as collectors, and to buy one or more lots upon which to move the church. The committee appointed was composed of the priest, Le Meister; Mr. Poncelet, the Belgian Consul; Dr. Henroten, Dr. Roger and P. F. Rofinot. This committee went to work on that very day (Sunday), and received seven or eight dollars in cash and \$100 in subscriptions toward the purchase of a lot. In order to obtain subscriptions from the French, it was necessary to promise them that the Church should remain a French Catholic Church, and should have a French priest, or the money should be refunded. On Monday afternoon Dr. Henroten and Poncelet had selected and agreed to buy three lots for the use of the church at the corner of Franklin and Quincy streets, payments to be one-fourth cash, balance in three equal annual installments, and they had also secured the privilege of buying two other lots on the same terms, within two years. On the same afternoon Bishop O'Regan had the church placed on rollers preparatory to its removal to the lots purchased by himself. He also the same afternoon notified Father LeMeister that he was silenced. That evening LeMeister went to see Mr. Rofinot, told him he was going away, handed to him his subscription-book and the money he had collected, and the next morning left Chicago. He was next heard from in New Orleans. On Monday evening the committee met, and learned from Dr. Henroten and Mr. Poncelet of their agreement with reference to the three lots at the corner of Franklin and Quincy streets, and approved of the proposed purchase. On their way to the Bishop's to report the progress of their plans they discovered the church on rollers. Having made their report to the Bishop, that official responded: "Well, gentlemen, I shall not allow you to move the church, until you bring me the deed of the lots in my own name." To this Mr. Rofinot replied, "Bishop, you are asking an impossibility. We can not get the deed until we have paid for the lots, and we can not now do more than make the first payment." To this the Bishop excitedly, and with a plentitude of energetic gesticulation, replied: "I want you to understand, Mr. Rofinot, that I can sell all the churches in my diocese, put the money in my pocket, and spend it wherever I please." Mr. Rofinot, to this sally of the Bishop, said: "Yes, Bishop, that is the law in our State, because the Catholics are too trustful of their bishops. But when you came into the diocese did you not take an oath that you would leave all the property to your successors in office forever?" To this the Bishop responded, "I want no insults from you, Mr. Rofinot," and made a hurried movement to leave the room, but was prevented from so doing by the three members of the committee present. At length the interview terminated, the Bishop firm in his determination to move the church on to lots purchased by himself, unless the lots bargained for by the committee were deeded to him before it was moved to them, the committee equally determined that the

church should not be moved to the Bishop's lots. In order to prevent the Bishop from carrying out his designs, Mr. Rofnot consulted his attorney and stated his case, reciting the manner in which the church was built originally, who contributed the money that paid for its erection, etc. But his attorney could give him no encouragement. He cited to Mr. Rofnot a parallel case in Quincy, which on an appeal to the Supreme Court by the Bishop of St. Louis had been decided in his favor. The committee therefore abandoned their opposition to the Bishop's desires, and he soon had the church moved to his lots at the corner of Polk and Sherman streets. In order to make sure that the French should not occupy the pews for which they had paid on the first Sunday in May, the Bishop had the church raised some four feet from the ground. In this condition it remained unoccupied until the following November, when Rev. John Waldron was made priest for the purpose of occupying the church. Then commenced the contest between Mr. Rofnot and Bishop O'Regan, in which so much interest was taken by the French Catholics, and which lasted until the Bishop left Chicago, the results of which will be detailed in the succeeding volume of this History.

ST. FRANCIS D'ASSISIUM.—This church was established in the year 1853, and was located at the corner of Clinton and Mather streets. The first church built by the organization was a small frame structure, having a seating capacity of about four hundred, and cost about \$2,000. At the time of the organization there were about fifty families connected with the society. The first priest was Rev. John Bernard Weikamp, then late priest of St. Peter's Church. Reverend Father Weikamp remained until 1857, when he was succeeded by Rev. G. H. Ostlangerberg, who also had charge of St. Peter's just before being assigned to St. Francis' Church. Reverend Father Ostlangerberg was succeeded in 1858 by Rev. Ignatz Schnirch, who remained until 1859, and was succeeded, July 19 of this year, by Rev. Ferdinand Kalvelage, who has been ever since, and is still (1883) in charge of the congregation. At the time Mr. Kalvelage took charge, the society consisted of about one hundred families, since which time it has increased to eight hundred families, or four thousand members. In 1867, the first church building becoming too small, and the location unsatisfactory, a new and much more substantial church edifice was erected at the southeast corner of West Twelfth Street and Newberry Avenue. The old church building was sold to St. Paul's Catholic Church, and used by that society until swept out of existence by the fire of 1871. The new church building, which is still used by the Church of St. Francis, is of brick, sixty-six by one hundred and sixty feet in size, with walls forty-five feet high, and fifty-eight and a half in the clear inside. The steeple, which was erected in 1875, is one hundred and ninety feet high, and contains a chime of three bells. The cost of the church was \$65,000. An organ was built in the church at a cost of \$5,000. The assistants of Rev. Ferdinand Kalvelage have been the following, appointed in the years appended to their names: Revs. F. L. Yunker, 1867; John Miller, in July, 1868; B. Baak, January, 1870; Charles Schnuckel, September, 1872; Anthony Schmidz, June, 1874; Augustine Wencker, September, 1874; Franciscus X. Sixt, July, 1876; Mathias W. Barth, July, 1878; George D. Heldmann, July, 1881. The societies connected with this church are, St. Francis', organized in 1856, and St. John's, organized in 1865, both for purposes of benevolence; St. Stanislaus' Young Men's Society, St. Stanislaus'

Boys' Society, St. George's Knights, St. Mary's Sodality for married women, St. Elizabeth's Association for helping the poor, St. Rosa's and St. Agnes's Sodalities for young women, the Altar Boys' Sodality, and the Society of Holy Childhood for school children. The corner-stone of a new brick school-building was laid in 1881, at the southwest corner of West Twelfth Street and Newberry Avenue. The house is seventy by one hundred and thirty feet in size, three stories high, and contains sixteen rooms, besides a large hall. The total cost of this building was \$50,000. It was inclosed in the fall of 1883, and ready for occupancy in the spring of 1884.

CHURCH OF THE HOLY NAME.—In 1846 the North Side was made a parish and placed under the charge of the priests of the College of St. Mary's of the Lake. A small room was fitted up in the old college building, which easily contained the congregation that assisted at mass on Sundays. This was the origin of the Church of the Holy Name of Jesus. In 1848 a church building was commenced by Rev. Jeremiah A. Kinsella, who was at the same time rector of the college, and with whom there were associated the Rev. Fathers William Clowry and John Breen. This building was erected on the southwest corner of St. Mary's College grounds, at the corner of Rush and Superior streets. It was completed in 1849, and was used for divine service for the first time on Sunday, November 18, of that year. The growth of Catholicism did not make itself especially manifest on the North Side until 1851, five years after the establishment of St. Joseph's, and two years after the building of the Church of the Holy Name. By this time the number of Catholics had become considerable, and in this latter year Father Kinsella built a small church at the corner of State and Superior streets. This movement gave an impetus to the settlement of Catholics on the North Side, for it is a well known and noteworthy fact that the Catholics prefer to locate near a church, often making many sacrifices in order to do so. In 1852 an addition was made to the little church, but the Catholics increased so rapidly that the necessity of a large and permanent edifice was soon felt. Consequently in the year 1853 the Rt. Rev. Bishop Van de Velde assented to the erection of a large brick church at the corner of State and Superior streets, which should be used as the cathedral of the diocese. The ceremony of laying the corner-stone of the edifice took place August 3, 1853, at 4:30 o'clock P. M. The sermon was preached by the Rt. Rev. Michael O'Connor, Bishop of Pittsburgh. Bishop Van de Velde solemnly blessed the foundation stone. At the ceremonies there were present, in addition to Bishops O'Connor and Van de Velde, the Rev. Fathers McElhearne, Kinsella, Quarter, McLaughlin, Lebel, Tucker, Dunne, Fitzgerald, Clowry, Hoey, Feely, Brady, Kopp, and Donohue. The dimensions of the church were eighty-four by one hundred and ninety feet, and the steeple was two hundred and forty-five feet in height. The material of which the church was built was Milwaukee brick, the style of architecture was Gothic, with windows of stained glass, representing scenes in Biblical history. The building was completed in the fall of 1854, at a cost of \$100,000. Catholics then living in Chicago contributed toward this enterprise with extreme liberality. The Catholics of the parish were gratified to enjoy the opportunity of celebrating mass for the first time in this church on Christmas Day, 1854. The Very Rev. Jeremiah A. Kinsella remained priest until January, 1855, when he, in connection with Rev. William Clowry and Rev. John Breen, was requested by Bishop O'Regan to

resign. The removal of the clergy was not satisfactory to many of the parishoners, and on Wednesday evening, January 17, a meeting was held in North Market Hall for the purpose of expressing adverse sentiments. A series of four resolutions was passed, the substance of which was as follows:

1. Expressing confidence in the priests that had been removed.
2. Pledging themselves to assist in completing the new church, if the priests were permitted to remain.
3. Bowing with most profound respect and reverence to the Church and Bishop, but at the same time appealing to the Holy See.
4. Appointing a committee to draw up a statement of their grievances and forward them to the Pope at Rome.

The committee appointed under the fourth resolution consisted of Charles O'Connor, Patrick Connelly, John Murphy, Edward D. Colgan, Edward Kelly, James Driffy, Patrick McAlpin and John Prindiville. Late in the year 1855 Charles O'Connor brought suit against the Rt. Rev. Anthony O'Regan, Bishop of Chicago, to recover under a contract which the plaintiff had made with a Catholic clergyman, formerly of the city, to build the Church of the Holy Name. The defendant denied all knowledge of such contract, as well as having authorized any party to make such contract for him, but at the same time admitted having offered to pay the plaintiff a fair and reasonable price for the labor expended on the building. On the 6th of November, 1855, a verdict was rendered the plaintiff of \$6,263.96. It was decided to take an appeal to the Supreme Court, but no decision on the subject can be found.

THE UNIVERSITY OF ST. MARY'S OF THE LAKE.—This institution of learning was established June 3, 1844, by Rt. Rev. William Quarter, the newly appointed and arrived Bishop of Chicago. At the opening, however, only the college existed, the germ of the University. The college commenced with two professors and six students, in a portion of the building formerly occupied as the old St. Mary's Church at the corner of Michigan Avenue and Madison Street. The two professors were Rev. J. A. Kinsella and B. McGorisk. The six students Patrick McMahan, B. McGorisk, Timothy Sullivan, and three others whose names cannot be ascertained. On the 19th of December, 1844, the Legislature passed a bill incorporating the "University of St. Mary's of the Lake." Having a charter for the University, Bishop Quarter wished next to establish an ecclesiastical seminary, in which young men might be educated to supply the great dearth of clergymen in the holy ministry. In order to remove the one great obstacle in the way—lack of funds—the Bishop left Chicago for New York early in April, 1845. In about four months he returned, having collected a large sum of money, which enabled him to commence the erection of the building. The foundation of the college and seminary were begun on the 17th of October, and so rapidly did the work progress that they were under roof on the 22d of November. But in order to complete the buildings more money was required, and to raise the necessary funds the Bishop directed his pastoral of 1846 to his clergymen, urging them to assist him in his undertaking. By the 4th of July the last touch of the painter's brush had been made to the new University, and on that day it was opened with appropriate ceremonies for the reception of pupils. Among the early pupils in this institution were Rev. Dr. John McMullen, late Bishop of Davenport, and General James A. Mulligan. In 1846 among the advantages named as being possessed by this institution were the following: It is situated in the city of Chicago near

the borders of Lake Michigan. The location is pleasant, healthy, and sufficiently removed from the business portion of the city to make it favorable to the pursuit of study. The ample grounds and extensive meadows in the vicinity afford the student an opportunity to enjoy healthful exercise and abundant recreation. The University was situated on the northeast quarter of the block bounded by Chicago Avenue, Rush Street, Superior Street and State Street. It cost \$12,000. The course of instruction in the University embraced the Hebrew, Greek and Latin, English and French, poetry, history, mythology and geography; book-keeping, arithmetic, algebra and other branches of mathematics; intellectual and moral philosophy; natural philosophy and chemistry. German, Italian, Spanish, music and drawing were also taught, but for these there was an extra charge. Board and tuition were \$150 per year. In 1846 the officers and professors of the institution were as follows: Rev. J. A. Kinsella, president; Professors, James Kear, A. B., Latin and Greek; Rev. J. Ubrich, German, Spanish and Italian; Lawrence Hoey, A. B., French and philosophy; John Brady, mathematics; Hugh Brady, English and declamation. The faculty was George A. Hamilton, Lawrence Hoey, William Quarter, Walter J. Quarter, B. McGorisk, J. A. Kinsella, P. McMahan, J. Ingoldsby, and Thomas O'Donnell. According to the catalogue of 1846, there were forty students in the Humanities and fifteen in the Theology. In 1849 the officers and professors were as follows: Trustees—President, Rt. Rev. James O. Van de Velde; vice-president, Rt. Rev. J. A. Kinsella; Chancellor, Walter J. Quarter; treasurer, Lawrence Hoey; secretary, William Clowry; B. McGorisk, John Ingoldsby, Patrick McMahan, Thomas O'Donnell and Dennis Ryan. Faculty—Rev. J. A. Kinsella, president, and professor of dogmatic theology and sacred Scripture; William Clowry, vice-president and professor of moral theology and ecclesiastical history; Lawrence Hoey, A. M., mathematics and moral philosophy; P. Byrne, A. B., modern languages and literature; Hon. David L. Gregg, A. M., rhetoric and belles lettres; B. Rodaham, A. B., ancient languages and literature; P. Baltes, now Bishop of Alton, German language and literature; J. Tracy, English; John E. McGirr, anatomy and physiology, hygiene, chemistry and botany; John Kinsella and James Shields, professors of vocal and instrumental music; tutors, P. McMahan, P. Donohue, P. Lamacher and P. Sherry. In 1851 the faculty consisted of eight members, the president and vice-president remaining the same as in 1849; Rev. John Breen was professor of rhetoric and belles lettres; Rev. Lawrence Hoey, professor of natural philosophy and French; John E. McGirr, as in 1849; Michael Hurley, professor of Latin and Greek; Ferdinand Kalvelage, professor of German, and Mr. Peter, professor of music. There were four tutors: Thomas Clowry, Charles Fay, Patrick Sherry and William Russell. In 1852 John E. McGirr and Ferdinand Kalvelage ceased to be members of the faculty, and H. Knauers became professor of music. Otherwise the faculty and the tutors were the same. In 1853 and 1854 the faculty and tutors were the same as in 1852. About this time difficulties broke out between Bishop O'Regan and some of his priests, in consequence of which Rev. J. A. Kinsella, Rev. William Clowry and Rev. Lawrence Hoey resigned their professorships and left the city. The University property was soon after rented to members of the Holy Cross, at an annual rental of \$5,000. Rev. E. Sobin, at present principal of the Notre Dame University, Indiana, was the first principal of St. Mary's University of

the Lake. In 1858 the University was still under the direction of the members of the Holy Cross, Rev. J. B. Force being the principal. After a few years it became evident that it was impossible to pay the rent, and the members of the Holy Cross retired from the management. In the fall of 1861 secular Catholics again assumed control of the institution, with a faculty organized as follows: Rev. John McMullen, late Catholic Bishop of Davenport, president; Rev. John P. Roles, vice-president, professor of ecclesiastical history and spiritual director; Rev. Dr. McGovern, principal of the ecclesiastical department and professor of dogmatic theology; Dr. T. G. Butler, professor of moral theology. Subsequently the Rev. P. W. Riordan, present Coadjutor Archbishop of the See of San Francisco, was added to the staff. Dr. Quackenbos was professor of Greek, Dr. Beleke professor of German and philology, and Dr. Guerin, professor of English literature. In 1862 the authorities of the University commenced the erection of a building on a large scale, G. P. Randall being the architect. One wing only of this proposed building was erected, at a cost of \$35,000. After the erection of this wing, it was used for students in the lay department, while the old buildings were used for the ecclesiastical department, professors' rooms, and dormitories. In these buildings the work of the University was carried on until 1867, at which time there were twenty-three ecclesiastical students and eighty lay students. For various reasons the number of students soon became so small that it was deemed advisable to abandon the University project, which was finally done in 1868, and the buildings were thenceforward occupied by the St. Joseph Orphan Asylum. From this time the history of this property with that of the Ladies of the Sacred Heart will be found in the third volume of this History.

THE SISTERS OF MERCY.—The Catholics of Chicago are indebted to the Rt. Rev. William Quarter for the establishment of this order in the city, in 1846. The Sisters arrived on the 23d of September, 1846, in company with Sister Mary Frances Ward. Their names were Mary Agatha O'Brien, Mary Vincent McGirr, Mary Gertrude McGuire, Mary Eliza Corbitt and Mary Eva Schmidt. This small group began at once the work of dispensing the rich stores of their earthly acquisitions, opening schools which were well attended from the first. Their convent soon became too small, and Bishop Quarter in the last year of his life, completed the building they occupied in 1849, as convent and academy. It stood on a lot adjoining the cathedral on Wabash Avenue and cost \$6,000. In 1847 the convent was incorporated by the Legislature with a most ample charter and by 1849, such had been the growth of the academy, that ten Sisters were constantly engaged in teaching the two hundred children in attendance at the schools, and there were about fifteen in the community of Sisters. In 1865 a new building was erected on Wabash Avenue, adjoining the old one, which cost \$32,000. The number of pupils in this convent in 1855 was three hundred; in 1860, four hundred and fifty; and in 1865, six hundred and fifty.

THE CATHOLIC ORPHAN ASYLUM was established August 16, 1849. It was under the control of the Sisters of Mercy from its institution until October, 1863. Originally a building known as the Cumberland House, which stood at the southwest corner of Wabash Avenue and Van Buren Street, was purchased for the use of the orphans, large numbers of whom lost their parents by the cholera which ravaged the city that year. On the 13th of February, 1852, another building was opened

to the public, and on the 21st of June the Asylum was incorporated by the Legislature. Some time previous to this a benevolent association had been organized, of which Mrs. Michael Lantry was president, and Rev. John Breen secretary, to procure funds for the Asylum. In 1853 was commenced the erection of a new building which was designed to be more commodious than the old one; the cost of which when completed was \$8,000. The number of orphans in the Asylum in 1849 was one hundred and twenty-five; in 1854, one hundred and forty; in 1859, one hundred and eighty, and in 1863, two hundred. The numbers of Sisters in charge at the same time were: In 1849, five; in 1854, ten, and in 1863, sixteen. The names of the superiors were Sisters M. Stanislaus and M. Ursula.

PROTESTANT DENOMINATIONS.

THE FIRST PRESBYTERIAN CHURCH was organized June 26, 1833, by Rev. Jeremiah Porter. This gentleman had been appointed Chaplain of the garrison at Fort Brady in the fall of 1831. In the spring of 1833, the troops at Fort Brady were transferred to Fort Dearborn. As there was a Baptist mission at the Sault Ste Marie, sufficient to meet the wants of the people at that place, Mr. Porter accepted the invitation of the soldiers to accompany them to Chicago,—the more readily, as quite a number of them were members of his church at Fort Brady, and as the Home Mission Society at Boston had requested him to explore the shores of Lake Michigan to see if there were any settlements where the gospel might be preached. Mr. Porter, therefore, in company with the troops under command of Major John Fowle, arrived off Fort Dearborn Sunday, May 12, 1833, but on account of the roughness of the lake did not land until next day. Major Fowle had come to relieve Captain Seth Johnson; and the little body of Christians in the fort were much cast down over the departure of the Captain, who was a devout Christian and a warm-hearted man. They knew what they were to lose, but did not know what they were to gain; hence it was natural that they should feel impatience and anxiety as to the religious character of those on board the schooner. On Monday, the waters of the lake being sufficiently smooth, the troops and others on the vessel landed. The surprise of those in the village of Chicago was very great and agreeable to find that the schooner brought not only a minister but also the nucleus of a church organization; and a very warm welcome was extended to the strangers. John Wright, one of the praying men in the village, taking the hand of Rev. Jeremiah Porter, said:

"Well, I do rejoice, for yesterday was the darkest day I ever saw. Captain Johnson, who had aided in our meetings, was to leave us, and I was almost alone. I have been talking about and writing for a minister for months in vain, and yesterday as we prayed with the Christians about to leave us, I was almost ready to despair, as I feared the troops coming in would all be utterly careless about religion. The fact that you and a little church were, at the hour of our meeting, riding at anchor within gunshot of the fort, is like the bursting out of the sun from behind the darkest clouds."

Temporary arrangements were made for preaching in the fort; the carpenter-shop being emptied, cleaned and seated, and on the next Sunday morning, May 19, 1833, Rev. Jeremiah Porter preached his first sermon in Chicago, from the text, (John xv, 8,) "Herein is My Father glorified, that ye bear much fruit; so shall ye be My disciples."

In the afternoon, by invitation of "Father Walker," Mr. Porter preached in the log school-house on the

west side of the river, at the Point, half a mile from the fort. Of this meeting Mr. Porter, in his journal, says :

"The school-house was crowded to overflowing and many went away for want of room to stand within the doors. I think I have not preached to such an audience before, only at Mackinac, since I left Detroit. There seemed profound attention. Mr. Wright said his eyes filled with tears several times to see the happy influence of the Major and his fellow-officers on this community."

With reference to other religious services on this, his first Sunday in Chicago, Mr. Porter also says:

"At six o'clock I had a prayer meeting in the fort. After candle lighting I went to Father Walker's place, where he had given notice that a Methodist minister from New York would preach. Though it was eight when I went in, I found no one but Mr. Walker, and he was grieving that he was disappointed in regard to his preacher, who having an opportunity to go on to New York that afternoon, had embraced it and left Mr. Walker to fill the appointment. If he had so little regard for the Sabbath, I think it is well he did not stay and preach. At length fifteen persons came in and Mr. Walker addressed them."

Early in the morning of the same day Mr. Porter witnessed a desecration of the Sabbath which greatly shocked him. Quoting still further from his journal:

"The first dreadful spectacle that met my eyes on going to church was a group of Indians sitting on the ground before a miserable French dram house, playing cards, and as many trifling white men standing around to witness the game."

Thus passed Mr. Porter's first Sunday in Chicago. On the next Sunday, May 26, Rev. Mr. Kent, of Galena, paid a visit to Mr. Porter, and preached for him an excellent sermon from Hebrews, xi, 24-26. On June 1 arrangements were made for public worship outside the fort. This was because many of the citizens objected to going into the fort. Father Walker consented to rent to Mr. Porter his house at the Point for one-half of each Sunday, and for some time, commencing with Sunday, June 2, he preached in the fort to the garrison at 10 A. M., and to the citizens at 2 P. M., in Father Walker's log house; held prayer meeting at 6 P. M. in the fort, and preached alternately with the Methodists on Sunday evenings at the Point. This arrangement was still unsatisfactory, and, as there was no prospect of having better accommodations, except as they should be provided by those who desired the advantages of them, Mr. Porter advised that the sums subscribed for his support should be appropriated to paying for the erection of a frame and covering it as soon as possible. The citizens interested met in the evening of June 11, and appointed a committee to carry this plan into effect, which made it necessary for Mr. Porter to look to the Home Mission Society for support for the year to come.

On Wednesday, June 26, 1833, Mr. Porter organized the First Presbyterian Church with twenty-six members, seventeen of them, including Major DeLafayette Wilcox, having been members of this church at Fort Brady, the remaining nine being citizens of the village. The names of these nine citizens were John Wright, Philo Carpenter, Rufus Brown, John S. Wright, J. H. Poor, Mrs. Elizabeth Brown, Mary Taylor, E. Clark, and Mrs. Cynthia Brown. The names of the seventeen members of the garrison were, Major DeLafayette Wilcox, Mrs. S. G. Wilcox, Miss Eliza Chappel, Lieutenant L. T. Jameson, Sergeant J. Adams, Mrs. H. Adams, Sergeant W. C. Cole, Mrs. Julia Cole, Mrs. Ruth Ward, Richard Burtis, Benjamin Briscoe, Ebenezer Ford, John Guy, Isaac Ingraham, William Johnson, David Lake, and James Murray. All of these first members were Congregationalists, except Philo Carpenter, who was a Presbyterian. John Wright, Philo Carpenter and Major Wilcox were chosen and ordained elders of the church. For some time the society continued to worship in Father Walker's log school-house at the Point. On Sunday, June 30,

Mr. Porter attempted to re-organize the Sunday-school founded the year before by Philo Carpenter, but was prevented doing so by heavy showers of rain. The first communion held in Chicago was on Sunday, July 7, 1833. The service was supplied by Major Wilcox from his table silver. Twenty-seven sat at this first communion. Mr. Porter's journal reads: "Many witnessed the solemn scene, but a majority were females, as two vessels were unloading in the harbor, causing a wanton abuse of the holy day by many who sin against clear

Jeremiah Porter

light, and abuse divine compassion and love." The subject of the erection of a church building having agitated the minds of the members for some time, Lot No. 1, Block 34, Original Town, southwest corner of Lake and Clark streets, was chosen and measures taken to build upon the lot, which has been described as being at that time a "lonely spot, almost inaccessible on account of surrounding sloughs and bogs." While preparations were being made for the erection of their temple of worship, they and other citizens of the village were surprised one morning to see the frame of a small building on the Lake-street front of their lot, which had been raised during the previous night. Work upon this little building was industriously continued during the day. But alas for the hopes of the prospective store-keepers! Their squatter right of occupancy was not to be recognized, and during the succeeding night, in obedience probably to the suggestion of a member of the society, a number of yokes of oxen were noiselessly marshalled in front of the trespassing store, heavy chains securely fastened to the sills of the building and to the oxen's yokes, and in the morn-

ing away down Lake Street the intruding building was seen standing, to indicate thwarted hopes and to teach the lesson that the rights of property could not with impunity be invaded. Meantime their own preparations proceeded. "The timbers were at length hewed and squared and set up on the prairie. . . . Each one, according as he was able, gave his mite to aid in the construction; one worked at the turner's lathe to prepare the columns that adorned the pulpit; some worked in the mortar-bed, and all labored who could, for a common desire actuated the members, which was not only to have a house exclusively set apart for worship, but, when done, to be free from that crushing incubus—debt." The church, when built, stood upon the southeast corner of the lot, fronting east; it was built by Joseph Meeker; its size, though not now definitely ascertainable, was about thirty by forty feet, and the cost was \$600. It was completed during the late fall or early winter months of 1833, and dedicated January 4, 1834. Notwithstanding the extreme severity of the weather, the mercury being twenty-four degrees below zero, a respectable audience assembled to participate in or witness the dedicatory services. The prayer of consecration was offered by Rev. A. B. Freeman, of the Baptist church, then recently organized, and the sermon was delivered by the pastor, Rev. Jeremiah Porter, from the text (Psalm lxxxiv, 3): "Yea, the sparrow hath found a house, and the swallow a nest for herself, where she may lay her young, even thine altars, O Lord of hosts, my King and my God."

During the following year, fifty-two persons were added to the membership, and by December, 1834, the church had become self-supporting. The following resolution was passed in that month:

"Feeling under great obligations to the American Home Missionary Society, for its aid in sustaining the Rev. Jeremiah Porter as pastor of the church, in our infancy, we now gladly assume his support from the 1st of June of last year."

In the spring of 1835, Mr. Porter was chosen by the Presbytery of Ottawa its first delegate to the General Assembly which met that spring in Pittsburgh. After the adjournment of the Assembly, Mr. Porter was married, at Rochester, N. Y., to Miss Eliza Chappel, then late of Chicago, and with his wife visited his parents who were living in Massachusetts. In the autumn of that year, he accepted a call to the Main-street Church, in Peoria, thus leaving the church without a pastor; but after deciding to leave, made efforts in various directions to supply the approaching vacancy, feeling "as if Chicago should have the best minister in the land." There were at that time one hundred and nine members.

The church had considerable difficulty in finding a successor to Mr. Porter. They corresponded with Edward Humphrey, of Amherst, Rev. Dr. J. W. Adams, of Syracuse, Dr. E. N. Kirk, and Dr. Hall, of Auburn Theological Seminary, and Dr. Joel Hawes, of Hartford, Conn., all to no avail. The latter gentleman took his letter which had been written by Deacon John Wright, to Judge Williams of his own Church, with the remark, "I've got a letter from some place out west called Chicago, asking me to come there and preach. Can you tell me where it is?" Upon being informed that it was in a great swamp west of Lake Michigan, he decided to remain in Connecticut. Dr. Deric Lansing, of Auburn, once preached here, but could not be induced to remain. For some time during the year and a half that the church was without a regular pastor, Rev. Isaac T. Hinton was virtually pastor of the Presbyterian, as well as of his own, the Baptist Church, Be-

sides these mentioned Rev. Mr. McLain preached a few times. Of this gentleman, Miss Frances L. Willard, who was one of the early teachers, wrote as follows in a letter dated May 25, 1836:

"Mr. McLain arrived in good health—receives much attention—gives good satisfaction thus far—preaches with eloquence and studied argumentative style. I have met him often, and from conversations with him suspect that even Chicago will not meet his ambition. It is plain to me that his heart is set on New Orleans."

An extract from the same authority, on the state of religion in Chicago, is as follows:

"Religion here—ah! Look at Alton, and see sister churches suffering from the same cause—worldly cares. Yet Alton is apparently more spiritual than we are. Your friend Brown (William H.) seems to take the lead among the church. But all are asleep. Mr. McLain says that in all his travels he never was in a place where money was talked of as here. Ten thousand dollars is considered nothing! Fifty thousand or one hundred thousand only are named."

Again under date of August 25, 1836, Miss Willard wrote:

"I like everything here but the low state of religion. Rev. Mr. McLain has returned to Ohio, and we are without preaching in the Presbyterian society. It was a year last June since the sacrament of the Lord's Supper was administered here, and it is still neglected."

On December 25, 1836, she wrote:

"We have prospects of a minister at last. Rev. Mr. Blatchford from some town near New York City has received a call, has not accepted it but will preach here this winter. Thirty thousand dollars are subscribed for the erection of a meeting house, which is to be built of marble. It is not calculated by the committee, that it will be finished in less than two years. . . . The building of four meeting houses (Episcopal almost finished) will abundantly occupy the public mind for two years to come."

Again under date of October 9, 1837:

"I intend to continue teaching but the fine promises of public buildings, etc., made to me before I left Alton, have never been fulfilled, nor is there now any prospect even of a meeting house within two years. Chicago is blest with four spiritual ministers, but the god of this world has blinded the eyes of the inhabitants."

At length, in 1837, the Rev. John Blatchford, who was traveling from New York and unexpectedly detained here, was called and installed pastor in July. Mr. Blatchford remained with the church until August, 1839. During his pastorate the building was removed south of Washington Street. Mr. Blatchford was succeeded by Rev. Flavel Bascom, who commenced his labors in December, 1839, and was installed as pastor in November, 1840. Mr. Bascom had preached once in Fort Dearborn, in 1833, at the request of Philo Carpenter, and when shown by Mr. Carpenter the place selected, on Clark Street, near Lake, he said it would bring the church too far out on the prairie. The building, when moved to its second site, was doubled in length, and, in the summer of 1840, was doubled in width. In 1848 the brick church, which stood at the corner of Clark and Washington streets, was so far completed that in the fall religious services were held in the basement, and in September, 1849, it was completed and dedicated. Mr. Bascom preached the dedicatory sermon from the text, Haggai, xi, 9: "The glory of this latter house shall be greater than of the former, saith the Lord of hosts." At his own request he was dismissed in December, 1849, and was succeeded by Henry Harvey Curtis, who began his ministry August 25, and was installed pastor on the 13th of October, 1850. After a successful pastorate of eight years, he retired for the purpose of assuming the presidency of Knox College, Galesburg, Ill., departing from the church June 8, 1858. His death occurred September 18, 1862.

The church building dedicated as above recited in

October, 1849, cost \$28,000. In its erection a debt was incurred which, for some years, greatly embarrassed the society. As the city prospered, business houses so encroached upon the residences that surrounded the church, that the people sought more retired localities for homes. The church itself also became inadequate to accommodate the rapidly increasing congregation, and as a result of all these causes it was resolved, in the autumn of 1855, to sell the lot and the building, pay the outstanding indebtedness, and divide the net proceeds in such manner as to secure the erection of three new church buildings, in the three divisions of the city. This plan was adopted on the supposition that those members living on the West Side would identify themselves with the Third Presbyterian Church, organized July 1, 1847; and that those living on the North Side would affiliate with a new society then in contemplation there, and which was consummated in the organization of the Westminster Presbyterian (afterward Fourth) Church. The property was sold in November, 1855, and a lot on Wabash Avenue, between Van Buren and Congress streets, was immediately purchased by the First Presbyterian Church for its own use. A new edifice was erected, of Athens marble, and of the Norman style of architecture, the front highly ornamented with richly-carved work in stone. The main audience room was sixty-three by ninety-seven feet, and fifty feet to the highest point in the vaulted ceiling. This church was dedicated October 15, 1857. The lot cost \$16,000 and the building \$115,000.

By way of review of the history of the First Presbyterian Church a brief statement as to its work and growth and relations to other Presbyterian churches in Chicago is appropriate. In the early part of 1841, a series of revival meetings was held, which were very successful in its results. The meetings were conducted by Rev. Flavel Bascom, pastor of the church, assisted by Rev. Mr. Gallaher, an itinerant revivalist. As a result of this revival one hundred new members were added. The years 1843 and 1845 were likewise distinguished by extensive revivals. In April, 1846, there were reported to the Presbytery four hundred and fifty-six members. During the next five years the membership declined to two hundred and fifty-four. This was in part owing to the organization of the Third Presbyterian Church; but only in part, as during this time the population of the city increased from 10,000 to 25,000, and the First Church should on this account have received considerable accessions to its membership. There was want of harmony within the Church itself. In the winter and spring of 1852, peace having returned, "a gentle but precious season of spiritual refreshing" took place, the Church recovered a portion of what it had lost, and made steady but sure progress until the winter and spring of 1857 and 1858, when in consequence of a powerful revival "about seventy-five were added on profession, and an impulse was imparted to the spiritual activities of the Church," which was especially perceived in the establishment of mission schools.

The first baptism in the First Presbyterian Church occurred Sunday, November 24, 1833, the subject being the infant daughter of Major Wilcox. The ceremony took place in the Major's house in Fort Dearborn, Mrs. Wilcox not being able to go to church. The little child was four months old. With reference to this baptism, Rev. Jeremiah Porter says in his journal: "The child seemed to smile with joy, after prayer and the application of the water, as though it were conscious of the act, and I hoped as an evidence that the prayer had

been answered, and that the child's heart had been baptized by the Holy Spirit."

REV. JEREMIAH PORTER was born in Hadley, Mass., in 1804, where his ancestors had lived for nearly two centuries. Samuel Porter went to Hadley in 1639, and the house built by him is still owned by his descendants. The grandfather of Rev. Jeremiah Porter, whose name was also Samuel, married Susanna Edwards, a daughter of President Jonathan Edwards. His father, William Porter, was a physician and served during the war of 1812, as surgeon in the Army of the United States, and died in Hadley, Mass., at the age of eighty-four years. His mother, Charlotte (Williams) Porter, was a daughter of Hon. William Williams, of Hatfield, Mass. William and Mrs. Porter were the parents of twelve children, several of whom died in infancy. Of the six who lived to arrive at man's estate, most of whom lived beyond the threescore years and ten, the eldest of whom died at eighty-three, Jeremiah was the youngest. He was educated at Hopkins Academy, under Rev. Dr. Dan Huntington, father of Bishop F. D. Huntington, of the diocese of central New York, and in Lee, Mass., in the family of Alvan Hyde, D. D. At the age of seventeen he entered Williams College, at the beginning of the presidency of Dr. Edward Dorr Griffin. He graduated at the age of twenty-one, and in the autumn of that year, 1825, entered the Theological Seminary at Andover, Mass. At this time he had not decided upon the choice of a profession, but had not a taste for the law or medicine. After two years' study in this seminary, he passed the winter at his father's home. In the spring of 1828, he was induced by Dr. Griffin to accept the position of principal of the Monitorial High School, in Troy, N. Y., and after spending two pleasant years in that school, he was induced by the late Henry A. Boardman, D. D., of Philadelphia, to accompany him to Princeton Theological Seminary, N. J. Here for a year Mr. Porter enjoyed the teaching of Drs. Alexander, Miller and Hodge, and graduated from this institution in 1831. In the spring of that year he was licensed by the Hampshire Congregational Association to preach the Gospel, and preached in several towns in that county. But previous to his graduating at Princeton, Rev. Dr. Absalom Peters, of New York, Secretary of the A. H. M. Society, visited the seminary in search of ministers for the West. Dr. Peters told Rev. Mr. Porter of a wish sent from Fort Brady, Sault Ste. Marie, Mich., for a minister at that place, and asked him if he would listen to that call. To this Rev. Mr. Porter replied, that if Dr. Peters failed with the gentleman at Andover, to whom he had applied, and considered him a proper man for the place he would go. Dr. Peters soon wrote to Rev. Mr. Porter from New York, to proceed at once to his Massachusetts home to be ordained by the same association that had licensed him to preach, and go at once to the "Soo," as the Sault Ste. Marie was then usually called. After being ordained he left by stage toward the West, for a country of which he had heard much, but of which he knew little, leaving all his family and kindred behind, except one brother who lived at Auburn, N. Y., with whom he spent the first Sabbath of his journey, having reached there from Albany by the newly constructed New York & Erie Canal. By the same means he proceeded to Buffalo, then a city of three thousand inhabitants, and into which new life had been infused by the completed canal. He then proceeded by steamer to Cleveland, a city then containing fifteen hundred inhabitants; thence to Detroit where he waited several days for a schooner, the last one up that fall, upon which he embarked for Mackinac. Upon arriving at Mackinac he was received into and kindly entertained by the charming Christian family of Robert Stuart, of the Astor Fur Company, the company being composed of John Jacob Astor, Robert Stuart and Ramsey Crookes. In the family of Robert Stuart, Rev. Mr. Porter awaited an opportunity of going over to the Sault, and while waiting preached at an evening service at Rev. William M. Ferry's church. On Thanksgiving Day, November 24, a small bark canoe, sent from the Sault by Mr. Schoolcraft for him arrived, with orders "not to return without Mr. Porter." A larger canoe, manned by Indians, had started previously, but overtaken by a snow-storm, and delayed until the provisions were eaten up, had returned to report to Mr. Schoolcraft. Hence the sending of this small canoe in charge of three French voyageurs with the above orders. Feeling that he could not wait to participate in public Thanksgiving services at Mackinac, he determined to reach the Sault as early as practicable, and so, with the three Frenchmen, and a negro on his way to an army officer at Fort Brady, and with a mess basket provided by his newly-found friend, Mrs. Robert Stuart, he set out in the morning for his destination. Something over three days and nights were occupied in the voyage, forty-five miles coasting on Lake Huron, and forty-five miles ascending St. Mary's River, resting each night by camp fires on shore, and pitching their tent one of the nights in snow. At the foot of the falls they found the village and fort, but landed below both, at the United States Indian Agent's beautiful home. Breaking the ice to land, Rev. Mr. Por-

ter went directly to Mr. Schoolcraft's house, where he met with a most cordial welcome. Snow then covered the ground and did not disappear until April, 1832. The boat that carried Mr. Porter also carried up the last mail of the season, and mail was received but three times during the ensuing five months. At the Sault, Rev. Mr. Porter found a Baptist mission to the Indians in charge of Rev. Abel Bingham. Rev. Mr. Bingham with his family lived in the mission house and had a school-room for a place of worship for the Indians, and such Americans as chose to attend. Invited by Mr. Bingham, Mr. Porter preached in this school-room the first Sunday after reaching the Sault, to Indians, officers and soldiers. This was Sunday, December 4, 1831. Mr. Schoolcraft soon had a store vacated, and fitted up with seats and a pulpit, and this building so transformed was used as a church. A Presbyterian Church was at once organized, composed of three men who had been members of Mr. Ferry's church at Mackinac, Presbyterians; Mrs. Schoolcraft, an Episcopalian, two of her sisters received on confession, and one Methodist woman. Mr. Porter and Mr. Bingham co-operated with each other in religious and moral work, and encouraged by the officers at Fort Brady, enjoyed a revival. Dancing which had been indulged in winters previous was given up. The Post Commandment with Mr. Schoolcraft took the lead in furthering temperance, and all the officers and their wives took the temperance pledge, except one family, and before spring all expressed conversion to Christ except this one Lieutenant and his wife. One officer and his wife united with Mr. Bingham's church. Most of the others united with the Presbyterian Church. In the spring of 1832, this church numbered thirty-three, and the Baptist Church about the same number. On account of the breaking out of the Black Hawk War in 1832, one of the companies of soldiers under Captain J. B. F. Russell, was ordered to join General Winfield Scott's army at Mackinac, on its way to Chicago. The Post Commandant, Major De LaFayette Wilcox, was succeeded by Major John Fowle, who in the spring of 1833 was transferred to Fort Dearborn, Chicago, and Mr. Schoolcraft was transferred to the Indian Agency at Mackinac. Thus Mr. Porter's Fort Brady church was broken up, by the removal of its members to other fields of duty, and Mr. Porter considered it his duty to accept the invitation of Major and Mrs. Fowle to accompany them to Chicago, leaving the few remaining members to unite with Mr. Bingham's Baptist Church. On the 4th of May, 1833, Major Fowle with his company and Rev. Jeremiah Porter, left Fort Brady, and spending one day at Mackinac, proceeded up the west shore of Lake Michigan to Chicago, perceiving on the voyage no human habitation between the two points except at Milwaukee, where lived Solomon Juneau, the trader of the American Fur Company, with his Indian wife. On Saturday, May 11, the schooner dropped anchor opposite the mouth of the Chicago River. On Sunday the lake was so rough and Mr. Porter so sea-sick, that he remained on board over that day, and until about noon on Monday the 13th, when he was rowed in the ship's long-boat to the mouth of the river, about a mile south of Fort Dearborn, up the stream, and around Fort Dearborn to the junction of the North and South branches of the river, and to Wattle's small tavern on the West Side. Here Mr. Porter met many of the business men of the village, who had come there to dine, as it was their boarding house, and among them John Wright, an account of his meeting with whom may be found in the history of the First Presbyterian Church. At this time there were about three hundred people in Chicago, many of whom had fled from the country during the war of 1832, to secure protection in and around Fort Dearborn. Among these was P. F. W. Peck, who invited Mr. Porter to make his temporary lodging place and study in the unfinished loft of his two-story store, standing on the southwest corner of South Water and La-Salle streets. The first building in the rear of this store was the log house of Rufus Brown, where Mr. Porter found table board. From this time forward until Mr. Porter left Chicago, in September, 1835, his history is substantially that of the First Presbyterian Church for the same period (q. v.). In that month, having accepted a call to a small new church in Peoria, he immediately commenced his labors there. In the fall of 1837, Mr. Porter attended the Synod of Illinois at Springfield, and there preached the opening sermon, an anti-slavery one; the Rev. Dr. Gideon Blackburn, a venerable father in the church, acting as a shield to the young preacher against a pro-slavery mob. When the Synod adjourned many of its members went to Alton on horseback, where they held an anti-slavery convention for the purpose of sustaining Lovejoy in warfare against slavery and for the freedom of the Press. After passing strong resolutions in favor of the objects for which Lovejoy was fighting, the ministers, including Mr. Porter, returned to their homes. This was but a few days before the murder of Lovejoy by a pro-slavery mob. On the first Sunday subsequent to this murder, and doubtless sustained by the excitement consequent upon it, Mr. Porter preached twice to his congregation under a burning typhoid fever. For weeks afterward he was prostrated, and for some time

his recovery was doubtful. About the first of January, 1838, he removed to Farmington, Ill., where he remained two years, witnessing here as at Peoria a revival and numerous accessions to his church. During these years he labored in revival work with Revs. John Spalding, Flavel Bascom, and Lucien Farnham, at Peoria; J. J. Miter, at Knoxville, and George W. Gale and Horatio Foot, at Galesburg. Upon retiring from the church at Peoria, Mr. Porter preached the sermon at the installation of his successor, Rev. John Spalding. In 1840 he accepted a call to Green Bay, Wis., where four years before some of his early friends from Mackinac had been organized into a church. He arrived at Green Bay in the summer by way of Chicago and Mackinac. In the succeeding winter he was installed and remained pastor of the Presbyterian Church eighteen years. In 1840 the "Presbyterian and Congregational Convention of Wisconsin" was formed, composed of the churches of the two denominations. In 1858, after a happy pastorate of eighteen years in Green Bay, Mr. Porter asked this convention to dissolve his connection with his church, which request was granted against the wishes of the majority of his church. Attending the General Assembly at Chicago that year he was invited to become pastor of the Edwards Congregational Church. Here he labored until the breaking out of the war in 1861, observing the results of the city's progress during its first twenty-five years, as depicted in his historical lecture delivered before the Chicago Historical Society in 1859. Four of Mr. Porter's family, a son and three nephews, entered the Union army, and Mrs. Porter said that if she had a hundred sons, and they prepared to die, she would give them all for the cause of their country and freedom. In March following, Mr. Porter was appointed by Governor Richard Yates, Chaplain of United States Volunteers, in Colonel J. D. Webster's regiment, Chicago First Light Artillery, in which his son, James W. Porter, and one of his nephews had enlisted. Mrs. Porter thinking she could be more useful near the soldiers, left her place in the Chicago Sanitary rooms to Mrs. Hoge and Mrs. Livermore and went, in 1862, with Mr. Porter to Cairo. Here she ministered to the sick from Forts Donelson and Henry after Grant's first decided victories, and then aided in caring for the wounded from the battlefields of Pittsburgh Landing and Shiloh; among the latter one of her nephews. From Cairo Mr. and Mrs. Porter followed the Union army to Paducah, Ky., to Pittsburgh Landing, Tenn., to Corinth and to Memphis, where they spent the winter of 1862-63 and spring of 1863. A "convalescent camp" was established south of and in sight of the city, on the river bluff. Dr. Edmund Andrews, surgeon of Colonel Webster's light artillery, was one of the surgeons in charge. With his approbation Mr. and Mrs. Porter opened the first school for freedmen on the borders of the Mississippi River. Fort Pickering was, during that winter, a scene of much religious interest, Mr. Porter preaching regularly at the convalescent camp and occasionally at the batteries. As the army proceeded southward Mr. Porter accompanied it to Vicksburg, and after its capture was immediately installed chaplain in the city hospital, and being granted by General Logan the use of the Presbyterian church, preached therein until the spring of 1864, alternating with Chaplain Joseph Warren, D. D., who had been a missionary in India. He then, by order of General Webster, followed General Sherman in his marches toward Atlanta, Mrs. Porter being already with that army with sanitary stores and supplies. Mr. Porter joined her at Big Shanty. From Kenesaw Mountain Mr. and Mrs. Porter went with the wounded to Marietta, Ga., and remained there in the hospital until the fall of Atlanta. On the Sunday following Mr. Porter preached to the soldiers in hospital at Marietta from the words of David, asking so anxiously after his son Absalom, "Is the young man safe?" his own son having participated in the battle before Atlanta, and no word from him having been received. He afterward heard of his safety and of the bravery exhibited by him in that battle. Chaplain and Mrs. Porter, instead of following Sherman to the sea, returned to Chicago, and in the following winter went to Washington to aid in urging President Lincoln to use all his official influence to have the sick and wounded Union soldiers in Southern hospitals sent north to recover or to die and be buried by their friends. While in Washington Mrs. Porter showed to Miss Dix, the earliest mover in the magnificent Sanitary Commission, two letters—one signed by five Confederate officers, the other by twenty Confederate soldiers—testifying to the uniform kindness with which they had been treated by Mrs. Porter, while sick in hospital at Marietta, Ga. Mr. and Mrs. Porter then set sail from New York for Savannah, reaching there ten days after that city had surrendered to General Sherman. Here they remained until Sherman started for Richmond, when they proceeded by water with General Webster to Wilmington, N. C., and thence to Goldsboro by rail, overtaking General Sherman at that point. They then went to a hospital on the coast at Newbern, remaining there in attendance upon the sick until the surrender of General Lee. Their work at the South being now accomplished, they took a small steamer through the canal to Norfolk, Va., thence to Alex-

andria and Washington. Logan's corps was then ordered to Louisville, Ky. Chaplain and Mrs. Porter, with others of the Sanitary Commission, reported for duty at that place, and after short and pleasant service once more in Kentucky, Mr. Porter was honorably mustered out at Springfield, Ill., July 31, 1865. After visiting among friends a few months, Mr. and Mrs. Porter were requested by the Sanitary and Christian Commission to proceed with sanitary stores, then at Chicago, to three regiments retained on the borders of Mexico to protect the border from any encroachments of France under its Mexican emperor, Maximilian. Arriving off the coast of Texas, ten miles from the mouth of the Rio Grande, they landed at Brazos St. Iago, and waited for a small steamer from Brownsville to take them to the Rio Grande and up the river to that city. In the night a "norther" struck this small steamer, and as a measure of safety it was driven ashore on the beach of Mexico. There was so little water on the beach that the yawl could not reach the shore, and the ladies on board had to be carried to the shore on the backs of the sailors. Such was Mrs. Porter's entrance into Mexico. This was at Bagdad. Crossing the river to meet the steamer which had succeeded in entering the river's mouth, Mr. Porter found assembled at Clarksville some United States colored troops, whom he addressed. From that first religious service on the Rio Grande he proceeded on the steamer up the very crooked river one hundred miles to his destination, Brownsville, Texas. Mr. and Mrs. Porter and Miss Lizzie Garey, who had accompanied them from Chicago, went into camp at the Soldiers' Hospital, Mr. Porter preaching, and Mrs. Porter and Miss Garey teaching the colored soldiers in addition to their sanitary work. Mrs. Porter soon opened a school under the name of the "Rio Grande Seminary" for boys and girls, which had been started by Miss Matilda Rankin, as the Rio Grande Female Institute, some years before the war.

In the spring of 1866 President Juarez, having taken and shot Maximilian, United States troops were no longer needed on the border, the Christian and Sanitary commissions recalled their agents, and Mr. and Mrs. Porter returned to Chicago, where a reception was given them at the Sherman House. That summer while visiting his old parishioners at Green Bay, Mr. Porter received a call to a vacant church at Prairie De Chien. This he desired to make his permanent home, but after different members of his family had located in business in different parts of the country, and his daughter had in 1868 gone to Pekin, China, as a missionary, he himself at the earnest solicitation of friends from Brownsville, Texas, returned thither, accompanied by Mrs. Porter to rebuild the church that had been demolished by a tornado, and to preach in place of Rev. Hiram Chamberlain, who had died in 1867; taking with them generous donations from Chicago to aid in that and other enterprises. In February 1869, the new brick church was dedicated. Mr. and Mrs. Porter remained in Brownsville except during the summer of 1869, he to preach and she to teach, until 1870, when he was appointed Post Chaplain, at Brownsville, U. S. A., and assigned by General Augur to Fort Brown. In addition to his duties as Post Chaplain Mr. Porter preached in the afternoon to a church of colored people organized by himself from among the colored people of Brownsville and Matamoras, Mexico, and whose church edifice was built by the Freedmen's Bureau at a cost of \$4,000. Mrs. Porter remained actively engaged in the work of teaching until the school funds of Texas became available, when the schools in Brownsville became public schools, and she severed her connection therewith. In the winter of 1873 Mr. Porter was assigned to the Chaplaincy of Fort Sill in the Indian Territory. Here he remained until the winter of 1874, when Mrs. Porter, who had here, as elsewhere, engaged in teaching, was suffering from an attack of malarial fever, and in order to regain her health, she, accompanied by Mr. Porter, returned to Chicago, and again visited friends in Green Bay. Mr. Porter then returned to Fort Sill, leaving Mrs. Porter in Chicago, and in the winter of 1876 was ordered to report to General J. J. Reynolds for service at Fort D. A. Russell, Wyoming Territory. There in improved health Mrs. Porter joined him from Chicago. For four years Mr. Porter remained in active service at Fort Russell, maintaining regular services on Sunday, a Sunday and a day school for children, and part of the time an evening school for soldiers. In November, 1876, Mr. Porter's daughter, Mary H. Porter, arrived at Fort Russell, from China, after an absence of nearly nine years. She remained at Fort Russell until the following March, when she proceeded to Chicago, her return to the United States being in quest of health. Mr. Porter obtaining leave of absence from his post, overtook his missionary daughter at Chicago, made visits to various prominent educators and private persons in the East, where Miss Porter by her report to the A. B. C. F. M., which ten years before had sent her to China, and by her representations of the condition and needs of the heathen in China, awakened renewed interest in missionary labor both in the East and the West. A reunion of Mr. Porter's family occurred in Beloit, Wis. in the spring of

1879, the first in twelve years. At this reunion were—Miss Mary H. Porter, whose health was sufficiently recovered for her to return to her missionary work in China, and Rev. Henry D. Porter, M. D., a son of Rev. Jeremiah Porter, who had also been a missionary to China for six years, and who had returned to America and was at this time married to Elizabeth, the eldest daughter of Dr. A. L. Chapin, president of Beloit College. After this reunion Mr. and Mrs. Porter returned to Fort Russell and soon after went to San Francisco on leave of absence to see Dr. Henry D. Porter and his wife depart therefrom to their missionary labor in China, their daughter having returned thither three months before. They remained in California fourteen months and in the autumn of 1880 returned to Chicago. Mr. Porter was on a leave of absence from the army until he was retired on the 30th of June, 1882, when all officers over sixty-four years of age were retired. Since then he has been seeking health, making his home with his son in Detroit. Both Mr. and Mrs. Porter were present at the semi-centennial celebration of the organization of the First Presbyterian Church in Chicago, in quite vigorous health. Rev. Mr. Porter was married June 15, 1835, at Rochester, N. Y., to Miss Eliza Chappel. They have had nine children, three of whom died in infancy—one in Peoria, Ill., in 1837; two at Green Bay, Wis., one in 1843 and one in 1849. Two others died in Chicago—Robert Otto, September 25, 1859, and Charlotte Elizabeth, October 31, 1859. The four living are as follows: James W., Edwards W., Henry Dwight and Mary Harriet. Rev. Henry Dwight Porter, M. D., has been a missionary in China since 1872, and Mary Harriet since 1868.

REV. FLAVEL BASCOM, D. D., was born June 8, 1804, at Lebanon, Conn. His parents were Abiel and Sybil (Roberts) Bascom. His childhood and youth, until he was seventeen years of age, were spent upon a farm with such advantages for education as were afforded by a rural public school. His preparation for college was under private instruction. He entered Yale College in 1824, and graduated with honor in 1828. For the next year he was principal of an academy in New Canaan, Conn., and then pursued his theological studies in New Haven, where, in 1831, he was licensed to preach. From 1831 to 1833 he was tutor in Yale College, and in the latter year cast in his lot with the "Yale Band," who had devoted themselves to Christian education and home evangelization in Illinois. In the summer of 1833 he arrived in Illinois under commission by the American Home Missionary Society, and spent five years in pioneer missionary work, mainly in Tazewell County. He then labored two seasons in northern Illinois, as Home Missionary Agent, exploring new settlements, organizing churches and introducing missionaries to new fields of labor. In December, 1839, he became pastor of the First Presbyterian Church of Chicago, was installed November 10, 1840, and remained pastor until December, 1849. He then accepted a call to the First Presbyterian Church at Galesburg, Ill., remaining there until 1856. After spending a year as agent of the American Missionary Association he became pastor of the Congregational Church at Dover. After serving that church seven years, he accepted an invitation to the pastorate of the Congregational Church at Princeton, where he remained until 1869. Thence he removed to Hinsdale, where for several years he was in charge of the Congregational Church. Since relinquishing this charge he has been almost constantly engaged in filling vacancies and aiding destitute and feeble churches. He has been one of the executive committee of the Illinois Home Missionary Society since it became an independent auxiliary to the A. H. M. S. in 1878; was one of the founders of the Chicago Theological Seminary, and is a member of the Board of Directors and Executive Committee; has been for twenty-five years a trustee of Knox College, and was one of the founders and one of the charter trustees of Beloit College, which institution in 1869 conferred upon him the degree of Doctor of Divinity. Mr. Bascom has been married three times. His first wife was Ellen P. Cleaveland, daughter of William P. Cleaveland, of New London, Conn. They were married April 30, 1833, and Mrs. Bascom died at Pekin, Ill., December 10, 1837. Mr. Bascom's second wife was Elizabeth B. Sparhawk, daughter of Dr. Jonathan Sparhawk, of Hartford, Conn., to whom he was married August 16, 1841. She died March 27, 1851, at Galesburg, Ill. He was again married on the 21st of June, 1852, to Ruth S. Pomeroy, daughter of Samuel Pomeroy, of Southampton, Mass., and sister of Hon. S. C. Pomeroy, of Kansas. His surviving children are three sons, two of whom, the children of his second wife, are graduates of Beloit College, and one, the son of his present wife, is a physician at Ottawa, Ill. Rev. Mr. Bascom, though in his eightieth year, is still able to meet the frequent calls made upon him to supply temporarily vacant pulpits in his vicinity.

REV. JOHN BLATCHFORD, D. D., was born May 24, 1796, at Newfield (now Bridgeport), Conn. His father was the Rev. Samuel Blatchford, a clergyman of note in his day, resident pastor in Bridgeport, then pastor of the associated churches of Lansingburgh, Waterford and Troy. When John Blatchford was eight years old his father moved to Lansingburgh, where he spent his

childhood. Great interest in his future was manifested by the Rev. J. Romeyn, D. D., and through the liberality of William, who supplied him with \$200 per year, his expenses at Cambridge Academy, Washington Co., N. Y., were paid. He entered Union College, at Schenectady, in 1817, and graduated therefrom in 1820. In the fall of the latter year he entered Princeton College, and after three years' study was licensed to preach by the Troy Presbytery. Immediately after being licensed he accepted a call to the Pittstown

Presbyterian Church, in Rensselaer County, N. Y., where he remained until the spring of 1825. On the 20th of April of this year he accepted a unanimous call to the church at Stillwater, Saratoga Co., N. Y., where he remained until 1829, when he received a call from the Congregational Church at Bridgeport, Conn., to which place he removed in 1830. In this church he labored successfully for six years, and at the close of this period on account of the illness of his wife, he resigned his charge with a view to foreign travel. Instead of carrying out this plan, however, he turned his steps westward, and spent the winter of 1836-37 at Jacksonville, Ill. In 1837 he received a call to the First Presbyterian Church at Chicago, where he labored with great success, and satisfaction to the church until 1840, but his habitually intense application to the duties of his ministry produced brain fever, from the effects of which he never fully recovered. After retiring from the pastorate of this Church, he returned to the East, with the view to permanent residence there, and spent the winter of 1840-41, in Wheeling, Va., where he was warmly solicited to remain. From 1841 to 1844 he was connected with Marion College, first as Professor of Intellectual and Moral Philosophy, and afterward as President of the institution. After the purchase of the college by the Freemasons, he was requested to remain, but preferred to remove to West Ely, where in impaired health he remained until 1847, when he removed to Quincy. In his later years he was engaged in the enterprise of establishing a Presbyterian theological seminary for the Northwest, and at the time of his death was President of the organization for this purpose. His last discourse was preached in St. Louis, about three months previous to his death, and about two months before he was attacked by his last painful illness. He died Sunday, April 8, 1855.

THE SECOND PRESBYTERIAN CHURCH.—The preliminary steps to the organization of this church were taken May 5, 1842, on which date a meeting was held to decide upon the question of organizing it, with Rev. Robert W. Patterson as pastor. The organization was effected on Wednesday, June 1, 1842, with twenty-six members, and Mr. Patterson preached his first sermon to the new Church June 5, 1842, in the third story of the "City Saloon," which stood on the southeast corner of Clark and Lake streets. Services were held part of the time in the "Saloon," and part in the Unitarian church until in September, on the 13th of which month the society's new church building was dedicated, Mr. Patterson preaching the dedicatory sermon. On the next day Mr. Patterson was ordained. This church stood on Randolph Street, near Dearborn. It was a plain frame edifice and cost the society about \$1,600, the lot having cost from \$600 to \$800. The original society consisted of twenty-six members as follows: Mr. and Mrs. William H. Brown, Mr. and Mrs. Thomas B. Carter, George W. Dole, Mrs. A. N. Fullerton, Mrs. Sarah Gage, Mr. and Mrs. John High, Mr. and Mrs. John W. Hooker, Captain and Mrs. Seth Johnson, George W. Merrill, Flavel Moseley, Mr. and Mrs. Benjamin W. Raymond, Mr. and Mrs. Charles R. Starkweather, Mrs. Ann E. Webster, Sylvester Willard, M. D., Mr. and Mrs. John C. Williams, Mrs. John Wright, John S. Wright, and Miss Frances S. Wright. The Church was organized by a committee of the Presbytery of Ottawa, consisting of Rev. Flavel Bascom and Rev.

George W. Elliott. On the same day Benjamin W. Raymond, William H. Brown and Sylvester Willard were chosen elders and Rev. Robert W. Patterson was called to the pastorate. He remained with the Church until 1873. The following extract from the pen of Hon. William Bross is instructive and interesting, showing the condition of the Church, and giving a description of Mr. Patterson in 1846:

"It was just after having taken his breakfast in Chicago, when a tall young man, made apparently taller by a cloth cloak, in which his gaunt figure seemed in danger of losing itself, and whose reserved, modest manners, were the very reverse of what we had had expected to find at the West, called on the clergy of our party and invited one of them to preach and the rest of us to attend services in the Second Presbyterian Church. That cloak would now be well filled by its owner, the Rev. Dr. Patterson, who has grown physically as well as intellectually and morally, with the growth of the city, to whose moral welfare, he has so largely contributed. Of course we all went to what by courtesy, as we thought, was called a church. It was a one-story, balloon, shanty-like structure, that had been patched out at one end to meet the wants of the increasing congregation. It stood on Randolph Street, south side, a little east of Clark. It certainly gave no promise of the antique but splendid church that before the fire stood on the corner of Washington Street and Wabash Avenue, or that still more elaborate and costly building, the Rev. Dr. Gibson's church, at the corner of Michigan Avenue and Twentieth Street."

The "antique but splendid church that before the fire stood on the corner of Washington Street and Wabash Avenue," was dedicated January 24, 1851. The corner-stone was laid with imposing ceremonies in 1849. At this time some enthusiastic persons predicted that the church would stand one thousand years, to which it was replied by some one equally enthusiastic as to the growth of the city of Chicago, that it would be displaced by business within fifty years. In a trifle over twenty years it was destroyed by the great fire. At the time of its completion this church was the most imposing and inviting church edifice in the city, but it was thought to be too far out of town. It was soon provided with a superior bell and a fine organ, and when the whole enterprise was accomplished, the congregation was left without any considerable debt. The architectural designs were by John M. Van Osdel. The building was seventy-three feet wide by one hundred and thirty feet long. There were two entrances; the main entrance on Wabash, the other fronting the public square on Michigan Avenue, at the east end of the building. The first floor contained a session-room and the second story a semi-circular lecture-room. The south side of the building faced Washington Street. The interior was lofty, the walls being fifty feet high. There were galleries along the sides and a gallery for the choir and organ facing the pulpit. A clock was erected in the church. The cost of lots, edifice, bell, organ and clock, was about \$50,000, and of the edifice alone about \$40,000. The body of the church would accommodate eighteen hundred persons, and was lighted by stained glass windows. Immediately after the organization of the society, a weekly prayer meeting was established, which was for a long time attended by a number equal to the entire membership of the church, and was evidently largely tributary to its success. Communion services were regularly held once in two months, and at each communion, with only two exceptions, during the first twenty-five years of the Church, accessions were made to the membership. Generally these were the result of quiet influences, but there were several seasons of special religious revival, when there were exceptionally large additions to the roll. These revival seasons were in the springs of 1847-50-52-55-58 and in 1864. That of 1858 was of especial interest, there having been large numbers of converts both among the adults and

children of the congregation. During the first twenty-five years there were added to the Church nine hundred and nine members, three hundred and thirty-nine of whom were by profession of faith, and five hundred and seventy by letter. Previous to 1858 the additions by letter were considerably more numerous than those by profession. During the year 1842, in addition to the twenty-six original members, seventeen others joined, making a total membership for the first year of forty-three. Up to 1857, inclusive, there were only three years in which this number was exceeded, viz.: 1843, 1850 and 1852, when there were added fifty-seven, forty-six, and sixty-four respectively. In 1844, forty-three joined the society. The smallest number added in any one year was nineteen, in 1857. The total number added from 1842 to 1857 inclusive was five hundred and eighty-seven, and the average number added annually for the sixteen years was nearly thirty-seven. In 1843, Dr. Willard removed from the city and on April 5 John C. Williams and Captain Seth Johnson were elected elders. On the removal of Captain Johnson from Chicago, Thomas B. Carter was chosen; April, 1848, J. Ambrose Wight was elected, and in April, 1856, when Mr. Wight was ordained a minister of the gospel, three additional elders were elected, Reuben D. Jones, Elihu Baker and Devillo R. Holt, after which there were no further changes in the session until 1862.

THE THIRD PRESBYTERIAN CHURCH.—This Church was organized July 1, 1847, with thirty-five members. The first action was taken in February preceding, when a meeting was held at the house of Lawrens Kent. At this meeting Thomas Cook, a member of the First Presbyterian Church, offered to the new organization a lot on Desplaines Street, the proceeds of which when sold should be devoted to this purpose, provided the new church should be Presbyterian in polity. It was suggested by Rev. J. B. Walker, as an additional reason for the new Church being Presbyterian rather than Congregational in character, that as the former it would be more likely to receive assistance and sympathy from other Presbyterian churches here. At a subsequent meeting at which were present officers and leading members of the First and Second Presbyterian churches, a subscription paper was prepared of which the following is a copy:

"The subscribers hereto agree to pay the sums affixed to their respective names, for the purpose of building a Presbyterian church on the West Side of the Chicago River, to be under the pastoral charge of the Rev. J. B. Walker."

By the circulation of this paper and by donation, \$1,530 was raised, \$896 of which was subscribed and paid by members of other Presbyterian churches, \$196 by those who afterward joined the First Congregational Church; \$124.50 by those who continued to be members of the Third Presbyterian Church, and \$313.35 by members of other denominations and by persons not members of any Church. Formal organization was effected by a committee of the Ottawa Presbytery, consisting of Rev. R. W. Patterson, Rev. Flavel Bascom, Rev. J. B. Walker, Rev. J. Wilcox, and Rev. Mr. Henderson. There were thirty-five original members, among whom were Philo Carpenter, Henry Smith, Lawrens Kent, Gustavus W. Southworth, Henry McArthur, Mrs. Ann Carpenter, Miss Augusta Kent, Mrs. Lawrens Kent, Mrs. G. W. Southworth, Dr. Eriel McArthur, Mrs. Harriet McArthur, Mrs. Mehitable Graves, Mrs. William Stow, Mrs. Sarah Saltonstall, Mrs. Sarah Aiken, John Sheriffs, Mrs. Sarah Sheriffs, Mrs. James Curtiss, Nathaniel Norton, Mrs. Sally Ann Norton, Nelson Mason, Mrs. Desire E. Mason, and others. Philo Car-

penter, Henry Smith, Lawrens Kent, and Gustavus W. Southworth were chosen Elders. A small frame building standing on Union Street, between Washington and Randolph, together with the lot upon which it stood, was purchased for the sum of \$1,322 47, and the house of worship dedicated on Sunday, July 4, 1847, Rev. J. B. Walker preaching the dedicatory sermon. From this time until November, 1849, Mr. Walker remained the regular supply of the Church, but was never installed. In this month a call was extended to Rev. Lewis H. Loss, of Rockford, to become the pastor of the Church. Mr. Loss preached his first sermon on the second Sunday of November, 1849, and was regularly installed by a committee of the Presbytery of Chicago, May 12, 1850. It was during his pastorate that the difficulties hereafter detailed with reference to the relations of the Church to the General Assembly arose and culminated, resulting in a division of the Church, and in the dissolution by the Presbytery of the pastoral relations between him and the Church June 10, 1851. Mr. Loss was succeeded by Rev. Edwin G. Moore, a licentiate of the Presbytery of Franklin, Ohio, in the following October. Being regularly called to settle as pastor on November 5, 1852, he was installed on the 14th of the same month. On account of the troubles arising out of former differences not having subsided, Mr. Moore's pastorate was short. He resigned in the autumn of 1854, and in the spring of 1855 was succeeded by Rev. Mr. Ferris, of the Dutch Reformed Church, son of Chancellor Ferris, of New York, who supplied the pulpit until the call of Rev. Asahel L. Brooks to the pastorate. Mr. Brooks was installed June 12, 1856, and remained until November 17, 1859, when his ministry was closed at his own request. Mr. Brooks was an active, earnest man, and while the Church was under his charge, its membership rapidly increased. A summary of the results of his labors will be found in the second volume of this History.

The first church building, already mentioned as having been dedicated July 4, 1847, during its early history stood in a cornfield. It served its purposes until 1858, when a new building was completed at the northwest corner of Washington and Carpenter streets. During the progress of the work on this edifice occurred the panic of 1857, which well-nigh prevented its completion. Business failures were numerous. Many of the principal members of the church found it impossible to redeem their pecuniary pledges, and a meeting of the trustees decided to discontinue the work; but through the efforts of Elder William Osborne this decision was reversed, and the building was completed in 1858. In order to carry the enterprise through, great individual sacrifices were made. Sanford Johnson, not then but afterward a member of the Church, mortgaged his house for \$2,000 to supply necessary means. Of the church members five stood firm through all the troubles, and bore the principal part of the financial burden—William Osborne, Sylvester Lind, D. J. Lake, Jacob Beidler and Nathaniel Norton. The church cost \$50,000. It was built of Athens stone. The walls were rock-faced and the towers and trimmings of dressed stone. The main tower, steeple and spire were models of taste and symmetry. The audience-room was spacious, admirably arranged and neatly and comfortably furnished. A fine organ was put into the church and it had a superior choir.

Early in the year 1850, during the pastorate of Rev. Lewis H. Loss, a division of sentiment manifested itself among the members with reference to fellowship-

ping with slaveholders, which finally led to a schism, and to the organization of the First Congregational Church. This movement, so far as it relates to the ecclesiastical history of Chicago, was so peculiar to itself, so entirely unique and important, that a detailed account of it is required in order to set forth its true character. For many years the New School Presbyterians, or at least the Congregationalists scattered through the New School Presbyterian churches of the North, had felt dissatisfaction with the attitude of the Presbyterian Church toward American slavery. They were desirous that the Church should take strong ground against the institution, and they were urgent for the General Assembly, which met at Detroit in 1850, to give them relief by emphatic denunciation of the system, and by such action as should disfellowship all slaveholders and slave-dealers. When the General Assembly met, however, its utterance on the subject was so equivocal as to cause wide-spread disappointment. The majority of the members of the Third Presbyterian Church of Chicago keenly felt the inconsistency of the position of that Church, arising out of its connection with the General Assembly, and were anxious that it should assume an attitude consistent with their convictions of duty and truth. During the year 1850 this question was uppermost in their minds. Numerous meetings were held to discuss it. At one of these meetings, held at the First Presbyterian Church for the purpose of appointing delegates to a "Christian Anti-slavery Convention," to be held in April, in Cincinnati, Philo Carpenter was appointed delegate to the Cincinnati Convention, and a series of five resolutions was passed, the principal ones, for the purpose of this History, together with the preamble, being as follows :

"*Whereas*, Having seen with deep solicitude and regret, a disposition in some of the judicatories and boards of our churches, to recede instead of advance, from the position taken by them in years past; and that in order to carry forward the benevolent reforms in which God has called His people of this age to engage, against the open and covert opposition which all efforts to expel sin from the world and the Church, will meet vigilant, concerted and prayerful effort is necessary—therefore,

4. "*Resolved*, That while we rejoice in the progress of free principles in connection with civil institutions of our country, and among the masses of the people, yet there is reason to fear that slavery, driven from favor in the State, may find apology and peace for its abominations in ecclesiastical judicatories and in the churches of Christ; and that in view of such indication every Christian should maintain firmly the ground assumed in the past progress of the anti-slavery reform, and continue to advance, trusting in Christ, to the point where the demon of slavery shall be expelled from confidence and communion in our churches.

5. "*Resolved*, That when the judicatories and boards of our churches refuse to apply the laws of Christ's house to those who hold their fellow-beings in bondage; when their action recognizes those as in good standing who voluntarily hold and treat men as property; when such organizations tend rather to prolong, than to destroy the existence of slavery; in such circumstances it is the duty of those who support these organizations immediately to reform them, and if efforts to reform have proved hopeless, duty to Christ, the Divine Reformer, requires that Christians should cease to co-operate with those whose measures tend to sustain rather than remove a system, the principles and practices of which are in direct hostility to that Gospel which we are required to love and propagate in the world."

The series of which these two resolutions formed a part was moved by Samuel Brooks, and seconded by Rev. Lewis H. Loss, pastor of the Church. At the Cincinnati Convention, held in due time and attended by Philo Carpenter as delegate from the Third Presbyterian Church, the following resolution was passed :

"That the friends of pure Christianity ought to separate themselves from all slave-holding churches, and from all churches, ecclesiastical bodies, and missionary organizations, that are not fully divorced from the sin of slave-holding; and we who may still

be in connection with such bodies, pledge ourselves that we will, by the aid of Divine grace, conform our action in accordance with this resolution, and come out from among them, unless such bodies shall speedily separate themselves from all support of, or fellowship with slave-holding."

This resolution had considerable influence on the members of the Church, whose sentiments were in accord therewith. Throughout the remainder of the year the question of the propriety of dissolving all connection with the General Assembly was industriously discussed. In July a meeting of the Session was called, but a quorum not being present, no action was taken. On August 12, a full meeting of the Session was held, and the subject fully discussed, when it was found that the pastor and three of the five elders regarded the proposed action as unscriptural and unwise. This result caused great dissatisfaction to the remaining two elders, and also to a majority of the Church members. In November a call was signed by many of the ministers, among them Rev. L. H. Loss, and members of the Presbyterian and Congregational churches, for a convention to be held at Peoria, November 21, with the view of uniting the New School Presbyterians and Orthodox Congregationalists into an organization for the State of Illinois. The fourth article of this call was as follows :

"4. But above all it will deliver those of us who are Presbyterians from our ecclesiastical connection with slave-holders, through the General Assembly and enable us to withdraw Christian fellowship from them without incurring the charge of violating ecclesiastical constitution by so doing."

But nothing was done beyond the expression of sentiment until about the 1st of December, when a meeting called at his request was held at the pastor's house. At this meeting the subject of the relations of the Church to the General Assembly, and through that to slave-holders, was introduced and the views requested thereon of each member present. A large majority was in favor of severing all connection with the General Assembly and of uniting with some ecclesiastical bodies having no sympathy with slavery. To this bold and extreme measure the pastor and a portion of the members could not yield their assent. While not averse to a united movement in northern Illinois for the establishment of an ecclesiastical convention distinct from the General Assembly, provided such a convention could be formed without producing discord and division, they could not conscientiously participate in a movement of secession from the General Assembly, such movement embracing only their own individual Church. This the pastor characterized as an attempt to "rend the body of Christ," and not a scriptural remedy for the evils which all acknowledged to exist. Thus the two portions of the Church were brought into open conflict. This was the beginning of the schism, and the subject was thus fairly introduced into the Church. A series of meetings resulted for the further discussion of the ecclesiastical relations of the Church. A majority of the members favoring and a minority opposing withdrawal. At a meeting held February 3, 1851, the following resolutions were passed:

1. "*Resolved*, That this Church holds, in the language of Scripture that, 'God hath made of one blood all the nations of the earth.'

2. "*Resolved*, That chattel slavery is blasphemous toward God, inhuman and cruel to our fellow-men, and that Christians are especially called on to discountenance it, and have no fellowship with those who participate in its abominations.

3. "*Resolved*, That this Church are dissatisfied with the present condition of our General Assembly on the subject of disciplining those guilty of holding their fellow-men in bondage: That their last acts at Detroit have been construed to represent black or white, as suited the different sections of the Church.

4. "Resolved, That this Church, so long as this vacillating policy is pursued, hereby declare their determination to stand aloof from all meetings of Presbytery, Synod and Assembly, and thus as they believe free and relieve themselves of all responsibility."

At the time these resolutions were adopted there was a resident membership of sixty-eight. Seventeen, about two-thirds of those present at the meeting, voted for the resolutions, and afterward twenty-five other members approved of them by subscribing their names thereto. The minority of the Church now thought it time to apply a constitutional remedy, if such existed. Accordingly the day following a complaint to the Chicago Presbytery was circulated by the pastor and others, among those members of the Church who had not been present at the meeting of February 3d. The nature of this complaint seems not to have been sufficiently explained, and so was signed by a considerable number under a misapprehension of the end to be attained. And although it was explained by the pastor when furnishing a list of the names signed to the complaint, by his saying; "I suppose the signers gave their names as petitioners to Presbytery only, and therefore we have no right to use them in any other way," still the complaint was used as such, and the Presbytery met to consider the difficulties therein set forth. The Presbytery was composed as follows: R. W. Patterson, pastor of the Second Presbyterian Church, moderator; H. L. Curtis, pastor of the First Presbyterian Church; L. H. Loss, pastor of the Third Presbyterian Church, J. Wilcox, W. Y. Miller, Ira M. Weed, R. W. Downs, E. Clark, delegate from First Presbyterian Church; B. W. Raymond, delegate from Second Presbyterian Church; Philo Carpenter, delegate from Third Presbyterian Church, and Mr. Marsh, delegate from the Joliet Presbyterian Church. After discussion and deliberation, the following report was adopted:

"The Presbytery regard the action of the Church in introducing and acting upon matters not embraced in the call, as irregular, inasmuch as such action conflicts with the established usages of all organized bodies.

2. "Presbytery regards the fourth resolution of the series complained of, as although not intended by all, at least, who voted for it, to be an actual and absolute secession from the Presbyterian Church, nevertheless necessarily involving such secession in its actual working, and therefore subverting the constitutional rights of those in the Church who dissented from said resolution and wished to continue in their former connection. inasmuch as it prevents their being represented in Presbytery or Synod, and withdraws them from the supervision, advice and counsel, and, if need be, judgment of said bodies, in case of difficulty or wrong done them by their brethren. For these reasons the Presbytery are of the opinion that said fourth resolution should be rescinded, and to this end direct the Session to call a public meeting of the Church for that purpose at their earliest convenience."

In obedience to this order of the Presbytery the Church held a meeting on the 10th of March, to consider the question of rescinding the resolution. A motion to rescind was set aside by the adoption of a resolution, offered by Philo Carpenter, "that the whole subject be deferred until after the next meeting of the General Assembly." This resolution was sustained by all who voted for it on the ground that the General Assembly would meet in a few weeks, and that, if at its next meeting it should take action on this subject satisfactory to them, they would then rescind the resolution, otherwise they would let it stand and abide the consequences. The minority regarded this action of the majority as a direct refusal on their part to be governed by the constitution of the Church and the requirements of the Presbytery, whose injunction they were solemnly bound as Presbyterians to obey, "so long as it involved nothing contrary to the word of God." But this was the very point upon which the majority and minority differed,

the former firmly believing that to fellowship with slaveholders and thus, even indirectly, to countenance the great crime of slavery was "contrary to the word of God," and they preferred to obey the word of God rather than the Presbytery and the constitution of the Presbyterian Church, when in their judgment there was a plain conflict between the two.

A joint meeting of the Session and trustees was then held, which appointed a committee to consult with R. W. Patterson, Moderator of the Presbytery, as to the propriety of convening that body to consider the pastoral relations of Rev. L. H. Loss to the Church, and the difficulties arising therefrom. The request not being properly signed, the meeting was not called. A few days thereafter a meeting of the Presbytery was called, to be held in the Third Presbyterian church, "to investigate the difficulties in said Church, and to take such order thereon as the interests of the Church may seem to require; also to consider the expediency of dissolving the pastoral relations." At this meeting there was a committee, consisting of H. Curtis, W. R. Downs and W. Y. Miller, appointed for the purpose of drafting it, was adopted. After reciting the causes which led to the difficulties, the report concluded as follows:

"And whereas, at a meeting of the Church called in pursuance of the above direction, a majority of those present did refuse to reverse their previous action, but, on the contrary, expressed their determination to abide by such action unless certain definite and prescribed action be adopted by the General Assembly. And whereas, it is manifest that this Church cannot remain together with edification to its members, or with advantage to the cause of Christ; therefore, in order to prevent further strife and reproach to religion, it is desirable that an amicable division of the Church and its property be effected. The committee would therefore recommend the appointment of a committee to confer with members of the church in order to effect such a division."

I. M. Weed, H. Curtis and B. W. Raymond were appointed the committee, and as such conferred with the members of the Church. The question asked each was, "Are you, under existing circumstances, in favor of a division of this Church at this time?" The majority of the members were opposed to a division. The committee reported to the Presbytery, expressing therein their opinion that there was no hope of effecting an amicable division. The Presbytery thereupon feeling constrained to afford relief to that portion of the Church which adhered to them and to the constitution of the Church, adopted the following resolutions:

"WHEREAS, Several members of this Church have passed a resolution involving secession from the constitutional Presbyterian Church of the United States; And whereas, such members have neglected at the direction of the Presbytery to rescind said resolutions; and whereas, all efforts to secure an amicable settlement of the difficulties existing in said Church by a division mutually agreed upon have failed, therefore

1. "Resolved, That those members of this Church who voted for said resolution, did, thereby, and by subsequently neglecting to rescind said resolution, disqualify themselves to act as members of the Presbyterian Church, and can no longer be recognized as such, while retaining their present position.

2. "Resolved, That the Session, consisting of the pastor and those elders who did not vote for the resolution referred to, immediately inform those who have thus separated themselves from the Church, that if any of them still wish to walk in fellowship with this Church under the constitution of the Presbyterian Church, that wish shall be granted.

3. "Resolved, That all who do not express such wish within two weeks, be regarded as adhering to their previous action, and the Session be directed to strike their names from the roll of the Church."

By reference to the first of these three resolutions it may be seen that it was only those who voted for the obnoxious fourth resolution of February 3 whose names were to be stricken from the Church roll, so that only a

minority of the members were thus summarily excommunicated. Those who subscribed to it were given certificates of "good and regular standing," and letters of dismissal to enable them to join any Church of their choice. The reason for making this distinction was that the Presbytery, when directing the names of the voters for the resolution to be stricken from the rolls, had before them in the Church records full official evidence of what they had done, but not of the act of those who privately signed the resolutions.

In this connection it is proper to introduce the following paragraph from a history of the difficulties published in 1852, by the Third Presbyterian Church:

"The Presbytery were fully aware that this mode of dropping the names of seceders is not provided for in the constitution. Constitutions never provide for revolutions. But they followed a multitude of precedents which have been furnished in similar cases elsewhere. And the Session of the Church, in dropping the names of those who voted for the resolution in favor of secession only completed the unpleasant work which had been forced upon the Presbytery and upon them by the disorderly and disorganizing procedure of their brethren."

Thus was the schism consummated, and the Third Presbyterian Church left in an enfeebled condition and with a clouded prospect for the future. The names of the members remaining faithful to the constitution and discipline of their Church were the following: Gustavus W. Southworth, Mrs. Susan Southworth, Mrs. Mehitable Graves, Lawrens Kent, Mrs. Lawrens Kent, Miss Augusta Kent, Dr. Eriel McArthur, Mrs. Harriet McArthur, Miss Caroline McArthur, Miss Rhoda McArthur, Nathaniel Norton, Mrs. Sally Ann Norton, Nelson Mason, Mrs. Desire E. Mason, R. W. Downs, Mrs. Lydia E. Downs, Mrs. Henry Witbeck, Mrs. William Stow, Mrs. Sarah Aiken, Gilderoy McArthur, Miss Sarah McArthur. There were five others, whose names cannot now be ascertained.

THE WESTMINSTER PRESBYTERIAN CHURCH.—Some time during the year 1853, certain members of the First and Second Presbyterian churches thought that the necessities of Chicago required the organization of a New-School Presbyterian Church on the North Side, and in view of such proposed organization a few of the parties interested united and purchased a lot on Ohio Street, between Dearborn and State, fronting south, and eighty feet in width. Overtures were made looking toward the securing of the services of a minister to inaugurate the enterprise, but nothing took definite shape until in 1855, when the Rev. Ansel D. Eddy, D. D., of Newark, N. J., being in Chicago on a visit to a daughter, looked over the field, conversed with members of other churches, and with the pastors, and it was decided to organize. Accordingly a meeting was held at the house of B. W. Thomas, 206 Illinois Street, in July of that year, and there the necessary steps were taken. The two first elders elected were Colonel Henry Smith, from the Second Presbyterian Church, and W. W. Evarts, who had recently come to the city. Subsequently, but during the same year, Horace F. Waite was chosen Elder. The original members were Colonel Henry Smith, Mrs. Henry Smith, Miss Phebe Smith, Mr. and Mrs. W. W. Evarts, Miss Sophia Evarts, afterward Mrs. Rev. S. E. Wishard, Mr. and Mrs. B. W. Thomas, Mrs. Mary E. Wilcox, Edward P. Wilcox, Mr. and Mrs. George Gee, Mr. and Mrs. Elijah Smith, Mrs. Nancy Pitkin, Miss Louisa R. Pitkin, Mrs. Andrew J. Brown, and a few others. Among the first who joined the church after its organization were Mr. and Mrs. Horace F. Waite. The Session of the Church was constituted of the three elders already named, to which were subsequently added Henry W. King, J. McGregor Adams,

Dr. F. Crumbaugh and Oliver H. Lee. Under the ministry of Mr. Eddy the Church made gratifying progress as regards additions to its membership, both by letter and by profession, and there united with the church some who are now well known as Presbyterians in the city: Mr. and Mrs. Henry W. King, Mr. and Mrs. Benjamin G. Page, Mr. and Mrs. William Springer, all from the Second Presbyterian Church. At first meetings were held in the lecture-room of Rush Medical College, which arrangement continued until about 1858. Some time during 1856, the lot that had been purchased on Ohio Street was exchanged for what is now known as the old Westminster lot, having one hundred and ten feet front on Dearborn Street, and one hundred and twenty-five feet depth on Ontario. A contract was entered into for the erection of a very large and expensive house of worship, the foundations of which were laid; but the panic of 1857 intervened, the subscriptions that had been procured, and which were only partially sufficient to carry the enterprise forward to completion, were found to be unavailable, and it was deemed inexpedient to attempt to proceed with the erection of so expensive an edifice. The foundations already up some feet were sold, and a small frame building was erected on the south side of the lot, capable of accommodating about two hundred and fifty persons. Rev. Mr. Eddy continued the pastor about three years, when he resigned, and the Church was without a pastor for a considerable time. But religious services were generally held on Sunday and always on Wednesday evening. The Sunday school was continued during the vacancy in the pulpit, which was, however, occasionally occupied by strangers visiting the city until October 14, 1858. At that time Rev. William H. Spencer came to this Church from the Presbytery of Rock Island, and continued to supply the pulpit until his death, February 17, 1861. During the period of his services as pastor the Church was converted into a parsonage, and a frame building erected on the corner of the lot on Dearborn and Ontario streets, under the mechanical direction of Asher Carter. Although this was an inexpensive building, it was a model for convenience and comfort. After the death of Mr. Spencer, the Church was again without a pastor until December 13, 1861, when Rev. E. A. Pierce, having a short time previously come to Chicago as a licentiate from the seminary, was ordained and installed. Mr. Pierce remained until December 22, 1865, when he received a call from Calvary Church, Chicago, and resigned his pastorate over Westminster. Under his charge the Church was blessed spiritually and materially. The Church was now for the third time without a pastor until in the spring of 1866, when Rev. David Swing was called. The call was accepted, and Mr. Swing was installed pastor September 27, 1867, continuing as such until February 6, 1871, when the relation was dissolved as one of the steps preparatory to a union of the North Presbyterian Church with this Church, the union being effected on the date last above mentioned, and the new Church named the Fourth Presbyterian Church of Chicago. During Rev. David Swing's ministry the Westminster edifice was again enlarged. Upon the union of the two churches, the united Church was called the Fourth, taking the number four which Westminster would have taken had it been numbered when organized instead of being called Westminster. Upon the union of the two churches, the united Church moved to the North Presbyterian building, corner of Cass and Indiana streets, in which it continued to worship until the building was destroyed by the great fire. Westmin-

ster stood until that time unoccupied, when it was also destroyed. A Sunday school was organized soon after the founding of the Church, but it is difficult to ascertain who performed the duties of superintendent previous to 1858. Probably it was W. W. Everts. Henry W. King was elected superintendent in 1858, and under his direction, which terminated in 1862, upon his removal to Pennsylvania, the school was very successful. He was succeeded by Oliver H. Lee, who remained until the organization of the Fourth Presbyterian Church.

THE NORTH PRESBYTERIAN CHURCH. (O. S.)—In the month of May, 1848, the initiatory steps were taken toward the organization of this society. The first services were held Sunday, May 28, in the hall of Rush Medical College, in accordance with the following notice published in the newspapers of Saturday, May 27:

"Divine service according to the usage of the Presbyterian Church may be expected to-morrow and every Lord's Day until further notice at 10½ o'clock A. M., and 2½ o'clock P. M., in the hall of the Medical College, Dearborn Street. Preaching by the Rev. R. H. Richardson."

Religious services were continued in the college building until in the fall of the same year, when their first house of worship was erected. The Church was organized Sunday, August 6, 1848, with twenty-six members, among whom were Mr. and Mrs. O. M. Dorman, Mr. and Mrs. Clark Runyon, Mrs. Lucy Fitch Williams, Miss Lucy Maria Williams, Mrs. C. S. Wadsworth, Mrs. Jonas Clark, Mrs. Mindwell W. Gibbs, Miss Doggett, Mrs. Dr. Blaney, Derastus Harper, Mrs. R. J. Hamilton, Cyrus H. McCormick and others. During the fall of 1848, a neat edifice, in the Gothic style of architecture, was erected at the corner of North Clark and Michigan streets, at a cost of \$2,000. It was a small frame structure, with a "pepper-box" steeple, and was sold in 1852, when there was erected a similar but somewhat larger building, at the southwest corner of Illinois and Wolcott (State) streets, fronting north. This edifice cost originally about \$3,000; was afterward enlarged, and finally sold at the time of the completion of the large new brick church at the corner of Indiana and Cass streets, which was dedicated about February 21, 1861. The main tower of the latter building was twenty-four feet square at the base, one hundred and four feet high, and was surmounted by an octagonal spire ninety feet high. The turret on the opposite corner was sixteen feet square and one hundred feet high. The building was seventy-one feet wide by ninety feet long, fifty-two feet high in the center and thirty-eight feet at the sides. The main audience-room would seat one thousand and one hundred persons. The lecture-room in the basement was forty-two by sixty feet, and there were in the basement in addition class-rooms, pastor's study, ladies' parlor, etc. The style of architecture of this church was the Romanesque, and it was furnished with an excellent organ.

Rev. R. H. Richardson was ordained and installed pastor of this Church November 19, 1848, by the Presbytery of Peoria. He remained until April 11, 1856,

and was succeeded by Rev. R. A. Brown, who was ordained and installed December 14, 1856. Mr. Brown resigned July 21, 1857, after which there was no regular pastor until the installation of Rev. Nathan L. Rice, D. D., October 20, 1858.

NATHAN L. RICE, D. D., was born near Bardstown, Ky., and won a national reputation in his famous debate upon "Baptism," at Lexington, Ky., with Rev. Alexander Campbell. Dr. Rice was soon afterward called to the Central Presbyterian Church, Cincinnati, Ohio, where he remained several years, when he succeeded the eminent Dr. Potts at the First Presbyterian Church, St. Louis, Mo. In 1858, on account of his great ability, and at the advice of Cyrus H. McCormick, he was induced to come to Chicago and accept the pastorate of the North Presbyterian Church, to the majority of the members of which he was acceptable. The Rev. Dr. Rice remained with this Church until 1861, in April of which year he resigned in consequence of a call to the pastorate of a Presbyterian Church in New York City, left vacant by the death of Dr. Alexander.

The Rev. Dr. Gurley, of Washington, D. C., was then called, but did not respond, and the Church was without pastoral direction until November, 1862, when Rev. J. B. Stewart was called and immediately entered upon his labors. He remained pastor-elect for nearly two years but was never installed. He was succeeded in November, 1864, by Rev. David X. Junkin, D. D., who was installed on the 13th of the month. The pastoral relations between Rev. Mr. Junkin and the Church were dissolved May 1, 1866. Rev. D. S. Marquis was then called, July 18, 1866, and shortly afterward installed. Mr. Marquis remained with the Church until November 22, 1870, when he resigned, being the last pastor of the North Presbyterian Church. In February, 1871, in accordance with wishes of members of this Church and the Westminster Church, the Presbytery of Chicago consented to a union, and named the united Church the successor of these two churches, the Fourth Presbyterian Church of Chicago.

During the progress of the Civil War, differences of opinion developed among the members as to the attitude the North Church should maintain with reference to slavery, and various other questions relating to the conduct of the war. Harmony having departed, it was thought advisable by a large portion of the members to withdraw and to organize a new Church in which there would be greater unanimity of opinion with regard to the political issues of the times. These differences culminated in the early winter of 1864-65, and led to the organization of the Central Presbyterian Church, the members of which were more, radically in sympathy with the United States Government in the early suppression of the rebellion against its authority, leaving in the North Presbyterian Church those members who were more conservative in their views. The Sunday school in connection with the North Presbyterian Church was usually very largely attended. One of its first superintendents was Charles A. Spring, a brother of Rev. Gardner Spring, D. D., of New York. He was succeeded, in 1854, by John Woodbridge, who was superintendent continuously for ten years, and during this time the average attendance of scholars was one hundred and fifty. The library connected with this school was exclusively religious.

THE SOUTH PRESBYTERIAN CHURCH.—Movements preliminary to the organization of this Church were made by certain members of the North Presbyterian Church and others in November, 1854. On the 12th of that month a petition, signed by A. B. Newkirk, Mrs. L. M. Newkirk, Cyrus H. McCormick, L. J. McCormick, Mary A. McCormick and others, was presented to the Session of the North Presbyterian Church, setting forth that in view of the position which Chicago held to the Presbyterian Church of the whole country and especially of the West; in view of the condition of the various quarters of the city and especially of the southern section, and of various other facts, it was deemed advisable by the petitioners that an Old School Presbyterian

Church be organized on the South Side, and asking that they be permitted and assisted to organize such a Church. After considering this petition the moderator and Elder Howe were appointed a committee to draft a minute expressive of the view of the Session, and report at the next meeting. The report submitted November 24 contained a series of three resolutions favoring the measure, which were adopted, the third resolution being as follows :

"That as a Session and as individuals, it will afford us much pleasure to give to the new enterprise our best influence and effort, as far as may be practicable and expedient."

The Presbytery of Chicago, pursuant to a call of the moderator, Rev. R. H. Richardson, met December 19, 1854, and upon receiving the request of certain persons to be organized into a Church, with their letters of dismission from the North Presbyterian Church, resolved that the request be granted, and that said Church be called the "South Presbyterian Church of Chicago, Ill." This request was signed by the following persons, who thus became the original members: Cyrus H. McCormick, Leander J. McCormick, Adamson B. Newkirk, Charles A. Spring, Sr., John Forsythe, John Stephens, Thomas H. Beebe, Mrs. Catherine Beebe, Mrs. Mary A. McCormick, Mrs. L. N. Newkirk, Mrs. Anna M. Gibbs, Mrs. Ellen M. Spring, Mrs. Sarah C. Stephens, Mrs. Frances E. Dickson. Charles A. Spring and Thomas H. Beebe, who had been members of the Session of the North Presbyterian Church, were elected elders of the new Church. Soon after its organization, the Church made its Session, with Cyrus H. McCormick a committee of correspondence and supply, with a view to procuring a pastor. After long and patient effort, the committee was directed to Rev. R. W. Henry, of the Associate Reformed Church, at Belle Brook, Ohio, who having expressed his willingness to become pastor, was regularly installed October 16, 1855.

On March 11, 1856, the following persons were received into the Church: William S. McCormick, from the North Presbyterian Church; Mrs. Henrietta M. McCormick, from the Methodist Episcopal Church, Lexington, Va.; Mrs. Annie T. Forsythe, from the First Presbyterian Church, Springfield, Ill.; William E. Myers, from First Presbyterian Church, Georgetown, D. C.; Mrs. Mary Emma Henry, from the A. R. Presbyterian Church, Sugar Creek, Ohio; Alexander and Mrs. Isabella Bain, from the Free Church of Scotland, Roslin, Scotland; Philander W. Stubbins, from the Bowling-green Presbyterian Church, Ky.; and on profession of faith, George H. Spring. At this time, Thomas H. Beebe presented a form of confession of faith and covenant, for use in reception of members, which was afterwards adopted at a meeting held Saturday, March 17, 1856. Previous to the completion of the church edifice on the lot at the corner of Wabash Avenue and Congress Street, religious services were held in Metropolitan Hall. The Rev. R. W. Henry remained pastor until April 2, 1860, when he resigned to accept a call from the Scotch (Dr. McElroy's) Presbyterian Church of New York City. During his pastorate, the Church increased rapidly in membership, especially during the earlier and later portions. Among those who became members in March, 1856, was John H. Doane, superintendent of the Illinois Central Railroad. He was elected elder May 14, 1856, and was killed by the cars within the year. The numbers of those who joined under Mr. Henry's pastorate were as follows: In 1854, the original members, fourteen; in 1856, fifty-one; in 1857, thirty-three; in 1858, twenty-nine; in 1859, sixteen, and in 1860, previous to the resignation of Mr.

Henry, twenty-five. The limited number which joined in 1858 and 1859 is in part to be accounted for by an unfortunate misunderstanding of certain of the members and of the pastor, with reference to the attitude of Cyrus H. McCormick toward the Church, regarding the property, ownership of which was divided between him and the Church. At the time of the organization of the Church Mr. McCormick purchased a lot at the southwest corner of Wabash Avenue and Congress Street, eighty feet on Wabash Avenue and one hundred and seventy-five feet on Congress, the purchase-price being \$18,000, and the payments to be made one-fourth cash down, the balance in three equal annual installments. Mr. McCormick made the first payment, and agreed to pay the first installment at maturity, with the understanding that the society should pay the third and fourth installments; and, having done so, to have from Mr. McCormick, who at the time of purchase became responsible for the whole amount unpaid, a deed to the lot. A similar understanding was had also between Mr. McCormick and the society with reference to the building to be erected on this lot. The understanding with respect to the building was substantially carried out, the society erecting it, paying nearly one-half the cost of construction, and thus becoming owner of it. The edifice as first constructed was a one-story frame fronting on Wabash Avenue, and capable of seating about four hundred people. Connected with it toward the west was a small one-story frame, occupied by the pastor as a study. Still further to the west was the parsonage. The congregation continued to assemble here until March, 1859, when the building was removed to the southwest corner of Jackson Street and Edina Place, now Third Avenue. This removal, seen in the light of subsequent facts, was not wise, but it was made in consequence of a misunderstanding. Rev. Nathan L. Rice, one of the oldest and ablest Old School Presbyterian divines in the West, was called to the North Presbyterian Church early in 1858, and was installed pastor October 20, of that year. Dr. Rice was a pro-slavery man, in so far as denying that the relation between master and slave is necessarily sinful, constituted him such. Rev. R. W. Henry was an abolitionist, which fact was well known to the South Church when they called him to the pastorate. But neither Dr. Rice nor Mr. Henry preached politics in the pulpit. So that the question as to what were the sentiments of these gentlemen with reference to the slavery question, should not have been permitted to modify the conclusions of church members regarding the relations of the two churches or of the two ministers. But when certain members of the South Church suggested that Dr. Rice and Mr. Henry should alternate in occupying the pulpits of the respective churches, with the view of building up Old School Presbyterianism in Chicago, feeling as they did that the New School Presbyterians were exercising an undue influence in the city, and when Dr. Rice signified his readiness to exchange pulpits with Mr. Henry on the plan suggested, certain other members of Mr. Henry's Church thought they discovered in this willingness of Dr. Rice, a design on the part of the former to "set a trap for the latter and thus on account of his anti-slavery sentiments, accomplish his discharge by and from his Church." This view of the case looked very plausible to him, for which reason he declined the courtesy of the exchange, and it was not made. The North and South Presbyterian churches were thus made to assume toward each other an attitude of quasi antagonism, which was unjust to both. It was much easier to introduce trouble into the Church than to expel it,

when once in, and it was also easy for difficulty to drive out members and to prevent new members from joining the Church. Depleted in its membership, it was impossible for the society to make the third and fourth payments on the lot on which their edifice was standing; and as the making of these two payments was the condition upon which Mr. McCormick had agreed to give a deed to the lot, the society was not entitled to and did not receive the deed. Mr. McCormick made the payments, retained and still retains the ownership of the lot. Many of the members losing sight of, or never having learned of, the existence of this condition, accused Mr. McCormick of violating his agreement with respect to the deed, and excited themselves to such a degree that they refused longer to worship on Mr. McCormick's property. This feeling was entertained by a majority of the members, and in consequence they purchased a lot at the southwest corner of Jackson Street and Edina Place, to which, in August or September, they moved their building, converted it into a two-story edifice by erecting under it a basement story, and which, when completed ready for occupancy in March, 1859, was worth, with the lot on which it stood, from \$12,000 to \$14,000. This new edifice was dedicated March 13, the sermon being preached in the morning by Rev. R. W. Henry, and in the afternoon by Rev. Dr. L. H. Long.

At the beginning of the difficulties in the Church over the slavery question, and partly on account of these difficulties, Cyrus H. McCormick, Leander J. McCormick, William S. McCormick, Mrs. M. A. McCormick, Mrs. H. M. McCormick, and others whose residences were near the North Presbyterian Church, to which Rev. N. L. Rice had lately been called, were dismissed by letter to unite therewith. This was on November 5, 1857, and partly on account of the calling of Dr. Rice. The retirement of Cyrus H. McCormick, its wealthiest member, was a misfortune to the society, as he had up to that time paid \$3,000 a year towards its support. The withdrawal of this generous aid was a great discouragement also, both to the remaining members and to those who might desire to become members. As a result of these difficulties the church never became able to pay its half of the purchase price for the Congress-street lot. In 1858 considerable numbers left the South Church, some to unite with the North Presbyterian Church, some to join the Second, and still others to go to other churches. Among those to unite with the North Church were the two elders of the South Church, Charles A. Spring, Sr., and Thomas H. Beebe. At a meeting held February 11, 1858, John Wilson and William G. Holmes were elected to fill the vacancies, and were ordained on Sunday, the 14th. On the 6th of October, 1858, Elder Wilson was granted a certificate of dismissal, and on June 13, 1859, John G. Law was elected to his place. The society was now finally at peace, and worshipping in a building of its own, standing on a lot for which had been given new obligations. During the balance of the year its progress, though steady, was not rapid. In the beginning of 1860 a more lively interest was worked up, twenty-five members joining during the first three months. The total number of communicants in April, 1860, was one hundred and nineteen. Rev. R. W. Henry having received a call from the Scotch Presbyterian Church of New York City, resigned his pastorate April 2 to accept the call, and was dismissed with gratitude for his self-denying labors while here, and with the best wishes of the congregation to his new and more arduous field of

duty. At this time there were one hundred children in the Sunday school and Bible class.

THE REFORMED PRESBYTERIAN CHURCH was organized on Tuesday, September 23, 1845, with nine members, as follows: Solomon McKichen, Mrs. Margaret McKichen, Malcolm McNeil, James Lowe, Miss Agnes Lowe, Robert Miller, George Murray, William Devore, and Samuel James. This was the result of efforts which originated during the preceding spring, when Rev. John Morrison, who was located in the vicinity of Chicago, preached a number of sermons in this city, at which time there was neither Church nor members. The following extract from a brief manuscript history of this Church, by the Rev. A. M. Stewart, its first pastor, details its early history, as likewise some of his personal experience:

"At a meeting of General Synod, in Philadelphia, Penn., May, 1845, the place (Chicago) was represented as a very important one, and worthy, if possible, of being at once occupied. In accordance with this, the Synod appointed myself—then a licentiate—to come and spend a number of months in Chicago and vicinity, to see what were the prospects, and what with proper effort, might be reasonably effected. In fulfillment of this appointment, I arrived by way of the lakes in Chicago, Saturday, July 12, 1845, an entire stranger, knew no one and had an introduction to no one. Preached in the afternoon of next day, in Mr. Henderson's Seminary, to an audience of seven persons. Since which time, with occasional interruption, have been here till the present (September, 1847)."

The organization took place at the house of Solomon McKichen, at which time Mr. McKichen and Robert Miller were elected and ordained elders. On Sunday, November 30, 1845, the first communion was dispensed, Rev. John Morrison officiating, at which time twelve persons united, as follows: Robert Malcolm, Harvey Botwell, Mrs. Mary Botwell, Elizabeth Henderson, David Hood, Mrs. Maria Hood, Mrs. James Lowe, Mrs. Flora McNeil, Mrs. Agnes Miller, Mrs. Samuel James, Mrs. Janet Miller, and Miss Barbara Allison. About the beginning of 1846, as the expiration of Rev. A. M. Stewart's appointment drew near, the infant congregation, fearing that they would be left entirely without a pastor, or would at best have to depend on occasional supplies, and as a consequence soon be dispersed, extended a unanimous call to Rev. A. M. Stewart, to become their settled pastor, and promised him an annual salary of three hundred dollars; expressing the hope, however, that the salary might soon be increased. Owing to the inability of Mr. Stewart to be present at the spring meeting of the Western Presbytery, which had been requested by the Church to moderate the call, the proposition lay for a time in the hands of the Presbytery. On the 6th of June, the third communion was held, Mr. Morrison again officiating, at which time John McGilvary, Mrs. Isabella McGilvary, John McMonagle, Mrs. Sarah McMonagle, Jane Noble, Barbara Club and Anna Burnett joined the Church. During the early period of its existence the society occupied a hall at the northwest corner of Clark and Randolph streets, but as the congregation increased in size, it became necessary to find a more capacious room. Accordingly arrangements were made with Mr. Henderson, whereby the Church worshiped in his Female Seminary Building at the corner of Clark and Madison streets. Here they remained until the fall of 1846, when they removed to the third story of the "City Saloon," at the corner of Clark and Lake streets. In the fall of 1847 they re-rented the Seminary building, occupying it until December 23, 1849, when they dedicated their new church edifice, just completed, at the corner of Clinton and Fulton streets. This house was a very neat and beautiful Gothic frame building, sixty-

two by thirty-six feet in size, and quite elegantly finished. The cost of the building was about \$1,600, on which there was a debt of but \$200. A portion of the money expended in the erection of this church had been raised by Rev. A. M. Stewart in the summer and early fall of 1846, during a tour made for that purpose through the Eastern and Middle States, with the result of collecting about \$800. He returned by way of Xenia, Ohio, for the purpose of attending a meeting of the Synod, and while at Xenia the Western Presbytery held a meeting and presented to him the call of his Chicago Church, which he then accepted. But he was not ordained until May 13, 1847, the ordination taking place in the "Saloon Building." The first communion under the new relation of pastor and people was dispensed August 15, 1847, Rev. Josiah Huntington, of Pennsylvania, assisting. On this occasion twenty persons united with the congregation. The next communion was held May 21, 1848, when Mr. Stewart was assisted by Rev. James K. Campbell, missionary from Northern India. At this communion twelve new names were added to the Church-roll. In 1849, thirteen persons were received into membership; in 1850, forty-four; in 1851, forty-two; in 1852, sixteen; in 1853, forty-four; in 1854, twenty-seven; and in 1855, the last year of Rev. A. M. Stewart's ministry, twenty, making a total number added to the Church during that time of two hundred and sixty-six. The first building erected by this Church was burned down in the year 1859, in common with a large amount of lumber, and quite a number of other buildings, at the time of the National Fair, the fire originating from a spark from the pipe or cigar of a visitor to the city, and causing a loss of about \$500,000. The Society immediately inaugurated the enterprise of erecting a brick church on the site of the one destroyed, which in six months was so far advanced toward completion as to be occupied for religious services, and which, when completed, cost about \$15,000. This was a two-story building, with a room in the basement for Sunday school, and a number of ante-rooms, and in the upper story an audience-room capable of comfortably seating six hundred people. It was surmounted with a tower containing a bell. In 1869, on account of the encroachments of railroads and various kinds of business, this church was sold for \$13,000, the furniture being reserved, and a new frame edifice erected at the corner of Fulton and May streets, at a cost of about \$12,000, including land. This building was occupied by the Church until the time of its disorganization in 1875, when it was leased; but on account of a mortgage on the property in favor of Moses Shirra it now is a part of his estate. The Rev. A. M. Stewart retired from the pastorate of this Church in September, 1855, and for two years there was no regular pastor. During this interval Dr. Guthrie supplied the pulpit three months, when a call was accepted and almost immediately afterward his acceptance was withdrawn. Dr. Black then supplied the pulpit some months, and in July, 1857, a call was extended to Robert Patterson, D. D., of Cincinnati, Ohio, which was accepted, and he began his labors in August of the same year. In March, 1864, he received a call from George H. Stewart, of Philadelphia, to labor in the U. S. Christian Commission, and moved to Philadelphia to engage in that work. His resignation tendered to his Church was not accepted, leave of absence for one year only being granted, and he returned in May, 1865. During his absence the pulpit had been supplied six months by Rev. John McCorkel, who had just resigned his charge in Elgin, and by Dr. Van Doren. Dr. Patterson then

continued in the pastorate until the latter part of December, 1866, when with a large majority of his congregation, he left the Reformed Church, and early in January, 1867, united with the Old-School Presbyterian denomination. The secession left the Reformed Church comparatively weak in numbers and in money, but free from debt. For some months afterward the Church enjoyed the ministerial services of Dr. Van Doren, and while erecting their new church at the corner of May and Fulton streets extended a call to the Rev. G. M. Ramsey, who accepted the call January 27, 1869, and remained until 1873, when he resigned. No subsequent attempt was made to fill the pulpit, and the congregation gradually distributed themselves among other churches, until at length the Reformed Presbyterian Church ceased to exist. The first elders were Solomon McKichen and Robert Miller. On August 14, 1847, William Kennedy, who had arrived with his family from Alabama, was installed in that office. On the 17th of February, 1848, Isaac Fleming was elected elder, and ordained March 6. Mr. Fleming died of the cholera August 28, 1850. On the 9th of December, 1849, John Clark, a ruling elder from the United Secession Church of Scotland, was installed elder here. In the spring of 1850, the Session was enlarged by the addition of George Clark and Thomas Floyd. A Sunday school was organized October 5, 1845, Rev. A. M. Stewart taking the superintendency until some other person could be procured. John McGilvary afterward became superintendent, and upon his removal from the city in about a year, Robert Miller became superintendent. Mr. Miller was succeeded by William Kennedy, who was superintendent in 1849.

REV. ALEXANDER MORRISON STEWART, D.D., was born January 22, 1814, in Beaver (now Lawrence) County, Pa., at the homestead which his grandfather, who served in the Revolutionary War, had founded in 1796, in the then new country of western Pennsylvania, going thence from Carlisle, Pa. His father, James Stewart, was a Captain in the war of 1812, and his mother was Miss Nancy Morrison, of Carlisle, Pa. At the age of eight years his school life began under the care of Master Elliott, and continued later under that of Master Sterett, well known instructors in that region, and all of his boyhood was spent on his father's farm, surrounded by the loving influence of a Christian home. When at the age of eighteen he felt himself converted and joined the Old-School Presbyterian Church at Slippery Rock, Pa., then under the pastorate of Rev. Robert Semple. During the following year he decided to prepare himself for the ministry, and in the fall of

1833 commenced his studies at Schellsburg Academy, Bradford Co., Pa., where his older brother, Rev. Ethan Allan Stewart, had charge of the Academy. From there he entered Franklin College at New Athens, Ohio, and after graduating, studied theology under the Pittsburgh Presbytery of the Reformed Presbyterian Church, and was licensed to preach in December, 1841. In the spring and summer of 1842 he preached throughout the various precincts of the Pittsburgh Presbytery, and in the fall received a call to settle as pastor in Centerville, Shenango Co., Pa., which he declined. In the spring of 1843 he preached in Cincinnati, and afterward filled appointments under the Philadelphia and Northern Presbytery, in Philadelphia, New York and Vermont, and in the fall declined a call from Milton, Pa. He was sent out in November, 1843, by the Presbytery, and preached in various stations throughout Ohio, Kentucky, Tennessee and Alabama, also in New Orleans, St. Louis and Chicago. Returning to Philadelphia, he attended divinity lectures under Rev. S. B. Wyle in the winter of 1844-45, and also medical lectures at Jefferson College. In April, 1845 he went to Caledonia County, Vt., and thence to western Pennsylvania, where he preached until the fall when he came to Chicago and organized the

congregation of the First Reformed Presbyterian Church in the Seminary building on Clark Street, south of Madison, where he also taught a school in the languages during the winter of 1845-46. He remained in Chicago until 1855, when his health was so broken as to compel him to seek a different climate, and after a two years' rest in Sewickley, Pa., he accepted a call to the Second Reformed Presbyterian Church of Pittsburgh, Pa., of which he was pastor at the breaking out of the War of the Rebellion. Many young men of Pittsburgh, including a considerable proportion of his own congregation, promptly volunteered to defend their country, and Rev. A. M. Stewart as promptly proposed, in a letter to Brigadier-General J. S. Negley, dated April 19, 1861, to accompany the volunteers to the field, "to comfort the sick and wounded, and to console the dying," and if necessary to handle the rifle or sword. In a week he was with the Thirteenth Regiment Pennsylvania Volunteers in York, Pa., enlisted for a three months' campaign. Rev. Mr. Stewart remained with his regiment, which when re-organized became the One Hundred and Second, until near the close of the war. In July, 1864, he was assigned to duty as local chaplain at Gilsboro, D. C., and afterward became district secretary of the American Tract Society at Washington, D. C. In March, 1866, he accepted the pastorate of the united congregations of East Whiteland and Reesville (N. S.), Chester Co., Pa., where he remained until the spring of 1868, when he was solicited by the Board of Home Missions to become its secretary for the Pacific slope. Here he organized new churches and preached in Nevada and California during 1868. In 1869 he returned to resign his pastorate, and then resumed his secretaryship on the Pacific slope, the duties of which he performed until the re-union of the Old and New School Presbyterian assemblies. Preferring pastoral duties to those of the secretaryship, he accepted a call to the Gilroy Presbyterian Church, Santa Clara Valley, Cal., with which he remained until 1874, when he resigned with the intention of making a tour around the world, but upon receiving urgent calls to work in new fields at home, his sense of duty being strong and sensitive, he interpreted such as the call of his Master to put aside the pleasure of travel for a time and work yet longer in His vineyard. Thinking so, he accepted the call of the First Presbyterian Church at Chico, Butte Co., Cal., in June, 1874, of which he was pastor at the time of his death, February 24, 1875. Dr. Stewart was married in October, 1847, to Miss N. E. Hadley, daughter of Moses Hadley, by whom he had two children, George Hadley Stewart, of San Francisco, Cal., and Mary E. Stewart, now the wife of George B. Wilson, of Delano, Cal. Mrs. N. E. Stewart died December 9, 1860. Dr. Stewart was married the second time, February 25, 1864, to Miss Josephine A. Malcom, daughter of Robert Malcom, a prominent citizen of Chicago, who died during the night of the great fire. In person Dr. Stewart was tall and of distinguished presence, and his character one of mildness and tenderness, associated with great firmness and strength. He never entered into disputations, and won his hearers as much by his charm of manner as by the exercise of his superior abilities.

REV. ROBERT PATTERSON, D.D., was born in the north of Ireland, and was of Scotch-Irish parentage. He came to the United States while comparatively young, settled in Philadelphia, and engaged in mercantile pursuits. Soon, however, he abandoned business for the ministry. After due study and preparation he was licensed to preach by the Reformed Presbyterian Church, and began his labors by becoming a missionary in the then Western States. Soon he accepted a call to the pastorate of a Reformed Presbyterian Church in Cincinnati, Ohio, where he remained several years, until he removed to Chicago in 1857, and assumed charge of the First Reformed Presbyterian Church on Fulton Street in that city. The Church had been without a pastor two years, and was struggling with adverse circumstances. But Mr. Patterson was in the vigor of his young manhood, and entered upon the work of building up the Church with all the ardor and earnestness of an aggressive and bold nature. His efforts were rewarded by his Church becoming crowded with an earnest and united congregation. In 1859 the church edifice was destroyed by fire, but soon, through his active efforts, a larger and more commodious building was erected. At the outbreak of the slaveholder's rebellion many of the members of Mr. Patterson's Church enlisted in the Union army and in 1863 and 1864, during the country's darkest days, Dr. Patterson called a meeting of his Church, explained to its members the necessities and sufferings of the soldiers in the field, and tendered his resignation, that he might himself go to the front. The Church promptly voted him leave of absence for one year, or during the war, and under the direction of the Christian Commission he visited many a camp hospital and battlefield. This commission, recognizing his wonderful earnestness and power as a public speaker, detailed him on special duty in California and Oregon, especially in the mining regions of the Pacific coast, to raise funds to carry on the work of ministering to the physical and spiritual necessities of the sick and wounded soldiers. Going by way of the Isth-

mus he contracted malaria, which, together with the excitement and overwork attendant on his mission, impaired his health and for a time prostrated him. After the close of the war he returned to Chicago, and was heartily welcomed by his congregation; but soon both Church and pastor, feeling the influences of the war in the disintegration of religious as well as of political creeds, and mingling with other Christian denominations, became dissatisfied with the restraints of the rules of the Reformed Presbyterian Church, especially in the matter of hymn singing and close communion; and as liberty in these particulars could not be secured in the Reformed Church, Dr. Patterson and a large majority of his congregation decided to unite with the Old School Presbyterian denomination. In order to do so honorably they renounced all legal claim to the church property, which was entirely unincumbered, and permitted it to be retained by a small minority of the Church, who were content to remain under the rules of the Reformed Church. This withdrawal was the origin of the Jefferson Park Church. Dr. Patterson is a man of fine physical appearance, and has few superiors on the platform and in the pulpit, and in his magnetic power over an audience. His preaching is entirely extemporaneous, and is evidently under the inspiration of the thought that he has been divinely commissioned to proclaim the gospel to dying men. He is accredited by his admirers with a Pauline fervency in his denunciations of sins, shams and hypocrisy, and yet with the possession of the tenderness of the Apostle John. During the fall and winter after the great fire, he was one of the leading spirits in the prosecution of the gigantic work of providing for the thousands thrown upon the charity of the world by that dire calamity, and his devotedness to the work and the exposure consequent thereon, made rapid inroads upon his health, and in the succeeding spring he was obliged to seek abroad a restoration of health. A short vacation was not, however, sufficient, and fearing to risk the rigors of another Northern winter, he felt compelled to sever his connection with Chicago and with the Church, between which and whom there existed such sincere regard, and to adopt California as his future home. In San Francisco he is now the pastor of a large and flourishing congregation.

OLIVET PRESBYTERIAN CHURCH.—At a meeting of the Young Men's Christian Association, connected with the Second Presbyterian Church, held February 11, 1856, Rev. J. Ambrose Wight was elected by them to serve as city missionary under their auspices. Mr. Wight was also to have in view the formation and establishment of a Presbyterian Church in some destitute portion of the city. He at once entered upon his missionary labors, and in addition thereto preached on Sunday mornings in the building known as the Taylor Street Sunday-school house, standing on Taylor street, between Edina Place and Buffalo Street. The first service was held Sunday, February 16, 1856, twenty persons being present, nineteen of whom belonged to the Second Presbyterian Church. From this time until the organization of the Church was effected, about six members of the Second Presbyterian Church were regularly in attendance each Sunday morning, the rest of the congregation varying considerably in numbers and belonging to the floating population of the city. The purchase of a lot was considered by Mr. Wight a necessary preliminary to the organization of a society, and to accomplish this end he spent considerable time in canvassing for subscriptions; but the project met with so little encouragement that it was abandoned. It was then thought best to build upon a rented lot. Mr. Wight had several estimates made of the cost of the erection of such a home; but before anything had been done in this direction, the church hitherto occupied by the Universalists, and standing on Washington Street, was offered for sale, and after examining the structure it was thought proper to purchase this house. Accordingly, in September of the same year it was bought for \$2,750, including the church furniture and a small reed organ, and moved to a lot on the west side of Wabash Avenue, about one hundred feet north of Twelfth Street, owned by and rented of Dr. Jonn H. Foster, for five years, at an annual rental of \$160. Trustees were now elected in the persons of S. D. Ward, F. D. Gray and S. B.

Williams. Sunday, November 23, Mr. Wight preached his first sermon in the renovated house, which had then cost \$3,800, all of which sum was paid except \$400. This gratifying result was due to the persistence and energy of Mr. Wight.

Pursuant to notice given some time previously, a meeting was held on November 27, by those interested in the movement and designing to unite with the prospective Church, to consider the feasibility of forming the proposed organization then or in the near future. An adjourned meeting was held on the 7th of December, 1856, on which day the Church was organized by Rev. R. W. Patterson, with the following exercises: Scriptural readings and sermon by Rev. Mr. Wight, from Isaiah, xxxii, 9; dedicatory prayer, by Rev. E. F. Dickinson; organization of the Church, by Rev. R. W. Patterson, and address to the Church, by Rev. Harvey Curtis. The original members were Mr. and Mrs. Stephen B. Williams, Mr. and Mrs. Ephraim H. Dennison, Mr. and Mrs. Edward Ely, Mr. and Mrs. E. L. Pomeroy, Mrs. Caroline E. Wight, R. H. How, E. A. Burbank, and Bradford T. Averill. These were all from the Second Presbyterian Church. The first regular prayer-meeting was held Wednesday, December 10, after which a business meeting was held, at which S. B. Williams was elected elder and Edward Ely deacon, both of whom were ordained on the 29th. On the 12th of the month a call was extended to Rev. J. Ambrose Wight to become pastor, at a salary of \$1,300 per year. Mr. Wight remained with this Church until July 31, 1863, when he insisted upon the acceptance of his resignation, which had been tendered six months previously. On the 7th of August a meeting of the Church was held, and the resignation reluctantly accepted. Rev. A. Eddy was called September 30, 1863, at a salary of \$2,000 per annum, payable quarterly in advance. The call was accepted, and Mr. Eddy preached his first sermon in December. He remained until September 2, 1866, when he resigned. He was succeeded by Rev. Nelson Millard, of Mont Clair, who was unanimously invited to supply the pulpit for six months from January 28, 1867, at a salary of \$4,000 per annum, payable quarterly. On September 9, he was invited to become settled pastor, at the same salary, payable in the same manner. Mr. Millard resigned in December, 1868. In October, 1869, he was succeeded by Rev. G. P. Nichols, who remained until November, 1870, and was the last pastor of the Church.

On the 2d of December, 1857, two ruling elders and one deacon were elected, the former being E. L. Pomeroy and S. B. Williams, the latter Edward Ely. Mr. Pomeroy was ordained January 13, 1858. On the 2d of November, 1859, the Session was enlarged again by the election of N. S. Bouton as ruling elder, and at the same time Ephraim H. Dennison was elected deacon. Mr. Bouton was ordained November 13; Bradford T. Averill was elected elder November 16, 1859, and ordained December 18. George F. Ruggles and W. B. Topliff were elected elders April 29, 1864, and ordained May 1. January 5, 1866, Dr. Frederick Crumbaugh and O. S. Avery were elected elders, and George F. Ruggles, permanent elder. On the 18th of November, 1869, three ruling elders were elected—Erastus Foote, Ephraim H. Dennison and Edward Ely. Stephen B. Williams was elected clerk of Session at the time of the organization of the Church, and served until 1864. N. S. Bouton was elected clerk, January 22, 1864, and served until the union of this Church with the Second Presbyterian. During the pastorate of Rev. Mr. Eddy, a lot seventy-five by one hundred and eighty feet at the

corner of Wabash Avenue and Fourteenth Street was purchased at \$100 per foot. Upon this lot was erected a two-story brick church, without galleries, at a cost of about \$85,000. An organ was added at a cost of about \$5,000. The church building which had been bought of the Universalists was sold for business purposes, was moved to Wabash Avenue and Sixteenth Street, and is now used as a store and market house. At the time of the union with the Second Presbyterian, the new brick church was sold to the Wabash Avenue M. E. Church. The Sunday school was organized in January, 1857, with eighteen pupils. The membership and attendance increased with the prosperity of the Church. The school at one time had about four hundred scholars. The superintendents of the school were: S. B. Williams, from 1857 to 1860; William Tomlinson from 1860 to 1861; and N. S. Bouton, from 1861 to the time of the union of the two churches, except during 1864, when Gilbert L. Granger served a portion of the year.

THE FIRST BAPTIST CHURCH was organized October 19, 1833, with nineteen members, by Rev. Allen B. Freeman. With the exception of Mrs. Rebecca Heald, wife of Captain Nathan Heald, and Rev. Isaac McCoy, Dr. John T. Temple was the first Baptist to arrive in Chicago. Dr. Temple, with his wife and four children, reached Chicago about the 4th of July, 1833. For some time after his arrival, he and his family attended the Presbyterian services in Fort Dearborn, but having, through correspondence with the American Baptist Home Mission Society, secured the appointment of a missionary for Chicago, and thinking best that the two denominations should at the first begin with separate churches, started a subscription for a building, heading it with one hundred dollars. In a few weeks the building was erected near the corner of Franklin and South

A. B. Freeman

Water streets. It was a two-story frame structure, the upper story for school, the lower for religious purposes, and cost about nine hundred dollars. With the exception of Rev. Jesse Walker's log house at the Point, this was the first house built for religious worship in Chicago. It was designated as the "Temple Building," and was used by the Methodists, Presbyterians and Baptists alike until the Presbyterian church was ready for occupancy. When Rev. Allen B. Freeman, with his wife, arrived on the 16th of August, he found the church building ready for use. On the first Sunday after his arrival he preached to the Rev. Jeremiah Porter's congregation, in that minister's absence, at Blackstone's Grove, twenty-eight miles south of Chicago, and from this time until Mr. Freeman's death these two ministers preached once each month to congregations in some distant village; on such occasions the two congregations uniting to hear the one remaining at home, until the Presbyterian church was dedicated January 4, 1834. At the time of the organization of the Baptist Church, October 19, 1833, there were about twenty-five Baptists in Chicago, fourteen of whom were present at the church and gave in their names as follows: Rev. Allen B. Freeman and Hannah C., his wife; S. T. Jackson, Martin D. Harmon, Peter Moore, Nathaniel Carpenter, John K. Sargents, Peter Warden, Willard Jones, Ebenezer and Betsey Crane, Susannah Rice, Samantha Harmon and Lucinda Jack-

son. One of the other five members was Samuel S. Lathrop.

Rev. Mr. Freeman was a graduate of Hamilton Theological Seminary. During his brief pastorate he was an earnest and efficient laborer, organizing besides the Church in Chicago, four others in as many neighboring districts. It was in returning from one of these

TEMPLE BUILDING.

services at Long Grove, fifty miles south of Chicago, early in December, 1834, where he had preached and administered the rite of baptism, that his horse was taken sick eighteen miles from home. For two nights and one day Mr. Freeman watched with the suffering animal, when it died, and he made the rest of the way home on foot. Overcome by exposure and exertion, he was himself taken sick of typhoid fever and in ten days thereafter, on December 15, 1834, died. Rev. Jeremiah Porter preached the funeral sermon in the Presbyterian church, and was assisted in the services by Rev. Isaac W. Hallam, of the Episcopal Church; Rev. John Mitchell, of the Methodist, and Rev. J. E. Ambrose, of one of the country Baptist churches organized by Mr. Freeman. The Chicago Tribune of a not very remote date, contained a communication mentioning—"a little burial ground near the North Branch on the West Side. * * * That little burial ground, as I remember, was about where Indiana Street crosses the river. The little inclosure was a prominent object, on the otherwise unoccupied and open prairie, up to 1840 or later. An inscription on one head-stone, or rather head-board, as I well remember it, was that of the Rev. A. B. Freeman, who was the first Baptist minister of Chicago." A picket fence was built around this grave by Samuel S. Lathrop.

At the time of his death the membership of the Church had increased to forty; but by a year from that time, by death and by removals to other churches, it was reduced to twenty.

During the year 1835, Rev. Isaac T. Hinton became the successor of Rev. A. B. Freeman. Mr. Hinton was by birth an Englishman, but came to Chicago from Richmond, Va. He was a very able and highly esteemed preacher, and a very warm-hearted and genial man. Under his ministrations the membership of the Church and the attendance upon religious services considerably increased, so much so that they began to need

a larger building. Rev. Mr. Hinton was sent East to solicit aid for the erection of a suitable house of worship, and returned with the small sum of \$846.48. This disappointment nerved the members to active effort for themselves, and soon the foundations of a new house were laid, and much of the woodwork prepared; but on account of the financial crisis of 1837, the building was never completed. Instead, a frame building, which was being used as a temporary workshop, was converted into a church, and with occasional enlargements, served the purposes of the congregation until 1844, during which year a larger edifice was erected. It was a brick building and stood at the southeast corner of Washington

FIRST BAPTIST CHURCH.

and LaSalle streets, where the Chamber of Commerce afterward stood. It was fifty-five by eighty feet in size; there was a basement eight feet high, divided into two rooms, for lecture and school purposes; it had an Ionic portico of six columns; the apex of the spire was one hundred and twelve feet from the ground; in the spire were a bell and clock, the clock having five dials, one on each side of the spire, and one inside the church; the total cost of this church edifice was \$4,500.

Rev. Isaac T. Hinton remained with the Church until 1842. He was a remarkable man in many ways; exceedingly happy in disposition, of a genial temper, an excellent pastor, and an able preacher. Large congregations attended his services. His great forte was preaching on prophecy. In the year 1836, he delivered a series of Sunday-evening sermons in the Presbyterian church, on this great subject. The church although the largest in Chicago, was usually filled to its utmost capacity; everybody was desirous of hearing "Hinton on Prophecy." He taught that the then present order of things would come to an end in 1873, but did not live to see the non-fulfillment of his interpretation of the prophecies. The following extract is from a lecture delivered by Hon. John Wentworth, May 7, 1876:

"At the close of service one day, Parson Hinton said he thought Chicago people ought to know more about the Devil than

SECOND EDIFICE ERECTED BY THE FIRST BAPTIST SOCIETY.

(From the City Hall Tower, looking Southwest.)

they did. Therefore he would take up his history in four lectures; first, he would give the origin of the Devil; second, state what the Devil had done; third, state what the Devil is now doing; and fourth, prescribe how to destroy the Devil. These lectures were the sensation for the next four weeks. The house could not contain the mass that flocked to hear him; and it is a wonder to me that those four lectures have not been preserved. Chicago newspaper enterprise had not then reached here. The third evening was one never to be forgotten in this city; if one of our most eminent clergymen, with the effective manner of preaching that Mr. Hinton had, should undertake to tell us what the Devil is doing in our city to-day. The drift of his discourse was to prove that everybody had a Devil; that the Devil was in every store, and in every bank, and he did not even except the Church. He had the Devil down outside and up the middle of every dance; in the ladies' curls and the gentlemen's whiskers. In fact, before he finished he proved conclusively that there were just as many devils in every pew as there were persons in it; and if it were in this our day, there would not have been swine enough in the stock yards to cast them into. When the people came out of church they would ask each other, 'What is your devil?' And they would stop one another in the streets during the week, and ask, 'What does Parson Hinton say your Devil is?' The fourth lecture contained his prescription for destroying the Devil. I remember his closing: 'Pray on, brethren and friends; pray ever. Fight as well as pray. Pray and fight until the Devil is dead!

"The world, the flesh, the devil,
Will prove a fatal snare,
Unless we do resist him,
By faith and humble prayer."

And quoting from another portion of the same lecture:

"He was a man who never seemed so happy as when immersing converted sinners in our frozen river or lake. It was said of his converts that no one of them was ever known to be a backslider. * * * Immersions were no uncommon thing in those days. * * * But recently our Baptist friends have made up their minds that our lake has enough to do to carry all the sewerage of the city, without washing off the sins of the people. It is also claimed for Mr. Hinton that no couple he married was ever divorced. He was just as careful in marrying as he was in baptizing; he wanted nobody to fall from grace."

But notwithstanding Rev. Mr. Hinton's ability and the high estimation placed upon his services, his Church was unable to pay him a salary sufficient to support his large family, not even when he aided them by his own efforts in teaching. So he accepted a call to St. Louis, and preached his farewell sermon in Chicago September 26, 1841. The successive pastors of the Church subsequent to Rev. Isaac T. Hinton, have been the following: Revs. C. B. Smith, 1842-43; E. H. Hamlin, 1843-45; Miles Sanford, 1845-47; Luther Stone, 1847-48; Elisha Tucker, D. D., 1848-51; John C. Burroughs, D. D., January, 1853-56; W. G. Howard, D. D., 1856-59. During the vacancy in the pulpit caused by the resignation of Rev. C. B. Smith, thirty-two of the members withdrew and formed the Second, or Tabernacle, Baptist Church. This was in 1843. Of the Rev. Elisha Tucker, who was pastor from 1848 to 1851, George S. Phillips, in his book, "Chicago and her Churches," published in 1868, by E. B. Myers and Chandler, said:

"The next pastor was a man of great mental and moral endowments, who, as Byron said of Henry Kirke White, adorned even the sacred functions he was called upon to assume. * * * A man of great energy and ceaseless devotion to the work of the ministry, he won many souls to Christ and the love of all good hearts to himself. He was a handsome, well-formed man, with a large and lofty forehead, an eye full of sunshine and his whole face beaming with heavenly radiations. The Baptists had never before associated with their Church a man of such strong personal attractions, eminent talents, and unobtrusive learning and piety. His eloquence in the pulpit was the theme of every tongue, while his social bearing and conduct were in the highest degree refined and conciliatory. He was not destined, however, to a long course of usefulness in this new and wide field of labor. He worked faithfully and successfully for two and a half years, when he was seized with paralysis, and cut off in the prime of his life, and the glory of his days. During his connection with the Church as many had been added to the membership as in the eighteen years of her previous history."

On October 20, 1852, the church building caught fire from sparks falling from the tobacco-pipe of a workman, who with others was engaged in re-shingling it, and it was totally destroyed. The next day a meeting was held, and a committee appointed to build a new church. The corner-stone was laid July 4, 1853, and the building was dedicated November 12, of the same year. The cost of this building was \$30,000. It was also during Rev. Mr. Burroughs's pastorate that the Wabash Avenue Baptist Church was organized, mainly by members of this Church. Dr. W. G. Howard, formerly of the Second Baptist Church of Rochester, was chosen pastor in May, 1856. In the following September Union Park Baptist Church was organized, and in November the North Baptist Church, mainly from members of the First Baptist Church. Dr. Howard resigned his pastorate in 1859, and removed to New Orleans, having added two hundred and twenty new members to the Church.

REV. ISAAC TAYLOR HINTON was born at Oxford, England, July 4, 1799. His father was the Rev. James Hinton, of Oxford, a Baptist minister. Isaac T. Hinton was apprenticed to the printing business and served at this trade the regular term of seven

Isaac T. Hinton

years, paying for the privilege one hundred pounds. He then started a publishing house at Warwick Square, London, where he also resided. While in this business he wrote, in conjunction with his brother, Rev. John Howard Hinton, of London, a history of the United States, which was published by a Boston firm. He failed in 1831 and came to America in 1832, landing in Philadelphia in June. During his residence in England he preached occasionally but was not pastor there of any Church, nor in the United States until after moving from Philadelphia to Richmond, Va., which event occurred in September, 1833. At Richmond he was pastor of the First Baptist Church, having a membership of fourteen hundred. He remained in Richmond something over two years when he removed to Chicago, where he became pastor of the First Baptist Church, as the successor of the Rev. Allen B.

Freeman. During his pastorate, which is quite fully treated of in the history of that Church, he was appointed by the General Convention of the Baptists of the United States to write a history of Baptism, which he wrote and took to Philadelphia to be published. This was the first book written in Chicago. From Chicago he moved to St. Louis in 1843, where he had charge of the Baptist Church between three and four years. From St. Louis he removed to New Orleans, in which city he had charge of the only Baptist Church in the city until his death which occurred August 28, 1847, of yellow fever. He was urged by his friends to leave the city, but preferred to share the danger with his Church. No other member of the family died. Mr. Hinton was married in 1822, to Sarah Mursell, of Leamington, England. They had a large family of children, those now living being the following: Sarah, who at the age of sixty and a widow, recently married a Mr. Condon of San Francisco, where she now resides; Isaac T. Hinton, of New Orleans, who furnished these items for this History; Victoria, married and living near Liberty, Mississippi; William Mursell Hinton, a printer, in San Francisco; Fanny, a widow, and Albert, both of whom are living in New Orleans.

THE TABERNACLE BAPTIST CHURCH was organized August 14, 1843, by members dismissed for that purpose from the First Baptist Church. The causes which culminated in this organization were somewhat remote. As early as 1839, while the Rev. Isaac T. Hinton was pastor of the First Baptist Church, a union prayer meeting was established, composed of Baptists, Presbyterians and Methodists. Meetings were held in various places, and among those prayed for were the slaves in the Southern States. Some of the pro-slavery members considered these prayer meetings abolition meetings in disguise, and opposed all recognition of them in the Church. On one occasion, besides the regular Sunday notices, Rev. Mr. Hinton read one that a prayer meeting for the *oppressed* would be held at a certain place. It was afterward discovered that the notice, as written and handed to Mr. Hinton, read, "A prayer meeting for the *slaves*," etc. A resolution was adopted by the Church at a subsequent meeting that "Notices of political meetings should not be read from the pulpit, under any name or guise whatever." The adoption of this

C. B. Smith

resolution created a great sensation in the Church, and caused a sharp division of its members into a pro-slavery and anti-slavery party. The latter had a majority of the members, the former the most of this world's goods. At the next business meeting the question of the reconsideration of this resolution came up, but before final action was taken, a protest previously prepared was presented by the pro-slavery party in opposition to the reconsideration, and letters of dismissal were demanded for the purpose of forming a new Church. The motion to reconsider was thereupon withdrawn, and a compromise effected, Mr. Hinton agreeing not again to present the slavery question in the pulpit. This compromise was not long satisfactory to the abolition members of the Church. Their consciences could not be silenced, nor their sympathies for the slave suppressed. Neither were they pleased with the delivery by Dr. L. D. Boone of a series of lectures to prove that slavery was in accordance with the Scriptures, nor were the pro-slavery members satisfied with the anti-slavery utterances of the Rev. C. B. Smith, who succeeded Mr. Hinton in this pulpit in September, 1842. Mr. Smith was never installed pastor. Finding that a strong minority of the members were opposed to him, he gave notice that he could not accept the call extended to him, but that at the end of his official year, during which he

had agreed to supply the pulpit, he should leave the city. A Church meeting was called to make choice of a pastor, at which Mr. Smith received a majority of the votes cast and was declared elected. When officially informed of this action, he promptly declined the call and advised union and consolidation. Another meeting was held the next week for the same purpose, and he was again elected by a still larger majority. Being present, Mr. Smith again declined, and stated positively that under no circumstances would he accept the pastorate of the Church. A portion of those present at the meeting left the church, but when less than a block away they received word that those remaining had re-organized and were voting for a pastor. All within hearing returned and voted with those who had remained. The result was that Mr. Hamlin received forty-two votes and Mr. Smith forty. Mr. Hamlin was declared duly elected. It was therefore determined by the friends of Mr. Smith to withdraw and form a new Church. The Tabernacle Baptist Church was organized with thirty-four members who, at a regular meeting of the First Baptist Church, held August 8, 1843, and who were, at their own request, dismissed from the said Church for the purpose, organized the second Baptist Church in the city. These members were John L. Slayton, James Knox, S. H. Knox, S. Dodson, Joseph Hogan, W. H. Sadler, John Flynn, Reuben Tuttle, Vincent H. Freeman, James Launder, William David, William Lawrence, Benjamin Briggs, Edwin Clark, J. M. Hannah, T. B. Bridges, John A. Field, Maria Slayton, Elizabeth Williams, Frances Miles, Roxana Spaulding, Maria Tuttle, Mary David, C. Gould, Catherine Woodbury, Eliza Launder, Betsey Ann Briggs, Sarah L. Freeman, Jane McIntosh, Amelia A. Clark and Charlotte Mizener. The dismissal of these members was approved August 10, and on the 13th letters were granted to the following persons for the same purpose: Samuel T. Jackson, Ezra Jackson, Darius H. Paul, John Bell, Lucinda Jackson, Abigail Jackson, Ann Jackson, Grace Flint, Hepsy Ann Flint, Susan Eliza Flint, Mary Merriam, Sarah Reid, Mary S. Merriam, Mrs. Stoughton, Louisa M. Durant, Boletta Hanson, Ann Dorothy Hanson, Crecy Woodbury, Fanny Holden, Sarah Crocker, Elizabeth Johnson, Mary Ann Porter, Jeannette Burgess, Margaret Burgess, Ann Shapley, Emily Bridges and Elizabeth Slocum. On Monday, the 14th of August, at a meeting held in the First Baptist Church, the following resolution was adopted:

"That in view of the state of this community, and the growing importance of this location and the rapid increase of its population, we fully believe that the time has come when a second Baptist Church should be organized."

The Church was thereupon organized on that day by adopting articles of faith and covenant. Immediately afterward rules and regulations were also adopted. The following officers were also chosen on the same day: Trustees, Samuel Jackson, Vincent H. Freeman, B. Briggs, H. G. Wells, and William David; clerk, *pro*

Samuel Jackson

tem., Charles B. Smith. A building committee was chosen, consisting of Samuel Jackson, Vincent H. Freeman and Benjamin Briggs, with Charles B. Smith as general agent. A special meeting was held on Wednes-

day the 16th, at Samuel Jackson's house, at which the name, "Tabernacle Baptist Church," was adopted. On the 20th of August, 1843, there were received by letter: Charles Charleston, Christian R. Oliver, Angelina Waggoner and Ellen S. Mizener. H. G. Wells was received by baptism, and on the 24th of August Mr. Wells was chosen clerk of the Church. On the 31st of August the following persons were elected deacons: Vincent H. Freeman, Benjamin Briggs, Samuel

TABERNALE BAPTIST CHURCH.

Jackson and Benjamin F. Hays, and at the same meeting Rev. Charles B. Smith was unanimously elected pastor of the Church. Measures were taken by the building committee, immediately after its appointment, looking to the erection of a house of worship. A lot was selected on the west side of LaSalle Street, between Randolph and Washington, where now (1883) stands the Merchants' National Bank, upon which was built a plain frame edifice, forty by seventy-two feet in size, at a cost of \$2,200.

On Tuesday, October 3, 1843, a council of ministers and delegates from the churches of the Northern Illinois Association, convened in this place in response to an invitation of the Tabernacle Baptist Church, for the purpose of recognizing and fellowshiping it as a regularly constituted branch of the Baptist denomination. The services were held in the evening, and consisted of an admirable discourse upon the "Union of the Church," by Rev. Thomas Powell; the extension of the hand of fellowship by Elder Blake, and an address to the Church by Rev. A. J. Joslyn. The building was dedicated October 13, within eight weeks of the commencement of work upon it, Rev. Charles B. Smith preaching the dedicatory sermon. On the 18th of October, C. N. Holden was received to membership; on the 26th he was appointed treasurer, and on the same day was chosen clerk, to succeed H. G. Wells, resigned. Rev. C. B. Smith, having given notice in March, 1844, of his intention to do so, resigned his pastorate on the 6th of April. During the interim between Mr. Smith's resignation and the procuring of a second regular pastor in August following, the pulpit was occupied the greater portion of the time by Rev. Mr. Ambrose. It was during this interim, on the 17th of May, 1844, that this Church made application to the Northern Illinois Association to be admitted as a sister Church. In order that the Association might understand their sentiments in full upon the great question then agitating the Church, the following resolution was made a part of their applica-

"Resolved, That slavery is a great sin in the sight of God, and while we view it as such, we will not invite to our communion or pulpit those who advocate or justify from civil policy or the Bible the principles or practice of slavery."

They also submitted the following paragraph as a summary of the history of their Church up to that time:

"The Tabernacle Baptist Church was organized August 14, 1843, with sixty-two members, under the pastoral charge of the Rev. C. B. Smith. We have since received forty-two members by letter and fourteen by baptism. Eight have taken letters to other sister churches, one has been taken from us by death and one has been excommunicated, leaving our number one hundred and eight."

In the early days of this Church, it was as much opposed to secret societies as it was to slavery. On the 30th of May, 1844, a committee appointed to investigate the subject of Odd-Fellowship reported as follows:

"Your committee having carefully and prayerfully examined into the principles and practices of secret societies as far as they have been able to do so, have come to the following conclusions:

1. "That secret societies are calculated to retard the best interests of humanity, and do conflict with the civil and moral laws.
2. "That their rites and ceremonies are solemn mockeries.
3. "We believe they are hindrances to growth in grace to such Christians as may be united with them."

The report of the committee was accepted and adopted, and on the 29th of August one of the members was excluded from Church membership for holding connection to the society of Odd-Fellows in preference to the Church.

On the 26th of August, Rev. Caleb Blood was unanimously called to the pastorate, and during the same month assumed its charge. On March 24, 1845, he tendered his resignation, which was accepted. On the 3d of April, Rev. C. B. Smith, then at Medina, N. Y., was called to the pastorate, and proffered a salary of \$500, and expenses to Chicago. This call was accepted conditionally, and the conditions accepted by the Church. Mr. Smith began his second pastorate in July, 1845, and in the succeeding October it was terminated. On the 23d of November, 1845, Rev. William H. Rice was unanimously invited to become pastor, and began his labors in July, 1846. In the meantime the pulpit was filled by Elder Edson. In April, 1846, the hand of fellowship was withdrawn from Mr. Cushing and his wife for having adopted and adhering to doctrines of the New Jerusalem as taught by Emanuel Swedenborg. On the 6th of May, 1849, Rev. W. H. Rice tendered his resignation, which on Tuesday the 15th was accepted. On the 2d of August of the same year he died of cholera, which also carried away several prominent and valuable members of the Church. On Sunday, July 1, 1849, Rev. Lewis Raymond, of Milwaukee, was unanimously elected pastor to succeed Mr. Rice. Mr. Raymond accepted the call and commenced his labors September 1. In February, March, and April, 1850, during a special revival, large numbers were added to the Church. Revivals were also experienced the two following seasons and many were brought within the fold. On the 1st of October, 1850, this Church, being unanimously of the opinion that the dictates of wisdom and duty pointed to the western division of the city as their future field of labor, appointed a committee of three to make inquiry as to the location and price of a lot and as to the terms upon which it could be purchased. The church building was destroyed by fire, June 26, 1851, and on the same day an extra meeting was held at which it was resolved to build a suitable house of worship on Desplaines Street, between Washington and Madison. In the meantime, by invitation of the First Baptist Church, received through Dr. L. D. Boone, this Church worshiped with the First Church. They also worshiped by invitation in the Third Presbyterian, and also in the Canal-street

Philo Carpenter

Methodist Church. The new church building fronted the west, was forty-four by seventy-two feet in size, of the Gothic style of architecture, two stories high surmounted by a short square steeple, and cost, with the lots, \$5,840. The corner-stone was laid August 14, 1851. On the 16th of November the Church commenced worshipping in the basement, and the church building was dedicated February 3, 1853. Rev. Lewis Raymond resigned his pastorate July 6, 1852, at which time the membership of the Church had increased to three hundred and thirty-nine. He was succeeded, November 1, of the same year, by Rev. A. Kenyon, of Kirtland, Ohio, who preached the dedicatory sermon of the new church building. Rev. Mr. Kenyon remained until August 5, 1856, when he resigned. His resignation was accepted. Rev. H. Harvey declined an invitation to become pastor, and Rev. I. E. Kenney, on February 24, 1857, was unanimously invited to become pastor, with a salary of \$1,500 per year. On the 20th of April he began his labors, and remained until December 7, 1858, when he resigned. The resignation was accepted, and on January 30, 1859, Rev. H. K. Green, of Danbury, Conn., was invited to become pastor, and pledged a salary of \$1,800 per year. Rev. Mr. Green was installed as pastor on Friday, March 25, 1859. On the 5th of June, 1859, this Church wrote, in their letter to the Baptist association, which met at Bloomingdale: "Our congregations are large and increasing. Unity and harmony mark our efforts. We sustain, besides the Sabbath-school connected with the Church, a mission school in a destitute part of the city. Both are enjoying a high degree of prosperity, and around them our fondest hopes center." On November 1, 1859, there were found to be one hundred and seventy-five members in good standing. Rev. H. K. Green resigned his pastorate April 30, 1861, on account of ill health, and was succeeded September 1, of the same year, by Rev. Nathaniel Colver, D.D., who remained until December 1, 1864, when he resigned. It was during this year, 1864, that the Tabernacle Baptist Church united with about fifty members of the First Baptist Church to form the Second Baptist Church, which accepted from the First society, as a free gift, its church edifice standing at the corner of Washington and LaSalle streets, and moved it and re-erected it at the southwest corner of Monroe and Morgan streets, in which they still worship. During the existence of the Tabernacle Baptist Church, as such, there were received into its membership a total of nine hundred and eighty persons.

REV. C. B. SMITH, D.D., the first pastor of the Tabernacle Baptist Church, was born October 29, 1814. He graduated at Yale College in the class of 1837, a class distinguished as containing such men as William M. Evarts, Edwards Pierrepont, Samuel J. Tilden, and Chief Justice Morrison R. Waite. He was baptised in August, 1842, and removed to Chicago and took charge of the First Baptist Church the following month. He returned to the East in 1845. During the years 1846 to 1849 he published works entitled "The Philosophy of Reform," "A Lie in Earnest," and "Scenes in Luther's Life." Subsequently he was settled in New Haven, Conn., in Malden, Mass., in New York City, and in Dubuque. He has been in Grand Rapids for twenty years, and purposes to make that city his home during the remainder of his life. He was pastor of the Baptist churches for a number of years, but is now (1883) without a charge. He preaches nearly every Sunday, without compensation, to destitute churches, and to churches of every denomination as he is requested. He received the degree of Doctor of Divinity in 1850 from Wabash College, Indiana.

THE EDINA PLACE BAPTIST CHURCH.—On the 8th of April, 1856, the first meeting of Baptists looking to the organization of this Church, was held at the house of J. S. Buchanan. The moderator of the meeting was Rev. J. A. Smith, and the clerk J. Woodworth. Rev.

Robert Boyd opened the meeting with prayer. A preamble and a series of three resolutions were adopted, the first and third resolutions being as follows:

"1. That we agree to work together as a Church of our Lord Jesus, under the designation of the Third Baptist Church of Chicago, and that the articles of faith and church covenant found in page 191, of the 'Encyclopedia of Religious Knowledge,' be adopted.

"3. That we give the Rev. Robert Boyd a call to become our pastor, and that we give him one thousand (\$1,000) dollars, and furnish him a parsonage as compensation in part for services, each year."

At a meeting held April 15, at the same place, the following resolution was unanimously adopted:

"That a committee of five be appointed to take a deed of trust of the lot now purchased, situated on the corner of Harrison Street and Edina Place, and hold the same for the Third Baptist Church, and that brethren Edwards, Buchanan, Gassett, Babcock and Woodworth be said committee."

At this meeting I. A. Willard and J. Woodworth were elected treasurer and clerk of the Church, respectively. At the next meeting, held April 22, 1856, at the house of J. T. Edwards, resolutions were passed to build a church edifice on the lot at the corner of Harrison Street and Edina Place, to change the name of the Church from the Third Baptist Church, to the Edina Place Baptist Church, and to appoint a building committee consisting of "brethren Buchanan, Boggs, Babcock and Gassett." A committee on religious worship was also appointed, consisting of "brethren Buchanan, Willard and Woodworth," and a committee on singing consisting of "brethren Edwards, McCall and Raymond." From this time until the completion of the new church edifice in October, meetings were held in the lecture-room of Plymouth Church. The new church was dedicated on Sunday, October 5, Rev. Robert Boyd preaching in the morning, Rev. Dr. Howard in the afternoon, and Rev. A. J. Joslyn in the evening. A council called for the purpose of publicly recognizing this Church, convened October 30. This council on motion of Rev. J. Young, recognized the Edina Place Church as a Baptist Church in Gospel order. The members at the time of its formal organization and recognition, by the Council, October 30, 1856, were: Rev. Robert and Mrs. Christina Boyd, Justin A. Smith, Mrs. Jane A. Smith, John S. Buchanan, Mabel A. Buchanan, Lucius A. Willard, Mary Ann F. Willard, John T. Edwards, Sarah Edwards, John B. George, Elizabeth Johnston, Cyril Babcock, Lydia F. Babcock, Silas B. Gassett, Susannah Gassett, Charles T. Boggs, Virginia A. Boggs, Charles Larminie, Jacob Woodworth, John M. Woodworth, E. D. Woodworth, Amelia Boggs, Ann E. Moore, Maggy Whitelaw, Murdock Morrison, Elizabeth Morrison, Samuel McCall, George Hines, Ira Reynolds, John S. Lawrence, Emma R. Lawrence and Agnes Wanless.

At a meeting of the Church, held December 5, 1856, J. T. Edwards, J. S. Buchanan, I. A. Willard and J. Woodworth, were elected deacons, and on the 31st of December, upon the resignation of J. Woodworth as clerk of the Church, J. S. Lawrence was chosen to fill the vacancy. The 8th of April, 1857, was observed as the anniversary of the organization of the Church. Justin A. Smith recounted its early history, its weakness, trials and discouragements. The society had passed through a season of almost unparalleled financial embarrassment, but in every emergency had been successful, and had not only erected and finished but had paid for its church edifice, which, according to its report to the Fox River Association, in June, 1857, cost \$15,500. On January 28, 1858, a protracted meeting of three

weeks' duration closed. The pastor conducted the meetings almost entirely without assistance, and as a result twenty persons were added to the Church. In March, 1859, another series of revival meetings was held, which added about twenty members to the Church. Early in the year 1860 the question of the removal of the Church became a subject of discussion. On the 11th of April it was decided: "That it is expedient for this Church to remove from its present location to the vicinity of Wabash Avenue and Old Street, when a suitable lot can be obtained." This resolution was re-adopted on the 10th of October, 1860, and a committee was appointed to secure a lot. But little was done until in March, 1862. At a meeting, held on the 21st of that month, the pastor urged as reasons for change of location, that on Sundays there were not regularly over twenty unconverted persons in the congregation, and that during the year last past, they had been losing some of the most active and influential members of the Church by removal. It was also stated at this meeting that a way for the completion of this long-cherished object seemed to have been opened in a providential manner, as they could then exchange their present lots for one on the northwest corner of Wabash Avenue and Old Street. A committee of three was therefore appointed to effect the exchange of property with Dr. L. D. Boone, the owner of the Wabash Avenue lot; and a building committee of four was appointed to let contracts and to make arrangements necessary to effect the removal. May 11, 1862, was the last Sunday spent in the old location. Resolutions appropriate to the occasion were passed, one of them expressing thankfulness for the continued success of the Church for so many years; for the uninterrupted peace, harmony and union which had continuously prevailed, and for the constant affection that had existed between Church and pastor. Preparations for a change were commenced on the 19th of May. The house was removed, and re-opened for worship on the 31st of August, 1862, the members in the meantime worshipping in the Plymouth Congregational Church. On the 22d of August a meeting was held at the pastor's house, at which by resolution the name of the church was changed from the Edina Place Baptist Church to the Wabash Avenue Baptist Church. The cost of the removal, including an enlargement of fourteen feet in length, a new front and other necessary repairs, was \$2,200. At the re-dedication of this church the pastor preached in the morning from the first verse of the twelfth Psalm, and Rev. Dr. Everts preached in the evening. The Sunday school was re-opened on the same day. Up to January 1, 1862, there had been received into the Church three hundred and eleven members; by baptism one hundred and twenty, by letter one hundred and eighty-three, and by experience eight. The dismissals amounted to eighty-eight, leaving the net membership at this time two hundred and twenty-three.

UNION PARK BAPTIST CHURCH.—Early in the year 1855, a mission chapel was established on the West Side, the location being West Lake Street, between Sheldon Street and Bryan Place. This chapel was erected with funds contributed by citizens living in the vicinity, and by Baptists of the city at large. The leaders in the enterprise were mainly those who afterward became constituent members of the Union Park Baptist Church. The exercises at the chapel were continued until the Church was organized, November 12, 1856. The original members of this Church, who were dismissed for the purpose of organizing it from various other churches in this city and elsewhere, were as follows: From the First

Baptist Church, Chicago, David I. Jacobus, Mrs. Eliza Jacobus, Oscar J. Jacobus, Mrs. Lydia Moody, Mrs. Sophia Bretschneider, Edward Zimmerman, Mrs. Harriet Zimmerman and Mrs. Mary Wayman; from the Tabernacle Baptist Church, Chicago, Mrs. Prudence Creote, Mrs. Helen Hays, Mrs. Luranda Hopkins, Miss Eliza Knott, Mrs. Almeda McKay, Miss Adeline Miller, Miss Emma Price and Mrs. Henrietta Sutherland; from the First Baptist Church, Aurora, Ill., Asahel Lockwood and Mrs. Mary Lockwood; from the First Baptist Church, Lowell, Mass., Daniel Hurd, Mrs. Rosetta Hurd and Miss Betsy Hill; from the First Baptist Church, Piscataqua, N. J., Mrs. Hannah Randolph and Miss Mary Randolph. The first trustees of the Church were David I. Jacobus, Daniel Hurd, C. A. Reno, and L. H. Smith. The first deacons were, David I. Jacobus and Daniel Hurd. The first treasurer was James P. Jacobus, and the first clerk Edwin Zimmerman. The first pastor was the Rev. A. J. Joslyn, who commenced his labors one week after the organization of the Church. During his pastorate the chapel was enlarged by the addition of two wings, one on each side, by reason of which its seating capacity was increased to about three hundred. The total cost of the building up to this time was about \$2,000. During the first few years of its existence the Church encountered numerous difficulties, and was too feeble to well withstand them; but it courageously and patiently labored for success, and at length triumphed and received large accessions to its membership. There were revivals in the fall of 1857 and in the winters of 1858-59, during which especially considerable numbers were added to the rolls. Rev. Mr. Joslyn remained pastor of the Church until November 1, 1860, when he resigned, leaving it in a comparatively strong and healthy condition. During his pastorate there had been received in the aggregate two hundred and five members; one hundred and fifteen by letter, eighty by baptism and ten by experience. Rev. Mr. Joslyn was succeeded by Rev. James Dixon, who commenced his ministry January 1, 1861, and soon afterward the chapel was removed to the northeast corner of Lake and Sheldon streets, and again enlarged. It has been moved from time to time, and now stands at the corner of Noble and Superior streets. The subsequent history of this Church, which possesses far more than a common interest, will be detailed in the subsequent volumes of this History.

THE SALEM BAPTIST CHURCH had its origin in the winter of 1852-53. Its projector was the Rev. J. R. Balme, who had recently come from England. On the 27th of February, 1853, Mr. Balme preached at the opening of the Church at 170 South Clark Street, and notice was given that religious services would be regularly held at the same place thereafter by him. This Church was organized Monday, April 25, 1853, in Mrs. Balme's school-room, on South Clark Street, at which time the Rev. A. Kenyon delivered an excellent and impressive address. On May 1, Elder Balme administered the ordinance of the Lord's Supper, in the district school-house which stood at the corner of Clark and Harrison streets. A lot was leased in the early part of the month, on Clark Street, between Jackson and VanBuren, and it was the design to erect upon this lot, as soon as the subscription could be completed, a new church edifice. The subscription, however, was never completed, the church building never erected, and as a sufficient number of members did not rally to the standard of Mr. Balme, he surrendered the project and left the city. The few members that had joined distributed themselves among other churches.

THE BEREAN BAPTIST CHURCH was started in 1855, by members of the Tabernacle Baptist Church, who sympathized with the Rev. A. Kenyon, on account of what they felt to be unjust treatment of him by that Church. Temporarily they worshiped in a school-house at 109 South Jefferson Street. The organization was effected December 14, 1856, and the Berean Baptist Church was recognized by a council of the Baptist churches of the city February 8, 1857. During this year they erected a frame church building on Jackson Street, between Desplains and Halsted, which cost \$1,700. In 1859, under the pastorate of the Rev. Isaiah Rider, who was ordained November 7, 1858, this church building was removed to DeKoven Street, between Desplains and Halsted. Here the society remained and prospered until 1867, under the pastoral ministrations of Mr. Rider and Dr. Nathaniel Colver, when, becoming ambitious and looking upon their modest edifice as quite too small for so large and prosperous a city as Chicago; and feeling, as a certain minister expressed it, that "the day of small churches in Chicago had passed," they determined to erect a large and magnificent building in order to satisfy their personal and religious pride, and to provide an elegant religious home for a large, wealthy and prosperous organization. In 1867 the Church called the Rev. N. F. Ravlin to the pulpit. He remained until 1870, and succeeded in erecting and inclosing, on the corner of Harrison and Sangamon streets, where five twenty-five-foot lots had been purchased, a fine brick building, the main body of which was sixty-five by one hundred and twenty-five feet in size, the extreme width, including the towers, one on each front corner, being seventy-five feet. When the basement of this building was completed the Church sold to a business firm their property on DeKoven Street, and moved into the basement of the building, which they hoped would soon be completed and be their permanent home, and changed the name of their society from the "Berean Baptist Church" to the "Fifth Baptist Church." Had the church been finished according to the original design it would have cost \$100,000. Including \$20,000 borrowed of the Union Mutual Life Insurance Company, the society expended on the structure about \$45,000. In 1868 the property was estimated to be worth \$55,000; the congregation was three hundred, and the scholars in the Sunday school four hundred. It became evident about this time that it would be difficult, if not impossible, to complete the audience room of the church and towers, which would cost an additional \$25,000 or \$30,000. Members were tired of giving and were opposed to an increase of the debt. The Second Baptist Church was near, was large and wealthy and with but a small debt, and as the Fifth Church was mainly composed of people in moderate circumstances, men of means preferred to unite themselves with a Church in which the drain upon their purses would not be so constant nor so large. Still, although the members of this Church had much to discourage them, they labored on as best they could. When Mr. Ravlin retired from the pulpit in 1870, he was succeeded by Rev. J. T. Westover, who remained only six months. He was succeeded by Rev. W. J. Kermott, who came in 1870, and remained until 1872. He was succeeded in 1872 by Rev. N. F. Ravlin. During 1873, Mr. Ravlin, thinking it possible that the Church would be more prosperous under another name, proposed to the members that the title "Temple Baptist Church" be adopted in place of the "Fifth Baptist Church." The change was effected August 11, 1873. A Church paper, under the name "The Temple Call," was issued monthly, by John L.

Manning, and Pliny P. Ravlin, a son of the pastor, the first number of which appeared in January, 1874. This name was retained as long as the Church existed. During his second pastorate Mr. Ravlin had as associate pastor, Rev. A. G. Eberhart, who received the whole of Mr. Ravlin's salary. In 1875 the Church was disbanded, in part on account of the debt, and in part because of the desire of most of the members to re-organize upon a different basis. On the 25th of April, 1875, a series of preambles and resolutions were presented for consideration, and on the 7th of June, adopted. The principal preamble was as follows:

"WHEREAS, It is desirable that an opportunity should be given all true followers of Jesus who may so desire, to unite with us in an effort to have the Gospel unshackled by stated creeds, sectarian prejudice, or denominational bands, preached and sustained, but who are now prevented from so doing by reason of the present Church organization; therefore,

"Resolved, That the present organization, known as the Temple Baptist Church, be and the same is hereby disbanded and disorganized immediately upon the passage of the necessary resolutions following herein."

The necessary resolutions were passed, the trustees instructed to convey any property belonging to the Temple Baptist Church to any new organization that may be formed according to the statutes of the State of Illinois. A few of the members who did not approve of the disorganization of the Church, adhered to each other, and under the pastorate of the Rev. W. S. Hamlin, continued religious services for a few months in the brick building. About twenty-five of those who had favored disbandment, formed an independent organization or mission, and under Mr. Ravlin's ministrations worshiped for six months at the northeast corner of Clinton and Twelfth streets. At the expiration of this period Mr. Ravlin accepted a call to the First Free-Will Baptist Church, located at the corner of Jackson and Loomis streets, where he remained nearly three years. He then started an effort in the West End Opera House, which was carried on about six months, when he removed to the Swedenborgian Temple, at the corner of Washington Street and Ogden Avenue, and finally to 431 Ogden Avenue, where he remained several months. He then accepted a call to a Baptist Church in San Jose, California, where he now resides, pastor of a large and flourishing congregation. The Temple Baptist Church building, after falling into the hands of the insurance company, was taken down and dwelling houses erected in its place.

THE OLIVET BAPTIST CHURCH had its origin, in 1853, in the "Zoar Baptist Church," which was organized that year by Rev. R. J. Robinson, who came from Alton for that purpose, remaining with the Church about a month. He was succeeded by Rev. H. H. Hawkins, who was the first permanent pastor. The church building originally stood at the corner of Buffalo and Taylor streets. In 1856 the Zoar Church had one hundred and twenty members, and for a year or two the membership was considerably increased by the influx of numerous refugees from the Southern States, and with increased numbers came trouble in reference to the government of the Church. In consequence of this difficulty about fifty or sixty of the members in 1858 seceded from the Zoar Church and formed the Mount Zion Church, being organized by Rev. Wallace Shelton, during the pastorate of Rev. D. G. Lett, who had been pastor of Zoar Church about three years. The Mount Zion Church leased, and worshiped during their separate existence, in a frame store building standing on Clark Street, near Harrison. Rev. H. H. White, who was the first pastor of the Zion Church, was succeeded

by Rev. Jesse Bolden. The Zoar Church, after the secession, had for its pastor Rev. Mr. Tansbury, who, after remaining a short time, went back to Canada. After this, through the influence of Rev. Jesse Bolden, the two separate bodies were re-united, but as neither Church would unite under the name of the other, both names, Zoar and Zion, were discarded and the name "Olivet Baptist Church" adopted by mutual consent in its stead. This re-union occurred in December, 1862, in the Edina Place Baptist Church. The Olivet Society went into a building at the corner of Harrison and Griswold streets, formerly owned by the Zoar Church, at that time having about one hundred and twenty members. Rev. Jesse Bolden remained after the re-union about three months, when he was succeeded by Rev. Richard de Baptiste, in June, 1863, who remained pastor of the Church nineteen years, retiring from the pulpit February 1, 1882. He was succeeded by Rev. James Podd, who remained until January 10, 1883, and was succeeded by Rev. H. H. White. The church building mentioned above as standing at the corner of Harrison and Griswold streets, continued to be occupied until 1865, when this society, having purchased a lot on the east side of Fourth Avenue, between Taylor and Polk streets, erected a church thereon costing \$18,000, worshiping for a few months in Witkoskey Hall, on the northwest corner of Monroe and Clark streets. This building escaped destruction by the fire of 1871, but was destroyed by that of 1874, at which time the society was in debt only \$2,500. After this fire the city passed an ordinance opening Dearborn Street to Fourteenth Street, which cut off twenty-seven feet from their fifty-foot lot, and rendered it necessary for them to purchase an adjoining lot in order to have room to re-erect their church building. This lot cost \$4,500; and the new church building, which was completed in 1875, cost \$20,000. It is a three-story brick building, with two fronts—one of stone on Dearborn Street, the other on Fourth Avenue, and was erected without any assistance from insurance on the building destroyed in 1874, only \$2,500 having been received from that source, all of which was used in payment of debts. This building was occupied until October, 1883, the property having been sold some time previous to the Western Indiana Railroad Company, for \$32,500. With this money the debts were paid, and the balance used in purchasing a lot on Harmon Court, between State Street and Wabash Avenue, for which \$13,500 was paid. At the time of selling their property to the Western Indiana Railroad Company, there were about five hundred members in the Church. It is their design to erect a new church edifice in the spring of 1884, a description of which will be inserted in the third volume of this History. At the time of the Rev. Mr. Podd's resignation, forty-six members were regularly dismissed from this Church to form the Bethesda Baptist Church under his pastorate, a sketch of which will be found in its proper place in this History.

FIRST SWEDISH BAPTIST CHURCH, was organized in 1853, in part by Swedes, who had up to that time been members of the First (American) Baptist Church. This Church purchased for their Swedish offspring a school-house standing at the corner of LaSalle and Erie streets. Among those who united in organizing this Church were Ira J. Collings, Peter Peterson, Peter Modine, Andrew Anderson, F. M. Wimmerset, John Uberg, Matthew Matson, Frederick Blonquist, William Wigland, Mr. Mullen, and their wives. Rev. L. L. Frisk was the first pastor. For about a year after thus organizing themselves into a Church society they wor-

shipped at the house of their pastor, and at the houses of various members of the Church. In 1854 they took possession of the school-house purchased for and presented to them. This they moved to Bremer Street, in 1858, and continued to occupy it until 1860 or 1861, when it was destroyed by fire. They then rented a school-house, which they occupied for some years. Mr. Frisk remained pastor of the Church until 1857, when he was succeeded by the Rev. G. Palmquist, who remained about six months. After him there was no regular pastor in this Church before its disorganization, which occurred in 1864, but the members themselves conducted religious services as well as they could with an occasional sermon from a missionary. But at length a portion of the members becoming scattered, the rest became discouraged and abandoned the organization of the Church.

REV. LUTHER STONE was born in the northeast corner of the town of Oxford, Worcester Co., Mass., September 26, 1815. He and his brother Lewis, who is still living on the old homestead, are twins, and the youngest of a family of six children. Mr. Stone is a descendant in the sixth generation of Gregory Stone, who came from Cousinston, Somersetshire, England, in the ship "Increase," to Boston, in 1634, and made his homestead in Cambridge, on what is now Mt. Auburn Cemetery. He brought with him his son John, then sixteen years old, and settled him in that part of Sudbury, which is now Farmingham, on land purchased of the Indians. Here was born Hezekiah Stone, the great-grandfather of Rev. Luther Stone, who in company with seven others purchased the town of Oxford, fourteen miles long by about five miles wide, of the Huguenots, to whom it had been given by Massachusetts after

Luther Stone

their expulsion from France. John Stone, the son of Gregory, had two sons, Daniel and Nathaniel. Lois, a grand-daughter of Nathaniel, married Uriah Stone, Jr., a great-grandson of Daniel. Luther, a son of Uriah, Jr., and Lois, was the father of the subject of this sketch. He married Miss Abigail Bemis, who was born in Spencer, Mass., lost her parents when very young, and was reared and educated by her uncle, Captain Jesse Smith, of Charlton, Mass. Luther had the advantages of a common-school education, and was prepared for college at Leicester Academy, which he entered in 1833, where he was under the tutorship of Rev. Luther Wright, formerly tutor in Yale College. He entered Brown University in 1835, graduating in 1839. He then went to Newton Theological Institution, from which he graduated in 1842. He now spent his time for a year in preaching, and was ordained at Oxford, October 3, 1843, as an evangelist, designing to make the Mississippi Valley his field of labor. In the winter of 1843-44, he preached temporarily at Ellsworth, Me., and in the spring of 1844 returned to Boston and made preparations to go West, leaving Oxford on Wednesday the 8th of May. He traveled by railroad to Schenectady, N. Y., thence by canal packet to Buffalo, by steamer to Cleveland, by canal packet to Portsmouth, Ohio, spending a week between these two points at Granville College with Rev. Dr. Jonathan Going, its president. Reaching Portsmouth on Saturday, he preached on Sunday, taking a steamer on Monday down the Ohio for Cincinnati, Louisville and St. Louis, in which latter place he visited the Rev. Isaac T. Hinton, who had been one of Chicago's early ministers. From St. Louis he went up the Mississippi River to Rock Island and Davenport, reaching the latter place on Thursday, the 6th of June. On the following Sunday he preached for the First Baptist Church in Davenport, which extended to him a call to become its pastor. Declining the call, he made Rock Island his home until March, 1845, spending the eight months in preaching in numerous towns and pioneer settlements in the Mississippi Valley, and traveling in the meantime thirty-four hundred miles. During this time the Rock Island Baptist Association was formed, Mr. Stone being present and one of its original members. About the first of March he went to Burlington, Iowa, and preached there on Sunday, the 9th, the first Baptist sermon in the place. He preached there four months, having as large a congregation as there was in the town. He then went back from the river about eight miles to a town named Pisgah, where there was a Baptist Church, and preached there several Sundays. He then came up Rock River to Sharon, four miles from Geneseo, in Henry County, Ill., and there bought two hundred and fourteen acres of land, upon which he erected what he designed as a part of a larger building, the

whole to be used for an academy; but after remaining there several months, having chills and fever every day for four and a half weeks, he concluded the climate was not a healthy one, so bought a two-year old horse and saddle and rode to Rockford, preaching at different places on the way and reaching there in March, 1846. The Baptist Church at Rockford gave him a unanimous invitation to become its pastor, which he accepted and remained there until July, 1847. He then, on account of the differences of opinion and sentiment in the Baptist denomination at large respecting the subject of slavery, came to Chicago to establish the "Watchman of the Prairies," the first number of which he issued on the 10th of August of the same year. The majority of the Baptists were averse to the attitude of the general organizations of the denomination on this subject, and the Watchman was established in their defense. Mr. Stone continued the publication of the paper, as sole proprietor and editor, until June 18, 1853, when he sold it to John C. Burroughs, Levi D. Boone and A. D. Titsworth. From July, 1847, to September, 1848, Mr. Stone discharged the duties as pastor of the First Baptist Church of Chicago. After disposing of his paper, Mr. Stone continued to preach in Chicago in the various institutions of the city, and to supply vacant pulpits until 1861, from which time to the close of the war he preached at the Soldier's Rest, at Camp Douglas, at the Marine Hospital and other places, continuing throughout this period his work at the jail and at mission schools. In 1863 he was made secretary, being one of the original fifteen trustees, of the Baptist Theological Union, which founded the Baptist Theological Seminary, now (1883) located at Morgan Park. This office he held until 1866. In September, 1864, he received an invitation to become the president of Central University, located at Pella, Iowa, but declined the honor. In November of the same year, at the request of friends of education in Iowa, he purchased college premises in the city of Des Moines, consisting of five acres of ground, beautifully situated upon which was a brick building. In order to do this he sold twenty acres of land south of and near to the city of Chicago, running from State Street to the present Grand Boulevard between Forty-eight and Fiftieth streets. Mr. Stone paid \$8,000 for the college premises at Des Moines. The twenty acres above mentioned he sold for \$6,000, and in 1868, only four years afterward, it had a market value of \$200,000. In May, 1866, he went to Europe, accompanied by his wife and daughter, and spent over two years in travel. He visited Scotland, England, and all the principal countries and cities in continental Europe, crossed the Mediterranean and entered Egypt at Alexandria, and ascended the Nile eight hundred miles to Nubia, and, returning, visited Jerusalem, the Jordan, the Dead Sea, Bethlehem, Hebron, Damascus, Beyrout, Smyrna, Constantinople, and also through the countries and principal cities of southern Europe to Hamburg, whence he embarked for home, reaching there July 3, 1868. Since this time Mr. Stone has lived the life of a retired minister, spending his days in that pleasantest of ways, perusing and studying the writings of the master minds of the past. He has read all the works of all the great Greek philosophers and historians—Aristotle, Plato, Herodotus, Thucydides, Demosthenes and Æschylus, the principal Roman writers from the earliest to the latest, and has made a special study of American history and politics, so that there are probably few American statesmen better read in the politics and history of their country than he. Mr. Stone was married January 26, 1854, to Mrs. Anna M. Jacobus, a widow lady who had two children by her former marriage. Her maiden name was Speer. Her mother was of Holland descent and one of the descendants of Anneke Jans, who for many years has been contesting the title to the Trinity Church property, New York, which, previous to the conquest of the Hollanders by the English, was her homestead. He has raised and educated, and assisted in raising and educating, several children not his own.

THE FIRST METHODIST CHURCH.—Reference to the "Pre-Church" history of Chicago will show that the Methodists were the first in this city to form the nucleus of a Church society, and might without impropriety have been placed first in the list of organized churches, but as their regular and permanent organization was not effected until 1834, the sketches of the churches organized in 1833 precede.

At Rev. Jesse Walker's first quarterly meeting in 1833, held in the Watkins school-house, which was located on North Water Street, between Clark and LaSalle, Rev. Henry Whitehead received his license to preach, and occasionally preached in the Temple Building. In the spring of 1834 Charles Wisencraft was appointed class-leader. For a time services were held in various places—in Billy Caldwell's log council-house, in Chester Ingersoll's tavern, or in Watkins's school-house; but

as the membership of the Church increased, the necessity for a building became more pressing and measures for its erection were soon taken. It was built at the

Henry Whitehead

corner of North Water and Clark streets, by Henry Whitehead and John Stewart. According to the original contract it was to be a "frame building twenty-six by thirty-eight feet; twelve-foot posts; sheeted and shingled roof; a neat pulpit; a platform for table and chairs; the whole to be done in a workmanlike manner," for \$580. The contract was signed June 30, 1834. The building was finished, and religious services held therein until 1836. Rev. Jesse Walker preached regularly every Sunday most of the remainder of the year 1834, but about the beginning of the winter of 1834-35, he became superannuated and was succeeded by Rev. J. T. Mitchell. On October 4, 1835, Rev. Jesse Walker died at the age of sixty-nine years.

During the winter of 1834-35 a number of conversions and accessions to the membership was made. Chicago Methodism is largely indebted to the zeal and efficiency of Rev. John T. Mitchell. He gave to the Church a thorough organization and laid the foundations of its future stability. He was succeeded in 1836 by Rev. O. T. Curtis. The Church that year was struck off the list of missions, and erected into an independent society. Mr. Curtis was a pious, amiable and quiet man, but not very energetic. In part for this reason the financial crisis that began to be felt that year had a peculiar effect upon the religious zeal of many of the members. At the loss of their wealth, they lost faith in God, and turned their backs on the Church. In addition to this some members lost their integrity, and the fall of others was especially ignominious and sad. Blow after blow fell with quick succession and crushing effect upon the Church and, added to the financial embarrassments, threatened to overwhelm it with confusion and shame. The faithful few were deeply humiliated. They "gathered around their almost forsaken altars, and humbling themselves before God with tears and agonizing prayers, besought the World's Redeemer for mercy and help." In answer to their prayers, as they believed, the Conference of 1837 sent Rev. Peter R. Borein to them "for a Joshua to lead them out of the wilderness." * * "He came in the fullness of the Gospel, burdened with the love of Christ to dying men. He gathered his feeble flock around him and breathed into them something of his own mighty faith, and with them, at the feet of the Redeemer, cried for help. Salvation was poured as in a mighty torrent upon the people." This effect was not produced, however, at once upon the arrival of Mr. Borein. It was a year afterward that the great revival occurred. So great was the interest awakened at this revival, still vividly remembered by many now living at Chicago, that about three hundred united with the Church; the young city containing at the time a population of about three thousand. This revival commenced in December, 1838, and lasted till April, 1839. Mr. Borein died soon after its close. Those who heard it will never forget his last sermon. His subject was the vision of the dying Stephen, and during the delivery of the sermon he pictured for the congregation his own conception of heaven. In the language of Rev. S. R. Beggs, "he believed that in

the next, as in this world, there were degrees in Christian attainments, and that in the land of glory some would occupy higher positions than others; that sometimes his imagination had pictured heaven as a vast amphitheatre, whose seats rose tier above tier, up to the very throne itself; and when, from the lower seats, the white-robed struck the exultant song of redemption, it was caught up from rank to rank, growing louder and sweeter as it rose, while in unison the angel choir struck their lyres, and from every golden harpstring of saint, angel, cherubim and seraphim, was poured the rapturous, jubilant, adoring song and heaven was filled with an atmosphere of melody."

During the summer of 1838, the church was moved

FIRST METHODIST EPISCOPAL CHURCH.

across the river, on scows, from its position on the North Side, to a lot at the corner of Clark and Washington streets, purchased in 1836 by Dr. R. Tripp, for \$3,250. The society purchased a portion of this lot, which was eighty by one hundred and eighty feet in size, but never paid for it, as before the payments were completed, eighty by one hundred and thirty feet of it was secured as a donation from the canal company. Subsequently a lot at the corner of Adams Street and Wabash Avenue was donated for a parsonage, by David Carver. The church building after removal was enlarged from time to time to meet the necessities of a continually increasing congregation; and in 1845, through the influence of Rev. W. M. D. Ryan, a brick building, sixty-six by ninety-five feet, was erected at a cost of \$12,000. The corner-stone was laid on the 8th of May, and the dedication occurred in November. This

church stood at the corner of Clark and Washington streets. It had a stone basement eight feet high, and walls thirty feet high. The apex of the spire was one hundred and forty-eight feet from the ground. The auditorium seated one thousand persons.

After the death of Rev. Mr. Borein in 1839, Rev. S. H. Stocking was appointed to the charge. He was succeeded by Rev. Hooper Crews, who remained during the years 1840-41. In 1842 Rev. N. P. Cunningham was appointed, and in 1843 Rev. Luke Hitchcock. He was succeeded by Rev. W. M. D. Ryan, in 1844; Rev. Chauncey Hobart, in 1846; Rev. Philo Judson, in 1847; Rev. Richard Haney, in 1848; Rev. Stephen P. Keyes, in 1850; Rev. J. W. Clark, in 1852; Rev. Hooper Crews, in 1854, and Rev. James Baume, in 1856.

An incident in connection with early Methodism may be appropriately introduced. It was in 1836 or 1837. There was considerable excitement in the country over the slavery question, and as there were some strongly pro-slavery Kentuckians in the Church, anti-slavery agitation was avoided. If any member in his prayers ventured to "remember those that are in bonds, as bound with them," he was at once branded as an abolitionist, and made very uncomfortable generally. At the time there was present in Chicago a fugitive from slavery, whose name was William Brown. Having escaped in a box, he was known as William Box Brown. At one of their meetings, by prearrangement, William Box Brown delivered an anti-slavery address, much to the surprise, consternation and disgust of those not in the plot. Leading Methodists arose to their feet, and made frantic efforts to dismiss the meeting. "They buzzed around like enraged bumble bees, and finally put out the lights." But Mr. Brown was not to be disturbed. He remained self-possessed and calm, and with telling power put in his words. At length he ceased and peace returned. It is not necessarily to be inferred from this incident that those who tried to keep out anti-slavery discussion were in favor of the continuance of the institution of slavery. Their main desire was to build up Methodism in Chicago, and to accomplish this most effectually they thought it necessary to exclude dissensions and promote harmony.

This Church was incorporated November 20, 1835, as the "Methodist Episcopal Church of Chicago." Being located later on Clark Street, it was popularly known as the "Clark-street M. E. Church." On the 14th of February, 1857, an act of the Legislature was approved, changing the name to the "First Methodist Episcopal Church of Chicago."

REV. PETER RUBLE BOREIN was born on Sinking Creek, Washington Co., East Tennessee, November 17, 1809. His father, Greenberry Borein, was of English, and his mother, Mary (Ruble) Borein, of German descent. During his childhood and youth he was distinguished for an amiable and affectionate disposition, and for filial obedience. His early education was from necessity very limited. In August, 1828, he attended a camp-meeting, became converted and resolved henceforth to devote his life to the gospel ministry. He at once entered heartily into the social and religious exercises of the neighborhood, and conducted services in the upper story of his father's house. Previous to his conversion he had given no evidence of the possession of uncommon intellectual powers, but from that time forward, an extraordinary development of mind was noticeable, and he became a very vigorous thinker. In the early part of the year 1830, he emigrated to Illinois and commenced laboring in a brick yard, devoting to study every moment of leisure he could command. While thus engaged, the attention of Rev. Mr. Kirby, a Congregational minister, was attracted to him, and he was advised by this reverend gentleman to enter Jacksonville College. Mr. Borein acted upon this suggestion, and continued in connection with this college for some time, pursuing his studies with great diligence and success, but through the importu-

nity of his friends, who were impatient to see him engaged in the active duties of the ministry, he was dissuaded from completing his course of study, which it is said was afterward to him a matter of regret. Immediately after leaving college he was licensed to preach, received on trial in the Illinois Annual Conference, and in the fall of 1833 appointed to travel the Canton Circuit. In 1834 he was appointed to the Rushville Circuit, and in 1835 to the Henderson River Mission. In the fall of 1835 he was appointed to the Quincy missionary station, where he labored for two years with great zeal and success and until near the close of his pastorate enjoyed almost universal popularity. But when he somewhat prominently identified himself with the anti-slavery movement, he alienated many of his friends and rendered himself obnoxious to a considerable portion of the community. The Conference of 1837 appointed Mr. Borein to the Chicago station. Here he commanded great attention as an able and eloquent preacher, and wielded an influence over the religious thought of the infant city which was not only new, but was deep reaching and widespread. The revival which was thus awakened spread throughout all the evangelical denominations of the town continued for many months and gathered many into the Church. About three months after the close of this remarkable revival he was taken sick, and after a seventeen days' illness died August 15, 1838, at his home. His funeral sermon was preached by the Rev. Isaac T. Hinton, and subsequently a commemorative discourse was delivered by Rev. John Blatchford. Mr. Borein was married in December, 1836, to Miss Lucinda Burns. Mr. and Mrs. Borein had two children. After Mr. Borein's death Mrs. Borein married Thomas Pope, and is now living in Alton, Ill. The family name is Boring, but the orthography of it was changed by the subject of this sketch. The above facts were obtained from a sketch of the Rev. Mr. Borein in Sprague's Annals of the American Pulpit. The following with reference to his physical appearance is from the pen of the Hon. Grant Goodrich: "He was one of the handsomest men I ever saw. Great intellectual power was blended with a singular beauty of feature and expression. His eyes were blue, large and lustrous, and, when he was animated, they seemed the medium through which his soul was not only beaming, but actually blazing forth. His voice was like the music of running waters—when he sought to persuade, there was a deep plaintive earnestness in its tone, which was well-nigh resistless; and when he uttered the language of warning or denunciation it seemed by an indescribable power, to pierce to the inmost soul. Men of more intellectual polish and of profounder thought I have often heard, but never one so effectively eloquent—one who possessed such perfect control of the will and heart as Mr. Borein."

REV. STEPHEN R. BEGGS was born in Rockingham County, Va., March 30, 1801. His great-great-grandfather, James Beggs, was born in Ireland. His great-grandfather, Thomas Beggs, was born in New Jersey, where he married Sarah Barnes, and whence he emigrated to Virginia. Thomas Beggs had four sons and one daughter. One of these sons, John, had one son, James, and eight daughters. James married Miss Mary Custer and had four sons, one of whom was Stephen R., the subject of this sketch. In the year 1805 his father moved his family to Kentucky, where on account of his opposition to slavery he remained only two years, when he settled in Clark County, Ind., on the Ohio River, about seventeen miles above the falls at Louisville. Stephen's opportunities for obtaining an education were limited to the common schools of his time. Acting upon the advice of Rev. James Armstrong, he was educated in and graduated from the "Brush College," as was the case with most of the pioneer Methodist ministers of the West. In 1822 he was appointed to the Mt. Sterling Circuit on the Ohio River. In 1823 he traveled the Lemoine Circuit, in what was called the Boone's Lick country; in 1824 the Fishing River; in 1825 the Rushville; in 1826 the Vincennes; in 1828 the Wayne; in 1829 the Crawfordsville, and in 1830 was sent to the Logansport mission, embracing Logansport, Lafayette and Delphin. In 1831 he was appointed to Chicago, a partial account of his labors in which place is inserted in the introduction to the Church history, and an account of Mr. Beggs's troubles in connection with the Black Hawk massacre, which drove him to Plainfield, is inserted in the early history of the city. At Plainfield he bought a home. In 1832 he was appointed to the Desplaines mission, of which Jesse Walker was superintendent, and to which Mr. Beggs was re-appointed in 1834. In 1835 he was sent to the Bureau mission, and re-appointed to it in 1836. At the Conference held at Rushville in 1837, Mr. Borein delivered an effective speech in favor of the missionary cause. Mr. Beggs was located at Joliet that year, where he preached the first Methodist sermon in the place, and commenced the first church building. In 1837 he traveled the Forked Creek Circuit; in 1838 the Joliet; in 1839 the Peoria; and after traveling various other circuits, he became in 1868, on account of his wife's illness, a superannuated, but not indigent, minister. Since then he has lived a retired life, occupying his time in part in authorship, writing and publishing an interest-

ing volume, entitled "Pages from the Early History of the West and Northwest." Mr. Beggs was married September 1, 1831, to Miss Elizabeth Heath, who was born in Muskingum County, Ohio, December 27, 1813, and died at Plainfield, Ill., August 7, 1866. He was married the second time to Mrs. Sarah Rheuhama Frost, who still lives. Mr. Beggs's first child was born in Fort Dearborn, and died when but thirteen months old. Three sons, James, George and Charles, are still living.

REV. HENRY WHITEHEAD was born June 17, 1810, in Chatham, England. Both his parents were members of the Wesleyan Methodist Church, and by them young Henry was instructed in the truths of the Bible. On the 3d of April, 1823, to use his own language, he "obtained a conscious sense of the pardoning favor of God." It then became his strongest desire "to win souls to Christ." When twenty-one years of age he began as a local preacher. He sailed from London for the United States April 24, 1832, reaching New York City June 5, in which city and in Troy he lived until June, 1833, when he left the latter place for the Sault Ste. Marie mission. From the Sault he came to Chicago, reaching here September 17, 1833. On the first Sunday after his arrival he preached in the log school-house, and received his license to preach at the first quarterly meeting of that conference year. In 1834, in partnership with a Mr. Stewart, he built the First Methodist church on the North Side. In the fall of 1835 he removed to Joliet, thence, in 1837, to Little Fort, now Waukegan, and thence, in 1839, to Racine. In 1840 he joined the Rock River Conference; in 1842 was ordained deacon, and appointed to the Troy circuit in Wisconsin. In 1844 he was ordained elder and appointed to the Sylvania circuit, and in 1845 to that of Buffalo Grove. In July, 1846, he removed to Chicago, and at the next annual conference was superannuated on account of ill health. In 1851 he commenced keeping, in his store at the corner of State and Madison streets, religious books, which upon the opening of the Methodist Book Concern, in 1852, he turned over to that concern, becoming connected with it, where he remained until the fire of 1871. After the fire he became manager in Chicago for Bigelow & Main, publishers of Sunday-school and church-music books, a position which he still holds. Mr. Whitehead was married, in Chicago, to Miss Elizabeth Jenkins, July 11, 1834, by Rev. Allen B. Freeman. Mrs. Whitehead is still living. They have had five children, one of whom, Sarah Ann, the eldest, is dead. The four living are: William H., Edward J., Eliza Jane, and Caroline N., all of whom are married except the latter.

CANAL-STREET METHODIST EPISCOPAL CHURCH was organized in 1843 by a colony from the Clark-street Church, during the pastorate of Rev. Luke Hitchcock. The original members were nineteen, as follows: Mr. and Mrs. William Wisencraft, Mr. and Mrs. Joseph Kittlestring, Mr. and Mrs. James Robinson, Mr. and Mrs. Nathaniel Webber, Mr. and Mrs. Thomas George, Samuel Small, Mr. and Mrs. John Tressy, Mr. and Mrs. John Roe, Mr. and Mrs. Elisha B. Lane, and Mr. and Mrs. A. S. Sherman. The first church building erected by this society was situated on a lot on the west side of Canal Street, south of Randolph, purchased by A. S. Sherman for the purpose. This was the first lot purchased for a church on the West Side. The building was a low frame structure, thirty by sixty feet in size, capable of accommodating about three hundred people. The original cost was \$1,400. It was afterward moved back on the alley, and turned round so as to front north instead of east. The First Congregational Church was organized in this building. In 1852 the membership had increased to such an extent that it was necessary to have greater facilities, and business had so encroached upon the location that it was necessary to remove; hence a new and much larger edifice was erected in 1852 on Jefferson Street, between Washington and Madison, on a lot which had been purchased in 1851, preparatory to the removal. The Canal-street church was sold, and converted by the purchaser into a furniture factory. The change was made February 11, 1853, from which time until the removal to West Monroe Street the Church was known as the Jefferson-street Methodist Episcopal Church. The first pastor of the Canal-street Church was Rev. Warren Oliver, appointed in 1843, who in 1844 alternated with Rev. William M. D.

Ryan, then pastor of the Clark-street Methodist Episcopal Church. In 1845 Rev. Sins Bolles was appointed pastor, and was succeeded in 1847 by Rev. Harvey S. Bronson, who was succeeded in 1848 by Rev. Richard A. Blanchard, who remained two years and was succeeded in 1850 by Rev. William Palmer, whose pastorate was terminated by death from small-pox in December, 1851. In 1852 Rev. James E. Wilson became pastor, being assisted by Rev. William Keegan. During Mr. Wilson's pastorate the Church removed to Jefferson Street. While it remained in this location the pastors were: Rev. E. H. Gammon, appointed in 1853; Rev. Sins Bolles, in 1854; Rev. J. F. Chaffee, 1855; Rev. S. P. Keyes, 1857; Rev. R. J. White, 1858; Rev. W. W. McKaig, 1859; Rev. T. M. Eddy, D. D., and Rev. F. D. Hemenway, 1860; Rev. C. H. Fowler, 1861; Rev. Robert Bentley, 1863; Rev. Charles Shelling, 1864. During the year 1865 the pulpit was un-supplied, and on September 6, 1865, the property on Jefferson Street was sold for \$16,000. On the 21st of November, 1865, subscription was started for the building of the Monroe-street church, and at the same time a resolution was adopted by the members present that the name of the Jefferson-street Methodist Episcopal Church be changed to that of the Second Methodist Episcopal Church. This resolution, although carried unanimously, was never consummated. On March 10, 1866, the plans of W. W. Boyington, architect, for the new West Monroe-street church, were accepted, and E. H. Gammon and G. F. Foster appointed the building committee. Toward the erection of this church building the First Methodist Episcopal Church appropriated \$8,000. During the year 1866 the new building was completed and dedicated, and the name of the church changed to the Centenary Methodist Episcopal Church, that title being chosen from the fact that that year was the centenary of American Methodism. A description of this edifice and a history of the Centenary Church will be inserted in the third volume of this History.

INDIANA-STREET METHODIST EPISCOPAL CHURCH.

—At the time this Church was organized, there were but two Methodist churches in the city, the Clark-street and the Canal-street churches. This was in 1847. A number of members of the Clark-street Church, living on the north side of the river, became desirous of organizing a Methodist Church in the North Division, and determined so to do. With the view of carrying out this design, a meeting was held at the residence of Hon. George F. Foster, which then stood at the corner of Clark and Kinzie streets. At this meeting an organization was effected by the election of the following trustees: Hon. George F. Foster, A. J. Brown, Jeremy Hixon, John W. Senser, Charles Sweet and C. H. P. Lyman. The original members of this Church were in part the following: George F. Foster, Mary S. Foster, Jeremy Hixon, Mrs. Hixon, Andrew J. Brown, Charles H. P. Lyman, Mrs. Lyman, John W. Senser, Charles Sweet, Susan Sweet, Abner R. Scranton, M. F. Ellinwood, Miss Diana Morse, F. C. Jordan, Anna Jordan, William Gamble, Mrs. Gamble. The name adopted by this society was the Methodist Episcopal Society of Indiana-street Chapel, and immediately two lots were leased on the south side of Indiana Street, between Clark and Dearborn, upon which to erect a church. This building was completed in November, 1847, and was a small, neat frame structure, about thirty-five by forty-five feet in size, which cost \$1,300. At the dedication of this house of worship, which occurred November 14, 1847, Rev. James Mitchell preached the dedicatory sermon. At the Conference

of 1847 Rev. Freeborn Haney was appointed pastor. Soon after the dedication, the Church, having been assisted by friends to meet the financial obligations incurred in the enterprise, and being therefore full of zeal and faith, commenced a series of revival meetings, which resulted in the accession to their membership of considerable numbers. The following extract from a historical sketch of this Church written by Abner B. Scranton for John G. Collins's "Annual Compendium of Methodism," is concise and yet sufficiently full, and is therefore introduced in this place:

"In 1848 Rev. John F. Devore was appointed pastor, and in 1849 the Rev. Zadoc Hall followed him. During Rev. Mr. Hall's pastorate, payments were made upon the lots which had been bought, and a small brick parsonage was built. In 1850 the Rev. Boyd Lowe was sent to succeed Mr. Hall, and at a meeting held in the church our brother Dunham was converted, and has since remained continuously a member. The Rev. John W. Argard was appointed pastor in 1851, and remained one year. Each of the preachers, it will be observed, down to this date, served the Church but one year. At the annual conference of 1852, the Rev. Sius Bolles was appointed pastor, and served faithfully for two full years. During this pastorate the capacity of the church building was nearly doubled by an addition to the rear, extending back to the alley, making the building about thirty-six by eighty feet; this added nothing to its beauty or symmetry. In the year 1854 the Rev. Thomas Williams followed Brother Bolles and remained three years, the presiding bishop suspending or ignoring the two-years rule then limiting the pastorate term, for the reason that some of the members had informed him that the society was about to erect a new church, and that the return of Mr. Williams was necessary for the accomplishment of that purpose. A vague hope had been entertained by the more ambitious members that a new and imposing church building would be erected; that, in fact, such a building was essential. The old building, cheaply built of wood, was exceedingly uncomfortable, it being impossible to heat it properly in winter, and the sun lying on the low roof made it intolerably hot in summer. The society, however, had no resources adequate to the realization of their ideal, and ought not to have moved in the matter of enlargement until their means had been greatly increased. The agitation for new accommodations increasing, intensified greatly by the allegation that the preacher had been sent for this specific work, the trustees, fully realizing that the site on Indiana Street was unsuitable for a permanent church home, contracted for the purchase, in the spring of 1857, of a lot on the southeast corner of Erie and Wolcott (now State) streets. This movement was disastrous to the society, but it undoubtedly prevented what would have been a great deal worse, namely, the premature commencement of a new building on the old lot, plans and specifications for which had been prepared, and a pressure put upon the trustees by a number of class leaders, stewards and others, temporarily resident, to begin a work which they had not ability to accomplish, and in a manifestly improper place. In the summer of 1857 Rev. S. G. Lathrop was appointed pastor, and entered upon his work with great energy. Scarcely had he begun, however, when the great financial panic seized the people. Nearly all the members of the Church were prostrated financially. Quite a number of the members, prior to this time, had moved to Evanston, arranging, however, to pay their portion of the cost of the new lot. These all went down in the storm, and the ability of the society to pay, largely decreased. The trustees soon began to fear that they would not be able to meet the engagements they had entered into—and this apprehension was by no means groundless; for when, upon the maturity of an installment due on the lot recently contracted for, payment was demanded, there were no funds, current expenses, though reduced by the strictest, absorbing all resources. The trustees were now obliged to mortgage the Indiana-street lot, as an additional security for the sums due upon the new one, and as was clearly foreseen, the result of this was that both lots were sacrificed to satisfy these claims, leaving nothing but the equity of redemption, should there be any. The society determined to pay their debts, as long as they had anything to pay with, and pledged their whole property for this purpose. The final outcome was, that the lots were sold by the mortgagees, the full claims against the society were met, with interest and costs, and \$1,087.85 was paid into the Church treasury. Brother Lathrop served the Church faithfully for two years, and several who joined it under his ministry remain as active members to the present time (1878). A change in the pastorate again occurred in 1859, the end of Brother Lathrop's time having been reached, and in the year 1861 the Church received thankfully the appointment of Rev. Dr. L. H. Bugbee, as pastor. The society having been a tenant at the will of the mortgagee for a long time, realized the necessity of making provision for the

future, at the same time realizing their inability to accomplish so great a work as the providing a church and lot. Having lost all but honor, they were determined to retain that. Recovery from the effects of the panic was slow, and the wrecks were numerous that had strewn its course. All these considerations combined to make men cautious. After much deliberation, a plan, and the only one that seemed feasible, was suggested by the pastor, for raising money to purchase a lot, and was heartily adopted. It was, in brief, for the members of the congregation to subscribe as much as they would, payable monthly to such ladies of the Church as would engage in the work, and in addition, solicit from friends and the public donations and subscriptions. In furtherance of this object, a society was organized under the name of the 'Ladies' Church Aid Society.' About twenty ladies accepted subscription-books, and engaged in the work with great assiduity, many of them for three or four years. Funds immediately began to accumulate, and soon, at the request of the society, the lots on the northwestern corner of Chicago Avenue and LaSalle Street were purchased. The total cost of these lots was \$9,339.39. Of this amount the sum saved from the equity in the Indiana-street lot, \$1,087.85, was paid by the Church, and the entire balance, \$8,251.54, was collected by the ladies of this society, so regularly and promptly, that the payments due upon the purchase money were made at maturity. It is not too much to say, that these ladies by their unswerving devotion to Christ's cause, laid the foundation for whatever of success our Church has since achieved."

To this excellent sketch by Mr. Scranton, but little need be added in this volume. Having secured these new lots, the Church was re-organized on the 8th of June, 1863, and adopted the name of the "Grace Methodist Episcopal Church," and soon afterward erected a chapel, and still later a larger church edifice. A description of both, and a history of Grace Church as the successor of the Indiana-street Church will be included in the succeeding volume of this History.

THE STATE-STREET METHODIST EPISCOPAL CHURCH originated with Orrington Lunt. In 1848 Mr. Lunt bought the lot upon which its first house of worship was located, immediately reporting its purchase to the official board of the Clark-street Methodist Episcopal Church, and offering it to them for what he paid for it, \$1,600; and also proposing to pay \$100 toward the purchase. In the spring of 1851 the Society took possession of the lot. About the same time the Clark-street Church instructed a few of its members to furnish a place for preaching and Sunday school. As a result of these instructions a portion of the frame building of the Second Presbyterian Church was purchased and moved to the lot, which was at the northwest corner of State and Harrison streets. The building when moved and ready for occupancy cost \$1,600, and was paid for at its dedication. During the summer of this year regular religious services and Sunday school were continued in this building, and on Sunday, August 24, 1851, the Church was organized by Rev. N. P. Heath, its first pastor. All the constituent members, twenty-eight in number, were from the Clark-street Church. Following are their names: George C. Cook, Mrs. George C. Cook, S. W. Grannis, Aurisnon Grannis, George W. Reynolds, E. G. Reynolds, Christopher O'Neil, Sarah Milner, Daniel Goss, Cynthia Goss, Mary Pennington, Charles Brink, James M. Merryfield, William and Margaret Gibson, Stephen and Maria Cherry, Albert Cabery, Ruth Cabery, Levi Chipman, Mary Chipman, Sarah Chipman, R. Kegan, Margaret Kegan, Francis Kegan, Edward Kegan, Charles Busby and Arthur Hitchcock. The first trustees were Daniel Goss, C. H. Abbott, Samuel W. Grannis, George C. Cook and Elihu G. Reynolds. The first pastor was Rev. N. P. Heath, who was appointed in 1851, and remained two years, when he was succeeded by Rev. F. A. Read. Rev. Mr. Read remained two years, and was succeeded in 1855 by Rev. W. B. Slaughter. Rev. Mr. Slaughter remained until the spring of 1857, when he was succeeded by Rev. William

M. D. Ryan, a very able and popular clergyman, who was appointed to the State-street Church for the special purpose of procuring the erection of a new building on Wabash Avenue. The first subscription for the building of the Wabash-avenue Church was dated March 26, 1857, and amounted to \$32,555. The names of sixty-nine persons were appended to the subscription list. The transfer and change of name from "State-street Methodist Episcopal Church" to "Wabash-avenue Methodist Episcopal Church" was made April 1, 1857, and on that day new trustees were elected as follows: Daniel Goss, C. B. Hearth, C. H. Abbott, Lott Frost, George C. Cook, H. W. Clark, William M. Doughty, E. G. Reynolds and W. B. Phillips. On the 20th of April the trustees were organized by the election of the following officers: President, E. G. Reynolds; secretary, Lott Frost; treasurer, George C. Cook. On the 11th of May the salary of the pastor, Rev. W. M. D. Ryan, who had been sent to fill out the unexpired term of Rev. W. B. Slaughter, was fixed at \$600 and use of parsonage from March 4, 1857, to the meeting of the conference in the fall. The corner-stone of the new building, which stood on the northwest corner of Wabash Avenue and Harrison Street, was laid July 13, 1857, and the edifice was completed and dedicated July 15, 1858, the dedicatory sermon being delivered by Rev. R. S. Foster, president of the Northwestern University in Evanston. At the close of the discourse a collection was taken up and subscriptions to the amount of \$5,000 received toward the cost of the pews, the galleries being made free. A description of this building, as properly belonging with the history of the Wabash-avenue Methodist Episcopal Church, will be inserted in the succeeding volume of this History, where will also be found a biographical sketch of Rev. William M. D. Ryan.

THE DESPLAINES-STREET METHODIST EPISCOPAL CHURCH.—In the year 1850 a Sunday school was started in a cooper-shop at the corner of Harrison and Clinton streets, the leaders in the movement being Henry Willard, James Robinson, and Mrs. Huntoon. The Sunday school was continued here until the spring of 1851, when it was removed to a school-house built for its special use at the corner of Polk and Clinton streets. Rev. William Palmer, at the time pastor of the Canal-street Church, assisting to build the school-house. James Robinson was superintendent of the Sunday school. In 1854 the Sunday school and mission, as it now became, were removed to the southeast corner of Harrison and Foster streets, and here, in 1855, Rev. Sins Bolles commenced his labors as missionary, continuing until October, 1856, when Rev. William Tasker was appointed for the purpose of organizing a Church. Mr. Tasker remained until September, 1857, and succeeded in organizing a Church, and erecting a church building. This being effected, the two lots and building owned by the primitive organization, or mission, at the corner of Harrison and Foster streets, were sold to Thomas Thompson for \$3,500, who sold the building to Josiah Greenwood for \$150. The original members of the Desplaines-street Church were as follows: Richard Manley, Mr. and Mrs. Thomas Manley, Mr. and Mrs. John Hustivit, Henry Robinson, Joseph Ellsworth, Mrs. Mary Ellsworth, Henry Willard, Mr. and Mrs. George Somers, Mr. and Mrs. Henry Pithey, Mr. and Mrs. Liversidge, Mr. and Mrs. Hogan, Mr. and Mrs. Needham, Mr. and Mrs. Alexander Drake and Mr. and Mrs. Alexander Shepherd and some others. The building was located at Nos. 241 and 243 South Desplaines Street, between Van Buren and Harrison, and was dedicated July 26, 1857, the morning sermon being delivered

by Bishop Ames, and that in the afternoon by Rev. R. S. Foster, president of the Northwestern University. The original cost of the church was \$5,200, the steeple being very large and expensive. Mr. Tasker was succeeded in the pastorate in September, 1857, by Rev. Henry Whipple, who re-organized the society and remained with it until 1859, when he was succeeded by Rev. David Teed, who remained until 1860. Mr. Teed was succeeded by Rev. Elijah Stone, who was pastor two years, and was succeeded in 1862 by Rev. Lucius Hawkins, who remained one year. Rev. E. M. Boring, now of Wheaton, Ill., became pastor in 1863, and remained one year. In 1864 Rev. T. L. Olmsted was appointed pastor and remained eight months, the balance of his year being filled out by Rev. Elijah Stone, who during this time discovered that the board of trustees had never been legally organized, and succeeded in having a legal organization effected. In 1865, Rev. S. Guyer, was appointed and remained one year. During his pastorate the church was removed to Maxwell Street, when the society became popularly known as the Maxwell-street Methodist Episcopal Church, though the re-organized society was incorporated under the name of St. Paul's Methodist Episcopal Church. At the time of the removal to the new location a division occurred among the members, somewhat more than one-third uniting themselves with the Centenary Church. The Desplaines-street building, which was a frame structure, forty-five by seventy feet in size, was sold to the Evangelical Lutheran organization, which occupied it for a number of years as a church. From the time of its sale, the society worshiped in Foster mission, on Polk and Jefferson streets, until 1866, when they removed to their present location on Maxwell Street, near Newberry Avenue. The pastors after the removal to Maxwell Street were Rev. A. T. Needham, appointed in 1866; Rev. E. W. Fay, appointed in 1868; Rev. W. H. Burns, in 1869.

THE OWEN-STREET METHODIST EPISCOPAL CHURCH.—The origin of this Church was in a Sunday school started in 1851, in a school-room on North Green Street. Of this Sunday school, Samuel Polkey was superintendent. In 1852 a Church was organized, consisting of the following members: Mr. and Mrs. Samuel Polkey, D. E. Lord, E. P. Lewis, Thomas Cannon, Mr. and Mrs. James Ridley, Mr. and Mrs. H. Waggoner, Mr. and Mrs. H. C. Fulton, Mr. and Mrs. D. D. Williams, John Noble, Mrs. J. Lester, Mrs. Commons and Mrs. Toops. The society purchased two lots on the northeast corner of Sangamon and Owen streets, and a building was erected fronting on Owen Street, from which fact the Church received its name. The edifice was a small frame one, twenty-five by thirty-five feet in size, and cost \$800. It had a seating capacity of three hundred. The first pastor, Rev. S. Guyon, was appointed in the fall of 1853, and remained two years, when he was succeeded, in 1855, by Rev. C. French. Rev. William Tasker was appointed to the pastorate in 1856, and in 1857 Rev. Arza Brown was appointed by the Conference. Mr. Brown remained until the year 1860. In this year the name of the street was changed from Owen to Indiana, and consequently the name of the church was changed to the Indiana-street Methodist Episcopal Church. This name it retained until its removal to Ada Street, in 1869. The successor of Rev. Arza Brown in 1860 was Rev. Jacob Hartman, who remained one year and was succeeded by Rev. D. W. Couch. In 1863 Rev. W. D. Skelton was appointed pastor, and remained three years. During his pastorate the church first erected was taken down and replaced by a much more commodious edifice,

a description of which, being built during the period covered by our second volume, will find its proper place therein. The Sunday school still continues its existence. Its first superintendent was Samuel Polkey, who has been succeeded by the following gentlemen: H. Waggoner, Mr. Wilsey, L. L. Bond, Edwin Waggoner, John Culver, Alonzo Wygant, B. T. Vincent, Mr. Goodno and H. G. Coulson.

THE WELSH CALVINISTIC METHODIST EPISCOPAL CHURCH.—On the first Sunday in 1845, about twenty-four people of Welsh origin assembled in the house of the late John Davis, at 208 West Lake Street, to hold a Sunday school, Robert Griffith, of Caernarvonshire, being instrumental in gathering them together. From this time forward a prayer meeting was held once each week, from house to house. The ministers that visited them that year were Rev. Richard Davis, of Racine, Wis., Rev. George Lewis, of Fox River, Wis., Rev. William J. Jones and Rev. John H. Evans, of Dodgeville, Wis. The names of some of those who held meetings were as follows: John Davies; John J. Roberts, John B. Thomas, Evan Lewis, Robert Owen, Henry Roberts, David L. Roberts, and Mrs. Mary Evans, all members of English churches. There is an account of preaching in the fall of 1847, by Rev. W. J. Jones, and Rev. I. H. Evans, preaching in the house of Rev. Moses Williams on Wells Street, near Washington, and about the same time there was preaching by Rev. George Roberts, in the house of Evan Lewis, and by Rev. John Price Jones, in the house of James Thomas, on Prairie Street. In 1850 Rev. David Davis, of Prairieville, Wis., preached in the lecture-room of the Third Presbyterian church, on the corner of Union and Washington streets. In the spring of this year, the people of this inchoate church organization, rented a room at the corner of Randolph and Canal streets, in which to hold regular religious services. In July, 1850, Rev. Rees Evans, of Racine, came to Chicago and organized the Church, with thirteen members. The names of a few only of these original members are ascertainable, as follows: Rev. Moses Williams and wife, John B. Thomas and wife, Mrs. James Thomas, Mrs. Samuel Williams, Richard Newell and James Morgan. The first officers were John B. Thomas and James Morgan. Rev. Moses Williams preached for them every Sunday evening. In the summer of 1852, the Church bought a lot on Desplaines Street, between Randolph and Lake, on which they built a small frame church, thirty by forty feet, which was dedicated on the 26th of July in that year. The ministers present on this occasion were Revs. Edward Evans, of Racine, David Lewis, of Utica, N. Y., John Perry, of Racine, William R. Jones, of Milwaukee, and William Williams, of Big Creek. The building cost \$781.33, which, with the exception of \$51.50, was paid at the time of the dedication. The officers of the Church at the time were John Lawrence, Edward Williams and Potter Jones, and the trustees, Edward Williams, John B. Thomas, James Thomas, Owen Griffiths and Potter Jones. On October 13, 1853, Moses Williams was ordained a regular minister, and at the same time Rev. Rees Evans accepted a call to the pastorate at a salary of \$500. Mr. Evans remained until July, 1857, when he accepted a call to Cambria, Wis. On the 5th and 6th of November, 1853, the first Welsh Presbytery in Chicago was held. From 1857 until 1864 the pulpit was supplied by various ministers from Wisconsin and other places. In October, 1864, a call was extended to the Rev. D. Williams, of Milwaukee, at a salary of \$700 and a donation. Under his ministry the Church prospered, and the building soon became too small. In March, 1867, the society purchased the prop-

erty owned by them at the present time, of the American Reformed Church, paying therefor \$9,500. It is located at the northeast corner of Sangamon and Monroe streets. The lot is seventy-five by ninety-five feet. The old church was sold for \$3,400. The new building was occupied by this congregation for the first time, on the first Sunday in 1867, the opening sermon being delivered by Rev. Howell Parnell, of Cincinnati, Ohio. Rev. D. Williams was pastor until December, 1869. He died in Chicago in 1874. From 1869 to April, 1875, the Church was without a regular pastor and relied upon supplies. In the latter month a unanimous call was extended to Rev. David Harries, the present pastor, at a salary of \$1,200 and a donation. He commenced his labors with this Church on the second Sunday of August, 1875. The society at that time owed \$3,000, and the membership was one hundred and sixty. At the present time the membership is three hundred and fifty, the debt has been liquidated and the Church is in excellent financial and social condition. The officers of the Church at the present time are: Deacons, E. W. Evans, David Jones, John Jones, and R. R. Meredith; trustees, G. M. Owen, D. Jones, R. R. Meredith, R. W. Thomas, and E. A. Francis; treasurer, David Jones; secretary, Ellis Rice.

A brief history of the denomination is not inappropriate here. At Oxford, England, in November, 1729, a great revival prevailed, in which John and Charles Wesley and George Whitfield, with others, took active part. The name "Methodists" was given them as revivalists. In 1741 the Methodists became divided into two sects, the one Calvinistic, the other, including the Wesleys, Arminian. The revival reached Wales in 1735, Rev. Howell Harris and Rev. Daniel Rowland united with Whitfield. Harris was a thunderer, but Rowland was more like Whitfield. In 1739 there were nearly three hundred churches in South Wales. After a conversation with Harris, at Cardiff, Whitfield came to America. Rev. Daniel Rowland, of Slangeiths, Cardiganshire, Rev. William Williams, of Panty-Elza, Caermarthenshire, and Rev. Howell Davies, of Pembrokehire, were the main instruments in kindling this great revival which awakened all Wales, and now this Calvinistic Methodist, or as it is called in this country, Welsh Presbyterian Church, has in America Presbyteries, General Assemblies and funds—about one thousand five hundred churches, one hundred and thirty thousand communicants, eleven hundred ministers, and church property valued at \$6,000,000. The denomination is strong in New York, Pennsylvania, Ohio and Wisconsin, but has only one Church in Chicago.*

THE FIRST GERMAN METHODIST EPISCOPAL CHURCH was organized August 15, 1847, with about twenty-five members, a portion of whom were A. Biedermann, Johanna Kessler, Mr. and Mrs. Anton Waller, Mrs. Baumgartner, Christian Mueller, George Krinbill, F. Rudolph, Mr. and Mrs. Bink, John Stoetzel, Andrew Krinbill, Mr. and Mrs. F. Heinz, Charles Kessler, Friedrich Muchike and Ernst Dickermann. During the first year of their history they had preaching by missionaries, but in 1848 they purchased a lot and a building on Indiana Street, for \$500, and had appointed a resident minister, Rev. Philip Barth. The first quarterly conference in Chicago was held November 20, 1848, Rev. Conrad Eisenmerger being presiding elder, and Rev. A. Korfliage, preacher in charge of this Church, which was connected at the time with the Rock River

Conference. The class-leaders were Peter Heins, George Krinbill and John Stoetzel. At the conference held October 31, 1856, a resolution was passed authorizing the Church to sell their Indiana-street property and purchase other in a more desirable location. Under this resolution Revs. G. F. Mulfinger and Frederick Kopp were appointed a committee to carry its provisions into effect. In 1857 a parsonage was erected and in the same year the new building on Clybourne Avenue was erected. It was of wood, thirty by fifty feet in dimensions, and cost about \$2,000. This church was used by the congregation until 1863, when during the pastorate of Rev. William Pfaffle, it was moved to the back part of the lot, and a new brick church erected in its stead. This was a two-story building, forty by seventy feet in size, and cost about \$10,000. The fire of October, 1871, swept away all the property of the Church, including a very comfortable two-story frame parsonage, which cost about \$2,500. After Mr. Barth, the pastors have been, Revs. A. Korfliage, appointed in 1849; J. J. Dreier, in 1850; Louis Kuntz, 1851; Philip Barth, 1852-53; Christian Wentz, 1854; J. H. Westfeld, 1855; Christian Wentz, 1856; John L. Schaefer, 1858; Jacob Hass, 1859; Frederick Kluckhohn, 1860; William Pfaffle, 1862, who remained three years for the purpose of completing the new brick church; Jacob Bletsch, 1865; G. F. Mulfinger, 1868, and Friedrich Rinder, 1870, who became pastor one year before the fire, by which he lost \$1,000. At this time the Church consisted of one hundred and ninety members, but the great calamity was very disastrous in its effects upon this society. Its members became scattered throughout the city, and many of them were obliged to leave Chicago to obtain the means of subsistence. However, those who adhered to the society soon recovered their courage and enterprise, and erected a temporary building promptly, which was dedicated on Saturday, November 11, 1871. In this building the society worshiped about eighteen months, by which time their present building was erected. It is a frame two-story structure above the basement, forty-four by ninety feet in size, and cost about \$17,000. The basement and first story are rented for business purposes and the upper story used for regular religious services and Sunday school. The temporary church edifice was converted into a parsonage, and cost altogether about \$2,500. Mr. Rinder was succeeded in 1874 by Rev. John W. Røecker, who remained until 1876, and was succeeded by Rev. John Schnell. In 1879, Rev. George H. Simons became pastor and remained until 1882, when he was succeeded by Rev. Friedrich Rinder, who was pastor from 1870 to 1874, and is the present pastor. There are now two hundred and nine members.

CENTER-STREET MISSION, located on Dayton Street, was started by members of this Church, and a few from the VanBuren-street Church, in 1876, during the pastorate, in the First German Church, of Rev. John Schnell.

THE VAN BUREN-STREET GERMAN METHODIST EPISCOPAL CHURCH was organized in October, 1852, by about twenty members, among whom were Mr. and Mrs. Jacob Isele, Jacob Landauer, Mr. Baumgartner and Frederick Fisher. Soon after the organization they purchased two lots at the corner of Griswold and Van Buren streets, paying therefor \$1,400. They also erected a small house of worship, which afterward became the parsonage. In the spring of 1854 they began the erection of a church building, with stone basement and frame superstructure, with steeple and bell, which was carried forward suffi-

* For the facts contained in the above brief sketch of the denomination, as well as the history of the Welsh Calvinistic Methodist Episcopal Church, this history is indebted to Rev. David Harries.

ciently to be ready for plastering, when the Chicago & Rock Island Railroad Company made an offer of \$15,000 for the lots. This offer was accepted. Two lots at the corner of Van Buren Street and Fourth Avenue, upon which stood a residence, were then purchased, and to which the church and parsonage were moved. The church building was then finished, and the whole property became very valuable. The first minister in this church was Rev. August Kellner, who was appointed soon after the organization in 1852. He remained until 1854, when he was succeeded by Rev. Frederick Schuler. Rev. W. F. Koeneké was appointed in 1855, and was followed in 1856 by Rev. Christian F. Holl, who remained two years. In 1858 Rev. Leopold Lass became pastor, and was succeeded in 1861 by Rev. Frederick Kopp. Mr. Kopp was succeeded in 1864 by Rev. Isidore Lewis, who remained one year, being succeeded in 1865 by Rev. C. A. Loeber, who remained until 1867. Rev. E. Wunderlich then became pastor and remained two years, being succeeded by Rev. Mr. Fichencher, who in 1872 was succeeded by Rev. C. A. Loeber, who remained four years as pastor and one year as agent for the society's property. Rev. J. W. Roecker was appointed pastor in 1877, and was succeeded in 1878 by Rev. C. F. Allert, the last pastor of the Church. The property of the society, as completed in the year 1854, consisting of the two lots, church building, parsonage and rented residence, were used until the fire of October, 1871, destroyed them. The society at that time was in a flourishing condition, and consisted of nearly two hundred members. Like many other societies, they were to some extent scattered and weakened by the great calamity; but those who remained attached to its fortunes were by no means deprived of confidence in its future prosperity, as was shown by their refusal to accept an offer for the lots of \$70,000, although advised to do so by some of the older and more experienced members. The plan adopted by the majority of the Church, which was composed of young and enthusiastic business men, was to erect a business block, following the successful example of the First Methodist Episcopal Church, with the expectation that the income from rents would furnish the society with a handsome revenue. The lots were each fifty feet wide. Sixty feet in width was mortgaged for \$40,000, at ten per cent annual interest, and a brick block erected thereon. This block is sixty by seventy-five feet in size, and four stories high. It was completed in 1873. The panic of this year prevented the realization of the hopes of the society, and the location did not prove as favorable for business as it was expected that it would. The annual interest on the debt, \$4,000, added to the ordinary expenses of the society, proved too excessive a burden to be borne. The members became discouraged, and gradually fell away from the Church. In March, 1879, when the debt amounted to \$48,000, and the membership was reduced to sixty, the mortgage was foreclosed. These sixty members distributed themselves among other German Methodist churches, uniting mainly with the Maxwell-street and Portland-avenue churches. In 1874 the Dayton-street Mission, which in 1879 became the Center-avenue Church, was started principally by members from the Van Buren-street Church. Among those active in the matter were Henry Ricker, Christian Cander and Charles Batsche. A sketch of this mission will be introduced in the third volume of this History.

MAXWELL-STREET GERMAN METHODIST EPISCOPAL CHURCH.—Certain members of the First German Methodist Episcopal Church on Indiana Street, and of the VanBuren-street Methodist Episcopal Church, in

the year 1852, united in the formation of this society. In this movement about forty German Methodists were engaged. Among the more active ones were: Mr. and Mrs. Christian Brandes, Mr. and Mrs. Henry Gils, August Theis, Henry Juengens, Mr. and Mrs. John Lange, Eliza Zempta, Conrad Ocho, William Pagenhart, William Schreiner, Philip Ralfstadt, and Eruct Dikman. This society purchased a small building at the corner of Washington and Jefferson streets, where-in they worshiped about a year, with Rev. A. Kellner as their minister, when they moved their building to the corner of Harrison and Aberdeen streets, at a cost of \$200. Here they remained until 1864, when under the supervision of Rev. P. Hinners, then in charge of the congregation, the church edifice at present owned and occupied was erected. From the sale of the old building to the completion of the new one the congregation worshiped in a school-house at the corner of Halsted and Twelfth streets. The church on Maxwell Street is a brick basement with frame superstructure, surmounted by a low tower. It is forty-five by sixty-five feet in size and cost about \$7,000. The first minister, after the removal to Harrison and Aberdeen streets, was Rev. Ernest Baar, who was succeeded by Rev. R. Fickenscher, who in turn was succeeded in 1855 by Rev. Henry Senn. Since that date the pastors have been as follows: Revs. R. Fickenscher, 1856; W. Winter, 1858; Isidore Lewis, 1860; L. Lass, 1861; P. Hinners, 1863; F. Fischer, 1866; R. Fickenscher, 1868; C. G. Becker, 1870; J. W. Roccher, 1872; G. L. Mulfinger, 1874; C. A. Loeber, 1876; Frederick Gottschalk, 1879; and J. J. Keller in 1882. Three churches have thus far sprung from this society—the Emanuel, at the corner of Laflin and Nineteenth streets, the Portland-avenue, at the corner of Portland Avenue and Twenty-eighth Street, and the church at the corner of Ullman and Thirty-first streets, dedicated September 2, 1883. A Sunday school has been connected with the German Society, or Maxwell-street Church, since its organization. There are now from three hundred to four hundred children in attendance.

THE FIRST SWEDISH METHODIST EPISCOPAL CHURCH was organized as the Scandinavian Mission early in 1853, by the Rev. S. B. Newman. There were originally twenty-five members, among them Mr. and Mrs. C. M. Lindgren, Mr. and Mrs. Olof Westergreen, and Mr. and Mrs. John Livergreen. As early as practicable after organization Mr. Newman erected a building on Illinois Street, near Market. This was during the summer of 1854, and the dedication occurred September 24, the sermon being preached by Rev. O. G. Hedstrom from the Bethel Ship, New York City. This church was occupied by the society until burned down by the fire of 1871. Mr. Newman remained pastor until the fall of 1855, when he was followed by the Rev. Eric Shogren, who remained until 1859. Rev. J. Bredburg was then pastor from 1859 to 1861, and was succeeded by Rev. A. J. Anderson, who remained until 1864. Rev. Eric Shogren was then returned and remained until 1865. He was followed by Rev. N. O. Westergreen, from 1865 to 1868; by Rev. Nels Peterson, from 1868 to 1870, and by Rev. A. J. Anderson from 1870 to 1873. He was then again returned and remained from 1873 to 1876, having as assistant from 1873 to 1874 Rev. Alfred Anderson, and from 1874 to 1876, Rev. N. O. Westergreen, who was also editor of the Swedish Church paper, "Sandeudet." Rev. Victor Witting was then pastor from 1876 to 1877; Rev. A. J. Anderson from 1877 to 1879, and Rev. D. S. Serlin from 1879 to 1882, when the present pastor, Rev. H. W. Eklund, was appointed.

After the destruction of their church on Illinois Street by the fire, the society immediately erected a temporary building at the corner of Market and Oak streets, which was used until 1876, when it was replaced by the present brick structure, which is seventy by seventy-two feet in size, has a seating capacity of 800, and cost \$30,000. A fine organ was put up in 1881. Adjoining the church is a two-story brick parsonage, costing about \$2,500. The property of the society is free from incumbrance. The branches from this Church are the Second Swedish Methodist Episcopal Church on May Street organized in 1876; the Fifth Avenue Methodist Episcopal Church, organized in 1876, and the Lake View Swedish Methodist Episcopal Church, organized in 1883, sketches of which will appear in the third volume of this History. The membership of this Church in 1858 was sixty; in 1872 three hundred and twenty-five; and in 1883 four hundred and thirty-six.

REV. S. B. NEWMAN was born in Sweden September 15, 1802. He came to America in 1842, and joined the Alabama Conference in 1845. He went to New York in 1851, and came to Chi-

cago in 1852. Since leaving Chicago, in 1855, he has filled various pulpits in Methodist churches, as appointed to them by the conference, and was elder of the Illinois District from 1870 to 1875. At present he is pastor of the Swedish Methodist Episcopal Church at Moline, Ill., preaching also at Rock Island.

THE METHODIST PROTESTANT CHURCH was organized in 1849. They at first worshiped in the seminary at the corner of Clark and Madison streets. Rev. Daniel Bagley was the first minister, preaching regularly in the seminary until the erection of the church building, situated at the northwest corner of Washington and Desplaines streets. Rev. Mr. Bagley, was succeeded, in 1850, by Rev. R. T. Strong; Rev. R. L. Ellis was appointed in 1851, Rev. Z. R. Ellis was appointed in 1852 and Rev. R. F. Shinn was pastor in 1853 and 1854. Mr. Shinn was succeeded by Rev. George Ridding, who remained about two years, and was succeeded by Dr. Rogers, from Canada, a man of fine appearance and address and of considerable talent. But his connection with the Church was unfortunate, as certain difficulties, taken in connection with the indebtedness of the society hastened the disbandment of the Church. During the pastorate of Mr. Shinn, the society purchased a lot upon which to erect a new church; deeding the lot in trust to him. This lot he re-deeded to the trustees some time after leaving the Church, and it was lost, together with the rest of their property on account of debts. In March, 1857, they were worshiping in a church at the corner of Peoria and Fulton streets, under the pastoral charge of Rev. Robert H. Sutton. On the 26th of April, Rev. W. B. Mack preached to this congregation. In August, 1858, Rev. P. J. Strong preached to them, and in September Rev. W. B. Mack was appointed by the Illinois Conference of the Methodist Protestant Church, Superintendent of the Chicago Mission, and commenced his labors in the church building of this denomination on the 26th of the month.

QUINN CHAPEL METHODIST EPISCOPAL CHURCH was organized Thursday and Friday, July 22 and 23, 1847, by the Rev. J. H. Ward, a traveling deacon ap-

pointed by Bishop William P. Quinn. The organization was effected at the house of Madison Patterson, on State Street, near Madison, who succeeded Mr. Ward as pastor. Rev. Mr. Patterson was succeeded by Rev. Aaron Parker, who was born a slave in Kentucky, sold to a St. Louis slave-holder, of whom he bought his freedom, and came to Chicago. Quinn Chapel was his first charge. The society was then occupying a building on Wells Street. Mr. Parker bought of Orrington Lunt a lot on the corner of Jackson and Buffalo streets, on which he made the first payment, \$70. Mr. Parker labored diligently to build up the Church. In 1849 he was succeeded by Rev. John Collins, of Terre Haute, Ind., who the next year was succeeded by the Rev. Y. W. Johnson, of Pennsylvania. A local historian of this chapel describes Mr. Johnson as a man having a good memory and very strong lungs, and as being well versed in the Prophecies and in Revelations, but as having a weak heart and doing nothing for the Church. The passage and approval (September 18, 1850,) of the Fugitive Slave Bill, caused considerable consternation among the colored citizens of Chicago. Enthusiastic meetings were held, one September 30 and one October 2, at the latter of which resolutions were passed intensely antagonistic to the bill. In one of these resolutions the expressions were employed, "We who have tasted freedom are ready to exclaim with Patrick Henry, 'Give us liberty or give us death;' and 'Resistance to tyrants is obedience to God.' We will stand by our liberty at the expense of our lives, and will not consent to be taken into slavery nor permit our brethren to be taken." A vigilance committee was appointed. The same local historian states further, with respect to Mr. Johnson, that, after the passage of the Fugitive Slave Bill, he went from house to house among the colored people persuading them all to flee to Canada, to prevent the provisions of the bill being enforced upon them. The Journal of November 18, 1850, stated that Mr. Johnson had been reduced to indigent circumstances in consequence of many of his congregation having left for fear of arrest under the law. In April, 1851, Mr. Johnson followed those of his congregation who had fled to Canada, where he organized a Church, and returned to Chicago to collect money for the purpose of building it up; "but he would sign no papers nor do anything toward the second payment on the Quinn Chapel lot." A committee thereupon waited upon Mr. Lunt with reference to future payments on the lot. Mr. Lunt replied: "Give yourselves no uneasiness, you shall not lose the property." Before the debt of \$500 was paid, Mr. Lunt had donated \$300 of the amount. In September, 1852, Rev. John A. Warren was appointed to this Church, and commenced the erection of a building on the lot purchased of Mr. Lunt. The corner-stone was laid April 27, 1853, on which occasion the address was delivered by Rev. James E. Wilson, of the Jefferson-street Methodist Episcopal Church. Rev. Mr. Warren did not prove to be a very satisfactory minister. During his first year he preached but fifteen sermons, and during his second year only twenty, but demanded his full salary, one-third of all he collected for the expense of erecting the church building, and when he delivered anti-slavery lectures "all belonged to John." Money, therefore, flowed but slowly into the coffers of the Church. In August, after expending \$1,500, work temporarily ceased, and at the next Conference Mr. Warren was sent to another field of labor. He was succeeded by Rev. M. M. Clark, under whom the church was completed, at a cost of \$5,000, and dedicated Sunday,

November 20, 1853, by the presiding elder, Rev. William P. Quinn, after whom the chapel was named. Rev. William T. Davis was the next pastor of the Church, and was succeeded in 1855 by Rev. Elisha Weaver, who labored faithfully two years, paid off the debts, bought and paid for a parsonage and moved it on to the church lot. Mr. Weaver, with a few of the trustees, introduced an organ into the church, which "created great confusion in the church until the people got used to it." In 1856 the society had seventy members, and at the time this sketch closes (1857), Rev. Mr. Clark was its pastor.

THE GERMAN EVANGELICAL ASSOCIATION.—The initiatory steps toward the organization in the United States of this Association were taken in 1790, by Rev. Jacob Albright, a Methodist clergyman. Mr. Albright was impelled to special effort among the German residents of eastern Pennsylvania, by observing their general decline of religious life, and their corruption of morals. Without having in view such a design, his labors resulted, ten years later, in the organization of the "Evangelical Association," which name, although unsatisfactory to most of the members, and notwithstanding numerous attempts to change it have been made, is still retained. Its first Conference was held in 1807, and its first General Conference in 1816. In doctrine and theology the Association is Arminian; with reference to sanctification, Wesleyan, and in its modes of worship it conforms very nearly to the Methodist Episcopal Church. A few of the differences between them are as follows: In the Evangelical Association the bishops are elected for four years, instead of for life; the ministers are assigned to their charges by the presiding elders instead of by the bishops, the latter however having a revisory power, and the elders are elected by the Church members, instead of being appointed by the minister. The first members of this Association to come to Chicago were Daniel and Christopher Stanger, in 1835. The former wrote back to Jacob Esher, the father of John G. and J. J. Esher, the latter of whom is the present Bishop of Chicago, describing to him the exceeding fertility of the soil of Illinois, and urging him to emigrate from the mountainous country and rocky soil of eastern Pennsylvania, and come to this fair and fertile region of the West. Mr. Esher, accompanied by a number of other Germans, came to the vicinity of Chicago in 1836. Among them were his brother Martin, Lewis Arnet and a Mr. Suther. In 1837 Jacob Ott and his sons Lawrence, Jacob and Philip came. During this year quite a number had settled in Chicago, and in August, Jacob Boaz, after riding on horseback three hundred miles, arrived in the city, having come as the first minister of the Association to preach to the members already here. The first place of preaching was the City Hall. After Mr. Boaz came Rev. Mr. Einsel, who in a few months went back, in ill health, to Ohio, and sent out Rev. John Lutz. In June, 1838, Rev. Mathias Howard commenced to preach in a wagon-shop on North Kinzie Street, between Dearborn and Clark. Rev. Isaac Hoffert succeeded Mr. Howard and was himself succeeded by the Revs. Daniel Kern and Daniel Stroh. The colleague of the latter was Christian Lintner. In 1843 Germans enough belonging to this Association had collected in Chicago to form a Church; an organization was effected and a lot secured from Hon. Grant Goodrich by donation, at the corner of Wabash Avenue and Monroe Street. This was under Rev. Frederick Wahl, who was sent out as missionary that year, and who was the first regular pastor of the Church. Rev. Mr. Wahl had as colleague Rev. George

A. Blank. A small frame building was erected on their lot, thirty by forty feet in size, at a cost of \$500. The society worshiped in this building until 1852, when it divided into two churches—the First moving their building to Clark Street, near Van Buren, and the Second Church erecting, in 1856, a building at the southeast corner of Wells Street and Chicago Avenue. While the First Church remained on Wabash Avenue its ministers were as follows: Rev. Frederick Wahl in 1843; Rev. C. Augenstein in 1844; Rev. Jacob Kopp in 1845; Rev. C. Augenstein in 1846; Rev. G. A. Blank in 1847; Rev. G. G. Platz in 1848; Rev. Christian Holl until 1850; Rev. Joseph Halacher in 1851, and Rev. J. P. Kramer in 1852, under whom the division occurred. While the Church was located on Clark Street, the ministers were as follows: Rev. Israel Kuter in 1853, and Rev. J. H. Ragatz in 1854. In 1855 this Society erected a church at the corner of Polk Street and Edina Place, in which it worshiped until the fire of 1871. At the time of its removal the pastor was the Rev. L. H. Eiterman, and its history from this point will be continued in the succeeding volumes of this History.

ST. JAMES' EPISCOPAL CHURCH was organized in 1834. The gentlemen taking part in the organization were: William B. Egan, Dr. Phillip Maxwell, Giles Spring, John H. Kinzie, Dr. Clarke, Gurdon S. Hubbard, John L. Wilcox, William Pettit, Eli B. Williams, Jacob Russell and Hans Crocker. The first eight were elected vestrymen. The first communicants were Peter Johnson, Mrs. Peter Johnson, Mrs. Juliette A. Kinzie, Mrs. Francis W. Magill, Mrs. Nancy Hullman and Mrs. Margaret Helm. Rev. Palmer Dyer arrived in Chicago on the 10th of October, 1834, and on or about the 12th, by invitation of Rev. Jeremiah Porter, preached both morning and afternoon in the Presbyterian church. These were the first Episcopal services held in Chicago. In the morning the text was Matthew, xviii, 3: "Except ye be converted, and become as little children, ye shall not enter into the kingdom of heaven." In the afternoon the text was Isaiah, xl, 8: "The grass withereth, the flowers fadeth, but the word of our God shall stand forever." After the afternoon service Mr. Dyer administered the sacrament to four Episcopalians—three lady members of Mr. Kinzie's family and one gentleman—and about twenty-five Presbyterians. Mr. Dyer did not remain in Chicago, but afterward went to Peoria, and thence to Fort Snelling as army Chaplain. On the next Sunday, October 19, Rev. Isaac W. Hallam preached his first sermon in Chicago, in the Baptist church. For some time religious services were held in a building named afterward "Tippecanoe Hall," fitted up for the purpose by John H. Kinzie, on the southeast corner of Kinzie and State streets. In 1836 Mr. Kinzie donated to the Church two lots at the corner of Cass and Illinois streets, and in 1837 the first church building of this society was erected thereon. On the 25th of June of that year the new church was dedicated by Bishop Philander Chase. The style of the building was Gothic, forty-four by sixty-four feet in size, and, though really a very modest structure, was thought to be very imposing for a frontier town. It was the first brick church built in Chicago. The tower contained a bell bearing the name and date of the erection of the church. "There was one feature about the old church which was the especial pride of the congregation; it was a large mahogany pulpit, some eighteen feet wide, six feet deep, and fifteen feet high. Before this pulpit was the reading desk, and still in front of the reading desk the communion table, a plain, honest table and nothing else. All this costly arrangement suited the eye better

than it did the officiating clergyman, and so in the early times of Mr. Clarkson it had to give way to more modern styles and usages." In connection with the reference to this pulpit an anecdote of Dr. William B. Egan is worthy of preservation. The church had been built, as elsewhere mentioned, on lots donated to the St. James' Society by John H. Kinzie, and Mr. Kinzie and his family were otherwise so closely identified with it that it was sometimes called the "Kinzie Church." Above

ST. JAMES' EPISCOPAL CHURCH.

this remarkable pulpit was painted on the wall the initials I. H. S., which seen in the dim religious light which filled the church looked not very much unlike the initials of Mr. Kinzie's name, J. H. K. Soon after the church was completed Mrs. Kinzie invited the genial, witty and somewhat irreverent Dr. Egan to attend her church, and after the conclusion of the services to accompany her home to dinner. On the way to dinner she said, "Well, Doctor, how do you like our church?" "Very much, indeed," he replied; "but is it not a little egotistical, and won't the people think it a little vain in John to put his initials so conspicuously over the pulpit?" The entire cost of the building, furnished with organ, bell, carpet and lamps, was \$15,500. By the sale of the slips and pews there was realized the sum of \$13,860, and by means of fairs something over \$5,600 more, so that after paying for the church there was a surplus of \$4,000, which was used in 1838 for the erection of a parsonage. At the Diocesan Convention of 1838, held at Rushville, Ill., the name of J. W. C. Coffin appears as the first lay representative from this place. On the 3d and 4th of June, 1839, the fifth Diocesan Convention was held in the St. James Church, Chicago. The only lay delegates present were from that Church—Silas W. Sherman, John H. Kinzie and S. J. Sherwood. In 1842 a marble font on a mahogany base was placed in the church by the Sewing Society. The next church building erected by this congregation was a large and handsome stone structure, which was completed in 1857, and first opened for religious services in December of that year. It stood on a lot at the southeast corner of Cass and Huron streets, purchased by the society in 1855. The cost of the

church was \$60,000, exclusive of ground and tower. Rev. Isaac W. Hallam remained pastor until 1843, in August of which year he was succeeded by Rev. W. F. Walker. Mr. Walker remained but a short time, on account of certain practices of his of which the society did not approve. His habits led to certain charges being brought against him and a trial. The trial was conducted in a very able and spirited manner against him by the venerable Bishop Chase; in his defense by the equally noted, if not equally venerable attorney, Justin Butterfield. One of the charges was that of breaking the Sabbath, it being Mr. Walker's habit, when visiting outlying parishes on Sunday, to take his gun with him and to return with his buggy well laden with game. His duties terminated here on Easter Sunday, 1844, and on the first Sunday of May following he was succeeded by Rev. Ezra B. Kellogg, who established Trinity Church that year. Mr. Kellogg remained until 1848 and was succeeded by Rev. Robert H. Clarkson in 1849. Mr. Clarkson remained pastor until 1865, and under his ministrations the parish became one of the strongest Episcopal parishes in the northwest. Under the long rectorship of Rev. Isaac W. Hallam there were baptised one hundred and eighty-eight children and adults; fifty-nine persons were presented for confirmation, and seventy-two marriage ceremonies were solemnized by him. Mr. Hallam had also officiated at forty-eight funerals. The membership of the Church steadily increased during the period which this volume covers. In 1852 it had become one hundred and sixty-seven; in 1853, it was one hundred and seventy-six; in 1854, one hundred and eighty; in 1855, two hundred and twenty-four; in 1856, two hundred and forty-eight, and in 1857, two hundred and sixty. The very large increase in 1855 rendered the church at Cass and Illinois streets too small for the congregation, and a new building was commenced, which was opened for religious services in December, 1857, as stated above. During this latter year the total contributions of this society for home, missionary and other purposes, amounted to \$26,925.70.

REV. ISAAC W. HALLAM was born in Stonington, Conn., November 20, 1809. In 1830 he graduated from the Washington (now Trinity) College, Hartford, and was ordained deacon, in Alexandria, D. C., by the Rt. Rev. Richard E. Moore, May 20, 1832. His first charge was St. James' Parish, New London, Conn., where he was ordained priest December 28, 1833, by Rt. Rev. Thomas C. Bunnell. On the 28th of August, 1834, he was appointed missionary to Chicago, by the Domestic Board of Missions. He arrived in Chicago with his wife and child early in October following. St. James' Parish was soon organized and a Sunday school commenced. He attended the General Convention of the Protestant Episcopal Church in Philadelphia as the first clerical deputy from the Diocese of Illinois. In the winter of 1841-42, Trinity Parish was organized, both parishes to be under one rector, with an assistant when means should be provided for his support. Satisfied that this double duty would be beyond his strength, the Rev. Mr. Hallam resigned his charge and returned to his native town October, 1843, where he commenced the first public services of the Episcopal Church, which resulted in the appointment of a missionary, the organization of a parish and the building of a church. He was subsequently rector of St. Stephen's Church, Lynn, Mass., St. Peter's Church, Clarkboro, N. J., St. John's Church, Windham, Conn., with a mission at Willimantic and St. Mark's, New Canaan, Conn. After nearly fifty years of continuous parochial work, he was obliged, on account of ill health, to retire from the regular ministry and be content with such occasional services as his strength would permit. On the 31st of May, 1883, he was present at the consecration of St. James' Church, Chicago, the third church building erected by that parish. With reference to the Rev. Mr. Hallam's ministry, the Rt. Rev. John Williams, D. D., present (1883) Bishop of Connecticut, writes, "His ministry has always been faithful and successful." Mr. Hallam now resides in Stonington, Conn., his native town. He was married February 18, 1833, to Miss Nancy Hallam, of Richmond, Va. They have had ten children: Lucy Williams, who died in Chicago, November 27, 1839; John Kinzie, Isaac Williams, Giles Russel; Lucy Will-

J. W. Hallam

iams, born in Chicago December 21, 1841; Sarah Miles, Harriet Elizabeth, Annie Courtney, Robert, and Alexander Vinton. Besides Lucy Williams, John Kinzie, Isaac Williams and Alexander Vinton have died. The rest are living.

RT. REV. ROBERT HARPER CLARKSON, at present Bishop of Nebraska and Dakota, was born at Gettysburg, Penn., November 19, 1826. He graduated at Pennsylvania College, in that place, in 1844, and in theology at St. James' College, Maryland, in 1848. Shortly after graduating he was ordained by Bishop Whittingham, of Maryland. In 1849, he became rector of St. James' Church, Chicago, remaining until 1865. On the 15th of November of this year he was consecrated Bishop of Nebraska and Dakota, since which time he has resided in Omaha, Neb. Bishop Clarkson was for some years a trustee of Racine College, Wisconsin, and is now a trustee of Nashotah Theological College, Wisconsin, to which position he was appointed in 1857. In 1866 he established Nebraska College, at Nebraska City, and in 1868, Brownell Hall, in

Robert A. Clarkson

Omaha. In Nebraska and Dakota he has established a large number of churches. In 1856 Racine College conferred upon him the degree of Doctor of Divinity, and in 1872 Nebraska University conferred upon him the degree of Doctor of Laws. Bishop Clarkson was married at Hagerstown, Md., May 8, 1849, to Miss Melora McPherson, of Frederic, Md. They have two children—Mary, wife of the Rev. F. R. Millsfaugh, and Nellie, wife of F. H. Davis.

TRINITY CHURCH.—Toward the close of the year 1841, at a meeting of St. James' Church, it was voted that an Episcopal Church was necessary on the South Side. Some months later, in 1842, a parish was established, including the whole of the South Division of the city, and named Trinity Church. At the first election, held March 5, 1842, the following officers were chosen: Senior warden, J. Brinkerhoff; junior warden, S. J. Sherwood; vestrymen, Cyrenus Beers, Charles Sauter,

Caleb Morgan, Thomas Whitlock and W. H. Brackett. Trinity Church was finally organized about August 1, 1843, by Rev. W. F. Walker, at the time rector of St. James' Church. From this time to Easter (April 7), 1844, Mr. Walker officiated for both St. James' Church, and for Trinity Parish in the evening. The services for Trinity were held from Advent to Easter in a public "Saloon" within the parish. At Easter, having resigned the pastorate of St. James' Church, Mr. Walker became pastor only of Trinity Church. Religious services continued to be conducted in the "Saloon" until August, 1844, when the Church moved into their new house of worship just completed. The building stood on Madison Street, between Clark and LaSalle. The corner-stone had been laid June 5, by Bishop Philander Chase, D.D., and when ready for occupancy the edifice was a neat, tasteful and commodious building. Services were held in this building for the first time August 25, 1844. The original membership is not given, but in 1845 it was eighty-nine. During Mr. Walker's rectorship, which lasted until the fall of 1847, the number was reduced to sixty-one on account of difficulties and dissensions among the members. At the beginning of the winter of 1847-48, Rev. William Barlow succeeded to the rectorship, and remained with the Church until 1850. The period of his ministry was made memorable by the healing of divisions in the Church and the return of peace. In February, 1850, Mr. Barlow died, and was succeeded by Rev. Cornelius E. Swope, from St. James' College, Maryland, who remained with the Church until May, 1851, leaving Trinity, then, with that portion of his congregation who had organized Grace Church. In the diocese which convened this year Trinity Church was represented by J. M. Wilson, Dr. Rutler and W. H. Adams. Rev. Charles Reighley succeeded Rev. C. E. Swope in 1851, and under his ministrations, which terminated in 1853, as also under those of his successor, Rev. William Augustine Smallwood, who remained until 1857, the Church made steady progress and the membership steadily increased, until the panic of the latter year, which had a depressing influence upon religious as well as upon business affairs. In 1852, the membership of the Church was sixty; in 1853, seventy-two; in 1854, one hundred and sixteen; in 1855, one hundred and fifty-two; in 1856, one hundred and eighty-six; but in 1857, under the depressing influence of the financial revulsion of that year, the membership was reduced to one hundred and twenty-one. The convention of the Diocese of Illinois was held in Trinity church in October, 1854, the unpaid balance of the debt upon the property was nearly extinguished, and the salary of the rector, Mr. Smallwood, was increased. Nearly fifty members were added to the Church rolls. By 1856, the debt was entirely extinguished, and the need of a new and larger edifice was sorely felt. In May, 1857, Mr. Smallwood was succeeded by Rev. Noah Hunt Schenck of Gambier, Ohio, who remained until January 1, 1860, when he became rector of Emanuel's Church, Baltimore. Rev. James Pratt, rector of the Church of the Covenant, Philadelphia, was elected successor of Dr. Schenck, and entered upon his duties March 15, 1860. During the pastorate of Mr. Pratt, the proposed new building was completed. A lot on Jackson Street, between Wabash and Michigan avenues, was purchased of Cyrenus Beers, for \$11,000. The corner-stone was laid September 4, 1860, by Rev. Dr. Pratt, and on the 16th of June, 1861, the society assembled in their new church for the first time. The front of the building was toward the north; the dimensions were seventy-one

feet front by one hundred and fifty feet in depth. The front and lower sections of the towers were of Athens stone, and the side and rear walls of brick. Between the towers was a spacious arched arcade; the vestibule was sixteen feet deep, and the auditorium sixty-five feet wide by one hundred and twenty-five in depth. On the main floor were one thousand seats, and in the galleries four hundred. The auditorium was lighted from the roof, there being no side windows. The effect, though solemn, was pleasing, but felt only during the day. The interior was handsomely frescoed and furnished. On the 9th of March, 1863, Dr. Pratt resigned his rectorship, on account of ill health, to take effect June 1. In May, Rev. George D. Cummins was rector. He entered upon his duties Sunday, October 4, 1863, and was instituted April 17, 1864, by Rev. Henry J. Whitehouse, Bishop of the Diocese. On the 1st of October, 1864, the debt of the society was \$17,500. In April, 1868, this entire sum was canceled, and on the 24th of the month, the edifice was consecrated by the Right Rev. Henry J. Whitehouse, assisted by several other clergymen, of this and other cities, among them, Rev. G. D. Cummins, Rev. Noah H. Schenck, Rev. E. M. Van Deusen, of Pittsburgh, Rev. Henry Safford, of Oberlin, and the Rev. Messrs. Cheney, Freeman, Stout and Smith of Chicago. Having briefly traced the history of this Church to the consecration of its elegant temple of worship, its subsequent history is reserved for the third volume of this History.

THE CHURCH OF THE ATONEMENT was organized March 18, 1850, with nineteen members. The first meetings were held in Temperance Hall, at the corner of Randolph and Canal streets. Rev. Dudley Chase was the first rector and remained until 1852. For a portion of the year 1853, Rev. C. H. Gardiner served as supply, commencing April 17. The membership did not increase very rapidly for the first few years. Starting in 1850 with nineteen, in 1852 and 1853 there were forty-six; in 1854, fifty-one; in 1855, seventy; in 1856, eighty-four; and in 1857, eighty-six. The first building occupied as a house of worship was a rented one. It was fitted up by the parish in good taste, was centrally located, and capable of holding two hundred people. In 1851 the society secured a lot at a cost of \$800, the money for the first payment of which was raised by the ladies. Upon this lot a tasteful house of worship was erected in 1854. About \$800 were subscribed during this year by members of the Church and others toward the liquidation of the debt, and a fence was built around the church lot at a cost of \$200. In 1856 the Church contributed to various purposes \$580.08; and in 1857, including the rector's salary of \$1,000, \$1,977.50.

GRACE CHURCH.—At a meeting of a number of members of the Protestant Episcopal Church of Chicago, held May 20, 1851, Grace Church was organized by the election of Henry Ritchie and Jeremiah W. Duncan, wardens, and Talman Wheeler, David S. Lee, J. W. Chickering, Caleb Morgan, H. W. Zimmerman, T. B. Peuton and L. H. Osborne, vestrymen. Rev. Cornelius E. Swope was chosen rector. Services were at first held in Warner's Hall, on Randolph Street. Mr. Swope remained until the spring of 1854, when he was succeeded by Rev. Lewis L. Noble, who commenced his rectorship June 25, 1854, and closed it September 9, 1855. Rev. John W. Clark commenced his rectorship June 8, 1856. Up to 1855 the membership remained at seventy-three. In 1856 it was one hundred; and in 1857 it increased to one hundred and forty. During this year a lot was secured upon which to build. A description of

this edifice is introduced into the second volume of this History, as it was not completed until after the year 1857. During the year with which this volume closes, the total contributions of this Church amounted to \$7,762.71.

ST. JOHN'S CHURCH was nominally organized February 22, 1856, and was fully organized about Easter time. Rev. Hiram N. Bishop was the first minister, preaching his first sermon on the second Sunday of May. The number of members at the time of organization is not ascertainable. Three thousand dollars were subscribed for the erection of a church—one-third of which came from persons not members of any Church. A plain frame building was put up, thirty by sixty-five feet in size, capable of seating three hundred people, without incurring any debt. On the first of September, 1856, the pews were offered for rent and in a short time fifteen were taken, the rental amounting to \$1,529. In 1857 at the time of making the parochial report to the diocese, there were fifty-two members. During the year the church building had been enlarged, and the improvement paid for. Fifty-two new pews were added and the Church was thus made capable of accommodating five hundred persons. A parsonage was erected at a cost of \$1,900, on a lot given to the Church by William Carpenter, and a lot seventy-five by one hundred feet in size, contiguous to the church building was donated and deeded to the Church by Job Carpenter. A Sunday school was organized with one hundred and twenty scholars, about eighty of whom were in attendance each Sunday. The total contributions of this Church for the year 1857 amounted to \$9,901.11.

CHURCH OF THE HOLY COMMUNION was organized in April, 1857, with eighty members, as a free Church. This was the distinguished feature of the organization. The founders believed that churches should be so conducted as to present no obstacle of any kind to any one who might desire to attend church, by selling or leasing pews, or in any other way; that nothing should be done to keep the poor man from church. Rev. H. B. Whipple was called to the rectorship, and services were held in a hall rented for the purpose, no church building being erected that year. Like many others, this Church had to encounter and overcome numerous obstacles at the beginning, the chief of which was the want of a suitable house of worship, but this was in after years supplied.

CHURCH OF THE ASCENSION.—Upon an invitation extended to him in April, 1857, Rev. J. W. Cracraft came to Chicago, in May, for the purpose of organizing a parish on the North Side. He preached his initiatory sermon on the first Sunday in May. As the new edifice of St. James' Church was approaching completion, that Church made an advantageous offer of their old church building, standing on Cass Street, near Illinois, to the Church of the Ascension. This society therefore decided that no funds should be expended in erecting a temporary church, but that all their financial strength should be reserved for the purpose of removing the Old St. James' Church, when that should be vacated in the fall. Gurdon S. Hubbard gave the new organization three lots, two to be used as a church site, the other to be used toward the erection of a suitable edifice. Subsequently, the proffer of St. James' Church, with reference to their old building was withdrawn, which, on account of the lateness of the season at the time of the withdrawal of the offer, coupled with the adverse influence of the financial revolution which that year depressed all business enterprises, made it impracticable for the new Church to erect a permanent house

of worship that year, and its only recourse was to seek some temporary accommodations for the then present emergency, by renting some building or erecting a cheap one on their own account. In September a parish organization was effected, taking the name of "The Church of the Ascension," but on account of the absence of the warden and secretary the proper certificate could not be obtained at the time of the meeting of the convention of the Diocese, so the Church could not be represented therein. About forty families had joined the Church by the fall of this year, and through the liberality of the trustees of Westminster Chapel, they were accommodated with a convenient and comfortable building for their incipient services.

ST. ANSGARIUS' CHURCH was organized March 5, 1849. The first trustees were P. Von Schneider, W. Knudsen, Bitten Markusen, Andrew Johnson, Andrew Lurson, J. Bjorkman, A. S. Sheldon and John Anderson. The members of the Church were emigrants from Norway and Sweden, about two-thirds from Norway. They were collected into a society by the Rev. Gustaf Unonius. The membership at the time of organization is not ascertainable, but in 1850 there were one hundred and sixty-three members, including men, women and children. During this year a building was erected at the corner of Franklin and Indiana streets. It was a frame structure, thirty-five by fifty feet in size, and cost \$2,500. In 1856 a fine organ was added at a cost of \$700. In 1851 this Church was represented in the Diocese of Illinois by John W. Chickering and P. Von Schneider. The membership reached one hundred and ninety-five in 1854, decreased to one hundred and seventeen in 1855, and in 1857 had increased to one hundred and forty-two. Mr. Unonius remained pastor until 1866, when he resigned and returned to Sweden, where he now resides. In the year 1851, when the society was weak financially and struggling to complete its house of worship erected the year before, Jenny Lind, at the solicitation of the pastor, presented to them \$1,000 in money and a silver communion set. Toward the close of the year 1851, the question arose as to who should own the communion set, in case of a separation of the Church into two portions, the one of Swedes the other of Norwegians. The Norwegian members claimed an equal ownership in the set with the Swedes and that, in case of a division, they should have paid to them half the value of the set. Mr. Unonius claimed that the set was presented to the Church of St. Ansgarius on the condition that in case of a separation it should belong exclusively to the Swedish portion, and in this position he was sustained by the Swedish members. In order to sustain this position, Mr. Unonius presented the following letter written by Jenny Lind:

"GUSTAF UNONIUS,

"Dear Sir: Whereas my attention has been called to the ninth section of the article of the congregations in Chicago constitution, I do hereby declare that the cup and paten which I last year donated to the Swedish and Norwegian Church congregation in Chicago, in the event of a dissolution of the said congregation, shall never be included in the value of said congregation's common property, but shall in such case belong exclusively to the Swedish portion of the congregation.

"Northampton, Mass., the 28th day of March, 1852."

Jenny Goldschmidt
Jenny Lind

Mr. Unonius made affidavit to the fact as follows:

"STATE OF ILLINOIS. }
COOK COUNTY. }

"Gustaf Unonius being duly sworn according to law says, that Mrs. Jenny Lind Goldschmidt, in presenting a silver communion set to the Church of St. Ansgarius in Chicago did so with the explicit stipulation that it should become the exclusive property of a Swedish congregation.

"April 22, 1858."

G. Unonius

Max Hjortsberg, the private secretary of Madam Goldschmidt, also made affidavit to the same effect. The result of the controversy was that the Swedish portion of the congregation retained the set. In after years the Church was divided on the line of nationality, as was anticipated. An account of the division, and a sketch of each separate portion of the Church will follow in the next volume.

BISHOP PHILANDER CHASE, D.D.—The Diocese of Illinois was organized at Peoria, March 9, 1835, at the primary convention held there for the purpose. This convention was composed of three clergymen and six lay delegates. The clericals were Rev. John Batchelder, rector of Trinity Church, Jacksonville; Rev. Palmer Dyer, rector of St. Jude's Church, Peoria, and Rev. James C. Richmond, rector of Christ Church, Rushville, and Grace Church, Beardstown. The lay delegates were Rudolphus Rouse, Augustus O. Garrett, Edward Worthington, Milton W. Graves, James Fayerweather and Charles Derrickson. Rev. Isaac W. Hallam, rector of St. James' Church, Chicago, was not present at this convention. Rev. John Batchelder was elected president, and Rev. Palmer Dyer, secretary. Committees were appointed to frame a constitution, canons and rules of order. A standing committee was elected, and also delegates to the next general convention of the Protestant Episcopal Church of the United States, which met in Philadelphia, August 19, 1835. At the time of the organization of the Diocese of Illinois, there were but six organized Episcopal parishes in the State, only three of which were at the convention, the parishes at Galena and Chicago not being represented. In the evening of that day the following resolution was adopted: "Resolved, unanimously, that this convention do hereby appoint the Right Reverend Philander Chase, D.D., a bishop of the Protestant Episcopal Church in the United States of America, to the Episcopate of Illinois, and that he be, and hereby is, invited to remove into this diocese, and to assume Episcopal jurisdiction in the same." Bishop Chase accepted the appointment April 3, 1835, but was not present at the second annual convention, which met at Jacksonville, Monday, May 16, 1836, being absent in Great Britain at the time, soliciting assistance toward the establishment of a theological school in his new diocese. Rev. Isaac W. Hallam who had been appointed to preach to the convention, was also absent, but he arrived after the adjournment of the convention. At the third annual convention, Bishop Chase was present, presided, and delivered his first address, at Springfield. The Bishop made his first Episcopal visitation to Chicago in 1835, and his second in 1836, during the erection of St. James' Episcopal Church, preached twice, confirmed eleven persons, baptized one child and administered the sacrament of the Lord's supper to thirty persons. On the 18th of July he met with an accident which interfered with his duties as bishop for some time. This was the breaking of two ribs by the overturning of his carriage when on his way from Rockingham, Ill., to his home in Peoria County. He made his first appearance after this accident at Rushville, October 3, 1837. The fourth annual convention was held at Rushville, June 4, 1838, Bishop Chase presiding. He also presided at the fifth annual convention, which was held in Chicago, June 3 and 4, 1839. No convention was held in 1840. The sixth annual convention was held in the chapel of Jubilee College, June 7 and 8, 1841, Bishop Chase presiding. The next annual convention held in Chicago was in 1850, on the 17th and 18th of June. Bishop Chase presided here, as at all those not specifically mentioned above. At this time there were four Episcopal churches in Chicago. The Church of the Atonement was a newly-formed congregation, the first on the West Side. Bishop Chase preached to this congregation on Sunday,

June 9, in the morning, and in the afternoon at Trinity Church. On the same day he met the congregation of St. Ansgarius, in St. James' Church, Rev. Gustaf Unonius pastor, whose church edifice was not then completed. On the 14th of June the Bishop confirmed twenty-four persons in St. James' Church. At the regular annual convention held at Pekin, September 8, of that year, Bishop Chase presided. This was the last convention at which he presided. At the annual convention held at Pekin, June 21, 1852, in the absence of Bishop Chase, the Right Reverend Henry J. Whitehouse, assistant bishop of the diocese, presided. Bishop Chase died on Monday, September 20, 1852, at his residence at Jubilee College, in Peoria County, an institution which he had founded. He was succeeded as bishop by Rev. Henry J. Whitehouse, an account of whose Episcopate and residence in Chicago will be appropriately found in the second volume of this History. Bishop Chase filled the Episcopate of Illinois for seventeen years. The summary of his acts is as follows: He ordained to the priesthood, seven; to the diaconate, twelve; to both, three; total, thirteen persons. He consecrated sixteen churches, baptized two hundred and ninety infants and sixteen adults, and confirmed nine hundred and fifteen individuals. In 1835, when he was elected bishop of the diocese, it consisted of five organized parishes; in 1852, when he died, it contained fifty-two parishes, forty-three of which contained sixteen hundred and two communicants. Five of these parishes were in Chicago.

FIRST CONGREGATIONAL CHURCH was organized May 22, 1851. Its first church building was on Washington Street, between Halsted and Union, Philo Carpenter, who had always taken leading positions in religious movements, having in 1832 organized the first Sunday school in Chicago, and having assisted in organizing the First and Third Presbyterian churches, was one of the principal movers in this measure, which was the result of a schism in the Third Presbyterian Church, the particulars of which are fully developed in the sketch of that Church's history. By reference thereto the successive steps may be traced which led to the extending by the Presbytery of the names of those who persisted in their "disorderly and disorganizing action." Technically there were but seventeen excinded, fifteen of whom joined the First Congregational Church when that was organized. Twenty-five others who subscribed to the obnoxious fourth resolution of February 3, 1851, were regularly dismissed, their action in signing the resolution not having been done openly in Church meeting, and for this reason did not come before the Presbytery in an official manner. For about one year after their exclusion from the Church, these forty-two ex-members held regular religious services in the lecture-room of the church lean-to, which had been erected principally at the private expense of Philo Carpenter, and which, according to agreement made at the time of its erection, not having been paid for at the time of the culmination of the schism, remained his private property and subject to his control. At a meeting held about the middle of April, it was decided to proceed to the organization of a Church to be called the "First Congregational Church of Chicago," and a committee was appointed to draft a constitution and articles of faith. On the 5th of May, steps were taken toward the purchase of a lot at the corner of Washington and Jefferson streets, and May 22 was fixed upon as the date for the organization of the new society. An Ecclesiastical Council, pursuant to a call, convened for the purpose in the Canal-street Methodist Episcopal church, on that day. This Council was composed of the following representatives from the several Congregational churches named below:

Churches.	Pastors.	Delegates.
Milburn.....	Rev. William B. Dodge...	
Waukegan.....	Rev. B. F. Parsons,	L. Fundy.
Elgin ..	Rev. N. E. Clark.....	H. Brooks.
Downer's Grove.....	Rev. Alanson Alvord	L. H. Hatch.
Newark.....	Rev. Lucian Farnham ..	
Aurora.....	Rev. Daniel H. Miller...	W. J. Strong.
St. Charles.....	Rev. George S. F. Savage.	Alonzo Harvey.

Rev. William B. Dodge was chosen moderator, Rev. B. F. Parsons, scribe, and Rev. Timothy Lyman, from the Denmark Association, Iowa, was invited to a seat as member of the Council. The articles of faith and covenant, the credentials of those having letters, and the Christian character of those who had not, all proving satisfactory to the Council, it proceeded to the exercise of organizing the Church. Forty-eight assented to the articles of faith, and entered into covenant, thus constituting the First Congregational Church. Public religious services were held in the evening, at which a hymn was sung, composed for the occasion by B. F. Worrell. Of this hymn the first quatrain of the second stanza was as follows:

' Though by men we are rejected—
Set beyond the church on earth,
Should we mourn or be rejected
If we be of heavenly birth?'

Of the forty-eight first members the following fifteen were received without letter: Philo Carpenter, William H. Worrell, Mrs. Mary E. Morris, Mrs. Ann T. Carpenter, John Davis, Miss Lydia Clifford, Trumbull Kent, D. E. Davis, H. B. Mills, John Sheriffs, Mrs. M. E. Davis, Walter Lull, Benjamin F. Worrell, J. H. Morris, Henry G. McArthur. The following thirty-three were received by letter: George B. Sloat, Amos Holbrook, Mrs. Isabella Warrington, Mrs. M. Mack, Elisha Clark, Mrs. Cornelia A. Clark, Hannah Bragg, Mrs. Harriet Bristol, Samuel Aiken, Mrs. S. Aiken, Cornelia G. Sloat, Mrs. Sophronia Crawford, Mrs. Jane Mason, Mrs. Ellen Holbrook, Leverett H. Holbrook, Mrs. Susan A. Holbrook, Mrs. Sophia Holbrook, Mrs. Elizabeth Ready, Mrs. Emeline Kent, Mrs. Elvira P. Belden, Mrs. Esther E. Gaffrey, Mrs. Mary Andrews, William Rawson, Mrs. S. Rawson, Mrs. M. T. Worrell, Mrs. E. Croner, Mrs. Julia A. Ensworth, Mrs. Sarah Lull, Abbey S. Dyer, Caroline Mason, Joseph F. Lawrence, Mrs. Susan Lawrence, Caroline Mills. During the month of July, 1851, eleven additional members were received, in November six, and in December six, so that on January 1, 1852, the Church had a membership of seventy-one. The first deacons were Philo Carpenter and Elisha Clark, elected June 4, 1851. For one year from this time the Church had no settled pastor, but depended upon occasional supplies. Among these appear the names of Revs. Jonathan Blanchard, Julian M. Sturtevant, J. E. Roy, Epaphras Goodman, Owen Lovejoy and J. M. Davis. To the latter gentleman the Church extended a call October 13, 1851, naming \$800 as the salary. In December the call was declined, when a unanimous but ineffectual call was extended to Rev. Owen Lovejoy. On June 1, 1852, an invitation was extended to Rev. J. M. Williams to become pastor for six months. The invitation was accepted and he remained until December 1, 1853, when he resigned. On the 2d of January, 1854, Rev. W. A. Nichols was invited to supply the pulpit for six months. At the close of this period Rev. G. W. Perkins was invited to become pastor at a salary of \$1,500. He preached his first sermon on the third Sunday of September, and was regularly installed January 4, 1853. Mr. Perkins died suddenly November 13, 1856, and was succeeded by Rev. W. W. Patton, who was installed January 8, 1857. Dr. Patton remained with the Church eleven years. An account of his ministry may be found in the second volume of this History. While negotiations were pending for the lot on the corner of Washington and Jefferson streets, a plain and inexpensive building was erected on Washington Street, near Union, in 1852. Within a year from the time of its completion it was destroyed by fire, in

June, 1853. The proffer of the use of two houses of worship was promptly made to the afflicted Church—that of the Third Presbyterian and of the Tabernacle Baptist Church. The latter was chosen. Steps were taken toward the erection of a stone edifice at the southwest corner of West Washington and South Green streets, on a lot one hundred feet square, which Philo Carpenter granted to the Church in exchange for the lot at the corner of Washington and Jefferson streets, on which they originally intended to build. Meanwhile a temporary frame structure was erected on Green Street, just south of the location for the new edifice, and services were held therein until the stone church was ready for occupancy, which was completed and dedicated some time in October, 1855. Compared with the previous church edifices it was an elegant building. The total cost was \$40,000. It was built of Illinois marble. The entrance led to a vestibule, from which two flights of stairs ascended to the main audience-room. The portion under the auditorium was admirably arranged for the various spiritual and temporal offices of the Church. It contained the Sunday school rooms, lecture room, church parlor, pastor's study, and offices. A very fine organ was erected in the church, and the Church had an excellent and accomplished choir. From a membership of seventy, on January 1, 1852, the increase was quite slow for three years. In 1852 there were nineteen additions; in 1853, forty-four; and in 1854, fourteen; while for the next three years the growth of the Church was much greater and more satisfactory. In 1855 there were thirty-six additions; in 1856, eighty-four, and in 1857, eighty-six.

PHILO CARPENTER was born February 27, 1805, in Savoy, Mass. He is a direct descendant of William Carpenter, who, in 1635, came from Southampton, England, and settled in Weymouth, Mass. Both of Mr. Carpenter's grandfathers served in the Revolutionary War. His paternal grandfather, Nathaniel Carpenter, was a Captain under George III., but at the beginning of the struggle he resigned his commission, raised a company for the Colonial army and fought in many a battle during the war, and at its close was in command at West Point. Abel Carpenter, the son of Nathaniel, was the father of the subject of this sketch. Young Philo's education was for the most part obtained at the common schools, but improved at the Academy of South Adams, Mass. In 1828 Mr. Carpenter went to Troy, N. Y., where he became a clerk in the drug store of Dr. Amatus Robbins, and also became a partner with Dr. Robbins and a medical student. Through the representations of a friend he decided to emigrate to the West. Packing his drugs, he started for Buffalo, embarking there for Detroit. From Detroit he came to Chicago, by way of Niles, Mich., down the St. Joseph River to its mouth, and thence to Chicago in a canoe towed round the head of the lake by two Indians hired for that purpose, accompanied by a friend from Niles. They landed in July near the present site of the Douglas monument, and were conveyed to Fort Dearborn by Joel Ellis, whom they found living in a log cabin near the place of their landing. While waiting for his goods to arrive in Chicago, Mr. Carpenter secured a log building sixteen by twenty feet in size, on Lake Street near the river, in which he opened the first drug store in Chicago. In the early winter he moved into a larger building which had just been vacated by George W. Dole. In the summer of 1833 he purchased a lot on South Water Street, between LaSalle and Wells streets, upon which he erected a small store. To his stock of drugs he now added general merchandise and hardware. In this store he remained until 1842, when he removed to Lake Street, where he remained about two years, when he disposed of his mercantile business to Drs. Brinkerhoof and Penton. Mr. Carpenter previous to this time invested his spare funds in real estate, and was very judicious in this line of investment. He was careful not to purchase beyond his ability to pay. His two lots of forty feet front on South Water Street cost him \$75.00, and the lot on LaSalle Street, twenty-five feet by one hundred and eighty feet, bought of Mark Beaubien, cost him \$25.00. Billy Caldwell, the half-breed, owned two and a half sections of timber land up the North Branch of the river, about nine miles from the city. Mr. Carpenter, Colonel R. J. Hamilton, Captain Seth Johnson and Lieutenant Kingsbury each bought a quarter-section of this land for \$1.25 per acre. He also entered from the Government, at the same price, the one hundred and sixty acres of land

since known as "Carpenter's Addition to Chicago," for which he was laughed at at the time as having located a farm so far away from the city, and one which seemingly never could be plowed except with an anchor. This addition is bounded by Madison, Halsted and Kinzie streets, and by a line running from Kinzie to Madison Street, midway between Ann and Elizabeth. Contrary to Mr. Carpenter's expectations at the time of its purchase, he has lived to see it covered with buildings and to pay in taxes annually on one lot more than twice as much as the whole quarter section cost. But if always sagacious in real estate investments, he made a mistake in endorsing for some friends. These friends failed to pay their creditors at the maturity of the debt, and Mr. Carpenter borrowed money with which to pay some of them. When the crisis of 1837 came this debt became due, and as it was not possible to sell real estate or borrow money, Mr. Carpenter in response to the demands of his creditors spread before a committee selected for the purpose, consisting of William H. Brown, and B. W. Raymond, his entire list of property from which they were to select sufficient to satisfy the debt, \$8,600. The committee selected nine hundred and sixty acres of land in Fayette County, four and a half blocks in Carpenter's Addition to Chicago, a house and lot on LaSalle Street, near Washington, his homestead, and a half block in the school section. It was then generally conceded that the property chosen was worth more than twice the debt. As illustrating the soundness of Mr. Carpenter's judgment with reference to the future value of Chicago real estate, his opposition to the proposed sale in 1832 of the entire school section, bounded by State, Madison, Halsted and Twelfth streets, may be mentioned. One hundred and thirty-eight blocks were sold for \$38,065. The four blocks that were not sold, bounded by Madison, State, Monroe and Dearborn streets, are now (1883) worth over \$2,000,000. Mr. Carpenter retired from the Board of Education in 1865, and as a recognition of his services, one of Chicago's elegant school-houses was named the "Carpenter School." He has always been an advocate of education, temperance, religion and universal liberty. In 1832, he wrote and circulated the first total abstinence pledge in Chicago and so far is known delivered in the log building of the Rev. Jesse Walker, the first temperance address in the city, and on the 19th of August of the same year assisted at the organization of the first Sunday school in the city. He was one of the first members of the First Presbyterian Church of Chicago, and also one of its first elders. His work as a member of the Third Presbyterian Church and as one of the organizers of the First Congregational Church, is detailed in connection with each. What he did for the Chicago Theological Seminary is referred to in its history. He was one of the organizers and since has been one of the most liberal supporters of the National Christian Association, organized in opposition to secret societies, a sketch of which is inserted elsewhere in this History. Mr. Carpenter was married first to Sarah F. Bridges, of Berkshire County, Mass., May 10, 1830, who died in the following November. He was married to Miss Ann Thompson, of Saratoga County, N. Y., April 23, 1834. She died in 1866. They had seven children, three of whom died in infancy. His youngest son died suddenly of heart disease September 8, 1869. Two daughters are now living, Mrs. W. W. Cheney, and Mrs. Rev. Edward Hildreth. His third daughter, Mrs. Millie C. Strong died December 31, 1880.

PLYMOUTH CONGREGATIONAL CHURCH.—During the year 1852, informal consultations were held by members of the First Presbyterian Church with reference to separating from that Church and forming a new one on the Congregational plan. In the early days of Chicago, Congregationalists arriving in the city, finding no Church of that denomination here, very generally united with Presbyterian churches, but as they increased in numbers they naturally became more desirous of founding churches similar to those of which they had been members in their former homes. The first regular meeting for the purpose of consultation upon the propriety of organizing Plymouth Church was held October 7, 1852, at the house of Joseph Johnston. At this meeting a committee was appointed whose duty it became to secure a site upon which to erect a house of worship. At a meeting held October 27, also at the house of Mr. Johnston, a committee was appointed to solicit and collect funds and to superintend the erection of the church building upon the site selected by the former committee; and another committee was appointed to prepare a plan of organization. At subsequent meetings the articles of faith, rules of the Church, etc.,

presented by the proper committee were adopted, and an Ecclesiastical Council convened December 1, 1852, for the purpose of creating the Church, which was organized on that day and called the "Plymouth Congregational Church of Chicago." The Ecclesiastical Council was composed of representatives from twenty-five churches. It was organized by the election of Rev. J. Gridley, moderator, and Revs. H. D. Kitchel and L. Benedict, scribes. A statement of reasons was made to the Council for the proposed organization of the Church, the main reasons being:

First. The conviction that the growth of the city warranted the establishment of another Church, professing the same fundamental doctrines of faith and practice with that from which the separation was made.

Second. A desire to be united under a Church Polity which would secure to the majority the right to carry their own acts of discipline and benevolence, and that would be free from all ecclesiastical connection with the sin of slavery.

These reasons were declared satisfactory by a unanimous vote of the Council, the articles of faith, covenant and rules and declarations of the Church were all approved, and the Council proceeded to the organization of the Church. The following order of exercises was observed:

Reading of the Scriptures, by Rev. G. S. F. Savage; introductory prayer, by Rev. L. Farnham; sermon, by Rev. Flavel Bascom; reading minutes of council, by the scribe; reading articles of faith, etc., by moderator; consecrating prayer, by Rev. W. B. Dodge; fellowship of the churches, by Rev. L. S. Hobart; benediction, by the acting pastor, Rev. J. M. Davis. The original members were as follows, forty-eight in number: Franklin V. Pitney, Mrs. Franklin V. Pitney, Joseph Johnston, J. R. Shedd, Mrs. J. R. Shedd, Mrs. Clara M. Waldo, Orlando Davidson, Mrs. Orlando Davidson, William H. Taylor, F. T. Seeley, Silas R. Ball, Mrs. Silas R. Ball, Miss Amelia Ball, Zebina Eastman, Mrs. Zebina Eastman, Archibald Ridell, Mrs. Lucy Ridell, John H. Butler, Mrs. John H. Butler, Thomas C. Whitmarsh, Mrs. William H. Taylor, Horatio Hitchcock, Mrs. Louisa S. Hitchcock, Mrs. Emeline C. Fulton, Mrs. Anna E. Edwards, Mrs. E. C. Husted, E. C. Stowell, Benjamin Carpenter, Mrs. Benjamin Carpenter, William P. Caton, Mrs. William P. Caton, Deliver Walker, Mrs. Deliver Walker, Miss Abby Walker, Mrs. Juliette F. Whitmarsh, Mrs. S. J. Stickney, Spencer Warner, Mrs. Spencer Warner, Nathaniel S. Cushing, Mrs. Melissa W. Cushing, Mrs. Haven, Carlos Haven, Mrs. Julia Haven, Mrs. Cornelia M. Temple, George W. Richards, Mrs. Laura Richards, Mrs. Isabella Davis, A. S. Wilcox. The first forty-one of these were from the First Presbyterian Church of Chicago; the next three from the Galesburg Presbyterian Church; the next two from the Congregational Church at Harmar; Mrs. Isabella Davis from the Congregational Church, at Woonsocket, R. I., and A. S. Wilcox, from the Methodist Church, at Chicago. Religious services were held for a few weeks in Warner's Hall, on Randolph Street, until the completion of the church building in January. This stood on the southwest corner of Madison and Dearborn streets, and was dedicated on the last Sunday in January, 1853. It was a frame structure, thirty by fifty feet in size, and cost \$2,500. In the fall of 1855, it was moved to the corner of Third Avenue and Van Buren Street, and in it there the Church continued to worship until the fall of 1864, when it was sold. Rev. J. M. Davis remained pastor until July, 1853, and was succeeded by Rev. Nathaniel H. Eggleston, who was called November 9, 1853, installed March 12, 1854, and resigned July 25, 1855. Rev. Joseph E. Roy, formerly pastor of the Con-

gregational Church at Brimfield, Illinois, was called August 15, 1855, commenced his ministerial labors on the first Sunday in November, was installed July 1, 1856, and resigned July 1, 1860. Mr. Roy's resignation was occasioned by his having received on June 18, 1860, the appointment of District Secretary for the Northwest of the American Missionary Association, which appointment he desired to accept. The membership of this Church increased somewhat irregularly for the first few years. In 1853, there were added forty members; in 1854, ten; in 1855, twenty-one; in 1856, sixty-one; and in 1857, thirty-seven.

SOUTH CONGREGATIONAL CHURCH.—During the years 1853 and 1854, a corporation known as the "American Car Company," carried on an extensive manufactory of railroad cars in Chicago. Their establishment was located on the lake shore at the foot of Rio Grande Street, now Twenty-sixth. The section of the city in the vicinity of their works, soon after they went into operation, became quite thickly settled by families connected therewith; the settlement became quite a village and received the name of Carville. A few New England men connected with the company, assisted by the residents of Carville, applied themselves to the work of forming a new Church, and the erection of a church edifice. Prominent among the movers in this enterprise were the president of the American Car Company, Timothy Dwight, and the superintendent, J. H. Lyman. Deacon Joseph Johnston, of the Plymouth Congregational Church, donated \$300 toward the enterprise, and several other leading Chicago Congregationalists ably seconded the movement. The proprietors of the Car Company donated a lot on the northeast corner of Calumet Avenue and Rio Grande Street, and during the summer of 1853, a house of worship was erected thereon. While this was being erected, religious services were regularly held in a school-house standing near the intersection of Calumet and Cottage Grove avenues, under the ministrations of Rev. E. F. Dickinson, whose labors with his people commenced early in March, 1853, and were continued until the fall of 1854. During his pastorate the new house of worship was completed and dedicated and the Church organization fully effected. The dedication occurred August 21, 1853. The following extract relating thereto is copied from the Chicago Daily Tribune, of August 24:

"The new house of worship erected near the American Car Company's works in this city, for the use of a Congregational Church and society, was dedicated to the service of God on Sunday afternoon at 3 o'clock. Rev. E. F. Dickinson conducted the introductory exercises. The sermon was preached by Rev. J. C. Holbrook, from the rooth Psalm. Subject: 'The Benefit to Society of Public Worship.' Dedicatory prayer by Rev. J. M. Williams. This is a very neat edifice, built upon the general model of the Plymouth church in this city: the dimensions are thirty-six by sixty feet and it contains sixty slips besides those for the use of the choir. The whole expense including furnishing will be about \$2,500, besides the donation of the lot; Mr. Lyman, the superintendent of the works, also generously donated a melodeon. The seats are to be free. There is also adjoining on the same lot, a small building designed for a school-house and conference room. Rev. E. F. Dickinson will preach there regularly at 10 o'clock every Sabbath morning for the present. A good audience was in attendance on the occasion of the dedication. This is the third Congregational church edifice that has been opened in this city within the last six months, and there is another on the North Side, which will be completed next month. The First Congregational Church on the West Side are also preparing to build a fine house, at an expense of about \$15,000."

The next event of importance was the organization of the Church. This was effected November 20, 1853, in the evening of which day (Sunday), a Council convened at the church and proceeded to formally recognize the Church, which at that time consisted of fourteen

members, and which increased to nineteen members at the first communion, as follows: Rev. Edmund F. Dickinson, Mrs. Harriet N. Dickinson, H. E. Dickinson, Mrs. Julia A. Dickinson, Jesse R. Langdon, Mrs. Artemisia Langdon, Mrs. Candace L. Langdon, Caleb F. Gates, Mrs. Mary E. Gates, Mrs. Mabel K. Gates, Charles Gates, Mrs. Laura Clapp, Joseph Harper, Mrs. Jane Harper, Mrs. Mary Putney, Samuel Truax, Mrs. Agnes M. Ballentine, Mrs. Harriet Chamberlain, Miss Mary Jane Haynes. After the retirement of Mr. Dickinson, a call was extended in October to Rev. Edwin E. Wells, of Bloomingdale, Ill., to occupy the field as a stated supply, and during the same month he commenced his ministry. He proved to be a zealous and acceptable pastor, and during the brief period of his pastorate, a new interest was awakened in spiritual matters, and the congregation was largely increased. But his strength was not equal to the task, his health was impaired, and he died July 18, 1855. Days of affliction and adversity now came upon the Church. In addition to a death of a faithful and beloved pastor, the society suffered from financial embarrassment. The American Car Company failed, and in consequence was unable to redeem its generous promises and pledges of support to the Church. This unexpected calamity occurring while their debts remained uncanceled, threatened the destruction of the society. But although discouraged, they did not despair, nor cease their efforts to cancel their obligations, and thus relieve themselves of their burdens. In October, 1855, Rev. Cornelius S. Cady was called to the pastorate. He accepted the invitation and remained with the Church until October, 1856, when he resigned. During the period of his engagement, a series of special religious meetings was held by Rev. J. T. Avery, of Cleveland, Ohio, an evangelist, and a number of hopeful conversions was made. For some months after the retirement of Mr. Cady, occasional preaching was had in the church by Rev. H. L. Hammond and Rev. E. Goodman, of Chicago. At length an invitation was extended to Rev. William T. Bartle, of Kewanee, Ill., to occupy the pulpit, and he commenced his ministry June 21, 1857. Mr. Bartle resigned his pastorate April 24, 1859, having thus been with the Church nearly two years. These were also years of sore trial to the Church, especially on account of the financial crisis of 1857; but as the period covered by them, and its results to this devoted band of Christians is mostly within the space of time embraced in the second volume of this History, a detailed account thereof is deferred to that volume. At the close of the year 1854 the membership of the Church was twenty-one; in 1855, there were six additions, in 1856, nine, and in 1857, ten.

THE NEW ENGLAND CHURCH.—The New England Congregational Church was organized June 15, 1853, by a council of churches called for that purpose. Its membership at the time of the organization was twenty-one. The origin of the movement which resulted in the organization of this Church was as follows: The *Prairie Herald*, a religious newspaper published in Chicago, was offered for sale in 1852. The dedication of Plymouth Congregational Church was to occur in January, 1853, and among others there were present in Chicago to assist in the dedication, Rev. L. S. Hobert, of Michigan and Rev. John C. Holbrook, of Dubuque, Iowa. It occurred to these gentlemen to open negotiations for the purchase of the paper, hoping to make it the Congregational organ for the Northwest. At a meeting held to consider the question of purchasing the paper, it was discovered that if the purchase were made

an editor must be secured at once. Rev. Mr. Holbrook consented to accept the editorship, provided a place could be found where he could at the same time prosecute his ministry. A preliminary enterprise was therefore started on the North Side, with a view to an ultimate Church organization, the enterprise being at first supported mainly by the members of the Plymouth Church. Services were held each Sunday afternoon at the North Market Hall, and prayer-meetings were held during the week at private houses. In the winter of 1852-53 it was deemed advisable to take steps toward the erection of a suitable house of worship. A piece of land was purchased in the name of Benjamin Carpenter at the corner of Indiana and Wolcott (now State) streets, and the necessary amount of money subscribed to make the first payment thereon and for the erection of a church building. About May 1, 1853, a committee was appointed to draft articles of faith, covenant, and rules for the government of the Church, and also a committee to call a council for the purpose of organizing a Church. The former committee consisted of Rev. John C. Holbrook, Charles G. Hammond, George C. Whitney and Lewis Broad. The second committee was composed of Rev. J. C. Holbrook, George C. Whitney and L. D. Olmsted. On the 15th of June the Council called by the second committee convened and organized the Church, with the following twenty-one members: Rev. John C. Holbrook, Mrs. Ann Louisa Holbrook, Benjamin Carpenter, Mrs. Abigail H. Carpenter, Abraham Clark, Mrs. Melicent Clark, Miss Jane Clark, James N. Davidson, Mrs. Lucy Davidson, Miss Elizabeth Davidson, Orlando Davidson, Mrs. Caroline Davidson, George C. Whitney, Miss Sarah Whitney, Miss Rachel Cole, Lucius D. Olmsted, Mrs. Jesse Olmsted, Charles G. Hammond and Mrs. C. B. Hammond. On July 6, Charles G. Hammond and George C. Whitney were elected deacons, and Orlando Davidson was elected clerk. On the 9th of October, the name, "The New England Church," was adopted. Rev. John C. Holbrook remained with the Church as stated supply until January 1, 1856. He declined a call to settle as pastor, and soon afterward left the city. For a considerable time thereafter the pulpit was occupied by different clergymen, Rev. Charles P. Bush, a Presbyterian, remaining nine months. At length Rev. Samuel C. Bartlett, of Manchester, N. H., after having declined the first call, accepted the second and was installed as pastor April 15, 1857. Rev. Mr. Bartlett remained two years when he resigned in order to devote himself to the duties of the Professorship of Biblical Literature in the Chicago Theological Seminary, to which office he had recently been appointed. The first church building erected at the corner of Indiana and State streets, was a frame structure forty by fifty-five feet in size, capable of seating five hundred people, and cost \$2,000. The next building was erected in 1865, a description of which will be found in the second volume of this History. The membership of this Church at the time of organization, June 15, 1853, was twenty-one; November 6, eleven were added, three on profession, eight by letter; on December 20, three were added, one on profession, two by letter. In 1854 the additions to the membership were five, in 1855, fourteen, 1856, fourteen; and in 1857 twenty-one. The total number received previous to January 1, 1858, was eighty-nine; the membership had been diminished in number twenty-three, seven by death, fifteen by dismission, mostly to join other churches, and one by excommunication, leaving the membership at the close of the first period of this History, sixty-six.

THE FIRST UNIVERSALIST CHURCH.—The first attempt to organize a Universalist Church in Chicago was made in 1836. In that year Rev. William Queal preached to a small congregation, and on the 11th of June organized the society which consisted of N. H. Bolles, E. E. Hunter, A. N. Marble, Chester Tupper, S. G. Trowbridge and S. C. Bennett, who worshiped for a number of years in Mechanic's Hall, in the old Saloon Building. Other places were occasionally occupied, as Bennett's school-house, and the court-room. For a number of years the congregations were quite small, but among them were several persons who afterward became prominent and leading citizens. Previous

FIRST UNIVERSALIST CHURCH.

to 1843 the Church had no regular minister, but depended upon missionaries as supplies. The first church building erected by this society was located on Washington Street, near the Clark-street Methodist Episcopal church. It was a frame building, thirty by forty-five feet in size, and cost \$2,000. It was dedicated October 23, 1844, by Rev. William E. Manley, D. D., who had accepted a call to the Church in the preceding January. Mr. Manley had preached for the Church in 1842. He remained pastor until 1845, when he was succeeded by Rev. Samuel P. Skinner, who was succeeded in October, 1855, by Rev. Samuel B. Mason. During Mr. Mason's pastorate the congregation had grown so large that a new church edifice became a necessity. Movements were therefore instituted looking to the erection of a building which should be a monument of architectural grandeur and beauty, and furnish the Church, which had become the leading Universalist Society of the Northwest, with a permanent religious home. A building committee was appointed consisting of R. K. Swift, Henry Vreeland, B. F. Walker, Jacob Gage, S. P. Skinner, H. H. Husted, P. B. King, and M. D. Gilman. The first board of trustees consisted of M. D. Gilman, H. H. Husted and E. G. Hall. During the pastorate of Rev. Mr. Mason the new church building, which was a remarkably attractive edifice, was completed. W. W. Boyington was the architect. The location of this building was at the southwest corner of Wabash Avenue and Van Buren Street. The dimensions of the building were seventy feet fronting on Wabash Avenue, and one hundred and eight feet deep on Van Buren Street, including the projection of the towers and turrets. The

style of architecture was Gothic, with lancet-head windows and doors. The front of the building was very graceful, the tower and spire in the center, the spire reaching to a height of one hundred and seventy-five feet. There was a turret on each front corner, and three entrances in the front, opening into a spacious vestibule. The exterior walls were of stone, rock faced, the spire and pinnacles being of wood. The main auditorium was on the second floor; was fifty-eight by seventy-five feet in size, with galleries, and afforded comfortable seating for eight hundred people. The height of the walls was twenty-eight feet, and the ceiling was forty-three feet high in the center. The pulpit was erected in an octagonal recess. There was a very fine organ, erected by Mr. Erben. The basement was ten feet high in the clear and was elegantly fitted up for its purposes. The cost of this building was \$60,000. The dedication occurred May 7, 1857, Rev. E. H. Chapin, of New York City, preaching the sermon. The first church building of this society was sold to the Olivet Presbyterian Church. The successor in the pulpit of Rev. Samuel B. Mason, was Rev. William W. King, who commenced his pastorate in August, 1857, and was succeeded by Rev. William H. Ryder, on Sunday, January 1, 1860. The legal title of the parish is the First Universalist Society of Chicago, but it is generally known as St. Paul's Universalist Church.

THE FIRST UNITARIAN CHURCH was organized June 29, 1836, under the laws of Illinois, and with the title of "The First Unitarian Society of Chicago," \$800 were at once subscribed for the purchase of a lot. The first Unitarian preaching in Chicago was a few days or weeks previous, but in the same month of June. The services were held in the Lake House, which stood at the corner of Rush and Michigan streets. Dr. Charles Follen preached the sermon. Miss Martineau, who was on a tour through the West at the time, refers to that occasion in the following language: "We were unexpectedly detained over the Sunday in Chicago, and Dr. F. was requested to preach. Though only two hours' notice was given, a respectable congregation was assembled in the large room of the Lake House, a new hotel then building. Our seats were a few chairs, and benches, and planks laid on trestles. The preacher stood behind a rough pine table, on which a large Bible was placed. I was never present at a more interesting service, and I know that there were others who felt with me." For some time after the organization was perfected the society had no regular pastor. Rev. Mr. Huntoon preached for some months in the summer of 1837, and in June, 1838, Rev. James Thompson, of Salem, Mass., preached a number of sermons. In 1839 Rev. Crawford Nightingale preached for some months, the society being accommodated in the Mechanics' Institute. On the 22d of June, this year, Rev. George W. Hosmer, of Buffalo, preached in the "City Saloon," on Unitarianism, and he also preached on the three succeeding Sundays. Some time afterward Rev. Mr. Barrett preached two Sundays. In October, Rev. Joseph Harrington arrived in Chicago and commenced his labor here as the pastor of the society. His first sermon was preached in the "City Saloon," to a congregation of ten persons. Religious services continued to be held in the same place until the spring of 1840, when Rev. Mr. Harrington decided to go East and solicit assistance to build a church. Upon his return a lot was purchased on Washington Street, between Clark and Dearborn, eighty by one hundred and eighty feet in size, for \$500. A contract was made with Alexander Lloyd for the erection of a building. It was erected

in the fall of 1840, and dedicated May 3, 1841, by Rev. Joseph Harrington. The cost of the church was \$3,758.45; cost of the lot, \$500; making a total cost of \$4,258.45. Of this amount there was collected at the

FIRST UNITARIAN CHURCH.

East, chiefly through the efforts of Mr. Harrington, \$2,888.46, the balance being collected in Chicago. The church was forty-two by sixty feet, and of the Doric order with the exception of the entablature, which was devoid of a triglyph. The steeple, which was built in 1845, cost \$461, making the total cost of the church property \$4,719.45. There was also a large bell and an organ. This bell, with the exception of the small bell on St. Mary's church, was the first church bell hung in Chicago. The tower of this church was erected in the latter part of 1844, and the bell was hung in it on the 31st of December, 1844, and was thereafter ready for ringing on all suitable occasions. It was the first bell in Chicago that could be heard to any considerable distance and was depended upon by other churches to denote the time of Sunday services. It was also used as a fire alarm bell until 1855, when the First Baptist Church was erected at the corner of Clark and Washington streets, and the bell belonging to it, being a larger and more powerful one, superseded the "little bell" on the Unitarian Church in case of the necessity of sounding a fire alarm. This Baptist bell continued to be used for this purpose until 1856, when the court-house was completed, in the tower of which was hung in that year a heavy bell which from that time gave the alarm of fire. Rev. Mr. Harrington closed his pastorate in the fall of 1844, and was succeeded in 1845 by Rev. William Lord, who remained only a short time, and the pulpit was supplied temporarily by Revs. Henry Giles, William P. Huntington, Mr. Ripley and Mr. Conant, and on November 22, 1846,

Rev. William Adam, who had been for twenty years a missionary in India, preached his first sermon for the Church. Rev. Mr. Adam remained about two years, when he was succeeded by Rev. R. R. Shippen, who commenced to preach for this Church in the fall of 1849, Rev. Mr. Shippen remained until July 1, 1857. During his pastorate such was the growth of the society that it was necessary to enlarge the church building at two separate times. Rev. George F. Noyes became pastor of this Church in September, 1857, and continued until the spring of 1859, when he resigned. Under his auspices the "ministry at large" was organized and Rev. William H. Hadley placed at its head. Mr. Hadley was followed by Rev. Robert Collyer as minister at large. When Mr. Collyer was called to the ministry of Unity Church, Miss E. P. Newcomb was called to conduct the business of the ministry at large. This charity was the means of relieving much destitution in Chicago. After the resignation of Mr. Noyes, the First Unitarian Society remained without a pastor until the summer of 1861, but the pulpit was supplied most of the time by various clergymen, among them Revs. A. B. Fuller, E. H. Sears, Horatio Stebbins, Thomas Hill, A. D. Mayo, and Robert Collyer. The history of this church may appropriately close in this volume with a brief sketch of the life of Rev. Joseph Harrington, its first pastor.

REV. JOSEPH HARRINGTON was born February 21, 1813, in Roxbury, Mass. His father was for many years a successful lawyer in Norfolk and Suffolk counties, and occasionally served as Justice of the Peace. At a very early age certain elements of young Joseph's character were remarkably developed. One of these was resoluteness and determination. On one occasion, when his teacher was about to compel obedience by inflicting corporal punishment, he seized the ferrule from her hand and threw it in fragments on the floor. The next day in obedience to his parents he came to her with a very humble apology. This was in his sixth year. In after years he was an ardent devotee of the "manly art of self-defense," feared no man, and was equally possessed of moral as of physical courage. From early childhood he possessed a genuine enthusiastic love and reverence for his mother, to whom, after being once, at the age of seven years, conquered by her by the infliction of corporal punishment, he uniformly yielded implicit obedience. "Among the instructors whose influence upon him seems to have been most permanent was Edward Bliss Emerson, a man of great purity and simplicity of character, uniting exquisite delicacy and sensitiveness with an earnest, religious purpose, sterling common sense, and a wide and generous sympathy for all." . . . "Mr. Harrington often in after years mentioned with reverence and gratitude, the name of this faithful instructor, who so early passed away, the first stricken from that brilliant constellation of genius bearing his name.* The first fourteen years of his life

Joseph Harrington

were passed in one of the most joyous and attractive of homes, and in the excellent public schools of his native town. In September, 1827, he entered Phillips' Academy at Exeter, N. H., at the time under the charge of Drs. Benjamin Abbott and Gideon Soule. He entered Harvard University in the summer of 1829, having attained sufficient knowledge to pass a critical examination for admission to the Freshman class. His vigorous constitution, love of athletic exercise, vivacity of temperament, and other peculiarities while they prevented him from being a recluse or book-worm, did not prevent him from being an excellent student. While he was not, at that time, especially inclined to the study of abstract science, and while metaphysics and the more recondite branches of mathematics, were pursued chiefly as a means of mental discipline, yet he was delighted with philology, and with Chaucer, Spenser, Milton and Shakespeare, and other classic poets of England. He was more interested in the study of modern than of ancient languages. The Italian was especially attractive to him because it was the language of music. He never abandoned the learning or the literature

* From a memoir of Rev. Joseph Harrington by William Whiting.

of Germany, nor did he ever deny himself the pleasures of the studies of music and of elocution. He graduated from Harvard University, receiving the usual degree of Bachelor of Art, in the summer of 1833. Henceforth he was to depend upon his own exertions for a livelihood, as he had in part during his college years. After residing a little more than six months at East Greenwood, he took charge of the Hawes School at South Boston, January 14, 1834. This was reputed to be the most difficult of Boston schools to manage. Some of its pupils were turbulent, refractory and profane, but after conducting it for five years, such had been the spirit with which he undertook his work and the powers he brought to bear upon his pupils, that he left it one of the best schools in the city. While engaged as teacher in the Hawes School Mr. Harrington turned his attention toward the ministry, and he relinquished charge of the school for the purpose of pursuing his theological studies. His resolution to become a public teacher of morals and religion was formed in November, 1836. Having made his choice, he at once entered upon the study of theology under the direction of Rev. George Putnam, of Roxbury. In the autumn of 1839, he was sent as missionary to Chicago by the American Unitarian Association. Here he remained until April, 1840, when he returned to New England to solicit funds for the purpose of building a church. He raised about \$2,500, which when added to the \$2,000 contributed by the citizens of Chicago made sufficient to carry the enterprise forward to a successful issue. In September he was ordained as an evangelist at Federal-street Church, Boston, and in October he returned to Chicago as pastor of the First Unitarian Society. He reached Chicago October 31, and preached his first sermon as settled pastor on Sunday, November 1. In the summer of 1841, he was the first to preach the doctrines of Unitarianism at Milwaukee, Wis. In 1842 he received a call to become the colleague of the Rev. Mr. Elliott, of St. Louis. In 1843 he planted the Unitarian Church at Rockford, Illinois. In the spring of 1844, accompanied by Mrs. Harrington, he left Chicago to visit friends in the East and South, preaching several Sundays at the Unitarian Church in Baltimore, Md. During this year Mr. Harrington decided to retire from the pastorate of the Chicago Unitarian Church, because of the precarious condition of his mother's health, and because of the uncertainty of his connection with the Church. But when he left the Church it was entirely free from debt. After a brief period of repose, he was invited to take measures toward the establishment of a new Unitarian Society at the "South End," Boston. While thus engaged he was invited to supply the pulpit of the Suffolk-street Chapel, which he engaged to do for one year. During this year it was found impracticable to carry forward to a successful issue the "South End" Society project. During the winter of 1844-45 he was invited to become pastor of a Unitarian Society at Hartford, organized less than a year previous, but feeling pledged to stand by the "South End" enterprise until its fate was decided he declined the invitation. A year later the call was repeated and accepted. On Sunday, January 4, 1846, he preached his first sermon to this congregation as his own people. Here he remained six years, laboring under peculiar difficulties in connection with his ministry, Unitarianism being then quite unpopular in Hartford, and his society being small and heavily in debt. In March, 1852, he received a call from a Unitarian Society in San Francisco, but declined to consider the question until he had finished the work of liquidating the debt of his Hartford Church. This he accomplished in the following May, and on the 20th of July, with his wife and daughter, took passage from New York for Aspinwall. He reached San Francisco on the 27th of August, and on the 30th he preached his first sermon there in the United States District court-room, to a large congregation. The next Sunday the court-room was too small to accommodate the crowd that sought admittance, and a large hall was afterward engaged, which, contrary to expectation, proved too small. Mr. Harrington's experience in San Francisco was from the first very different from what it had been in New England. "The cordial hand of brotherhood was extended to him by ministers of different theological opinions, giving him for the first time since his entrance into the ministry the happiness of unrestrained association with the clergy." While laboring in Hartford to free the Church from indebtedness, he contracted the disease which, complicated with Panama fever and paralysis, resulted in his death, Tuesday, November 2, 1852. His remains were interred at San Francisco, November 4, 1852, and at Forest Hills Cemetery, Roxbury, Mass., December 13, 1853. Mr. Harrington was married April 6, 1841, to Miss Helen E. Griswold. They had three children: Helen Josephine, born in February, 1842, and two sons, both of whom died in infancy.

REV. RUSH RHEES SHIPPEN was born at Meadville, Penn., January 18, 1823. His paternal ancestors were of English descent, and his mother was of Welsh extraction. The subject of this sketch received his early education at Allegheny College, Meadville, but his course was interrupted in his senior year by the sus-

pension of the institution, but afterward in recognition of his attainments, it conferred upon him the degree of Master of Arts. Before he was sixteen years old he taught a district school and "boarded round." In the fall of 1844 the Meadville Theological School was started under the auspices of the Unitarian denomination, Rush R. Shippen being the first student enrolled in the institution. After three years of study in this institution, desiring to extend his observation and experience, he accepted for a year the position as private teacher in the family of a wealthy planter residing near Nashville, Tenn. He then returned to Meadville to complete his theological course, and graduated in June, 1849. After a brief tour through the Eastern States he came to Chicago, and took charge as pastor of the First Unitarian Church, entering upon his duties November 13, 1849. His pastorate here continued eight years. With reference to his characteristics one of his Chicago parishioners writes of him as follows: "He was of tall and powerful frame, commanding presence, with an expression of great gentleness and benignity. His voice was powerful, but of a peculiarly agreeable quality. His musical gifts as a flutist and as a bass singer, his general intelligence and genial manners made him welcome in all companies. He was a clear thinker and vigorous writer, and gave to all his utterances the force of personal conviction. Not greatly eloquent nor strikingly original, yet he rarely failed in the pulpit to interest his audiences, because his words were always well chosen and from the heart." Rev. Mr. Shippen was an able and popular speaker and a constant contributor to denominational and secular papers, and at one time assisted in the editorial charge of the New Covenant, a Universalist paper published in Chicago. He manifested a deep interest in the charitable and educational institutions of this city. In May, 1852, with other Unitarian clergy of the West, he joined in organizing the Western Unitarian Conference. While encouraged and gratified by the steady growth and prosperity of the society, which required two successive enlargements of the church, seven years of such labor proved a severe tax upon his strength and resources. Oppressed with fatigue and thinking that with a rest and change his life work as a Christian minister would be extended and enhanced, he resigned his charge in Chicago July 1, 1857. In the fall of this year he accepted a call to the Church of the Unity, Worcester, Mass., as the successor of Edward Everett Hale, D.D. He was also for many years an active member of the School Board and Chaplain at the Worcester County jail. In the spring of 1869, on account of impaired health, he was granted six months' leave of absence to travel in Europe, at the expiration of which period he returned to his duties with the vigor and zest of youth. In 1870, resigning his Worcester charge, he accepted the secretaryship of the American Unitarian Association at Boston. To the discharge of the duties of this new position he brought his experience of more than twenty years of an active ministry, and a wide personal observation of both the East and West. His broad and comprehensive views served to solve wisely the many practical questions arising for decision. At all the annual meetings and general conferences the reports of the secretary were cordially received; and largely through his leadership the denominational enterprises were planned and executed. Although Mr. Shippen has never devoted himself to authorship or distinctively literary work, he compiled and edited while in the secretaryship the Service, Hymn and Tune Book published by the Association, which has supplanted most other books, and is growing into general adoption by the Unitarian societies. He also compiled a book for domestic devotional worship entitled, "Praise and Prayer," and among other tracts of which he is the author are "Judgment Days," and "The True Liberal." He wrote for McClintock and Strong's Encyclopedia the article entitled "Unitarianism," wherein the historical development and present status as a religious body are clearly defined. Mr. Shippen married, in 1855, Zorah Rodman at Oriskany Falls, N. Y., and their surviving children are Sarah, now wife of Arthur Lord, of Plymouth, Mass., and Eugene R., who is a student at Harvard College. After eleven years spent as secretary of this Association, Mr. Shippen accepted a call in 1881 to the pastorate of All Souls Church in Washington. In this Church Rev. Mr. Shippen is now (1883) engaged.

THE NEW JERUSALEM, OR SWEDENBORGIAN, CHURCH.—Previous to 1835 there were probably no Swedenborgians in Chicago, or in northern Illinois. In September of that year J. Young Scammon arrived in the city, and for some time was alone in his belief in the doctrines of the Church of the New Jerusalem. According to Swedenborg, the Divine Love and Wisdom constitute the essential Church, and any individual who is receptive of the Divine Love and Wisdom, constitutes an external Church in its smallest entity. Upon this principle Mr. Scammon commenced to hold New

Church worship on Sundays in his office, almost immediately upon his arriving in Chicago. In 1836 he became acquainted with Vincent S. Lovell, a young merchant in Chicago, and converted him to the doctrines of the New Church. Afterward the two united in Sunday worship. In 1837 Mr. Scammon was married to Miss Mary Ann H. Dearborn, of Bath, Maine, a receiver of the doctrines of Emanuel Swedenborg. Upon bringing his wife to Chicago, he took up his residence in the City Hotel, and here, in his private parlor, Mr. Scammon, his wife and Mr. Lovell held Sunday morning worship, in company with those invited who chose to attend. In 1838 religious worship was held in Mr. Scammon's house on Clark Street, and until he moved into his residence at the corner of Michigan Avenue and Randolph Street. Services were next held in his office in the Saloon Building, southeast corner of Lake and Clark streets; then in the Common Council room adjoining; afterward in a large room in the next story, and at last, as members increased, in the Saloon Hall itself. Up to this time however, the attendance was never very large. The general body of the Church in Illinois is known as the Illinois Association. It was formed July 6, 1839, at Canton, Fulton County, under the following call issued June 3, 1839:

To the Receivers of the Heavenly doctrines of the New Jerusalem in the State of Illinois

Dear Brethren:—Believing that the time has come for the Receivers of the Heavenly Doctrines in this State to take more decided measures to co-operate with the Divine Providence in disseminating the doctrines of the New Dispensation, we respectfully invite you to assemble at Canton, Fulton County, on Saturday and Sunday, the 6th and 7th days of July next, at 10 o'clock, A. M.

The object of the meeting is to bring our scattered energies together by forming acquaintance with each other, and thereby extending the social sphere of the Church, and to take such steps as may be deemed essential, in our isolated condition, to enable us to come more fully into order.

It is earnestly desired that every receiver who can conveniently attend will not fail to be present, and such as cannot be present will communicate to the meeting by letter, on the following subjects:

The residence of the receiver; the number of New Church books in possession; the number of receivers and readers in the vicinity; the names of persons to whom communications may be addressed; the disposition to contribute toward obtaining a New Church minister to visit and preach at the various places where there are receivers in this State, and such other information as may be deemed of interest to the Church.

J. YOUNG SCAMMON,
JONAS RAWALT,
JOHN F. RANDOLPH.

Pursuant to this invitation a meeting of receivers was held in Canton, Saturday, July 6, of which John F. Randolph, of Fulton County, was elected president, and J. Young Scammon secretary. On Sunday morning the meeting was organized by the election of the following officers: John F. Randolph, president; Caleb North, of Peoria County, secretary, and Jonas Rawalt, treasurer. After divine service, and the reading of the articles of faith, an address was delivered by Mr. Scammon, setting forth what is meant by the New Jerusalem Church. No minister could be obtained in 1840, hence no meeting of the Association was held. In 1841 Rev. Lemuel C. Belding, of Pennsylvania, who was sent by the Central Convention to Illinois as a missionary, visited Canton, and formed there a small society. In 1842 the Rev. T. O. Prescott, afterward known as O. Prescott Hiller, visited Illinois and preached at the meeting of the Association. In 1843 the Rev. John Randolph Hibbard being invited by the Association came to Illinois as its general minister and was subsequently made superintendent of the Association, and remained as such until 1879. The New Church in

this State was organized and grew up chiefly under his superintendence. While connected with the Association, he was successively minister at Canton, Peoria and Chicago. During this same year, 1843, "The Chicago Society of the New Jerusalem" was organized, and formed into a legal religious body. Originally the Society consisted of J. Young Scammon, Mrs. Mary Ann H. Scammon, and Vincent S. Lovell. The Society was organized at that particular juncture for the purpose of securing the benefits of a law of the State, providing that each religious society, in any town located on the line of the Illinois & Michigan Canal, on canal lands, might receive as a donation a lot upon which to erect a church building. But the provisions of the act could not be enforced after the end of that year. The Church was incorporated September 7, 1843. Through the efforts of Mr. Scammon a lot at the corner of Wabash Avenue and Adams Street, seventy-six by one hundred and seventy-one feet in size, was secured for the use of the Church. On the day of the organization, the Society adopted for its platform, or articles of faith, the three essentials of the Church, as contained in number 259 of Swedenborg's treatise on the Divine Providence, as follows: 1. The acknowledgment of the Divine of the Lord; 2. The acknowledgment of the Sanctity of the Word; 3. The life which is called Charity. These articles were signed by J. Young Scammon, Mrs. Mary Ann H. Scammon and Vincent H. Lovell. From the time of the organization until March, 1847, no annual meetings were held, but social and religious meetings were had in the Saloon Building, the numbers in attendance gradually increasing. At the first annual meeting held March 25, 1847, the following persons became additional members of the Society by subscribing to the articles of faith: William E. Jones, Joseph K. C. Forrest, John E. Wheeler, John Sears, Jr., Franklin Scammon, Thomas L. Forrest, George R. Bills, and Prof. James V. Z. Blaney, of Rush Medical College. The first trustees of the Society were J. Young Scammon and Vincent S. Lovell. On the 25th of February, 1849, the board of trustees was enlarged to include the following members: J. Young Scammon, William E. Jones, George R. Bills, James V. Z. Blaney, John Sears, Jr., John E. Wheeler, and Hugh G. Clark, the first three of whom were made an executive committee. Thomas L. Forrest was appointed secretary, and Franklin Scammon treasurer. Joseph K. C. Forrest was appointed leader. Mr. Forrest conducted religious services in the Saloon Building for several months, and public lectures were given by Rev. George Field. In February, 1849, the Society numbered twenty-one members, but it had not yet been consecrated as a Church. Desiring to be thus consecrated, they invited the Rev. J. R. Hibbard to visit Chicago for that purpose. The consecration occurred on the 25th of February, 1849, at the residence of J. Young Scammon, at the corner of Randolph Street and Michigan Avenue. At this meeting the executive committee was authorized to invite the Rev. J. R. Hibbard to become pastor of the Society, and to make the necessary provision for his support. In accordance with the authority thus conferred, an invitation was extended to the Rev. Mr. Hibbard to assume the pastorate at an annual salary of \$500. Mr. Hibbard accepted the invitation, and himself and wife united with the Society January 1, 1850. At this time the Society numbered twenty-six members, and its expenses had been met by voluntary contributions. At the meeting of February 25, 1849, the trustees were authorized to lease the lot donated from the canal lands, for a period not exceed-

ing five years. Under this authority the trustees leased the lot to various individuals, who erected buildings upon it. The Society continued to worship in the Saloon Building until 1851, at which time church rooms were procured in a building at the northeast corner of Dearborn and Randolph streets, erected by Harrison Newhall. In this new and more commodious place of worship a large congregation collected on Sunday mornings, and it soon became evident that the Rev. Mr. Hibbard's efforts were eminently satisfactory and efficient in disseminating the doctrines of the New Jerusalem, and in awakening an interest therein in the minds of the public. In January, 1852, the treasurer reported that the Society was out of debt and had a small balance in the treasury. The Society continued to worship in Newhall's Hall until 1855, when it removed to a school-house which it had purchased on the north side of Adams Street, between Wabash Avenue and State Street (No. 69 Adams Street), where it remained until the building was destroyed by fire in the winter of 1857-58. After the burning of the school-house the Society purchased an old church building which had been erected by the Second Presbyterian Church, which the Society removed to Harrison Street, between Wabash Avenue and State Street. This church it occupied until in 1861-62, when it built its new and commodious stone temple on the lot at the corner of Wabash Avenue and Adams Street. This was a very convenient building, containing, besides the audience room, a basement for social meetings, pastor's study, library room and janitor's residence. It was fifty by seventy feet in size, Norman Gothic, Hebrew inscription on the front, and cost \$18,000. The tower extended to a height of 175 feet. The church stood and was occupied by this Society until the great fire of October, 1871, when it was destroyed, together with a mission church building, which the Society had purchased of the Presbyterians and removed to a lot at the junction of Clark and LaSalle streets, opposite Lincoln Park. The total loss to the Society was \$15,000. Rev. Mr. Hibbard remained continuously with the Society as pastor until 1871, when, on account of failing health, leave of absence was given him, and he went to Europe for a season of rest and recreation. For some time previous to the beginning of this vacation the Rev. Calvin Day Noble had been his assistant, and now in his absence took charge of the spiritual affairs of the Society. Upon Mr. Hibbard's return a division took place in the Society, and those members who preferred Mr. Noble to Mr. Hibbard formed themselves into another society, under the pastoral care of Rev. Mr. Noble. Mr. Noble remained with them as pastor only a few years, when he left, and his Society was soon after dissolved.

JOHN RANDOLPH HIBBARD, D.D., was born in Jefferson County, N. Y., July 23, 1815. He was a preacher by hereditary descent, both his father and grandfather, besides one maternal and two paternal uncles, having been clergymen. He was born and educated a Presbyterian, but while a minor he became a minister of the United Brethren Church. While traveling as a minister of this denomination he became familiar with the writings of Swedenborg, received the doctrines in 1839, became a member of the New Church, and in June of that year was ordained a minister at the Western Convention, in Cincinnati, Ohio. For some time after this he taught school in Rutland, Meigs Co., Ohio, preaching as opportunity offered. In 1841 he removed to northern Ohio, and on May 30, 1842, was ordained pastor and missionary. Soon afterward the members of the New Church in Illinois invited him to visit this State with the view of his remaining permanently as their minister. In response to this invitation he made a missionary visit to Illinois in 1843, and in 1844 moved to this State, making his home mainly in Canton and Peoria. In June, 1847, he was made an ordinary minister, and in 1849 he became pastor of the

Chicago Society of the New Jerusalem, and moved to this city permanently to reside. Under his ministry this Society became one of the most prosperous of the New Church societies in the world. When Mr. Hibbard came to Illinois it was as minister for the whole New Church in the State, and was recognized as the superintending minister of the New Church within the Illinois Association, but his duties were extended by invitation to neighboring States. From a brief sketch of the Rev. Mr. Hibbard, written by the Hon. J. Young Scammon, published by Wilson & St. Clair, from which some of the above facts were obtained, the following quotation is made: "The liturgy has been much improved through his efforts, and to the exertions of no one is the establishment of the New Church

newspaper, the New Jerusalem Messenger, and the New Church publishing house, in New York, more indebted than to him. * * He enters with all his heart into the performance of his duties, is faithful and painstaking as a pastor, and as a missionary he seems to continually hear the command: 'Go ye into all the world and preach the Gospel.' The Gospel to him is found in the doctrines of the New Church. They come down into his mind as a revelation from Heaven, explained through the rational mind of Emanuel Swedenborg. He regards Swedenborg as authority, and has no patience with those who would amend the latter's writings. While teaching that nothing can do a man any good except what he receives freely and understands rationally, yet he insists at all times that the Word of God and the writings of Swedenborg are the only sources of authority in religion in the New Church; and he seems to find in the inscription on the cross 'Jesus, King of the Jews,' in Hebrew, Greek and Latin, an intimation that the truths revealed for the New Church are crystallized in these dead languages, the Old Testament having been written in Hebrew, the New Testament in Greek, and Swedenborg's writings in Latin, the spiritual sense of the Word being revealed through the doctrine of correspondences contained in Swedenborg's writings." The Rev. Mr. Hibbard's pastorate in the Chicago Society of the New Jerusalem continued with but brief interruption, from 1849, to December 1, 1877, during which time he was promoted from the vice-presidency of the General Convention, to the presidency of the American Conference of the New Church ministers. During this period of nearly thirty years, Mr. Hibbard's position and labors were peculiar. He performed the duties of missionary, priest, and bishop, and was the vigilant superintendent of the interests of the Swedenborgian Church. The difficulties of his position are better understood when it is considered that, while the evangelical churches make proselytes by means of an army of priests and teachers, operating directly upon the emotions of men, the Church of the New Jerusalem depends more for the propagation of its subtler doctrines upon a deliberate and careful analysis, and a clear perception of their symmetrical proportions. The mystical superstructure entitled the New Church reared upon the writings of Swedenborg, while it may be in a broad and practical sense, a religion of the heart, yet its teachers never resort to the excitation of the sympathies as a means of conviction, but reach the heart and enchain the emotions if at all, through the colder medium of the intellect. Viewed in this light the work accomplished by the Rev. Dr. Hibbard, during his pastorate of the Chicago Society, is a remarkable one, but he was endowed with the qualifications necessary to its accomplishment. Though but of medium stature, he has a squarely built thick-set frame, surmounted by a head that would render him a noticeable man in any gathering of his fellow-men. His forehead is broad and high, and his head is covered with full flowing, dark brown hair. His eyes are dark and eager, and deep set beneath brows sufficiently prominent to give the perceptive faculties a palpable distinctness. His nose is slightly Roman, lips firm, and features generally prominent and clearly cut. On the 4th of July, 1877, Dr. Hibbard tendered his resignation to the New Jerusalem Society of Chicago, the resignation to take effect December 1, of that year. This step was occasioned by the action of the General Convention, which had been a short time previously held in Cincinnati, Ohio. The Convention was unanimous in desiring Dr. Hibbard to devote all his time for a year to come at least, as General Superintendent of the work of Church extension. The resignation was reluctantly accepted, with many expressions of esteem and affection on the part of the Society and stating that they could but regard him as the spiritual father of the New Church in Illinois, and also recognizing the labors and devotion of Mrs. Hibbard.

Since his departure from Chicago, Dr. Hibbard has resided in Philadelphia.

THE JEWS.—Previous to 1845 there was no religious organization among the Jews in Chicago, nor were there many Jews in Chicago or even Illinois before 1840. The persecution of the people of this race in Germany, through exclusive and oppressive laws, drove large numbers of them to America, from 1830 to 1840, where they could enjoy civil and religious liberty equally with those of other faiths. Large numbers of them remained in the principal cities of the Eastern and Middle States—New York, Philadelphia and Baltimore—but gradually they emigrated in considerable numbers to the Ohio valley and the prairies of the Western States. The first considerable number of Israelites came to Cook County in 1843. This immigration was under the auspices of the Jewish Colonization Society, organized through the efforts of William Renan, of New York City, a young and enthusiastic gentleman of the Hebrew faith. The Society sent a Mr. Meyer west to select lands upon which the colony might settle. After examining different parts of the Western country, he selected and purchased one hundred and sixty acres of land in Shaumburg, Cook County. Mr. Meyer reported to the Society, and on the receipt of his report a majority of its members came to Chicago, meeting Mr. Meyer there, and learning from him more fully the nature of his plans. After numerous consultations it was discovered that many of the Jews were averse to the plans Mr. Meyers had pre-arranged and consequently did not settle in a body, but scattered in various directions. In one respect, however, the original plan was carried out, namely, with reference to agriculture. Some purchased farms partly improved, others settled upon Government lands, and still others settled in villages, and connected agriculture with commercial pursuits. Few Jews came to Chicago previous to the completion of the Illinois & Michigan Canal, and of the Galena & Chicago Railroad to Elgin, in 1849, at which time Chicago, becoming a center of trade, attracted Jewish families in large numbers. Previous to this influx of the Jewish people, there had been residing in Chicago but two Jewish families, one of them being that of Benedict Schubert.

Among the earliest arrivals of those who now began to flock into Chicago were L. Rosenfeld, Jacob Rosenberg, the Kohn brothers, Samuel Cole, Mayer Klein, M. M. Gerstley, the Rubel brothers, the Greenebaum brothers, and Messrs. Brunneman, Clayburgh, Weine-man, Weigselbaum, Zeigler and some others. The Jews by this time had become numerous enough to organize a religious society. This was in 1845. The first important action taken by them was the purchase from the city of cemetery grounds. This old Jewish cemetery was within the present limits of Lincoln Park. In 1856 the city limits having been extended so as to include it, it was abandoned as a cemetery. Soon after acquiring it the association was organized into a regular congregation, and in 1848 it was chartered under the name "Kehilath Anshe Maarev" (Congregation of the Men of the West). The congregation at first held religious services in the upper story of a frame building on the southwest corner of Lake and Wells streets. In 1849 they erected a synagogue on Clark Street between Quincy and Adams streets, on a lot they had leased. At the expiration of their lease they bought a lot on the northeast corner of Adams and Wells streets, upon which they erected a second synagogue. This was in 1855. Here they remained until 1865, when the house becoming too small they sold the property and bought a church on the corner of Wabash Avenue

and Peck Court. In this church they worshiped until it was destroyed by the great fire of 1871. The first minister of this congregation was Rev. Ignatz Kunreuther, who became pastor in 1849. In 1855 he was succeeded by Rev. G. Schnerdacher, and he was succeeded in 1856 by Rev. G. M. Cohen. The following gentlemen then successively officiated as ministers of this congregation: Revs. L. Lebrecht, L. Levi, M. Mauser, M. Moses and L. Adler. The pastorates of all except the last were quite short. Mr. Adler was called in 1861 and remained until 1880.

ST. PAUL'S GERMAN EVANGELICAL LUTHERAN CHURCH was organized in 1846 by the Rev. Augustus Selle, with about forty families as members. For some three years previous to the organization, religious services had been conducted by those who afterward, under Rev. Augustus Selle, became members of this Church, depending, during this time, on supplies. But during this time a small church building was erected at the corner of Ohio and LaSalle streets, where now stands Rev. Joseph Hartmann's church. This building was used, after the organization of the Church, by Mr. Selle until 1848. At this time the majority of the Church desired to change the confession from the Evangelical Lutheran to the United Evangelical, which being done, the minority, with Mr. Selle at their head, retired and formed a new congregation upon the original basis of faith. Having now no church building, they procured the use of the court-house, in which they worshiped until in June, 1849, by which time their new building was ready for occupancy. It stood on Indiana Street, between Wells and Franklin. It was a frame structure, twenty-five by fifty-five feet in size, and had a steeple fifty feet high. Mr. Selle remained pastor of this Church until August, 1851. He was succeeded by Rev. Henry Wunder, who was installed pastor on the 21st of the following month, having arrived in Chicago three days previously. The building on Indiana Street became too small in 1854, when its capacity was increased by the erection of galleries, to the extent of four hundred sittings. At the same time an organ was erected in the church at a cost of \$400. This enlarged the church was occupied by the congregation until 1864, when a new brick edifice was built at the corner of Superior and Franklin streets, on four lots which cost the Society \$5,400. The church building was fifty-two by one hundred and one feet in size, was furnished with galleries, and had a steeple one hundred and sixty-one feet high, the basement being occupied by the school belonging to the Church. The total cost of the building was \$30,000. This commodious and costly structure was occupied until October, 1871, when it was destroyed by the great fire, together with the property of all the members of the Church except three. On the Sunday following the fire, the members of the Society met in a German church on the West Side, and resolved to maintain their organization and to erect new church and school buildings as soon as practicable. The school-house was built at 333 Larrabee Street. It was a two-story building, into the upper story of which Mr. Wunder moved his family, the lower story being used for school purposes through the week, and for religious purposes on Sunday. It was first used for these purposes in December, 1871. Early in the spring of 1872 work was commenced on a new brick church-building, upon the same site upon which stood the one burned down. On the 9th of October, 1872, the first anniversary of the fire, this new building was dedicated. It was a reproduction of the one destroyed, as to size, cost and appearance. An organ was erected in this

new church, larger than the one destroyed, costing \$1,200. On the 9th of October, 1873, a chime of three bells was erected in the steeple, costing \$1,800. At the present time the congregation of St. Paul's consists of only about three hundred families, many of the Germans having moved away from the immediate vicinity of the church to more congenial localities. From this congregation three Church Societies have sprung: (1) The Immanuel Evangelical Lutheran, in 1854, located originally on Twelfth Street, where now stands the church of the Holy Family; (2) St. John's Evangelical Lutheran, in 1867, located at the corner of West Superior and Bickerdike streets; (3) St. James' Evangelical Lutheran, in 1870, situated at the corner of Fremont and Sophia streets. From the first of these three there have sprung primarily and secondarily four separate churches, and from the second, two; making nine churches that have come directly or remotely from St. Paul's. Under the administration of Rev. Augustus Selle, the day-school was established, in which, in addition to secular instruction, religious instruction is also given, according to the ancient custom in Germany, thus rendering the existence of the Sunday school unnecessary, and it is thought by the German people that better results are so obtained. There have been, since the fire, two of these day schools sustained, one at 333 Larrabee Street, where are engaged three teachers, and the other in the basement of the church, where, under Mr. Wunder, who is still pastor of the Church, there are engaged two teachers. One of Mr. Selle's teachers, Mr. Fischer, was constantly engaged from before the close of Mr. Selle's pastorate to the time of his death, in February, 1882.

REV. HENRY WUNDER, who has been continuously pastor of St. Paul's Church since September 21, 1851, was born in Woehrd, Province of Oberfranken, Bavaria, March 12, 1830, son of Conrad and Barbara (Mueller) Wunder. At the age of eleven years, Henry went to the residence of his brother-in-law to receive instruction, having the ministry in view even at this early age. He was prepared for his profession, and in 1846 arrived in Fort Wayne, Ind., and entered an institution of learning newly established especially for German students. In 1848 he was sent to an institution in Altenburg, Mo., whence he was transferred to St. Louis. In 1849 he received a call to a Church in Millstadt, St. Clair Co., Ill., where he preached until 1851, when he received a call to the St. Paul's German Evangelical Lutheran Church of Chicago, in the pastorate of which he was installed September 21, 1851. On the 21st of September, 1883, this pastorate had lasted thirty-two years. Mr. Wunder is now president of the Illinois District of the Synod of Missouri, Ohio, and other States.

THE FIRST NORWEGIAN EVANGELICAL LUTHERAN CHURCH was organized February 14, 1848, by Rev. Paul Andersen, who arrived in Chicago January 6, of that year. At the time of its organization the Church had thirty members, as follows: Andrew Nelson, P. E. Eckstrom, George P. Hanson, L. A. Brown, Iver Lawson, B. O. Dahly, John Amundson, Iver Wikkingson, N. H. Ellickson, Knud Lawson, Ole Nelson, W. G. Norheim, O. N. Testhal, A. G. Nelson, Elias Olson, Erick Abrahamson, Hans J. Kjos, R. Henderson, Iver K. Lohme, Neil Larson, Peter Olsen, Andrew L. Flage, John Nelson, Kittel Nerison, Halvor Olson, H. I. Erickson, G. T. Gunderson, Nels Olson, Jacob Jacobs, and Peter Nelson. Religious services were at first held in the Bethel Chapel on Kinzie Street, between Kingsbury and Franklin streets, where they were continued until August, when the first church building was purchased of a congregation which had commenced its erection, but had the misfortune to have it blown down by a storm. It cost the Norwegian Church originally \$800, and the rebuilding of it cost \$1,000. It stood on Superior Street, between Wells and LaSalle, on two lots each twenty

feet front, one of which was bought of Walter L. Newberry, and the other of William B. Ogden. It was a frame structure, fifty by sixty feet in size. In March, 1856, this property was sold to Rev. Mr. Carlson, of the Swedish Lutheran Church, for \$2,000, and a new brick edifice erected at the corner of Franklin and Erie streets. The total cost of this building was \$18,000. It was occupied by the congregation until October, 1871, when it was for the most part destroyed by the great fire. Utilizing the foundations and such portions of the walls as were sufficiently strong, the congregation rebuilt their church as soon as practicable, at a cost this time of \$15,000. This church is still standing and in use. It is of the same size and general style as the one destroyed. The pastors of this Church since its organization have been as follows: Rev. Paul Andersen, commencing in 1848 and continuing until 1860, when he was succeeded by Rev. Abraham Jacobson, who remained pastor until the fall of 1861, when he was succeeded by Rev. C. I. P. Peterson. Mr. Peterson remained until July, 1873, when he was succeeded by Rev. A. Mohn, who in turn was succeeded in 1874 by Rev. A. Mikkleson, the present pastor. During the pastorate of the Rev. Mr. Peterson, the congregation became divided in sentiment with respect to certain ceremonies in the Church. At the time of the organization these were made to conform very nearly to the customs obtaining in American churches. Mr. Peterson, having recently come from Norway, desired to return to the rites of the State of Norway Church. Winning a majority over to his wishes, the minority became dissatisfied, and a formal separation took place. This was in 1866. Suit was brought by the minority against the majority for the possession of the Church property, which after a five years' contest in the courts was, in 1871, decided by Judge McAllister in favor of the majority. About a month afterward the church was destroyed by the great fire of 1871. After the decision of the case against them, the greater portion of the minority united with the Church of the Holy Trinity on LaSalle Avenue, and the rest for the most part remain unconnected with any Church.

REV. PAUL ANDERSEN was born in Norway August 24, 1821; came to America in 1843, and arrived in Chicago, August 16, of that year. In Norway his education was obtained from private tutors, and having learned the English language, he acted as interpreter for the emigrant company during the voyage to the United States. After his arrival in this country he pursued his classical and literary studies at Beloit College for a number of years, and afterward studied theology with a private tutor. Mr. Andersen speaks fluently the English, Norwegian and German languages. The object he constantly had in view in pursuing his studies was to prepare himself for the Gospel ministry, and in his own words "he can not remember the day when he did not love the Savior." On January 6, 1848, he came to Chicago for the purpose of organizing

Paul Andersen

a Lutheran Church, and as the result of his efforts, the First Norwegian Evangelical Lutheran Church was formed February 14, 1848. In June of that year he was ordained at Schoharie, N. Y., there being no English Lutheran Synod in Chicago at that time. He remained pastor of the Church until 1860. In 1853, having collected into his Norwegian Church a large number of Swedes, he organized them into a separate Church, which was thenceforward known as the Swedish Immanuel Evangelical Lutheran Church. In 1860, on account of bronchial troubles, he retired from the pastorate of the Church he had organized in 1848, and spent several years in travel in Europe with the hope of obtaining relief. In 1864, on his return to this country, being still unable to re-enter the ministry, he became connected with the internal revenue service in which he remained until April 1, 1876, when he accepted a call to the Nor-

wégian Evangelical Lutheran Church in Milwaukee, Wis., upon the condition, however, that the Norwegian and English languages should be placed upon the same footing in the services in the Church. From that time to the present, the custom of preaching in Norwegian in the morning and in English in the evening has prevailed. Rev. Mr. Andersen remained pastor of this Church until July 2, 1883, when he retired permanently from the ministry. He now lives in Lake View, on North Clark Street, near North Fifty-ninth. Upon his arrival in America, by advice of friends he dropped the last portion of his name, which he has sincerely regretted for years. His full name is Paul Andersen Norland. Mr. Andersen was first married in September, 1848, to Miss Anna Wang, of Beloit, who died sixteen days afterward. He was married the second time in the latter part of 1849, to Miss Martha Larson, who is still living. They have four children: Martin Luther Andersen, late a teacher in Lake View High School; Andrew Emanuel, with Marshall Field & Co., and two girls respectively named Emma and Lena. Mr. Andersen enjoys the distinction of having introduced into American Scandinavian Churches the practice of conducting services in the English language.

OUR SAVIOR'S NORWEGIAN EVANGELICAL LUTHERAN CHURCH, was organized by Rev. Gustav F. Dietrichson, January 18, 1858. Fifty-two persons signed the constitution and thus became members of the Church. Twenty-five years afterward, at a quarter-centennial festival held January 18, 1883, only six of these original fifty-two were living. In the same year it was organized this congregation commenced to build a church—a frame building—on the corner of West Erie and May streets. Shortly afterward this Church organized a parochial school, where the children were instructed in the common English branches, in the Norwegian language, and the Lutheran religion. This school has been continued and is still in existence. The Church has prospered remarkably, and is now one of the strong-

Erland Carleson

est in Chicago and indeed of the whole country. In 1871 it sold the old church and commenced the erection of the present grand structure, one of the largest and most costly Norwegian Lutheran church-buildings in America. It will seat twelve hundred people, and cost \$40,000. There is a very fine organ in the church that cost \$1,200. Together with the four lots on which the church stands this church property is worth \$50,000. The congregation consists of about fourteen hundred souls, of whom nine hundred are confirmed. Rev. Gustav F. Dietrichson remained with the Church but a short time. When he left he returned to his native land. He was succeeded by Rev. A. C. Preus, who officiated as pastor until 1863. The Rev. Mr. Preus was a remarkable man, and very successful in his labors. He was for ten years president of the Synod for the Norwegian Evangelical Lutheran Church of America. Desiring to pass the decline of life in his native land, and in his mother Church, he returned to Norway in 1872, and in 1878 at the age of sixty-four he died. His death was sincerely mourned by many people on both sides of the Atlantic. His successor in Our Savior's Church was the Rev. J. J. Krohn, who served the Church faithfully for thirteen years, and it was under his administration of affairs of the Church, that in 1871 the new church building, already described and still occupied by the congregation, was erected and completed. In 1876, Mr. Krohn accepted a call to a Church in Minnesota, with the hope of receiving benefit to his health which had been much impaired during his labors in Chicago. Since 1876 the Rev. O. Juul has been pastor of this Church.

THE SWEDISH IMMANUEL EVANGELICAL LUTHERAN CHURCH.—The nucleus of this now large congrega-

tion consisted of emigrants from Sweden, who arrived at Chicago in the summer of 1852. Rev. Paul Andersen, of Chicago, and Rev. T. N. Hasselquist, of Galesburg, Ill., voluntarily ministered to the spiritual necessities of these newly arrived emigrants. In January, 1853, a congregation was organized consisting of about eighty persons, a portion of the members of this new Church having previously been members of Rev. Paul Andersen's Norwegian Lutheran Church. A call was extended to the Rev. Erland Carleson, the pastor of Weis Parish, Sweden, who accepted the call and arrived in Chicago August 22, of the same year. His first sermon in Chicago was delivered on the 28th of that month, to a small congregation of attentive listeners, principally Swedes. His text was Luke xvii, 11-19 inclusive. Only thirty-six persons were present at this first sermon of the young minister, the remainder of the original eighty who united in the organization having dispersed previous to his arrival. As a consequence the auspices for a successful career in his adopted country did not appear very bright; but notwithstanding this unfavorable condition of affairs, Mr. Carleson was not dismayed. The following extract from the first page of the Church records, indicates the spirit with which he entered upon the duties of his pastorate: "Relying upon divine assistance, I am determined to declare the truth openly and faithfully, whatever difficulties may be thrown in my way." The first business meeting of the congregation was held January 27, 1854. A concise constitution drawn up by the pastor was adopted at this meeting. Church officers were also elected as follows: Deacons—C. J. Anderson, John Nilson and Isaac Patterson; and for trustees—John Bjookholon, G. Svenson and Gisel Toutsson. Record of the election of the trustees was made in accordance with the law of the State, and thus was the Church legally organized. The Lutheran rite of confirmation has been maintained in this Church, and the first class that was confirmed consisted of seven young people, two boys and five girls. The first building occupied by this congregation as a place of worship was that of an American Lutheran Church on Superior Street, which they continued to occupy until 1856, when they bought the church building belonging to the First Norwegian Lutheran Church, for \$1,500. This church they used as it was when purchased until 1865, at which time it was enlarged, and within a year from this time it became again too small. In 1869 a new edifice was erected at the corner of Sedgwick and Hobbie streets, at a cost of \$34,400. The dimensions of this church were fifty-five by one hundred and seventeen feet, and it was two stories high. This building was used until the great fire of 1871, when it was destroyed. Almost immediately afterward work was commenced on the new church, which was completed sufficiently to be used for religious services in December, 1872. This was also a brick church and was dedicated April 4, 1875. The cost of this church was \$31,850, and it was built on the same site as the one burned down. It still stands and is occupied by the Church.

The Rev. Erland Carleson, who has been mentioned as the first pastor of this Church, remained with it in that capacity twenty-two years, from 1853 to 1875. In the latter year he removed to Andover, Henry Co., Ill., where he became the pastor of a congregation of one thousand members. He is also president of the Swedish Evangelical Lutheran Augustana Synod. At the time of the dedication of the new church building in 1875, the present pastor, Rev. Carl A. Evald, was installed. From the organization of this congregation

in 1853 to January 1, 1883, 3,046 infants had been baptized; 1,019 confirmed, 3,965 communicants received, 2,292 removed; 623 children died; 252 adults died; 1075 members excommunicated, and 1,061 marriages solemnized. The membership of the Church at the same time was 1,365. The parochial school connected with this Church occupies the basement of the building, and is attended by the children of such parents as prefer to give them select instruction, which is of a religious as well as secular character. In the Sunday school, which has always been in a flourishing condition, the children are instructed in the Bible history of Dr. Barth and the catechism of Martin Luther, as well as in the usual Sunday school lessons. There are two sewing societies connected with the Church.

ST. PAUL'S EVANGELICAL UNITED CHURCH.—The four Evangelical United churches in Chicago, viz., the St. Paul's, the Zion's, the Salem and St. Peter's, belong to the German Evangelical Synod of North America. This Synod was organized at Quincy, Ill., in 1872, and from it have been formed the Synod of the West, Northwest and East. The entire Synod is divided into seven districts. Each district assembles annually in a conference, and a general conference is held triennially to which these districts send their delegates. In the summer of 1843, a meeting of citizens was held for the purpose of forming a Church. The citizens were G. Schairer, K. Teschner, John Ffund, Charles Stein, B. A. Beyer, H. H. Rantze, Arnold Kroeger, William Frank, and Jacob Letz. They immediately organized themselves into a council, or board of trustees. The last five were appointed a committee to obtain a church site. This committee secured as a donation from William B. Ogden and Walter L. Newberry a piece of land on the southwest corner of LaSalle and Ohio streets, where the church now stands. In 1843 the erection of a frame church building thirty by forty-eight feet in size was commenced. During 1844 the Society was increased by the addition of several new members, and the Church council was made to consist of G. Schairer, Charles Stein, John Reder, John Gross, Jacob Letz and Frederick Letz. Until 1846 the Society was served by itinerant preachers. On April 11, 1846, Rev. Augustus Selle was called from Columbiana County, Ohio. He was the first settled pastor of the Church. At this time there were seventy-six voting families in the Society, and many of the members are now living and known as prominent citizens of Chicago—as Louis Hass, Frederick Letz, George Atzel, Henry Weber, Philip Gross and Michael Gross. Others have left Chicago—as Henry Devermann, Clement Stosc, who went to his son in California and was burned to death, and August F. Busch. In 1847 the necessity of enlarging the church became evident, and H. Rothget and John E. Strobach took the contract. In April, 1848, a contest arose in the Church with reference to the form of confession, and in consequence Mr. Selle, with a portion of the members, withdrew and formed St. Paul's Evangelical Lutheran Church whose pastor now is the Rev. Henry Wunder. The United Evangelical Society, in August, 1848, called as its pastor Rev. Dr. Fischer from Hamilton, Ohio. He remained with the Society three years constantly combating the principles of the constitution. At length he agreed to submit the questions in dispute to the Societies of the Synod, and in August, 1851, he was dismissed. He now lives in Joliet full of years, a vigorous and beloved old man. The next pastor called was the Rev. Joseph Hartmann, a theologian of a German University, who had formerly labored in Louis County, N. Y., and who at the time was twenty-seven

years of age. Under his pastorate the membership of the Society increased so rapidly that it soon became necessary to enlarge the church building, and Mr. Hartmann found his plan to erect a large brick building warmly approved. The funds were raised with great readiness and the building of the church commenced in 1854. The plans were drawn by Architect August Baver. The builder was August Wallbann. The church was consecrated on the 4th of February, 1855. The Society at this time consisted of one hundred and sixty families, and the pews were let in fourteen days. The beautiful church building, the style of which was simple yet grave, and whose interior was noted for the excellence of its workmanship, was completed in 1864, and was not spared by the great conflagration of 1871, the foundations only remaining firm. Soon after being destroyed it was reconstructed upon the same foundation and upon nearly the original plan. As this rebuilt church stands to-day it is almost exactly the old one reproduced. It was consecrated February 16, 1873. The present St. Paul's Society is very strong, one of the natural results of the great growth of the city. Many of the old German families with their descendants belong to it. The school occupies the basement of the church, and is taught by John C. Rahn. The present board of trustees of the Church are as follows: William Knocke, chairman; Peter Emmel, treasurer; Charles Kurg, secretary; William Bohrmann, Frederick Lewgow and Christian Kroll. The elders are Phillip Kroll, George Haaze, John Haage, Charles Lehuhardt, George Stratzheim and Kurtz. Rev. Joseph Hartmann has been the pastor continuously since November, 1851.

Uhlich's Orphan Asylum is under the auspices of St. Paul's Church. It takes its name from Mr. Uhlich, deceased, who presented the Church with a piece of ground upon which to establish an orphan asylum. The donation made to the Church for this purpose was thirty-two feet in length on LaSalle and sixteen feet on Arnold Street. The means for building the institution came from the Relief Fund. Henry Muehlke was an old and trusted friend of Mr. Uhlich. He had saved Mr. Uhlich's fortune, and had been remembered in his will to the extent of \$100,000. He enjoyed great favor among the Americans, and so brought the project of a German Orphan Asylum before the management of the Relief Fund that \$20,000 was granted for that purpose. Last year sixty-eight children were inmates. The expenses of the Asylum for 1882 were \$4,774.55.

THE CHRISTIAN CHURCH was organized in 1850, by the following seven persons: M. H. Baldwin and wife, Dr. L. S. Major, John Saunders and wife, and the present Mrs. Dickey and her daughter Julia. The first regular preacher for this Church was Rev. L. Cooley. In 1852, under his ministry, the Society worshiped in the third story of J. H. Reed's drug store, at No. 148 Lake Street. After remaining in this room about a year, they removed to Gleason's school-house, standing on Jefferson Street near Monroe Street, where they conducted religious worship until they removed to the United States Court-room, in the Saloon Building. Here they remained until the completion of their new church edifice on Monroe Street between Aberdeen and Rucker streets, the latter being now called Center Avenue. After Elder Baldwin closed his services, Charles B. Egan, a brother of the noted Dr. William B. Egan, succeeded to the pulpit. On account of certain difficulties between him and some members of the Society, it was broken up and the Rev. Mr. Egan retired. Only a few of the members remained true to the organization, among whom were H. H. Honore and wife, B. L. Honore and wife,

and Dr. L. S. Major. This was in 1857. While affairs were in this chaotic condition, the Rev. M. N. Lord was induced by H. H. Honore to take charge of the congregation; commencing his labors in December, 1857, and remaining until June, 1861. During this period, Allen Robbins, of Ohio, visited Chicago, and was largely instrumental in raising a subscription sufficient to erect the church edifice on Monroe Street already mentioned. It stood about one hundred feet east of Rucker Street, was a frame one-story building, thirty-six by fifty-eight feet in size, with a small tower but no bell. It was commenced May 28, 1858, and was dedicated July 4, 1858. The dedicatory sermon was delivered by Rev. D. P. Henderson. The money employed in the construction of this edifice was contributed mainly by Dr. L. S. Major and H. H. Honore. Previous to the pastorate of Elder Lord, the following elders had preached occasionally for this Society: John O'Kane, Love H. Jamison, S. K. Hoshouer, J. D. Benedict, Curtis J. Smith and Alexander Campbell. During his pastorate, the following occasionally preached: Elders D. P. Henderson, W. T. Moore, D. S. Burnett, Dr. W. H. Hopson, Amos Sutton Hayden and James A. Garfield. After the dedication of the new church building, the Society continued to worship in it until 1866, enjoying the ministerial services of the following pastors: N. S. Bastian, from July, 1861, to June, 1862; W. F. Black from 1862 to 1865; John S. Sweeney from 1865 to 1866, and B. H. Smith, who came in 1866. Under the Rev. Mr. Smith, the Society moved to the North Side, into the old St. James' church building, which was bought for them by H. H. Honore and Dr. L. S. Major. The church building on Monroe Street was sold to the Episcopalians, who moved it east of Canal Street, between Harrison and Twelfth, and named it St. Stephen's Church. After moving to St. James' Church, B. H. Smith was succeeded in 1867 by the Rev. D. P. Henderson. In 1868, the members became dissatisfied with the North Side, most of them living on the South Side. In order to satisfy the desire to move to another location, Dr. L. S. Major and H. H. Honore bought for the use of the Society the church edifice of St. Luke's Episcopal Mission, at the corner of Wabash Avenue and Sixteenth Street. This building had been erected by the Universalists, and sold by them to the Olivet Presbyterian Church. By them it was sold to Mr. Cole, who with the assistance of some others, started this mission. This church building was dedicated by the Christian Church the first Sunday of its occupancy by them, Rev. D. P. Henderson preaching in the morning and in the evening. In the afternoon, at the request of some of the members, the Rev. John S. Sweeney preached, which was so much against the wishes of Elder Henderson, that he resigned. His resignation was accepted, and John S. Sweeney called in his stead.

The Rev. Mr. Henderson then organized a Church at the northwest corner of Indiana Avenue and Twenty-fifth Street, a lot being purchased there by E. B. Stevens, who also furnished most of the money for the erection thereon of a church building. This was called the Indiana-avenue Christian Church. While the new building was being erected they used for religious purposes the Protestant Orphan Asylum. In the fall the new church was completed and dedicated. Here they had as pastors, D. P. Henderson until 1870, and O. A. Burgess until the reunion of the two portions of the Church in October, 1871. Those remaining on Wabash Avenue and Sixteenth Street were known from the time of the division in 1868, as the Wabash-avenue Christian Church. They had as pastors, John S. Sweeney until

November, 1869, and then Isaac Errett, then and now editor of the Christian Standard, published at Cincinnati, Ohio, who remained until the reunion in October, 1871. The Great Fire of October 9, 1871, served to soften the hearts of the members of the two Churches toward each other. They were made to feel the need of united action. Hence each Church appointed a committee to draft a plan of union. The committees met October 12, at the house of E. B. Stevens, and on the next evening again met and adopted the plan presented on the 12th. The Church thus formed was called the First Christian Church. Isaac Errett, though requested by a portion of the members to do so, positively declined to remain as pastor, and the Rev. O. A. Burgess, who had been pastor of the Indiana-avenue Church nearly two years, remained as pastor of the re-united organization until 1873, when he was succeeded by the Rev. W. J. Howe, who remained one year, and was himself succeeded in 1874, by Isaac Errett. Isaac Errett remained one year and was followed by Rev. Knowles Shaw. The Rev. S. M. Conner succeeded in 1876, and one year thereafter was succeeded by Rev. George W. Sweeney, who remained until 1880. But after the re-union difficulties again developed, this time in consequence of a debt incurred in the erection of the church at the corner of Indiana Avenue and Twenty-fifth Street. As one result in 1878 another division occurred, and something over fifty members seceded and formed the South Side Christian Church, locating at the corner of Prairie Avenue and Thirtieth Street. The first pastor of the South Side Church was W. D. Owens, an able and excellent man, who remained until his failing health compelled him to resign in 1879. He was succeeded by the Rev. Mr. Parsons, who remained but a few months, and he by J. W. Allen, who did good work in building up the Church. In the latter part of 1882 the South Side Church and the First Church re-united, and called the Rev. Henry Schell Lobingier, the present pastor, adopting the name of the Central Church.

The First Church, during the time of this separation, had a pastor, George W. Sweeney, from 1876 to 1880, and O. A. Burgess from 1881 to the time of his death in 1882. It is now necessary to recur to the debt, as its existence had considerable influence on the history of the Church. It was incurred in the erection of the present Central Church edifice, which was erected in 1868, at a cost of \$20,000. The debt, which was bearing ten per cent interest, matured in 1874, the society was unable to liquidate it, and was also unable to pay the arrearages of interest, amounting to \$4,000. E. B. Stevens, who had for the two previous years paid most of the interest that had been paid, made arrangements with the mortgagee to renew the mortgage at seven per cent interest, and paid the arrearages of interest. He then proposed to the First Church that as they had possession of the church they should relieve him from the burden of the debt, and pay him the \$4,000 interest which he has just paid, or otherwise vacate in favor of the South Side Church, of which he was a member. The Society chose to retain possession, agreeing to pay the interest advanced by Mr. Stevens, which, however, they failed to pay. After allowing ample time for it to be paid and not receiving it, Mr. Stevens brought suit for the \$4,000 and obtained judgment for the amount. The judgment was permitted to remain as a lien upon the property, until the formation of the Central Church, when Mr. Stevens agreed to cancel the judgment upon the condition that the Church thus formed abandon forever the Indiana Avenue and Twenty-fifth Street property, and remove to Prairie Avenue and Thirtieth Street. The

condition was accepted and the removal to Thirtieth Street made about January 1, 1883. A portion of the members becoming dissatisfied with the location, a meeting was held in May, 1883, and the question of returning to Twenty-fifth Street was voted on and carried by a vote of forty-one to five, the membership being about two hundred and fifty. The majority, though opposed to returning, singularly enough refrained from voting. Since 1879, the time of the transfer of the Church property by Mr. Stevens John Gunzenhauser, by assuming the indebtedness and paying the interest annually, has enabled the Church to retain possession of its property.

OTIS ASA BURGESS, one of the ablest pastors in the Christian Church in Chicago, was born August 26, 1829, in Thompson, Windham Co., Conn. Thomas Burgess, one of his paternal ancestors, joined the Pilgrim Colony in 1637, and his maternal ancestors were of the same stock. When eight years old, young Otis's father removed to Norwich, Shenango County, N. Y. From this time until he was seventeen years old Otis worked eight months of each year on the farm, and attended school the other four months. His mother's death when he was fourteen years of age made a deep impression on his mind. He had been educated to the strictest doctrines of Calvinism, but now he set aside the "doctrine of decrees," and attempted to get religion in the popular method; at the mourner's bench, but did not succeed. On account of this failure he was almost led to reject all revealed religion. At the age of seventeen he went to Norwich Academy, remaining there but a few weeks, then teaching school the balance of the year. In the spring of 1847 he returned to the Academy, and in fourteen weeks finished the entire course except the classics. In the fall he removed to Metamora and taught school until the summer of 1851. At Metamora he first heard of the Disciples, commonly called "Campbellites." The Campbellites were generally spoken of with disrespect by other denominations, and as Mr. Burgess was already a scoffer at religion it was an easy matter for him to join in the general outcry against them. He maintained his attitude toward them until he happened to hear "Old Father Palmer" (Henry Palmer of Illinois) preach the primitive Gospel. This was the turning point of his career. While listening to this sermon, having heard that the Disciples had a Bible of their own, he firmly believed that the text as quoted was not in his copy of the Bible; but upon examining it, found the text to be as quoted, and became convinced that the doctrines of the Disciples were true. He was immersed July 21, 1850, and in the fall of 1851 went to Bethany College, arriving there with only \$4.50 in his pocket. His determination carried him through College, and he graduated in 1854, when he returned to Illinois. He took charge of the Church of Christ in Washington, Tazewell County, where he remained one year, when he became professor in Eureka College, remaining there also one year. He then divided his time between the Churches at Washington and Metamora until 1862, when he took charge of the Church of Christ in Indianapolis. Here he remained until 1870, when he came to Chicago as pastor of the First Christian Church, in which position he remained until 1873, when he was elected President of the Northwestern Christian University at Indianapolis. He was president of this University until 1880, when he was recalled to the pastorate of the First Christian Church. On account of his arduous duties as president of the University, his health had begun to fail, but notwithstanding this he entered into the Presidential campaign of 1880, with all the energy he could command, and delivered over one hundred speeches in favor of the election of James A. Garfield to the Presidency of the United States. This labor was too severe for his enfeebled constitution to bear. A sojourn of some months in the Southern States did not restore him to health, and he died in Chicago.

THE SPIRITUALISTS.—The first spiritualistic medium to arrive in Chicago was Mrs. Julia Lusk, of Milwaukee, in 1849, who was a "rapping medium." The raps made in the presence of this medium were very loud and distinct, resembling the fall to and roll across the floor of a heavy croquet ball. Ira B. Eddy was her first convert in Chicago. Having been educated to believe in orthodoxy, but being unsatisfied with certain of the doctrines, he felt greatly relieved in receiving by means of the raps negative answers to the two following questions: "Is there a personal Devil," and "Is there such a place as hell." He then obtained a communication from a departed friend, and thus became satisfied

at once that the dead still live and can communicate with the living. He at once became a full spiritual believer. Converts to Spiritualism were made slowly in Chicago in those days, but in November, 1852, when Mr. Eddy rented one of his buildings, No. 48 Clark Street, to Seth Payne for banking purposes, there were Spiritualists enough in the city to form a society, and to rent the hall in the third story of this same building for the purpose of holding meetings and hearing lectures. This hall was named by Mr. Eddy, who was the first president of the society, "Harmony Hall." Mr. Eddy remained president of the society one year, and was succeeded by Russell Green, who was assisted by A. J. and H. M. Higgins. In about two years Mr. Green became tired of the expense of the meetings and resigned. In 1852, about the time of renting Harmony Hall, a Mr. and Mrs. Herrick came to Chicago. Mrs. Herrick was the second medium to arrive. Among the lecturers on Spiritualism were Seth Payne, who though a good speaker was extremely radical; the Hon. Warren Chase; Mr. Hammond, of Rochester, N. Y.; and Mrs. Cora Hatch. Mr. Hammond was the author of two books, one of them entitled "Thomas Paine in the Spirit World." Spiritualism caused considerable excitement in those years, especially in connection with Seth Payne's bank. In September, 1853, Ira B. Eddy was adjudged insane, and removed to an insane asylum in Hartford, Conn. He was accompanied by Drs. John A. Kennicott, J. P. Lyman and J. W. Freer, afterward president of Rush Medical College. One of the local papers in commenting upon this event, said: "This step has been deemed necessary in order to remove him from the influence of the Spiritualists of Chicago, by whom he has been surrounded for several months past." Seth Payne was also tried for insanity, but being notified, as Mr. Eddy was not, he obtained counsel, and in each of his trials the jury disagreed. In December, 1854, Professor Spencer delivered a series of lectures at Metropolitan Hall, "on the exciting subject of Spiritualism, demonstrating the fallacies of the Spiritual religion by performing the tricks by which the mediums deceive the credulous." His lectures drew immense crowds, and awakened a great deal of interest. Early in 1856 Andrew Jackson Davis came to Chicago to lecture under the auspices of Russell Green. That portion of the Spiritualists who favored Mr. Davis's peculiar doctrines were named by him "Harmonialists," and the announcement was made in the Democratic Press of May 10, 1856, that "the Harmonialists will hereafter hold their meetings in Harmony Hall, 48 Clark street." During this same year Hon. Warren Chase also lectured on the Harmonial Philosophy. At this time there were fifteen mediums in Chicago. The audiences usually averaged about three hundred, but as many attended merely from motives of curiosity, and as there was no list of membership kept as in the churches, it was not known what proportion were believers in the doctrines. From this time forward for two or three years but little of moment in connection with Spiritualism occurred, but about 1860 a revival of interest took place, and the history of the subject from this time to 1870 is replete with incidents. Besides the lectures mentioned above there were a few others during the period covered by this volume. On the 14th of January, 1857, George Leach lectured in South Market Hall on the claims of Swedenborg and Andrew Jackson Davis, and upon spirit manifestations. Mrs. Streeter lectured in her spiritual capacity January 31 in a school-house near the American Car Works; Henry Weller lectured February 1 in Harmony Hall on

the Philosophy of Intercourse between the Natural and Spiritual Worlds; Mrs. Seymour, a trance medium, lectured February 22 in Metropolitan Hall. She was said to be the only medium in the West through whom the manifestation of writing upon the arm could be produced. On the 15th of March J. White lectured in Harmony Hall on the Unity of Inspiration, Revelation and Science. On April 18 A. B. Whiting, a speaking medium, lectured on Spiritualism. He was a popular speaker and an able exponent of the Harmonical Philosophy. Miss C. M. Beebe, of Boston, lectured in Light Guard Hall April 26 and 30. Joel Tiffany, of New York, lectured in the same place May 10, and Dr. Brookie, of St. Louis, on the 17th. From this time until 1860 there was comparatively little done in Chicago to disseminate the doctrines of Spiritualism.

THE BETHEL.—As early as 1842 religious work commenced among the seamen, and a building for this special feature of missionary labor was erected. In 1844 a society was organized, with twenty members, and a new building was erected at the corner of Kinzie and North Franklin streets. At this time Rev. Mr. Rowlatt was the missionary in charge. In 1846 he was succeeded by Rev. J. Wilcox, and in 1848 Rev. Mr. Rowlatt returned. In 1851 Rev. Philander Griffin had charge of the Bethel, and in June of this year the church building was moved to the corner of Wells and North Water streets. The first services were held at this location on June 15. In 1853 the Rev. Mr. Rowley was in charge, and in 1854 the Rev. J. H. Leonard was sent out by the Seamen's Friend Society, whose headquarters were at Cleveland, Ohio. He had services in the Bethel Chapel, which stood on Wells Street, near the Galena & Chicago Railroad depot, where also was maintained a very interesting Sunday school. Mr. Leonard was very much encouraged with the result of his labors among the seamen, and visited the vessels with a great deal of energy and persistency, as also the boarding houses and dwellings where boatmen and sailors were to be found. On the 3d of February a revival commenced at the Bethel. There was preaching every evening, and in a short time twelve hopeful converts were reported. In the winter of 1854-55 another protracted meeting was held, the chaplain of the Bethel preaching every night for some weeks. There was a good attendance, and considerable good resulted from the special effort then made. On the 20th of May Rev. P. Stone, chaplain of the port of Boston, preached at the Bethel. Another protracted meeting was held in January, 1856, lasting one week. In 1857 and 1858 similar special efforts to convert the sailors were made. In April, 1858, one of the local papers refers to an interesting work of grace that had been in progress for a long time during the past winter. The indefatigable pastor, Rev. J. H. Leonard, had preached every night for a long time. Fifty converts had been made. The Bethel in Chicago was then one of the few in the United States that maintained a Church organization. The membership, which for some time had been about fifty, was greatly increased by this revival. The Bethel Sunday school contained about two hundred scholars, and was conducted mainly by members of the Second Presbyterian Church. Lockwood Brown was then the superintendent. The Bethel Church was Congregational in its polity, and had, besides a regular Church organization, a constitution, articles of faith and covenant. Deacons were elected annually, and its pastor was in connection with the Methodist Episcopal Church. In the history of the Chicago Bible Society quite full reference has been made to the work of the Bethel in the

distribution of Bibles and Testaments among the seamen. A continuance of its history may be found in the succeeding volumes of this History.

CHICAGO THEOLOGICAL SEMINARY.

The history of this Seminary is naturally divided into three periods: the first lasting from the incipient discussions of the propriety of the project of establishing a theological seminary in Chicago, to the opening of the Seminary, October 6, 1858—four years of preparatory struggle. The second embraces the thirteen years between the opening of the Seminary and the great fire of October 9, 1871, and the third the thirteen years subsequent to the fire, to 1884. It is proper that the history of this Seminary should be preceded by a brief outline of the various steps taken previous to the inception of the design of founding a distinctive theological seminary in Chicago, with the view of adding theological departments to various colleges already established in different parts of the Northwest. The first attempt of this kind was made in connection with Beloit College, at Beloit, Wis., in 1852. In that year the pastor of the First Congregational Church of Beloit was elected professor of theology in the college. The expectation was that this would be the beginning of a theological department in the College, of the advantages of which both Congregationalists and Presbyterians could avail themselves, and where theological students would experience the advantages of the influence and instruction of a pastor. But the pastor declined the call, and no further attempt was made to establish a theological department in Beloit College. On account of a violent prejudice existing in the West against the clergy and the Church, the Legislature of Illinois at first refused a charter to Illinois College, and when two years later the charter was granted, it prohibited theological education in the College. Subsequently this prohibition was repealed, and a legacy was received by the College for the founding of a theological professorship, but no steps were ever taken by the trustees in that direction. It was the original design to establish a theological department in Knox College, located at Galesburg, and a fund was provided for the purpose, but the plan was abandoned. It was also under consideration to have a theological seminary located on the campus of the Michigan State University, but the design never matured. Iowa College was without a theological department, as were also Carlton, Olivet, Ripon, Wheaton, and other colleges afterward established. All of them, however, educated young men for the ministry through a thorough course of college instruction. All plans failing for the establishment of distinctive theological departments in colleges, movements were made by several evangelical denominations in the Northwest toward the establishment of theological seminaries of their own. As a result of these movements the "Garrett Biblical Institute" was established by the Methodists at Evanston, and opened in September, 1856; the "Chicago Theological Seminary," by the Congregationalists, at Chicago; the "Presbyterian Theological Seminary of the Northwest," transferred from New Albany, Ind., to Chicago, in October, 1859; and the "Baptist Union Theological Seminary," at Chicago, in October, 1867. Originally the design was entertained by certain individuals of enlarged views and liberal spirit, of founding a union theological seminary for both Congregationalists and Presbyterians, but this plan met with opposition from others more intensely denominational in their opinions. Hence the Chicago Theolog-

ical Seminary, when founded, was entirely under the auspices of the Congregational Church, but open to students of all denominations. In 1853, in order to meet the demand for a larger supply of ministers for the smaller churches in Michigan, Rev. L. Smith Hobart pastor at Ann Arbor, drew up a plan, and submitted it to the General Association of Michigan in May of that year. This plan embraced the following particulars:

1. The establishment of a theological seminary in connection with Michigan University.
2. The course of study to be divided into two terms for each year—a six-months lecture term under the instruction of the faculty, and a six-months reading term with the pastor of some Church.
3. The degree of Bachelor of Divinity to be conferred on those completing the full course.
4. Each State interested in the seminary to endow a professorship.
5. The control of the seminary to be vested in a board of trustees elected by the general associations of such States.
6. The library to be supported by annual contributions by the churches.

This plan was reported upon favorably by a committee of the Association appointed for its consideration, consisting of H. D. Kitchel, A. S. Kedzie and D. Mussey, and then referred to another committee consisting of Revs. L. Smith Hobart, E. N. Bartlett and J. Patchin, for report at the next annual meeting of the Association.

The plan was published in the Congregational Herald June 18, 1853, and its publication awakened considerable interest among ministers of the Northwest, many of whom began to feel that the time had come to found a theological seminary in that section of the country. The next meeting of the General Association was held in May, 1854, at Detroit, at which the committee having the plan in charge reported thereon, and called special attention to its design of combining the advantages of two methods of theological instruction—theoretical in the Seminary, and practical with pastors. The General Association highly approved the plan, adopted the report of the committee, and authorized its secretary to confer with other ecclesiastical bodies in the Northwest with the view of securing their approval and co-operation. In March, 1854, Rev. Stephen Peet, of Batavia, Ill., and Rev. George S. F. Savage, of St. Charles, Ill., after conferring with others, had sent letters to several brethren in Illinois and Wisconsin, calling a meeting to consider the question of founding a theological seminary for the Northwest. This meeting was held in March, 1854, in the rooms of the Congregational Herald, Philo Carpenter being chosen moderator, and Rev. G. S. F. Savage scribe. An adjourned meeting was held in April, in which Iowa was represented, and the Michigan movement reported. In June, Rev. H. L. Hammond laid before the General Association of Iowa, which convened at Davenport in that month, a copy of the report of the committee to the General Association of Michigan which had convened at Detroit in May. Other general associations having the same information before them in reference to the movements in Michigan and Chicago, and as a result of the deliberations of similar associations and of the adjourned meeting which met at Chicago, a large meeting was called which met in Chicago June 12, 1854. At this meeting most of the Northwestern States were represented. Rev. Asa Turner, Jr., of Iowa, was chosen moderator, and Rev. G. S. F. Savage scribe. At this meeting a committee of twenty-one was elected to mature the plan of the Seminary; to invite proposals for a site; to make other preliminary arrangements; and to submit the result of their labors

to a general convention of Congregationalists in the Northwest—this convention to meet upon the committee's call. This committee was composed of representatives from Illinois, Indiana, Michigan, Wisconsin, Iowa, Missouri, and Minnesota. It met at Chicago July 12, 1854, and decided to call a convention of those interested in the founding of a theological seminary at Chicago the following September. Meanwhile the project had been kept before the readers of the Congregational Herald, by Rev. J. C. Holbrook, its editor, and in anticipation of the success of the enterprise its friends had secured the services of Rev. Stephen Peet as financial agent, pledging to him a salary of \$1,200 a year and expenses. It now became evident that there was to be a theological seminary somewhere in the Northwest, and the convention called by the committee of twenty-one, fulfilled this expectant hope. This convention met at Chicago September 26, 1854, in Plymouth church. It was composed of delegates from Michigan, Indiana, Illinois, Wisconsin, Iowa and Missouri. A board of directors was elected, distributed among the States as follows: Michigan—Revs. L. Smith Hobart, Harvey D. Kitchel, Adam S. Kedzie, Judge Solomon L. Withey, and Joseph E. Beebe; Indiana—Rev. M. Augustus Jewett; Illinois—Revs. Stephen Peet, William Carter, Flavel Bascom, George W. Perkins, John C. Holbrook, Nathaniel H. Eggleston, George S. F. Savage, Philo Carpenter, and Joseph Johnston; Wisconsin—Revs. Charles W. Camp, Hiram Foote, John S. Miter, and Horace Hobart; Iowa—Revs. Alden B. Robins and Jesse Gurnsey, and John G. Foote; Minnesota—Rev. Richard Hall; Missouri—Rev. Truman Post.

The first board of visitors was composed as follows: Rev. Asa Truman, Jr., of Iowa; Rev. N. C. Clark, Rev. R. M. Pearson, and A. Comstock, of Illinois; Rev. H. M. Brinsmade and Rev. S. M. Eaton, of Wisconsin, and Rev. D. M. Bardwell, of Indiana. On the 27th of September the board of directors was organized by the election of the following officers: President, Rev. Stephen Peet; Scribe, Rev. N. H. Eggleston; Treasurer, Philo Carpenter; Executive Committee, Revs. Stephen Peet, J. C. Holbrook and G. W. Perkins, Philo Carpenter and Joseph Johnston. The work of procuring a charter devolved upon the executive committee. A committee was elected to draft a constitution, consisting of Revs. L. Smith Hobart, A. S. Kedzie, and Harvey D. Kitchel. The question of how the board of control should be elected engaged the attention of the convention, and likewise of the board of directors at their earlier meetings. Two plans were proposed—first, that of having the board elected by the General Associations; second, of having its members elected by the churches interested in the Seminary. The latter plan was adopted, on the ground that the associations were of human institution, and might not continue; while the churches were of divine institution and must continue, and that the Seminary would be best cared for and most effectually guarded against error, under the observance and control of the churches. Another question considered by the convention was that of modifying the course of study under the "Reading Term." The original design contemplated simply a course of reading under the instruction of some pastor. But later it was thought that a more important end would be attained by initiating the student into the practical work of his calling under the guidance of an experienced pastor, or by his taking charge of some vacant church or vacant missionary field as opportunity offered. Still other questions were discussed and acted upon—as

the adoption of a special course of study by which men too old or for other reasons unable to go through college, might nevertheless be educated for the ministry. The adoption of such a course was authorized by the convention. No action was taken upon the subject of the enlargement of the curriculum of theological study, and although this convention considered the question of co-operation with the New-School Presbyterians in founding a Theological Seminary and instructed the board of directors to favorably entertain any proposition looking toward such a result, nothing in that direction was accomplished. The board of directors met in Chicago, March 27, 1855, just after the sudden death of their president and financial agent, Rev. Stephen Peet. For financial agent, Rev. Adam S. Kedzie, of Michigan, was chosen to succeed him. Entering upon his work almost immediately, he continued it until July, 1862. Philo Carpenter, on account of the pressure of his own business, declined to serve longer as treasurer, and was succeeded by Lucius D. Olmsted, who held the office until his death in March, 1862. The Legislature of Illinois granted the Seminary a favorable special charter, which is dated February 15, 1855. Under its provisions, by decision of the Supreme Court of the United States, all the property of the Seminary is exempt from taxation. The second section of the charter is as follows:

"That the Seminary be located in or near the city of Chicago. The object shall be to furnish instruction and means of education to young men preparing for the Gospel ministry, and the institution shall be equally open to all denominations of Christians for this purpose."

In the year 1855 began the persistent work of securing funds, and the plan followed of creating a general fund out of which all the expenses of the Seminary should be met until such time as special endowments should be secured. The increase of assets went on with gratifying success during 1855 and 1856, and had it not been for the commercial crisis of 1857, the Seminary would have speedily attained prosperity. Not foreseeing the crisis, the executive committee in March, 1856, sent Revs. H. D. Kitchel and A. S. Kedzie East for the purpose of securing able professors for the various chairs. After the return of this special committee the board of directors in April, 1856, elected five regular professors and six lecturers, in expectation that the Seminary would be opened in the fall. But this expectation was doomed to disappointment. Various causes rendered so early an opening impracticable. Difficulties about the location of the Seminary, lack of funds in the treasury, and above all the declining of the professors elected to accept the positions tendered them, except one who held his appointment under advisement, were among these causes.

The difficulties about the location of the Seminary were not finally overcome until the year 1865. The first agreement made with reference to location was between Rev. Stephen Peet and Rush Medical college, Mr. Peet verbally agreeing to purchase their building for the use of the Seminary at the cost of \$10,000, but the agreement failed. After considering various projects, the board of directors finally, in 1856, purchased a lot at the southwest corner of West Lake Street and Ashland Avenue, relying upon local interest to assist in making payments. But as this reliance failed, and as business was crowding in that direction, exchange was made in 1858 of this lot for the entire front of the next block south, facing Union Park. The difficulty now arose, of making payments on this block, and the Seminary was brought into peril by the inability of the board of directors to make overdue collections.

From this peril the Seminary was rescued by Philo Carpenter, C. G. Hammond, E. W. Blatchford, J. M. Williams, T. M. Avery, S. M. Moore and other generous friends; but their action saved the Seminary only the south seventy-five feet of its location, upon which a temporary building had been erected, but the portion saved, though inadequate, being unincumbered, was highly prized.

Having traced the struggles of the Seminary with reference to its ownership of an unincumbered site, an account of other struggles and transfers which led to permanency of location and property are deferred to the next volume of this History.

In January, 1857, another election of professors was held for the two most important chairs, but these two professors declined, and the financial panic of that year made it again impracticable to open the Seminary as was hoped might be done that fall. While the opening was reluctantly postponed for another year, yet it was definitely fixed for the autumn of 1858. With this in view, the board of directors, at their meeting in April, 1858, elected to the chair of systematic theology, Rev. Joseph Haven, D. D., and to the chair of Biblical literature, Rev. Samuel C. Bartlett, D. D. In April, 1856, Prof. Franklin W. Fisk, D. D., had been elected to the chair of Sacred Rhetoric. Desiring to give Beloit College one year's notice before vacating his chair in that institution, in 1858, the board of directors of Chicago Theological Seminary, requested such notice to be given, so that he might be prepared to occupy his chair as early as the opening of the second year. These three professors accepted their appointments, and the prospect of opening the Seminary was brighter than at any previous period. The history of the first period of the existence of the Seminary may fittingly close with brief reference to the attempt made by the board of directors to effect a union with the theological department of Oberlin College. The following quotation is from the Quarter-Centennial Historical Sketch published by the board of directors in 1879:

"In November, 1857, the agent, without any formal action of the board, but in accordance with their wishes, went to Oberlin and informally consulted with some of the trustees of that college, with professors in the theological department, and with others, on removing that department with its professors to Chicago, and making it the nucleus of the theological seminary then about to be opened there. Refusals of professors elect to accept chairs in the seminary, led the board to be less sanguine than at the first, in their hopes of securing men fitted for the work of instruction, and for giving the seminary a commanding position in the esteem of the churches. In consequence, they were disposed to take men, who had already proved themselves competent for these purposes. Hence the above proposal for union. And though no action was taken by either party, the attempt, though for other reasons, was afterwards renewed in a more formal way."

CHICAGO BIBLE SOCIETY.

This Society was organized August 18, 1835. Pursuant to notice the ministry and a number of the members of the various religious denominations met in the Methodist Chapel in Chicago on that date to consult upon and adopt some measures for the distribution of the Bible among the people. On motion of Rev. Jeremiah Porter, Rev. J. T. Mitchell was made chairman of the meeting, and Grant Goodrich, Esq., secretary. The object of the meeting was explained by Mr. Mitchell, prayer was offered by Mr. Porter, and the following resolutions were unanimously adopted:

"Resolved, That it is the imperative duty of every Christian to extend the circulation of the Holy Scriptures to the utmost of his ability, and that this obligation will not cease till every individual who can read them is put in possession of a copy.

"Resolved, That for the accomplishment of this object it is expedient that we form ourselves into a Bible Society, auxiliary to the American Bible Society."

A suitable constitution for the auxiliary Bible Society was then adopted, and fifty-one persons gave in their names as members, subscribing in the aggregate the sum of \$85.25. The Society then proceeded to the election of officers for the current year, unanimously selecting the following individuals: President, Rev. Isaac T. Hinton; vice-presidents, Messrs. John Wright and Grant Goodrich; recording secretary, Rev. J. T. Mitchell; corresponding secretary, Rev. Jeremiah Porter; treasurer, Dr. John T. Temple; executive committee, Philo Carpenter, Dr. Peter T. Temple and James Rockwell. The first annual meeting was held in the Presbyterian Church, November 25, 1835. The meeting was called to order by its President, Rev. Isaac T. Hinton, and prayer offered by Mr. Warner. The minutes of the previous meeting and the report of the treasurer were read and approved, as was also the report of the executive committee. The following resolution, moved by Rev. John T. Mitchell and seconded by Philo Carpenter, was adopted:

"Resolved, That, as the Author of the Bible is also the Governor of the world, and from whom we receive every temporal as well as spiritual blessing, the first fruits of our prosperity are justly His due, and should be devoted to the establishment of the Kingdom of God by the distribution of the Word of Life."

Rev. Isaac T. Hinton then offered and Thomas Wright seconded the following resolution:

"Resolved, That this Society regards the continued and progressive opening of Papal and Pagan countries to the distribution of the sacred Scriptures, both as a decisive testimony of Divine favor on the past and present exertions of Bible societies, and as an indispensable and urgent appeal for persevering labor and increased liberality."

Those subscribers who had not paid then handed in their subscriptions, and several new subscribers were added to the list. The following officers were then elected for the ensuing year: President, Rev. John T. Mitchell; vice-presidents, William H. Brown and Lieutenant Louis T. Jamieson; recording secretary, Thomas Wright; corresponding secretary, Rev. Isaac T. Hinton; treasurer, Dr. John T. Temple; executive committee, F. Thomas, Grant Goodrich and James Rockwell. This first organization does not appear to have been recognized as an auxiliary by the American Bible Society, presumably because the officers neglected to report to the parent society the fact of its organization; neither does it appear to have accomplished very much in the way of distributing the Bible among the destitute. But the necessity for labor in this direction continuing to be recognized and felt by Christian people, another organization was effected in November, 1837. This organization was named the "Chicago and Vicinity Bible Society." The officers of this Society were as follows: President, John Wright, Sr.; secretary, Rev. John Blatchford; treasurer, William H. Brown, and it was recognized as an auxiliary by the American Bible Society. Immediately upon its organization this Society gave great promise of efficiency and usefulness, and the foundations were laid for permanency. An invoice of Bibles was ordered from the parent society in New York, which when received were permitted to lie in the warehouse some months before any efforts were made to distribute them. A. B. Lewis, an agent of the American Bible Society, came to Chicago in 1839, to look after the interests of that Society, and it was mainly through his influence that "The Chicago Bible Society" was organized as auxiliary to the American Bible Society, on the 7th of April, 1840. This organization was effected in the Presbyterian

church, then located on Clark Street, when a constitution was adopted and the following officers were elected: President, William H. Brown; vice-presidents, Rev. S. H. Stocking; John Wright, Sr., S. J. Sherwood, Grant Goodrich and E. K. Rogers; secretary, T. B. Carter; treasurer, George W. Merrill; executive committee, Philo Carpenter, James Robinson and Tuthill King.

CONSTITUTION.

ARTICLE I.—This Society shall be called "The Chicago Bible Society," auxiliary to the American Bible Society.

ART. II.—The object of the Society shall be to encourage the wider circulation of the Holy Scriptures, without note or comment.

ART. III.—All persons contributing any sum annually to the funds of the Society, shall be members of the same.

ART. IV.—All funds not wanted for circulating the Scriptures within the Society's own limits, shall be paid over, at least once a year, to the Treasurer of the American Bible Society, to aid in furnishing the Scriptures to the destitute in other places.

ART. V.—The Society shall elect, annually, a president, three vice-presidents, a secretary and treasurer, whose duties shall be such as their several titles import; who, together with the pastor or officiating minister of each Church co-operating with the Society, shall constitute a board of managers, seven of whom shall form a quorum. The Society shall also elect, annually, a treasurer from each Church co-operating with it, who, with the pastor, or officiating minister of said Church, shall attend to all subscriptions and collections in their several Churches, and pay over the same to the treasurer of the Society. In case of a failure of an annual election, the officers then chosen shall hold their offices until a new election is made.

ART. VI.—The Board of Managers shall elect, annually, five of their number, who, with the president, secretary and treasurer, shall constitute an executive committee; shall also elect an auditing committee of three, to examine and audit the accounts of the treasurer and depositary; and such other committees as may be necessary to give efficiency to the operations of the Society; and fill any vacancy that may occur in any of the offices of the Society.

ART. VII.—The Executive Committee, four of whom shall form a quorum, shall appoint its own chairman; meet frequently on adjournment, or on call of its chairman; superintend the work of Bible distribution in the city and county; make arrangements for the annual and anniversary meetings; appoint a depositary; keep a good supply of books on hand; appoint colporteurs and local distributors; see that collections in some way are made annually in every congregation, and that all funds are forwarded early to the Parent Society, with a statement as to the portion designed for the payment of books, and that as a free donation; and report their doings to the board of managers before the annual meeting.

ART. VIII.—The anniversary meetings of the Society shall be held on the second Sabbath of December, or such other day in December as the board may determine; when the annual report shall be presented, addresses made, or such other exercises introduced as shall tend to advance the interests of the Bible cause within the limits of the Society.

The annual meeting of the Society for the election of officers shall be held on the Tuesday evening immediately succeeding the anniversary meeting; at which time all business connected with the Society shall be transacted.

ART. IX.—Any Branch Society or Bible Committee formed within the bounds of this auxiliary, by paying over its funds annually, shall receive Bibles and Testaments at cost prices.

ART. X.—No alteration shall be made in this Constitution except at an annual meeting, and by the consent of two-thirds of the members present.

In 1858 the following was added to article third: "The payment of fifteen dollars at one time shall constitute a member for life, and entitle the life member to two Bibles or their value in Testaments annually for distribution."

In 1871, Article VIII as above was stricken out and the following adopted in its place: "Any two members of the executive committee or of the board of managers shall have power to call a meeting of the committee, or the board, or of the Society, when business of importance requires such meeting to be held. The business to be transacted shall be stated in the call for the meeting."

At the annual business meeting held March 18, 1873, Article IX was amended so that the annual meetings

should thereafter be held in March instead of in December, and that the officers may be elected at the anniversary meeting.

This organization, like its two predecessors, remained inactive for nearly a year, and some time afterward a committee which had been appointed to inquire into the reasons for the quiescence of these Bible societies reported as follows :

"From causes not within the knowledge of the present committee this organization (of 1837) soon began to languish ; the officers were not regularly appointed, and the books which had been procured, were left undistributed, and the destitute unsupplied. This inefficiency continued until the organization of the Chicago Bible Society in 1840, when the present constitution (since amended) was adopted, officers chosen, and new life apparently given to the Bible cause in this city. But with this change of organization the evil was not entirely removed. Little was done toward carrying out the designs of the institution until about twelve months afterward, when at the urgent solicitation of the agent of the Parent Society (Mr. A. B. Lewis) this Society began to work."

With reference to the failure to accomplish anything of the "Chicago and Vicinity Bible Society," organized in 1837, it would seem to be a comparatively easy matter to assign reasons. The financial crisis of 1837 occurred about the time of the organization of the Society, and the depression to all kinds of business resulting therefrom continued for some years thereafter. In Chicago it was felt with especial severity, and the efforts of the Bible Society no less than of everything else were for a time necessarily paralyzed. Even the freight on the books ordered by this Society remained unpaid, and they were held for some years by the forwarder until an efficient organization could put them in circulation.

The first order of the Chicago Bible Society after its organization April 7, 1840, amounted to \$99.73. In October, 1840, Lewis S. Swazey was employed as agent to visit every family in the city and county, to sell Bibles to those who were able to buy and to give to those unable or unwilling to buy. The agent was greatly surprised to find so many families destitute of the Bible, and it was not generally supposed that many families were destitute. An incident will illustrate the fact of this destitution and of the mistaken supposition with reference thereto. The agent met a non-professor of religion who declined to assist him in distributing the Bible among those who were without it, alleging that there were none of that class in his neighborhood. But finally upon the agent's persistency, the non-professor proffered to himself supply all in his neighborhood who might be found destitute. The agent soon found six families in the immediate neighborhood without the Bible. The work once begun, a thorough canvass of the county was soon accomplished, and the committee was enabled to report that every family in the county had been visited, and all who were willing to receive the Bible supplied with it. Mr. Swazey reported : "The general results are as follows : Cash received for Bibles sold \$76.89 ; cash received in donations to the Society \$61.73, making a total of \$138.62 received in cash. Bibles given to the destitute, value \$27.44, and subscriptions due the Society \$9.88."

The first annual meeting of the Society was held in the First Presbyterian church, December 9, 1841. From a report then made it appears that \$9.84 of the above \$9.88 had been paid in. And at this first annual meeting thirty dollars was raised to constitute Rev. Hooper Crews a life member of the American Bible Society ; the first contribution of the Chicago Bible Society to the American Bible Society. The report concludes in the following language :

"While the general aspect of the Bible cause in this part of the State is very favorable, and should call forth the thanksgiving of all who seek its advancement, there are still, as there ever have been, opposing obstacles to encounter. Those who reject the divine authority of the Bible, and yet see from history the mighty influence which this Book in all ages exerts, aim, of course, to impede its circulation. Those connected with the Papal Church, while they receive the Bible, and more than the true Bible as divine, are still with few exceptions unwilling to trust this Book to the common reader, unless guarded by comments which its Holy Author never sanctioned, and which the enlightened Christian rejects as a cunning device for the preservation of power. But there is much to encourage the Christian and the friends of the Bible in the prosecution of this work, that so many are willing and ready to engage in it, sustaining the committee in their operations by their purses and influence, and we but hope the interest will increase, and not die away as soon as the novelty of the enterprise is worn off."

The first exploration of the county, having for its object the supplying of the Bible to those destitute of it, and which was commenced in 1841, was completed in 1842. Somewhat more than seven hundred families were visited, ninety-two of which were found destitute of the Bible. In 1845 the second canvass of the county was made for the same purpose ; six hundred and sixty-six families were visited, and seventy-four found destitute. In 1846 the first visitation and supply of the city was made ; fourteen hundred and ten families and one hundred and eighty-five offices and stores were visited. Sixty-six families were found destitute, and eighty-two other families and persons so reported. These were supplied with Bibles and Testaments, likewise with Testaments two companies of volunteers for the Mexican War. In 1849 the city was again supplied, this time by Mr. Balch. Twenty-six hundred and sixty-eight families were visited, of which two hundred and ninety-five were found destitute. Ninety-six other families were found destitute and supplied by tract distributors and other persons. The next visitation of the city was made in 1851, in accordance with the following resolution :

"Resolved, That a more thorough and complete supply be furnished than has been hitherto ; that in addition to the supply of destitute families, the agent be instructed to search out and supply all unmarried persons over sixteen years of age, especially clerks, mechanics, journeyman, apprentices, sailors, boatmen, and domestic servants, with a Bible, and that all children under sixteen years of age who can read be supplied with a copy of the New Testament."

Mr. Hamilton and Mr. Thome were appointed agents to carry this resolution into effect. As agents they visited four thousand three hundred and eighty-two families, eight hundred and twenty of which were found destitute. Eleven hundred and ten adults were supplied with Bibles and six hundred and sixty-five children with Testaments. Of those found destitute and supplied nine hundred and fifteen families were Roman Catholics. Considerable opposition was manifested to the distribution of the Bible among the Catholics and some Bibles were reported as having been burned by them. The city was again visited in 1853, this time by Messrs. Oleson, Barth, McDevitt, and Hamilton. These gentlemen visited four thousand and twenty-one families—two thousand four hundred and forty-five Protestant and one thousand five hundred and seventy-six Catholic. There were found destitute one thousand one hundred and thirty-nine families, two hundred and forty-one of which refused to receive the Bible either by sale or gift. This canvass was continued into and completed in 1854. The total results of the canvass for the two years, were six thousand four hundred and thirty-nine families visited—three thousand four hundred and twenty-two Protestant and two thousand two hundred and seventy-six Catholic. Seventeen hundred and eighty-eight families were

found destitute. This unusually large number of destitute families is probably accounted for by the exceptionally large influx of emigrants during these years. During the year 1856 the city was visited for the fifth time, Mr. Adams and Mr. Hamilton being the colporteurs. They visited eight thousand four hundred and thirty families, finding one thousand four hundred and eighty-five destitute of the Bible. Of these one hundred and eighty-two refused to accept the Bible, even as a gift.

In the year 1843, the Society appears to have begun to supply with Bibles the hotels, jail, poor-house, vessels, etc., supplying during the year, besides the poor-house and jail, eleven hotels and thirty-one vessels; two hundred and fourteen Bibles and eighty Testaments, valued at \$117.30, being supplied to them and to twenty-one destitute families and individuals besides. In 1844, fifty-one vessels, nine Sunday schools, one hotel and forty-one destitute families and individuals were supplied. In 1845, four hotels, forty-one vessels and eleven Sunday schools were supplied, and in 1846 nine hotels, fifty-two vessels and ten Sunday schools. In 1847 an effort was made by this Society to procure the co-operation of similar societies in other lake cities and towns in effecting a general supply of all the vessels on the lakes with Bibles and Testaments. With this end in view, the following resolutions were passed, and a copy of them sent by the secretary to each of the Bible societies at Milwaukee, Detroit, Toledo, Sandusky, Cleveland, Erie, Buffalo and Oswego, together with the request that they would co-operate with the Chicago Bible Society in carrying them into effect:

Resolved. That in the opinion of the committee, it is exceedingly desirable that all steamboats and vessels on our lakes should be constantly and liberally supplied with copies of the Word of God, so that those who travel, and all who do business on these waters, may have free and easy access to it.

Resolved. That this committee will do their part for the accomplishment of this object, and that we hereby respectfully suggest to the Bible societies above named to supply the shipping belonging to their respective ports."

Only the societies at Milwaukee and Toledo responded to this request. Still the Chicago Bible Society continued its labors in this direction. In 1848 numerous vessels and canal boats and six Sunday schools, besides seventy-four destitute families and individuals were supplied. In 1849 three hundred and eighty Bibles were supplied to vessels, sailors and boatmen, in addition to those furnished to eight Sunday schools, the public school, jail and other institutions, and the secretary, by the direction of the executive committee, again corresponded with the Bible societies of the various lake cities and towns, with the same object as in 1847, receiving from several of them favorable responses. And the good work of distributing the Bible to all classes of those destitute of it, including public schools, Sunday schools, families, individuals, the poor-house, jail, hospital, hotels and vessels, with about the same average energy until 1857, the year of the panic, which is referred to below, and even then but a temporary and very slight check to the work was felt. In 1855 the railroad stations within the city limits were for the first time supplied, but not until 1874 were systematic efforts made to supply the trains on the various railroad lines centering in Chicago, and the stations outside the city limits. In 1857, correspondence was again opened with the other lake city Bible societies with reference to supplying all vessels and sailors engaged in lake commerce. This Society appointed Rev. J. H. Leonard, chaplain at the Bethel, to visit the sailors and supply Bibles.

BRANCH SOCIETIES.—The first branch societies were organized in 1847, when several of these as auxiliary to the Chicago Bible Society were organized, viz: Athens, Barrington, Blue Island, Hanover, Monroe, Salt Creek, Thornton and York. Cash subscriptions were paid into the treasury of this Society this year by these new societies to the amount of \$338. In 1849, an auxiliary society was organized in Lyons precinct, and during this year there was received from the precinct societies \$208.45. In 1851, the amount received from these sources was \$259.06; in 1852, \$287.04; in 1853, \$281.06; in 1854, \$272.18; in 1855, \$349.18; in 1856, \$636.85. At this time there were seventeen of these auxiliary societies organized. The following table shows the aggregate number of Bibles and Testaments distributed, with their value, together with the approximate total cash receipts of the society from 1841 to 1857 inclusive:

Years.	Bibles and Testaments Distributed.	Value.	Approximate Receipts.
1841.	\$114 17
1842.	134 15
1843.	434	282 80	\$492 90
1844.	2,600	559 72	798 63
1845.	2,119	579 66	878 94
1846.	2,528	680 22	972 47
1847.	2,145	439 42	841 08
1848.	2,251	608 33	1,505 84
1849.	3,569	900 48	1,548 75
1850.	1,960	456 61	927 52
1851.	4,133	977 94	1,774 98
1852.	1,670	470 71	1,544 85
1853.	4,179	1,288 61	2,566 95
1854.	4,006	808 44	3,366 34
1855.	3,686	1,129 56	3,537 91
1856.	7,582	2,447 77	6,447 74
1857.	8,003	2,095 68	6,190 48

This table shows a gradual increase in the number of Bibles and Testaments distributed and in the amount of money received. The receipts for 1857 were slightly less than in 1856. This diminution was caused by the panic of that year. The year was one of change and disaster in the commercial world, which caused great apprehension that the benefactions of the Society would be greatly diminished, and that it would be thus far less able to circulate the Bible. But the diminution in its receipts was not so great as feared, and the Society's work went on with its accustomed energy. Still there was one feature of the Bible cause which appears to have been especially noticeable at this time, and which caused considerable alarm to Mr. E. W. Towne, the Society's agent for the county. Mr. Towne closed his report thus:

"The most alarming fact was the apparent neglect of the Bible, and this even in families who call themselves Christians. The newspapers, the monthly, the flood of light literature poured upon us, is literally pushing the Bible out of sight. Almost without an exception I see unmistakable evidence of a disrelish for Bible reading, while I see periodicals and books at hand showing signs of being well read."

The Society's report then adds:

"May not this be a true picture of many families in the city as well as in the country? The possession of the Bible will not save the soul, or guide the inquirer. The Bible must be read and studied to obtain the full benefit which its possession implies." The report concludes: "If the Bible is the revelation of God's will to man, and the only revelation we shall have, how urgent then the duty to secure its widest circulation at home and abroad."

HISTORY OF THE PRESS.

A narrative of the history of the Press of Chicago is necessarily attended with the elaboration of a vast quantity of oral tradition and personal reminiscence, for which there is no documentary evidence; the great fire of 1871 having destroyed most of the printed records, and specific dates being impossible to obtain from the memory of individuals, where they are clouded by the events that have transpired during forty or fifty years. Insurmountable obstacles have been encountered, in the death of so many of those who filled the editorial chairs of the early periodicals, and, in numerous instances, after following a clue persistently and carefully, all attempt to obtain information has been rendered nugatory by the tombstone of the editor—a silent negative of all inquiry, a monument of the boundary beyond which the interrogatories of the interviewer can not extend. So much of the information obtained has been from contemporaneous notices in extant newspapers, either of publications projected or made, that specific dates are noticeable by their absence; and in the case of a publication to be made, it has occasionally been found impracticable to decide whether the issuance of the paper assumed form and substance, or remained inchoate in the mind of the projector. Other information having been taken from directories, it has been impossible to decide the longevity of the paper, or magazine, or its precise date of publication: and even where isolated numbers have been exhumed from the ashes of the great fire, the date of the suspension of the periodical could not be definitely ascertained.

The first utilization of the inventions of Cadmus and Faust in the city of Chicago was by John Calhoun, who issued the Chicago Democrat, from a building at the corner of Clark and South Water streets, on the 26th day of November, 1833. Through the courtesy of Mrs. Pamela C. Calhoun, widow of the original publisher, we are permitted access to an antobiographical sketch of the founder of Chicago journalism; a document never before made public. As many of the statements therein contained relate more directly to the condition of the village in early times than to the topic whereof we write, liberty has been taken to classify the information; embodying the general matters in that portion of this work which treats of the settlement of the region, and retaining in this chapter only so much as pertains to Mr. Calhoun's work as a newspaper man, prefacing the record of his actions here with a biographical account.

JOHN CALHOUN was born at Watertown, N. Y., April 14, 1808. His parents were natives of Connecticut, but were among the earliest settlers of Jefferson County, N. Y. The father of Mr. Calhoun was a carpenter, and the son, in boyhood, became an adept in that business, preferring mechanical to intellectual pursuits. At the age of sixteen, however, John entered the printing-office of W. Woodward, who had just commenced the publication of the Watertown Freeman, and therein learned the printer's trade. When twenty-one years old, Mr. Calhoun went to Albany, N. Y., and was engaged in Starr & Little's type foundry for a few weeks; then, the nomadic spirit being strong upon him, he went

to Troy, where he worked for a short time on the city directory. From that city he returned to Watertown, and resumed his former position in the office of the Freeman. He also worked in the office of Richard Oliphant, in Oswego, for a brief period. In the summer of 1831 Mr. Calhoun purchased the materials for a job printing office, and entered into partnership with W. Woodward. The Freeman was an organ of Democratic principles, and soon after the association of Woodward and Calhoun dissensions occurred in party lines which necessitated the sale of the paper to other parties. As

John Calhoun

Mr. Calhoun's interest did not extend to a controlling degree, the transfer left him unprovided for. Acting upon the advice of Hon. Perley G. Keyes, Mr. Calhoun purchased additional materials and established the Watertown Eagle. This venture was not fortified with sufficient financial strength to insure success, and the paper was sold to Alvin Hunt, in whose hands it enjoyed a long and prosperous existence. In 1833 Harlow Kimball, brother of Walter Kimball, formerly Clerk of the County Court of Common Pleas, visited Chicago, and on his return to the East, gave such glowing accounts of the Western country, particularly of

Chicago, that Mr. Calhoun decided upon removing to this place. On the 21st of September, 1833, he proceeded by the most expeditious route to Chicago, which then was by steamboat from Buffalo to Detroit, and thence by stage. The steamer upon which he took passage encountered a terrific gale on Lake Erie, and was, after being twice driven back, at last headed for Black River harbor, where she stuck upon a bar which had formed at its mouth. Her floatage being a matter of uncertainty, Mr. Calhoun, in company with other passengers, debarked and went on foot to Huron, a distance of about twenty miles. After remaining there two days, a schooner was chartered to convey the party to Detroit. From that place the journey was continued by stage, across Michigan and Indiana, by the slow conveyances of the period. The printing materials were safely bestowed on Newberry & Dole's log dock, when Mr. Calhoun arrived; the freight having come by way of the lakes, on a sailing vessel. Three weeks' time was consumed in the voyage from Sackett's Harbor, and the same period was required to reach this place by land. Two apprentices, whose names are not now remembered, had evidently accompanied the materials from the East; for Mr. Calhoun, in the autobiography, writes of finding them at the "Travellers' Home," then kept by C. Ingersoll, on Wolf Point. An office was secured in a building on the southwest corner of South Water and Clark streets, which was unfinished at the time. Mr. Calhoun assisted in the work of lathing the room, and, during the evenings, held a light by which Ashbel Steele could see to lay on the rough plaster.

Mr. Calhoun was an ardent admirer of Andrew Jackson, and a pronounced Democrat of the school which claimed that sturdy soldier as their pattern. The proposed paper was, therefore, named the Chicago Democrat. On the 26th day of November, 1833, the first issue appeared. It was a six-column folio, measuring twenty by fifty inches in size. Its motto was, "Where Liberty dwells, there is my country."

Mr. Calhoun was not possessed of great wealth, and feelingly writes of his financial embarrassments during those days of struggle. He expresses himself under obligation to T. J. V. Owen for substantial encouragement. As an evidence of the meager support then obtainable, the appended list of subscribers to the Democrat, taken from the original book, tells a story which newspaper men of the present day will appreciate; as well as furnishing a valuable register of citizens in 1833:

In the inaugurate number Mr. Calhoun demonstrated the platform the paper would occupy under his management in a clear manner, announcing his faith in the principles of the Democratic party, unbiased by prejudice. The importance of the contemplated canal or railroad between Lake Michigan and the Mississippi River was appreciated, and the paper was pledged to favor the enterprise. As a local index, a list of the advertisers during the first three issues of the Democrat is here given: In the first number of the paper are advertisements of the 'Traveller's Home, kept by C. Ingersoll; powder and belts for sale by John Bates, Jr., at the post-office; hardware, crockery, boots and shoes, stationery, tinware, etc., for sale, and a house to let by

*This subscription list is copied verbatim from the original account books in the possession of the Chicago Historical Society.

John Wright ; an ox wagon for sale by C. H. Chapman ; drugs and medicines by Philo Carpenter ; dry goods, crockery, hardware, etc., by W. Kimball ; forwarding and commission by Newberry & Dole ; winter clothing, provisions, groceries and liquors by P. Cohen ; groceries and liquors by S. Foot ; grocery and provision store and forwarding and commission store by B. Jones ; sale at auction of oxen and wagons by the United States authorities at Fort Dearborn ; saddle and harness making by Goss & Cobb ; blacksmithing by Mathias Mason ; dry goods, crockery, leather, etc., for sale by C. & I. Harmon ; soap and candle manufactory, by Daniel Elston & Co. ; \$25 reward for a stray horse, by P. Maxwell ; stray pair of oxen, information wanted at the post-office ; two estray notices by R. J. Hamilton, Clerk of the County Court of Cook County, also the village ordinances passed November 7, defining the limits of the corporation and giving the names to Madison, Monroe, Adams and Jackson streets, signed by T. J. V. Owen, president, and Isaac Harmon, secretary.

In the second number appear the advertisements of Brewster, Hogan & Co., forwarding and commission merchants and dealers in dry goods, groceries and hardware ; flour for sale by Daniel Carver ; dry goods, hardware, groceries, etc., by P. F. W. Peck ; groceries, hardware, crockery, drugs and medicines by P. Prutne & Co. ; horses wanted by John T. Temple ; corn for sale by Richard M. Sweet ; butchering by A. Clybourne ; Chicago English and Classical Academy, by G. T. Sproat, preceptor ; and a caution against cutting timber on Government lands, by H. T. Handy, assistant superintendent Chicago harbor.

The third number contained the following additional advertisements : J. D. Caton, attorney and counselor at law ; \$10,000 to loan by R. J. Hamilton, commissioner of school lands for Cook County ; J. H. Kinzie, forwarding and commission merchant ; auction sale, by James Kinzie, auctioneer ; pocketbook found, by J. Mann ; new blacksmith shop, by Pierce & Abbott ; a bakery, by John Wellmaker & Co. ; Giles Spring, attorney and counselor at law ; boot and shoe making, by L. W. Montgomery ; administrator's notice, by J. B. Beaubien, public administrator ; a public house at Flag Creek, by E. Wentworth ; and J. B. Beaubien cautions all persons against trespassing upon fractional Section 29, Town 39, Range 14, commonly called "Hardscrabble," as such offenders would be severally prosecuted "without any regard." During December, 1833, a Mr. Lincoln, tailor by trade, erected a shop on the south side of Lake Street, near LaSalle, which spot was then considered out on the prairie ; hence he received the sobriquet of "the Prairie Tailor."

Illustrative of the news facilities of the period, it is mentioned that the annual message of President Jackson was not received for publication until December 31, 1833, or nearly one month after its delivery.

Mr. Calhoun was married at Watertown, May 31, 1832, to Miss Pamela C. Hathaway. Mrs. Calhoun did not accompany her husband to Chicago, but in the spring of 1834, after the measurable comforts of a home in the new village had been provided, she joined him here, and was intimately identified with the early history of the Democrat, by assisting in proof-reading and the business of the office.* When jobs were printed on the hand-press she would smooth out the deep "impression" with a hot sad-iron.

The Democrat was designated the official paper of

* Alvin Calhoun, brother of John, came to Chicago in company with Hibbard Porter, June 12, 1834, from Sackett's Harbor, on the schooner "Hiram," Captain Bassett, master. He died June 28, 1849. Of his children Mrs. J. K. C. Forrest, Captain W. A. Calhoun and Francis C. S. Calhoun are still living (1883).

the town of Chicago and the first order made for the publication of a corporation notice May 9, 1834. The advertisement was an announcement that a fine of \$5.00 would be imposed upon any one who should ride or drive over a bridge faster than a walk ; and there being no policemen in those days, one-half of the fine was to be given to the informer.

In November, 1834, the printing office was removed to above the hardware store of Jones & King, a few doors below its former location. The mail service had so far improved during the year that the presidential message was published December 23. But misfortune overtook the Democrat. The needed supply of paper failed to arrive before the close of navigation, and the issuance of the journal was compulsorily suspended from January 1, 1835, until May 20 of that year, with exception of one issue January 21 and another on March 25. It was impossible for a pioneer editor to endure the expense attending the shipment of stock by land routes, even when carriers were found willing to transport the load.

The monopoly enjoyed by Mr. Calhoun, as the sole occupant of the journalistic field was broken in the summer of 1835 by T. O. Davis, who established a Whig paper, called The American. The census of that year showed a town population of 3,279, and a county population of 9,773. Mr. Calhoun met his rival with a re-enforced power, by employing James Curtis, subsequently Mayor of the city, as editor of the Democrat. Dr. Daniel Brainard was also editorially associated with the paper at an early date. On the 17th of August, 1836, the Democrat was enlarged to a seven-column folio.

As early as May, 1836, Mr. Calhoun, from personal motives, determined upon disposing of his paper, and retiring from the profession. Several leading Democrats, among whom were J. D. Caton, E. Peck, H. Hugunin, and J. C. Goodhue, in order to secure a controlling interest, proposed to make the purchase, and furnished the credit which enabled the enlargement of the paper, as before stated, but the sale was not consummated.*

An arrangement was then made with Horatio Hill, brother of Hon. Isaac Hill, whereby he, on the 16th of November, 1836, took possession of the Democrat, and after placing Hon. John Wentworth in charge of the same until his return, left for the East, but never returned to Chicago. This is Mr. Calhoun's statement. Mr. Hill returned to Chicago subsequent to 1857.

It was only upon the return of the draft protested from New York, that Mr. Calhoun found that he had not sold his printing office. Mr. Wentworth, then in charge of the office, being anxious to purchase, and consenting to assume all payments that Mr. Hill had agreed to make, became the purchaser, and in the course of the next four years liquidated the debts owing to Mr. Calhoun.†

Digressing from the main theme, we here insert the remainder of Mr. Calhoun's biography, before continuing the history of the Democrat under its new management. In the spring of 1837, the County Commission-

* The issues of November 2 and 9, 1836, were reduced to six columns per page, because of a failure of the paper supply.

† Mr. Calhoun's statement does not convey the exact conditions of the case. Mr. Hill actually had no proprietary control of the paper, as that interest was to be transferred when the first payment was made. He had but the refusal of the paper ; and upon his failure to fulfill the provisions of the agreement whereby the paper was to have the proprietorship vested in him, Hon. John Wentworth (then twenty-one years of age), was solicited to take the paper by a number of the leading citizens of Chicago, which he did ; thus the editorial succession of the first paper of Chicago passed from John Calhoun to "Long" John Wentworth, without any lapse or hiatus. Mr. Wentworth having "sat at the receipt of custom," during the time that Mr. Hill was doing nothing to signify his acceptance of Mr. Calhoun's proposal to sell the Democrat to him. This fact is shown in Mr. Calhoun's valedictory.

Chicago Morning Democrat.

ers, having the appointing power, made application to Mr. Calhoun to accept the appointment of County Treasurer, which he did, and made the assessment for 1837 and 1838; DuPage then being a part of Cook County. That winter, the Legislature having revised the revenue laws and created the office of County Collector, whose appointment was vested in the County Commissioners, Mr. Calhoun was appointed for each of the years, 1839, 1840, and 1841. In the years 1841 and 1842, he was solicited and elected an Alderman of the Second Ward and rendered the city efficient service in reviving its credit, which was very low, and in securing to the city its cemetery grounds. In 1845 Mr. Calhoun went into the hardware store of Ira B. Eddy, and the next year was to have been a partner, but in 1846 Mr. Eddy decided to close his business, and finally sold the balance of his stock to Joseph Matteson, with whom Mr. Calhoun entered into co-partnership in August, 1847, continuing in the business until 1849. His health not being good, and he requiring an active, out-door existence, Mr. Calhoun applied for and obtained employment in the purchase of the right-of-way of the Illinois Central Railroad, continuing therein from the fall of 1851 until the spring of 1854. In the summer of 1854 Mr. Calhoun accompanied the Hon. C. C. Washburn to Georgia, hunting out the "wild-cat" banks in that State. From the autobiography is quoted the following paragraph, which reveals much to those who would study the character of this man:

"During the past season [1856] Mr. Calhoun's health has been such that it would not warrant him in engaging in any business. Being what may be called an old foggy, so far as real estate is concerned, though seeing in the past what Chicago was, in the present what she is, and from both what she is to be in the future, he nevertheless thinks that it is not impossible that we may yet see another revulsion like that of 1836. Mr. Calhoun has never had any great ambition to be rich, and thus far all his aspirations in this respect have been realized. Although not having accumulated much property, he feels that he is far richer than many who could, at the present time, buy and sell him a dozen times. Of late years he has felt the want of riches more for the good he could do with it than for any benefit to be derived to himself in its possession."

Mr. Calhoun died February 20, 1859.

The gentleman upon whom the editorial toga descended, and whom the inhabitants of Chicago are so accustomed to associate with the history of the city—Hon. John Wentworth—graduated at Dartmouth College, N. H., in August, 1836, and reached Chicago on the 25th of October of that year. Mr. Wentworth states that the Democrat was owned in shares by a great many people, and that he was induced by them to take the paper and buy out their shares. This he achieved in about three years from the time of his taking charge, at a cost of about \$2,800. The first number of the Weekly Chicago Democrat issued under his administration was on November 23, 1836, being Volume I, Number 1, of the New Series, and Volume III, Number 31, of the Old Series. Mr. Wentworth, who was twenty-one years and eight months old at this epoch of his life, was a law student in the office of Henry Moore. O. S. Lincoln, now residing at Waukegan, was Mr. Wentworth's roller boy, and the first newspaper carrier in the city. The earliest number of this issue known to exist is in Mr. Wentworth's possession and bears date August 16, 1837, Vol. IV, No. 15, Old Series, Vol. I, No. 37, New Series.

The Democrat was chosen, May 8, 1837, corporation

newspaper, by the Council, on the establishment of the city government.

Incidentally it is remarked that, in 1838, while Hon. Stephen A. Douglas was in the city, he desired some hand-bills printed, to announce that he was in the field. Application was made to Mr. Wentworth for the print-

JACKSON HALL.

(Fac-simile of Cut in Early Issues of the Democrat.)

ing, but the facilities of the office were limited. In order to expedite the issuance of the notices, Mr. Wentworth worked the hand press and the "Little Giant" performed the menial office of roller-boy, inking the types.

Mr. Wentworth determined to establish a daily paper in time to precede the municipal election in the spring of 1840. That being the year of the presidential election, it was deemed of the highest importance by both parties to influence public opinion and secure votes

for the municipal candidates of their respective parties, that a victory in the presidential election of the ensuing November might thereby be presaged. For this reason Mr. Wentworth started the Chicago Morning Democrat. During that time the other city papers had changed their names, but the Democrat retained its cognomen from the time of its birth, in 1833, until its discontinuance in 1861; and from the period of its inauguration until the close, was what was known as a "Hard Money Paper" of the Jackson and Benton stamp. That financial question was presented to the people at every election. The daily issue was eleven and one-fourth by seventeen and one-fourth inches in size, and was issued on February 24, 1840, from the third story of 107 Lake Street.

Daniel M. Bradley became associated with the Democrat October 9, 1840. He was a practical printer and of value in his position because of his mechanical knowledge. Mr. Bradley died in 1857.

The growth and development of the Democrat was coeval with that of the city, and in all questions of municipal, State or federal polity, the voice of the paper was an important factor in moulding public opinion, and its enunciations were never characterized by diffidence or instability.

In 1844, George W. Wentworth acted as assistant editor. In 1846, the issue was changed from morning to evening. September 24, 1847, the office was removed to Jackson Hall, on LaSalle Street. As an evidence of the enterprise of those days, the fact is stated that the President's message was hurried through from Mottville, Mich., a distance of one hundred and thirty miles, in nine hours; thirty-six hours ahead of the mails; and the Democrat was enabled to anticipate its publication in other journals, December 15, 1847. The first special newspaper telegram to the Democrat was received Sunday, April 9, 1848, and published the next day.* Joseph K.C. Forrest became assistant editor in 1847, and William Osman, now of the Ottawa Free Trader, in 1853, filled that position.

During the remainder of the period treated of in this volume the Democrat pursued the even tenor of its way, gaining in circulation and potentiality, and proving itself an extremely profitable investment to its proprietor.

THE CHICAGO AMERICAN.—The second newspaper established in this city was the Chicago American, which was first issued as a weekly newspaper on Monday, June 8, 1835, by T. O. Davis. The size of its pages was fifteen and one-half by twenty-one and one-half inches, containing six columns. The issue was announced as to be made Saturday morning, the second and subsequent numbers being issued on that day. The date under the caption of the first issue is given as May 8, 1835, but in the editorial column is a statement that by an error of the printer May was inserted instead of June. The place where the office was situated is not given, but in an advertisement of Frederick Thomas, he states that he is on Water Street, near the drawbridge, two doors from the American office. Like the Democrat, the American pledged itself to the work of internal improvement, but differed in political creed from its contemporary, and was hostile to the dominant party. It declared that "office-holders are not of right, and should not be the masters, instead of the servants, of the people." The advertising patrons were: R. Stewart, A. N. Fullerton, Grant Goodrich, attorneys; J. H. Barnard, physician; J. C. Bradley, dentist; Will-

iam Sabine, commission merchant; John Davis, Steamboat Hotel; W. L. Newberry, real estate; E. Brown, painter; S. B. Cobb, saddler; Harmon, Loomis & Co., merchants; J. H. Kinzie, merchant; Newberry & Dole, steamboat agents; Tuthill King, clothier; Russell Clift, bookseller; Frederick Thomas, druggist; E. K. Hubbard, real estate; Philo Carpenter, merchant; J. & W. Crawford, brewers; and John Holbrook, clothier.

The American had its outside dated December 26, 1835, in the issue purporting to be of that date. It was, however, issued December 25, as is stated on the inside pages, in order that the public might receive the President's message (printed in that number) as soon as possible. This number is an instance of a common custom in those early days, which was to print the outside sometime previous to the date of issue, and leave the inside to be struck off when it was required. In the number just proceeding the close of the first volume, it is announced that a semi-weekly issue will also be made with the commencement of the new volume. On October 15, 1836, the American displayed an eagle, between the words "Chicago" and "American," on its heading, with a scroll in its beak and the motto hyphenated on the scroll, "E Pluri-Bus Un-um." June 3, 1837, T. O. Davis states that he is desirous of selling one-half the American "the whole would be sold if wanted;" and another notice in the same paper (Vol. 2, No. 52), remarks that "the stock of paper laid in last fall is exhausted, in consequence of the subscription list having augmented more rapidly than was anticipated," and he will be compelled to suspend the paper for one or two weeks. A hiatus here occurs in the files. The next number (and the only one known to be extant between Vol. 2, No. 52, and the number next hereafter adverted to), is under the publishing and editorial management of William Stuart & Co., dated Saturday morning, October 14, 1837, and is No. 13 of Vol. 3. If the issue was uninterrupted from the resumption, when paper was received and re-publication made, the first number of the third volume should have been on July 22, 1837. But a salutatory in this number says:

"In reviving the Chicago American, which our friends must, by this time, be generally aware has been suspended for a short time for want of paper, we deem it our duty, as well as our interest, to present a few remarks as to the circumstances and prospects under which we again commence our labors. The Chicago American is now issued under a new proprietorship and under such circumstances as we trust will assure its permanent usefulness and prosperity."

Hence the most rational inference is that with this number William Stuart & Co. inaugurated their proprietorship of the paper; and an additional reason is found for this assumption, in the notice of the dissolution of the law-partnership existing between William

Stuart and James Curtiss, dated October 14, 1837, and the continuance of the law business by the former, at his new office, in the rear of the Chicago American office, corner of Clark and Water streets. The next

* Telegraphic communications with Detroit began April 6, 1848. See that topic elsewhere.

attainable number is that of Friday, July 17, 1840, Vol. VI., No. 1, William Stuart, editor, with office at the same place, and the paper is designated The Chicago American, prior to which date the daily issue had been established. On July 24, 1840, a notice is published and continued through several numbers, wherein it is stated that to give every inducement for the payment of accounts and more extensive circulation of the American, butter, eggs, flour, wood, and produce generally will be received at the office, at market prices, if delivered soon. But as the history of the Weekly has now become merged in the history of the Daily American, no future reference will be made to the former issue of the paper.

The Chicago Daily American was issued from the office of the Weekly Chicago American, by William Stuart, on the ninth day of April, 1839, in the third story of Harmon & Loomis's building, at the corner of Clark and South Water streets, and was the first daily newspaper issued in Chicago, and in Illinois. The size of the page was eleven by sixteen and three-fourths inches. On December 20, the American was issued as an evening paper.* May 11, 1840, the editor was fined \$100 by Judge John Pearson, of the Circuit Court, for contempt. July 28, 1841, William Stuart was appointed Postmaster, and relinquished his editorial work here. October 9, of that year, Alexander Stuart became proprietor, with W. W. Brackett editor. July 20, 1842, Buckner S. Morris bought the office. Mr. Brackett retired, and on October 18, 1842, the Daily American ceased.

THE CHICAGO EXPRESS was first published by William W. Brackett, from 92 Lake Street, on October 24, 1842, and was a daily afternoon paper, with a weekly edition published Tuesdays. It was a continuation of the old Daily American, and mounted the legend "For President, Henry Clay," at the head of its editorial column; and this fact will explain Mr. Brackett's retirement from

Wm W. Brackett

the American. The Express was a five-column folio, thirteen by nineteen and a half inches in size. It was maintained until April 20, 1844, when it was sold to a company of gentlemen for \$1,500, among whom were George W. Meeker, John Frink, Buckner S. Morris, Jonathan Young Scammon, S. Lisle Smith, Jacob Russell, Walter R. Newberry, Giles Spring, Grant Goodrich, and George W. Dole. The office was then situated, it is stated, in the third story of A. Rosseter's block, 82 Lake Street, opposite the Tremont House. The weekly edition, together with the daily, was discontinued.

THE CHICAGO DAILY JOURNAL was first issued on April 22, 1844, by an editorial committee composed of William H. Brown, George W. Meeker, Jonathan Young Scammon, S. Lisle Smith and Grant Goodrich; said committee having been appointed by the association that purchased the Daily and Weekly Express. The editorial management was entrusted to Richard L. Wilson and J. W. Norris, who were also its publishers, and these gentlemen advocated those Whig principles that became as much a part of the Journal as its subscription list. The paper was published from the old office of

* On June 6, 1840, William Stuart issued from the office of the Daily American, a weekly campaign paper called the Hard Cider Press. It was a strenuous supporter of Harrison and Tyler, uniform in size with the Daily American, and ran until October 24, 1840.

the Express for a few months, when it was removed to the Saloon Buildings, on the southeast corner of Lake and Clark streets. After the defeat of Henry Clay by James K. Polk, Mr. Norris withdrew from the paper and Richard L. Wilson, the pungent paragrapher, continued it alone. In the volume for 1845, the number for October 30th is numbered 254 that for October 31st is 155, the serial numbers being continued from the latter number. On December 29, 1845, Nathan C. Geer (who had previously been in charge of the press-room), was associated with Mr. Wilson, as editor and publisher, and on January 6, 1846, the caption that had been printed in Old English disappeared and plain English letters took its place. September 27, 1847, the co-partnership between Messrs. Wilson & Geer was dissolved. Richard L. Wilson continued the paper alone until he was appointed Postmaster by President Zachary Taylor in 1849. In December, 1847 Benjamin F. Taylor, who is alleged to have been the first dramatic critic employed upon a Chicago newspaper, retired from the Journal force, with which he had been a long time connected, but subsequently renewed editorial labors on that paper. The Journal of April 5, 1848, announced that "the telegraph wires are at last all up to Detroit, but no communication has as yet been received beyond the South Bend," and the issue of the 6th thus comments upon a statement in the Democrat of the same date, to the effect that "the first flash from Detroit traveled along the line yesterday." "The Democrat forgot to add that the 'flash' came 'along the wires' by stage from Kalamazoo. No communication passed on the wire yesterday from Detroit, Niles being the farthest point reached." In this issue (the 6th of April), however, the Journal says: "The first flash came through from Detroit this morning at 9 A. M. By the dispatches it will be seen we have dates from New York of yesterday at 2:30 o'clock."

Richard L. Wilson, whose health was seriously impaired by the premature discharge of a cannon, which he was helping to fire, on the 3d of April, 1847, in honor to the victory of Buena Vista, retired from the Journal on the 10th of February, 1849, and was succeeded by Charles L. Wilson. On the 8th of March, that year, George E. Brown became one of the publishers, and in July the offices were removed to the Journal building, 107 Lake Street. In September Mr. Brown retired. January 2, 1851, the editors were Richard L. Wilson and Charles L. Wilson, the former gentleman having

Charles L. Wilson

been removed from his position in the post-office department by President Millard Fillmore. January 26, 1853, the paper was published by R. L. and C. L. Wilson and R. H. Morris, and was called the Daily Chicago Journal. December 1, 1853, the publishing office was removed to 50 Dearborn Street, opposite the Tremont. On December 2, 1854, Mr. Morris retired from the editorial and publishing department of the paper, leaving R. L. and C. L. Wilson as editors, and C. H. Peirce associated with them in charge of the business department. January 4, 1855, the paper was denominated the Daily Chicago Journal, while on February 10, the title was transposed again to the Chicago Daily Journal, from a font of shaded Old English text; and in 1856 the name of the paper was The Chicago Daily

Journal. In December, 1856, Richard L. Wilson died, and the firm became C. L. Wilson and C. H. Peirce. At this time Andrew Shuman was associate editor, Benjamin F. Taylor literary editor, and George P. Upton city and commercial reporter. In 1857 the Journal had a severe struggle for existence, but it was evidently the ebb-tide of its prosperity, which was successfully "taken at the flood" that has since "led on to fortune."

THE FIELD-PIECE, a campaign paper, was issued from the office of the Journal about June 10, 1848, as an advocate of Whig principles and the claims of General Zach Taylor and Millard Fillmore to the Presidency and Vice-Presidency. It was continued weekly during the campaign.

Hooper Warren, the indefatigable and earnest abolitionist, issued the first number of the CHICAGO COMMERCIAL ADVERTISER, on October 11, 1836, as a weekly paper, of which Edward H. Rudd was the printer; the office being located on Dearborn Street, near South

H. Warren

Water. The paper was a "liberty" paper, and lived about a year. Mr. Warren subsequently moved to Lowell, LaSalle County, and with Zebina Eastman published the Genius of Liberty, also an anti-slavery paper, in January, 1841.

On April 4, 1840, appeared THE WEEKLY TRIBUNE, published by Charles N. Holcomb & Co., in the third story of the Saloon Buildings, corner of Lake and Clark streets. The pages of the paper were eighteen by twenty-four and three-fourths inches in size. Of this

E. G. Ryan

newspaper, the first to be called the Tribune in the United States, Edward G. Ryan, subsequently Chief Justice of Wisconsin, was editor; and it is said of this gentleman that he was one of the very ablest writers ever in Illinois. The Tribune was of an excellent typographical appearance, and was a decided credit to its management during those early days of journalism. In the early part of 1841 the forms were sold to Colonel Elisha Starr, of Milwaukee, and the Milwaukee Journal arose from the debris of the Tribune. Jonathan Carver Butterfield, one of the oldest printers in the city at the time of his death, July 7, 1854, worked on this paper and K. K. Jones was roller boy and carrier.

THE UNION AGRICULTURIST AND WESTERN PRAIRIE FARMER was inaugurated in January, 1841, by the Union Agricultural Society, incorporated February 19, 1839, and to which act of incorporation an amendment was made, approved January 31, 1840. The first trustees of the society were Abraham Holderman, Levi Hills, Joshua Collins, Salmon Rutherford, S. S. Bullock, David Shaver, B. H. Moores, S. Delano, Benjamin B. Reynolds and Henry Green, of LaSalle County; Holder Sisson, Calvin Rowley, J. A. Gooding, William Smith, William B. Peck, Reuben Beach, John Blackstone, Charles Reed, Cornelius C. Van Horn and John Dean Caton, of Will County; William B. Ogden, Joseph Naper, Socrates Rand, E. Peck, Lewis Ellsworth, Seth Johnson, William P. Caton, R. A. Kinzie, Russell Whipple and J. S. Wright, of Cook County; Isaac Hicox,

Matthias Mason, Arthur Patterson, Mr. Bartlett, J. G. Rogan, William Jackson, Seth Washburn, Joseph Wickham, Ziba S. Beardsley and Willard Jones, of McHenry County; General McClure, James T. Gifford, Colton Knox, Rice Fay, Ira Minard, Isaac Wilson, John R. Livingston, R. C. Horr, Mr. Risk and Joel McKee, of Kane County. Under the auspices of this society THE Union Agriculturist was issued, with John S. Wright, the corresponding secretary, as editor. The officers of the society, who were the official publishers of the Union Agriculturist, were: John Dean Caton, of Will County, president; Levi Hills, of LaSalle County, Holder Sisson, of Will County, Lewis Ellsworth, of DuPage County, James T. Gifford, Kane County, Seth Washburn, McHenry County, vice-presidents; William B. Ogden, Cook County, treasurer; John S. Wright, Cook County, secretary. The motto displayed at the head of the editorial column was, "In Union is Strength." There were two numbers issued, as a species of prospectus; prior to the issuance of the volumes hereafter described, and this led to the designation of the continuous issuance as the new series. These two numbers were evidently but a tentative issue, and, the journal meeting with a favorable reception, the management state that, "it was with fear and trembling that the enterprise was entered upon, but it is continued with the most perfect assurance of success." It size was fifteen and one-half by ten and three-fourth inches, eight page, of four columns. The journal was, as its name implies, devoted to agricultural, arboricultural, horticultural and pastoral interests, with the customary corner for the instruction of the Priscillas of the household. The articles in this number are ably edited and exhibit care and skill in their preparation. The typography is very creditable to Holcomb & Co., printers, Saloon Building. It is generally conceded that John S. Wright was the ablest agricultural editor of the age, but he was many times termed visionary for the utterances he made predicting the future of the city; yet these predictions have been dwarfed by its actual advance in trade, wealth and population. In October, 1841, the officers were changed, the new regime being: James T. Gifford of Kane County, president; Lewis Ellsworth of DuPage, Theron D. Brewster, LaSalle, William Smith, Will, Seth Washburn, Lake, vice-presidents; E. W. Brewster, Kendall, treasurer; John S. Wright, Cook County, secretary. In January, 1842, the size of the paper was increased to twelve pages and miscellaneous advertisements were inserted. Volume III, No. 1, January, 1843, was issued by J. S. Wright, editor and publisher, at 112 Lake Street, and John Gage, editor of the mechanical department. The name of the publication is, in this issue, simply Prairie Farmer, and it is made in magazine form of seven and one-half by ten and one-

John S. Wright

half inches, containing twenty-four pages, two columns to the page. In July, 1843, J. Ambrose Wight was associated with Mr. Wright in the editorial work. In October, 1844, the office was removed to No. 65 Lake Street. During the years succeeding prior to 1858, the editorship and proprietorship of the paper were substantially vested in J. S. Wright, J. A. Wight and Luther Haven, with several transpositions of authority. The horticultural department being conducted by John A. Kennicott.

DAILY AMERICAN. TUESDAY EVENING, APRIL 6, 1858.

TO THE PUBLIC.

In the progress of this movement, we this day present to the Queen City of the State the first daily paper ever issued in Illinois. We commence...

Through the air, the ocean and the earth, All matter's quick and burning into birth. To these friends and patrons who have testified the sincerity of their wishes for its commencement and success...

CONTRACTS AT CHICAGO.—When we consider the comparative infancy of Chicago, the extent of commerce which she has already enjoyed, and the prospects of its rapid increase...

CONTRACTS AT CHICAGO.—When we consider the comparative infancy of Chicago, the extent of commerce which she has already enjoyed, and the prospects of its rapid increase...

SECRETARY OF STATE.—Col. J. A. McClelland, appointed by the Governor during the session of the Legislature, Secretary of State, and reported by the Senate on constitutional grounds...

SALE OF STATE BONDS.—The Board of Finance Commissioners has notified the sale of Internal Improvement Bonds to the amount of \$750,000. It thinks it an error to say...

TO SUBSCRIBERS.—All those who read the Daily, may at their option discontinue the Weekly, and have the amount, if any, left them on the weekly, credited on their subscription to the Daily. We should much prefer this arrangement...

THE STATE BANK OF ILLINOIS.—The bank and its branches have been finally marked by Secretary Woodbury, one of the Government deposit banks. It will therefore receive on deposit the \$500,000 taken at the Milwaukee fund...

REBELLIOUS BUSINESS.—Our wharves are becoming a business appearance. Our barge and inflatable boats are preparing their crews that have wintered with us, for their home upon the deep...

TAYLOR AND GROCERY LICENSES.—We publish, in full, an Act regulating Taylor and Grocery Licenses. We particularly refer our readers and civil authorities to the last section thereof.

BOOKS.—On the morning (Friday last) one of the prize books of Cook County, by J. H. Wright, has been offered by James R. Carter, Esq.

approach of a paper in Cook County, and we are glad to see it in the hands of the public.

THE KITCHENBOARDS.—The March number of this unrivaled, lively, periodical has come to hand. It is graced with the first number of the Croyen paper, by Washington Irving, who is to be hereafter one of the regular contributors.

THE BROADWAY TROUBLES.—The Buffalo Commercial Advertiser of the 28th March last gives the following latest intelligence.

The correspondent of the Boston Atlas, writes from Augusta, March 20, that resolutions in relation to the border troubles, and the disputed territory, had excited much discussion in the House, they having previously passed the Senate.

These resolutions are firm but conciliatory in their tone and language, and show that Maine, being anxious to come to an amicable adjustment of the whole controversy, will forgo to enforce her jurisdiction in that part of her territory, the possession of which is now asserted by the province of New Brunswick, so far as she can do so consistently with the maintenance of the treaty of 1763.

RELIEF LAW.—We last week published a bill for the relief of the purchasers of canal lots which should have been passed as an act, but was not. It was merely talked about. We mention this to correct the erroneous impression entertained by some of our readers, that this act was really passed by the late legislature.

who are erected, would probably be deferred till some season on account of the deficiency of materials. They have in St. Louis the "Go ahead" spirit—and waisy address to them.

Can any one furnish us with the Act crossing Lake County. We have been requested to publish it, and will do so as soon as we can obtain a copy.

TO CONTRIBUTORS AND OTHERS.—As we wish to make our paper what its name imports, a news paper, we shall always be very thankful to our friends for any information which they may from time to time furnish us, interesting to our readers. An editor, in fact, should possess the power of ubiquity and intuition, but as he is not thus blessed above his fellows, he must depend like others on the usual sources of intelligence.

MISER'S BANK OF ILLINOIS, IOWA.—We saw, by an advertisement dated, Cincinnati, Feb. 19, 1853, that the notes of this bank payable at the Mechanics and Traders Bank of Cincinnati, are redeemed at par, and such of their notes as are payable at the Banking House at Delaware, are redeemed at two per cent discount. This advertisement is issued by Wm. H. Rouse, Cashier of the Mechanics and Traders Bank.

Wanted at the Daily American office a good number of yearly advertisers. Advertisements are the main support of a commercial paper, and without them it soon becomes a reading sheet. Subscribers, however, are ever highly welcome, especially people.

SHIRT PAPERS.—The following appropriate and judicious comparison between the value and cost of large and small newspapers, is from (we think) the Boston Atlas, and is a fine specimen of those "short, readable papers," to which we give such decided preference. We wish it thus set forth, as an apology for, and vindication of, our own modest little sheet, this day for the first time happily presented to the public.

Several of the Southern newspapers are puffing and swelling about these data, to increase their sale and gain, to the blanketed benevolence of their patrons. We are sorry to see them so doing, and we are sorry to see them so doing, and we are sorry to see them so doing.

along the wharves. The riggers in a well equipped state preparation for the business season are making. Steam boats, vessels and canal boats are in the hands of the riggers, and some of the heavy machinery will be ready. The liveries and harnesses are going up, and another crowd of your writers is nearly completed. Late conversations with Detroit has commenced early, and when the blockade at Buffalo is broken up, a season of unusual business activity is anticipated. We learn that the Ohio Canal will not be put in order for navigation until about the 1st of April—probably in time to allow several shipments from the east via Buffalo, without delay. It is hardly to be expected that the riggers season will permit boats to leave Buffalo before the 1st of May. (Cleve. Herald.)

MARRIAGE & FORCE OF CIVIL RIGHTS.—On Monday last a custom carrier, residing in Little Park, aged thirty-one years, as a witness, got married to a silk weaver, a widow, aged forty-three years. Their courtship was only of three days' standing, but less than three days after they separated, both sides declaring there was no love lost between them.

Drunkenly.—The New Orleans Fair, by a machine has been invented, a car which enables a man to walk while he is getting the drink to walk. It is called "The Drunken Car," and is the only way of hitting a fellow drunkard "under the leg," without his being put to death.

A Negro's Opinion of a Politician.—A tree is certainly bad unless it is a good one. There is no substance in the description of a politician. The latter may appear remarkably generous and benevolent, while in reality he is totally selfish. But, say if you would be a politician, you must first be a man of probity in your transactions. Without any further recommendation take a husband!—Boston Post.

AN ACT REGULATING TARIFFS AND CUSTOMS DUTIES.—Sec. 1. Be it enacted by the people of the State of Illinois, that the following provisions shall be in full force and effect from and after the first day of January next, to wit: That all the duties on imports and exports shall be levied and collected in accordance with the provisions of this act.

Sec. 2. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

Sec. 3. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

Sec. 4. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

Sec. 5. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

Sec. 6. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

Sec. 7. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

Sec. 8. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

Sec. 9. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

Sec. 10. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

Sec. 11. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

Sec. 12. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

Sec. 13. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

Sec. 14. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

Sec. 15. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

Sec. 16. County commissioners shall have the honor to keep a list of the names of all persons who are entitled to a license to sell spirits, and to report the same to the court in their jurisdiction.

THE QUID NUNC was a four page paper, size twenty-by thirty-two inches, four columns to a page. It was the first penny paper published west of the Alleghany mountains. The initial number appeared July 5, 1842, David S. Griswold editor, David D. Griswold proprietor; Ellis, Fergus & Co., publishers. Its design was set forth in the prospectus, which enunciated the following plan: "The Quid Nunc will seek to 'advance the cause of Literature, the Fine Arts, Science, Commerce, Agriculture, and the Mechanical Arts; combined with such other topics, of local and general interest as circumstances may from time to time give rise to. Its columns will be open to such communications and discussions, as may be approved, on all subjects, excepting Religion and Politics; neither of these will in any shape, be admitted within them. It will contain short original essays, mainly on practical subjects, designated to do away pernicious prejudices, without reference to their origin, long standing or general acceptance. It will give no currency, nor encouragement to personalities, in any shape whatever; nevertheless as a vehicle, or instrument of general reform, it will be its pride and cue to lash folly, and expose oppression, in whatever guise appearing or by whomsoever practiced." This declaration was signed by William Ellis, Robert Fergus and David G. Griswold. The paper was discontinued August 16, 1842, after thirty-seven numbers had been issued. The similarity in names—David D. and David G. Griswold—naturally suggests an error; but none exists in this statement. The cause of the paper's suspension, as set forth by Robert Fergus, was that David D. Griswold collected and retained all the money realized from the publication of the paper, and Messrs. Ellis & Fergus, owning the type, paper, etc., and doing all the printing without receiving any cash for the same, refused to further continue its publication. "The remaining parties observed their faith with the public, it is unnecessary to state, in the closing of the business.

THE NORTHWESTERN BAPTIST was a semi-weekly paper, the pages of which were fourteen by ten and one-half inches that was published by "a committee," with Thomas Powell as editor, at the office of the Western Citizen, 124 Lake Street. This paper was the first religious publication in the city of Chicago and was, as its name indicates, devoted to the interest and advance of the Baptist denomination. It had for its motto: "Earnestly contend for the faith which was once delivered unto the saints." The initial number was issued September 15, 1842, and the last September 15, 1844, subsequent to which date it was removed from this city.

THE CHICAGO REPUBLICAN was issued on December 14, 1842, as a weekly newspaper, by A. R. Niblo, from Harmon and Loomis's buildings, corner of Clark and South Water streets, late the American office. Its size was sixteen by twenty-two inches per page, four pages of six columns each. This newspaper was established to create a public sentiment that should tend to re-elect President Tyler to office, and likewise it was contemplated that the paper should act as "a power behind the throne" in the disposition of the offices in the gift of the Executive. The paper is stated to have been sold in June, 1843, to Messrs. Cleveland and Gregory, the latter gentleman retiring from its management subsequently, leaving F. W. Cleveland its sole manager. The paper is supposed to have lived about a year. Mr. Niblo removed to Oswego, Kendall County, and commenced the publication of the Kendall County Free Press. After holding several county offices, Mr. Niblo was killed on the Pittsburgh & Fort Wayne Railroad at Washington,

Ohio, June 22, 1858, being Postmaster at Newark, Kendall Co., Ill., at the time of his death.

THE WESTERN CITIZEN was first issued in 1842, from 143 Lake Street, every Thursday, by Zebina Eastman and Asa B. Brown, with Zebina Eastman as editor. As might be inferred from the fact that the war-horse

of abolitionism occupied the sanctum, the Western Citizen was an anti-slavery paper. In 1841 Mr. Eastman, with Hooper Warren, had published the "Genius of Liberty" at Lowell, LaSalle County, and upon the suspension of that paper Mr. Eastman came to Chicago and was a compositor in the American office until a short time before the publication of the Western Citizen. In 1845 the office was moved to 63 Lake Street, and Eastman and D. Davidson were associated in its publication. In 1849 the firm became Eastman & J. McClellan, and so remained until 1852, when Mr. Eastman was sole publisher and proprietor. In 1853 the Western Citizen died, it having been maintained by Mr. Eastman more for principle than profit, and to sow those seeds of emancipation and personal liberty that arrived at their rich fruition in the Emancipation Proclamation of our martyred President in 1863. The struggle of Mr. Eastman, the sacrifices of time and money he made in the cause of liberty, the unremunerated and arduous exertions he displayed, well qualified him for the office of

"A nerve o'er which might sweep
"The else unfelt oppressions of this earth."

The business office was destroyed by fire May, 1850.

THE YOUTHS' GAZETTE, a juvenile paper, was started by K. K. Jones May 18, 1843, and ceased to exist on the 26th of July following.

THE BETTER COVENANT was first published simultaneously at Rockford, and St. Charles, Ill., by Rev. Seth Barnes and William Rounseville, on January 6, 1842, in the interest of the Universalist denomination,

and was issued weekly. On February 2, 1843, the Rev. Mr. Barnes became sole editor and proprietor. The printing of the paper was at first done exclusively in Rockford, but a printing press, etc., being purchased of Zebina Eastman, the establishment was moved to St. Charles, where it remained for a short time, and on April 6, 1843, was removed to Chicago, the number of the paper being Volume II, Number 14, Mr. Barnes being still editor and proprietor, and Charles Stedman the printer. This initial number, issued in Chicago, contains the following announcement: "This paper is now located in Chicago, and here we intend to remain so long as we are interested in the publication of this paper. Our office at present is on the corner of Water and Wells streets, entrance from Water Street." On the 18th of May, 1843, the office was on Randolph Street, west of Chapman's building; and on the 24th of August, 1843, A. P. Spencer is announced as the printer. On March 7, 1844, the Rev. William Rounseville ap-

peared as assistant editor, and this gentleman assumed the editorship and proprietorship of the paper on September 5, 1844, the Rev. Seth Barnes retiring from his connection with the Better Covenant, on account of chronic inflammation of the eyes. On November 21, 1844, it was announced that Cyrus B. Ingham had become co-proprietor with Mr. Rounseville, and on June 5, 1845, the former gentleman assumed the sole proprie-

torship of the paper, with the office at 99 Lake Street. Mr. Ingham thus narrates his experience with the Better Covenant: "I continued the paper until the fall of 1847, when I sold the list to John A. Gurley, of the Star in the West, of Cincinnati, Ohio. During a portion of the time several clergymen of the denomination were engaged as assistant editors. At one time the names of W. E. Manley, George W. Lawrence, F. J. Briggs and D. P. Bailey appeared as editors. The last year of its publication S. P. Skinner, at the time pastor of the Society at Chicago, had editorial charge. * * * It may be remarked that all these years Illinois and Chicago was without a railroad, and that during this time the Mexican War was passed through, and financially the Red Dog and other fictitious currency became worthless. Some of these years the people of the country were all sick; not enough well ones to care for the sick. At some times a load of wheat or pork could not be sold in Chicago for money. * * * On the whole the old Better Covenant was a losing affair. I went into it with about \$1,800 means, and went out of it over \$1,000 in debt, with no assets but a worthless subscription account; five years of labor and life were spent, and it took me ten years more before I was able to clear off the old score." Thus terminated the first chapter of the existence of the Better Covenant; but it will be perceived that it became resuscitated in the Star and Covenant by the subscription list of the Star in the West (the paper to which the subscription list of this paper was transferred by Mr. Ingham) being incorporated with that paper in the New Covenant, and the union of these two papers being designated the Star and Covenant, a narration of which will be found in the proper chronological period pertaining to that event.

THE NEW COVENANT was first issued in January, 1848, by Rev. W. E. Manley and Rev. J. M. Day, as a weekly newspaper and an advocate of the Universalist denomination. Mr. Manley thus briefly recounts the existence of the paper: "Knowing, as I thought I did, that the Better Covenant had failed through mismanagement, I, and a brother-in-law, Rev. J. M. Day, started the New Covenant in the spring of 1848. As Mr. Day

had a wife and family and I had none (at least no wife, as she died the previous September), I did the traveling and he remained in the city. After about a year he withdrew, and I sold out to Rev. S. P. Skinner. He

published the paper, with indifferent success pecuniarily, but was himself a most excellent editor. He sold to L. B. Mason" (in 1855). Mr. Mason conducted the paper beyond the period of which this volume treats.

THE CHICAGO DEMOCRATIC ADVOCATE AND COMMERCIAL ADVERTISER was started February 3, 1844, by Messrs. Ellis & Fergus, publishers and proprietors, in the Saloon Building. It was a weekly paper, issued on Saturday during the earlier part of its existence, and on Tuesday during its latter issuance. Its size, Mr. Robert Fergus states, was twenty-four by thirty-four inches and contained six wide columns to the page. The last number was issued in January, 1846. It was nominally without an editor, but such able men as Norman

B. Judd, William B. Ogden, Ebenezer Peck, Isaac N. Arnold, and others, furnished editorials. It was the corporation newspaper in 1844 and 1845, and the discontinuance of the corporation patronage may have precipitated the discontinuance of the paper.

THE ILLINOIS MEDICAL AND SURGICAL JOURNAL, the first medical journal issued in Chicago, was commenced in April, 1844, in the interests of the faculty of Rush Medical College, with Dr. J. V. Z. Blaney as the editor, the issue comprising sixteen pages and printed by Ellis & Fergus, book and job printers, at the Saloon Building. The two first volumes were issued monthly, but in April, 1846, a new series was commenced and the Journal was christened The Illinois and Indiana Medical and Surgical Journal, with an editorial staff comprising Doctors James V. Z. Blaney, Daniel Brainard, William B. Herrick, and John Evans, and published in Chicago by Ellis & Fergus, and in Indianapolis by C. B. Davis. The issue was made bi-monthly. To recount the struggles against adverse fortune that this Journal underwent is impossible; the dubitations of the printer, whose bills were frequently more prominent in his mind by their continuity than their liquidation; the faith of the editors—when did an editor ever lose faith in his publication?—and the numerous corps of the early medical practitioners and students of our city, who aided the Journal to obtain recognized value among the medical fraternity by their contributions, all are recorded in the memories of the associates of this periodical, but to attempt their recital would be futile. In 1848 the cognomen of the publication again underwent a transformation, appearing for the two months of April and May as Volume 1, Number 1, of The Northwestern Medical and Surgical Journal, but with the same editorial management as the preceding numbers, and published by William Ellis, at Chicago, and John D. Defrees, at Indianapolis. In 1849 the names of W. B. Herrick, M. D., and John Evans, M. D., appeared as the editors, and J. W. Duzan, Chicago and Indianapolis, as the printer and publisher, and the subsequent year John Evans, M. D., and Edwin G. Meek, M. D., comprised the editorial staff, and C. A. Swan, Chicago and Indianapolis, was the accredited printer. The same editors appeared in 1851, but with James J. Langdon, Chicago and Indianapolis, as printer. In 1852 Dr. John Evans was sole editor and Langdon & Rounds, Chicago and Indianapolis, were the printers. That year Dr. Evans (subsequently Governor of Colorado), sold his interest in the Journal for five acres of land on the West Side, and with the increase of value in Chicago real estate, this plot of land afterward became of the value of \$5,000,000; but Dr. Evans had parted with it long before its accession of valuation. In May, 1852, another new series was commenced, the issue being

Eng by F. T. Stuart, Boston, 1869.

*John Wentworth
Chicago*

monthly and numerically designated as Volume I, Number 1; Volume II ending with Number 8 in December, 1853, with W. B. Herrick, M. D., as editor, assisted by H. A. Johnson, A. M., M. D., and with Ballantyne & Co. as printers and publishers, in the new post-office building, corner of Clark and Randolph streets, opposite the Sherman House. Dr. N. S. Davis succeeded Dr. Herrick as chief editor in May, 1854, Dr. H. A. Johnson continuing as assistant editor; the publication being in the hands of A. B. Case, book and job printer, Chicago, who in 1856 was succeeded by Robert Fergus as printer and publisher. In 1857 N. S. Davis, M. D., had sole editorial charge of the Journal and the publishing was done at the "Chronotype" book and job office, Barnet & Clarke, printers. The December number, 1857, terminated this issue of the magazine under the name of The Northwestern Medical and Surgical Journal. Relative to the gentleman who had the sole charge of the Journal at that time, an extract from the Northwestern Christian Advocate of June 1, 1853, will give the estimation in which he was held by his fellow-citizens: "Speaking of Prof. Davis, we may not here suppress an expression of that admiration of his character, which, in common with many others, we have so often felt. His learning and professional skill are not, as is so often the case, employed for mere purposes of money-getting; but amidst the pressing engagements of the duties of a professorship and a private practice he finds time—*takes* time—to labor with all the efficiency of his superior qualifications in the great reforms of the day. In the columns of our City Press, and our popular lecture-rooms he is to be found, for example, advancing the cause of temperance, and exploring the long and dark train of evils that have their rise in the fatal curse of our race."

THE GEM OF THE PRAIRIE was begun May 20, 1844, by K. K. Jones and James S. Beach, from their office in the Commercial Building, 65 Lake Street, and purported to furnish literary miscellany and general intelligence, on four pages, of sixteen and one-fourth by twenty-one and one-half inches, for \$1.50 per annum, the issue being weekly. William H. Bushnell, now of Washington, D. C., was general contributor. After about a year's management Messrs. Jones & Beach sold the paper to J. Campbell and T. A. Stewart, who continued business at the "old stand," and after a short editorial and proprietary career by this company, Mr. Campbell retired. Thomas A. Stewart, subsequently of the Tribune, continued it under his individual management until the latter part of 1846, when he associated with him James Kelley. In May, 1850, the editors were John E. Wheeler, John L. Scripps, afterward of the Democratic Press, and T. A. Stewart; Stewart & Co. were the publishers. In July, 1850, John E. Wheeler retired, leaving Messrs. Scripps & Stewart as editors, and Stewart, Waite & Co., publishers. In 1847, the Gem had been purchased by the management of the Tribune, and was issued until 1852 from that office, when it became wholly merged in the Tribune. Among the contributors to this paper were: Joseph K. C. Forrest, Mrs. Mary Clarkson Hoard, E. A. Guilbert, Lila F. Trask, Joseph Vial Smith, the Misses Collins (daughters of J. H. Collins), B. F. Taylor, and W. H. Bushnell.

THE GARLAND OF THE WEST was projected by Robert N. Garrett and Nelson W. Fuller. But one copy was issued, July 30, 1845.

THE SPIRIT OF TEMPERANCE REFORM was started in 1845 by J. E. Ware, but soon died.

THE WESTERN MAGAZINE, the first literary maga-

zine published in Chicago, was issued in October, 1845, by Rounseville & Co. In September, 1846, John Jay Moon purchased the concern, and published two numbers, when the periodical ended its brief life.

THE CHICAGO DAILY NEWS, a Liberty paper, had a short existence, from the latter part of 1845 to January 6, 1846, under the management of Eastman & Davidson. This was the first daily issued without a weekly edition. S. W. Chapel was assistant editor.

THE CHICAGO VOLKSFREUND, the pioneer German paper in this city, was begun in December, 1845, by Robert B. Hoeffgen, as a weekly. It was continued until the spring of 1848. J. J. Waldburger was an editorial writer thereon.

THE ILLINOIS STAATS ZEITUNG was established in April, 1848, by Robert Bernhard Hoeffgen, as a weekly newspaper, the amount of capital invested in the enterprise being about two hundred dollars; but in those primitive days the energy, mental and muscular, of the editor and publisher, atoned for lack of funds, and the one-man power that comprised the editorial staff was frequently the same individual momentum that wielded the lever upon the "man-killer" press. Mr. Hoeffgen's staff consisted of a boy, who received the emolument of seventy-five cents a day; and the editor, after writing his articles, locking up his forms and going to press, took the edition under his arm and distributed it to his subscribers. Shortly after its establishment, Dr. Hellmuth took the editorial chair, and under the management of this gentleman the Staats Zeitung commenced to manifest its political potentiality, and to champion and elaborate those principles that were afterward the tenets of the Republican party. In December, 1848, Arno Voss became the editor, and he, in 1849, was succeeded by Herman Kriege, whose name has become widely known by his work, "The Fathers of the Republic," and who, years afterward, became insane, and died December 31, 1850, in New York City. Under the direction of Mr. Kriege the issue was made semi-weekly, and then tri-weekly; and the circulation was accredited, in round numbers, at one thousand. At that time George Schneider was at St. Louis, engaged in the publication of a daily newspaper entitled the Neue Zeit, a paper with anti-slavery tendencies. His office being burned down about the time that Mr. Hoeffgen solicited Mr. Schneider to take the editorial management of the Staats Zeitung, the latter gentle-

man accepted the proffer, and on August 25, 1851, took possession of the sanctum and increased the issue of the paper to a daily imprint. Toward the end of 1852 the paper was enlarged and George Hillgaertner became one of the editors. This gentleman was one of the refugees of 1849, and came with Dr. Gottfried Kinkle to Chicago, where a large meeting was convoked to welcome them; Mr. Hillgaertner married a sister of Arno Voss and settled permanently in Chicago. During that year Mr. Schneider purchased a half-interest in the paper and became co-publisher and proprietor with Mr. Hoeffgen. In 1854, the publication of the Sunday Zeitung was commenced, the first Sunday edition of a daily newspaper issued in Chicago; and in this year Edward Schlaeger was also made a member of the editorial staff. This gentleman had commenced the publication of the Deutsche Amerikaner, a daily, in 1854, antagonistic to

the Nebraska bill, but the fulminations of the *Staats Zeitung* against that bill were so tense, forcible and pertinent that there was no public need for another paper enunciating the same principles as the *Zeitung*. The *Amerikaner* was discontinued. On the 29th of January, 1854, George Schneider convoked the first meeting to oppose the Nebraska bill and the extension of slavery. The meeting was held at Warner's Hall, on Randolph street, near Clark, and was probably the first meeting publicly held for this purpose in the United States. At that meeting resolutions were passed embodying the sense of the participants in that demonstration. A copy of these resolutions was sent to Hon. John Wentworth, then member of Congress, and he, recognizing the voice of the people and their wishes in the matter, voted adversely to the Nebraska bill. His was the first Democratic vote cast in the House against that celebrated measure. With how much reason the *Staats Zeitung* claims the inaugural movement that resulted in the formation of the Republican party, its historical adherence to the Buffalo platform and its hostility to the Nebraska bill and slavery will demonstrate without comment. During that year also an attack was made upon the *Staats Zeitung* by a mob (the establishment being then at No. 12 Wells Street) and numbers of citizens proffered assistance to resist the attack; but Mr. Schneider said that while he controlled the paper he would defend it, and the determined front presented by that gentleman and his assistants, who were all armed, cowed the mob and they retired without perpetrating any violence. To revert to an item that concerned the newspaper *per se* in this year, it is a matter of fact that Dr. Aaron Gibbs, who was a fierce anti-slavery man, collected such a multiplicity of advertisements that an extra had to be issued in order to provide space for their insertion. Subsequently H. Beinder became incorporated with the editorial staff; as did Daniel Hertle, a refugee of 1849, who was one of the most accomplished writers ever upon the paper. Edward Remack then was appointed editor of the *Sonntag Zeitung*, then designated *Die Westen*, and his caustic and witty articles will long be remembered by the readers of the paper. He was also noted as a musical and dramatic critic, in which role he had hardly a superior. He left Chicago and settled in New York City, where he died. In 1855, another ineffective demonstration in mob force was made against the paper, growing out of political feeling; but as in the former instance, no damage resulted to the *Staats Zeitung*; the armed neutrality of the paper forming a bulwark, whereon the turbid waves of discontent dashed into a mere spray of threats. The *Staats Zeitung* lent its voice in calling the first Editorial Convention, held at Decatur in February, 1856, which was attended by that noble son of the great State of Illinois, Abraham Lincoln. At that convention the native American party were strongly represented by adherents of the party as delegates; yet that organization framed resolutions inimical to slavery, and favorable to foreign-born citizens, despite the native American disciples. How much, or how little, of this result is ascribable to the influence of the newspaper is, of course, an open question, but the bases of those resolutions were tenaciously and unwaveringly championed by the paper; therefore, it is only just to accredit the *Staats Zeitung* with having wielded some power that assisted in this consummation; the more especially as Mr. Schneider, the editor of the paper, was present and argued untriflingly for the resolutions he had introduced. Governor Palmer, Abraham Lincoln, Norman B. Judd, B. C. Cooke, and others, favored those resolutions and

they were passed amid a tumult of excitement, under the special advocacy of Abraham Lincoln, who stated to his old Whig friends (the majority of whom at that time were in the Native American party), that "the resolutions of Mr. Schneider contained nothing which had not been said in the Declaration of Independence." The State Convention at Decatur called the Bloomington Convention of 1856, and there resolutions of similar liberal character were passed. There Mr. Schneider was elected Delegate-at-Large, to the Philadelphia Convention, where John C. Fremont was nominated as a candidate for the presidency. It is known to history that the party called the North American (a euphemism for Native American) party, had their National Convention in session at the same time and anticipated and desired a co-operation with the new party, whose nucleus was formed by the adherents of the resolutions adverse to slavery and in favor of the foreign-born American citizen. To prevent any such amalgamation, the Illinois delegates, Palmer, Schneider, Judd, and others, at once rallied their forces and compromised on the election of Henry Lane, of Indiana, for president of the convention, who pledged himself to support the *Illinois resolutions*; and the committee on platform was organized with that view, which committee incorporated those resolutions in the platform of the new party. When the report came before the convention the utmost turbulence prevailed, and after the section favoring the Illinois resolutions was read, even such a man as Thaddeus Stevens arose and denounced them as an insult to the great American party of Pennsylvania, and moved their rejection by special amendment. The Illinois delegates had friends in most of the Western delegations, and, pending any decision upon Mr. Stevens' resolution, it was determined that, should such amendments be passed, a demonstration should be made of leaving the convention *en masse*; but the president, (Mr. Lane of Indiana), on the vote of the convention, declared the resolutions adopted amid the greatest uproar from the dismayed North (or Native) Americans.* The German-American party claim that this epoch was the birth of the National Republican party, and was a decisive check to the Democratic party in the Northwestern States, because the door was opened to affiliation in the new party by foreign-born citizens in those States. In consequence the Old Line (pro-slavery) Whigs joined the Democratic party, and the liberal portion cast their lot in with the Republicans. It is now generally conceded that without this division the question of slavery would not have had the decision of the people as soon as it had, and the new party in its conflict for ascendancy in the State and the final issue upon the battle-field, would have been without the co-operation of the liberal portion of the Democratic party. As another result, two-thirds of the German papers all over the Northern States joined the new liberalized party, and shortly thereafter the effects were demonstrated at the popular elections in the Northern States. The *Staats Zeitung* by its indomitable zeal and unwavering championship, converted most of the Germans to the new faith. Its editors were prominent among the most influential speakers at the various meetings where the politics of the day were discussed, during the memorable Fremont campaign.

March 31, 1856, the Common Council empowered

* It may be contended that this recital is rather recounting the history of American politics than the life of a newspaper. But it must be remembered that Mr. Schneider during this period was the chief editor of the paper, and by his action the exponent of its principles. The utterances of Mr. Schneider as a delegate were the writings of that gentleman in the *Staats Zeitung*, their aims and interests in civil polity were identical, and to view one dissociated from the other would be injustice to both.

the Staats Zeitung to do the public printing in the German language. (See Democratic Press of that date.)

Explanatory of the lack of minutiae in the history of this paper, it is necessary to state that no earlier number than one of 1861 is known to be extant; hence a description of the size, appearance, etc., of the early edition of the paper is impossible.

THE CHICAGO COMMERCIAL ADVERTISER was commenced by Alfred Dutch as a weekly, February 3, 1847. In an autobiographical sketch (furnished by the courtesy of T. Herbert Whipple), Mr. Dutch says: "He

(Alfred Dutch) started out with the position that our political, financial, fiducial and business matters were all wrong and corrupt; that an entire change in our public men and public measures only, would save us from irretrievable ruin, and that men having character and an interest at stake must enter upon this business, like business men, in a business manner. * * * To his able and indefatigable labors for the system of corporations may be ascribed our admirable and magnificent lines of railroads which constitute the pride, the boast and the riches of Illinois, and the means by which a wise and sensible people could undertake the most grand, stupendous and magnificent enterprises, and carry them through to the credit, honor and glory of the State, and to the happiness and comfort of our people. There is one great service which Mr. Dutch rendered the State during his editorial and public labors which has never been duly appreciated and acknowledged. This is, his instrumentality in obtaining from Congress the magnificent grant of lands for the Illinois Central Railroad, and in saving those lands afterward from the grasp of the vandals." * * * The Maine Law had been passed in quite a number of the States. A temperance epidemic raged over the face of the land. It was fashionable among churchmen, politicians, temperate men and inebriates. The Maine Law had been carried everywhere else, and thousands of dollars were offered to be bet that it would be carried by forty thousand majority in this State. "Mr. Dutch said if this question were fairly presented to the people the bill would be voted down. He entered the lists alone, with nearly or quite all the clergymen, presses and demagogues against him. He argued the question with dignity, candor and power. The paper was circulated and read in almost every family in the State during the campaign of six weeks. His opponents heaped upon him mountains of personal invective, which he never heeded, but discussed the whole subject with the greatest of calmness, appealing to the reason and common sense, and not to the passions of his readers, and the returns exhibited fifteen thousand majority against the law." About 1849 the issuance was made daily, tri-weekly and weekly. Financial difficulties, however, constantly supervening, the issue was anything but regular, and frequent hiatuses occurred during the course of its publication. One of these occurred in March, 1853, when Frank Sherman and other creditors seized the type, etc., and ejected it into the street and an adjacent stable. In the latter part of April it was re-established, but only to linger a little longer, expiring that year.

THE WESTERN HERALD was first issued on April 1, 1846, by Rev. J. B. Walker and B. F. Worrall, as an anti-slavery, anti-masonic, temperance paper and an advocate of all the principles of the Society of Friends that decry wrong or injury to individuals or things. The

issue was made upon a monetary basis created by a subscription raised by Rev. R. W. Patterson, pastor of the Second Presbyterian Church, the donations to which were principally from that Church; and upon a theological basis of enunciating the doctrines of the New-School Presbyterians and the Congregationalists, whose interests and dogmas were at that time almost identical. The "staff" of the paper was the Rev. Mr. Walker, editor, Mr. Worrall, printer, and at their office on Wells Street was also printed three sides of the Watchman of the Prairie (the first recorded "patent" paper) the matter upon these three pages being common to both papers. Upon the blank pages of their three-sided "patent" the Baptists subsequently expounded their denominational views, and upon the blank page resulting to them, from their division of the typographical labors, the New-School Presbyterians and Congregationalists elaborated their theology; both papers being issued weekly.

In 1847, the name of the paper was changed to Herald of the Prairies.

In 1848, James Shaw was assistant editor. In August, 1849, the paper was sold to J. Ambrose Wight and William Bross; the former gentleman now being a minister of the Presbyterian denomination and a D. D., and the latter an ex-Lieutenant-Governor of this State; and by them the name was changed to the Prairie Herald,

the co-operative arrangement with the Watchman of the Prairie being continued. Rev. G. S. F. Savage, of St. Charles, Ill., and the Rev. A. L. Chapin, of Beloit, Wis., were appointed corresponding editors. In November, 1851, Mr. Bross sold his interest to Mr. Wight, who continued the paper until March, 1853, when he disposed of the subscription list to Rev. John C. Holbrook for \$1,000, the sum received being \$200 more than the paper had been offered for sale for a few weeks previously. That gentleman changed its name to the Congregational Herald, and issued the first number exclusively in the Congregationalist interest on April 7, 1853. Rev. J. M. Davis was made associate editor, which position he held until August 2, 1853, when he vacated the sanctum to accept the pastorate of the Congregational Church in Rutland, Mass. The corresponding editors were J. J. Miter, John Lewis, O. Emerson, Jr., W. Salter, H. D. Kitchell, J. Smith Hobart, S. Peet, G. S. F. Savage, F. Bascom, J. B. Walker, and M. A. Jewett. In 1854 the editors were Rev. J. C. Holbrook (subsequently superintendent of Home Missions

for the State of New York), and Rev. N. H. Eggleston. Mr. Holbrook was, on July 3, 1856, installed as pastor of the Congregational Church, Dubuque, Iowa, but his name remained as editor of the Herald until 1856. Subsequently connected with the paper as editors were Rev. G. W. Perkins who died while editor of this paper and pastor of the First Congregational Church, November 13, 1856), W. A. Nichols, W. W. Patton, J. E. Roy, S. C. Bartlett, Samuel Wolcott and Darius E. Jones, until in 1857, when Rev. H. L. Hammond assumed exclusive charge. After the dissolution of the combination plan of denominational publication, pursued anterior to the issue of the Congregational Herald, the Herald firmly championed the cause of the Congregationalists, and persistently maintained its antagonism to slavery or any complicity therewith in any shape or manner, and strenuously advocated the establishment of the Theological Seminary, as a necessity to the Congregational churches in the Northwest. In April, 1854, after several preliminary efforts, a meeting was held in the rooms of the Herald, with Philo Carpenter as chairman, and thereat, consequent upon the logical reasoning and strenuous advocacy of Rev. G. W. Perkins, the Seminary was decided upon. At this, and other meetings it assumed determinate shape. Under the auspices of the editors of this paper, the triennial convention of 1854 was called, and they were prime movers in the organization of the board of directors for the Theological Seminary in March, 1855, with Philo Carpenter and G. W. Perkins among the members. Of the death of Mr. Perkins, Rev. E. P. Goodwin, D. D., in his sermon before the First Congregational Church, on May 21, 1876, thus speaks: "I cannot take the time here to set forth in fitting terms the character and the work of this man of God. And there is the less need of this since the Church with touching and grateful appreciation has spread upon its records a most loving testimonial of his rare ability and worth. Indeed I have yet to see that eulogium upon any man's character, or life, or work, that for affectionateness of spirit, range of qualities admired, and glowing emphasis of encomium, is to be named with this tribute to the first pastor of this Church. If Mr. Perkins was the half of what is there set forth, either as a man or a minister, he must have been a marvel, a kind of Boanerges and Barnabas combined—such as the Church and the world seldom see. If you can only say of my Brother Patton and myself, when our work is done, that we were not unworthy to be his successors, it will be eulogy enough." It should be added, that a marble tablet suitably inscribed was provided by vote of the Church, and placed in the vestibule of the house of worship.

In 1856, a Herald fund was established, to be made up of contributions to the amount of \$10,000, for the continuation of the paper, and the profits were promised to be given to the Chicago Theological Seminary. Between \$7,000 and \$8,000 were subscribed, which re-invigorated the paper, then suffering from financial marasmus, and enabled it to exist longer than the period treated of in this volume.

As a matter of adventitious, as well as relevant, history, the following, from the pen of the Rev. J. Ambrose Wight, will be found of interest: "I arrived in Chicago in September, 1836, by stage from Bennington, Vt., to Albany, N. Y., by railroad to Utica, the cars being in compartments, with two opposite seats in a compartment; by canal thence to Buffalo; by steamboat Columbus to Detroit, and by stage, so-called, by way of euphemism, to Chicago; each mode from Utica being the worst. The journey consumed fourteen days,

including a Sunday at Rochester and another at Niles. I stopped at the Tremont, a two-story wood building, corner of Lake and Clark streets; the steps to its stairs were high and the chamber floor uncarpeted. While looking for employ, it was suggested by a Democrat, that I take the Chicago Democrat off the hands of Mr. Calhoun, and run it. I replied that I was a Whig; the answer was that 'editing was a profession;' a remark which I have not fathomed to this day.

"I spent three weeks in November with a surveying party, on the Illinois & Michigan Canal, under leadership of E. D. Talcott, and was offered a place as assistant engineer; but had already engaged in a mercantile enterprise with John Wright, the partnership including his son, Timothy, with whom I started, the 7th of December, on foot, carrying an axe on shoulder, for Rock River. We settled at Rockton, and our trade at that point lasted until the death of the elder partner, in 1839. I then went to Rockford, where, in 1842-43, I made my first editorial venture, with the Winnebago Forum, the first ancestor of the Rockford Register. It was not a paying institution, and I listened to a proposition of John S. Wright, son of my mercantile partner, to enter upon the editorship of the Prairie Farmer. This I did in May, 1843, and so continued with one brief interval, until January, 1856. Soon after my connection with the paper, Mr. Wright left for New York and Washington for *three weeks*. The three weeks became eleven months: the effect of which was to throw the whole management of the paper upon me, both as publisher and editor. So it continued until the year 1851, Mr. Wright's name remained as editor and publisher, but his editorial work was confined to the educational department, for which he occasionally wrote. He did not claim any considerable acquaintance with agriculture, having, I think, never worked a day upon a farm in his life. But he was a man quick to see a need or an opportunity, and had commenced the Farmer in 1841, and had been its sole editor until my connection with it. * * * * In the summer of 1849, Hon. William Bross, who had been joined with S. C. Griggs in the book business, but had become separated from the firm, persuaded me to purchase with him the Herald of the Prairie, of Rev. J. B. Walker, and enter upon its publication; he to manage the business and I to do the chief editing. We entered upon the work in August, 1849, and continued together until November, 1851, when Mr. Bross sold his interest to me. I carried it on until March, 1853, when I sold the list of subscribers to Rev. J. C. Holbrook, and discontinued the paper. * * * After the sale of the list to Mr. Holbrook, a new paper in the interest of the Congregationalists was started and continued for some nine years, called the Congregational Herald, which cost something each year above its receipts. But under none of its publishers, or names, was it a success. About the time, or before our purchase of it, the two denominations began to pull apart. Various causes were concerned in this. The great anti-slavery contest was on hand, and Chicago was a sort of Western headquarters of that agitation. That agitation divided society, both secular and religious, and take what ground you would, you displeased somebody. Nor was the displeasure slight. It was characterized by a bitterness hardly conceivable now. After my connection with the Herald with Mr. Bross in 1849, I did the chief editing of both papers, the Herald and the Farmer, for a time, say for that and the next year, till 1851."

In 1846 Robert Wilson published the DAILY CAVALIER, a penny paper. After it had been in existence a short time Rev. William Rounseville made a contract to

run it six weeks, commencing September 7, 1846, with the privilege of purchasing it at the expiration of that period. During this probationary period Messrs. Ellis and Fergus printed the paper. It had also a tri-weekly and weekly issue, twenty-five by eighteen and one-half inches in size, of four pages. Mr. Rounseville states: "At the end of six weeks I was ready to take it, but owing to a misunderstanding in the terms of sale, Wilson refused to give it up, broke into the office and took possession, and issued it for a short time, when it closed up." As appears by a notice in the *Weekly Democrat* of April 27, 1847, its death occurred shortly anterior to that date, and the Cavalier rested with Charles I.

Rev. William Rounseville, after his unsuccessful attempt with the *Daily Cavalier*, in 1846, issued the *MORNING MAIL*, but that proved unprofitable and was shortly thereafter given up. From a contemporaneous notice it appears to have subsided into a dead letter about April 27, 1847.

THE *CHICAGO ARIEL* was published weekly for a short time, in 1846, by C. H. Boner; with Edward Augustus as editor.

THE *DOLLAR WEEKLY*, by William Duane Wilson, was issued three or four months, in 1846.

THE *VALLEY WATCHMAN*, J. McChesney, publisher, lived but a brief period in 1846 or early in 1847.

THE *NORTHWESTERN EDUCATOR*, a monthly, by James L. Enos and D. S. Curtiss, was begun in September, 1847, and lasted two years.

THE *LIBERTY TREE*, an abolition monthly, was issued by Eastman & Davison, in 1846, with Zebina Eastman as editor. It was published two years.

THE *CHICAGO TRIBUNE* commenced its issue on Thursday, July 10, 1847, in the third story of a building on the corner of Lake and LaSalle streets, one room being adequate for all the requirements of its limited circulation. The gentlemen who officiated at the baptismal font were Joseph K. C. Forrest, James J. Kelly, and John E. Wheeler. The name *Tribune* was suggested by Mr. Forrest, and, after some little opposition by his co-adjutors, was adopted. The ideas that actuated that gentleman in the bestowal of the cognomen are thus enunciated by him: "The origin and establishment of the *Chicago Tribune* were the initiation of an entirely new departure in not only journalism, but politics, in Chicago and the Northwest. The creation of the Republican party is as much due to the establishment of the *Chicago Tribune*, as to any other one cause. In 1846, the two great parties that divided the country were in a peculiar and anomalous condition. The Whig party had been thoroughly defeated in the election of 1844, mainly through the disposition of its candidate, Henry Clay, to look in opposite directions or to compromise on the great issue between freedom and slavery, then gradually looming into importance, and which was finally precipitated upon the country by the results of the Mexican War. The question of the annexation of Texas, which, it was contended, would erect a 'Gibraltar for Slavery in the South,' was also agitating the public mind; and it certainly appeared that, from the chaos of defeated politicians and unsettled views, a party could be created embodying those principles and tenets that were the platform of the Republican party; and as a nucleus around which such a party could be formed, the name *Tribune* was given; and although Mr. Forrest retired from the paper on September 27, 1847, the impetus imparted by the name has aggregated, until it is the mighty enunciator of those doctrines prophetically conceived by its sponsor in 1847. It has been carried along on what may be

called 'that stream of Providence' which so often compels men and parties to be governed by events, which once having received an impetus in a given direction, are for ever after forced to the adoption of such ends as were originally proposed and provided for them." The first edition of the *Tribune* was but four hundred copies, worked off by one of the editors, as pressman, upon a Washington hand-press; but every stroke of the lever was annealing the substructure upon which was erected the power and influence that has not alone decided the fate of this city, but of the Nation. From the *Tribune*, that had such an humble origin, have been uttered dicta that have controlled the destinies of parties and individuals of prominence in the country, and infused the people with that patriotism which bore such glorious results in the internecine contest. In July, 1847, Mr. Kelly, owing to failing health, retired, selling his interest to Thomas A. Stewart, and was several years subsequently a successful leather merchant. Mr. Forrest dissolved his connection with the paper in September; this gentleman not alone being an editor at the time, but an unordained clergyman of the Swedenborgian denomination. Mr. Stewart, the new editor, speedily realized some of the unpleasantness attendant upon an editorial career, by receiving a challenge from Captain Bigelow, commandant of the United States vessel then stationed at this port. Mr. Stewart had editorially stated that Captain Bigelow ought to tow merchant vessels into the harbor, and the Captain, deeming such an assertion insulting to the naval dignity, sent a challenge to "Tom" Stewart, which he published in the paper as an item of pleasing intelligence. "The pen was mightier than the sword," for the latter was never imbued in Mr. Stewart's gore, and the bellicose Captain subsequently towed belated merchant vessels into Chicago harbor.

In 1847, THE *GEM OF THE PRAIRIE* was purchased by the inaugurators of the *Tribune*, and these editorial lapidaries used the type, etc., on the new paper, continuing the *Gem* as the weekly edition of the *Tribune*. There is a weekly *Tribune* dated February 1, 1849, in the possession of the Chicago Historical Society; hence the issue of the *Gem* as the weekly edition of the *Tribune* ceased prior to that date. It was, however, issued as a literary journal until 1852, when it became wholly absorbed by the *Tribune*. August 23, 1848, John L. Scripps purchased a one-third interest, the firm becoming Wheeler, Stewart & Scripps. On May 22, 1849, the office was entirely destroyed by fire, but the paper was issued two days subsequently. December 6th of that year an arrangement was made whereby regular telegraphic dispatches were received by the *Tribune*, a pioneer movement in Chicago journalism. February 20, 1849, the first number of the weekly edition was issued. In May, 1850, the *Tribune* was published at the office of the *Prairie Herald*. The first number known to be extant is that of December 28, 1850, published by John E. Wheeler, John L. Scripps, and Thomas A. Stewart, at 17½ Lake Street. The paper was a folio, thirteen and three-quarters by nineteen and a half inches per page. Mr. Wheeler sold his interest June 30, 1851, to Thomas J. Waite, who assumed the duties of business manager. On June 12, 1852, a syndicate of leading Whig politicians purchased the share of Mr. Scripps, and William Duane Wilson became editor. Morning and evening editions were published, the latter being soon discontinued. August 26, 1852, Mr. Waite died, and his interest was purchased by Henry Fowler. March 23, 1853, General Wilson's interest was purchased by Henr

Fowler, Timothy Wright and General J. D. Webster. On June 18, 1853, Joseph Medill came from Cleveland and purchased a share in the paper, whereupon the issuance was made under the auspices of Wright, Medill & Company, and Stephen N. Staples is specified in the directory for 1853-54 as assistant editor. On July 21, 1855, Thomas A. Stewart retired from the

Joseph Medill

partnership, and September 23, Dr. C. H. Ray and J. C. Vaughan were the occupants of the chair editorial. At the same time Alfred Cowles became a member of the firm, which was thus composed of Joseph Medill, Dr. C. H. Ray, Timothy Wright, J. D. Webster, John C. Vaughan and Alfred Cowles. March 26, 1857, Mr. Vaughan withdrew and the partnership name became Ray, Medill & Company.

The first number of the WATCHMAN OF THE PRAIRIES was issued on the 10th of August, 1847, by Rev. Luther Stone in the interest of the Baptist denomination, and was the first weekly Baptist newspaper published in Chicago. Messrs. Walker and Worrel were its first printers, at No. 171 Lake Street, second story. The size of the paper was twenty-three and a half by eighteen inches, containing seven columns. Until about 1849 the paper was printed by this firm, when Wright & Bross became its publishers. Mr. Stone, having perceived the schisms and dissension that the great question of slavery was producing among the Baptists, raised the standard of the "Watchman of the Prairies" around which the anti-slavery members of the denomination could rally, and at the same time endeavor to prove the illegality and anti-Christianity of slavery. As customary with all pioneer editors, the work attendant upon the establishment and maintenance of the paper was most arduous and unremitting. Mr. Stone labored indefatigably and with undaunted perseverance, despite the many obstacles he encountered. The success which attended his efforts is a matter of historic record. The first issue announces the transfer of the accounts of the Western Star to its books. Three weeks elapsed between the issue of the initiatory number and the second number, when the paper was continued without any hiatus until February 22, 1853. Then the editor determined upon taking a respite from his protracted and severe work. Immediately subsequent to this date Mr. Stone took a trip to the East, contemplating the purchase of new material, etc., but receiving a proposition from Dr. J. C. Burroughs, Levi D. Boone and A. D. Titsworth to purchase the paper, he transferred the subscription lists to those gentlemen. On August 31, 1853, a committee of the Fox River Association, consisting of Rev. J. C. Burroughs, chairman, and O. Wilson, Rollin Anderson, A. D. Titsworth and Dr. Levi D. Boone, members, issued the first number of the CHRISTIAN TIMES, of which paper Rev. J. C. Burroughs was the chief, and H. J. Weston and A. J. Joslyn assistant editors. On November 24 of this year the paper was sold to the Revs. Leroy Church and J. A. Smith, D. D., the latter gentleman becoming editor-in-chief, which position he still retains. The office of the paper was located at No. 7 Clark Street. On November 8, 1854, Rev. J. A. Smith sold his interest to the Rev. J. F. Childs, and the proprietary firm became Church & Childs. On November 15 the office was removed to No. 16 LaSalle

Street. On August 29, 1855, Rev. Mr. Childs sold his interest to Mr. Church, who was sole proprietor until, after various changes a little later on, Edward Goodman became half proprietor (this gentleman having been connected with the paper since its first issue as the Christian Times), and the firm name of the publishers became Church & Goodman. Of the influence exerted by this paper, of its large circulation and its eminent adaptability to the requirements of the needs of the denomination whose interests it so ably conserves, no eulogium is required; the fact that as the Baptist denomination has augmented the circulation of the paper has increased is one proof, and that none are found who carp at the tenets expounded, or the homilectics set forth, is another and more conclusive evidence of the paper fully answering the needs of the class of which it is a typographical representative.

THE PORCUPINE, by Charles Bowen and Thomas Bradbury, was a short-lived paper which dates in the winter of 1847-48.

THE AMERICAN ODD FELLOW, the first organ of secret societies published in Chicago, existed in 1848, with J. L. Enos and Rev. William Rounseville as its editors.

THE NORTHWESTERN JOURNAL OF HOMEOPATHIA was a monthly journal of a partly scientific and partly popular character, and was the first published in Chicago advocating the science of Homeopathy. The first number was issued in October, 1848, by George E. Shipman, editor and proprietor, and was printed by Whitmarsh & Fulton, at 131 Lake Street. The last number was issued in September, 1852, and was not discontinued for lack of funds, as a number of the proprietor's friends proffered him the means to continue its publication; but he thought that if those for whose benefit it was published did not think the journal of sufficient value to contribute subscriptions adequate to its maintenance, they could do without it. Its issue was consequently suspended.

THE LADY'S WESTERN MAGAZINE, Charles L. Wilson, publisher; B. F. Taylor and Rev. J. S. Hurlbut, editors; was issued for a few months from December, 1848.

THE CHICAGO DOLLAR NEWSPAPER, a literary weekly, edited by J. R. Bull, was begun March 17, 1849, but was discontinued the same year.

THE CHICAGO TEMPERANCE BATTLE-AXE, a weekly, by C. J. Sellon and D. D. Driscoll, was published in 1849, for a short time.

THE DEMOCRATIC ARGUS, daily and weekly, was started in August, 1850, by B. W. Seaton and W. W. Peck. Nothing of importance is remembered concerning this paper.

THE ECLECTIC JOURNAL OF EDUCATION AND LITERARY REVIEW: C. F. Bartlett, editor; was first issued as a monthly in June, 1850. In April, 1851, Dr. N. S. Davis became its editor, but the magazine lived only a short time.

THE COMMERCIAL REGISTER, a weekly, by J. F. Ballantyne, was one of the issues during a part of 1850.

In January, 1852, a monthly called THE CHICAGO LITERARY BUDGET was issued by W. W. Danenhower, editor and proprietor, in the interest of his book and news depot. January, 1853, it was changed into a subscription weekly, devoted to literature and general miscellany, whereof B. F. Taylor was editor. April 1, 1854, T. Herbert Whipple was designated as associate editor, but really performed the editorial duties of the paper, and also wrote quite a successful novelette, enti-

CHICAGO COMMERCIAL ADVERTISER.

tled Ethzelda, or Sunbeams and Shadows, that was afterward published by Rufus Blanchard, being probably the first of that species of literary production written, printed and published in Chicago. It is likewise authoritatively stated that the first music printed from movable music type was set in the Literary Budget composing

room by Joseph Cockroft, the words to the music being by Francis Clarke. S. P. Rounds for a long time printed the title page for this paper, which, in 1855, was merged in the Weekly Native Citizen, published also by Mr. Danenhower.

THE CHRISTIAN ERA, Rev. Epaphras Goodman, editor, was given a place in the list of unsuccessful efforts for 1852.

THE WESTERN TABLET was published by Daniel

O'Hara, February 7, 1852, as a Catholic literary periodical, and lasted for three years.

THE CHICAGO DAILY EXPRESS AND COMMERCIAL REGISTER, an independent daily penny paper, was begun June 11, 1852, by J. Q. A. Wood and W. J. Patterson.

THE WEEKLY EXPRESS, J. F. Ballantyne & Co., lasted one year, from some time in 1852.

THE DAILY TIMES AND CITIZEN, a Free-Soil paper, by Zebina Eastman, ran from some date in 1852 to July, 1853.

FRIHED'S BANNERET, the first Norwegian paper in Chicago, was established in 1852, by Mouritzon & Kjoss, and printed from materials formerly used on the Nordlyset, published in 1847, at Norway, Racine Co., Wis. Despite the utmost economy and energy on the part of the publishers, the new paper lived but eleven months, and the office was sold to the Staats Zeitung. Several other Norwegian papers were attempted here prior to 1857, but their names, even, cannot be recalled at present.

THE DAILY DEMOCRATIC PRESS was first issued on September 16, 1852, by John L. Scripps and William Bross. The paper was started exclusively upon its own merits, and without the usual prerequisite to newspaper publication—a subscription list. As Governor Bross remarks: "It was established in the interest of the city, the State and the great Northwest, and without any view of making politics the standard of the paper, and the advancement of individual politicians the aim of its existence." As its title indicates, the Press acknowledged allegiance to the then dominant political party, but was fair and unprejudiced in its conduct toward all. One of the especial features of the paper was its commercial department, although in all its work ability was evinced. A few days after the first issue of the paper, the office was moved to No. 45 Clark Street, over R. K. Swift's Bank, and from this place the first number of the weekly edition was issued. Here occurred that episode that is a matter of oral tradition among the older journalists. The religious views of Governor

Bross are well known, and the work requisite for the issuing of a daily paper that was of necessity performed upon Sunday, was a constant source of animadversion by that gentleman. Mr. Scripps was working hard one Sunday upon editorials, etc., and Mr. Bross, entering the sanctum, remonstrated with him for breaking the Sabbath. Mr. Scripps said, "Now, good Deacon, I have worked from five this morning, and shall probably continue until nine this evening, consequently I have made no break in the Sabbath—it is a whole day." On March 16, 1853, the paper was enlarged, and September 16, 1854, Barton W. Spears, then recently of the Ohio Statesman, and for many years one of the editors of the Monroe (Michigan) Commercial, who was a practical printer, became associated with the firm, the title becoming Scripps, Bross & Spears. May 8, 1857, the heading was changed in form and arrangement; the words *Chicago* and *Press* being upon either side of an oval around a vignette of a printing press, and upon the upper part of the oval was the word *Daily*, and upon the lower part, *Democratic*. June 13, 1857, the vignette was again altered, having a press in the center, a locomotive and cars upon the right, and a steamboat upon the left of the press; above the press upon a ribbon was *Daily* in large letters, and below the press, on another ribbon, the word *Democratic* in small type. This, presumptively, marked the decadence of democratic principles in the newspaper, and the acquirement of those Republican tenets it steadfastly expounded.

SLOAN'S GARDEN CITY was first issued in 1853, by Oscar B. Sloan, as a weekly newspaper, in the interest of his patent medicines principally, and as an oracle upon literary matter secondarily. The paper lasted two or three years and was ably edited, having in its columns many meritorious stories and miscellaneous contributions. William H. Bushnell wrote a serial for this paper, entitled *The Prairie Fire*, that was extremely read and admired. Robert Fergus states that the size of this paper was twenty-two by thirty-two inches, eight pages, and was printed by him during its early existence; but that afterward Charles Scott & Co., performed the requisite typographical work.

HORNER'S CHICAGO AND WESTERN GUIDE, a monthly published in 1853 by W. B. Horner, purported to contain all information for traveling by railroad, steamboat and stage, from Chicago to every town in the Northwest and to any important city in the United States.

THE CHICAGO EVANGELIST* was published in the earlier part of April, 1853, by an association of clergymen of the Presbyterian denomination, the resident editors being Revs. H. Curtis and R. W. Patterson, and the associate editors, G. W. Gale, S. G. Speers, W. H. Spencer, A. Eddy and S. D. Pitkin. The tenets of this weekly organ were those of the New School of the Presbyterians. April 19, 1854, Rev. Joseph Gaston Wilson took editorial charge of the paper, it being stated in a notice of this change, that Messrs. Curtis and Patterson had only occupied the editorial chair until other arrangements could be perfected. The Northwestern Christian Advocate thus commends upon its discontinuance: "This able contemporary, the organ of the Presbyterian Church in the Northwest, we see by its last issue (June 27, 1855), is to be merged into the New York Evangelist, which hereafter will have a Northwestern editor in this city. The Chicago Evangelist had reached the twelfth number of its third volume, was an able and spirited journal, and is discontinued for want of means to make

* It is probable that the first announcements of this project spoke of it as *The Christian Witness*, but no issue was made with this title.

it in size, editorial strength, etc., what a Church paper should be, and its management deem absorption by a magnificent sheet more honorable than struggling along, making no well-defined mark." Rev. Charles P. Bush was Western editor for the New York Evangelist, appointed in the spring of 1856. The directory for 1853-54 designates John T. Wentworth as publisher of the Chicago Evangelist.

THE YOUTH'S WESTERN BANNER, a juvenile monthly, devoted to temperance, morality and religion, published by Isaac C. Smith and Oliver C. Fordham, was issued in August, 1853, with Smith & Co. as editors. It was continued for only a short time.

THE CHRISTIAN BANKER, a folio of twelve by nine and a half inches to the page, was issued January 5, 1853, by Seth Paine and John M. Holmes. But eight numbers of this novelty in literature were printed, and these appeared irregularly. Seth Paine issued this paper from the back room of his bank on Clark Street, and the paper was intended as an elaboration of the Bank of Utopia he was going to conduct, and as an advertisement of the actual bank he managed. Associated with Mr. Paine in the Bank were John M. Holmes and Ira B. Eddy. These gentlemen also had some interest in the paper. The bank, Mr. Paine asserted, was named the Bank of Chicago, but as its influence became felt and its power became augmented, it would be called the Bank of the People, and as it still farther advanced in cosmopolitan finance and depositary accretion it would be called the Bank of GOD. Mr. Eddy states that July 9, 1853, it broke as the Bank of Chicago, and the paper shortly afterward subsided. Mr. Paine was some time thereafter sent to a lunatic asylum; how far he was qualified for a residence in that institution during his editorship of this paper is unknown. He subsequently went to Lake Zurich, established the "Stables of Humanity" there and issued the Lake Zurich Banker from that place. There are many who contend that Mr. Paine was not qualified naturally for his inhabitation of the asylum for the short time that he was there; that he was merely hyper-reformatory and perhaps illogical in the nature of his schemes for the amelioration of the human race. Others again, notably those who lost money by his bank, refused to accredit him with the possession of any virtues and stigmatize him by all descriptions of uncomplimentary, and probably unjust epithets. Mr. Paine was associated with Theron Norson, in 1839, in the dry-goods business in this city. Ira B. Eddy was also one of Chicago's early settlers, he having been engaged in the hardware business during the primitive epoch of the Garden City.

THE CHRISTIAN SHOEMAKER was issued by F. V. Pitney in 1853 as a travesty upon. The Christian Banker, and was published for a short time only.

THE NORTHWESTERN CHRISTIAN ADVOCATE was first issued on January 5, 1853, from the office No. 63 Randolph Street, as a weekly newspaper, with James V. Watson, editor, and William M. Doughty, agent. It was published by Swormstedt & Poe, for the Northwestern Conferences of the Methodist Episcopal Church, and printed by Charles Philbrick. Prior to the regular publication of the paper, a prospectus had been issued in September, 1852, containing substantially the same matter as that which appeared in the first number. The editor, Rev. J. V. Watson, who resided in Adrain, Mich., before he assumed charge of the paper, was one of the ablest and wittiest of editors, and was a martyr to asthma; constantly apprehending that this disease would cause his demise. The paper which he edited was a six-column folio, eighteen by twenty-five inches to the page;

was rigidly anti-slavery; tenaciously anti-spiritualism, and an unflinching and fearless advocate of Methodism in the Northwest; true to its name. The paper maintained its equable and successful career without change until October 17, 1856, when the Rev. J. V. Watson died of pulmonary consumption. The Press were unanimous in their tributes to his editorial ability, the nobility of his manhood and the exalted nature of his Christian manhood. November 5, 1856, a new editor was announced, the Rev. Thomas M. Eddy, of the Southeastern Indiana Conference, he having been called from the Indianapolis District where he was traveling, as Presiding Elder, when elected to this important position by the Conference. November 4, 1857, when Mr. Eddy had just celebrated one year's occupancy of the editorial tripod, the office of the newspaper was moved to 66 Washington Street.

In addition to the exposition of creeds and the elaboration of dogmas, the religious press, as well as the secular, find it necessary to obtain subscribers in sufficient numbers, who demand the mental food furnished by the paper, to pay for the expenses of its publication; although the system pursued by the Methodist Episcopal Church of promulgating the interests of the several advocates of their ecclesiastical polity, removes from those papers a number of the obstacles that impede the financial progress of a secular paper. It is, however, a matter of record that the Northwestern Christian Advocate has been unusually successful in its career as a newspaper and as a champion of the Church whose tenets it propounds, elaborates and defends, and Bishop Ames, in alluding to the vast numbers of Methodists in the Northwestern States, ascribed their zeal and numerical strength to the influence exerted by this paper.

The reason for the establishment and maintenance of the organs of the Methodist Episcopal Church, ascribed by Dr. Arthur Edwards,* is so pertinent and trite that it is given as advanced by that gentleman:

"*Methodism prints.* There is no doubt of that fact. Why she prints is explained very naturally. John Wesley was a seer. When he was not praying or preaching, he was staring into the face of a printed page. Amid his prodigious labors for the Church, he did an immense amount of reading. Few men in literature have been such judges of books as was our founder. He knew the good by instinct, and repelled the bad book as an alert conscience rebukes advancing sin. The invented printing-press with its rude appliances came—but not by chance—in the very nick of time to make Luther's work possible. When God sent that greatest ecclesiastical event since the advent of Christ-Methodism into the world, the improved printing-press and cheaper book made John Wesley's work practicable. Therefore, just as great railway magnates outfit their own 'special cars,' so Wesley fitted up his own private carriage that he might read comfortably while he flew over the Kingdom. Presently, dissatisfied with books as they were, he began to write and re-write and edit books for his people. Next in order, he began to own presses, which he employed to carry help, suggestion, warning and zeal to his rapidly multiplying societies. Some active minds then, as also in modern times, wondered why Methodism did not content itself with what other people printed. When our Book Concern was in full operation nearly fifty years ago, it was proposed to abolish our Church presses and confine our reading to that which others would contract to print for us. Even now it is occasionally said that our Church might as well operate railroads and conduct banks as to own

* METHODISM AND LITERATURE; by F. A. Archibald, 1882.

and superintend printing offices. The suggestion would be valid if the financial results of railroading and banking and printing were the central thought and motive. We do print, on the same philosophy that occasionally moves a Church or Sunday school to charter a train for a specific excursion and for definite results. When a Methodist party makes its plans for a day, and wishes to control the hours of starting and return, and particularly desires to determine who shall be passengers and favored guests, it goes into the railway business, induced by the same motives that sanction the permanent existence of distinctive Methodist printing. We get a suggestive hint in the fact that two literary institutions in this country possess a catalogue of over seven hundred separate volumes of books written in opposition to Methodism. We happen to know that this large list does not contain all extant anti-Wesleyan literature. These volumes were written under the stimulus of men who did not love our Church, and the physical fact of the printing proves that the kingdom of printing-ink must needs be taken by Methodists violence. Methodism was young, and the Methodists were too poor to buy dear books written in their defense. A hundred considerations led Wesley to supply books from his English presses for our people, and equally led our early workers to organize printing facilities for American Methodists long before they began to build and dedicate houses of worship. We cannot forget that the Frenchy flavor that tainted English society and literature after the restoration of Charles compelled Wesley to provide cleaner things for his people. The entire tide was against evangelical Christianity. If society and the press have pure features in this country, the credit must be shared with the influence of the Wesleyan printing presses which came to evangelize the New World."

The following is taken from the earliest issue of the Advocate, as an evidence of the talent of the editor, and an exposition of a part of the principles upon which he contemplated conducting the paper:

"We can never suffer the doctrines of our Church to be challenged in our columns, or our discipline to be assailed. But to any contribution that evolves, teaches and enforces the former, or even proposes *improvements* in the latter, we shall never feel at liberty to close our columns. We fear nothing, but hope everything, from the freedom of speech. We shall speak, ourselves, freely, and shall never be found fettering the lips of others. We shall never be found a stickler for things morally indifferent, magnifying the 'mint and the anise,' canting, and pandering to a fossilizing conservatism, sneaking into the coverts of non-committalism, or mounted upon a hobby of ultra progressionism. We shall never be found so visionary as to hope to escape censure, so accustomed to it that it will not grieve us, or so reckless as intentionally to deserve it. Of the persons who have a right to be heard in our pages, of the appropriateness of the language in which their communications are clothed, of the suitableness of their cogitations to promote truth and righteousness, we are to be the judge. Delicate responsibility! We assume it."

In the issue of February 23, 1853, there is an article upon a social gathering, held at the residence of D. M. Bradley, of the Chicago Democrat office, wherein Mr. Bradley is designated the oldest resident "knight of the quill" in the city. The editor, in recounting the incidents of the evening, states that "all felt, and many said, amen, to the prayer of the esteemed pastor present, which in spirit resembled one we once heard from a good brother in Michigan on a similar occasion: 'We thank Thee, O Lord, that *one* thing is not good; it is not good for man to be alone.' Brother Bradley deserves well of the Church for the interest he has taken, and aid he has rendered, personally and with his pen, in the establishment of the Northwestern Book Concern." Volume III, Number 1, of the date January 3,

1855, came out in a new dress of typography, and with a new heading, Northwestern Christian Advocate.

Recurring to the death of Rev. J. V. Watson, as one of the most marked events in the history of the Advocate prior to 1858, the incomplete editorial hereto appended, with the editorial comments of his surviving co-laborer, evinces the pertinacious adherence to his duty of him, who, while in the very clutch of the "grim reaper," thought so earnestly of an appeal for the service of his Master; the last effort of Mr. Watson's life being an entreaty for the united assistance from Christians to further the enlightenment of their benighted fellow-creatures.

OUR MISSIONARY TREASURY.

"Brethren, we tremble every time we mention these words. Not indeed that we are upon the verge of bankruptcy. We believe our Zion, as yet, has taken hold of no burden that it cannot lift; but we now and then hear curtailment talked of. Well, whom shall we call home? Where shall we commence this curtailment? How much will it promote the honor of the Church and the glory of God? Help, brethren, help! This will never do. We must apply the discipline in raising funds for this holy purpose, to the very letter, and the work will be done, ay, more than done. Means should be resorted to extraordinary where the ordinary cannot meet the emergency immediately. Gold and silver, brethren! It belongeth to the Lord and for the sake of millions ready to perish, let it be put into the treasury of the Lord. The cause of missions is the cause of causes. It is the Church's noble right arm. O let not its strength be enfeebled! Where is the one who has not a dollar for the treasury of the Lord in this emergency? We long to hear from the communications of our able secretary a more liberal tone of spirit on this subject. We have said we trembled when we mentioned the words which head this article. Well, we have. We have trembled for the blessing of God upon the Church. We have trembled for his blessing upon our baskets and store. We must bring all the tithes of the Lord into the Lord's house. 'To him that hath shall be given; to him that hath not shall be taken away even that which he hath.'

["The above are among the dying words of the late beloved editor of this paper. On the evening before his death he dictated to the writer of these lines about half a column of matter for this issue, of which the above is a part. Though in great and increasing bodily weakness for months, it was a relief to him to feel that he was still serving the Church, and he continued to labor until the last, dictating from three to five columns per week for his sheet. In our last were five columns from him. This week his labors were commenced by the preparation of the short article headed 'Want of Sectional Independence.' But his tongue faltered and for the first (time) his paper is 'short of editorial.' When writing for him the above, we were conscious of his near dissolution, and those earnest words, so slowly and faintly spoken, sounded to us like the faltering notes of the dying swan, rather, as they were, like soul-breathings from the spirit world; like pleadings from the upper Canaan for the work of grace below. 'Help, brethren, help!' still sounds in our ears. Before this plea was in type, the soul of the pleader was before the Throne."—Northwestern Christian Advocate, October 22, 1856.]

THE OLIVE BRANCH OF THE WEST was published for a short time in 1853 by Rev. J. R. Balme, pastor of the Salem Baptist Church.

THE CHICAGO HOMEOPATH, a monthly popular journal of homeopathy, was started in January, 1853, by Drs. D. S. Smith, S. W. Graves and R. Ludlam, and was continued until December, 1856, being discontinued upon the completion of the third volume. The editors in January, 1854, were Drs. R. Ludlam and D. Alphonso Colton.

THE CHICAGO COURANT, an independent daily, was issued November 16, 1853, with William Duane Wilson as editor. On the 12th of April, 1854, the paper was enlarged, and a notice is extant of its existence upon May 31, 1854. About that time it passed into the hands of Messrs. Cook, Cameron & Patterson, and these gentlemen stopped the running of the Courant, and, in lieu of it, about July 4, 1854, issued Young America, a daily and weekly Democratic paper, with J. W. Patterson as editor. James W. Sheahan was at this

time in the East, and at the solicitation of the publishers of this paper came to Chicago. After some negotiations with these gentlemen, they sacrificed Young America to the manes of Americus Vespucci, and Mr. Sheahan, on August 20, 1854, issued the first number of the Chicago Times, a Democratic daily paper, from the office on LaSalle Street, next door to Jackson Hall, the old headquarters of "Long" John Wentworth. In the spring of 1856 the publishing was conducted by Cook, Cameron & Sheahan, with Mr. Sheahan in the editorial chair. In the autumn of the same year James W. Sheahan and Daniel Cameron were the editors and proprietors, and early in 1857 the office was removed to 112 Dearborn Street, when Andre Matteson became city editor. The files of the Times that were in the office of the paper were sent to the house of D. B. Cooke & Co. to be bound, in 1857, and were destroyed in the fire that consumed that place of business October 19, 1857.

THE TRAVELLER, by James M. Chatfield, John Chatfield, Jr., William B. Doolittle and Lee Lars, is mentioned in the Directory of 1853.

THE HEMLANDET, DET GAMLA OCH DET NYA, was first published at Galesburg, Ill., in 1853, and removed to Chicago in 1854, with Rev. E. Norelius editor. It was a weekly newspaper, and the first published in the Swedish language in this city. It was the organ and advocate of the Swedish Lutheran Church, and was subsequently published by the Lutheran Publishing Society, with Rev. Erland Carleson as editor.

THE MAINE-LAW ALLIANCE, a temperance weekly, was published in the spring of 1854, by Hiram W. Jewell, with Rev. B. E. Hale, Rev. F. Yates and Dr. Charles Jewett, editors. Rev. D. Crouch took Mr. Hale's place in August, 1854.

THE FREE WEST, by Goodman, Warren & Eastman, was published in 1854, and sold to the Tribune in 1856.

THE SATURDAY EVENING MAIL, a temperance paper, George R. Graham, editor, was started in January, 1854, but soon died.

THE CHICAGO PROTESTANT was begun January 25, 1854, as a monthly; Hays & Thompson, publishers. It had a short career.

DEUTSCHE AMERIKANER, by George Schtaeger, lived for a short period in 1854. Mr. Schtaeger then went on the staff of the Staats Zeitung.

THE ATLANTIS, by Christian Essellen, a monthly, saw the light dimly in 1854.

The Associated Press dispatches were furnished the Chicago dailies in November, 1854.

THE CHICAGO PATHFINDER, began its work April 21, 1855, as a weekly record of railroad and real estate transactions, under the editorship of W. B. Horner; Horner & Crone, publishers.

THE CHICAGO BANK-NOTE LIST entered the field as a claimant for public patronage, July 17, 1855. Its columns were devoted to the reporting of matters financial, with an especial reference to the means of detecting counterfeits, and containing a report of the banks that were in embarrassed condition or had ceased to be solvent. It was published and edited by F. Granger Adams, banker, at No. 44 Clark Street. Information as to the duration of this paper is lacking, but it is a matter of record, from contemporaneous publications, that its semi-monthly issuance continued beyond the epoch treated of in this volume of History, as in the Directory for 1858, published January 1st, in that year, it is designated among the publications then extant; and a notice of the paper in June 3, 1857, being now in existence,

wherein it is stated that it is issued on the 10th and 25th of every month, also monthly; the price of the former, being \$1.50 per annum, and of the latter, \$1.00 per annum.

THE ILLINOIS GAZETTEER AND IMMIGRANTS' WESTERN GUIDE, was published by Henry Greenbaum and T. W. Sampson, M. D., and edited by William Bross, A. M. This sheet was of similar size and make-up to the Democratic Press, and contained carefully collated statistics of manufactures, trades, commerce, etc., upon the first three pages and a map of Illinois and adjacent States upon the fourth. This was apparently but a sporadic and single publication, and appeared in August, 1855.

BEOBACHTER VON MICHIGAN, a Douglas paper, was published weekly, in 1855, by Messrs. Committi and Becker. It lived about a year.

THE NATIVE AMERICAN, a daily, was started by William Weaver Danenhower, on September 7, 1855, in the interest of the Native American party, whereof Washington Wright was editor. A weekly edition was also published, and both were maintained until the first Wednesday in November, 1856, when they were discontinued. Mr. Danenhower is the father of Lieutenant J. W. Danenhower, the Arctic explorer, and Chicago, in addition to her many other causes for distinction, has the honor of being the birth-place of Lieutenant Danenhower.

In 1855, R. P. Hamilton issued a paper designated THE COURIER.

DER NATIONAL DEMOKRAT, a daily and weekly German newspaper, was first issued on October 15, 1855, by J. E. Committi publisher, with Dr. Ignatius Koch as editor in chief, and J. E. Committi as local editor. The office of the paper was at 55 LaSalle Street, near Randolph, and it was what, in those days, was called a "Douglas paper." In 1856, its publication was transferred to Michael Diversey; Dr. I. Koch and Louis Schade, editors. In this year Mr. Schade published a tri-weekly edition of the paper in English, but this arrangement lasted only two or three months. In 1857, Fritz Becker was the publisher, and the editors were Dr. I. Koch and Victor Froehlich. Beyond these meager details nothing is known of this paper, and for these the public is indebted principally to J. E. Committi. The office in 1857 was removed to 240 Randolph Street.

THE AGE AND LAND WE LIVE IN, was projected in 1855 by E. H. Hall & Co., but the magazine never appeared, and remained inchoate in the brains of its projectors.

THE WESTERN CRUSADER, a temperance weekly, was started in October, 1855; the title being changed to Northwestern Home Journal in June, 1856. Its chief editors were Rev. Thomas Williams and Orlo W. Strong. In 1857 James B. Merwin was editor. F. H. Benson & Co., publishers.

THE CHICAGO HERALD was issued from 93 Dearborn Street, in September, 1856, by T. R. Dawley, as a penny daily, with weekly edition. It ceased in 1857.

THE PEN AND PENCIL, by T. R. Dawley, was a

weekly art and story paper, contributed to by T. Herbert Whipple and others. It lived and died in 1856.

THE SUNDAY VACUNA, the first excessively Sunday paper in Chicago, was another of Mr. Dawley's unsuccessful efforts in 1856.

THE WESTERN GARLAND, a literary monthly, issued simultaneously in Chicago, Louisville and St. Louis, founded by Mrs. Harriet C. Lindsey & Son, with R. R. Lindsey, editor, in this city, reached the third or fourth number here in 1856. Its history elsewhere is not obtainable.

THE COMMERCIAL BULLETIN AND NORTHWESTERN REPORTER, by C. H. Scriven and John J. Gallagher, was published in 1856.

ROUNDS' PRINTERS' CABINET.—The typographical supply business out of which grew the Rounds' Printers' Cabinet, was founded by James J. Langdon, who was the foreman of the Journal office in 1848. Sterling P. Rounds was a sophomore of the job printing office of the Buffalo Commercial Advertiser, and while located in Racine, Wis., filling the "Old Oaken Bucket" with temperance stories and prohibitive arguments, received an invitation from Mr. Langdon to come to Chicago and go into business with him. Some time subsequently—after sinking his finances in a newspaper in Milwaukee—Mr. Rounds reached Chicago upon a borrowed capital of \$5.00 and went into business with Mr. Langdon, who, shortly thereafter, went to Prairie du Chien, Wis., and embarked in the horse-business; but finding that his horses were so many Pegasuses which lent wings to his circulating medium, Mr. Langdon returned to Chicago and again went into partnership with Mr. Rounds—who had carried on the business alone *ad interim*—the firm name being Rounds & Langdon. In December, 1856, the first number of Rounds' Monthly Printers' Cabinet was issued, the size of its pages being twelve by seventeen and one-half inches, containing four pages and having four columns to the page. The irregularity in the issue of this paper made number four appear in May, 1857. The first number was prepared under the auspices of S. P. Rounds alone, but in October, 1857, the names of Rounds & Langdon appear as sponsors for its existence. In December, 1856, there was but one other journal in the United States that was devoted exclusively to the interests of the "art preservative"—the Typographic Advertiser; Rounds' Cabinet being the first of that character in the Northwest, the second in the United States in its date of issue, and the *first* monthly typographical journal in the Union.

THE PRAIRIE LEAF, a monthly, by D. B. Cooke & Co., 1856, was a literary and advertising periodical.

THE WESTERN JOURNAL OF MUSIC; William H. Currie, editor; R. G. Greene, publisher; lived in 1856.

THE FLOWER QUEEN was published in 1856.

THE DEMOCRATIC BUGLE, by Charles Lieb, was a weekly which was in existence in 1856.

THE WESTERN ENTERPRISE, an agricultural weekly, by Porter Little, was brief lived and became merged in the Prairie Farmer in 1856.

In 1857, a paper designated the CHICAGO DAILY UNION was issued by the Chicago Union Printing Company. Louis Schade was the ostensible editor; B. H. Mayers, the city editor, and T. Herbert Whipple, the news editor and proof-reader.

On February 21, 1857, an evening journal called the CHICAGO DAILY LEDGER, was published by Barnes, Stewart & Paine, with Seth Paine as editor. This eccentric sheet was printed at the machine shop of P. W. Gates.

THE CHICAGO RECORD was issued by James Grant Wilson, editor and proprietor, as a monthly magazine devoted to religion, literature and the fine arts, on April

1, 1857. This journal was the first recognized advocate of the Episcopal Church in Chicago.

THE SATURDAY EVENING CHRONOTYPE was established, June 27, 1857, by Charles A. Washburne, editor and proprietor, as a literary paper of high order; but the panic prevented its success, and on September 26, 1857, it died.

In August, 1857, H. D. Emery sent out a specimen number of EMERY'S JOURNAL OF AGRICULTURE, the first number of the regular issue of which paper was announced to appear January 1, 1858.

In 1857, Charles Hess published the ZEITGEIST, a German weekly, of which Ernest Goeders was the editor. Its life is alleged to have been brief and erratic, and it was the exponent of ultra radical ideas.

THE NORTHWESTERN BANK NOTE AND COUNTERFEIT REPORTER is reported as having been published by Isaac A. Pool, in 1857. There is a possibility that this paper may have existed in 1853, as in the directory for that year appears a mention of a Bank Note Reporter, but neither editors nor publishers are named.

In March, 1857, James Grant Wilson, editor (Carney & Wilson, publishers), began the publication of a monthly magazine designated the CHICAGO EXAMINER, devoted to literature, general and Church matters.

In 1857, Messrs. P. L. and J. H. Wells published a weekly paper called the COMMERCIAL EXPRESS, and also a commercial journal, daily, called the MORNING BULLETIN; both publications being issued in the mercantile and commercial interests of the city.

THE SVENSKA REPUBLIKANAREN was commenced in Galva, Ill., in 1855, and was moved to Chicago in 1857, with S. Cronioe as editor. It was a secular, or liberal paper, founded as especially antagonistic to the Hemlandet, by the Bishop Hill colony of Swedes.

In the spring of 1857, S. P. Rounds published the SUNDAY LEADER, the first exclusively Sunday newspaper issued in Chicago of any permanence. One of its distinguishing features was its chess column, edited by Lewis Paulson. Among other contributors, Andrew Shuman furnished a column (sometimes two) every week; H. M. Hugunin supplied a column, and Rev. A. C. Barry gave "Whittlings from the Chimney Corner." Edward Bliss was the managing editor, and William H. Bushnell, one of the pioneer editors of Chicago, was sub-managing editor.

In 1857, subsequent to the establishment of the Sunday Leader, the SUNDAY HERALD was started in opposition thereto; it ran about a year.

THE TRESTLE BOARD was started by J. J. Clarkson about March, 1857, as editor and publisher, at No. 50 Clark Street, devoted to the interests of the Masonic fraternity.

THE ASHLAR, a Masonic monthly magazine, owned and edited by Allyn Weston, was removed from Detroit to Chicago, in September, 1857; the first number printed in Chicago, by Charles Scott & Co., being the first first number of the third volume. It was, as its name implies, devoted to the interests of the Masonic fraternity, and was conducted with marked ability and careful conservation of the "lights, rites and benefits" pertaining to this powerful organization. The magazine was one of the oldest in the Northwest—the first number having been issued in September, 1855.

In 1857, Gallagher & Gilbert published the REAL

ESTATE NEWS LETTER AND INSURANCE MONITOR, monthly, and but for a very few months.

G. W. Yerby & Co., real estate dealers, in 1857, edited and published a few numbers of a monthly called the REAL ESTATE REGISTER.

Higgins Brothers, in 1857, published the CHICAGO MUSICAL REVIEW, from 54 Randolph Street, of which C. M. Cady was the editor, and Pool & Spaulding the printers. The Review lasted but a short time.

THE CHICAGO MAGAZINE, published by John Gager & Co., and edited by Zebina Eastman, was devoted to literature, biography, historical reminiscence, etc., profusely illustrated with engravings relevant to the text. The first number was issued March, 1857, and therein it was specified that the projectors and publishers contemplated an exemplary longevity therefor, but after the issue of the March, April, May and June numbers, the July number was omitted, and with No. 5 in August, 1857, the Chicago Magazine suspended, greatly to the loss of the literary interests of the city, as it was ably conducted, and its historical sketches, biographies, etc., were exceedingly valuable and accurate.

LE JOURNAL DE L'ILLINOIS was first issued in Kankakee, as a weekly paper, on January 2, 1857, by A.

A. Grandpré

Grandpré and Claude Petit, this being the first French newspaper published in the State. In September of that year it was removed to Chicago, under the same management, the first number being issued in this city September 18, 1857; the first French newspaper published here. It then became a semi-weekly journal, and was so continued until December 18, 1857, when it was changed to a weekly, published on Friday. Upon July

Claude Petit

16, 1858, the publication was discontinued, the editors subsequently removing to Kankakee and publishing Le Courrier de l'Illinois.

It is not improbable that, owing to the scarcity of records, some newspapers have been omitted from the foregoing list. It will readily be understood how impracticable it is to trace out, from beneath the ruins of the fire of 1871, information concerning temporary issues. Should it be found that essential omissions have been made, the subsequent volumes of this work will afford a means of rectifying errors. The plan of this History necessitates the arbitrary closing of all sketches at the year 1857; and reference is here made to the future volumes for the completion of the chapter on the Press.

PRINTERS, LITHOGRAPHERS, BOOKBINDERS AND STATIONERS.

In the following pages are given outlines of the founding of the printers and kindred mechanical arts in this city:

The first job printing done in the city was by John Calhoun, in 1833. The earliest carriers' address was issued by Mr. Calhoun January 1, 1836. Caricature cuts were inserted in the Democrat as early as 1840, and

humorously illustrated advertisements date from about that period.

The earliest printers in Chicago were undoubtedly the two apprentices whom John Calhoun describes in his autobiography as having been sent here in charge of his press and printing material. Their names are unknown; but in Mr. Calhoun's account book, in the possession of the Chicago Historical Society, appear the names of David Johnson, August 22, 1834; Ballard, October 6, 1834; Stevens, no date specified; Charles H. Sedgwick, September 6, 1835, and A. L. Osborn and James Mead, 1836; the dates given being those whereon settlement was made, and the price paid for typesetting being twenty-five cents per thousand ems; these—with John Calhoun himself—being therefore among the earliest printers in Chicago. After Mr. Calhoun had commenced the issue of his paper early settlers recall one Timothy C. Ellithorpe, as a compositor upon that paper who Mr. Eastman* states, was a refugee from Canada, during the Rebellion, in which country he had commanded a company of the revolutionists. Another very early printer was Hooper Warren who edited his articles at the case. As his ideas took form in his brain they became words and sentences in the "stick," his lucubrations being put into type as Robert Fergus constructed his directory, without the customary intermediate use of copy. N. D. Woodville was another of the primitive compositors, and was a son-in-law of John Baptiste Beaubien. He was subsequently employed as copyist by L. P. Hilliard in the County Clerk's office, and is reputed to have died poor—as so many of the typographers have done and are doing. Thomas O. Davis, the editor of the first Chicago American, in 1836, was another early printer, and John Wentworth states that Abiel Smith worked as pressman on the first number of that paper issued, and subsequently worked at Mr. Wentworth's hand press, until the arrival of the power press. Daniel E. Sickles, whose name has been prominently associated with Washington and military annals, was an apprentice at Smith's office.

The oldest pamphlet extant, and the earliest of which there is any record, is one of thirty-six pages, and is "An Act to incorporate the City of Chicago, passed March 4, 1837. Chicago Printed at the office of the Chicago Democrat. 1837."† It is undetermined whether the second pamphlet was "An oration delivered on 4th July, 1839, at Peru, La Salle County, Illinois, by George W. Holley; printed at Chicago American Office, corner Clark and South Water streets, 1839;"‡ or the "Laws and Ordinances,"§ ordered printed by the Common Council in 1839; an account of which appears under the portion of this article devoted to Directories. The printing of the oration appears to have been performed some time in July or August; as the manuscript was handed over to the printer July 10, 1839. The printing of the laws and ordinances was performed by Ellis & Fergus; Robert Fergus being the oldest Chicago printer now living.

The first law book published in Chicago was "The Public and General Statute Laws of the State of Illinois," by Stephen F. Gale, in 1839; the introduction by the compiler—a Mr. Gates—being dated April, 1839. The book was printed and bound by O. C. B. Carter & Co., Roxbury, Mass., and a copy is in the Chicago Law Library.

*"Early Printers of Chicago" by Zebina Eastman in Rounds' Printers' Cabinet, October, 1880. Other authorities state that F. T. Ellithorpe was the *ci devant* Republican from Canadian soil.

† In possession of Chicago Historical Society.

‡ Ibid.

§ Copy in possession of Mrs. J. Murphy; widow of the proprietor of the Sauganash Hotel.

The next pamphlet appears to have been "A Eulogy upon the life and character of President William H. Harrison," delivered by G. A. O. Beaumont, May 14, 1841, reported in full in the Daily and Weekly American of that period, and which pamphlet was printed in that newspaper office. As described in the Bibliography of Ohio, by Peter G. Thomson, (Cincinnati, 1880,) it was a duodecimo of twelve pages. The first book written in this city was the History of Baptism by Rev. Isaac Taylor Hinton, an advertisement of which appears in the Daily American of May 1, 1840, and in the same paper under date September 28, 1840, it is stated as for sale. The first work compiled and printed in Chicago, was Jonathan Young Scammon's reports, that were in the hands of the binder, at Holcomb & Co.'s establishment, when it was destroyed by fire in December, 1840.* The first lampoon discoverable, is one published in 1843, entitled :

THE CHARIVARI †

what took place and what didn't take place on the evening of
January 19th, 1843, in the city of

JAPAN, KAMSCHATKA CO., ILLS.,

what was done and what wasn't done by the

SHEET IRON BAND

a full report of the apprehension of the rioters, and their examination, including what was said and what wasn't said on that occasion

BY ROCKY MOUNTAIN, ESQ.

The whole embellished with an engraving to match.

The first book compiled, printed, bound and issued in Chicago, was the Directory for 1844, which was placed upon the market in the year 1843. The following list of directories, published anterior to 1858, is given for the information of Chicago bibliophiles :

* Norris' Chicago Directory for 1844, compiled by J. Wellington Norris, printed by Ellis & Fergus, Saloon Building.

* Norris' Chicago Directory for 1845-46, compiled by J. W. Norris, printed by † J. Campbell & Co., Commercial Building, 65 Lake Street.

* Norris' Business Directory, for 1846; Eastman & Davison, printers, 63 Lake Street. [This directory was "set up" from all the fonts in the printing office.]

* Norris' Chicago Directory for 1846-47; Geer & Wilson, printers, Daily Journal Establishment, Saloon Building.

* Illinois State Register and Western Business Directory for 1847; Norris & Gardner, editors and proprietors; Geer & Wilson, printers, as above.

† Norris' Chicago Directory § for 1848-9, published by J. W. Norris and L. S. Taylor. Eastman & McClellan, printers, (Power Press, office of the Western Citizen) 63 Lake Street.

* Chicago City Directory and Annual Advertiser for 1849-50, by O. P. Hatheway and J. H. Taylor; James J. Langdon, book and job printer, 161 Lake Street.

† Chicago City Directory for 1851, by W. W. Danenhowe, printed by James J. Langdon, 161 Lake Street.

† Chicago Directory for 1852-53, by Udall & Hopkins, printed by Langdon & Rounds, 161 Lake Street.

† Chicago Directory for 1853-54 by Hall & Smith, printed by Robert Fergus, book and job printer, 55 Clark Street.

† Chicago Directory for 1854-55, by Edward H. Hall & Co., printed by Robert Fergus, book and job printer, 55 Clark Street, third floor.

* The second edition was printed by Thomas G. Wells, Cambridge, 1841; a copy of this edition is in the Chicago Law Library.

† In possession of R. T. Martin.

‡ The firm of Campbell & Co. came to a premature dissolution; Mr. Campbell, becoming incensed at Mr. Norris (the Co.), forcibly ejected him from the office, and threatened to kick him if he looked back. Some gentlemen, discussing the matter with Mr. Norris, asked him if he emulated the example of Lot's wife; Mr. Norris replied: "No; I didn't look back!" This incident severed the copartnership. The published notice—April 15, 1845—specifies that J. Wellington Norris and James Campbell have this day dissolved their partnership. Mr. Norris is authorized to dispose of the Chicago Directory from and after this date, and to collect all moneys due upon the same. All demands against the late firm of J. Campbell & Co. will be settled by James Campbell, to whom all money due said firm must be paid. Daily Journal, April 16, 1845.

§ This directory being designated the seventh of the Norris series, would suggest the probability of a Business Directory having been issued in 1847-48, but a copy of such a publication has not rewarded the search of the compiler.

† Chicago Directory for 1855-56; E. H. Hall, compiler; Robert Fergus, book and job printer, 189 Lake Street.

† The Northern Counties Gazetteer and Directory for 1855-56, brought down to November, 1855; E. H. Hall, compiler; printed by Robert Fergus, book and job printer, 189 Lake Street.

¶ † Case & Co.'s Chicago Directory for 1856-57; John Gager & Co., publishers, 84 Dearborn Street. John Gager, compiler; A. B. Case and Charles Scott, printers; Culver, Page & Hoyne, binders.

¶ † Business Directory of Chicago for October 1, 1856, published by John Gager & Co., to precede their City Directory. Solas, Zellis, Dow & Co., book and job printers, 148 Lake Street, over Keen & Lee's book-store.

† Gager's Chicago City Directory for the year ending June 1, 1857; compiled by John Gager; John Dow, printer, 148 Lake Street; published by John Gager & Co., City Directory office.

The following account is taken from the introduction to Robert Fergus's Directory for 1839, re-published in 1876: "In September, 1839, the Common Council ordered the revision and printing, in pamphlet form, of the laws and ordinances of the city. The work was tendered to Messrs. Rudd & Childs, printers, but they, not being able to find sufficient funds, offered to transfer the contract to the subscriber, who accepted and fulfilled it. There were six blank pages at the end, and Mr. Childs suggested the filling of them up with the names of the business men of the city, which was immediately done; no canvass was necessary, and the names were never written—each name, as thought of,

Edward H. Rudd

was forthwith set up by the subscriber, until the six pages were completed. It never was supposed that the names of all the business men of the city were included in this list, but the necessary pages were filled up, and the title given those names the Chicago Business Directory. There were no numbers on any street (except Lake Street), at that time—the numbers now given are those of the present day [1876]." On the completion of the laws and ordinances, fifty copies were delivered to the city, and the sum of \$25 was ordered paid, January 27, 1840. (See Common Council Proceedings, published in the Daily Chicago American, January 2 and 29, and February 22, 1840).** About fifty copies were sold to the citizens at fifty cents per copy; the balance of the five hundred were never used in public. This old business directory was reprinted, with all its imperfections, in the Chicago Republican and in Hurlbut's "Antiquities." In this latter work there were a few additional errors made in its reproduction. Mr. Fergus states that for years the old business directory lay upon the imposing stone, and that as memory would recall some inhabitant of Chicago in 1839, his name would be set up and added to the nucleus upon the stone, until a proof was subsequently taken therefrom. As the directory was afterward presented to the public, it received the highest eulogium from old settlers for accuracy and lack of omissions, and is now one of the standard works of reference for early Chicago settlement.

In 1844, the third and fourth volumes of Scammon's Reports were printed by Ellis & Fergus; the first work of this kind that was completed and presented to the public.

The directories marked with * are in the possession of R. T. Martin; those marked † are at the rooms of the Chicago Historical Society.

¶ These two directories are for the same year; Case's having been published prior to that designated, Gager's as shown by names that appear in Case's as received "too late for classification," being in Gager's, alphabetically classified in the body of the work.

** See City Treasurer's Quarterly Report for January, February and March, 1840. See also, Common Council Proceedings (in City Clerk's office), dated February 20, 1840.

The first historical work is also the result of Ellis & Fergus's typographical skill; the pamphlet being of thirty-four pages, and entitled "The Massacre at Chicago, August 15, 1812, and of Some Preceding Events." It was printed in 1844. A copy is preserved in the Historical Library, Madison, Wis.

The narrative was transcribed in a small blank-book and was set from that manuscript; the narrative itself afterward being incorporated in Mrs. Kinzie's work, "Wau-bun," wherein also appeared a statement that the story of the massacre was first printed in 1836. This assertion Mr. Fergus pronounces erroneous, there having been no office capable of its production in that year in Chicago, and no book-binder here to bind it. Mr. Fergus emphatically states that the narrative of the massacre was not published until the year 1844. John Wentworth makes the same statement in his able and exhaustive papers upon Fort Dearborn (Third paper, Fergus' Historical Series), and with two such authorities* the matter would appear to be definitely decided.

The first volume of poems published in Chicago was "Miscellaneous poems, to which are added writings in prose," by William Asbury Kenyon.† Printed by James Campbell & Co., 1845, sold by Brantigan & Keen, S. F. Gale & Co., W. W. Barlow & Co., and Comstock & Ackley. The Daily Journal of January 23, 1845, has an advertisement that Kenyon's poems are just published and for sale at 146 Lake Street, by Brantigan & Keen.

The bibliopegic labor upon some of these books was performed by Ariel Bowman and Hugh Ross, the earliest of Chicago's book-binders. The typographical succession of this firm is: Ariel Bowman, who came to this city in 1840; Hugh Ross, who is specified in the directory for 1839 as a book-binder and paper-ruler; these gentlemen entered into a copartnership with their place of business at 35 Clark Street, Saloon Building, which was dissolved September 14, 1843, the firm being succeeded by J. A. Hoisington, with the place of business at Saloon Building, 45 Clark Street, opposite the City Hotel, who associated with him, about 1847, William Stacy, and the establishment was at 61 Clark Street, the business house being removed in 1850 to 79 Lake Street, Tremont Block. In 1852, Mr. Hoisington, who was a protégé of Mr. Bowman's, and his son J. A. M. Hoisington withdrew, and William Stacy continued the business at the corner of Lake and Clark streets. In 1854, Culver & Page bought out Mr. Stacy. The following year Mr. Hoyne became a member of the firm, and the house of Culver, Page & Hoyne became identified with Chicago's commercial interests. This concern in 1855 was the first in the United States that printed county record forms for the use of county officers, that since their introduction have been adopted in nearly every State in the Union. Gustavus Braunhold was the first book-binder who operated upon German books alone. He established the business in 1848, associating with him Charles Sonne, in 1850.

The first engraver in Chicago was Shuball D. Childs, who was engaged with Edward H. Rudd, at the Saloon Building, in engraving, book and job printing, in 1839, and some subsequent years; and with R. N. White, in engraving, from 1845 to 1853. Joseph E. Ware came to this city in 1840; the names of the following engravers are collated from the directories for the various

years whose dates supplement their names: Miss H. Case, Herman Bosse, 1849; Frank E. Thomas, S. D. Childs, junior, both employed with S. D. Childs, senior,

S. D. Childs

1850: A. W. Morgan, 1851; E. H. Brown, G. W. Humphrey, Henry R. Kretschmann, A. Kretschmann, William James White, John Waller, D. Morse and Rudolph Zollinger, 1852; Reuben Carpenter, Goss and Abbott, Edward Entwistle and Adam Fox, 1853.

The earliest "Chicago Book and Stationery Store" was that of Aaron Russell, formerly of Boston, and Benjamin H. Clift, from Philadelphia, who advertised in the Democrat of August 26, 1834, that they intend opening a store of that description adjoining P. Carpenter's drug establishment, on Water Street. The partnership was dissolved October 22, 1835, and Mr.

B. H. Clift

Clift announced that he would continue the business. In the American of June 18, 1836, B. H. Clift advertised law, theological, medical and miscellaneous books, stationery and paper-hanging. T. O. Davis, the publisher of the American, also had books for sale June 8, 1835. Another early Chicago bookseller was Stephen F. Gale, who advertised a map of Cook County as for sale at his store, in the American of January 9, 1836. Augustus H. and Charles Burley were clerks at Stephen F. Gale's store in 1844, and the following year A. H. Burley became a partner of Gale's; in 1846 A. H. and C. Burley succeeded S. F. Gale at his old place of business, 106 Lake Street, moving to 122 Lake Street about 1848. This firm inaugurated the art-union system in Chicago, with some twenty paintings purchased "during the recent revolution in Paris" (Journal, September 10, 1850), and which they disposed of by the sale of two hundred and fifty tickets at three dollars each, and a subsequent drawing on November 15, 1850. Joseph C. Brantigan and Joseph Keen had the Franklin Book Store in 1845, the firm also being designated Brantigan & Keen, the latter partner appearing to have succeeded to the business. He in turn was succeeded by Joseph Keen, junior, and William B. Keen, under the title of Keen & Brother, and they were succeeded by the firm of Keen & Lee. K. K. Jones had a periodical depot in 1844.

T. B. Carter, who had a book and stationery store in 1845, was also the earliest depository of the Chicago Bible Society. W. W. Barlow & Co., booksellers, appear as the first in that business who make a specialty of school books, at 121 Lake Street, in the same year, and this firm was succeeded by William Bross* & Co., at the same location, in 1847; the firm, in 1848, becoming Griggs, Bross & Co., and, in 1849, S. C. Griggs & Co. The first school book published in Chicago, was "Wells's English Grammar, No. 1, by W. H. Wells, A. M., published by Griggs, Bross & Co., 121 Lake Street," February 12, 1849. N. W. Jones had a periodical vending establishment, in 1845. J. W. Hooker, in

* To Hon. John Wentworth, the oldest Chicago editor, and Robert Fergus, the oldest Chicago printer, the compiler of this chapter is under the greatest obligations for their painstaking assistance, their clear and graphic descriptions, their retentive and accurate memories, which have been exerted to furnish missing data and "make the rough places plain" in the history of the Press.

† Two copies are in the library of the Chicago Historical Society.

* The Hon. William Bross published the first extended Commercial Review of Chicago, in 1852.

1845, was bookseller and stationer at 152 Lake Street, and had the primal depository for Sunday school books. The first Catholic bookseller was Charles McDonnell, whose store was on Market Street, in 1845. J. S. Comstock and B. F. Ackley, were proprietors of a booksellers' and stationers' business in 1845, as was J. Johnson, at 59 Lake Street. The first printers' ware-room was established by Robert Fergus, in 1848. The first establishment for the exclusive sale of printing paper, etc., was that of Henry Butler and Joseph Hunt, in 1850. The first recorded book agent in this city, was Frederick Blecker, in 1853. The earliest Chicago disciples of Alois Senefelder, who invented lithography, in 1793, was Edward Mendel, who established his lithographic house at 170 Lake Street, 1853, by whom Charles Vermeire was employed the same year; and Henry Acheson and William H. Rodway, who were engaged in book and job printing in 1852, and announced themselves as lithographic printers in 1853.

A description of progress in the limner's art would be replete with arbitrary terms and phrases, and would convey but indefinite information to the general reader, without fac-similes of some of the products of the skill of the workmen. An inspection of the phototypes of early cuts of edifices reproduced in this volume, and of the later illustrations that appear herein, will, however, give some idea of the progress made by printers and engravers.

The lithographic art progressed with the other arts and sciences in this city, and in the directory of 1857, John Gemmill, 132 Lake Street, exhibited a specimen of his skill. Even with the assistance which these efforts render to the art student, it is difficult to comprehend the progress of engraving in Chicago, simply from the fact that the majority of these engravings were made to order, and the skill of the artist was not displayed for the love of the art, but to render just so much work with the graver as would be adequate to the recompense he was to receive from his employer. A comparison of the efforts herein exhibited, with those of the present day, is sufficient to manifest the advance made, although the intermediate steps are incapable of demonstration or comprehension.

In 1842 S. D. Childs invented a printing press, which was not generally adopted, however.

The oldest Swedish printer in Chicago, probably in the United States, is Nicholas P. Armstrong, who came to this city in the autumn of 1854, and the next to Mr. Armstrong in point of residence in the city is Charles Johnson. The name of the first printer of the German language is lost to history; the first French printer was Claude Petit, who edited the *Journal de l' Illinois*, in 1857.

The first typographers' celebration of the birthday of Benjamin Franklin is narrated in the *Democrat* of January 19, 1848, whereat David M. Bradley, was chairman; Rev. Mr. Walker, chaplain; Benjamin Franklin Worrell, orator, and J. M. Moon, poet. Songs were sung by McConnell and Lombard; and speeches and toasts given by Alfred Dutch, George Davis, D. L. Gregg, Jonathan Young Scammon, William H. Bushnell, Richard L. Wilson, Calvin Butterfield, Robert Fergus, J. T. Bennett, J. S. Beach, Mortimer C. Misener, Joseph K. C. Forrest, T. A. Stewart, C. S. Abbott, James Campbell, H. K. Davis, W. T. West, J. E. Wheeler, A. M. Palley, K. K. Jones, Chauncey T. Gaston, and W. H. Austin.

The first music printed in Chicago was by Joseph Cockroft* in 1854; the music composed by J. Dyhren-

furth, and the song, composed by Benjamin F. Taylor, for which the music was originated, was entitled, "It will all be Right in the Morning."

THE CHICAGO TYPE FOUNDRY, located at No. 43 Franklin Street, in 1855, was the first type foundry in the city, and the first type-casting there was done in 1856, by Nathan Harper, the foundry being then under the charge of C. G. Sheffield. The first "outfit" supplied by the foundry was in January, 1857, and consisted of a new "dress," of brevier and nonpariel, for the *Springfield Journal*, then published by Bailhache & Baker. In January, 1857, the place of business was moved to 90 Washington Street. In 1863, Scofield, Marder & Co. succeeded to the Chicago Type Foundry, and subsequently changed the proprietorship to Marder, Luse & Co. The first electrotyping performed in Chicago was also done at the Chicago Type Foundry.

THE PRINTERS' UNION was organized October 26, 1850, with the following officers: Carver Butterfield, president; Benjamin Franklin Worrell, vice-president; Mortimer C. Misener, secretary, and William H. Austin, treasurer; and the first meeting of the Union was held on November 30, 1850, at the hall of the Rhein Saloon. This confraternity was maintained until June, 1852, when a charter was obtained from the National Union for the Chicago Typographical Union, which succeeded the Printers' Union. The charter members were William H. Austin, Samuel S. Beach, A. W. Beard, Francis A. Belfoy, J. T. Bennett, A. P. Blakeslee, Charles F. Bliss, Charles Booth, J. I. C. Botsford, E. S. Bradley, Charles H. Brennan, F. W. Brooks, George E. Brown, Carver Butterfield, James Campbell, O. F. Carver, A. B. Case, W. H. Chappel, Dyer L. Cowdery, E. S. Davis, J. W. Deiggs, E. J. Farnum, C. W. Gardner, Fred Garside, F. G. Haight, Julius A. Hayes, Henry S. Hickok, Oscar M. Holcomb, A. S. Hopkins, D. B. Hopkins, G. H. Kennedy, Joel A. Kinney, William F. Knott, D. Lalande, C. B. Langley, James Macdonald, John F. Madison, Warren Miller, Mortimer C. Misener, T. R. Moroney, W. W. McCurdy, A. McCutcheon, William McEvoy, W. H. McWharter, George McWilliams, C. H. Philbrick, F. M. Porter, F. A. Ryan, Amos Smith, Thomas Smith, Alfred M. Talley, J. S. Thompson, B. W. Van Horn, James C. Weaver, J. E. Webb, W. P. Whiffen, Hiram Woodbury, J. P. Woodbury; and the primal officials of the Typographical Union were: Carver Butterfield, president; C. B. Langley, vice-president; J. P. Woodbury, recording secretary; Joel A. Kinney, treasurer. The wages received by the craft, directly subsequent to the formation of the Typographic Union, were twenty-five cents per thousand ems; job printers, eight dollars per week; foremen, ten dollars per week; this scale being about the rate that ruled at and after the institution of the Printers' Union in 1850. The question of combinative labor ameliorating the condition of the individual has engaged the attention of profound thinkers for many years; however well, or illy, trades-unions may have succeeded in other fields of labor, the fact remains that printers have been materially and permanently benefited by the Typographical Union; not alone in the maintenance of a higher scale of wages for the craft generally, but in the conservation and promotion of a higher morale of the operatives themselves. Printers of a few years since were notorious for the "transportation of the standard;" now the best workmen are distinguished for their sobriety and good citizenship, and inebriety and capability are no longer synonymous terms.

THE TYPOGRAPHICAL UNION has grown from a

* Joseph Cockroft was awarded a silver medal for the first stereotyping done in Chicago, at the Fourth Annual Fair of the Chicago Mechanics' Institute, held in 1851. He did the stereotyping of the *Journal* office that year.

score of printers in 1850 to one thousand members in 1883, among whom are a number of competent females, who receive the same compensation as the men for their labors. Its business is such that the Union is obliged to establish its secretary in a permanent office, containing library and reading room, which was established in 1882. This office is also an employment bureau, to which the proprietors send for help, and where the unemployed wait such calls, and profitably spend the time in poring over the treasures the library affords. The present Union possesses one lot in Calvary, and another in Rose Hill Cemetery, the latter valued at about five thousand dollars; and the action of the Union, in its efforts for an increase in the scale of prices, has not been taken solely for the mere advance of cents per thousand ems, but has also had consideration for the interest of employers, and the providing good and skilled labor for those offices which are supplied by Union men. In the conflict between labor and capital, the results that would accrue from indiscreet efforts by those who are deficient in foresight, have been abrogated, and the intermediation of the Union between printers and newspapers and job offices, in times of dissension, has often been exerted with the most felicitous consequences; at the same time that the Union interposed its ægis of sodality to preclude undue advantage being taken of any concession by the printers.

Any statistical statement of the various amounts paid at specific times, per thousand ems, would convey no information, as the methods of measurement and the rules of allowance have been subject to many mutations. At the present time, a printer cannot make as much money setting a given number of ems at thirty cents per thousand, as he could a few years since at twenty-five cents, and the Chicago Typographical Union No. 16 is endeavoring to level such inequalities, and yet not over-ride the interests and ability of employers—stable benefit, not suicidal consequences, actuating its procedure.*

THE PRINTERS' PROGRESS.—In addition to the array of newspapers and magazines that assumed form and substance from the inventive literary brains of residents of, and wayfarers in, this city under the deft fingers of the disciples of the typographical art, there were numbers of books published and printed in this city. The limits of this work will not permit even an epitomized notice of them; therefore none but the primary efforts in various specific branches of literature and printing have been particularly noticed, unless some especial peculiarity was observable, and then the work has been alluded to solely because of such idiosyncrasy of mental effort or typography.

A history of the rise and progress of any art would be but a barren outline without some mention of the various persons who took part in the incidents; and unusual care has been exercised to gather the names of those who performed any of the many functions requisite to make a book, without the slightest effort to enumerate only the officers and let the rank and file rest in oblivion. Possibly many of the "comps" whose names appear in this chapter were more distinguished for "carrying the banner" than their proficiency in temperance, but the sentence or the paragraph they set may have elected a constable, demolished a candidate, or made a family happy by some newspaper household recipe; it is impossible to tell. They were, however,

connected with the history of the Press, and hence publicity is given their names.

To return to a recapitulation of the early Chicago disciples of Faust, Gutenberg, Caxton and Franklin. As has been stated, the first printers here were the acolytes who arrived with Calhoun's press, "when the breaking waves dashed high on the stern" and mossy edge of Newberry and Dole's primitive wharf in 1833. Redmond Prindiville states that the early employes in the American office were: John Ellsworth, pressman and compositor; Abiel and Orson Smith, compositors; Edward H. Rudd, job printer and compositor; John Brooks, who married Sarah, daughter of Rev. Isaac Taylor Hinton, and subsequently became a Baptist minister; Redmond Prindiville, apprentice. The same authority states that William Stuart was editor, and Alexander Stuart assistant editor.

In an old number of the Commercial Advertiser (Hooper Warren's paper, printed by Edward H. Rudd), appears a prospectus signed by Alfred M. Talley, Edward Grattan, Andrew L. Osborn and Richard W. Iliff, stating that they would start a newspaper to be called the Chicago Daily Argus, and in this prospectus the signers designate themselves as "practical printers." The prospectus decides the date of their habitation of Chicago as being in 1836. Talley and Osborn were employed in the Democrat office. E. Grattan, in the Weekly American of May 27, 1837, signs a caution to printers not to come to Chicago, in response to an advertisement that appeared in the Democrat, offering positions to journeymen printers, as there are plenty in the city to perform all the work dependent upon the exercise of the art; but this prospectus is the sole authority for there ever having been a printer here named Iliff, and he, probably disappointed at the failure of the Argus to appear, also disappeared. David M. Bradley first entered the composing room of the Democrat in 1837, and was connected with that paper until his death. James Campbell, Zebina Eastman, F. T. Ellithorp, James Kelly, Charles N. Holcomb, John E. Wheeler, Jonathan Carver Butterfield and A. R. Niblo were also pioneers of the art preservative, and many of their names are to be found among the prominent editors of the early papers of the city.

The names of the printers and pressmen that follow are compiled from the several directories for the years indicated at the head of each paragraph. This classification has been followed until the year 1854, when nomadic printers began to swarm into the city; and, as it is tacitly conceded that a Chicagoan is not an "early settler" unless his residence antedates that year, deference for this ukase, and the limits of this chapter, have abrogated any individual mention of typographers subsequent to the close of 1853.

1839. Eric Anderson, pressman; James S. Beach, with E. H. Rudd; David M. Bradley, foreman Democrat; J. Carver Butterfield, compositor American; James Campbell, compositor American; Timothy C. Ellithorp, compositor Democrat; Robert Fergus; Charles N. Holcomb, foreman American; William Holmes, compositor Democrat; James Kelly, compositor American; Abiel Smith, pressman Democrat; Orson Smith, compositor Democrat; Alexander Stuart, pressman American; Alfred M. Talley, compositor Democrat; William Taylor, compositor American; N. D. Woodville, compositor American.

The next directory that was issued is the one for 1844, but some names are necessary to be recorded between 1839 and that year; those of Kiler K. Jones, ap-

* For much information in this sketch the compiler is indebted to the courtesy of Samuel Rastall, the present secretary and treasurer of the Union (1883).

prentice, pressman and general utility boy in the office of the American; Mark B. Clancy, who worked upon Morris's Chicago Directory for 1845; William Ellis, subsequently partner of Robert Fergus, who arrived here August, 1840, and worked on the Tribune; also the following signers of a caution printed in the Weekly American of July 31, 1840, dated July 29, 1840, warning printers not to come to Chicago as there are sufficient workmen in the city to perform all the work required, viz.: A. M. Talley, Edward H. Rudd, Orson Smith, Abiel Smith, Robert Fergus, Joe D. Brown, J. Carver Butterfield, James Campbell, A. R. Niblo and Z. Eastman. Hon. Knud Langland was probably the earliest printer of Norwegian typography in Chicago,

H. Langland

he having been here in 1843. This gentleman was not a regular printer, but worked at the case occasionally, his celebrity consisting in the able and forcible editorial articles he furnished to Norwegian publications. In that work he is accredited with having wielded more influence than any other writer in the Norwegian language.

In the following compilations when no specific character is given to the employment pursued by each person they were classed as printers; when the name of the paper or office they worked in was originally stated, it has been reproduced here, and though many of the printers, etc., were probably here before 1843 (when the 1844 directory was compiled) no authentic record is extant concerning them.

1844:* David M. Bradley; J. Carver Butterfield, Prairie Farmer; George E. Brown, Express; Norman Buell, Democrat; Ellis & Fergus, book and job printers, Saloon Building (the first job office in the city); William F. Gregory; Robert M. Hobson, Express; James Kelly, Western Citizen; A. R. Niblo; Abiel Smith, Democrat; A. P. Spencer, Better Covenant; H. J. Thomas, Western Citizen; Alfred M. Talley, Democrat; Jacob Whitmore, Western Citizen; N. D. Woodville, American.

1845: David M. Bradley; Norman Buell, Democrat; J. Carver Butterfield; Samuel S. Beach, Gem of the Prairie; J. T. Bennett, Citizen; C. H. Bowen, Democrat; Mark B. Clancy, Gem of the Prairie; J. S. Davis, Gem of the Prairie; Samuel Dempsey, Better Covenant; William F. Gregory, Journal; H. W. Grogan, Gem of the Prairie; James C. Herrington, Democrat; F. I. Hays, Gem of the Prairie; James Kelly, Western Citizen; William C. Ladow, Better Covenant; William S. Lyman, at Ellis & Fergus's; C. Martling, Gem of the Prairie; Mortimer C. Mizener; Abiel Smith, Democrat; Lorenzo D. Swan, Gem of the Prairie; Alfred M. Talley, Democrat; H. J. Thomas, Western Citizen; E. B. Thomas, Advocate; N. D. Woodville, Journal; Thomas Whitmarsh; Russell Whitmore, Citizen.

A warning to printers against seeking work in Chicago was signed November 3, 1847, by H. K. Davis, William H. Austin, J. Sarrell, H. J. Thomas, Thomas C. Whitmarsh, James Campbell, J. A. Smythe, John P. Breese, Joel Rathburn, F. W. Brookes, A. P. Spencer, Franklin Fulton, F. I. Hays, James J. Langdon, N. W. Fuller, R. N. Garrett, Samuel S. Beach, A. Adams, Jr., W. F. Gregory, C. C. Moore, G. E. Brown, Charles S.

Abbott, N. C. Guernsey, H. A. Hough, David P. Daniels, William H. Worrell.

1848: A. Adams, Jr., John Amundson, pressman, David M. Bradley, sub-editor, Franklin Fulton, Chauncey T. Gaston, Austin Sadler, Alfred M. Talley, W. T. West, Iver Wichington, pressman, Democrat; M. S. Barnes, James J. Clarkson, John Serelle, James P. Woodbury, New Covenant; Frederick Brooks, W. H. Austin, J. T. Bennett, J. E. Wheeler, Tribune; Charles S. Abbott, George E. Brown, C. H. Bowen, Charles F. Bliss, Oscar M. Holcomb, Mortimer C. Mizener, J. Madison Patten, Benjamin Sanford, Hiram Woodbury, Journal; Samuel S. Beach, Gem of the Prairie; Enos S. Bradley, Wilson Franks, N. W. Fuller, Francis T. Seely, pressman, Citizen; J. G. Glass, H. A. Hough, foreman, J. A. Smith, Ezra Wilkins, Commercial Advertiser; N. E. Guernsey, Prairie Farmer; Thomas Kimball, William Kirkengoll, W. H. Worrell, Campbell Wait, Herald of the Prairie; Anton Portman, Peoples' Friend; D. P. Daniel, J. W. Duzan, E. S. Davis, James Campbell, William Ellis, William Iver, pressman, K. K. Jones, Madeira, James Purcell, T. C. Whitmarsh; John Portman, printer and grocer, office undesignated.

The following lists comprise names that have not heretofore been given:

1849: A. W. Adams, F. D. Austin, J. B. Dow, J. A. Hays, Rufus Tebbetts, William G. Travis, undesignated; Francis Belfoy, William McEvoy, Thomas Morony, Tribune; T. M. Crombie, Norman H. Eastman, S. J. Noble, Herald of the Prairie; Thomas Herndon, Battle-Axe; Thomas E. Clarkson, James E. Fielding, Joel A. Kinney, G. Martin, Journal; Robert Lees, New Covenant; N. C. Geer (of Cringle & Greer, land agents, in 1848), W. P. Gregg, G. F. Palmer, J. Tyson Smith, C. A. Swan, Commercial Advertiser; Daniel S. Merritt, Prairie Farmer; B. W. Van Horne, Democrat; David Martin, Citizen; P. K. Webster, Dollar.

1850: George Clark, Hans Kjos, Henry H. Kimball, Robert McCulloch, William T. Nott, Amos Smith, A. B. Whiting, undesignated; Thomas R. Raymond, Herald of the Prairie; Chester L. Root, New Covenant; Jeremiah S. Thompson, Prairie Farmer; Charles Philbrick, Democrat; John Barker, Warren Johnson, S. B. Raymond, foreman, Citizen; Benjamin W. Seaton, foreman, Spofford D. McDonald, William T. Knott, Argus.

1851: John Emerson, William E. Foote, Henry Gibbs, C. F. Hardy, Warren Miller, undesignated; James Goodwille, Herald of the Prairies; C. D. Dickerson, foreman Journal; Philip J. Collins, New Covenant; Ole Gulliver, — Ruth, Democrat; Charles Dyer, Citizen; Frederick J. Garside, Commercial Advertiser.

1852: Albert Beard, Charles H. Brennan, D. L. Cowdery, James H. Davlin, Joseph Dusold, John M. Farquhar, Charles Foot, J. T. Fordham, William H. Foster, Abraham Frankhouser, Hans Johes (probably Kjos), Henry Kleinofer, William F. Knott, James McDonald, W. H. McQuarter, James Millar, Edward Ryan, Mark Seymour, Thomas Smith, Isaac B. Smith, Charles Veichmann, John Walsh, Hooper Warren, L. B. Waterman, William E. Wilber, undesignated; Edward D. Barker, John F. Brown, Herald of the Prairies; Oscar F. Carver, Daniel B. Hopkins, George H. Kennedy, Edward W. L'Honniedieu, John F. Maddison, Henry M. Rogers, Tribune; Robert R. Davis, Thomas R. Hudd, Thomas Leicester, George W. McWilliams, Hiram Vanderbelt, pressman, John Woods, Citizen; Jacob Blum, Frederick Barnard, Charles E. Beach, Ira F. Bird, William H. Chappell, Edward Irwin, Cyrus B.

* The names of several printers omitted in this directory list will be found as publishers, or in the portion of this chapter devoted to newspapers.

Langley, Journal ; James Martin, Benjamin F. Monroe, New Covenant ; George W. Blair, pressman, Frederick W. Brooks, J. Wickerson, pressman, Democrat ; John Anderson, William H. Harkin, Alexander White, Argus ; Frederick H. Blecker, John Wilson, Commercial Advertiser ; F. A. Ryan, Democratic Press ; Rudolph Julius, John Simon, Frederick W. Storch, Staats Zeitung.

1853 : James Austin, James Barnet, John Ballantyne, Edwin G. Barrows, Joseph T. Bennett, Charles H. Bingham, Robert Brunton, Patrick Conway, Clarendon Davison, O. C. Fordham, Clark Gieb, William Goodwin, Henry S. Hickok, J. M. Hoyt, K. C. Hunt, James King, Charles Kreckman, John Marshall, William McCarty, W. W. McCurdy, Duncan McDonald, A. J. Madden, William O'Brien, J. C. Parker, pressman, Joseph Parker, George Philbrick, S. G. Pitkin, Louis

Schell, John Shanks, Robert V. Shurley, L. G. Sinclair, Charles Slocum, Henry J. L. Stanwood, James E. Webb, undesignated ; F. S. Emrick, George Harris Fergus, Garden City ; James M. Chatfield, John Chatfield, Jr., William B. Doolittle, Lee Lars, Traveler ; V. Hanf, foreman, Staats Zeitung ; Hezekiah Chapin, Frank G. Haight, Lewis Knudson, pressman, Oliver H. Perry, G. Taylor, W. C. Wright, Democrat ; F. F. Brown, William F. Brown, A. B. Case, foreman, Newell Case, Andrew Dunn, Charles O. Pratt, pressman, Democratic Press ; Albert Auer, pressman, D. L. Logan, Tribune ; Myron Amick, W. F. Beach, G. E. Brown, Jehiel Hart, pressman, H. W. Havens, J. Lyman, F. M. Porter, O. M. Pugh, Oleander Stone, George A. Treysen, Journal.

THE BENCH AND BAR.

The prosperity of a people depends as much upon a wise interpretation as on a judicious framing of its laws. The advocate is as necessary as the lawgiver; the Bench and Bar as indispensable as the Governor and Legislature. Nowhere else has the legal profession exercised a more powerful influence in framing the laws and molding the destinies of the people than in the United States. Here they form the leading political class, being the most thoroughly educated in all that appertains to the civil life of the nation.

In the State of Illinois their influence has been paramount from the first. Nearly all the great names connected with its early history are also to be found on the roll of lawyers. They have been leaders of the people, not alone, as was to be expected, in the domain of law, but in every intellectual, moral, educational, charitable and even commercial enterprise. And the firm stand taken by the profession against repudiation, in the dark period of 1837 to 1842, was creditable to their judgment and worthy of the leadership they had tacitly assumed.

It is now half a century since Chicago began to have a Bench and Bar of her own, in 1833, and in every important crisis of her history since then, in each successive step of the petty hamlet toward metropolitan greatness, lawyers have been among her most active leaders and most influential counselors. They soon attained among the members of the profession throughout the State the prestige that always attaches to commercial centers, which the rapid growth and concentration of large interests here have exceptionally enhanced. The wealth of clients, corporate and individual, has stimulated the powers of the profession, until to stand among one's brethren of the Chicago Bar, well toward the front with name untarnished, is perhaps the most enviable position that can be reached by a citizen.

THE JUDICIARY UNDER THE CONSTITUTION OF 1818.—The fourth article of the constitution of 1818 instituted a judiciary for the new State by the following provisions:

1. The judicial power of this State shall be vested in one supreme court, and such inferior courts as the general assembly shall, from time to time ordain and establish.

2. The Supreme Court shall be holden at the seat of government, and shall have an appellate jurisdiction only, except in cases relating to the revenue, in cases of mandamus, and in such cases of impeachment as may be required to be tried before it.

3. The Supreme Court shall consist in a chief justice and three associates, any two of whom shall form a quorum. The number of justices may, however, be increased by the General Assembly after the year 1824.

4. The justices of the Supreme Court and the judges of the inferior courts shall be appointed by joint ballot of both branches of the general assembly, and commissioned by the governor and shall hold their offices during good behavior until the end of the first session of the general assembly, which shall be begun and held after the 1st day of January, in the year of our Lord 1824, at which time their commissions shall expire; and until the expiration of which time the said justices respectively, shall hold circuit courts in the several counties, in such manner and at such times, and shall have and exercise such jurisdiction as the General Assembly shall by law prescribe. But ever after the aforesaid period the justices of the Supreme Court shall be commissioned during good behavior and the justices thereof shall not hold circuit courts, unless required by law.

5. The judges of the inferior courts shall hold their offices during good behavior, but for any reasonable cause, which shall not be sufficient ground for impeachment, both the judges of the supreme and inferior courts, shall be removed from office on the address of two-thirds of each branch of the General Assembly: Provided always, that no member of either house of the General Assembly nor any person connected with a member by consanguinity or affinity, shall be appointed to fill the vacancy occasioned by such removal. The said justices of the Supreme Court, during their temporary appointment, shall receive an annual salary of one thousand dollars, payable quarter-yearly out of the public treasury. The judges of the inferior courts, and the justices of the Supreme Court who may be appointed after the end of the first session of the General Assembly which shall be begun and held after the first day of January, in the year of our Lord 1824, shall have adequate and competent salaries, which shall not be diminished during their continuance in office.

6. The Supreme Court, or a majority of the justices thereof, the circuit courts or the justices thereof shall respectively appoint their own clerks.

7. All process, writs, and other proceedings shall run in the name of "The people of the State of Illinois." All prosecutions shall be carried on "In the name and by the authority of the people of the State of Illinois," and conclude "Against the peace and dignity of the same."

8. A competent number of justices of the peace shall be appointed in each county, in such manner as the General Assembly may direct, whose time of service, power, and duties shall be regulated and defined by law. And justices of the peace, when so appointed, shall be commissioned by the governor.

Accordingly the State was divided into four judicial circuits, in which the chief justice and his three associates performed circuit duties until 1824. By an act of December 29, 1824, the State was divided into five judicial districts, and five circuit judges ordered to be elected by the General Assembly. These were to perform all circuit duties, relieving the Supreme Court of that labor, and were to continue in office during good behavior, as provided in the constitution.

But this was soon regarded as a piece of legislative extravagance. Four judges of the Supreme Court at \$800 each, and five of the Circuit Court at \$600 each, or in all, \$6,200 annually. It was therefore repealed, January 12, 1827, and the State was again divided into four Circuit Court districts, to each of which was assigned one of the justices of the Supreme Court. Two years later, January 8, 1829, it was found necessary to create a fifth circuit, to include the whole region north of the Illinois River, and for it a judge was chosen by the General Assembly, the justices of the Supreme Court doing duty in the four circuits south of that river.

CHICAGO'S EARLIEST JUDICIARY.—Before treating of the Bench and Bar of Chicago in the stricter sense of judges and lawyers, assembling amid customary surroundings, made respectable by the inherent majesty of law, if not by outward pomp and court forms, it is thought proper to refer to the earliest representatives and processes of law in the future city.

As in the traditional history of ancient nations, the warlike conqueror and founder of empire is always followed by the pacific lawgiver and civil organizer, even so by curious coincidence did it happen in the predestined metropolis of the Great West. Scarcely had the military outpost of Fort Dearborn been established, before a lawyer came here to reside; and as if yet further

to justify the parallelism, he came in the interests of order and justice. Reference is made to Charles Jouett, a lawyer of Virginia, and afterward judge in Kentucky and Arkansas, who came here in 1805, as the first Indian Agent.

The earliest mention in the legal records of the State of a Chicago Justice of the Peace, is the following: "June 5, 1821, at the second term of the Commissioners Court of Pike County, upon motion of Abraham Beck, Judge of Probate, John Kinzie was recommended as a suitable person for Justice of the Peace." Chicago was then in Pike.

At a term of the Commissioners Court of Fulton County, held December 2, 1823, John Kinzie was again recommended for Justice of the Peace. Chicago was then in Fulton.

Peoria County, including the region of Chicago, was set apart from Fulton County, January 13, 1825, and on the same day Austin Crocker and — Kinsey were confirmed by the State Senate as Justices of the Peace for the new county. There is no reason to doubt that "— Kinsey" was intended for John Kinzie, who, however, was not commissioned until July 28, 1825. He was, therefore, not only the first resident Justice in Chicago, but one of the first two confirmed for Peoria County. It seems probable, in the absence of any mention of his having performed the duties of the office, that the previous indorsements had not been followed by a formal appointment or commission.

Alexander Wolcott and Jean Baptiste Beaubien were made Justices September 10, 1825; and they and Kinzie were judges of election in Chicago precinct December 7, 1825. John L. Bogardus, of Peoria, Assessor of Chicago in 1825, was appointed Justice January 15, 1826.

JUSTICES MADE ELECTIVE.—By a law of December 30, 1826, Justices were made elective, and their term of office extended to four years. A supplemental act of February 9, 1827, continued in office those previously appointed until the election of successors. In Chicago, Wolcott and Beaubien were re-commissioned December 26, 1827, having been elected by the voters of the precinct, or perhaps continuing in virtue of the law referred to. There are on record at least five marriages by Beaubien, two in 1828, and three in 1830, but none by Wolcott; and no trials by either. John S. C. Hogan was elected July 24, and commissioned October 9, 1830; and Stephen Forbes was elected November 25, 1830. Chicago was still in Peoria County.

Of the four Justices of Cook County, commissioned May 2, 1831, only one, William See, was a resident of Chicago. Another, Archibald Clybourne, did not reside in the Chicago of that day, although what was then his farm is now within the city limits. Russel E. Heacock became a Justice September 10, 1831; and was probably the first Justice before whom trials were held. Isaac Harmon was elected June 4, 1832; perhaps to succeed See. Justices Heacock and Harmon seemed to have served until August, 1835. They are both mentioned as Justices in the Chicago American of July 11, 1835; and Harmon was re-elected, August 9, 1835. Meanwhile John Dean Caton was elected Justice July 12, 1834, by one hundred and eighty-two votes out of a total of two hundred and twenty-nine, the remaining forty-seven being given to his competitor, Dr. Josiah C. Goodhue. He continued in office probably until August, 1835, and is said to have then given but little promise of the success which afterward marked his career as Justice of the Supreme Court of Illinois. E.

W. Casey was elected Justice of the Peace, August 9, 1835, but did not serve long.

THE CIRCUIT COURT.—By an act of February 16, 1831, it was provided that "The counties of Cook, La-Salle, Putnam, Peoria, Fulton, Schuyler, Adams, Hancock, McDonough, Knox, Warren, Jo Daviess, Mercer, Rock Island and Henry shall constitute the Fifth Judicial Circuit * * Richard M. Young shall perform circuit duties in the Fifth Judicial Circuit. * * There shall be two terms of the Circuit Court held annually in each of the counties. * * In the county of Cook on the fourth Mondays in April and second Mondays in September.

It will be noticed that this circuit embraced such distant points as Galena, Quincy, Peoria and Chicago, and the fifteen above-named counties, now increased by sub-division into thirty-nine.

The Constitution of 1818 only ordained that the Circuit Courts should have and exercise such jurisdiction as the General Assembly should by law provide; and by that body they had been endowed with jurisdiction in criminal and civil cases, and in the latter, both at common law and in chancery.

EARLY TERMS, 1831-34.—There is no little uncertainty about the first terms of the Circuit Court in Chicago. As stated, the county of Cook was organized in the spring of 1831, and by the foregoing statute it was entitled to a September term. If reliance can be placed on a historical pamphlet on Chicago by Governor Bross, issued in 1858, such a term was held or provided for "at Fort Dearborn, in the brick house, and in the lower room of said house." At the funeral of Colonel Hamilton in 1860, Judge Manierre also stated that the first term was held in September, 1831. And again in 1832, in the same work of Mr. Bross, the Court of County Commissioners is on record as ordering that the Sheriff shall secure one or more rooms for the Circuit Court at the house of James Kinzie, "provided it can be done at a cost of not more than ten dollars." In confirmation of the view that such court was held, the same work states that Judge Young, accompanied from Galena by Lawyers Mills and Strode, brought tidings to Chicago of the disturbed state of the Indians, which culminated later in the Black Hawk War.

"In May, 1833," says Charles Ballance in his history of Peoria, "Judge Young made his appearance in the village of Peoria, and announced that he was on his way to Chicago to hold court. * * On this occasion I attended court at Chicago, partly to seek practice as a lawyer, and partly to see the country."

"The first term of the Circuit Court held in Cook County," says Hon. Thomas Hoynes, "was in September, 1833, by Hon. Richard M. Young. In 1834, he also held the term in May."* This last, in the opinion of Hon. J. D. Caton, was the first term held here, or at least the first at which any law business was done. Except an appeal from some Justice Court, which was No. 1 on the docket of the Circuit Court of Cook County, a case tried by him, was the first ever tried in Chicago in any court of record; and this he is confident was at the May term in 1834. If this view is correct, although Judge Young may have come to Chicago on any or all of the years from 1831 to 1833, no regular court was held until the spring term of 1834, which in view of all the facts may be accepted as the verdict of history.

THE FIRST LAW OFFICE.—The first lawyer in Chicago to make a living by his profession alone was Giles Spring; and separated from him by a few days was

* "The Lawyer as a Pioneer."

John Dean Caton, who arrived June 19, 1833. There was but little law business in Chicago then, but notwithstanding untoward appearances, both rose to eminence and acquired wealth. Early in July, while they

kept office as was facetiously said, "On the head of a barrel at the corner of Lake and Wells," Caton obtained his first case, which also proved to be Spring's, on the other side. It is here subjoined as "the first larceny case in Chicago;" that is, the reader need scarcely be told, the first to receive legal cognizance, for not a little stealing had been done from "Lo" and others, before that time.

In December, 1833, Mr. Caton rented of Dr. Temple the back room and attic of his "building" on Lake Street, converting the attic into a bedroom, and extending to Spring the courtesy of desk-room in the room below, which thus became the first law-office in Chicago.

THE FIRST LARCENY CASE.—The first larceny case heard before a Justice of the Peace occurred in July, 1833. Mr. Hatch had been robbed of thirty-four dollars in Eastern currency, at the tavern, and hired Lawyer Caton to recover it. Suspicion rested on a fellow-boarder who was arrested by Constable Reed and taken before Squire Heacock for examination, followed by a large part of the population. The search had proved fruitless, and the prisoner was about to be released amid many jeers at the legal fledgling who had prosecuted the investigation. Just then Caton detected a suspicious lump, which distended the culprit's stocking, and making a hurried grab, brought forth the tell-tale roll of stolen bills. The constable took charge of the prisoner, who was duly arraigned the ensuing morning, with Spring and Hamilton as his lawyers, who obtained a change of venue to Squire Harmon, on the North Side. Afterward to satisfy the public interest in this first case, Harmon adjourned to the tavern on the West Side, where the public could hear the young lawyers to the best advantage. "The court-rooms in those days," says Arnold, "were always crowded. To go to court and listen to the witnesses and lawyers was among the chief amusements of the frontier settlements."

Fifty years later Judge Caton confessed that he had never been more interested in a case. The criminal was convicted, but escaped punishment by the device of straw-bail, which seems to have been introduced into Chicago at the same time as its earliest jurisprudence. Caton obtained his fee of ten dollars out of the recovered money, but Spring and Hamilton were cheated out of theirs by the runaway thief.

ADVENTURES OF A LAWYER IN SEARCH OF PRACTICE.—In the golden leisure of mature age Judge Caton has often found pleasure in relating the following stories:

"Clients were few, fees small and money running low, with board bills fast maturing. It was in that first July, and the proceeds of the first larceny case were gone or going fast, when we both hired out to carry the chain for a surveyor, who had just got a job on the North Side. Returning at noon, we learned from R. J. Hamilton that a party had been inquiring for a lawyer,

and, to avoid all partiality, it was agreed that he should follow us to our work in the afternoon. As he approached, blindly groping through the thick and high alders, which concealed us as we sat, while the choppers were clearing a lane for our operations, I saw that he was making straight for where Spring stood, when I dropped on each other the surveying pins I held in my hand, and, repeating the performance, succeeded in attracting his attention and directing his steps to where I sat. He secured my services, paying me in advance. Spring felt that he had been tricked and was a little sore, but actually got the best side of the case, being hired by John Bates, whom he enabled by interpleading to retain the property unattached, against which my client had hoped to obtain judgment. Spring got the larger fee and won the more substantial victory, though I had no difficulty in securing for my client a worthless judgment against an insolvent debtor, who was proved to have lost the ownership of the contested property.

"In August, 1833, there resided in Chicago six or seven free colored men, all of whom had come from free States. The law-givers of Illinois, however, had not contemplated such a contingency, the earlier population having come mostly from slave States. The laws had provided that if a negro was found in the State without free papers, he should be prosecuted and fined, and, if necessary, sold to pay the fine. Some enemy of the black man, or pro-slavery admirer of the black code, or believer in the blessings of the peculiar institution for the heaven-marked subject race, or possibly some aspirant for political preferment at the hands of the dominant party, which was largely under the control of the slave-holding aristocracy of the South, felt it to be his duty or his interest to prosecute these early representatives here of the proscribed race. J. D. Caton undertook their defense, and pleaded their case before the Court of County Commissioners. This was putting a very literal interpretation of judicial powers on the rather euphemistic term court as applied to the board of County Commissioners. But court was then the legal designation of that body, and the young lawyer overcame their natural modesty, or their unwillingness to assume a function hitherto unheard of. They ended by acceding to the learned jurist's exposition of the law, and as the highest accessible representatives of the judiciary of the sovereign State of Illinois, they granted to his grateful clients the required certificates of freedom, which were never questioned and passed for excellent free papers. Mr. Caton's fee was a dollar from each of the beneficiaries."

FIRST CHICAGO DIVORCE.—That term in May, 1834, "when," says Judge Caton, "we all first met together in the unfinished loft of the old Mansion House, just north of where the Tremont now stands," is memorable for witnessing the initial steps in the first of a long and unfinished line of divorce suits in Chicago. The parties to the suit were Angeline Vaughan, petitioner, and Daniel W. Vaughan, respondent. The petition was dated April 12, and made returnable May 14, 1834, but the outcome has not been learned. They had been married July 9, 1831, the maiden name of the bride being Hebert.

FIRST MURDER TRIAL.—In the fall of 1834, in an unfinished store, about twenty feet by forty, on Dearborn Street, between Lake and Water, another term of the Circuit Court was held by Judge Young. It was his last term here as Circuit Judge, and the last in Chicago, while Cook County remained within the Fifth Judicial Circuit. It is memorable for trying the first murder case in Chicago, and yet more for the resulting

acquittal. An Irishman was arraigned for killing his wife; and his lawyer, James H. Collins, succeeded in getting Judge Young to instruct the jury that if they could not find him guilty of murder, as indicted, it was their duty to acquit, which they did. They were inclined to bring a verdict of manslaughter, as there were circumstances which put the crime out of the grade of murder, but were misled by the instructions of the court and the wiles of the lawyer.

THE CIRCUIT-RIDERS OF THE LAW.—From 1831 to 1834, and indeed for several years afterward, a considerable part of the pleading and other law business of Cook County was done by the circuit-riders of the profession, of whom a few habitually accompanied the Judge from one county-seat to another, over the then sparsely-settled section of northern Illinois. They were residents of Galena, Peoria, Quincy, or other distant points. The riding was on horseback, or by stage, buggy or wagon, over unimproved roads, running at intervals through miry swamps that were rendered passable only by the "corduroy" logs and saplings, loosely laid in the uncertain, yielding roadway, and across swollen streams unprovided with bridges.

"The practice of riding the circuit in those early days," says Judge Goodrich, "while it may be regarded as the knight-errantry of the profession, was an admirable training school to make ready and skillful prac-

tioners. The want of books compelled reliance upon reason and leading principles. I doubt if a class of lawyers can be found anywhere, as ready and skillful special pleaders as the early practitioners upon the country circuits."

What could not conveniently be determined by authority had to be decided by the processes of individual reason. The elementary books and the comprehensive principles of general law formed a solid foundation; and the superstructure was largely their own reflections and deductions, all the more available and serviceable as the tools of their craft, because fashioned by each one for himself. The result was a body of lawyers, with powers of discrimination well developed, always ready to give an account of the knowledge that was in them, not in their books.

A few years later the traveling members of the Chicago Bar had similar experiences in their semi-annual journeyings to the United States courts at Springfield, or to such county courts in the interior as business called them to attend.

"I have known the trip to Springfield," says Mr. Arnold, "to take five days and nights, dragging dreari-

ly through the mud and sleet; and there was an amount of discomfort, vexation and annoyance about it, sufficient to exhaust the patience of the most amiable. But the June journey was as agreeable as the December trip was repulsive. A four-in-hand, with

splendid horses, the best of Troy coaches, good company, the exhilaration of great speed over an elastic road, much of it a turf of grass, often crushing under our wheels the most beautiful wild flowers; every grove fragrant with blossoms, framed in the richest green; our roads not fenced in by narrow lanes, but with freedom to choose our route; here and there a picturesque log cabin, covered with vines; boys and girls on their way to the log schools, and the lusty farmer digging his fortune out of the rich earth. Everything fresh and new, full of young life and enthusiasm, these June trips to Springfield would, I think, compare favorably even with those we make to-day in a luxurious Pullman car.* But there were exceptions to these enjoyments. Sometimes torrents of rain would, in a few hours, so swell the stream that the log bridges and banks would be entirely submerged, and a stream, which a few hours before was nearly dry, became a foaming torrent. Forging at such times was never agreeable, and was sometimes a little dangerous."

"The judge," says Mr. Arnold,* "usually sat upon a raised platform, with a pine or white wood board on which to write his notes. A small table on one side for the clerk, and around which were grouped the lawyers, too often, I must admit, with their feet on top of it. * * * There was, in those days, great freedom in social intercourse; manners were at times rude, but genial, kind, and friendly. Each was ready to assist his fellow; and as none were rich, there was little envy or jealousy. The relations between the Bench and Bar were free and easy; and flashes of wit and humor and personal repartee were constantly passing from one to another. The court-rooms in those days were always crowded. At court were rehearsed and enacted the drama, the tragedy, and comedy of real life. The court-room answered for the theater, concert-hall, and opera of the older settlements. The judges and lawyers were the stars; and wit and humor, pathos and eloquence always had appreciative audiences. The leading advocates had their partisans, personal and political, and the merits of each were canvassed in every cabin, school-house, and at every horse race, bee, and raising."

THE EARLY BAR.—At the close of 1834, while Chicago was still in the Fifth Circuit, the resident lawyers, though not yet formally associated as a Bar, had begun to assume respectable proportions. While the population was estimated all the way from four hundred to twelve hundred, the lawyers already numbered eleven—Heacock, Hamilton, Spring, Caton, Casey, Fullerton, Collins, James Grant, Grant Goodrich, Moore, and Morris. It is remarkable that so many of these should have risen to distinction, five having reached the Bench, and all having attained a respectable standing in the profession, and as public-spirited citizens in civil life, noted for intelligence, integrity, and varied substantial service to the young and struggling community. To none of them has there attached any taint of professional misconduct or neglect of duty, no venality as judge, or betrayal of client's interest as lawyer. The first two have already been noticed among the early settlers; and this is a fitting place to introduce such of the others as have passed away from earth, or removed from Chicago. Two members of the Bar of 1834, Judges Caton and Goodrich, still survive as honored citizens, and their lives will be sketched in a later volume. The only representative of the Bench of Chicago at this period was Judge Young.

* "Reminiscences of the Illinois Bar, Forty Years Ago."
† "Recollections of the Early Illinois and Chicago Bar," by Hon. I. N. Arnold.

RICHARD M. YOUNG, the first Circuit Judge who held court in Chicago, was born in Kentucky toward the close of the last century. He emigrated early into southern Illinois, residing at Jonesboro, Union County, before as well as after the organization of that county in 1818. He was admitted to the Bar September 28, 1817; and he represented Union County in the Second General Assembly, 1820-22. By an act approved December 29, 1824, the State was divided into five judicial circuits, and he was commissioned Judge of the Third, January 19, 1825. This act was repealed January 12, 1827, and all judicial functions again devolved on the Chief Justice and the three Associate Justices of the

Supreme Court, which abrogated Judge Young's office. Accordingly we find that "An act for the relief of Richard M. Young"—the payment probably of salary balance—was introduced in the Legislature January 11, 1827, and approved the 22d, by which \$58.40 were appropriated for that purpose. And it was enacted February 17, 1827, that he be paid "four State paper dollars a day" for sixteen days' service as clerk to an important committee of the House. In 1828 he was presidential elector on the Democratic ticket. By the judiciary act of January 8, 1829, a Fifth Circuit was created to include all that portion of the State lying north of the Illinois River; and Mr. Young was chosen its judge on the 12th, and commissioned on the 23d. About that time he removed to Quincy, within his judicial district. His duties were arduous, not so much for the volume of business to be done in any particular county, as for the number of counties he had to serve, the distance apart of the several county seats, and the absence of modern conveniences for traveling. He was in active correspondence with Governor Reynolds in April, 1832, in reference to the disturbed condition of northern Illinois, and urged the necessity of speedy and effective protection of the northern frontier against the Indians in the Black Hawk War. In the impeachment trial of Judge Theophilus W. Smith before the State Senate in the session of 1832-33, Judge Young was associated with the future Judges Breese and Ford, for the defense. He held the earliest terms of the Circuit Court in Chicago. By an act approved January 7, 1835, a Sixth Circuit was established which included Cook County, and Judge Young had no further occasion to ride his blooded Kentucky horse to distant Chicago, though there still remained ample exercise for his equestrian skill within the Fifth Circuit. At the session of the General Assembly in 1836-37, Judge Young was put in nomination for United States Senator, and elected over five competitors, December 14, 1836, for the full term, 1837-43. He resigned the judicial office January 2, and took his seat as Senator September 4, 1837. During his senatorial term he seldom made speeches, but was always ready to enforce a point or defend a principle in the interest of his constituents, such as the establishment of new post routes, the advocacy of pre-emption laws and the support of internal improvement measures. He was quite active and watchful on all questions likely to affect the State of Illinois; and his counsels were not without influence at home in directing the policy of the State toward the payment

of its debt. February 1, 1841, in his place in the Senate, he said: "The march of Illinois is forward; and if her legislative guardians at home shall promptly discharge their duty in the preservation of her credit at home and abroad, who cannot foretell that her destiny is no less than that of an empire State?" And, on the question of internal improvements he thus defined his position on the 26th of the same month: "I am willing to promote the interests of the West and South, the East and North, but I wish them to go hand in hand. Let them all go together!" With ex-Governor Reynolds, he had been appointed State agent by Governor Carlan in 1839 to negotiate the sale of State bonds, with a view to push forward the internal improvements so ardently desired by the people of Illinois. He made a journey to Europe for that purpose, but he failed in his financial mission and returned to the discharge of his duties as Senator. Failing of re-election to the Senate, he was chosen an Associate Justice of the Supreme Court, January 14, 1843, and commissioned February 4th. He held the office until January 25, 1847, when he resigned. During this period he frequently held court in Chicago, and was favorably regarded by the Bar as well as by the Press and people. In 1847, he was appointed commissioner of the general land office, succeeding General Shields, and being succeeded by Justin Butterfield, June 21, 1849. In 1850-51, he was clerk of the House of Representatives at Washington. "For a number of years before his death," says Ballance,* he was a claim agent in Washington City. But for some time before his death he was confined in an asylum for maniacs. * * * If the story is true, he passed away many a day and night in a dungeon, under the torturing hands of fiends in human shape, in the great capital of the Nation; and yet for a long time so secretly, that a brother living in that city had no suspicion of it." Physically Judge Young was a tall, fine-looking man, large of stature and of dignified and attractive bearing. His intellectual ability was equal to filling any office respectably, although not with eclat, and coupled with his industrious and methodical habits made his legal and political attainments above the average of his day and his opportunities. His manners were gentle, courteous and entertaining; his feelings generous and sympathetic; his disposition amiable and unaggressive; and altogether he was eminently fitted to win and retain popular favor. His more able associates were often distanced when they became his competitors; although he never reached the highest position as a lawyer, judge or senator, he always commanded the respect and confidence of his constituents and the public. Of excellent personal habits and refined tastes, whatever he may have lacked in brilliancy was amply compensated for by his steady attention to duty, and his earnest purpose to promote the prosperity of the State. He had two daughters, of whom the elder, Matilda, was married at Washington, to R. A. Matthews, of Georgia, July 29, 1852.

GILES SPRING was born about 1807, in Massachusetts, whence he emigrated when a young man to the "Western Reserve" in Ohio. Having studied law at Ashtabula under the firm of Giddings & Wade—the historic Benjamin F. Wade and Joshua P. Giddings—he removed to Chicago in June, 1833. Here he practiced his profession until raised to the Bench, sixteen years later. Judge Caton thus refers to those early days: "Clients were scarce, but as there were but two of us to do the business the only rivalry between us was as to who could most zealously serve his client, with the

* History of Peoria, p. 64.

greatest courtesy and kindness to each other. The Justices of the Supreme Court did circuit duty in those days, and exclusively in the portion of the State south and east of the Illinois River. When, therefore, a young lawyer desired a license, it became necessary to make a pilgrimage to one or two southern county-seats and be examined by two Justices, and thus get authority to practice. It was not until January 24, 1835,* that Mr. Spring was entered on the records of the Supreme Court as licensed, though he advertised location as a lawyer in the fourth number of the Chicago Democrat, December 17, 1833. He had, however, been admitted to the Bar in Ohio, and only required to have his papers sent forward for record. He early obtained a good share of the Circuit Court as well as Justice Court practice; and was generally on one side or the other of all the more important early cases. In February, 1836, he formed a partnership with Grant Goodrich, which continued until his election to the Bench. By a rather singular coincidence the partners wedded life-partners on the same day, Sunday, July 24, 1836, at Westfield, Chautauqua Co., N. Y., Miss Levantia Budlong becoming Mrs. Spring. In the winter of 1836-37, Mr. Spring was in Vandalia, prosecuting the case of Harrington *vs* Hubbard before the Supreme Court. This was the first important land case in this county, involving the title to the south forty-seven acres in what was called the Harrington tract in Section 32. It was specially important to Mr. Spring, because being paid with about a dozen acres of that land, it laid the foundation of his modest fortune. Mr. Spring was a prominent Whig, and for years at every convention received the nomination to the best of offices, and being personally popular always ran ahead of his ticket. In the spring of 1843 he was the Whig candidate for representative in Congress of the Chicago district, against the Democratic nominee, John Wentworth, whom he beat in the city by fifty-one votes, only to be overwhelmed in the district by a majority of one thousand six hundred and twenty-one for his opponent. Had his party not been in a condition of chronic minority, he would doubtless have attained to high political preferment; but it would probably have added nothing to his fame; for he was essentially a better lawyer than politician. In 1848 he was chosen City Attorney, and was a delegate to the Free-Soil convention of that year in Buffalo. In 1849 he was elected Judge of Cook County Court of common pleas, and held the office until his premature death, May 15, 1851. Several of his contemporaries have borne witness to his merits as a lawyer, Judge and citizen, all agreeing, with varied phraseology, in the following tribute by his former partner, Judge Goodrich, delivered thirty-two years afterward before the Chicago Historical Society:

"Spring was a phenomenon, a natural born lawyer. His education was quite limited, and he paid little respect to the rules of grammar; yet he could present a point of law to the court, and argue the facts of a case to the jury with a clearness and force seldom equaled. He seemed sometimes to have an intuitive knowledge of the law, and mastery of its profoundest and most subtle principles. His brain worked with the rapidity of lightning, and with the force of an engine. In argument he possessed a keenness of analysis, a force of compact, crushing logic which bore down all opposition. His language though sometimes homely was always forcible and strongly expressive of his thought. He was firm in attack but not often offensive. But his most

astonishing powers were exhibited when some new question arose in the progress of a trial. However suddenly it might be sprung, and however grave or abstruse in character, he would instantly and seemingly by a flash of intuition, grasp it with a skill and mastery of legal learning which seemed possible only to the most skilled preparation. His resources appeared exhaustless. * * It would be misleading to assume that these rare powers were the mere flashes of genius or intuition, for few men studied their cases, or the law involved in them, with more careful assiduity. His memory was marvelous; his discrimination searching and accurate. His method of studying a case made him complete master of all the law applicable and kindred to it, the reasons upon which it was based, and all the distinctions to be observed. He first consulted the elementary books, and made up his mind what the law ought to be, and then studied the cases in which the principles had been applied. Though he was not an orator, yet before a jury he rarely failed to carry them with him, in a case of anything like even chances. It was, however, in the argument of legal questions before the court, where his comprehensive knowledge of the principles of law, his clear sledge hammer logic, and his wonderful mental endowments shone most conspicuous. * * * He was devoted to his clients and honorable in his practice, respected and admired by his professional brethren. As a Judge he was scrupulously impartial, upright and able. In some of his decisions, his genius and legal learning burst out in opinions so luminous and profound as to extort the admiration of the Bar. * * * His faults were of that character which excited commiseration, while they did not destroy admiration for his virtues. He died I believe without an enemy. Colonel Linder, in his 'Reminiscences' says of him, and surviving contemporaries confirm the testimony—'He was a man of childlike simplicity of manners, as tender-hearted as a woman, and would have stepped aside to keep from treading on a worm.' He was, unfortunately, a victim to the free use of intoxicating liquors, which exercised upon him a peculiarly baleful influence, besides sometimes interfering with his official duties.* He regarded himself as inextricably involved in the toils of his evil habit, and bewailed his misfortune, apparently unconscious of his power to remove it. He died at the age of forty-four, many years being lost of a life otherwise useful—another instance of the disastrous results of stimulating a brain and nervous system that were much better when left to more natural invigorants."

EDWARD W. CASEY, a native of New Hampshire, was in the order of arrival the fifth member of the Chicago Bar, and was deputy to R. J. Hamilton in 1833. He acted as secretary to him in his capacity of school commissioner at the sale of school lots, October 20 to 25, 1833. Early in the next year his literary, legal and clerical powers were brought into requisition by his townsmen in drafting a petition to the Postmaster-General, asking better mail facilities for the uneasy little town on the Chicago River, which even then was unwilling to be ignored, and eager "to push things." Mr. Casey was appointed corporation attorney August 18, and its clerk and collector December 19, 1834. His name appears on the Supreme Court register of lawyers licensed to practice, under date of January 7, 1835. It was while acting as attorney for the town that he prosecuted Richard Harper for vagrancy. The personal habits of the lawyer furnished occasion to the accused to make the demurrer, whether one vagrant could law-

* There is often an interval of months, and sometimes of years, between the date of actual license to practice and that of record on the rolls of the Supreme Court.

* "Court is adjourned from day to day" says the Chicago Democrat of February 9, 1850, "by a spree of Judge Spring."

fully prosecute another. Mr. Casey formed a partnership with Buckner S. Morris August 7, 1835, and was elected Justice of the Peace two days latter, but does not appear to have served long in that capacity. That Morris & Casey did a fair share of the law business of the period may be inferred from the frequency with which their names recur in the scant records of those early years. Mr. Casey took an active part in the meetings and deliberations of November, 1836, which led to the petition for a city charter. The firm was dissolved on or before December 1, 1836, and Mr. Casey continued to practice here alone until some time in 1838, when his friends induced him to return East. In those early days the excessive use of liquor was almost universal. Here and there a professional man stood aloof from the mad whirl of excitement, but a large proportion of the young and brainy fell victims to the spirit of the times in their personal habits. Among them was Mr. Casey, whose life, however, happily teaches an important lesson in this regard. For no sooner had he broken with the associations of the frontier, and withdrawn to the purer atmosphere of a New England farm, than he corrected those mistakes of immature life and became a respectable and self controlled citizen. In the 2 Scam. he is said to have been residing at Concord, New Hampshire, in 1841, and in the Times of October 3, 1875, at Newburyport, Mass. "He was," says Judge Goodrich, "a thorough lawyer, a fine scholar a most amiable man, and a polished gentleman. Though he had acquired a good practice and had before him the highest promise of professional success, he abandoned his profession, returned to his Eastern home, and engaged in farming."

JAMES GRANT, born in North Carolina, December 12, 1812, was the sixth member of the Chicago Bar, was admitted to practice by the Supreme Court of Illinois, March 26, 1834, and arrived here "on the 23d of April" of that year. He was appointed State's Attorney, Jan-

James Grant,

uary 1, 1835. As early as January 30, 1836, he represented large real estate interests here, advertising for sale at that date 7,000 acres at the terminus of the Illinois & Michigan Canal, which belonged to Arthur Bronson of New York. About March 30, 1836, he formed a law partnership with Francis Peyton, and the firm, Grant & Peyton, continued until 1838. Mr. Grant removed to Iowa in 1839, where he rose to the position of Judge, and where he still survives, at Davenport, an honor to the Bar and Bench of two great States. Of late years he makes an annual pilgrimage to Chicago, to the reception of old settlers by the Calumet Club; but the fuller history of his life belongs to the State of his later adoption.

ALEXANDER N. FULLERTON was a native of Vermont, and there admitted to the Bar, arrived here between July and November, 1833, but nothing is known of his pursuits until 1835. Early in June of that year he was in partnership with Grant Goodrich; on the 19th he became a member of the first board of health, and three weeks later was appointed clerk of the board of Town Trustees. The firm of Fullerton & Goodrich was dissolved February 22, 1836, and after a year or two of little more than nominal connection with the profession, he finally drifted into commercial business, and was as

early as 1839 generally recognized as a lumber merchant. "Though a wellbred lawyer," says Judge Goodrich, "he was never actively engaged in practice, but devoted himself to the accumulation of wealth, and died pos-

A. N. Fullerton

sessed of a large fortune," September 29, 1880, aged seventy-six. He belonged therefore to the commercial rather than to the professional class of early settlers.

JAMES H. COLLINS first became known to the citizens of early Chicago in February, 1834, when he formed a partnership with J. D. Caton, who had studied law under him, at Vernon, N. Y., two years before. He pulled up stakes in the fall of 1833, having been defeated on the Anti-Masonic ticket in his native State, set out for the West, and passing through Chicago in September, settled on "a claim" at Holderman's Grove, in what is now the southwestern corner of Kendall County, where a settlement had been begun some three years earlier. But the sufferings of the first winter convinced him that he was not cut out for a farmer. Indeed

James H. Collins

he was found at Levi Hill's tavern by Caton, January 3, 1834, with his feet badly frozen; and it was then arranged that on his recovery he would join Caton in Chicago. A year later, among the expenses of the town of Chicago, is an item of five dollars paid him for legal advice. The firm of Collins & Caton was dissolved in 1835. Afterward Mr. Collins formed a partnership with Justin Butterfield, the first record of which is found under date of July 16, 1836, and which lasted until about 1845. In those early years of the Chicago Bar, the firm of Butterfield & Collins was the most conspicuous, being usually found engaged in every important lawsuit, on one side or the other. They were of the counsel for the General Government in the celebrated Beaubien land claim, and Collins bought several of the lots which many of the citizens had intended the old Colonel should bid in without opposition. Mr. Collins feeling satisfied that such an arrangement would accrue to the benefit of others rather than of Beaubien, bid on the lots, drawing upon himself much adverse criticism from Press and people. He was very obstinate in his opinions and was once committed for contempt by Judge Ford for refusing to submit to the court a document entrusted to him by a client, John Shrigley, High Constable, which he claimed was privileged. He was associated with Owen Lovejoy in the defense of the latter in 1842, in his celebrated trial for harboring a runaway slave, and did much toward securing his acquittal. After dissolving partnership with Butterfield he practiced his profession alone for seven or eight years, but in 1853 he formed a new partnership with E. S. Williams, who had studied law with Butterfield and himself several years before. He was "an early and most violent and extreme abolitionist, and in 1850 was the candidate of that party for Congress, receiving one thousand six hundred and seventy-three votes." He died in 1854 of cholera. "He was a good lawyer," says Arnold, "a man of perseverance, pluck and resolution, and as combative as an English bull-dog. * * *

He was indefatigable, dogmatic, never giving up, and if the court decided one point against him, he was ready with another, and if that was overruled, still others." "He seems to me," says Goodrich, "never to have had one particle of genius, but was the hardest worker I ever saw. He bestowed upon the preparation of his cases the most thorough research and critical examination. Though often brought in professional conflict with him I always regarded him as my friend; and have the melancholy satisfaction of having attended him almost alone during the whole night of his fearful struggle with the cholera, until death relieved him of his sufferings." He had at least two daughters—Cornelia M., who was married to J. V. Smith, and who died at her father's house May 31, 1851, at the age of twenty; and Kate F., who was married May 15, 1855, to John M. Sharp.

HENRY MOORE, a native of Concord, Mass., arrived in Chicago some time in 1834, being admitted to the Bar in Illinois December 8 of that year. He was the second of quite a line of deputies to Colonel Hamilton, Circuit Court clerk, a position he held until the fall of 1835, when his law practice required his attention. Early in 1836, he formed a partnership with F. A. Harding, which was dissolved May 19, 1837; and the firm of Moore & Harding turns up frequently in law business of the time. Mr. Moore was at the Circuit Court of Iroquois County on business May 16, 1836,

Henry Moore

when Judge Ford appointed him for the defense of the murderer "Morris." He "astonished" the prosecuting attorney, James Grant, by "the ability he manifested." "He relied," says Grant, "upon the insufficiency of circumstantial evidence; made the usual argument in such cases, but with much more than the usual ability." In the fall of 1836 Mr. Moore was one of the prominent speakers at the Whig meeting in Chicago; and in December one of the representatives of Cook County at the Internal Improvement Convention held at Vandalia. In March, 1837, his name is on record as a trustee of Rush Medical College, and June 1 of same year he became law partner of E. G. Ryan. He obtained about that time from the Legislature the first charter for a gas company in Chicago; and was an active and prominent member of the Bar. He, however, found this moist and breezy climate rather unfavorable for his weak lungs, and on the approach of the winter of 1838-39, he sought alleviation in the genial climate of Havana, Cuba. He did not return to Chicago, but it is learned from "2 Scam." that he was a resident of Concord, Mass., in 1841, where he died before many years.

BUCKNER STITH MORRIS was born August 19, 1800, at Augusta, Ky., a village founded by his maternal grandfather, Philip Buckner, who had been a Captain in the War of Independence. The parents were Dickinson Morris, a native of Delaware, but at this time surveyor of Bracken County, Ky., and Frances Buckner, by birth a Virginian. Schools were few in Kentucky, and young Morris received his early education at home from his parents. He arrived at man's estate, and had worked some on farms before he conceived the idea of studying for the Bar. From 1824 to 1827 he devoted

to acquiring a knowledge of the profession, and was admitted to the Bar in the latter year. In 1830 he was elected to the Legislature, and was re-elected in 1832, being a Whig in politics, but never a blind partisan. In 1832 he married Miss Evilina Barker, of Mason County, Ky. At the close of his second term, in 1834, he came to Chicago, by way of the Wabash to Vincennes, and on horseback from that point. Returning for his family, he made a second trip in August, when he permanently settled here. He found less than forty houses on his arrival, and soon opened a law office. He is found advertised as a Chicago lawyer as early as July 9, 1835; and formed a partnership with E. W. Casey August 7, though his name does not appear on the records of the Supreme Court of Illinois as a licensed lawyer until December 7, 1835. Morris & Casey dissolved in the fall of 1836, and Morris & Scammon was formed December 5, 1836. This firm was also short-lived, as Mr. Morris was elected Mayor in the spring of 1838, and Alderman of the Sixth Ward in 1839. In 1840 he resumed more fully the practice of his profession, and formed a partnership, August 13, with William W. Brackett, which lasted about three years. With

Buckner S. Morris

Lincoln, in 1840, he was nominated presidential elector at large on the Whig ticket. In 1844 he was elected Alderman, but resigned before the close of the year, and was also president of the Hydraulic Company. In 1845 he formed a new firm with William M. Greenwood as partner, who was exchanged as early as March 16, 1846, for John J. Brown. His wife died in 1847, leaving two daughters; and in 1848 he became a Mason, eventually reaching the highest degree attainable in America. In 1850 he married Miss Eliza A. Stephenson, who died suddenly of heart disease in 1855, leaving one son, who,

however, lived to be only seven. The firm of Morris & Brown continued until the death of Brown in August, 1850, after which Grant Goodrich became partner for a short time. In 1852 he formed a new partnership, the firm being Morris, Hervey & Clarkson; and was the unsuccessful Whig candidate of that year for Secretary of State for Illinois. In 1853, Judge Hugh T. Dickey having resigned, Mr. Morris was elected to complete his term as Circuit Judge, and was commissioned May 24. The Green trial for wife murder was prosecuted before Judge Morris, and is said to have been the first case in this State in which scientific experts were accepted on the witness stand, Green's conviction being largely due to the testimony of Drs. Blaney and Bird to the presence of strychnine in the stomach of the deceased. His decisions in relation to that class of evidence have been often quoted, and have been incorporated in the medical jurisprudence of the State. He was tendered a nomination for re-election at the close of his term in 1855, which he declined and returned to his practice. He soon formed a new partnership, the firm being Morris & Blackburn in 1856, and Morris, Thomasson & Blackburn in 1857. In 1856 he married Mrs. M. E. Parrish, of Frankfort, Ky., a daughter of Edward Blackburn, and sister of Morris's two partners, Breckenridge F. and James Blackburn, and of the recent Governor of Kentucky, Dr. Luke Blackburn. In 1860 he was a candidate for Governor of Illinois on the Bell and Everett ticket, of which he was an early advocate, as a solution or postponement of the impending crisis. He claimed that a vote for Lincoln on the one hand or for Breckenridge on the other was a vote for civil war, as sectional feeling had reached a point where no other issue could reasonably be anticipated. The election of Bell and Everett alone could save the country. One of his regrets and a constant censure of Andrew Jackson was the breaking up of the United States Bank. He held that the cohesive power of a common financial system in holding the North and South together had not been duly weighed. His Southern origin and relationship with the Kentucky Blackburns, who were all violent Secessionists, as well as his acknowledged connection with "Sons of Liberty," but above all the heated state of the public mind which could brook nothing less than the most out-spoken Unionism, brought him into suspicion of disloyalty in 1864, in connection with the alleged Camp Douglas conspiracy. Mr. and Mrs. Morris were arrested with the other "conspirators," taken to Cincinnati, tried by court martial and acquitted. Judge Drummond thus testified to his loyalty; "I have been acquainted with Judge Morris for twenty-five years, and I think his reputation to be, as far as I know it, that of a loyal man. He was a strict advocate of what was the Crittenden compromise, and desired exceedingly that the difficulties between the two sections of the country should be settled amicably. * * * I do not know what developments this trial may have produced, not having followed the evidence, but up to the time of his arrest I certainly should as soon have distrusted my own loyalty as that of Judge Morris." During his detention, which lasted several months, Mrs. Morris and himself received much kind attention at the hands of one of the female religious orders of the Roman Catholic Church, which eventually led both to give their adhesion to that communion. After their release in the spring of 1865, Judge Morris ceased to be an active member of the Bar, confining himself chiefly to his real estate interests and occasional law business for his friends. He died December 16, 1879, having

well entered on his eightieth year, and was buried from St. Mary's Catholic church. "Both these gentlemen," says the Hon. Thomas Hoyne, speaking of Judges Spring and Morris, "rose to high positions from the native force of their characters, and the possession of vigorous intellects. And what seemed singular in their case is, that in the absence of regular culture in the art of advocacy or oratory, they were among the most successful speakers of the day. In many respects they obtained in jury trials a pre-eminence in advocacy over their more highly favored brethren who had been sedulously prepared in universities and schools, both in New York and New England."

To this Judge Goodrich adds: "Having been a partner for a short time of Buckner S. Morris, I am justified in saying—and I think all who were acquainted with his professional capacity will agree with me—that he was no ordinary man. It is evident his general education, his professional reading and training had not been systematic or thorough, but he possessed good vigor of mind and strong common sense and sincerity of manner, which joined with a popular homeliness of expression, apt and striking comparisons, fervent zeal and apparent honesty of belief in the justice of his cause, made him a formidable opponent before a jury. In a desperate case he was remarkable, and the more desperate it was, the more conspicuous his powers became. He often carried his case by main strength against the law and the facts; and it became a common remark that in a bad case he had no equal. He was elected Judge of the circuit, but was better fitted for practice and served but a brief term on the Bench. In character he was simple as a child, tenderly sympathetic and kind, heartily good-natured, and genial in his manners. I doubt if the remembrance of any deceased member of the Chicago Bar is cherished with more un-mixed sentiments of kindness than that of Judge Morris." "For native strength, I never saw his superior," says Mr. Beach; "his natural powers of oratory were truly great."

CIRCUIT COURT, 1835-36.—Thomas Ford, who had been Prosecuting, or State's Attorney, in the Fifth Judicial Circuit, was elected by the General Assembly as Judge of the newly created Sixth Circuit; but, by exchange, the first term in Chicago in 1835 was held by Judge Sidney Breese. It extended from May 25 to June 9, showing a marked increase in the business of the court. Before 1835, three or four days were sufficient to clear the meager docket, but thenceforward there never was any lack of business in Chicago courts. The judicial requirements of the place have always kept ahead of the legislative provision for its wants. No sooner have apparently ample facilities been secured than the city has leaped forward to double or treble the population contemplated, compelling a fresh enlargement of the judicial force. This term was the first in Chicago after it became part of the Sixth Circuit, and the first held anywhere by the recently elected Judge Breese, then in his thirty-fifth year.

Chief-Justice Marshall died July 6, 1835, and the first formal meeting of the Chicago Bar was held in respect to his memory. The members present were Fullerton, Casey, Goodrich, Morris and Moore of those already mentioned, and Royal Stewart, a later accession.

The second term of the Circuit Court, in 1835, was held by Judge Stephen T. Logan, also in exchange with Judge Ford. It was opened the first Monday in October and closed on the 11th. By this time there were one hundred and three civil suits on the docket, and

seventy of these were determined at that term. Of the thirty-seven people's cases twenty-five were closed—nineteen were merely for non-attendance as jurors, of whom two were fined five dollars each; and twelve cases were continued. The case of most interest at this term was the—

SECOND MURDER TRIAL.—The criminal under indictment gave the name of Joseph F. Morris, but it was afterwards stated that his real name was Joseph Thomasson. His victim's name was Felix Legre, and the murder was committed about twenty miles from Chicago on the road to Ottawa. The Grand Jury of Cook County found a true bill against Morris at the fall term of 1835, but by change of venue the case was carried to Iroquois County, where it was tried the ensuing term. Notwithstanding the most strenuous efforts, and an able defense on general principles, by Henry Moore, who had been assigned to him as counsel by Judge Ford, Morris was convicted on rather slender evidence, wholly circumstantial. He was the person last seen in company with the murdered man, and a knife was found in his possession which the recent employer of Legre fully identified as belonging to that unfortunate individual. He denied the killing, but acknowledged that he knew the guilty party, whose name, however, he steadily refused to divulge—a self-deceiving evasion founded probably on the false name under which he was indicted. The implied chivalry and devotion to alleged principles was too fine-spun for a jury of pioneer settlers of Iroquois County, and they found him guilty of murder, though not without some hesitation. On May 19, Judge Ford sentenced him to be hanged June 10, 1836; and the sentence was faithfully carried into effect, though in the absence of a jail it required persistent watchfulness on the part of Sheriff Dunn of Iroquois County and his deputy, George Courtright. The substantial justice of the verdict has never been seriously questioned, but conviction on the evidence would be to-day improbable, if not hopeless.

Both these terms of the Circuit Court of Cook County in 1835, were held in the First Presbyterian church, then situated north of what is now the Sherman House, and fronting on Clark Street. The spring term of 1836 was held by Judge Ford in the same building, and extended from May 23 to June 4. There were two hundred and thirty civil cases, twenty-one criminal and thirteen chancery. Most of the people's cases were for constructive contempt through non-attendance as jurors. The two most important of them were for assault with intent to kill and both culprits were sent to the penitentiary, the first of a long and ever-widening band of convicts on that charge from Chicago. The most important civil suit was, perhaps, that of *Harrington vs. Hubbard*, the first land case in Cook County which was decided in favor of the defendant but on appeal to the Supreme Court that decision was reversed the ensuing winter at Vandalia.

The fall term of 1836 was held by the same Judge, and in the same building. In addressing the Grand Jury, James Grant, prosecuting attorney, dwelt specifically on the duty they owed the public in relation to trespassers upon the canal lands. The court re-enforced his remarks by reminding them that it was to these lands the public must look for the completion of the canal; and every tree stolen detracted from its value. Both speeches help to show how paramount in interest at that time to the people of Chicago was the longed-for canal and all its belongings. Several rogues were sent to the penitentiary at Alton as a result of this term

of court; and a score or more were indicted for trespassing on the canal lands; but a large part of the court business remained unfinished, and the need of additional judicial facilities, through new courts or more terms of the Circuit Court, became apparent.

Among the most important of the civil cases tried at the fall term in 1836, was what is popularly known as the Beaubien land claim, which Judge Ford decided favorably to claimant. This decision was sustained by the Supreme Court of the State, but was reversed in 1839 by the Supreme Court of the United States. See Beaubien claim.

THE CHICAGO BAR AT THE ORGANIZATION OF THE CITY.—As at the close of 1834 Cook County was about to be transferred from the Fifth to the Sixth Circuit, so now before the spring term of 1837, it became a part of the Seventh Circuit, to which amid frequent changes and numerous additions to the circuits in the State, it ever afterward belonged, until by the Constitution of 1870, the County of Cook was made one judicial circuit. A month after the establishment of the Seventh Judicial Circuit, Chicago was granted its charter of incorporation as a city, which is therefore appropriately made an era in the history of its Bench and Bar. Meanwhile the membership of the Chicago Bar had more than doubled, and biographical sketches of the accessions since the close of 1834, now deceased or departed from Chicago, are here subjoined.

ROYAL STEWART is on record as admitted to the Bar in Illinois January 8, 1835; and is found advertised as an attorney at Chicago on June 8, of the same year. How much longer he remained a resident is not clear, but his name disappears from the local records.

In 1841, however, he was residing at Syracuse, N. Y., as may be learned from *2 Scam*.

WILLIAM H. BROWN, a lawyer and distinguished citizen, is treated elsewhere, as after his arrival in Chicago he became more distinguished as a banker.

JAMES CURTISS, more of a politician than a lawyer, and twice Mayor, became identified with local political affairs, and is more properly named in that connection.

HANS CROCKER arrived in Chicago in 1834, and studied law for a time in the office of Collins & Caton. In 1836, he removed to Milwaukee, where he has since attained some prominence as a lawyer,* but he was not admitted to practice while here, and does not properly belong to the Bar of Chicago.

WILLIAM STUART, though not admitted to the Bar in Illinois until July 11, 1837, advertised as attorney and land agent as early as December 5, 1835. He never practiced much at the Bar, being at first a real estate man, and then a journalist. In August, 1836, he became partner of James Curtiss, and was appointed Town Attorney for a short time during the absence of James H. Collins. Curtiss & Stuart dissolved in October, 1837, and Mr. Stuart was publisher and editor of the *Chicago American* in 1839. He was appointed Postmaster by Harrison in 1841, and held that office until the close of the presidential term in March, 1845. In May of that year he formed a partnership with Charles H. Larrabee, but in 1846 he left Chicago for Binghamton, N. Y., where he also edited a newspaper and became twice Postmaster, and died a few years since.

EBENEZER PECK was born in Portland, Me., May 22, 1805, but received his earliest education at Peacham, Vt. While yet a lad, his parents removed to Canada, and some years later young Peck began the study of law in Montreal, where also he first practiced the profession. About 1826 he was married to Miss Caroline I. Walker,

* A. T. Andreas's *History of Milwaukee*, 1881, page 1583.

at Peacham, Vt. In 1833 he rose to the dignity of King's Counsel for a district in Canada East, and was elected to the provincial Parliament on the Reform ticket. His party began to drift toward rebellion, and Counselor Peck removed to Chicago, where he arrived in the summer of 1835. About the middle of October, he is found associated with J. D. Caton, in the case of *Geddis vs. Kercheval*. "He made his mark at once," says Caton. "He showed that his study of the law had been systematic, while he evinced all the resources of tact, and sagacity and quickness of apprehension, so important in the successful trial of a cause before a jury. His ad-

EBENEZER PECK.

dress to the jury was forcible, and at times eloquent." From the first he took an active interest in politics, and was induced by Mr. Caton to join the Democratic party. October 28 he was appointed Town Clerk, and the ensuing month was chosen delegate to the first State Convention, which was held at Vandalia December 7, and at which the future Senator Douglas first began to attract public attention. Before leaving the capital, he was admitted to the Bar of Illinois, December 14. In the summer of 1836, he resigned the clerkship of the town, and a few months later became prominent in the movement for a city charter. At the meeting of November 25, he was appointed chairman of the committee to draft it, and December 9 reported the instrument, which with slight modifications was finally adopted by the Board of Town Trustees, and passed by the Legislature, March 4, 1837, as the charter of the future metropolis of the Northwest. Of this he and Caton have always been regarded the principal authors. In 1837, on the dissolution of the house of Jones, Clark & Co., Mr. Peck became a member of the succeeding firms of Jones, King & Co., and W. H. Stow & Co., iron found-ers. He was chosen one of the board of commission-

ers under the State internal improvement act of 1837. In 1838 he was elected from this Senatorial District to fill the unexpired term of Peter Pruyne, deceased, but resigned before the close of the term and became clerk of the internal improvement board in 1839. In the suspension of public improvements, which soon supervened, his position was neither exhaustive nor remunerative, and he was again elected to the Legislature in 1840, this time as representative. On the re-organization of the State judiciary by the General Assembly February 15, 1841, he was chosen clerk by the Supreme Court some time before May 19. In 1846 he formed a partnership with James A. McDougall, of Chicago, previously of Jacksonville, and later Attorney-General of the State, which continued as McDougall & Peck until the former went to California in 1849, when Peck became associated with Charles B. Hosmer. Meanwhile he had gone out of office as clerk of the Supreme Court when it was legislated out of existence by the adoption of the new constitution March 6, 1848. Charles Gilman, reporter of the Supreme Court, died July 24, 1849, and Mr. Peck was chosen to that office by the new court, and from that time the volumes were called Illinois Reports. His first appeared in 1850, and he numbered it XI, thus leaving room for the preceding ten—Breese's one, Scammon's four and Gilman's five. His own series closed with Volume XXX, in 1863. About 1850 he became interested in the new Democratic journal known as the *Argus*, the business connection being in the name of his eldest son, W. W. In 1853 his law firm became Peck, Hosmer & Wright, by the accession of Edward Wright, son-in-law of the senior member. In the memorable new departure of the Democratic party for the enlargement of the slave area, in 1853, by the repeal of the Missouri Compromise, established by their more prudent fathers a generation before, Mr. Peck abandoned his old party associations. In 1856 he became one of the ex-Democratic founders in Illinois of the party which has since become historic under the name of Republican. In the famous political debate between Lincoln and Douglas in 1858 Mr. Peck was deeply interested, and was elected on the new ticket as one of the four representatives of Cook County in the twenty-first General Assembly, where he helped, by his experience and management, to establish the Republican party on a solid foundation in the State. In 1860 he labored for its success in the wider field of national politics. In April, 1863, he resigned as reporter to the Supreme Court of Illinois, and was appointed one of the judges of the Court of Claims at Washington by President Lincoln, whose friendship and intimacy he enjoyed and labored to repay by faithful advice and devoted service. In the heavy burdens of head and heart which fell to the President's lot he is known to have sought and valued the counsels of Judge Peck, whose experience as a politician specially commended his views. For many years there were but few men in Illinois who wielded a more extensive or powerful influence in political circles, and few were more active or adroit partisans. He held the judgeship under the successive administrations of Johnson and Grant, retiring in 1875 on full pay, at the age of seventy, when he returned to Chicago in broken health. His oldest son W. W., born in 1831, died at Washington, a Captain in the regular army, in 1862. Two years after the return to Chicago, the mother died, in 1877. The Judge survived his wife some four years. He died May 25, 1881, and was buried two days later from Unity church. Three children survived him—Charles F., bred a lawyer,

and admitted to the Bar of Illinois January 7, 1857, who removed to Washington about 1864, and became a member of the law firm of Hughes, Denver & Peck; Mrs. Edward Wright, and Mrs. Perry Trumbull, an adopted daughter. At the memorial meeting of the Bar, convened May 26, and adjourned to the 30th, when they again assembled, speeches were made by several of the Judge's late associates, from which are excerpted the following estimates of his character and powers:

"It could be truthfully said of Judge Peck," remarked Judge Drummond, "that he was an honest, self-reliant man, whose judgment and counsel went rarely astray." "A man," said B. C. Cook, chairman of committee on resolutions, "of earnest convictions and had the courage of his convictions, * * * a judge whose decisions will stand as clear, profound, and faithful expositions of the law. * * * He has left the impress of his character upon the eventful time in which he lived. His influence has been marked and beneficial in the history of the city, the State and the Nation." * * * "It was fortunate," says Judge Caton, "that he was rarely wrong. Whenever his mind was fully made up on any subject, I never knew him to change it, and this whether it were on a question of law or ethics, the use of a word or the structure of a sentence. * * * It was not obstinacy, for he was anxious to be convinced and to agree with us. It was simply conviction, from which he would not be moved to oblige anybody." "Judge Peck," says Mr. Ashton, "was no ordinary man. As a lawyer and judge he had few superiors; as an adviser and counselor I doubt if he had his superior. He was not a 'case lawyer,' although when inclined, he was a fine advocate. He was a lawyer in the fullest sense of the term. * * * He always reached his conclusions by analysis and from principle. * * * He disliked the drudgery and routine of the office, but when necessary he could accomplish as much labor in a short time as any man I ever knew." "He was," said Judge Trumbull, "outspoken in his opinions, and never pretended what he was not. With hypocrisy, shams and deceit he had no patience. He was a man of great kindness of heart, full of sympathy and hospitality. * * * His family circle was one of the happiest and brightest in which it was ever my privilege to mingle. Even in later life, when pain and sorrow came, and his physical system was broken by disease, his hope and cheerfulness did not forsake him. * * * He lived a pure life, was kind, true and faithful in all its relations, and died an honest man."

ALONZO HUNTINGTON was born in Shaftsbury, Vt., September 1, 1805. He was a grandson of Amos Huntington, a Captain in the Revolutionary War, and on his mother's side a grand-nephew of Governor Galusha, of Vermont. After receiving his early education in the schools of his native State, he removed, in early manhood, to western New York, where he worked some years at his trade of mason, and afterward studied law under the Hon. I. T. Hatch, of Buffalo. In 1833, he returned to Vermont, where he married Patience Lorain Dyer, a native of Clarendon, Rutland County, and a sister of the well-known Dr. Charles V. Dyer, of Chicago. For two years after his marriage he resided in Wayne County, N. Y., of which Lyons is the county-seat, when he removed to Chicago in the fall of 1835. He was chosen State's Attorney for the Seventh Circuit in 1837, his competitor, Albert G. Leary, a member of the Bar, being rejected by a majority of the General Assembly, because he was himself a member of that

body. In 1839, Mr. Huntington was again chosen State's Attorney. Admitted to the Bar in New York, he is not found enrolled on the list of the Supreme Court of Illinois until January 14, 1840. The most remarkable criminal case prosecuted by him was the *People vs. John Stone*, for the murder of Mrs. Lucretia Thompson, at the spring term in 1840, and excited some rhe-

A. T. Huntington

torical but undeserved animadversion as a prosecutor of the Press, for performing under the orders of the court the perfunctory duty of entering suit against the editor of the American for contempt. At the expiration of his second term in 1841, he resumed the practice of the profession as a member of the Chicago Bar. As prosecutor and advocate he was recognized as of great industry rather than great talents, of conscientious fidelity to the interests of his clients rather than oratorical ability, and of unquestioned integrity rather than showy pretension or display of legal lore. In his official position he was fairly successful, especially during his second term. To his neighbors and acquaintances he was cordial; to his family, kind, generous and self-sacrificing. To stand by his own was the cardinal principle of his life, and in the varied relations of son, brother, husband and father he has seldom been surpassed. He died at his home in Chicago, November 17, 1881, aged seventy-six years. His wife had preceded him twenty years, having died October 23, 1861, aged sixty. They had six children, of whom only two, a son and a daughter, survive. Henry Alonzo Huntington, the son, was born in Chicago, March 23, 1840, served as an officer in the Fourth United States Artillery in the Rebellion, and is

now better known as Major Huntington, of the editorial staff of the Chicago Tribune. The daughter, Frances, born in Chicago October 23, 1844, is the wife of Benjamin M. Wilson, of the law firm of Wilson & Collier, of this city.

JONATHAN YOUNG SCAMMON, also a member of the early Bar of Chicago, being admitted December 7, 1835, is sketched in the field of perhaps his greater fame as an early banker.

JOSEPH N. BALESTIER was born in 1815 at Brattleboro, Vt., whence he emigrated to Chicago some time in 1835. He soon formed a partnership with Thomas R. Hubbard, and the firm is found advertising "money to loan" in the Chicago American of December 5, of that year. Both were recognized as lawyers though neither seems to have taken the trouble to obtain a license to practice in Illinois. In 1836, Mr. Balestier "realized \$500 per day," says Harriett Martineau, "by merely making out titles to land."* Hubbard & Balestier advertised as a firm as late as August 16, 1837, and both appear in the reprinted "directory of 1839." January 21, 1840, Mr. Balestier delivered before the Lyceum his now celebrated lecture "The Annals of Chicago," reprinted in 1876, with an introduction by himself, as No. 1 of the Fergus Historical Series. On or before September 25, 1840, he formed a new partnership with E. Webster Evans, a young lawyer, just arrived from the East. But within a year, September 23, 1841, we find Mr. Balestier advertised as a lawyer at No. 58 Wall Street, New York; and his Introduction to the Annals, already referred to, is dated Brattleboro, Vt., January 1, 1876, where he now resides.

THOMAS R. HUBBARD went to New York about 1839, and became secretary to a banker.

GEORGE ANSON OLIVER BEAUMONT was born in Columbia, Tolland Co., Conn., about 1811. Reaching early manhood, he studied law at the New Haven law school, where he received a diploma, equivalent to a license to practice in the courts of the State. In 1836, accompanied by his mother, widowed in his infancy, he moved to Chicago. He formed a partnership with Mark Skinner August 6, 1836, and the firm held a respectable rank in the profession. Mr. Beaumont was not enrolled on the Supreme Court list as a licensed lawyer until December 11, 1839, though probably admitted to the Bar here as early as 1836. In 1842 he was appointed Commissioner in Bankruptcy for Cook County. On February 3, 1842, before the Young Men's Association, he delivered a lecture on "American Literature." In the spring of 1844 his health became impaired, and Mr. Skinner being appointed United States District Attorney, the firm was dissolved that summer. In the ensuing spring Mr. Beaumont was taken by his mother to the home of his youth, but the change did not avail, and he died of softening of the brain, December 18, 1845. He was a tall, slim man, of delicate organization, unfortunately subject from his youth to nervous disorders, which despite a fair intellect, an excellent education and industrious habits, retarded his professional progress; and although Mr. Beaumont attained respectable rank in the early Bar of Chicago, he made no permanent impression on the public mind, and his existence is almost forgotten.

FISHER AMES HARDING, a native of Rhode Island, where he was born about 1812, and a graduate of Brown University made a brief sojourn in Chicago as a lawyer, though not on record as admitted to the Bar in Illinois. He is first mentioned here as disputant before the Lyceum, February 20, 1836, and next, as partner of Henry

Moore, March 12, of the same year. Moore & Harding dissolved May 19, 1837, and Mr. Harding became associated with Fletcher Webster. The firm of Webster & Harding soon removed to Detroit, Mich., where after a few years Mr. Harding became editor of the Detroit Daily Advertiser. He found in journalism a more congenial sphere, and filled the position of editor with distinguished credit until his early death in 1856.

FLETCHER WEBSTER, a son of Daniel Webster, born in 1812, and a graduate of Dartmouth, was as above stated the head of the law firm of Webster & Harding of Chicago for a brief interval in 1837, while residing at Peru; but as he was never enrolled among the licensed lawyers of Illinois, and as the firm soon removed to Detroit, his connection with the early Chicago Bar is sufficiently noticed by this brief mention.

HENRY BROWN was born in Hebron, Tolland Co., Conn., May 13, 1789. The father, Daniel, was a commissary in General Greene's division, in the Revolutionary War, and was granted a pension for his services. He provided a liberal academic and collegiate education for at least two of his sons. Henry graduated at Yale, and when of age removed to New York, where he studied law, first at Albany under Abram VanVechten, afterward at Canandaigua under John Gregg, and finally under his own elder brother, Daniel, at Batavia. Admitted to the Bar about 1813, he settled at Cooperstown; and in 1816 was appointed Judge of Herkimer County. After quitting the Bench, about 1824, Judge Brown continued the practice of law in Cooperstown until he removed to Chicago in 1836. Mr. Brown was elected Justice of the Peace May 20, 1837, vice E. E. Hunter resigned. His son Andrew Jesse, born in Springfield, N. Y., in 1820, arrived in Chicago in 1837, and Mrs. Brown and four daughters followed,

Henry Brown

in 1838. In 1839, his term as Justice expired, and he returned to his profession, to which, and some literary work, he devoted the remainder of his life. He was chosen City Attorney in 1842, and appointed, in 1843, upon the resignation of George Manierre. In March of the later year he announced that he was preparing to publish a history of Illinois, which was issued in New York City in 1844, and on which he had spent a year. His name does not appear on the Illinois list of licensed lawyers until February 27, 1845. Later in that year he took into partnership his son, who had studied law with him but had removed to Sycamore, DeKalb County, where he was admitted to the Bar December 27, 1842, and who had returned to Chicago in 1845.

January 20, 1846, Judge Brown as president of the Lyceum, delivered an inaugural on "Chicago, Present and Future,"* which has become historic, and which evinces deep thoughtfulness, great breadth of view and a quite marked foresight of Chicago's destiny. He died in 1849, three days after his sixty-first birthday, of cholera, being the first case in that year, and not suspected until after the disease had become epidemic. He was buried with Masonic honors, having stood high for many years in the confidence and respect of that fraternity. One of his earliest literary efforts was a defense of the order against the attacks of the anti-Masonic party, based on the alleged abduction of Mor-

*Mrs. Martineau was very deaf and mistook \$50 for \$500.

*Published as part of No. 6 of Fergus's Historical Series.

gan and other prejudices. It was published in Batavia while Mr. Brown resided there, forming a duodecimo of two hundred and forty pages. Judge Brown was one of the kindest of men, very cordial in his intercourse with his fellows, and utterly devoid of pretension or vanity. All affectation of dignity and assumption of unnecessary gravity by others excited his ridicule, as he conceived such airs to be but an ingenious contrivance to conceal deficiency or impairment of brain power. Such was his habitual industry that during the greater portion of his life he labored at his duties or his studies sixteen hours out of the twenty-four. He was a man of the most extensive and varied reading, and had learned to cull flowers of fancy and gems of thought from all the literatures of mankind. He was of frank truthfulness and childlike candor, and was universally respected for his many excellent qualities of head and heart. He was large and imposing of stature, weighing over two hundred pounds, and of dignified appearance. In politics Judge Brown was a Democrat, and entertained Mr. Van Buren during his visit to Chicago, July 4, 1842, and with him became a Free-Soiler in 1848, but he was too transparent to be a successful politician, and too broad to be a blind partisan. Besides the son already mentioned, his wife and four daughters survived him. The eldest child, Cornelia A., born in Springfield, N. Y., August 12, 1818, married William H. Stickney, of Chicago, February 19, 1852. The second daughter, Julia, borne in Danube, Herkimer Co., N. Y., in 1822, married George W. Dole, of Chicago, March 30, 1853, and died October 16, 1865. Sarah, born June 13, 1824, married Dr. William Butterfield, October 23, 1844. Caroline, born August 1, 1826, married Thomas L. Forrest, July 10, 1848.

FRANCIS PEYTON, was a member of the early Bar of Chicago, though never formally enrolled as a lawyer in Illinois. He was a partner of James Grant in the spring of 1836. In the notable meeting of January, 1837, to promote internal improvements he was chairman of committee on resolutions. In May of the same year he was chosen member of the first board of school inspectors of the new city. In the winter of 1838-39, he was attorney for Colonel Beaubien in the final effort to secure his claim to the Fort Dearborn Reservation. He conducted some law business before the Circuit Court in the spring term of 1839, and was one of the speakers on the occasion of a notable excursion on the steamboat "Great Western," August 13, of that year. He afterward came here in 1840 to assist State's Attorney Huntington in the Stone murder trial.

SAMUEL LISLE SMITH was born in Philadelphia in 1817, of wealthy parents. His early advantages, educational and social, were exceptionally good. Precociously talented, he had studied law at Yale and passed the examination entitling him to a diploma or license to practice before he was of sufficient age to receive it. In 1836 he came to Illinois to look after the interests of his father, who owned some choice tracts of land near Peru. With abundant resources drawn from the parental treasury, young Smith associated with the many gay pleasure-seeking young men who then thronged this Western center of speculation, and naturally fell into habits of life which somewhat marred his career. Returning East, he shook off this premature pursuit of pleasure, sought and obtained his diploma as a lawyer, and was married to a Miss Potts of Philadelphia. In 1838 he again set out for the West and settled in Chicago. He made his headquarters in the office of Butterfield & Collins, where he familiarized himself with the laws of Illinois. He gradually slipped into his

former convivial habits, and in 1839 was chosen City Attorney, a position which furnished abundant occasion for the exercise of his genial and generous hospitality. Coupled with the continuous stream of his eloquence, wit and mimicry, his convivial spirit enhanced his popularity, while it did not seriously impair a fortune derived mainly from his father. He was at this time at the very height of his reputation as an orator. The Hon. I. N. Arnold, one of his hearers, at the Whig State Convention at Springfield, in 1840, thus refers to his powers: "I heard for the first time stump-speeches from Lincoln, Harden, Baker, and others, but the palm of eloquence was conceded to a young Chicago lawyer, S. Lisle Smith. There was a charm, a fascination in his

SAMUEL LISLE SMITH.

speaking, a beauty of language and expression, a poetry of sentiment and of imagery, which in its way surpassed anything I had ever heard. His voice was music and his action studied and graceful. I have heard Webster, and Choate, and Crittenden, and Bates of Missouri; they were all greatly his superiors in power and vigor, and in their various departments of excellence, but for an after-dinner speech, a short eulogy or commemorative address, or upon any occasion when the speech was a part of the pageant, I never heard the equal of Lisle Smith." In 1844, he took an active interest in the presidential campaign, the third attempt of the Whigs to elect Henry Clay, of whom he was a great admirer and supporter. In 1847, at the River and Harbor Convention, at Chicago, he signally distinguished himself among some of the best speakers of the nation. Horace Greeley said he was "the star of the vast assembly, and stood without a rival;" and Henry Clay did not hesitate to write that Mr. Smith "was the greatest orator he had ever heard." His magnetic power over an audience, as testified by several surviving witnesses, was something wonderful,

his voice was sweet and clear, his fancy glowed with sublime and matchless imagery, and he was equally at home in pathos or invective. His language was not only choice but phenomenally exact, his memory absolutely marvelous, and his power of mimicry no less so. His imitations of Calhoun, Clay, Preston and Webster are said to have been so curiously life-like as to mislead those most familiar with the peculiarities of these great speakers. His keen sense of the ludicrous and grotesque, joined to a vast fund of humor and innate as well as acquired wit, filled the measure of his phenomenal adaptability to become a great orator. He lacked but two elements of the highest possible success in that line, a more portly physique and a less ardent pursuit of pleasure. He was handsome and graceful but small of stature, rather below the middle size, with a florid complexion and light hair. A third drawback has been found in his inherited wealth, but had he remained master of himself, this would not have proved an obstacle, but a valuable auxiliary. Besides the speeches mentioned, his addresses on the following occasions are singled out as specially noteworthy: At the organization of the Excelsior Association, or Sons of New York, the Society of the Sons of Penn, the Reception of Webster, the Irish Relief Meeting, the Obsequies of John Quincy Adams, and of Henry Clay. Short-hand facilities were not extensive in the Chicago of his day, and it is said, "he never wrote a single word even at his greatest efforts," in enduring form, though we are assured his ordinary preparation embraced not only a rough sketch but a critical weighing of words, phrases and quotations. What is probably correct is that not a single speech was ever written out in full; nor was he so identified with any great law case as to have had either argument or speech preserved in any court record. Altogether his career was rather brilliant than powerful, and has had no influence on the jurisprudence of the State, though it deeply affected the memory, imagination and feeling of his contemporaries. He was genial, generous and hospitable; a kind neighbor, a good citizen and a thorough friend; a perfect gentleman, a ripe scholar and an eloquent advocate of whatever social, legal or political question he espoused; a well-read lawyer and popular among his brethren, and at home a devoted husband and father. Had his self-control been equal to his talents he might have risen to eminence; as it was, a feeling of regret, if not pity, mingles with enthusiasm of his admirers. He died of the prevailing epidemic, cholera, July 30, 1854, before he had reached the age of forty. His wife and two sons survived him. Mrs. Smith was a daughter of the Rev. Dr. Potts of Philadelphia, and a sister of the perhaps better known Rev. Dr. Potts of New York. She died in August, 1871. "The memory of the eloquence of the gifted orator," said the Daily Press, in notice of his death, "will not soon fade from the public mind, which he could at any time sway with the wand of a magician. * * * For those who mourn the sudden rupture of the most tender ties, there is no language to express their grief." In the Recorder's Court, a week later, the following resolutions were introduced by D. McIlroy and seconded by E. W. Tracy: "That in the death of S. Lisle Smith the profession have lost an eminent brother, distinguished for his superior education, his fine and practical intellect, and his elevated moral character; and the entire community, especially the poor, have lost an affectionate and sincere friend." "He was," says Judge Goodrich, "of medium height, a ruddy countenance, a large and finely formed head, a face that gave expression to the feeling

without words. His eyes were dark and shone out from under 'a square, projecting brow' luminous with the fires of intelligence, and when kindled by passion or the inspiration of his theme, they glowed with the emotions that stirred his soul. His motions were full of grace, his gestures eloquent in expression. In his voice there was a magic and charm beyond description. It was rich and sonorous, as flexible in tone and modulation as the melodies of a musical instrument, descending to the lowest tones and rising to the highest pitch without a break, as clear and ringing as an Alpine horn. He could startle with the tones of an angry god, or soothe with the softest cadence of rippling waters. His eloquence was faultless, his style chaste and classical, his language rich and copious, his illustrations apt and brilliant; and when he gave the reins to his imagination, he conjured up such marvelous forms of beauty, such enchanting creations of fancy, and clothed his thoughts and images in such elegance of expression, that his hearers were entranced with wonder and admiration. His speeches were not the mere affluence of sounding words which like the jingling of bells delight the ear, but do not move the heart. They were often full of profoundest thought, and rich in sentiment, and sometimes severely logical. He was admired by the great men of his day." A surviving admirer of Mr. Smith fully indorses this beautiful tribute of Judge Goodrich, and assures the writer that it is an entirely truthful characterization of the greatest orator Chicago has ever known.

JUSTIN BUTTERFIELD was born at Keene, N. H., in 1790. Educated in his earlier years at the common school, and prepared for college by the local minister, he entered Williams College in 1807, and about 1810 began the study of law under the future Judge Egbert Ten Eyck, at Watertown, N. Y. During these years of advanced education he eked out his scanty resources by teaching school in winter; and was admitted to the Bar in 1812. He began the practice of his profession in Adams, Jefferson Co., N. Y., where he soon exhibited that professional aggressiveness and courage so characteristic of his later career. In July, 1813, during the second British war, he sought to obtain the release by habeas corpus of his client, Samuel Stacey, Jr., a native of Madrid, in the adjoining county of St. Lawrence. Stacey was held several weeks by the military without trial on suspicion of disloyal intercourse with the enemy across the border. Mr. Butterfield served the writ on the commanding General, who evaded compliance, with the result to the young lawyer that his purely professional effort for a client reacted on his own reputation, his position being regarded as unpatriotic in the heated condition of the public mind.* It was the remembrance of this blind prejudice which led him to exclaim, a generation later, when asked if he was opposed to the Mexican War: "No, sir! I oppose no war; I opposed one and it ruined me. Henceforth I'm for war, pestilence and famine!" He practiced some years in Sackett's Harbor, where he married about 1814. He then removed to New Orleans, where he quickly obtained a lucrative practice and high rank in his profession. In 1826 he returned to Jefferson County, N. Y., settling this time in Watertown, where he remained several years. In 1834 he came here to reconnoiter, soon returned to Watertown to wind up his business, and settled here permanently in 1835, forming a law partnership with James H. Collins as early as July 16 of that year. Mr. Butterfield soon became a recognized leader not only at the Bar, but in the broader relations of civil

* Johnson's New York Reports, Vol. X., 327-333.

life. He was one of the trustees of Rush Medical College at its incorporation, March 25, 1837. The firm immediately attained a front rank in the profession. Collins was already well known, and it soon became evident that the new accession was fully his equal. Both were fine lawyers, in the maturity of their powers, the breadth of their experience and the depth and variety of their legal attainments. Nearly all the other members of the early Chicago Bar were young men, awaiting opportunity to flesh their maiden swords, and win reputation and power. Butterfield & Collins came to be recognized as at the head of the Bar, not alone in Chicago but in the State. Against the movement for the sus-

JUSTIN BUTTERFIELD.

pension of the Municipal Court in 1837, Mr. Butterfield, in common with nearly all the lawyers in the city, threw the weight of his influence. And in the conflict between the Bench and Bar of Chicago, which signalized the incumbency of Judge Pearson, 1837 to 1840, he took an active and characteristic part. It was he that in open court, November 11, 1839, held out to the indignant Judge the alternative papers, a bill of exceptions against his own rulings, to sign, or the mandamus of the Supreme Court of Illinois to obey. He was fined \$20.00 for contempt; but he was not to be cowed or browbeaten, and, with his associates of the Bar, the case was carried before the State Senate, where the political bias, if not the greater calmness of that quasi-judicial body, saved the Judge from the sentence and penalties of impeachment and the wrath of his enemies. In 1841 Mr. Butterfield was made Prosecuting Attorney for the United States Judicial District of Illinois, which he held until the election of President Polk. In 1842 he drew up the canal bill, the main provisions of which had been previously settled in conference by Arthur Bronson, William B. Ogden, I. N. Arnold and himself,

and in virtue of which the holders of canal bonds were induced to advance \$1,600,000 wherewith to complete the canal. In 1843, through a misunderstanding about the division of income from his official position, the partnership between him and Mr. Collins was dissolved; and after the close of his official relations with the administration he took into partnership his son, Justin, Jr. In 1847 Erastus S. Williams, a law student of the old firm, and of late years better known as Judge Williams of the Circuit Court of Cook County, was added to the new firm. June 21, 1849, after the re-accession of the Whigs to power, he was appointed Commissioner of the General Land Office by President Taylor. A competitor for the position at that time was Abraham Lincoln, who was beaten, it is said, by the superior dispatch of Butterfield in reaching Washington by the northern route, but more correctly by the paramount influence of his friend Daniel Webster. In fact, Lincoln was then, or had recently been, in Washington as member of the Thirtieth Congress, and had the indorsement of the Illinois delegation, but the pressure of Mr. Webster was irresistible. While in this office he co-operated zealously with Senator Douglas toward securing for Illinois the land grant which became the subsidy of the Illinois Central Railroad, and indirectly through the seven per cent of its gross earnings made payable by its charter to the State, an efficient aid in restoring the credit of the commonwealth and finally extinguishing its indebtedness. He held the position of Land Commissioner until disabled by paralysis in 1852. On his retirement he received from President Fillmore the highest praise for efficiency and ability in that office. He had introduced system and industry in the transaction of its business. He lingered some three years in an enfeebled condition, when he died at his home in Chicago, October 23, 1855, in his sixty-sixth year. His wife—before marriage Elizabeth Pierce, of Schoharie, N. Y.—and four children survived him. Two sons, Justin and Lewis, who had been bred to his own profession, had gone before. Lewis, born in 1817, and admitted to the Bar December 16, 1840, died in Chicago October 27, 1845. Justin, born in 1819, and admitted to the Bar June 10, 1840, died of consumption in Washington, March 5, 1852. His oldest son, George, an officer in the navy, died about 1850. The survivors were William, the first graduate of Rush Medical College; and three daughters, Mrs. Sidney Sawyer, Mrs. Frances Gelatly, and Mrs. William S. Johnston, Jr. Mrs. Johnston died January 7, 1875. Mr. Butterfield had always been exceptionally happy in his domestic relations, and was deeply mourned by his family and friends. At the memorial Bar-meeting held two days after his death, his associates thus expressed themselves: "Possessed of great clearness and sagacity of judgment, cautious and steady energy, a well-balanced independence, a just respect for authority, and at the same time an unflinching adherence to his own deliberate opinion of the law, he secured great respect as a lawyer. * * * And the services of the deceased * * * entitle him to the gratitude of his adopted State." "Justin Butterfield," says Arnold, "was one of the ablest, if not the very ablest lawyer we have ever had at the Chicago Bar. He was strong, logical, full of vigor and resources. In his style of argument, and in his personal appearance he was not unlike Daniel Webster, of whom he was a great admirer, and who was his model. He wielded the weapons of sarcasm and irony with crushing power, and was especially effective in invective. Great as he was before the Supreme Court, and

everywhere on questions of law, he lacked the tact and skill to be equally successful before a jury." "Mr. Butterfield's success in the profession," says Judge

John M. Wilson

John M. Wilson, "resulted from what may be called the power of adaptation, always seizing upon the most effective mode of subserving the interest of his client. * * * He possessed an intuitive appreciation of the strength and resources of his adversary, and was the last man to attempt to laugh a case out of court, unless the prosecution was feeble or the plaintiff and his case were open to the assaults of ridicule and sarcasm. * * * He rarely indulged in flights of fancy, though he never failed to lighten up his addresses to court or jury with a caustic humor which was always effective, his manner giving a point and force to the words. The high position he attained was owing, as intimated, to his intuitive apprehension of the questions upon which cases must be decided, and by adapting his mode of attack or defense to the peculiar circumstances of each case." Mr. Butterfield possessed readiness in reply and aptness in retaliation, which with his professional skill and knowledge made him a formidable adversary and a desirable advocate. Many stories are told of his wit and humor, which need not be here repeated, as they only illustrate traits of character and manner already described.

ISAAC NEWTON ARNOLD was born in Hartwick, Otsego Co., N. Y., November 30, 1813. His parents were Dr George Washington, and Sophia Mason Arnold, who had removed thither from Rhode Island some fifteen years before. Besides the subject of this sketch they had two sons and four daughters, all of whom grew to maturity, except one boy who died in infancy. I. N. Arnold got his early education at the district school and the local academy. While procuring his later education after the age of fifteen, when he was thrown upon his own resources, and during his studies for the Bar, he made a frugal living by copying in the office of the surrogate, teaching a neighboring school, by office services for his law teachers, and finally by an occasional trial before a Justice of the Peace. He first studied law under Richard Cooper, of Coopers-town, and then under Judge E. B. Morehouse. He was admitted to the Bar in 1835, at the age of twenty-one, and became the partner of his late teacher, Judge Morehouse. He soon found opportunity for his first triumph in a role in which his success afterward became quite marked, that of advocate for persons charged with capital offenses. A negro named Dacit was under indictment in Otsego County for fratricide, an unjust presumption of guilt seizing the public mind because the two brothers were believed to be rivals in love. Mr. Arnold became satisfied of the innocence of his client and secured his acquittal. As he approached his majority he concluded to go West, and in pursuit of this purpose he arrived in Chicago in October, 1836. He published his card as a lawyer as early as November 19, of that year. His chief source of income at first was his skill as a writer of real estate contracts, transfers and abstracts, in the office of Augustus Garrett, auctioneer and dealer in lots and lands, and afterward Mayor of the city. In those early days of almost frenzied activity in that line of speculation, Mr. Arnold often earned ten dollars a day in that capacity. He

soon obtained a share of the limited law business of the period, and in the American of February 18, 1837, he advertised that certain notes and accounts were in his hands for collection. In March he was chosen the first Clerk of the new city, a position which he soon found more onerous than remunerative; and which he resigned before October, to give his attention to his growing professional business. He had, meanwhile, formed a law partnership with Mahlon D. Ogden, of which the first mention made is dated August 16, 1837, though known to have been established some months earlier in the spring. With a colleague at headquarters, Mr. Arnold was now free to broaden the relations and spread the reputation of the firm by riding the circuit of the adjoining counties and attending the State and United States courts at the capital as elsewhere sketched in this work, chiefly from his writings. Arnold & Ogden soon came into public recognition, and were engaged on one side or the other in a very considerable proportion of the more important cases in this section. In those dark days of Illinois history, from 1836 to 1846, when men were sometimes elected to the Legislature on a more or less outspoken platform of repudiation, Mr. Arnold's position and views on the opposite side came to be recognized. He was known as an earnest pleader for saving the credit of the State by accepting in good faith the whole burden which had been so unwisely laid upon them by their representatives. Thenceforth he was universally regarded as a champion of public honor, a principled opponent of repudiation and of whatever else tended to weaken the purpose of the people to manfully pay the penalty of the internal improvement mania, which had been the cause of the mischief. In January, 1840, Mr. Arnold purchased for \$400, a lot in Fort Dearborn addition, which is perhaps worthy of mention in illustration of the great growth in value of Chicago real estate. With the not very expensive building erected thereon since the fire it now brings a rental of \$2,500. In the same year he was elected a member of the first board of inspectors under the school act of 1839, a position which his increasing public responsibilities soon forced him to relinquish. January 18, 1841, a public meeting was held in Chicago to promote direct taxation for the payment of interest on the State debt. Mr. Arnold was one of the signers to the call, as well as a prominent speaker at the meeting and chairman of the committee on resolutions. Notwithstanding these and similar evidences of an earnest solicitude, on the part of some of the best people of the State to maintain or repair the public credit, the Legislature, in February, passed a law which gave a right of redemption in all cases of land sold under mortgages and deeds of trust, whether in virtues of decrees at law or in equity, and provided that before any such sale the property should be appraised and should not be sold at less than two-thirds of such appraisal. As this legislation practically suspended the collection of debts, Mr. Arnold at once took the ground that it was unconstitutional, and carried two test cases to the Supreme Court of the United States where his views were confirmed and the obnoxious laws declared void. In April, 1841, he was appointed Master in Chancery by Judge T. W. Smith, a position he held until his election to the Legislature. Four months later, August 4, he was married at Batavia, N. Y., to Harriet Augusta, daughter of Dr. Trumbull Darrance, of Pittsfield, Mass. He was formally admitted to the Bar of Illinois, December 5, 1841, at one of his many professional visits to the capital, though he had been licensed some time before, and his New York license had secured him full

recognition from the first as a member of the earlier Chicago Bar. At the Democratic State Convention in 1842, he introduced a resolution committing that body to an explicit declaration against repudiation. It was seconded by Mr. Swan, of the Rock River district, but failed to receive the indorsement of the majority. Mr. Arnold received the nomination for representative of his district in the General Assembly and was elected. He resigned the office of Master in Chancery August 6. He had about this time received a letter from Arthur Bronson, of New York, a creditor of this State to a considerable amount, and informally representing the views of other creditors, which outlined the method of paying the canal debt by borrowing enough to complete it and pledging its future revenue to the payment of interest and principal of the old and new debt. At a conference some weeks later in Chicago between Mr. Bronson, William B. Ogden, I. N. Arnold and Justin Butterfield this design assumed more definite shape and was drafted by Mr. Butterfield as the famous canal bill, which contributed so effectually to restore the State credit and enhance the prosperity of Chicago. The principles involved and the sustaining arguments were represented fully and forcibly by Mr. Arnold before the Mechanics' Institute, November 16, in a lecture on "The Legal and Moral Obligations of the State to pay its Debts, the Resources of Illinois, and the Means by which the Credit of the State may be Restored." In the session of 1842-43 he was chairman of the committee on finance, and introduced the canal bill already mentioned. By persistent efforts he was enabled to carry it through, but by only a very small majority. In 1844 he was again nominated and elected to the Legislature, and was presidential elector on the Democratic ticket. Toward the close of the year, upon the resignation of Justin Butterfield, his friends petitioned the administration for his appointment to the vacant place of District Attorney for Illinois, while another section of the party favored Mark Skinner. To promote harmony the appointment was given to D. L. Gregg, of Joliet. Meanwhile the loan of \$1,600,000 provided by the canal bill of the year before was delayed through the cautious hesitancy of the money lenders, who required additional and clearly specified guarantees from the Legislature, in all of which subsidiary work Mr. Arnold took an active part, having at length the satisfaction to see the whole matter amicably adjusted in 1845. At the close of his second term in the Legislature by its adjournment, March 3, 1845, he resumed the practice of his profession with new interest and increased success. In 1847 he dissolved partnership with Mr. Ogden, and after some months became associated with George W. Lay, Jr., in 1848. In that year, too, he threw his political fortunes and talents into the new Free-Soil party, and was a delegate to its national convention at Buffalo, and its State convention at Ottawa. He took an earnest and active part in the anti-slavery campaign, being one of the chief orators of the party of Illinois. In all the succeeding biennial campaigns his voice and influence were consistently opposed to the aggressions of the pro-slavery party, and in 1856 he was elected to the Legislature on that ticket. In that year, too, the firm of Arnold & Lay became Arnold, Larned & Lay by the accession of Edwin C. Larned. In the single session of the Twentieth General Assembly, January 5 to February 19, 1857, Mr. Arnold was chiefly distinguished for his elaborate and successful defense of Governor Bissell on the charge of ineligibility. In 1858 Mr. Arnold failed to receive the nomination for Congress at the Republican convention of this district, but labored earnestly for

the election of his successful competitor, John F. Farnsworth. In 1860, he defeated Mr. Farnsworth in the convention, and was elected to the Thirty-seventh, or War Congress, by fourteen thousand six hundred and sixty-three votes, or seventy-six votes over the presidential ticket. He was among the first representatives to arrive in Washington to participate in the inauguration of Lincoln March 4, 1861. From that time until the close in 1865 of his second Congressional term to which he was elected in 1862, he devoted all his time and energies to the cause of the Union and the support of the administration. His first speech in Congress was an eulogy of the deceased Douglas, with whom he had politically associated in Illinois in the earlier years of the public life of both. At the regular session in December Mr. Arnold was chairman of the committee on defense of the great lakes and rivers. In an able report to the House, in February, 1862, he strongly recommended that the Illinois & Michigan Canal be converted into a ship canal. He introduced a bill embodying this project, and in June urged its passage with much force in a strong speech. But despite his most strenuous efforts it was defeated when it came to a vote at the next session, though he made a second powerful speech in its behalf in January, 1863. In the next Congress, to which Mr. Arnold was elected in 1862, he was chairman of committee on roads and canals, and introduced a bill providing an appropriation of \$6,000,000 with which to enlarge the Illinois & Michigan Canal. It passed the House February 2, 1865, but failed in the Senate. It was not, however, matters of mere local interest, however great, which chiefly occupied Mr. Arnold's attention during the momentous period of his Congressional career. Even the great question of internal improvements which for fifty years had enlisted the best efforts of the statesmen of Illinois and of Mr. Arnold since his arrival in the State twenty-five years before, was dwarfed into insignificance by the great national questions which now taxed to the utmost the best powers and ripest wisdom of the two War Congresses of which he was a member. It is a matter of national record that Mr. Arnold was among the earliest and most radical supporters of the administration, and had the honor of being the first member of Congress to advocate the most sweeping of the war measures which many declared revolutionary and unconstitutional. Though a lawyer he saw at once that even the highest laws of peace should not give way to the stern arbitrament of war. The sword had been appealed to, and society's provisions for the opposite conditions of peace and war could not be simultaneously invoked. The unmasked assassin in vain cries out, "Thou shalt do no murder." Mr. Arnold advocated the abolition of slavery in the District of Columbia, the first link in the chain of measures which finally secured "Liberty throughout the land to all the inhabitants thereof." By this first act, about three thousand slaves obtained their freedom. March 24, 1862, he introduced the bill which prohibited slavery in every place directly subject to national jurisdiction, and which with some amendments became a law June 19, 1862. His first great speech in Congress May 22, urged as a legitimate war measure the liberation of the slaves of rebels, and the confiscation of all their other property. In the discussions which followed the President's emancipation proclamation, Mr. Arnold took an active part. The first debate began May 31, 1863, and the question was brought to a vote June 15, when it was found that ninety-three favored while sixty-five opposed grafting abolition on the statute book. On the assembling of Congress in December,

1863, it was felt by the friends of the administration that to give permanence to the results of the great proclamation it was necessary to pass supporting measures. January 6, 1864, Mr. Arnold made a speech in the House, on "The Power, Duty and Necessity of destroying Slavery in the Rebel States." February 15, 1864, Mr. Arnold, in the House, introduced the resolution, "That the Constitution should be so amended as to abolish slavery in the United States wherever it now exists, and to prohibit its existence in every part thereof forever" (See Cong. Globe, Vol. L, p. 659.), which was adopted by a decided majority but fell short of the necessary two-thirds vote. In the further progress of the discussion until the resolution embodying the now historic thirteenth amendment was passed in the House, January 31, 1865, by one hundred and nineteen to fifty-six votes, Mr. Arnold took a conspicuous part. July 14, 1864, on his return to Chicago during adjournment of Congress, he was honored with a public reception by his constituents, to whom his career in Congress had proved very satisfactory, and a resolution of thanks for his able and faithful services was passed unanimously. He, however, declined a renomination; but strongly urged the renomination of President Lincoln, and labored indefatigably for his re-election, addressing a great number of meetings during the campaign, in Illinois, Wisconsin, Michigan, Ohio, Pennsylvania and New York, in earnest support of the man and his policy. His own Congressional career closed March 3, 1865. In 1860, his income from his profession was \$22,000; his expenses for four years as a member of Congress, though perhaps exceptionally frugal, and certainly not extravagant were about \$20,000 in excess of his salary. It seemed therefore the wiser course to withdraw, and save his modest fortune from speedy extinction. With a special predilection for literary composition, and a decided talent for historic research, besides a lawyer's power to weigh evidence and discern motive, supplemented by a very sincere admiration for his subject, he had set himself the task of writing the life of Lincoln and the story of the final overthrow of slavery in the United States. To facilitate his labors the President proposed to appoint him United States Attorney for the District of Columbia, and auditor of the treasury for the post-office department, neither office requiring the incumbent's exclusive time.

Upon the assassination of Lincoln, the writing of the work became more urgent, and President Johnson appointed him to the auditorship only. He had, however, got so much farther away from Democracy than Mr. Johnson, that he soon ceased to be in sympathy with the new administration, and felt compelled to withdraw. In his letter of resignation he undertook to show Mr. Johnson how he was drifting from the principles of his "illustrious predecessor," and of the great party which had subdued the great Rebellion. Returning to Chicago in 1867, Mr. Arnold completed the History of Abraham Lincoln, which has a specific historical value because of the author's personal knowledge of, and sympathetic admiration for the President, besides his own individual participation, and often conspicuous share in the great movement for the final overthrow of slavery. He then turned his attention to collecting and compiling the speeches and State papers of Mr. Lincoln, when the great fire by sweeping away some \$200,000 worth of his productive property drove him again into professional life. He formed a partnership with Messrs. Higgins and Swett in 1872, and worked hard for two or three years, when his health gave way,

and he again retired to private life and his favorite literary pursuits, which will be referred to hereafter.

JOHN DEAN CATON was born in the town of Monroe, Orange Co., N. Y., March 19, 1812. His father, Robert, had married his third wife, Hannah Dean, by whom he had four children, of whom the subject of this sketch was the third, and the first of two sons. He had had eleven children by his first wife, of whom ten were sons; and by his second, only one son and no daughter; so that John Dean was the twelfth son and fifteenth child of a progeny of sixteen. The father was born March 22, 1761, on the Potomac, in Virginia, where his father, also Robert, owned a plantation. This older Robert was an Irishman by birth, and had been in the English service, but had settled in Maryland some time before the Revolutionary War. The younger Robert, though only in his sixteenth year at the Declaration of Independence, took part in the struggle and settled on the Hudson at the close of the war. Here he became a preacher of the Society of Friends, and his third wife was the daughter of another preacher of that Society. He died in 1815, at a comparatively early age for the head of so numerous a family. When young Caton was four years old his mother, widowed a year before, moved to Oneida County, where a brother resided, with whom she and the children staid some months, and then rented from him a small place in Paris Township. Here the future Judge obtained the first rudiments of his education, attending the district school until he was nine years old. In 1821 one Solomon Ross, a Friend, took him to reside on his mountain farm near Smyrna, Chenango County, where the labor proved excessive for a child of his years, and whence after a nine weeks' detention, he was humanely conveyed thirty miles to his home by another Friend who sympathized in his desolation. Soon after he brought home the first fruits of his labors as a farm boy, at \$2.50 a month, being a quarter of beef thus earned from Captain Hubbard. At eleven, he worked for Mr. Sexton at \$3 a month, and was discharged for harrowing an unbroken sward, through a misapprehension of orders. With occasional and poorly paid work from different farmers, and attendance at school in the winter months, young Caton slowly climbed up to the age of fifteen. Pursuant to his father's wishes he was then put to a trade, that of harness-maker being selected. He soon grew weary of the business, and his eyes becoming accidentally inflamed, he easily procured his welcome dismissal from the "horse-tailor," Job Collins. Meanwhile his mother had removed to Utica, aided in part by such slender help as he had been able to give her, where he now rejoined her, in 1829. Here he spent nine months at the Academy, and made such proficiency as to be able to earn money at surveying and teaching before he was eighteen. He taught a district school near Ovid in the winter of 1829-30, and hired out to a neighboring farmer in the spring, but receiving a severe cut in the foot, he bade good-bye to farm, until he got one of his own some years later in Illinois. He now obtained his first knowledge of the classics at the school of Mr. Grosvenor, at Rome. He again taught a district school in the winter of 1830-31, and returned to Grosvenor's school in the spring. Meanwhile his ambition had been aroused, and he sought to become a lawyer, having already begun to pettifog in the local justice courts. In December, 1831, he entered the law office of Beardsley & Matteson, at Utica, as a student; afterward that of Wheeler Barnes at Rome, and later that of James H. Collins at Vernon. In 1833 he turned his face to the West, and while at White Pigeon, Mich.,

was invited by Irad Hill to take passage on his raft to St. Joseph, whence he came to Chicago on the Ariadne, under command of Captain Pickering, arriving in the outer harbor June 19, 1833. Here he soon began to pick up such petty cases as offered, some of which are referred to elsewhere. In his law business of that year should be mentioned his effort in behalf of some six free negroes, at a fee of perhaps of one dollar each. The law of Illinois required that free negroes should show their manumission papers, to entitle them to free circulation among the whites. The Chicago blacks of the period claimed to be born in the free States, but having no papers were subjected to annoyance under the letter of the law from the hostility of such as were enemies of their race. Caton brought their case before the Court of County Commissioners, pleading with success that some court representing the sovereignty of the State must have the right of granting freedom papers to these unfortunates; and that their honorable body was such court. Though they may not have been able to find any constitutional or legislative grant of such powers their hearts yielded to the enthusiasm of the young lawyer, and they authorized the issuing of the required papers. In the fall of 1833, Mr. Caton went to Pekin, Tazewell County, to be examined for admission to the Bar by Judge Lockwood, who thus addressed him at the close: "Young man, I shall give you a license, but you have a great deal to learn to make you a good lawyer. If you work hard, you will attain it; if you do not, you will be a failure." He then proceeded to Greenville, Bond County, and had his license indorsed by Judge Smith.* January 1, 1834, he set out as guide to Dr. Temple, mail-contractor, on the first stage coach which left Chicago for Ottawa. In February, he formed a partnership with his former law-teacher, Collins. In May he attended the Circuit Court, and brought the first jury case, being the identical one in which he cheated his friend Spring out of a client but into a better fee, as elsewhere stated.† Mr. Caton was elected Justice of the Peace, July 12, 1834, receiving one hundred and eighty-two votes out of a total of two hundred and twenty-nine, in a very active campaign, which left but a few if any votes unpolled. In the fall of 1834, he was ill for forty-seven days in the country at Colonel Warren's, and remembers of the court business of that term only the memorable case of uxoricide by an Irishman, whose acquittal was unexpectedly secured by the plea of Collins, on which the court instructed the jury, that if they could not find him guilty of murder in the first degree, as indicted, it was their duty not to bring in a verdict of manslaughter in any degree, but to acquit. On the 28th of July, 1835, Mr. Caton married Laura Adelaide, daughter of Jacob Sherrill, of New Hartford, Oneida Co., N. Y., whose affections he had won some few years before. In a contest with Isaac Harmon for the office of Probate Judge to succeed Richard J. Hamilton, Caton was defeated. In 1836, with N. B. Judd, he formed the firm of Caton & Judd; and in that year built the first dwelling within the school section, on the West Side, at the southeast corner of Harrison and Clinton streets. He took an active part in the movement for a city charter in November, 1836, representing the second district of the town in the meeting for consultation with trustees. The financial troubles of 1837 did not leave him unscathed; he lost not only most of his real estate but his

health also; and in 1838 he took refuge on a farm near Plainfield, which he had entered some years before, and of which he plowed a portion that year, and to which he moved his family in 1839. He kept up his law practice in three or four neighboring counties, being the first lawyer to bring suit in the Circuit Courts of Kane and Will counties, as he had previously been in Cook County. In 1840, again in conflict with Harmon. Having recovered his health he accepted the position of Associate Justice of the Supreme Court made vacant by the election of Judge Ford as Governor, his commission bearing date August 20, 1842. In the October term of that year, in Bureau County, the historic case of the People vs. Lovejoy for that "he did harbor, feed, secrete and clothe a certain slave girl, knowing her to be such," etc., was tried before the new Judge, who distinctly laid down the principle, new in that day, that "if a man voluntarily brings his slave into a free State the slave becomes free," which had much influence on the jury in acquitting Lovejoy. At the close of the legislative session in March, 1843, John M. Robinson, who had been United States Senator, 1835 to 1841, was elected to the vacant judgeship, but dying in April, Caton, after an intermission of only a month, was selected by Governor Ford, and at the next session of the General Assembly was elected by them, and served until the re-organization of the judiciary under the Constitution of 1848. He was then elected one of the three Justices of the Supreme Court December 4, 1848, who were to serve three, six and nine years, by which provision the election of one Justice every three years was secured. The six-years term fell to Caton, and towards its close, on the resignation of Chief Justice Treat, in April, 1855, he succeeded the place of pre-eminence for the few remaining months. Being re-elected in June, 1855, for nine years, he again became head of the Bench on the resignation of Chief Justice Scates in 1857, and so continued until his own resignation, January 9, 1864, five months before the expiration of his term. To accompany an ailing daughter to Europe he laid aside the ermine which he had worn for over twenty-one years with honor to himself, credit to the Bench and satisfaction to the Bar and the people. Meanwhile he had become interested, in 1849, in what was then known as O'Reilly's telegraph, but which was organized as the Illinois & Mississippi Telegraph Company, of which he was chosen a director. In 1852 the company was on the verge of bankruptcy and was saved only by Judge Caton's business tact and fertility of resource. He proposed that the company should obtain from the General Assembly of Illinois an amendment to their charter authorizing an assessment, and the sale of the defaulting stock. The board concurred and elected him president and general superintendent with absolute power. He secured the necessary legislation, and obtained enough from an assessment of \$2.50 on each share, and the sales of defaulting shares, to meet the most pressing obligations; and devoted his spare time, without however the slightest infringement on his judicial functions. He studied the art of telegraphy, making himself an expert of that day; traveling in the Northern wilds to obtain a supply of cedar posts, negotiating with railroad companies in Illinois, Iowa and Minnesota for transportation, and placing his lines along their roads. The Weekly Democrat of November 3, 1853, thus refers to his activity at this period: "Judge Caton will soon be the telegraph king of the West. From all parts of Illinois we have reports of the system and energy with which the telegraph lines are managed, and of new vil-

* On the Supreme Court list his name does not appear until December 7, 1835.

† Judge Caton holds that this was the first term of the Circuit Court of Chicago in which any law business was done. If Judge Young was here earlier, he may have organized a grand jury, or only passed through.

lages being put in communication with the rest of mankind by means of the lightning wires." After some years the stock of the company began to pay dividends; and in 1867 its lines were leased to the Western Union Telegraph Company, Judge Caton retiring from the management. His pursuits since then have been a combination of literary and business enterprises, intermingled with the superintendence of his large farm, and the adornment of his city home on Calumet Avenue, and numerous journeys at home and abroad. His judicial decisions are scattered through twenty-seven volumes of Illinois Reports from Scammon III to Illinois XXX. In these he has stamped the impress of his mind indelibly on the jurisprudence of the State. They exhibit a man of industry in research, a writer of vigor and method, a thinker who is argumentative and discriminating, and occasionally original. A few of his decisions especially after experience had taught him to lop off redundancy, would do credit to a Judge of any Bench, State or National. While not overlaid with citations they are marked by deliberation and sound sense, and have stood the test of time. His early habits of self reliance impart a vigorous individuality, and his power of seizing essential points gives a clearness to his decisions that make them both readable and valuable. The best traits of his judicial style are reproduced in his other writings which cover antiquarian and scientific as well as purely literary and historical researches. He generally expresses his thought with clearness and precision, and as much condensation as is consistent with an easy, full and unaffected style. As an advocate he was not remarkable for readiness, requiring careful study to insure success. But his long experience as a Judge and man of affairs, enhanced by his later industry in the fields of literature, has developed a fair readiness for extemporaneous speaking, and some of his latest public addresses have been marked by the easy self-possession of a man long accustomed to the exercise of recognized and respected authority. His mind is rather active than brilliant; and he is properly regarded by himself and others as a man of patient industry, endowed with a good working mental apparatus rather than genius or phenomenal power. Of large and rugged frame, his brain is of similar type—brawn and brain being closely related. At this writing, he is in his seventy-second year, still hale and active, alternating between town and country, between literary investigations and business undertakings, between scientific inquiries and the pursuits of a country gentleman, surrounded by his flocks and herds, with no serious physical impairment except a dimness of vision produced by cataract which he hopes to have successfully removed in a few months. Mr. and Mrs. Caton are the parents of seven children, of whom three died in infancy, one at the age of five, and three survive. Of these one is a son, Arthur J., who is a lawyer, and two are daughters, Mrs. Norman Williams and Mrs. Charles E. Towne, whose husbands are lawyers. All these reside in their respective homes within the same inclosure as their parents, which seems the crowning glory of a life largely devoted to the welfare of the family.

GRANT GOODRICH, born in Milton Township, Saratoga Co., N. Y., August 11, 1812, is the eighth son and ninth child of Gideon and Eunice Warren Goodrich, and a direct descendant in the seventh generation from William Goodrich, who arrived in New England in 1630. In 1817 Gideon Goodrich removed with his family to Chautauqua County, N. Y., and here the subject of our sketch received his early education in his father's house, from a teacher whose pupils consisted

mainly of the Goodrich children. Some five years later young Goodrich went to live with a married sister at Westfield, in the same county, where he had an opportunity to get an inkling of the higher English branches and of the Greek and Latin classics under the guidance of a resident lawyer. About 1825 being it was thought predisposed to consumption, he took to lake navigation in the vessels of his brother, a shipowner of Portland Harbor on Lake Erie, whither his father had also removed. In 1827 with a physical system strengthened beyond expectation by the air and exercise of two years of seafaring life, young Goodrich, now in his sixteenth year, returned to Westfield to prosecute his studies at the Academy of that place. In 1830, he there entered the law office of Dixon & Smith; and in his twenty-second year set out for the West, arriving in Chicago, "early in May, 1834." Two months later he made a journey to Jacksonville, where he was examined and licensed by Judge Lockwood of the Supreme Court. As early as June, 1835, he formed a law partnership with A. N. Fullerton, which was chiefly devoted to the sale and renting of real estate, and was dissolved February 22, 1836. Within a few days Mr. Goodrich became the law partner of Giles Spring, and so continued until the election of the latter to the Bench in 1849. Both partners found wives at Westfield, where Goodrich had been long and favorably known, and where he had joined the Methodist Church in 1832. He married Miss Juliet Atwater, July 24, 1836. In common with almost every other enterprising citizen of the Chicago of 1837 the panic of that year found him involved on his own and others' account to the extent of \$60,000, which it took many years to clear off, but which he eventually paid without abatement. He not only advocated payment in full of all obligations by the State, city and individuals, but enforced the exhortation by example. In 1838, he was elected Alderman of the Sixth Ward, and was president of the Lyceum in 1839. The firm of Spring & Goodrich did a very respectable part of the law business of Chicago during the thirteen years of its continuance, the excellent personal habits of Mr. Goodrich being a valuable counterpoise to the unfortunate infirmity of Spring, while the legal ability of both commanded the confidence of clients. A short-lived partnership with Buckner S. Morris followed in 1850, and was dissolved in 1857, Mr. Goodrich practicing for a time alone. About this time he co-operated zealously with others for the establishment of the Northwestern University at Evanston. In 1852 he was partner of George Scoville, and in 1855 W. W. Farwell, now better known as Judge Farwell, joined them, the firm becoming Goodrich, Farwell & Scoville. In 1856 Sidney Smith took the place of Scoville, and the prestige of the firm was enhanced rather than diminished by the change, Goodrich, Farwell & Smith being universally recognized as a strong combination. In 1857, Mr. Goodrich's health gave way and under the advice of his physician he made a protracted tour of Europe, not returning home until the spring of 1859, when he was elected Associate Justice of the newly constituted Superior Court of Chicago, a position he retained until 1863, when he resumed his place in the law firm as constituted before his departure for Europe six years before.

In 1871, he lost considerable property by the fire, and it took about five years to recover from its results. In 1874 he withdrew from general practice, and has since devoted himself chiefly to the care of his property, and the encouragement of the various social, religious and benevolent interests of Chicago in which he has

borne a share for more than half a century. Originally a Whig, and later a free-soiler and abolitionist he drifted, easily into the Republican party, and was an earnest supporter of Lincoln's administration and the war for the Union. A temperance man on principle, he prefers high license to prohibition as a means of reducing the appalling volume of crime and poverty which spring from the liquor traffic. As a Judge he ranked among the most absolutely impartial and thoroughly informed on the Bench of this city; and no taint or suspicion of unfaithfulness or venality has ever attached to his career as Judge, lawyer or citizen. His wide business experience and excellent personal habits, as well as his extended knowledge of the principles of law and ready familiarity with the statutes of Illinois, together with his firmness of character and soundness of judgment, have made him not only a successful advocate but a very valuable counselor. Mr. and Mrs. Goodrich are the parents of four sons and one daughter. One son died at the age of twenty-six, a studious, well educated and promising lawyer. Another son is now a member of the Chicago Bar. A third son is a manufacturer in Boston, and the fourth is a real estate dealer here. The daughter settled in St. Louis, on her marriage, but on the death of her husband returned to her father's house. Now (1883) in his seventy-second year, and in the enjoyment of exceptional health and vigor, Mr. Goodrich can look back on a more successful and better rounded life than most men.

MARK SKINNER was born September 13, 1813, at Manchester, Bennington Co., Vt., where his father, Richard, a native of Connecticut, had settled as a lawyer in 1800. His mother was of the historic Pierpont family. The elder Skinner became professionally and politically prominent in the State of his adoption. He was Prosecuting Attorney and Probate Judge, Member of the Legislature and Governor, Representative in Congress, and Chief Justice of the State. Young Skinner had all the advantages of a good early education, followed by a careful preparation for college and com-

pleted by a course of study in Middlebury College, Vermont, which he entered in 1830, and from which he graduated in 1833, before he was quite twenty. His father died the same year, and he began his law studies under Judge Ezek Cowen at Saratoga Springs, and Nicholas Hill, afterward of Albany. He also spent a year at the New Haven Law School of Yale. He now determined to make Chicago his home and arrived here in July, 1836.

He at once obtained admission to the Bar, and within a month formed a law partnership with Mr. Beaumont. In 1837 he was chosen one of the board of School Inspectors, and for many years he was a leading spirit in all that concerned the well-being and advancement of the school interests of Chicago. He was chosen City Attorney March 10, 1840, and on the resignation by Justin Butterfield of the office of U. S. District Attorney for Illinois, in 1844, Mr. Skinner was appointed to fill the vacancy, and an effort was made by his friends to secure him a more permanent occupancy of the position, but the friends of I. N. Arnold also bestirred themselves in the same direction. In the interests of harmony [Mr. Skinner peremptorily declined being a candidate in March, 1845,] the appointment was given

to D. L. Gregg, of Joliet. In 1846 Mr. Skinner was elected to the Legislature, and was appointed chairman of the committee on finance. He introduced a bill for refunding the State debt which was of great value, by definitely determining the extent of the debt, by introducing system and responsibility in its management, and by reducing six or eight different styles of bonds into one uniform and only authorized issue. In the apportionment of delegates to the State Convention of 1847, he labored with success to secure as the basis thereof the State census of 1845 rather than the United States census of 1840. By reason of the more rapid growth of Chicago and northern Illinois, a just representation and proper weight of influence in the coming convention could thus only have been secured. He was also instrumental at this time in securing the passage of an act to resume payment of interest on the State debt, which had been in default nearly ten years. Soon after the close of his legislative labors, March 1, 1847, he resumed the practice of his profession, forming a partnership with Thomas Hoyne, April 24. On the death of Judge Spring in May, 1851, Mr. Skinner became a candidate for the Bench of the Cook County Court of Common Pleas, and was elected over his competitor, John M. Wilson, for the remainder of Spring's term to June, 1853, when he declined a renomination, because of ill-health contracted through the excessive labors of that court. At his entrance on the duties of Judge, finding the calendar overladen, he sat continuously for seven months, cleared it up and kept ahead. With his retirement from the Bench, his previous withdrawal from political contention, and the interruption to professional practice incident to both episodes as well as the threatened physical infirmity, he turned his attention to the management of large financial operations, in which his success has been very marked. No one in Chicago, perhaps, has so largely represented non-resident capitalists or handled larger amounts of the borrowed money so extensively used in building the city. In 1858 he became a member of the Second Presbyterian Church. In the Rebellion period his services were conspicuous and valuable as first president of the Chicago Sanitary Commission, afterward named the Northwestern, from 1861 to 1864. He was also a member of the more general United States Sanitary Commission during the whole period of its existence. Besides his valuable services in that field he also gave to his country, in 1862, his eldest son Richard, who had just graduated at Yale, at the age of twenty, and who then entered the regular army as Second Lieutenant in the Tenth Infantry, and was killed before Petersburg, Va., June 22, 1864. Judge Skinner has been actively identified with nearly all the benevolent and reformatory enterprises of Chicago, and more especially with the Reform School, of which he was one of the original founders, and president of the first board of directors. With his usual energy and ability he made a business-like investigation of all such institutions as were accessible for personal inspection and a diligent study from printed reports of the more famous reformatory institutions of England, France and Germany. His connection with the earlier railroads of Chicago as a director of the Galena & Chicago, and of the Chicago, Burlington & Quincy, was of no slight value to those enterprises by reason of his marked financial ability and the wisdom of his counsels as a lawyer and a man of business.

ENOCH WEBSTER EVANS was born at Fryburg, Oxford Co., Me., in 1817, of William and Anne (Webster) Evans. Getting his earlier education at the common

school and academy of Fryburg, he spent two years at Waterville College, and two at Dartmouth, where he graduated in the class of 1838. He studied law under Judge Chase, of Hopkinton, N. H., until the summer of 1840, when he set out for Chicago. Here he spent a few months in the office of Spring & Goodrich, and secured admission to the Bar, as is supposed, although his name does not appear on the Supreme Court list until March 14, 1842. He was partner with Joseph N. Balestier for a short time, Balestier & Evans being found advertised in the Daily American of September 25, 1840. He attracted some attention about the same time as a speaker at the Tippecanoe Club. He soon removed to Dixon, Ill., where for a time he was the partner of the late Judge Heaton, and from there to Kenosha, Wis., where he was married September 16, 1846, to Miss Caroline Hyde, daughter of a Mr. Hyde, of Darien, Genesee Co., N. Y. In 1858 he returned to Chicago, and was for a short time the law partner of James T. Hoyt, and still later, of Mr. Tousey. He was, however, better fitted for independent professional business than for partnership. There have been but few lawyers so devoted to the profession as Mr. Evans. He was a lawyer and nothing else, except a good citizen, a worthy man, and an excellent husband and father. In 1871 he was urged by many of the most influential lawyers to become a candidate for Judge of the Circuit Court of Cook County, but declined. His more notable cases were *Wilkinson vs. Chicago Tribune*, and the Zeigenmeyer murder case. He was very extensively identified with suits for damages against corporations, especially the railroads and the city, in cases of personal injury, and his success in these was quite remarkable. He was naturally, or by force of habit, earnest, urgent and convincing as a speaker, and was usually able to marshal all his resources of pleading and argument, as well as persuasion and eloquence, as far as necessary for the success of his case, before a jury. But his power before the Supreme Court, or in chambers, was still more creditable to his ability as a thorough lawyer. He died September 2, 1879, leaving a wife, two sons and two daughters. The elder of the sons is William W., a lawyer, and the younger is Lewis H., a civil engineer. Of the daughters one is married and the other single. He was a regular attendant at St. John's Episcopal Church, especially while in charge of his friend, Dr. H. N. Powers, but was not a member of any Church. At the Bar meeting in commemoration of his death Calvin De Wolf, who had known him since 1840, said: "He was eminently worthy of admiration and esteem;" and the committee on resolutions declared: "That in the death of Mr. Evans the community had lost a most worthy and excellent citizen, a man of the highest integrity and honor, the Bar one of its brightest ornaments, the record of whose professional career during its entire length has never suffered blot or stain, and his widow and family a husband and father endeared to them by that devotedly affectionate attachment which renders home so worthy." "He was not," said Judge Moore, "an ordinary man, but one who ran over with earnestness for whatever he undertook. He was a lawyer of more than usual learning and intelligence. * * * He was a man of majestic sentiment, who drew others to him."

JAMES M. STRODE, faintly connected with Chicago in those earlier years, first as a circuit-riding attorney, then as State Senator, 1832 to 1836, with residence still at Galena, and then more closely from 1836 to 1840 as Register of the land-office here, and afterward as member of the Chicago Bar and Prosecuting Attorney

until 1848, belongs as such to a somewhat later period than 1837, when he was properly a Government official and not a practicing lawyer. Professionally he belonged about equally to the Bars of Jo Daviess, Cook, and McHenry counties, successively.

ALBERT GREENE LEARY, who is thought to have been a native of Maryland, is first heard of in this section through the Chicago American of August 15, 1835, as a lawyer at Ottawa, implying that he must have been admitted to the Bar in some other State, as he is not enrolled in Illinois until March 2, 1837. He must have soon removed to Chicago or Cook County, as he was elected to represent the latter in the State Legislature on the repudiation ticket in 1836. On the 19th of November he notified his law customers to call on J. Y. Scammon during his own absence in the East, whence he returned in time for the first session of the Tenth General Assembly, at Vandalia, December 5, 1836, at which he or his friends in his behalf tried to procure his election as State's Attorney, but he was rejected in March, 1837, as ineligible, being a member of the General Assembly. At the close of the short extra session in July, he returned to practice in Chicago and advertised location August 16, 1837, but does not seem to have exercised much influence or made any impression on the public mind as a member of the Bar. In 1839, he lost his books and papers by fire. In 1840 he was again elected to the Legislature. The second session of the Twelfth General Assembly of Illinois closed March 1, 1841, and Mr. Leary again turned his attention to law, advertising as commissioner for Maryland April 9. He is again advertised as a lawyer in February, 1842. May 21, 1845, the death of his infant child at St. Louis is noticed in the Chicago Democrat; and his own of yellow fever at New Orleans, over eight years later, in the Chicago Weekly Democrat of August 27, 1853. He had married a niece of President Tyler, and their associations are judged to have been mainly Southern.

MAHLON DICKERSON OGDEN was born June 14, 1811, at Walton on the Delaware, in Delaware County, N. Y., where his father had settled about 1792. He was named for Mahlon Dickerson, United States Senator and Governor of New Jersey, with whom the father had been associated in early life. Young Ogden was educated in the district school, and later at Trinity College, Geneva, N. Y., where he graduated about 1832. Soon afterward he removed to Columbia, Ohio, where he studied law under the future Justice Swayne until 1836, when he was admitted to the Bar. Meanwhile his elder brother, William B., had formed in Chicago the nucleus of a large business in real estate, as the representative of the American Land Company, of Frederick and Arthur Bronson and other Eastern investors in Chicago lots and Illinois lands. Hither Mahlon D. proceeded on a visit, and deciding to make it his future home, returned to Columbus, where he was married to Miss Kasson, and went back to Chicago in the spring of 1837, to settle. In accordance with an agreement formed at his previous visit he now entered into partnership with I. N. Arnold; and was admitted to the Bar of Illinois December 11, 1837. Mr. Ogden never had much to do with the court business of Arnold & Ogden, his taste running more in the line of office work, and especially to real estate, and disputed titles. For ten years the firm had charge of the law relations and legal papers of the business managed by William B. Ogden and later by Ogden & Jones. He resided in the old officers' quarters in Fort Dearborn for a few years after his arrival here, houses being still scarce; but removed about 1839 to the corner of Dearborn Avenue and On-

tario Street, where he had built the home he occupied for twenty years. In 1841 he was elected Probate Judge or, as then styled, Justice of the Probate Court, and held the office for four years, acceptably to the general public. In 1845 he was elected Alderman of the Sixth Ward. In 1847 the partnership with Mr. Arnold was dissolved. Mr. Ogden became directly and exclusively identified with the business of his brother, and in 1849 obtained a partnership interest in the firm of Ogden, Jones & Co. In 1851 Mrs. Ogden died, leaving two children, Charles C., now a resident of Little Rock, Ark., and Mrs. William E. Strong, of this city. In 1856 the firm of Ogden, Jones & Co. became Ogden, Fleetwood & Co., involving no other change than the replacing of Jones by Fleetwood. In 1856 Mr. Ogden married Miss Frances Sheldon, a daughter of General Sheldon, a former resident of Delaware County, N. Y., but at this time of Janesville, Wis. In 1859 he erected on the block north of Washington Square, the residence which afterward became historic as the only building that escaped destruction on the North Side within the range of the great fire. In 1868, the firm was changed to Ogden, Sheldon & Co., in which he and Edwin H. Sheldon were general partners, and William B. Ogden was a special partner until his death. In 1871, in common with nearly all large owners of real estate in Chicago, he sustained heavy loss in the great fire. In 1872 he was elected Alderman in what was called "the strong" Common Council, he and other members of which had been induced to become candidates in opposition to a corrupt ring then in control of the city. The two years' public service thus rendered was the only deviation from private business he allowed himself since 1846. In his original profession he made very little money, but as soon as he went into business he grew rapidly rich. The shrinkage in real estate value which succeeded the panic of 1873, some outside ventures in Ohio manufactures, and the too free use of his credit to certain financial institutions of the city forced him, in 1878, to put his estate into liquidation. The city mansion, already referred to, passed out of his hands, and what had been for some years his summer residence at Elmhurst became the comfortable but much less pretentious home of himself and family. Here he died, February 13, 1880, of pneumonia, after a short illness, in the sixty-ninth year of his age. Mrs. Ogden and her three children, a daughter and two sons, besides the two children by his first wife, survive him. Mr. Ogden was a man of fine personal appearance, but of a delicate constitution, which his excellent habits so fostered that he reached almost the rounded term of three score years and ten. Of a firmness that was akin to obstinacy, of perfect integrity and truthfulness, and possessed of a most delicate sense of honesty, his character was above reproach. In religion, he was a faithful attendant at the services of the Episcopal Church of St. James for forty years before 1877, when he became a regular member. His fame is of the business, rather than the professional or public order. With the few exceptions mentioned, he took no part in public affairs or great public enterprises. His life was of the quiet, useful and industrious type. Possessed of a pleasing address, good conversational powers and a genial temperament, he made hosts of friends. The enhanced value of Chicago realty since his estate was put in liquidation has resulted in giving his heirs a goodly inheritance, reinforced as it has been by their share of the larger estate of their uncle.

EDWARD G. RYAN, born in Ireland in 1810, and an immigrant to this country before he was of age, arrived in Chicago in 1836, and advertised as a lawyer as early as December 10, of that year, though his name does not appear on the list of the Supreme Court until the 31st of that month, when he was present at its session in Vandalia on some Chicago law-suits. He formed a partnership with Henry Moore June 1, 1837, but the firm of Moore & Ryan was short-lived, the senior member leaving Chicago in 1838 for his health. Among other activities in 1837, Mr. Ryan took a decided stand against a movement of embarrassed debtors for the suspension of the Municipal Court of Chicago. One of the most earnest advocates of suspension, James Curtiss, having stated at a public meeting that he had

given up his law practice because unwilling to harass the impoverished people, Mr. Ryan exclaimed, "It is very apocryphal whether Mr. Curtiss has abandoned his practice, or his practice has abandoned him." After the separation from Henry Moore, Mr. Ryan became associated with Hugh T. Dickey, under the style of Ryan & Dickey, which was dissolved January 27, 1840. Mr. Ryan now turned his attention to journalism, becoming editor of the Tribune, the first number of which appeared April 4, 1840, and which he freely used in the conflict of the Chicago Bar with Judge Pearson. Being of an irascible disposition, Mr. Ryan made many enemies, which he seemed to regard as proof of intellectual prowess. Being also of a combative turn of mind, and withal full of an overweening self-esteem, he seemed to delight in persistent efforts to impress others with an equal appreciation of his assumed superiority. In 1842 he removed to Racine, and thenceforth his history belongs to Wisconsin, where he rose to eminence, becoming Chief Justice in 1874, because of his acknowledged probity and ability, notwithstanding the extreme unpopularity of his political views ten years before. He died October 19, 1880, reaching within twenty-five days of threescore years and ten.

PATRICK BALLINGALL, often assigned to this period, was then a student with Spring & Goodrich, and became a member of the Chicago Bar only after his return from DuPage County in 1843.

HUGH T. DICKEY is also similarly mentioned, although not a resident until 1838.

NORMAN B. JUDD, an arrival of 1836, and partner with Caton as early as August, 1837, will be sketched elsewhere, about the period of the Civil War, when he achieved a national reputation.

GEORGE MANIERRE, an arrival of 1835, and Deputy Clerk of the Circuit Court and law student in 1836, was not admitted to the Bar until July 15, 1839, and belongs therefore to a somewhat later period.

GEORGE W. MEEKER, a partner of Manierre, was like him a student in 1837, and admitted to the Bar half a year after him, December 16, 1839.

THOMAS HOYNE, also an arrival of 1837, and often spoken of as a member of the Bar of that year, was not admitted to practice until December 16, 1839, and will be more appropriately sketched at a later period.

COURTS OF CHICAGO, 1837 TO 1844.—By the act of February 4, 1837, a new circuit was established. It included Cook County, and was numbered the Seventh. For its Judge, John Pearson, of Danville, an obscure lawyer, admitted to the Bar December 5, 1833, was chosen by the Legislature. The selection proved very distasteful to the lawyers of Chicago. Hon. Thomas Hoyne, despite his judicial candor, writing of this event, more than a generation later, reflects a feeling of disappointment that at the time must have been intense. Judge Pearson, he says, "was known to be incompetent for the position, and to be sadly wanting in the qualities which make a good judge. His appointment had consequently been unpopular with the Chicago Bar from the beginning. The Democratic party was in power in the State, and John Pearson was a Democrat—he was a poor lawyer and an industrious office-seeker."

The spring term in 1837 was opened May 22, by Judge Pearson, with seven hundred cases on the docket. Before his arrival he had promulgated an elaborate, burdensome and perhaps somewhat arbitrary system of rules for the guidance of lawyers transacting business in his court, which did not tend to smooth the way to a favorable reception of himself, his methods, or his decisions by the Chicago Bar. But the urgency of impatient clients and the heavy docket rendered the dispatch of business a paramount object, and the indulgence of resentful feelings by either party to the impending conflict would have given an undesirable advantage to the opposite side. Thus both terms of the year 1837 passed without an outburst. In 1838, this sustained forbearance and self-restraint on both sides promised to establish a reconciliation, or at least a *modus vivendi*, which if not cordial would be mutually respectful, and the organ of the Whigs rather pointedly and encouragingly noted these indications.

But the sectional jealousy and political antagonism that had unhappily been set in motion by the appointment of Judge Pearson, even more than his alleged incompetency, would not suffer the accomplishment of so desirable a result, and the suppressed quarrel found vent in 1839. The spring term had been held, and the docket had again become so burdened by reason of the discontinuance of the Municipal Court that he announced an extra term of the Circuit Court for the second Monday in May. It was at that special term, as related farther on, that the issue between the Bench and the Bar of Chicago took shape. Meanwhile two new courts had been created for Chicago by its charter of March 4, 1837.

THE FIRST MAYOR'S COURT.—Section 68 of the city charter provided, "That the Mayor * * * shall have the same jurisdiction within the limits of said city * * * as the Justices of the Peace, upon his conforming to the requirements * * * regulating the office of the Justice of the Peace."

THE MUNICIPAL COURT.—It was by the establishment of this court more especially that relief was sought to be given to the administration of justice in Chicago. The accumulation of untried cases on the docket of the Circuit Court of Cook County, and the delay in civil suits, which amounted almost to a denial of justice, owing to the urgency and legal preference of criminal cases, had

rendered imperative some additional provision. The Constitution of 1818, in its Bill of Rights, Article VIII, Section 12, had provided against such a state of things in words which admirably summarized the fundamental purpose of laws and courts: "Every person within this State ought to find a certain remedy in the laws for all injuries or wrongs which he may receive in his person, property or character, he ought to obtain right and justice freely, and without being obliged to purchase it, completely and without denial, promptly and without delay, conformably to the laws."

Sections 69 to 82 of the charter are concerned with this court, the chief provisions being that it should have jurisdiction concurrent with the Circuit Court, in all matters, civil or criminal, arising within the city where either party is a resident. It should be held by one Judge, to be appointed by the General Assembly, commissioned by the Governor, to hold office during good behavior, and to be paid by the Common Council. His salary and the other expenses of his court were to be paid out of the docket fees, which were to be collected by the clerk and turned over to the City Treasurer. The clerk was to be appointed by the Judge; the jurors to be chosen by the Common Council, and summoned by the High Constable. His functions as an officer of this court within the city were the same as those of Sheriffs in their respective counties, and he was to be elected by the people, like other city officers, at the annual election. It was a court of record, with a seal, and its process was directed to the High Constable except where a defendant resided outside the city limits, when it was directed to the Sheriff. Its judgments had the same liens on real and personal estate as those of the Circuit Court, and all appeals from the Mayor or any other Justice of the Peace were to be taken to next Circuit or Municipal Court whose term came first. All rules not specially laid down were to conform to those of the Circuit Court, and all appeals to the Supreme Court were to be carried up in the same way as from the Circuit Court.

By a short supplementary act of July 21, 1837, it was further provided that "its Judge shall possess all and singular the powers, and he is hereby required to perform all judicial duties appertaining to the office of the Circuit Courts of this State, and to issue all such writs and process as is, or may hereafter, by statutory provisions, be made issuable from the Circuit Courts of this State."

For this Court, Hon. Thomas Ford, who had resigned as Judge of the Sixth Circuit in February, was selected by the Legislature. He had been Prosecuting Attorney in the Fifth Circuit, and Judge of the Sixth, when each successively included Cook County, and was favorably regarded by the Chicago Bar. He had acquired the reputation of being an excellent lawyer; and as a judge was a terror to evil-doers, while as a man he was a warm and devoted friend, or an equally bitter enemy. As a citizen and politician he belonged to the dominant Democratic party, but was too broad to be a partisan, and when Governor, 1842 to 1846, did not hesitate to break loose from the unwisdom of repudiation and stay laws, or to espouse, support and urge with all the influence of his position every measure calculated to build up the shattered credit of the State.

The terms of the Municipal Court began with every alternate month, and it was virtually in perpetual session. An attempt was made by the politicians to prevent the opening of this court, the circumstances of which are thus narrated by the late Hon. Thomas Hoyne:

"It was a court of superior or general jurisdiction within the city. It was to be held that winter (1837-38) for the first time. It was a time of great pecuniary distress, and all obligations created during the speculative times were just maturing and unpaid, and there was no money to pay them. The dockets were crowded in both the Circuit and Municipal Courts, and something must be done. Some of the debtors resolved that no court should be held; a public meeting was called to prevent it. It was held at the New York House, a frame building on the north side of Lake Street, near Wells. It was held at evening in a long, low dining room lighted only by tallow candles. The chair was occupied by a State Senator, Peter Pruyne; James Curtiss, nominally a lawyer, but more of a Democratic politician, who had, practically, abandoned his profession, was active. But the principal advocate of suspension of the courts was a Judge of the Supreme Court of the State, Theophilus W. Smith. Upon the other side were Collins, Butterfield, Ryan, Scammon, Spring, Goodrich, M. D. Ogden, Arnold and others; and among them the Hon. William B. Ogden, the Mayor of the city, who was subsequently admitted to the Bar of this State (February 6, 1841). We will count him in for he did manly service at that meeting in sustaining the law and its regular administration, and in repudiating and denouncing any interference with the courts. He was a noble, generous man, whose hand was seen in all public works. The battle was bitterly fought. It was shown by the opponents of courts that it meant ruin if they should be held, and judgments rendered against the debtors; that \$2,000,000 were then in suit against citizens which was equivalent to a sum of \$500 against every man, woman and child in Chicago. What was to be done? 'No one was to be benefited,' Curtiss said, 'but lawyers,' and he left that profession some time before. Then Ryan, a man of muscular frame, eyes large, wide open, as great lights in his luminous intellect, great as he ever was in debate, but then active, and in his wrath, like Mirabeau, 'fierce as ten furies and terrible as hell,' when he rose to the full height of his great argument, pointing to Curtiss, asked that body of debtors if that was the kind of a lawyer they expected to save them. If so, it had long been a question whether he had left the profession of law, or the law had left him; but of one thing they could be sure—that if he succeeded in his present unlawful attempt, he (Ryan) would guarantee them justice, and the sooner the law discharged that obligation the better it would be for the community. Butterfield, tall in stature, stern of countenance, denounced the Judge of the Supreme Court who could descend from that lofty seat of a sovereign people majestic as the law, to take a seat with an assassin and murderer of the law like Judge Lynch. Others followed; but the good sense of the meeting laid the resolutions on the table, and the courts were held, as they have been ever since."

But the end was not yet; and the contest was transferred to the Legislature. The court was too dispatchful, and debtors found that scarcely had their obligations matured before a judgment and execution were secured in the ever-sitting Municipal Court of Chicago. After only fifteen months of active usefulness, it was legislated out of existence, February 15, 1839, and all its business turned over to the Circuit Court which it had, as intended, so effectually relieved until a supposed political necessity demanded its repeal at the hands of the dominant party. Ten days later Judge Ford was commissioned as Judge of the Ninth Circuit.

ATTEMPT TO IMPEACH JUDGE PEARSON.—The increased burden thrown on his shoulders by the disestablishment of the Municipal Court had led Judge Pearson to hold the extra term in May, previously mentioned. It was at this special term that the dissidence between the Bench and Bar of Chicago became irreconcilable, by the refusal of the Judge to sign a bill of exceptions made by J. Y. Scammon, defendant's lawyer, in *Phillips vs. Bristol*. The Court unfortunately regarded the exceptions as inspired by a desire to embarrass and antagonize him, rather than an honest defense. In this he was doubtless deceived by his prejudices. The case was appealed by Mr. Scammon, and in virtue of a motion made by him before the Supreme Court, some weeks later, an alternative mandamus was granted commanding Judge Pearson to sign the bill of exceptions referred to, or show cause at next term of Supreme Court why he did not.

November 11, 1839, as the protracted fall term of the Circuit Court was drawing to an end, Justin Butterfield, whose co-operation had been secured by Mr. Scammon, arose in his place, holding two papers, and, as the affidavit of the clerk, dated November 23, declared: "With marked politeness of manner handed one paper to the Judge, saying that it was a bill of exceptions in the case of *Phillips vs. Bristol*, tried at a former term. The Judge said, 'I did not sign that bill of exceptions,' to which Mr. Butterfield graciously replied, 'I am aware of that, sir, but here' (presenting the other paper), 'is a writ of mandamus from the Supreme Court of this State commanding you to sign it.' The Judge held the paper toward Mr. Butterfield, saying, 'Take it away, sir;' to which he replied, 'It is directed to you, sir, and I will leave it with you; I have discharged my duty in serving it, and I will leave it with you.' It was at this point," continued Mr. Hoyne,* "that the Court turned to me, as clerk, and said, 'Mr. Clerk, enter a fine of twenty dollars against Mr. Butterfield,' and then he threw the papers—the bill of exceptions and writ of mandamus—on the floor in front of the desk. He continued, looking at Butterfield, 'What do you mean, sir?' It was now that Butterfield, raising his voice, hitherto restrained, fired the first gun of what was to be a campaign. 'I mean, sir, to proceed against you by attachment, if you do not obey that writ.' The Judge, replying, cried out, 'Sit down, sir! Sit down, sir!' and to me, saying, 'Proceed with the record.'

"The record was read, the fine of twenty dollars entered up against Butterfield, and the court adjourned. The Judge was descending the Bench, and proceeding to pass through the Bar, when all the lawyers jumped to their feet; while Butterfield promptly marched up to Pearson, saying, 'Sir, you now have disgraced that Bench long enough. Sit down, sir, and let me beg you to immediately attend a meeting of this Bar, to be held instanter, in which we are about to try your case, and rid ourselves and the people, once for all, of your incompetency and ignorance!' The Judge left, but the Bar prepared an impeachment and that winter a long trial followed the presentation of articles before the House of Representatives at Springfield, where all the eloquence of the Bar was invoked, with that of others, to impeach Judge Pearson; but the House, which was largely composed of his political friends, refused to give the impeachers a hearing.

"He, however, never recovered from the effects of this attack and prosecution. The party paraded him as a martyr, and it was said that he had achieved a triumph

* "The Lawyer as Pioneer," by Hon. Thomas Hoyne.

over Butterfield, Scammon, Collins, Spring, Skinner, and Goodrich, as they were old Federals and Whigs, and only wanted to be rid of an incorruptible judge, a Democrat who was not to be terrified by such enemies of the Constitution, the Democracy and the Union. But Ryan, a life-long Democrat, established a newspaper called the Tribune, to drive Pearson from the Bench. Its leading articles were such as Junius might have written, animated by a spirit of determination to drag from the Bench a Jeffreys or a Scroggs. Pearson was finally disposed of by the party taking him up as a State Senator and electing him from the counties of Cook and Will, in 1840. And from thence, hitherto, the Bench has heeded the lesson, for there has arisen no other occasion for the violent and irrepressible conflict of a Bar and Bench so divided by ignorance and incompetency on one side, and great independence and intelligence upon the other."

Besides the effort at impeachment, rendered abortive mainly by political influence, the Judge's case was also before the Supreme Court, where he neglected to appear in person, contenting himself with a written defense which he requested a friendly lawyer to file in his behalf. Among the points made therein was the plea, that were this procedure of the Chicago Bar to be sustained, any Judge could, "by a malicious, trifling set of lawyers, if such should be found in a circuit, leaguering against him, be compelled every term to appear in the Supreme Court, and take issue with them on countless bills of exceptions. * * * In this way a combination of designing men might exhaust the means of any Judge in the State, or make him truckle to their will, or compel a resignation for want of funds."

Mr. Scammon made a second motion, before the Supreme Court, January 14, 1840, asking that an attachment might issue against Judge Pearson for neglecting to return the writ of alternative mandamus, or sign the bill of exceptions. The Supreme Court, through Judge Theophilus W. Smith, issued a peremptory mandamus that he should appear before it in person. In the spring term of the Circuit Court at Chicago, he again allowed his feelings to override his judgment, fining Mr. Stuart, editor of the American, \$100, for constructive contempt of court, based on certain adverse editorial criticism during the Stone murder-trial. On appeal, his decision against Stuart was reversed when reached by the Supreme Court in 1842.

June 9, 1840, the motion for attachment was renewed, and the Court took until the next day to consider; but when the writ was placed in the hands of the Sheriff, it was found that the Judge had availed himself of the postponement and left Springfield. He was pursued and overtaken at Maysville, Clay County, while apparently making the best of his way to cross the border into Indiana. He was taken back to the capital and fined \$100 for contempt, which was refunded with interest by the Fifteenth General Assembly, in the session of 1846.

It was now thought best by his political friends to withdraw him from a conflict in which his adversaries had won all the points, and he was therefore put in nomination as State Senator for the district embracing Cook, Will, DuPage, Lake and McHenry counties, all within the Seventh Circuit, over which he presided as Judge. In July he made an unsuccessful attempt at Chicago to hold a meeting to indorse his candidature; but at the election in August it was found that the Democracy of the district had come up handsomely to the support of their "martyr," Cook County alone giving him 1,404 votes, and sent him triumphantly vindicated to the

Twelfth General Assembly of Illinois, for four years. He resigned the judgeship November 20, 1840.

At this distance of time there is little room to doubt that Judge Pearson through self-willed and obstinate was a well-meaning man and an upright Judge. He was by nature or education, either a warm friend or an uncompromising enemy. In Chicago he was thrown into official relations with a Bar, the leaders of which were politically opposed to him, at a time when party spirit, always too high for justice and candor, was especially intense. Added to this was a sort of intellectual resentment that a Judge from the Wabash country should have been selected to preside over a Bar whose brightest lights were emigrants from the Eastern States. Exhibiting but scant respect and no friendship, they aroused the indignant and unguarded antagonism of a man, among whose faults cunning and hypocrisy could not be counted, nor patience and magnanimity among his virtues. He died at Danville, May 30, 1875, leaving a handsome estate to his family.

THE STONE MURDER-TRIAL.—The most notable criminal trial during the incumbency of Judge Pearson was thus designated. The story of the crime and the execution of Stone is fully related elsewhere in this work. A point of some legal interest is the apparent weakness of the chain of circumstantial evidence upon which he was convicted of the murder of Mrs. Lucretia Thompson, as there set forth. A bit of flannel torn from a shirt which was proved to have belonged to the accused and which was found near the body of the victim, the burning by him of the clothes worn in the earlier part of the day of her disappearance, the club used as the instrument of killing to which still adhered, when found, a bunch of her hair, and a remembered threat by him against her virtue, sworn to by a single witness, in the absence of any circumstances pointing toward any other neighbor, were deemed sufficient to warrant a verdict of murder in the first degree. Nor has there ever been any doubt of its justice, although John Stone stolidly asserted his innocence to the last.

ATTEMPTS TO SUPPLY NEEDED COURT FACILITIES.—Within a year of the disestablishment of the Municipal Court of Chicago, it was recognized by the Legislature that something should be done to relieve the overloaded docket of Cook County. Toward the close of the second session of the Eleventh General Assembly on February 3, 1840, it was enacted that there should be in the county of Cook a term of the Circuit Court on the first Monday in August for the trial of criminal and chancery cases only. And it was specially provided that if the Judge of the Seventh Circuit should be unable to hold the March term in Chicago in 1841, he should there hold a term immediately after the spring term in Lake County, the last to be reached in the circuit. This law, however, by reason of failure to be returned in time by the council of revision did not go into effect until legally promulgated by the Secretary of State, at the close of the first session of the Twelfth General Assembly, December 5, 1842. It is of interest chiefly as showing the pressure of the problem how to give courts enough to Chicago.

SUPREME COURT JUSTICES AS CIRCUIT JUDGES.—The Twelfth General Assembly, at its second session, for reasons which here need only to be characterized as political, by an act dated February 10, 1841, legislated out of office the Judges of the nine circuits into which the State had by that time become divided. In their stead were created five additional Justices of the Supreme Court, and upon the nine members of that court as thus re-organized were devolved all the Circuit

Court duties of the State, besides their associate duties as the Supreme Court, at the capital, twice a year. This arrangement remained undisturbed until the adoption of the Constitution of 1848. To the Seventh Circuit, including Cook County, was assigned Judge T. W. Smith, who opened the spring term at Chicago toward the close of April, 1841. On the docket were found one thousand and sixty cases. Of these, sixty-nine civil and six chancery were cases remaining over from the disestablished Municipal Court, while sixty-two criminal, fifty-one chancery, and eight hundred and seventy-two civil represent the unfinished business of the Circuit Court. The fall term in 1841 was also held by Judge Smith, but when the period of the spring term in 1842 came round he was too ill to hold a court, and as late as June 8 it was doubted whether he would ever be able to discharge his official duties. To keep Chicago court business within reach of judicial despatch, a special term was held by Stephen A. Douglas, July 18, 1842, the only time he served Chicago as Judge. There was a heavy docket of seven hundred and fifty cases, and but little civil business could be disposed of, because of the pressure on the court of the people's preferred criminal cases. All these terms since Pearson's in 1840 were held in the Chapman Building, corner of Randolph Street and what is now Fifth Avenue, but was then Wells Street. The fall term of 1842 was held by Judge Smith, who had meanwhile recovered. At this term an important decision was that lands in this State sold by the United States are not taxable until five years from date of patent, not date of sale, as has been contended. At this term, too, the Grand Jury found indictments for libel against Walters and Weber, editors of the State Register, at Springfield, and John Wentworth, of the Chicago Democrat, because of an editorial article which appeared in August in the State Register and was copied in the Democrat, containing libelous and scurrilous matter against Judge Smith. It was in the shape of charges and assertions of what was declared to be an act of corruption in an opinion given by him in the Supreme Court in January, 1842, and concurred in by a majority of Judges, in favor of purchases of canal lots in Chicago and Ottawa in 1836. By that decision a peremptory mandamus was awarded against the Canal Commissioners to compel them to admit those purchasers to the benefit of an act of the General Assembly of this State, passed in 1841 in their behalf. He was also charged with removing certain clerks of court in his circuit to gratify personal malignity. With bodily powers weakened by disease and feelings somewhat soured by these attacks it soon came to be understood that he contemplated an early retirement from the Bench. A meeting of the Chicago Bar was held November 25, at which, among others, the following resolution was passed: "That in the estimation of this Bar Hon. T. W. Smith possesses a high order of talent and legal attainments; that as a jurist and lawyer he is able and profound; that his conduct toward the members of this Bar, while on the Bench, has been courteous, gentlemanly, dignified and honorable." He resigned December 26, 1842.

In 1842, about fifty residents of Chicago availed themselves of the bankrupt law in the United States District Court, at Springfield. Unconscious of what the future held in store for the bankrupts of a later generation, there was much grumbling because it cost \$100 to get a discharge in bankruptcy, even where the case was not contested. The lawyers charged fifty dollars and the other expenses were fifty more. This year marks the point of greatest financial depression in Chi-

ago, which in a superficial view has been declared to have constituted "the harvest of the notary and lawyer," but it need scarcely be remarked that a period of general distress is fraught with counteracting drawbacks to even lawyers and notaries. June 19, 1843, the same United States Court issued a peremptory order, "That all applicants for benefit of bankrupt law perfect their application before the 20th of December next. Upon their failure to do so, the petition will be dismissed."

Meanwhile on February 14, 1843, three terms of the Circuit Court were provided for Cook County, on the fourth Monday in March, the third Monday in August, and the first Monday in November, of each year. And at the same session, it was enacted that the Supreme Court should hold only one term, to begin at the capital on the second Monday in December of each year.

Richard M. Young, of whom a biographical sketch is elsewhere given, was commissioned a Justice of the Supreme Court January 14, 1843, and assigned to the Seventh Circuit. He held several terms of the Circuit Court in Cook County until his second resignation in 1847. Although never rated very high as a jurist, he was always much esteemed here, and decidedly preferred to some of his colleagues by Bar and people. His clerk of court was Samuel Hoard.

In February, 1844, Representative Wentworth presented to Congress a petition of the Chicago Bar, asking that two terms of the United States courts be held in Chicago each year. At home his constituents were growing impatient of the law's delays, arising from the State's inadequate provision for the city's judicial wants by only three terms of the Circuit Court. A communication from "many citizens," written by a lawyer, who, however, rightly represented the public, appeared in the Weekly Democrat of October 16, asking that the next Legislature should establish a special court for Chicago. This request, supported by the public opinion of which it was the expression, was reinforced December 3, by Governor Ford's message to the General Assembly, in which he urged that increased judicial facilities should be extended to the growing commercial metropolis of the State. The Court of County Commissioners at this time took measures to enlarge and adapt the clerk and recorder's office to the additional purposes of a court-house.

By an act of February 21, 1845, the Fourteenth General Assembly ordained, "That there shall be, and is hereby created and established a Cook County Court. * * of record, with a seal and clerk, to be held by a judge to be chosen in the manner, and to hold office for the term of judges of courts of record in the State. * * Said court shall have jurisdiction concurrent with the Circuit Courts, * * and shall have exclusive jurisdiction in all appealed cases * * and in all cases of misdemeanor which are prosecuted by indictment. * * The Judge of said court shall hold four terms of said court in each year, in a building to be provided by the County Commissioners Court of said county, in the city of Chicago, commencing on the first Mondays in May, August, November and February, and shall continue each term until all the business before the court is disposed of. * * The clerk of said court shall be appointed by the Judge thereof. * * The grand and petit jurors shall be elected, and the Sheriff shall perform same duties as in the Circuit Court." Of this court, Hugh T. Dickey was chosen by the Legislature, the first Judge, and James Curtiss was by him appointed the first clerk. Judge Dickey opened the first term of the new court May 5, 1845, and at its close was thus favorably noticed by the Journal,

edited and owned by lawyers, but of the opposite school in politics: "Judge Dickey has during the session of the court shown himself a good lawyer, a sound reasoner, and a dignified, impartial Judge. The rules of the court were submitted to the Bar on the last day of the term, and meeting with their entire approbation were ordered printed." About ten days later, the Weekly Democrat of May 28, said: "He has made his court very popular, and the Bar would not consent to dispense with it or him, upon any terms whatever." The new court clearly met the wishes of the public at the outset, but as will be seen, its docket soon became clogged by the swift-swelling tide of law business in Chicago.

The most notable criminal case of the year 1845, in either court was the Fahey manslaughter, sufficiently detailed elsewhere in this work.

At the close of the first year and fourth term of the Cook County Court, the Weekly Democrat of February 24, 1846, thus eulogized its presiding officer: "Judge Dickey grows in popularity every succeeding court he holds. His dignity, urbanity, and well-balanced legal mind commend him to all who have anything to do with the court." At their August term an agreed case in relation to assessment for protecting the lake shore was argued before him, and decided against the city. His court as well as the Circuit Court were kept busy with ever increasing judicial business of Chicago. Judge Caton supplied the place of Judge Young at one term of the Circuit Court in 1846, but as soon as the latter got well enough to hold court he presided at a special term, beginning June 15, and yet the docket was always full.

Judge Young resigned January 25, 1847, to take office in Washington, and his successor, Jesse B. Thomas, Jr., was commissioned two days later. He held the office until December 4, 1848, when the new judicial system provided by the constitution of that year went into force. By an act of the Legislature in the spring of 1847, with a view to harmonize the terms of the two courts in Chicago, the two terms of the County Court in August and November were replaced by one term in October. James Curtiss having been elected Mayor, his place as clerk of this court was filled by Louis D. Hoard, appointed thereto by Judge Dickey. The May term opened with three hundred and seventy-eight cases on the docket; of these two hundred and sixty-eight were common law, fifty-seven chancery, and fifty-three people's cases, but none of any class possessed historic interest.

FIRST LAW SCHOOL IN CHICAGO.—On the first Monday in December, 1847, the first law institute, or school, was opened under the auspices and with the endorsement of the Bench and Bar of Chicago, by John J. Brown, a member of the Bar having a reputation for general scholarship as well as professional learning, and special proficiency as a jury advocate and orator. The announcement which appeared in the Daily Democrat of November 30, was rather grandiloquent and pretentious, but the comprehensive scope outlined perhaps not above his powers, when supplemented, as proposed, by lectures from members of the profession of acknowledged ability in special lines. Mr. Brown was a native of Virginia, settling at Danville, Ill., in 1839, had acquired some reputation in that section. He was the unsuccessful opponent of William Fithian for the State Senate in 1840, but was elected Representative to the same General Assembly. About 1846, he removed to Chicago, and after a year or more of practice here, projected his law school, as above. The impression made

on the Bar of Chicago, and of the other sections of the Seventh Circuit where he became known, was quite favorable. He was regarded as an able advocate, scathing in sarcasm and merciless in vituperation. On the hustings as well as at the Bar he could give and take with the best. It was remarked, however, that his scope was really narrow, he adroitly using one or two lines of thought and anecdote, with almost endless variation. "He had his faults," says Linder, "as we all have, over which it is our duty to draw the veil of charity; but no foul blot or stain was ever fixed upon his character as a lawyer or as a man. * * He was an honor and an ornament to the Bar of Illinois." "He was naturally a retiring and misanthropic man," says Eastman. "the lenses through which he looked at life seemed to be ever clouded—the glimpses of sunshine rare. * * Had his natural temperament been different, had his health been better, had life been more roseate, he would, as the years rolled on, have made for himself a high and honored name. * * He was undoubtedly the great master of withering and remorseless irony when aroused, of satirical and scornful gibe, then at the Chicago Bar of sarcasm, that when given full rein had something almost sardonic in it. To this end, his vehement gestures, his eyes, his tall flexible person, and his leonine hair, all added emphasis, and woe to those upon whom the razor-like edge of his tongue fell when unbridled."

THE JUDICIARY BY THE CONSTITUTION OF 1848.—The organizing clauses were as follows:

1. "The judicial power in this State shall be, and is hereby vested in one supreme court, in circuit courts, in county courts, and in justices of the peace. Provided, that inferior local courts, of civil and criminal jurisdiction, may be established by the General Assembly in the cities of this State, but such courts shall have a uniform organization and jurisdiction in such cities.

2. "The Supreme Court shall consist of three Judges, two of whom shall form a quorum; and the concurrence of two of said Judges shall in all cases be necessary to a decision.

3. "The State shall be divided into three grand divisions, as nearly equal as may be, and the qualified electors of each division shall elect one of the said Judges for the term of nine years."

7. "The State shall be divided into nine judicial circuits, in each of which one circuit judge shall be elected by the qualified electors thereof, who shall hold his office for the term of six years, and until his successor shall be commissioned and qualified: Provided, That the General Assembly may increase the number of circuits to meet the future exigencies of the State." They were increased accordingly to thirty before the Constitution of 1848 was replaced by that of 1870."

8. "There shall be two or more terms of the Circuit Court held annually in each county of this State, at such times as shall be provided by law; and said courts shall have jurisdiction in all cases at law and equity; and in all cases of appeals from inferior courts."

16 to 19. "There shall be in each county a court to be called a county court. One county judge shall be elected by the qualified voters of each county, who shall hold his office for four years, and until his successor is elected and qualified. The jurisdiction of said court shall extend to all probate and such other jurisdiction as the General Assembly may confer in civil cases, and such criminal cases as may be prescribed by law, where the punishment is by fine only, not exceeding one hundred dollars. The County Judge, with such Justices of the Peace in each county as may be designated by law, shall hold terms for the transaction of county business," replacing the County Commissioners Court and Judge of Probate of the first Constitution, as well as the Probate Justices of later legislative institution.

Some supplementary provisos were added in "the schedule," or appendix to this constitution; among others, these: "The Judges of the Supreme Court shall have and exercise the powers and jurisdiction conferred upon the present Judges of that court; and the said Judges of the Circuit Courts shall have and exercise the powers and jurisdiction conferred upon the Judges of those courts, subject to the provisions of this constitution. . . . The Cook and Jo Daviess County Courts shall continue to exist, and the Judge and other officers of the same remain in office until otherwise provided by law."

THE PRE-EMPTION CLAIMS TO CANAL LAND.—In January, 1848, the trustees of the Illinois & Michigan Canal brought suit against one Mr. Miller, before H. L. Rucker, Justice of the Peace. Sixteen other suits, differing only in the names of the defendants, depended on the result; some two hundred persons were directly interested. The claim was for one hundred and sixty acres to each original pre-emptor, or his later representative, on the canal lands, within what became the city limits, as elsewhere, by the general pre-emption acts of Congress. The canal trustees awarded two blocks to each, as a full equivalent for one hundred and sixty acres of common Government lands. This was not satisfactory to the claimants, and the question was taken into the courts. In this case against Miller, the canal trustees claimed rent for his land since January, 1847, at which time a two years' lease from them had expired. Miller's lawyers, Thomas Hoyne and Patrick Ballingall, undertook to show that he held his pre-emption right by virtue of settlement and improvements made in, and subsequent to 1836, that ignorant of his rights he signed a lease which the trustees presented to him in 1842, which lease was never legally executed; that the estoppel by taking a lease only applied during the existence of that instrument, and did not prevent the pre-emptor from setting up his title under the laws of the State. The opinion of Judge Caton and other members of the Supreme Court were cited and presented to the jury by Mr. Hoyne. Two juries disagreed, and when the third was summoned the excitement ran very high, but when they returned a verdict for the defendant, popular enthusiasm knew no bounds. The question came up again, in another form, under Judge Spring, in 1851, and was again decided against the canal trustees, but the higher courts as will be seen eventually reversed these popular decisions of the lower courts.

THE FIRST UNITED STATES COURT at Chicago was opened in July, 1848, in the absence of Justice John McLean, of the Circuit Court, by Judge Nathaniel Pope of the District Court, with his son, William, as clerk. Some lawyers were licensed to practice before it, and other preliminary business done, but no case of importance is known to have occupied the attention of the court at that term.

The Constitution of 1848, as has been seen, restored the circuit judiciary abolished for partisan purposes in 1841, and transferred the election of all Judges from the General Assembly to the people. Judge Hugh T. Dickey, of the Cook County Court, was nominated for the Seventh Circuit by the Democrats, and was elected without opposition from the Whigs. He resigned his previous judgeship, and was commissioned as Circuit Judge December 4, 1848.

February 2, 1849, a decision was rendered in Washington by Justice Woodbury, of the Supreme Court, against the city of Chicago, in the case taken up by bill of injunction, and referring to the pretended right of the corporation to open and keep open the streets and alleys in the Fort Dearborn addition. The decision was in effect that the powers of the corporation did not extend over that region, and that the fee-simple to its streets and alleys was still vested in the United States.

THE MAYOR'S COURT.—In his second inaugural message to the Common Council in March, 1849, Mayor Woodworth thus sketched the need of such a court: "Situating as we are on the main channel of communication between Western lakes and Southern rivers, there is found here a class of individuals, who, regarding the rights of none, are almost daily in the commission of

crime as a means of converting to their use the substance of their fellow-men. This state of things calls loudly for the organization of a well regulated police. It has been suggested by some that the Mayor should hold a court for the trial of persons charged with a violation of the city ordinances. If the Common Council desire the establishment of such a court, they will receive from me a willing co-operation."

In pursuance of that idea a Mayor's court was instituted as authorized by the city charter, and on April 26 it was ordered, and notice given to all police constables, that violators of any city ordinance be brought before the Mayor, daily, at 9 o'clock, in his office in the north room of the market.

COOK COUNTY COURT.—Giles Spring was elected to the judgeship made vacant by the resignation of Mr. Dickey, and was commissioned April 14, 1849. At the May term he found about four hundred civil, one hundred chancery and a proportionate number of criminal cases.

In June a term of the Circuit Court was held by Judge Dickey, but both courts, however efficiently presided over, were unequal to the complete dispatch of the accumulating judicial business of Chicago. A number of cases were determined at each successive term, but the rapid influx of trade and population outran the best speed of the courts, never remarkable for quickness of procedure.

Early in July Judge Pope, of the United States Court, held the annual term provided to Chicago in the law-rooms of Buckner S. Morris, with William Pope as clerk; Archibald Williams, District Attorney; Benjamin Bond, Marshal, and George W. Meeker, Commissioner. The court adjourned August 11, having lasted some five weeks and disposed of over twenty-five important cases. Among others a marine case, which excited much interest at the time, was determined. In November, 1848, the propeller "Ontario" collided with the barque "Utica," on Lake Huron. The owners of the latter brought suit, and the court decreed to them for damages \$790.91 and costs.

At the October term of the Cook County Court, Judge Spring had the largest criminal docket since the establishment of the court in 1845. There were at the opening of court sixty-one cases, and the Grand Jury returned eight or ten additional indictments. By act of November 5, 1849, the General Assembly ordered that to the title of Cook County Court should be added the words of common pleas. This was designed to distinguish Judge Spring's court from the County Courts of administration and probate established by the new constitution to replace the courts of county commissioners. The original County Courts, instituted by the act of 1845 were only two in number, for Cook and Jo Daviess counties, occasioned by the growth of Galena and Chicago, and were served by one judge. It was now provided by the new act that the Cook County Court of Common Pleas and the Circuit Court of Cook County should have equal and concurrent jurisdiction; that the terms of the former should begin on the first Mondays in February and September, and of the latter on the corresponding days in May and November, and that all appeals from justices should be taken to which ever term of either court came next after the date of such appeal.

The year 1850 was marked by the decease of several members of the judiciary, more or less connected with Chicago. Nathaniel Pope of the United States District Court, in January; Jesse B. Thomas, Jr., ex-Justice of the Supreme Court of Illinois, in February, and Thomas Ford, ex-Circuit Judge and ex-Governor, in November.

Isaac N. Arnold

NATHANIEL POPE.—Few if any of the men identified with the early history of Illinois, have exercised so potent an influence upon the destiny of Chicago as Judge Pope. The delegate of Illinois Territory in Congress in 1818, he conceived and executed that farsighted measure of statesmanship, demanded as he urged by National as well as State interests, of removing the northern boundary of Illinois from the "east and west line drawn through the southerly bend or extreme of Lake Michigan," to 42° 30', north latitude. It had hitherto been understood that if Congress decided to establish five rather than three States out of the "territory northwest of the Ohio," an alternative provided by the ordinance itself, the line referred to was the predetermined boundary between Illinois and the future State to the North. Mr. Pope set himself to work to secure a wider interpretation, and to enlist influential members in the support of his view, and succeeding in persuading Congress that the Ordinance of 1787 had itself empowered them to make the departure which he advocated. Among the results of the change introduced by him and ingrafted on the enabling act of April 18, 1818, authorizing the people of Illinois to form a State constitution, was the retention of Chicago within Illinois, instead of relegating it to the then Michigan Territory, and the later State of Wisconsin. An imperial city demands an imperial State as well as a local commercial location. But the story of Nathaniel Pope's life in its completeness belongs to the State of which he was one of the most notable founders, rather than to any single point within its borders. Indeed his most effective argument for the change he advocated was based on the broad ground of national interest, and the permanency of the Union, in which he claimed for Illinois a sort of keystone position, touching the Southern and Western States, through the Ohio and Mississippi, and the Northern and Eastern through the Great Lakes. Situated on the main channel of communication between Northern lakes and Western rivers, Illinois would hold together the wide-extending borders of the States.

JESSE B. THOMAS, JR., whose life covered the period from 1806 to 1850, was associated with the Bench and Bar of Chicago only during the last few years of his active work, while as a State officer he was more or less conspicuous since 1830. He was commissioned as Judge of the First Circuit March 20, 1837, and resigned in 1839. He was appointed Associate Justice of the Supreme Court August 16, 1843, to fill the place left vacant by the election of Stephen A. Douglas to the Twenty-eighth Congress. This he resigned two years later, and formed a law partnership with Patrick Ballingall; but was again appointed to the same office, to replace Judge Young, as stated. He had also filled the offices of State Senator, Attorney-general of the State, and Representative in the General Assembly. He died of erysipelas February 20, 1850, with a reputation—as official, lawyer, Judge and citizen—for integrity, worth and honor that have made his name respected throughout the State, which he had served faithfully and creditably, if not always brilliantly, in every field of labor to which he was summoned.

THOMAS FORD, although twice connected with the judiciary of Chicago, and still earlier associated with its Bench and Bar as Prosecuting Attorney of the Fifth Circuit, by reason of his later elevation to the Governorship of Illinois, belongs to the history of the State rather than the history of Chicago. The February term of the Court of Common Pleas was somewhat delayed by an illness of Judge Spring, but he soon made up

for lost time, being a man of great energy, bright intellect and quick perceptions. Successful in the dispatch of business, a number of his decisions were reversed, but perhaps no larger percentage than most of the lower courts. February 19, 1850, President Taylor commissioned Thomas Drummond, of Galena, to succeed Nathaniel Pope, deceased, as United States District Judge for Illinois. Mr. Drummond had been a member of the Legislature, 1840–42, was a Whig of pronounced convictions, and indorsed by two of the most prominent members of the party and of the Bar of Illinois—Edward D. Barker, of Galena, member of Congress, and Justin Butterfield, of Chicago, Commissioner of the General Land-office. The selection has ever since been regarded as an excellent one, and Judge Drummond entered at once on the discharge of his duties. He held a term of his court in Chicago in 1850; has continued to hold them of increasing length and in larger number for a generation, and happily the end is not yet. Though now entering upon his seventy-fifth year, he holds his own among the jurists of the day, commanding universal respect for firmness, independence, courage and conscientiousness, as well as professional ability, judicial impartiality, and unbroken vigor of mind.

At the May term of the Circuit Court in 1850, among the many cases of no special interest was one of a class that perhaps deserves mention as a reminder to the reader of a particular phase of Chicago's growth. A verdict of \$575 was given the owners of the schooner "Jane" against the steamer "Sam Ward," for damage to the former in being run into by the latter vessel.

POLICE AND MAYOR'S COURTS.—In the comprehensive act of the Legislature, approved February 14, 1851, which was designed as supplementary to as well as amendatory of the city charter of March 4, 1837, in chapter twelve, sections eight and nine, are found these provisions relating to this subject: "The Common Council shall have power to designate two or more Justices of the Peace in any actions for the recovery of any fine or any ordinance, by-law, or police regulation of the City Council, anything in the laws of this State to the contrary notwithstanding. Such Justices shall have power to fine or imprison, or both, in their discretion, where discretion may be vested in them by the ordinance or regulation, or by this act. The Mayor may hold a police court.

"Execution may be issued immediately on the rendition of judgment. If the defendant in any such action have no goods or chattels, lands or tenements, whereof the judgment can be collected, the execution shall require the defendant to be imprisoned in close custody in the jail of Cook County, or bridewell, or house of correction, for a term not exceeding six months, in the discretion of the magistrate or court rendering judgment; and all persons who may be committed under this section shall be confined one day for each fifty cents of such judgment and costs. All expenses incurred in prosecuting for the recovery of any penalty or forfeiture, when collected, shall be paid to the Treasurer for the use of the city."

At the February term of this court in 1851, the last at which he presided, Judge Spring delighted the hearts of the pre-emption claimants, by deciding for the plaintiffs in the cases of Daniel Brainard *vs.* Board of Trustees of Illinois & Michigan Canal, and of Thomas Dyer *et al.* *vs.* the same. At the May term of the Circuit Court another of these cases, Elihu Granger *vs.* Canal Trustees, was similarly decided by Judge Dickey.

But at the June term of the Supreme Court at Ottawa, to which the two first-named cases were appealed, these decisions were reversed, Justices Treat and Trumbull concurring, with Justice Caton dissenting.

The question at issue was whether the privilege of pre-emption was to be regarded as covering one hundred and sixty acres in a legally platted division of a town or city, as in the broader domain of unsettled Government lands. The lower court had decided substantially in the affirmative. The Supreme Court now reversed that decision, holding that the proper pre-emption privilege of persons whose claims were situated as described was that such lots or blocks, as the case might be, as were covered by their actual improvements, should be open to them as preferred purchasers at the appraised valuation. This was substantially the award made by the trustees themselves before the cases were taken into court; and when thus sustained by the highest court in the State, came to be accepted as eminently equitable. The public recognized that the decision was rather liberal than otherwise. The impetuous first pronouncement in favor of the claimants was amended by the sober second thought developed and fostered by the arguments before the courts.

The canal lands, through the munificence of Congress, had been withdrawn for a great natural object from the domain of the general pre-emption laws, and were at this time entirely amenable to State laws. A great public benefit was not to be marred by a strained sentimental interpretation of pre-emption privileges in favor of a few and against the broad commercial interests of the State, if not of the whole nation. Those who bought by pre-emption or at public sale, within a legally platted town or city, could only buy in such lots or blocks as the law there recognized.

FIRST FUGITIVE SLAVE CASE.—On the 7th of June, 1851, before George W. Meeker, United States Commissioner, was arraigned one Morris Johnson, alleged to be a runaway slave. Crawford E. Smith, of Lafayette County, Mo., by power of attorney to Samuel S. Martin, of Chicago, had him arrested as his slave, William, who had escaped from his premises July 4, 1850. After a trial which occupied three days besides postponements, the prisoner was discharged on the 13th, ostensibly because of a discrepancy between the writ and the record. The former called for a copper-colored negro, five feet five inches in height, while the latter showed a dark enough negro to be called black, while he measured—possibly by a trick of the measure—five feet eight inches. His acquittal was largely due to the unpopularity of the law, and the unwillingness of the Bench, Bar and people of Chicago to act as negro-hunters for Southern slaveholders. Among other obstacles thrown in the way of the owner's representatives in this case, was the demand that they should prove by any other hearsay testimony that Missouri was a slave State! Had the decision been different, it is probable Crawford E. Smith would have been no nearer to getting possession of his chattel, as "the underground railroad" was at that time in active operation here.

At the September term of the Cook County Court of Common Pleas to the Bench of which he had been elected upon the death of Giles Spring, Judge Mark Skinner found an overloaded docket. The most important criminal case was "The People *vs.* Martin O'Brien," for the murder of Stephen Mahan. The trial lasted three days, and no other defense was made than that the prisoner acted in the heat of passion, and to redress an injury offered to one of his relatives by the de-

ceased. He was convicted of manslaughter, and sentenced to eight years in the penitentiary with ten days of each year in solitary confinement.

Judge Skinner sat almost continuously for seven months, including the regular term in February, 1852, cleared the docket of his court, and kept its business under control for the remainder of his term.

The city had been for several months preparing to throw a bridge across the river on Lake Street, at considerable expense for those times, when in February, 1852, an injunction was asked of the United States District Court, which Judge Drummond refused. Navigation had its interests, and so had the city. The principle was understood to be that the right to navigate the river and the right to cross it by bridges are co-existent, and neither could be permitted to essentially impair, much less destroy the other. They were to be so harmonized as to afford the least possible obstruction or interruption to each other.

In September another murder case was tried before Judge Skinner, "The People *vs.* John O'Neil, for the murder of Michael Brady." On Saturday, May 29, 1852, at 12 o'clock at night, Michael Brady, a blacksmith, residing on Indiana Street, corner of LaSalle, was killed by his neighbor, John O'Neil, a tinner. For some time there had been a standing quarrel between them. On the day of the murder, Brady called a little girl of O'Neil an opprobrious epithet. Swearing to be revenged, O'Neil waited at the door of Brady's house, and when the latter appeared, struck him over the head with a heavy club, fracturing his skull, and he expired in a few minutes. O'Neil fled, but was captured the next night, in a house ten miles out of town in the North Branch woods, by Owen Dougherty, Constable, accompanied by Daniel T. Wood, Deputy Sheriff. When he saw the officers he attempted to escape, but was seized by Dougherty, brought into town and lodged in jail. On trial, he was convicted of manslaughter and sentenced to five years in the penitentiary.

In virtue of the law of 1851, establishing a police court, Henry L. Rucker and Frederick A. Howe had been chosen by the Common Council as Police Justices, mainly for the trial of violations of city ordinances and the lower grade of criminal offenses. Besides these there were six other Justices of the Peace, two for each division of the city.

LEWIS C. KERCHEVAL.—One of the most singular characters of the early Bench and Bar of Chicago was the well-known and eccentric Justice of the Peace, L. C. Kercheval, who died, rather unexpectedly, December 8, 1852. Mr. Kercheval was for many years a member of the judicial fourth estate, hanging on the outer circle of the judiciary. Few Judges were more quick to note and resent a contempt or more ready to vindicate the honor of the court. In 1839 he was Inspector of Customs for the port of Chicago, in which office he was succeeded by George W. Dole, in June, 1841. Some time afterwards he was elected and commissioned a Justice of the Peace; and was for many years a conspicuous representative of his class. "He rises before me to-day," says Eastman, "as distinct as when I used to meet him in the streets, straight as a pine, unbending as an oak, defiant and tough as hickory; with his tall, muscular form, his grizzled hair, blue brass buttoned coat, and his soldier-like bearing, proud as Julius Cæsar, and imperious as the Czar, always neatly dressed, with cleanly shaved face, and—a *rara avis* in those muddy times—well polished boots."

He was a person of good natural intelligence and ability and took pride in his official station; but became

badly demoralized by the high-living habits of the period. He slept in his office, kept no records, but tried to discharge his other duties as a Justice with fidelity and in accord with the dictates of natural honor.

PALLAS PHELPS was another quaint character of the period, and with mock dignity nicknamed by some wag of the Bar as "Chancellor" Phelps. He is said to have been here several years before 1840, and he is known to have been admitted to the Bar in 1843. He liked to try his cases in the newspapers, and dispensed with the luxury of an office. With even the best lawyers, cases were not numerous in those days, and Mr. Phelps was able to carry all the papers relating to his current business in his hat. Justin Butterfield, the acknowledged wit of the Chicago Bar, never missed an opportunity of playing on the eccentricities of Phelps. He made frequent references to his commodious office, "as big as all out doors," and would vary the joke by inquiring if he had any room to let. On rainy days when Chicago crossings were marvels of muddy consistency, the wit of the profession was wont to rally its butt, amid the plaudits of admiring listeners, about the beastly condition of his "office." When the first sprinkling cart was brought into requisition here, Butterfield on meeting Phelps saluted him with affected courtesy, which his dupe, proud of the attention, cordially reciprocated, saying, "A fine morning, your honor! A very fine morning!" "Yes, indeed," replied Butterfield, "and I am glad to find you improving the opportunity, Mr. Phelps, to have your office sprinkled." Whenever Phelps had a case, Mr. Butterfield would inquire, with mock gravity, which of the papers he was to try the case in, or before which of them he should file his brief. Mr. Phelps survived this period many years, and finally disappeared from public notice in the whirl and pre-occupation of the great city.

CHICAGO COURTS 1853 TO 1857.—Early in January, 1853, the Chicago Hydraulic Company applied to the Circuit Court for an injunction against the Board of Water Commissioners to stop the further progress of the new water-works, in the South and West divisions, claiming the exclusive right under their charter to supply those sections. The same company had asked for a second injunction to prevent the city from collecting the water-tax. Judge Dickey rejected both petitions. The first could not be granted because exclusive privileges cannot be inferred, and their charter did not expressly confer them. A government, municipal or other, does not debar itself by implication from granting a like power to other corporations. It only debars itself from hindering the first in the exercise of the privileges granted. And although a section of the act establishing the Water Commissioners imposed the obligation of buying the property of the Chicago Hydraulic Company it was not to be understood that such purchase was a condition precedent to the beginning of operations. The remedy of the complainants was by mandamus or other process, not by injunction. The right of the city to collect the water-tax, for similar reasons could not be denied.

February 7, the first term for 1853 of the Cook County Court of Common Pleas, was held in the new court-house which had been begun eighteen months before, and Judge Skinner congratulating the Bar on the privilege of occupying their new room, where there was no fear of the walls or benches breaking down.

THE RECORDER'S COURT.—By an act, approved February 12, 1853, "an inferior court of civil and criminal jurisdiction, which shall be a court of record," was

established under the above name, having "concurrent jurisdiction within said city with the Circuit Court in all criminal cases, except treason and murder, and of civil cases where the amount in controversy shall not exceed one hundred dollars. * * * Said Judge and Clerk shall be elected by the qualified voters of said city, and shall hold their offices five years. * * * All recognizances, taken before any Judge, Justice or Magistrate in said city, in criminal cases, shall be made returnable to said Recorder's Court. * * * All appeals from decisions of Justices of the Peace within said city shall be taken to said Recorder's Court. * * * Appeals may be taken from said court to the Circuit Court of Cook County in all cases. * * * The regular terms of said court shall be held on the first Monday of each month."

The first term of the Recorder's Court began April 4, 1853, with Robert S. Wilson as Judge and Philip A. Hoyne as clerk, both having been duly chosen by the votes of the people, at the regular city election of the previous month, as provided by act of February 12, establishing the court.

March 28, 1853, before Judge Skinner of the Cook County Court of Common Pleas, was argued the request of James H. Collins for an injunction against the Illinois Central Railroad. The petitioner argued in his own behalf, aided by I. N. Arnold and J. M. Wilson, while James F. Joy, of Detroit, was instructed with the advocacy of the railroad's interest. That corporation had purchased from the General Government the made land south of the Government pier. To get to it they had to lay the railroad track through the edge of the lake, back of Mr. Collins's dwelling. He claimed the ownership to the middle of the lake and contested the right-of-way. The final result was that the railroad corporation paid off his claim, as well as the similar one of Charles Walker tried the following year. Several years later, by its "influence" with the General Assembly, it attempted to secure, as against the city as well as the General Government, the whole "lake front" and almost as broad an expanse of the lake itself as was claimed by Mr. Collins, originating a quadrilateral contention which has not yet been definitely determined.

By the expiration of Judge Skinner's term of office there arose a vacancy in the Cook County Court of Common Pleas, to which John M. Wilson was elected April 4, with Walter Kimball as clerk, and Daniel Mc Ilroy as Prosecuting Attorney. A special term of the court was held by the new Judge, beginning May 16, at which was found a large docket, notwithstanding his predecessor's great efforts to keep abreast of the business of his court. The truth is, Chicago's civil and criminal law business has always outstripped its great-est court facilities.

THE MAYOR'S COURT.—About the middle of April Mayor Gray began to hold his court regularly in the basement room on the southeast corner of the court-house, which had been fitted up for the purpose, lightening the work of the Police Justices Rucker and Howe.

About May 1, before Judge Drummond of the United States Court was procured the first conviction of a counterfeiter since the establishment of the court here in 1848. Thomas Hoyne, who had been confirmed as District Attorney, March 22, was assisted by Grant Goodrich in prosecuting this case to a successful issue. The offender was James Campbell, and his crime, the counterfeiting of United States gold coin. Judge Dickey of the Seventh Judicial Circuit, whose limits had meanwhile been restricted to the counties of Cook and Lake, resigned his office because of the press-

ure of private and judicial business, to take effect April 4, 1853. Buckner S. Morris was chosen to fill the vacancy for the remainder of the term until 1855.

Before the United States Court in October was tried the celebrated accretion case known as *William S. Johnston vs. William Jones et al.* It was the fourth trial of the case, which had been decided, once for plaintiff, once for defendants, and once the jury had disagreed. It involved the title to about five acres of land, lying immediately north of the Government pier, in Kinzie's addition. It is all land thrown up by the action of the waters of Lake Michigan, created mainly by the extension of the pier into the lake. The right of the plaintiff to recover depends upon the claim that a portion of his lot, Number 34, in Kinzie's addition, when originally laid out touched the water on the old line of the lake shore. The defendants had been in possession of the property in dispute for some time, and William Jones purchased Lot 35 September 10, 1834, while the Johnston lot was purchased October 22, 1835. Both deeds were from Robert A. Kinzie. The case occupied the attention of the court for two or three weeks, and after four days' arguments from the learned counsel on both sides, the jury returned a verdict for the plaintiff. The case came up again seven years later.

EDWARD S. SHUMWAY, a member of the Chicago Bar, died at Essex, New York, September 24, 1853, aged thirty-five years. He was a brother of Horatio G., who had been in practice here some years, and whom he followed to Chicago. In 1852 they became partners, and Edward S. was admitted to the Bar in Illinois, June 24, 1853. His health failing, he sought rest and restoration in the home of his youth, with the above result.

A contention had arisen between the canal trustees and the city of Chicago as to which corporation should excavate the basin at the confluence of the North and South branches of the Chicago River. After having been in dispute some time the Supreme Court decided in January, 1854, through Judge Treat, that the canal trustees were not under any obligation to perform the work.

ALLEGED INELIGIBILITY OF A JUDGE.—The necessary papers to commence proceedings before the Cook County Court of Common Pleas against Robert S. Wilson, Judge of the Recorder's Court, were served on him January 7, 1854. A month later, February 9, the application for leave to file a *quo warranto* against Judge Wilson was argued before Judge John M. Wilson in chambers. William T. Burgess, relator, and John F. Farnsworth argued for the application, with Thomas Hoyne and Robert S. Blackwell against it. Robert S. Wilson for many years a resident of Ann Arbor, Mich., had come to Chicago in 1850, and was of the law firm of Wilson & Frink for two or three years, when, as has been seen, he was elected Judge of the newly created Recorder's Court in March, 1853. He had meanwhile administered justice with an energetic and impartial hand, and the prison and jail of Chicago had many inmates duly sentenced by him. But the question arose as to his eligibility to the office, not having been a resident here for five years before his election. The main points in the defense were that he was not a Judge under the constitution, and that were it otherwise the relator was not legally entitled to make application for the remedy.

In the case of the People, on relation of William T. Burgess vs. Robert S. Wilson, Judge of the Recorder's Court, for unlawfully intruding into and usurping the office of Recorder, Judge John M. Wilson decided against the motion for a *quo warranto*. The relator

proposed a stipulation to take the case to the Supreme Court, to which the Recorder signified his assent, provided that he could have assurance that a responsible person would appear to prosecute the case, and give security for costs. Two days later Mr. Burgess announced that the case would go up by appeal, under good and responsible bail to prosecute it with all due diligence. In November the Supreme Court affirmed the decision of the lower court, and Judge Wilson continued to discharge the duties of his office with almost universal acceptance. He was generally regarded as specially adapted by his energy and boldness for the judgeship of the Recorder's Court, in which he was a terror to evil doers.

It was provided by the Legislature, February 28, 1854, that Chicago should "pay all fines, expenses and charges for dieting, committing," etc., of all persons convicted by the Recorder's Court. And on February 15, 1855, an act was approved, by which it was ordered that its "rules of practice should conform as near as may be to the rules of practice in the Circuit Court. * * * That in all cases where any suit, either at law or in chancery, shall be commenced in the Recorder's Court of the city of Chicago, and the amount in controversy shall exceed one hundred dollars," such suit might be "transferred to either the Circuit Court of Cook County or to the Cook County Court of Common Pleas," and "all further proceedings in said Recorder's Court shall thereupon cease."

April 18, 1854, Judge Drummond opened a term of the United State courts at his chambers in the Saloon Building; and at the same place a second term was opened by the same, October 3. Neither was a protracted session, and no case of historic interest marred the uniformity of court routine.

Before the Circuit Court, in May, Judge Morris presiding, in the case of Charles Walker vs. the Illinois Central Railroad, a jury was empaneled on the 9th. The suit was similar to that of James H. Collins in the previous year against the same corporation. The railroad track was laid across Walker's water-lot on the shore, to reach the river. Eight days were occupied in taking testimony, and two in the closing arguments of counsel, when on the 20th, the jury returned a verdict of \$20,712 in favor of plaintiff for damages sustained by loss of land taken by the company for their track. A second claim for damages because of nearness of their depot, was denied, the jury being of opinion that the value of Walker's property was as likely to be enhanced as depreciated by that circumstance. The award by the commissioner, from which both parties had appealed, was \$47,800.

Three alleged fugitive slaves, thrown into jail in Chicago on a charge of assault, were taken to Springfield, on a writ of habeas corpus issued by Judge Treat of the Supreme Court, and discharged by him September 22, 1854. Their names were George and John Buchanan, and William M. Graub. Some ten weeks later Colonel Henry Wilton, United States Marshal, arrived in Chicago from Springfield, armed with four writs for the arrest of as many runaway slaves. He ordered out the Light Guards in anticipation of resistance and directed that Company A of the National Guard should be in readiness. The officer in command of the Light Guards took legal advice from ex-Judge Dickey, who assured him that Henry Wilton had no legal authority to issue such an order, whereupon the military withdrew and the Marshal returned to Springfield without the fugitives.

In the Court of Common Pleas an important land

case known as the ejectment suit of D. A. B. Newkirk vs. Rosella Chapron, and involving eighty acres of land in the region west of Ashland and south of North avenues, together with two hundred and forty acres outside the limits, of the estimated value of half a million dollars, was decided for the plaintiff by Judge John M. Wilson, October 6, 1854; and a copy of the opinion requested by the Bar for publication. But ten months later the Supreme Court, in session at Ottawa, reversed that decision.

The Bar lost three of its members by cholera in 1854. Two of these, J. H. Collins and S. L. Smith, have already been sketched. The third was Alexander S. Prentiss.

ALEXANDER S. PRENTISS was born in Cooperstown, N. Y., in March, 1829. He was a son of Colonel John H. Prentiss, who died in 1861. He graduated at Hamilton College before he was twenty-one, studied law under Judge Deino, of Utica, and was admitted to the Bar in New York. In 1851 he came to Chicago, entered the law office of Collins & Williams to familiarize himself with the peculiarities of Illinois law, and was admitted to the Bar in this State, May 3, 1851. Some six months later he formed a partnership with Henry G. Miller, which was dissolved in February, 1853, after which he practised alone until his death, October 13, 1854. The occasion of his early death was due to the marked benevolence and self sacrifice in the presence of public calamity. "When," says Mr. Arnold, "Collins was struck down at the Bar of the Supreme Court, and so many were seeking safety in flight, he remained because he thought he could be of assistance to Mrs. Collins; and again, when Smith was taken, young Prentiss was found ministering to the suffering and afflicted."

The rulings of Judge Morris in the case of George W. Green, for the alleged murder of his wife, covered some new points in the jurisprudence of Illinois, as it was the first case tried here, in which the testimony of experts as to the presence of poison, ascertained by chemical tests after death, was admitted in evidence.

The February term of the United States courts in Chicago, in 1855, was postponed from the 12th to the 19th, awaiting the act of Congress of the 13th, which divided Illinois into two districts. The criminal docket at that first term of what was thenceforth known as the Northern District of Illinois, embraced twenty-five entries, of which two were burglaries, one counterfeiting, one forgery, and the remainder, various minor offenses.

WILLIAM H. BRADLEY, of Galena, arrived in Chicago March 21, 1855, to fill the position of clerk of the United States courts by appointment of Judge Drummond, and has served in that capacity with general acceptance to the present time.

The April term of the Recorder's Court began April 2, with one hundred and fifteen civil and sixty-three criminal cases on the docket. Since its establishment two years before, seven hundred and fifty three indictments had been disposed of, and one hundred and forty criminals sentenced. Of all the decisions from which appeals had been taken only one was reversed. For some months there had been more cases, civil and criminal, tried in the Recorder's Court of Chicago than in any court in the United States, except a few of the police courts of the larger cities. "We did," says Philip A. Hoyne, the then clerk, "a land-office business from 1854 to 1857."

BEER RIOTERS' TRIAL.—Before the Recorder's Court, June 15, 1855, the indictment found against fourteen of the participants in the "Beer Riot" of April 21,

was taken up, and the motion for separate trials overruled. There was some difficulty in getting a jury, and it was not completed until the 18th. Soon after the municipal election in March an issue was joined with the foreigners on the liquor question. March, Mayor Boone issued a proclamation notifying saloon-keepers that the ordinance requiring their places to be kept closed on the Sabbath would be strictly enforced. That was on Saturday; and on Sunday, the 18th, owing to the insufficiency of the notice, there were naturally many violations, and many arrests, but the next Sunday the saloons were very generally closed. At the trial of several of these saloon cases on Monday, March 26, before Justice H. L. Rucker, of the Police Court, the defendants raised the question of jurisdiction. They claimed that as these were criminal offenses, they could be prosecuted only by indictment; and that criminal cases cognizable by Police Court justices meant such cases only as that entire body of the judiciary, known to the Constitution as Justices of the Peace, might try and determine. A few days later, Justice Rucker decided that the Justices had a right to try saloon cases. Meanwhile, at a meeting of the Common Council, March 27, the license to sell liquor was fixed at \$300 from that date to July 1, 1856, when the prohibitory liquor law was to go into effect if sanctioned by the votes of the people at the preceding June election. Some dealers paid the fee and others gave up the business, but most preferred to test the question in the courts and before the people. Frequent meetings were held in North Market Hall by saloon-keepers and brewers, mostly Germans, urged on and encouraged by wholesale liquor dealers and the allied interests generally. They issued for gratuitous distribution a campaign paper known as the Anti-Prohibitionist. Meanwhile Rucker's decisions continued to be given in favor of the city with aggravating uniformity. Early in the contest it was announced in behalf of the defendants that whenever an adverse decision should be rendered, the case would be taken by successive appeals to the Supreme Court. A large number of these cases were to be tried on Friday, April 20, before Justice Rucker. During the week active preparations were made by the malcontents for a demonstration in force, either in the hope of overawing the court, or with a view perhaps to serve a sort of mob-law notice on the municipal administration just elected on the Know-Nothing ticket, that they should not expect to force their puritanical notions down the foreign throats, where beer and liquor had been wont to flow unburdened by so heavy a tax. On that day, about one hundred men, headed by a drummer, marched through some of the streets and took up a position on Randolph Street, opposite court-house square, where they remained until it was learned that the cases would not then be heard, as Mr. Rucker was out of town. On Saturday, April 21, the demonstration was repeated, when the crowd came into collision with the police, who had been ordered to disperse them. As the mob rounded the corner of Clark and Randolph streets about eleven o'clock, they were met by the officers of the law when about a dozen shots were fired by the more hasty spirits in the crowd. Peter Martin an alleged rioter, was killed; J. H. Reese and J. H. Kedzie, two unoffending citizens, were wounded; George W. Hunt, a policeman, was so severely injured in the arm that amputation became necessary, and Nathan Weston, another officer, was also dangerously wounded. Some seventy or eighty "rioters" were arrested and jailed, but only fourteen were held, indicted and brought to trial. The Light Guard, Flying Artillery, and a num-

ber of special policemen sworn in for the occasion, patrolled the streets for three or four days and nights until their own excitement, the alarm of the authorities and the apprehensions of non-combatants had subsided. The liquor-dealers published a card May 2, denying the allegation that the money contributed by them was designed to be used in resisting the laws; their purpose was to test the legality of the new license law, which was personally oppressive, and from a business point of view too restrictive of trade. The Anti-Prohibitionist, they also said, was published for a similarly broad and statesmanlike reason, to oppose an innovation unheard of in all history. The trial begun June 15, and closed June 30, with the acquittal of all except two, who had been more clearly identified with the alleged violence to the police, or had been more feebly defended. These were Farrell and Halleman, both Irishmen, who were sentenced to one year in the penitentiary, but were granted a new trial by Recorder Wilson, July 11, on the ground of interference with the jury by the constable in charge. They were not again brought to trial, it seeming little less than a travesty of justice that in a sedition notoriously German the only victims should be two Irishmen, accidentally caught in the crowd, without any evidence of previous affiliation with the malcontents.

A CONTESTED JUDICIAL ELECTION.—By an act of the Eighteenth General Assembly in 1854 a system of Police Magistrates was established for the whole State. At the municipal election in Chicago in 1855 Police Justices were voted for without reference to the new institution. It was supposed that Messrs. Ward, Akin and King were elected by a handsome majority, having each received about three thousand votes, and beating their competitors, Stickney, Magee and Howe. A few votes were cast for police magistrates, of which Calvin De Wolf received thirty, W. H. Stickney, twelve, and Nathan Allen, twelve. These received the commission of the Governor, as having been elected in conformity with the law of 1854. Mr. Stickney, having been one of the three unsuccessful candidates on the Police-Justice ticket, resigned March 17, not wishing to profit by a mere technicality. Mr. De Wolf was a Justice of the Peace at the time, and continued to act, the second commission being mere surplusage. Mr. Allen served under the commission for the West Side. Thomas G. Prendergast was substituted for Mr. Stickney as Police Magistrate for the North Side. Mr. De Wolf discharged the same functions on the South Side. The case was afterward taken by agreement to the Supreme Court, which decided that either title for the office was legal, as the difference in words could lead to no misunderstanding of the official station to which the people aimed to elect. Accordingly it ordered that commissions should be issued to the three gentlemen who had received a majority of the popular vote, without prejudice to the three already commissioned. A double supply of Police Magistrates for the remainder of the term was thus instituted.

At the State judicial election in June George Manierre, an industrious and well-read member of the Chicago Bar, was chosen for the Bench of the Seventh Circuit, embracing then only the counties of Cook and Lake. He was commissioned as its Judge June 25, 1855, for six years. Cook County then had four terms of the Circuit Court annually. Two were regular or "trial" terms on the first Monday in May and the third Monday in November. Two were special or "vacation" terms on the first Mondays in March and October. With this extra provision the docket continued heavy, and Judge Manierre's extreme carefulness in weighing evidence,

while it guaranteed all possible safeguards against injustice, did not tend to decrease the rapidly increasing business of the Chicago courts.

At an adjourned term of the United States courts, extending from October 15 to December 8, 1855, it was found that they too, in less than eight years from their introduction here, were involved in the same destiny as the other Chicago courts, an overloaded docket. After disposing of one hundred and fifty-three cases, there remained four hundred and one in the Circuit, and ninety-eight in the District Court. Not only did the more able members of the Chicago Bar find frequent occasion to plead before these courts, but several eminent counsel from other cities were often in attendance. Among the most distinguished of these were Abraham Lincoln, O. H. Browning, Archibald Williams, Joel Manning, B. L. Edwards, Charles Ballance, E. N. Powell, H. M. Weed, A. L. Merriam, J. K. Cooper, N. H. Purple, W. F. Brian, J. W. Drury and James Grant.

At the January term of the Recorder's Court, in 1856, thirty-four convicts were sent to the penitentiary, and court adjourned to March, when there was a short term and a similar adjournment to May 5, when the Judge charged the Grand Jury especially against lottery tickets and gambling. Toward the close of the year it is again noted that this court kept its docket well cleared, there being but a few cases civil or criminal undisposed of at the early close of the November term.

At the February term of the United States courts in 1856, two weeks were consumed in the famous case of *Kingsbury vs. Brainard*. The lot on the northeast corner of Clark and Randolph streets, where now stands the Ashland Block, had been leased to the defendant for twenty years by J. B. F. Russell, agent for the plaintiff, at an annual rental of \$2,000, of which half was to be actually paid and the other half retained as purchase money for the buildings, which at the end of the lease were to revert to the owner of the lot. The plaintiff brought suit, on the ground that the agent had no right to grant so unusual a lease. The jury, however, found a verdict against him, becoming satisfied that some others had declined to accept the same offer, and that the lease had virtually been ratified before the rapid increase in values had shown its alleged injustice.

March 21, 1856, by a rule of court, Judge Drummond ordered three "adjourned" terms of the United States courts in Chicago, on the first Mondays of March, May and October, in each year, in addition to the two regular terms, on the first Monday in July and the third Monday in December, previously provided by act of Congress. At the October term in 1856, it was again noted that notwithstanding these apparently abundant provisions, there was a large docket in admiralty, chancery and common law, as well as patent cases.

GEORGE W. MEEKER was born in Elizabethtown, N. J., about 1817. In infancy one of his lower limbs was paralyzed, rendering necessary the use of crutches for the rest of his life; he was otherwise much above the average in manly beauty. Due attention was paid to the cultivation of his intellectual powers, and he became not only a well read lawyer, but a very thorough scholar, familiar with the English and French, as well as the Latin and Greek classics. He came to Chicago about 1837, and studied law with Spring & Goodrich until admitted to the Bar, December 16, 1839. As early as February 22, 1840, he is found in partnership with George Manierre, the firm having been formed about January 1. He held the offices of United States Commissioner and Clerk of the United States Court. He died suddenly on April 2, 1856.

fatigable Mr. Manierre, but by reason of his physical infirmity he never ventured to address a jury, although naturally persuasive, and winning. About 1845 he was appointed United States Commissioner, from which he derived a considerable increase to his income for about ten years. He was appointed deputy by William Pope, clerk of the United States courts, in 1850, whereupon the partnership with Manierre was dissolved. He was an active member of the Law-Library Association, and became its secretary in 1854. Early in 1855 he surrendered his official position in these words: "Being unwilling to aid in enforcing the provisions of the fugitive-slave law, I hereby resign the office of United States Commissioner for a long time held by me." April 2, 1856, he was found dead in his room, having retired apparently in his usual health the previous evening. The coroner's jury returned the verdict, "Died of cerebral and pulmonary conjection." He was a favorite in general society, as well as with the profession; and a meeting of the Bar, on the day after his death, paid a generous and well deserved tribute to his memory.

In May, 1856, Judge Caton of the Supreme Court refused to grant an injunction to prevent the city of Chicago from raising the grade on Lake Street.

At a vacation term of the Circuit Court in October, Judge Manierre found on the docket of Cook County no less than one thousand three hundred and sixty-eight common-law, and two hundred and sixty-eight chancery cases.

POLICE COURT.—By an act of February 16, 1857, amendatory of the act of February 14, 1851, by which such courts first received State institution, among other changes, and emendations in various lines of municipal government police court legislation was more fully and carefully elaborated, the chief new features being as follows: "After the next municipal election, the Common Council of said city shall designate the two or more Justices of the Peace, now provided for under the act to which this is an amendment, * * for one year; * * one of them shall hold a session of said Police Court daily (Sundays excepted), at the city hall. * * The said justices may be compensated by a salary, to be fixed by the Common Council, to do the business of said Police Court, in lieu of all other compensation or fees whatever. * * There shall be elected by the people at the next municipal election, and biennially thereafter one police court clerk. * * He shall have a fixed salary, * * may appoint deputies. * * The Common Council, if it think proper, may by ordinance provide for the appointment of a prosecuting attorney for said Police Court. * * Appeals and change of venue may be taken from the Police Justices in all cases, the same as before other Justices of the Peace; but all such appeals shall hereafter be taken to the Recorder's Court of the City of Chicago."

PATRICK BALLINGALL, by birth a Scotchman, came to America while a young man, about the year 1833, and made his appearance in Chicago in that year, as in 1848 he incidentally claimed a residence of fifteen years. He, however, attracted no attention that is now traceable until February 13, 1835, when he is found on record as a disputant before the Athenæum of that day. Of limited education, and no influence, notwithstanding his lofty aspirations, he first filled the modest position of bar-keeper. In 1836 he entered the law office of Spring & Goodrich as a student, remaining about two years, when he removed to DuPage County, where he is found filling several offices in 1839. He was chosen clerk of the Commissioners' Court, and appointed clerk of the Circuit Court by Judge Smith. He was elected secre-

tary of the Settlers' Society for Mutual Protection, October 28, 1839, which he resigned the ensuing spring. As a lawyer his name does not appear on the list of the Supreme Court until March 30, 1841, and he does not appear to have actively engaged in the practice of law until after the resignation of Judge Smith, December 26, 1842, when both established a law firm in Chicago. In 1845 Smith & Ballingall became Thomas & Ballingall, Judge Jesse B. Thomas taking the place of his deceased father-in-law, Judge Theophilus W. Smith. In that year too Mr. Ballingall became Prosecuting Attorney, and as such served with distinguished credit for many years, eliciting a very flattering published indorsement from Judge Dickey, March 4, 1848. In 1847 he was one of the Cook County delegates to the State Constitutional Convention at Springfield. About 1848 he formed a partnership with Daniel McIlroy, but from 1850 to his death in 1858 he practised alone. He was chosen City Attorney in 1854, but was beaten in 1855 by his "Know-Nothing" competitor. His wife survived him, and there were no children. His early opportunities were not good, but he was naturally smart and quick, and grew to be a fairly effective lawyer within a rather narrow range, which was mainly that of a successful public prosecutor. Like several of his contemporaries he was too convivial in his habits, but unlike some he generally remained master of himself.

An alphabetical list of lawyers who practiced in Chicago at the close of 1857 is here given:

Abbott, Abial R.	Burnham, Dyer N.
Adams, Francis	Cadman, William S.
Akin, Andrew	Cameron, Charles S.
Allen, Nathan	Cameron, William R.
Anderson, Jonathan R.	Carpenter, Richard B.

MEDICAL HISTORY.

In the following account of the medical practitioners of early Chicago, no attempt has been made to discriminate between those who were duly qualified physicians and those whose claim to the title was empirical. The fact that an individual represented himself, by announcement or advertisement, as prepared to heal diseases, has been accepted as *prima facie* evidence of his having some claim to enrollment among the followers of Galen or Æsculapius.

The earliest authentic account of the existence of a disciple of the medical profession is found in a muster roll of Capt. Nathan Heald's company of the First Infantry,* for the two months from November 30, 1810, to December 31, 1810, wherein appears the name of

John Cooper, surgeon's mate, appointed June 13, 1808; on duty at Fort Dearborn, December 31, 1810; the muster roll being certified to by Phillip O'Strander, Lieutenant commanding the company, and John Cooper.

Dr. Cooper was succeeded by Dr. Isaac Van Voorhis, one of the slain in the massacre of 1812, of whom the following account is given in the various works referred to:

Dr. Isaac Van Voorhis, born February 22, 1790; killed at the massacre at Fort Dearborn, August 15, 1812; unmarried.†

The following extract is from the "Field-Book of the War of 1812," by Benson J. Lossing: "In the spring of 1812 the garrison at Fort Dearborn was commanded by Captain Nathan Heald, assisted by Lieutenant Linai T. Helm and Ensign George Ronan. The surgeon was Dr. Van Voorhis. The garrison consisted of fifty-four men. The massacre of Fort Dearborn, or Chicago, took place August 15, 1812. In this terrible tragedy in the wilderness, fifty-five years ago, twelve children, all the masculine citizens except Mr. Kenzie and his sons, Captain Wells, Ensign Ronan, Surgeon Van Voorhis, and twenty-six private soldiers, were murdered. Dr. Cooper, of Poughkeepsie, N. Y., was the immediate predecessor of Dr. Van Voorhis at Fort Dearborn. They were natives of the same town, Fishkill, Dutchess County, and were class-mates. Van Voorhis was a young man of great powers. Dr. Cooper left the fort in 1811, tendered his resignation and left the army."

In an obituary notice published in the Political Index, November 17, 1812, at Newburg, Orange Co., N. Y., is the following: * * * "Among the slain was Dr. Isaac Van Voorhis, of Fishkill, surgeon in the army. He was a young man of great merit, and received his early education at the academy in this village. He possessed an enterprising and cultivated mind, and was ardent in the support of the interest and honor of his country."

After the life of Dr. Van Voorhis had been sacrificed for his country, the services of a surgeon were needed to extract a ball from the arm of Mrs. Nathan Heald, and Mr. Kinzie requested an Indian chief, who

* Fort Dearborn, Third Paper, by Hon. John Wentworth, Fergus Historical series; compiled from records in the War Department, Washington, D. C.
† From "Notes on the ancestry of Major William Roe Van Voorhis," in possession of the Chicago Historical Society.

was reputed to be a medicine man, to perform the operation; but he declined, stating that qualms in the cardiac region precluded the exercise of his surgical skill. Mr. Kinzie then performed the operation, using his pen-knife for the purpose; thus identifying the Kinzie family with the surgical profession, in addition to the various other occurrences whereby this family are so intimately connected with the events that transpired in the history of Chicago, and placing John Kinzie on record as the operator in the first surgical operation in Chicago. Another amateur is stated to have been Monsieur du Pin, a trader, whose pharmaceutical and pathological knowledge was exercised to ameliorate the sickness of the captives in the hands of the Indians.

The next gentleman who was a member of the medical profession in Chicago was Dr. Alexander Wolcott, who was born February 14, 1790, at Windsor, Conn., being the son of the second Alexander and Frances Burbank Wolcott, and graduated at Yale College, in 1809.* He was appointed surgeon's mate March 25, 1812,† and is designated in Schoolcraft's "American Lakes" (pp. 77 and 389) as having accompanied General Cass and Henry Schoolcraft in their voyages from May 26 to August 31, 1820; the services rendered by Dr. Wolcott being the subject of unstinted eulogium. Dr. Wolcott was the Indian Agent at Fort Dearborn in 1820, he having advanced in that year, in his official capacity, \$4,258.59‡ and in the year 1821 \$722.14§ and "between the first of January and the 31st of August, 1822, there was employed by the superintendent of Indian trade, at Chicago, Alexander Wolcott, at \$108.33 per month."¶ Dr. Wolcott married Ellen Marion Kinzie, the daughter of John Kinzie, as appears by the record in Lewiston, Fulton Co., Ill., "by John Hamlin, J. P., July 20, 1823, Alexander Wolcott and Ellen Marion Kinzie." The lady was born in 1805, being the first white child born in Chicago, the place of her birth being the home of John and Eleanor Kinzie on the North Side. Dr. Wolcott retained the position of Indian Agent until his death, in 1830, receiving, in 1826, the salary of \$1,300 per annum, as appears by the official register of the United States for that year. After his death his widow married Hon. George C. Bates, of Salt Lake City.

During the residence of Dr. Wolcott, there was another medical practitioner at Fort Dearborn; Assistant Surgeon Thomas P. Hall, who is designated in the Army Register for 1823 as on duty at Chicago, and in the Register for the ensuing year as at New York Harbor.

From records in the War Department, a syllabus of which appears in Hon. John Wentworth's "Fort Dearborn," C. A. Finley is stated to have been assistant surgeon at the fort from October 3, 1828, until December 14, 1830; and the authority for his presence in that capacity appears to have been the following order:

ORDER NO. 44. A. G. O., WASHINGTON, 19 Aug., 1828.

(Extract.)

In conformity with the directions of the Secretary of War, the following movements of the troops will be made without delay:

* Wolcott Genealogy; Chicago Historical Society.
† American State Papers; Military affairs, Chicago Historical Society.
‡ American State Papers, Indian affairs, Vol. II., 312, Chicago Historical Society.
§ Ibid, p. 314.
¶ Ibid, p. 403.

1. Two companies of the 5th Regiment of Infantry to re-occupy Fort Dearborn, at the head of Lake Michigan.

4. * * * The Surgeon-General to provide medical officers and suitable hospital supplies for the posts to be established and re-occupied.

By order of

MAJOR-GENERAL MACOMB.

(Signed)

R. JONES, *Adjutant General.*

Companies A and I, of the 5th Infantry, being designated as having arrived on October 3, 1828, the reasonable presumption is that Dr. Finley was the medical officer designated by the Surgeon-General to accompany the troops to Fort Dearborn. Prior to the date that Dr. Finley is reported to have been relieved from duty at the fort, Dr. Harmon arrived in Chicago.*

DR. ELIJAH DEWEY HARMON was born August 20, 1782, in Bennington, Vt., and pursued his medical studies at Manchester, under the auspices of a celebrity in the profession named Benjamin Swift; commencing to practice in the fall of 1806, at Burlington, Vt. On October 30, 1808, Dr. Harmon married Miss Welthyam Loomis. During the war of 1812, he was a volunteer surgeon on board the "Saratoga," Commodore McDonough's flag-ship, and was with that officer in the celebrated naval engagement of Plattsburg, September 11, 1814; returning to Burlington at the close of the war and resuming his practice. On January 22, 1816, Dr. Harmon was appointed Postmaster at Burlington, but how long he held the position is unknown. In 1829 the Doctor suffered some pecuniary reverses and resolved to attempt recuperation in the Great West. He arrived at Chicago in May, 1830; his family following him the succeeding year. He took the place of Dr. Finley, who was absent, and was installed at the fort as post surgeon, performing the duties of that office in addition to such private practice as was attainable in those days. On the night of the 10th of July, 1832, General Scott arrived with troops, on the steamer "Sheldon Thompson," among whom the cholera had manifested itself—six cases developing on the morning of July 9, subsequent to which the disease quickly attacked the whole command. In consequence of this the two companies in the fort antecedent to the arrival of General Scott were isolated and placed under the charge of Dr. Harmon, who ascribed his success in the treatment of the cholera cases that broke out in the sequestered troops to abstinence from the use of calomel by him. During this period historians relate that a misunderstanding occurred between Dr. Harmon and the "old martinet," relative to the practice of the Doctor; General Scott requiring him to devote his medical skill exclusively to the military assigned to his charge, which the Doctor refused to do. In the winter of 1832, Dr. Harmon performed an amputation upon a half-breed Canadian, who had frozen his feet while transporting the mail upon horseback from Green Bay to Chicago; this being the first surgical operation of any importance performed. One foot and a portion of the other were successfully removed. A case of rusty instruments, a library of about one hundred volumes and a stock of medicines brought from the Green Mountains, constituted the stock in trade of the Father of Medicine in Chicago. His residence was a cabin of hewn logs; his larder, a repository of flour, bacon and coffee. But the epigastric regions of pioneers do not long for *paté de foie gras* nor Chambertin or Tokay, and the doctor's practice increased and multiplied as rapidly as Jacob's cattle. Dr. Harmon pre-empted one hundred and forty acres of land, the northern boundary of which was in

* These particulars were obtained by the courtesy of Mrs. A. G. Burley, a daughter of Dr. Harmon.

the vicinity of Sixteenth Street, and upon a portion of which plot the home of the Burley family—1620 Indiana Avenue—is now situated. In 1834, Dr. Harmon migrated to Texas, and until the time of his death—January 3, 1869—divided his sojourns between that State and Chicago. Dr. Harmon had nine children, four of whom died in infancy. The remaining five are Charles Loomis Harmon, Isaac Dewey Harmon, Harriet Harmon, Lucretia Harmon, and Welthyam Loomis Harmon. In honor of the Doctor, Harmon Court received its name.

In Order No. 17, dated Adjutant-General's Office, Washington, February 23, 1832, Assistant Surgeon DeCamp, on duty at Madison Barracks, was assigned to duty at Fort Dearborn, and ordered to accompany the troops sent to that post. He appears upon the roster of the fort as having arrived thereat (with companies "G" and "I" of the Second Infantry, under command of Major William Whistler), on June 17, 1832; remaining until November 23, following. Dr. Samuel G. I. DeCamp was appointed Assistant Surgeon, October 10, 1823; promoted Surgeon December 1, 1833; retired from the army in 1862, and died at Saratoga, N. Y., September 8, 1871. From a report made by Dr. DeCamp during the prevalence of the cholera at Fort Dearborn in 1832, it would appear that he was engaged in the performance of his official duties at the time, and he states that one-fifth of the entire force of one thousand soldiers were admitted into the hospital within a week, afflicted with this frightful scourge. In the roster to which allusion has been heretofore made, it is remarked that "Fort Dearborn having become a general hospital, on the 11th July last (1832) no returns were rendered until its re-occupation."

On February 3, 1833, Assistant Surgeon Philip Maxwell is reported as having assumed his official duties at the fort. He was a witness to the Indian treaty on September 26 of that year.

PHILIP MAXWELL was born at Guilford, Windham Co., Vt., April 3, 1799, and subsequent to his graduation, commenced the practice of medicine at Sackett's Harbor, N. Y. He temporarily relinquished practice upon being elected a member of the State Legislature. After his appointment and arrival in Chicago, as Assistant Surgeon, he remained in that military position until the abandonment of the fort on December 29, 1836. Dr. Maxwell was promoted to Surgeon, July 7, 1838, and subsequently served with General Zachary Taylor. After his resignation from the army, Dr. Maxwell practiced medicine in Chicago, being mentioned in Fergus's Directory for 1839 as at the garrison, and in the directories from 1844 to 1847, as a physician, with his office at the corner of Lake and Clark streets. In the directory for 1848, he is specified as being in partnership with Dr. Brock McVickar, subsequent directories not mentioning his association with any one in the practice of his profession. Dr. Maxwell is described as having been of stature approximating to the Anakim and to have been Falstaffian in his abdominal rotundity. In his jocundity, his geniality and the simulation of stern demeanor, beneath which he carried the kindest of hearts, he has been likened to "Lawrence Boythorn"—Charles Dickens's prototype of Walter Savage Landor. The Chicago Republican of September 13, 1868, thus justly speaks of Dr. Maxwell: "It is not easy to escape his name and influence in turning over the pages of twenty years of the growth of Chicago. He was one of nature's noblemen. He was of that choice material that God makes to follow the first rough work of the pioneers in laying the foundations of new society. By

education and training, learned, urbane and intelligent, with an acute brain, a large heart, a warm hand, with a geniality that made sunshine wherever he went; quick to conceive, skillful to execute, Dr. Maxwell's name is upon the most solid pillar of our growth. From Chicago he went under Government orders to the Florida war, and thence returned only to civilian duties in which he here passed the rest of his life. His home was here for several years. Though often on our streets, and never relinquished as a citizen, he later removed to a beautiful country place, looking out on Geneva Lake, Wisconsin, where, since his death, a few years ago, his family still reside. Dr. Maxwell was a leading spirit here in the old garrison times. He mingled largely and controllingly in the growing social element." Dr. Maxwell died on the 5th of November, 1859, at the age of sixty years.

Dr. Valentine A. Boyer next entered the ranks of the medical pioneers, on May 12, 1832; and achieved military honors May 15, 1840, being then commissioned assistant surgeon of the City Guards, 60th Regiment, on that date.

In 1832, Dr. Edmund Stoughton Kimberly arrived here. He was clerk of the town meeting to decide whether Chicago should be incorporated, and voted in favor of that measure. He was also elected Trustee of the town August 10, 1833. Dr. Kimberly died in Lake County, Ill., October 25, 1874, aged seventy-two years.

Dr. John Taylor Temple was an early practitioner in Chicago. He was a voter at the election held August 10, 1833. He graduated at the Middlebury College, Castleton, Vt., December 29, 1830. The first autopsy made in this city was performed by him. Dr. Temple, however, is more intimately identified with these early days by reason of his stage line than of his medical practice; he having secured the contract for carrying the mail between this city and Ottawa, and making the first trip January 1, 1834, on which occasion the Hon. John Dean Caton was a passenger. The bills for his stage line were printed at the Democrat office. An advertisement that appeared in the American on August 6, 1836, specifies that "John T. Temple & Co., are proprietors of a stage line from Chicago to Peoria;" that "the through trip is made in two days—to Ottawa the first day;" that "the stage leaves Chicago at four in the morning and arrives at Juliet* in two," and that "seats can be taken at Markle's Exchange Coffee House." The same paper states, April 1, 1837, that Dr. Temple "has sold his stage line," and in another issue the Doctor advertises, November 17, 1840, that he "has resumed the practice of medicine at 214 Lake Street." Dr. Temple afterward became a homeopathic practitioner and founded the St. Louis school of homeopathic practice, dying in that city, February 24, 1877, at the ripe age of seventy-three years.

George F. Turner, assistant surgeon United States Army, was one of the witnesses to the Indian treaty at Chicago, on September 26, 1833. This officer was appointed to that rank on July 23, 1833; promoted to surgeon United States Army, January 1, 1840, and died at Corpus Christi, Texas, October 17, 1854.

In the fall of 1833 Dr. William Bradshaw Egan came to the city and "commenced acting well his part;" to use the phraseology of his favorite author. In the Doctor's unflinching confidence in the future of Chicago; in the unhesitating manner with which he embarked his means upon the then ebb-tide of the city's prosperity, he was a typical pioneer. Dr. Egan was born near

* In early days the name of Joliet was Juliet, and one of the early changes of "post-offices" states that the name of Juliet is to be changed to Romeo; the change appears to have never been made.

Lake Killarney, County Kerry, Ireland, September 28, 1808. At the age of fifteen he went to Lancashire, England, and commenced the study of surgery and medicine under the tuition of Dr. Maguire, also visiting the English metropolis in pursuit of medical knowledge. Returning to Dublin a few years afterward, he attended a course of medical lectures there and "walked" the Dublin Lying-in Hospital, and then embarked for

Canada. Shortly after his arrival in Quebec, he obtained a situation as teacher in one of the schools in that city, and afterward was a preceptor in Montreal and New York, and in the grammar school of the University of Virginia, at which latter academic institution he also attended medical lectures for two terms. In the spring of 1830 he was licensed by the medical board of New Jersey, and inaugurated his professional career in Newark and New York. On January 21, 1832, he was married to Miss Emeline Mabbatt, who accompanied the Doctor in his pilgrimage to this city. On the 22d of August, 1834, Dr. Egan was appointed on the health committee for the South Division, and on the 4th of July, 1836, when the ground was broken for the construction of the Illinois & Michigan Canal, he was selected to deliver the oration. While he was performing this office he observed that at a spring near by were a large number of people. The spring had been natural-

ized by the addition of lemons, sugar and whisky. Turning to them, he said: "Drink deep, or taste not the Pierian spring; there shallow draughts intoxicate the brain, and drinking deeply sobers it again." It is understood that his advice was followed, with results other than those ascribed to the Pierian fount. Dr. Egan, during the primary years of his residence here, purchased the Tremont House block of General Beau-bien, and thereon erected five houses, which were designated as Egan's Row. In his real estate transactions, the Doctor was conspicuous, and by connection with him in his operations many families laid the foundation for subsequent wealth and prosperity. In the adjustment of the canal claims by the Legislature of the session of 1841-42, the Doctor did excellent service. He was a delegate to the first Democratic convention held at Joliet, May 18, 1843; was Recorder of the city and county in 1844, and was a Representative to the State Legislature during the sessions of 1853-54. In his jocose temperament, his classical education, his kindly generosity and his trenchant sarcasm, he was an Orestes to the Pylades of Dr. Maxwell. Dr. Egan died in this city October 27, 1860.

Dr. Henry B. Clarke migrated to Chicago in 1833, and advertised in the American of February 18, 1837, that his office was at Collins & Butterfield's on Dearborn Street. His residence is stated to have been a large white house near the lake, about where Fourteenth Street is now situated.

Dr. Henry Van Der Bogart graduated at the medical college in Fairfield, N. Y., in the winter of 1833; came to Chicago in the spring of 1834, and died at Naperville on April 8, 1835, aged twenty-five years.

Dr. W. Clarke appears to have been a resident here early in 1834, as a letter is advertised for him in the letter-list published in the Democrat in January of that year, and in the account books of Hibbard Porter * this gentleman is debited with purchases made from June to December, 1834, comprising a coffee-mill, cord and cloth.

Dr. Peter Temple was an early practitioner in Chicago, and advertised in the Democrat of July 7, 1834, that he was located at Franklin Street, near Lake, adjacent to the dwelling of Dr. J. T. Temple, and was there to practice dentistry. In August, 1834, he became associated with Dr. John T. Temple in the practice of medicine, Dr. Peter Temple attending to such cases as were exclusively dental. A Dr. Temple is stated by Colbert to have been appointed on the first permanent Board of Health in Chicago June 19, 1835. † Dr. P. T. Temple is stated in the American to have been one of the executive committee of the Chicago Bible Society August 22, 1835, and Dr. Peter Temple was one of the secretaries of the canal meeting November 7, 1835. The latter left Chicago in 1837, and after practicing medicine according to the regular school for twenty years, was led to practice homeopathy through the influence of his brother. This gentleman is now (1883) a resident of Lexington, Mo.

Dr. William H. Kennicott was engaged in the dental art in 1834, an advertisement that appeared in the Democrat determining his presence here on May 25 of that year at the Eagle Tavern. He pursued the practice of dentistry for many years in this city. Of an old horse that belonged to him in early years the following anecdote is told: After a long career of usefulness the equine, becoming unfit for service, was turned loose to shift for himself, and, finding some

choice picking in the court-house square, he made that a resort. The citizens recognized the old animal and, compassionating his condition of marasmus, assembled and determined upon giving the veteran a donation party. At the appointed time they flocked to the square with provender and building material. A shed was constructed by the embryonic humane society, and the food stored therein. Then a procession was formed, with the equine beneficiary at its head, and after parading the streets to the martial music of a fife and drum, the steed was installed in his stable, where he existed until spring, when Death mounted the pale white horse, and rode him to the happy hunting grounds. Peace to his mane[s].

Dr. John W. Eldredge came to Chicago in the spring of 1834, a graduate of the medical college of Fairfield, N. Y. He was born in Hamilton, Washington Co., N. Y., October 2, 1808; commenced the practice of his profession in Pittsfield, Penn., continuing therein upon his arrival in Chicago, and has since his arrival been intimately identified with the measures relative to the prosperity, social, medical and political, of

the city. Dr. Eldredge was married in Chicago in the year 1840 to Miss Sophia Holton, and has one daughter, Hette, the wife of George C. Clarke. The objection that Dr. Eldredge had to the least appearance of publicity or notoriety has been regarded by the compiler; but the life of the Doctor is too well known by the citizens of past and present Chicago to require comment. His works speak for themselves; and now that he has passed from our midst they remain the most durable monument to his memory. Dr. Eldredge relinquished the practice of his profession in 1868, after which he lived in the retirement of private life until the date of his death, January 1, 1884.

Dr. Josiah C. Goodhue came from Canada about this period; and on September 1, 1835, was engaged with Dr. J. H. Barnard in the practice of the medical and surgical profession, with their office on Lake Street, three doors west of the Tremont House; and on February 15, 1836, Dr. Goodhue formed a copartnership with Dr. S. Z. Haven. Some time subsequently he removed to Rockford, Ill., where he died from the effects of an accident.

Charles Volney Dyer, son of Daniel and Susan Olin Dyer, was born in Clarendon, Vt., on June 12, 1808, and was the youngest but one of ten children. When he entered college he pursued medical studies to the exclusion of the classical course, and graduated, December 29, 1830, with high honors at Middlebury College. In February, 1831, he commenced practice in Newark, Wayne Co., N. J. Leaving there he migrated to Chicago, where he arrived in August, 1835. In 1837, he married Louisa M. Gifford, of Elgin, from which union six children were born, three of whom still survive; Stella Louisa, born November 22, 1841, now Mrs. Loring; Charles Gifford, born December 29, 1845, and Louis, born September 30, 1851. In 1863, Abraham Lincoln, as a personal compliment to Dr. Dyer, gave him the appointment of Judge of the Mixed Court for the suppression of the African slave trade; Dr. Dyer having been, for years previously, one of the prominent

* In possession of the Chicago Historical Society.

† This was Dr. John T. Temple.

officers of the celebrated "Underground Railroad" of Chicago, and had helped in rescuing from slavery and the fangs of human blood hounds who sought to overtake them, thousands of fugitives. To a resident of the State that gave birth to Abraham Lincoln, it would seem suffi-

cient eulogy to say that a man was prominently connected with the underground railroad; no more grateful reflection can be entertained by Dr. Dyer's descendants, than that many former slaves can point to his grave and say "there lies the man who helped me to life and liberty." Judge Dyer died April 24, 1878, at the residence of his adopted daughter at Lake View, Lake Co., Ill.

In the American of May 28, 1836, Dr. D. S. Smith* offered his services, in an advertisement dated May 25, 1836, at an office with S. Abell, on Lake Street, one door west of New York House; on August 16, 1837,

the Doctor occupied an office adjoining Clarke's drug store on Clark Street, near Lake, first door north of Collins & Butterfield's office.

It has been found impracticable to chronometrically designate the physicians whose names appear as identified with the germinating metropolis at this period of its history; a fixed date, 1839, has therefore been selected; and those who were here at that time, or prior thereto, are mentioned in this paragraph with such data as is extant to determine the priority of their coming.

Mrs. Robertson, the first female obstetrician, was here in 1839, and for many years subsequently, and may justly be termed the feminine Hippocrates of Chicago. Dr. J. Jay Stuart, with J. D. Caton, second door east of Breese & Sheppard's, Lake Street, advertised in the American of June 11, 1836. Dr. Stuart, in 1848, was in partnership with H. K. W. Boardman, and died August 8, 1850. Dr. H. Spring died November 10, 1835, aged thirty-two; Dr. W. Spring advertised his office with G. Spring in the American of September 12, 1835; Dr. Levi D. Boone, a distant relative of the celebrated Daniel Boone, was here in June, 1836; was in partnership with Charles V. Dyer in 1839, and practiced for a long time in Chicago, subsequently entering the real estate business. Dr. W. G. Austin, on August, 7, 1835, in American, notified the citizens that he had commenced the practice of medicine, and opened an office on Lake Street, near the post-office; and that he practiced the botanic healing art, "which is not connected by ties of consanguinity to the Thompsonian system"—a nice distinction. On December 5, 1835, Dr. Austin announced that he had vegetable medicines for dispensation on Lake Street, three doors east of Cooke's coffee-house, and on October 10, 1836, entered into partnership with Dr. W. B. Dodge, with their office on

* For fuller particulars concerning Dr. Smith see the account of Homeopathy in Chicago in this chapter.

Lake Street, opposite Rice's coffee-house. This co-partnership was dissolved April 3, 1837. Dr. John Brinkerhoff, subsequently of the firm of Brinkerhoff & Penton, druggists, cautioned persons against purchasing a note given by him in favor of Samuel Ressigne, in the American of December 3, 1836. Dr. J. H. Barnard advertised in the American of June 8, 1835, under date of June 3. Dr. J. C. Bradley, surgeon dentist, proffered his odontological ability in the same paper, under date of June 13, 1835, and was subsequently in business with Mr. Kennicott. In the Democrat of August 24, 1836, is an advertisement of Dr. Daniel Brainard, who proffered his services to citizens of Chicago and vicinity at his office, with John Dean Caton, on Dearborn Street, opposite the Tremont House. In the language of the Hon. John Dean Caton, is the following reminiscence of Dr. Brainard given: "About the first of September, 1835, Dr. Brainard rode up to my office, wearing pretty seedy clothes and mounted on a little Indian pony. He reported that he was nearly out of funds, and asked my advice as to the propriety of commencing practice here. We had been professional students together in Rome, N. Y., when he was there in the office of Dr. Pope. I knew him to have been an ambitious and studious young man, of great firmness and ability, and did not doubt that the three years since I had seen him had been profitably spent in acquiring a knowledge of his profession. I advised him to go to the Indian camp, where the Pottawatomies were gathered, preparatory to starting for their new location west of the Mississippi River, sell his pony, take a desk or rather a little table in my office, and put his shingle by the side of the door, promising to aid him, as best I could, in building up a business. During the first year the Doctor's practice did not enter those circles of which he was most ambitious. Indeed it was mostly confined to the poorest of the population, and he anxiously looked for a door which should give him admission to a better class of patients. While he answered every call, whether there was a prospect of remuneration or not, he felt that he was qualified to attend those who were able to pay him liberally for his services. At length the door was opened. A schooner was wrecked south of the town, on which were a man and his wife, who escaped with barely their clothes on their backs. They were rather simple people, and belonged to the lowest walks in life. They started for the country on foot, begging their way, and, when distant some twelve miles, encountered a party of men with a drove of horses, one of whom pretended that he was a Sheriff, and arrested them for improper purposes. When they were set at liberty, they returned to the town, and came to me for legal advice, the woman being about five months advanced in pregnancy. I commenced a suit for the redress of their grievances, and the Doctor took an active interest in their welfare. He procured for them a small house on the North Side, and made personal appeals to all the ladies in the neighborhood, for provision for their needs. Mrs. John H. Kinzie became particularly interested in their case, and paid frequent visits to the cabin with other ladies. The nervous system of the woman had been greatly shattered, and a miscarriage was constantly apprehended. The Doctor was unremitting in his attentions, and finally carried her through her confinement with marked success, exhibiting to the ladies who had taken so much interest in the patient a fine living child. This was the long desired opportunity, and it did not fail to produce its results. Dr. Brainard immediately became famous. His disinterested sympathy, his goodness of heart, his skillful

treatment and his marked success, were now the subject of comment in all circles. At my request Dr. Goodhue also visited the woman—as I desired to secure his additional testimony in the case—and he too became very favorably impressed with the talents and acquirements of the young practitioner, and extended to him a helping and efficient hand. During the winter of 1837–38, Dr. Brainard first communicated to me his project looking to the foundation of Rush College. In 1838, a laborer on the canal near Lockport, fractured his thigh, and before union had been completely effected, he came to Chicago on foot, where he found himself unable to walk further and quite destitute. He was taken to the poor-house, where he rapidly grew worse, the limb becoming excessive œdematous. A council of physicians was summoned, consisting of Drs. Brainard, Maxwell, Goodhue, Egan, and perhaps one or two others. All were agreed as to the necessity of amputation, but, while Brainard insisted that the operation should be performed at the hip-joint, the others urged that removal below the trochanters would answer equally well. The patient was about twenty-three years of age, had an excellent physique, and was, so far as known, of good habits. The operation was assigned to Brainard, and Goodhue was entrusted with the control of the femoral artery, as it emerges from the pelvis. This he was to accomplish with his thumbs; and he had as good thumbs as any man I ever knew. The moment the amputation was effected, Brainard passed one finger into the medullary cavity, and brought out upon it a portion of the medulla which, in the process of disorganization, had become black. As he exhibited it he looked at Goodhue, who simply nodded his head. Not a word was spoken by any one but the patient, and what he said no one knew. Brainard instantly took up the knife and again amputated, this time at the joint, after which the wound was dressed. The double operation occupied but a very short time. In about one month the wound had very nearly healed, only a granulating surface of about three-fourths of an inch in length at the upper corner discharged a healthy pus. I was present the last time the wound was dressed, and expected to see the patient speedily discharged as cured. But that night secondary hæmorrhage occurred, a large portion of the wound was opened afresh, and the patient died almost immediately. At the *post-mortem* section, an enormous mass of osseous tubercles was removed from the lungs, liver, and heart, and a large, bony neoplasm was found attached to the pelvic bones, and surrounding the femoral artery, so that the mouth of the latter remained patulous. A similar deposit, three inches in diameter, had been found about the fractured femur, and when this was sawn through, the line of demarkation between the neoplasm and the true bone was distinctly discernable.* The operation was regarded as a success, and it completely established Dr. Brainard's reputation as a surgeon."

Daniel Brainard was born May 15, 1812, in Westernville, Oneida Co., N. Y. and graduated at Jefferson College Philadelphia in the year 1834; commencing the practice of medicine at Whitesboro, N. Y. Subsequent to his arrival at Chicago he visited Paris in 1839, and pursued his medical studies there; revisiting that city in 1852, when he was made an honorary member of the Société de Chirurgie de Paris, and of the Medical Society of the Canton of Geneva. At this time Dr. Brainard secured the valuable osteological collection which he placed in the museum of Rush Medical College, of which institution

he was the founder and indefatigable promoter. In 1854 he received the prize offered by the Medical Association of St. Louis for an excursus upon the treatment of ununited fractures—the mode elaborated in his treatise having since been adopted by the entire profession. Dr. Brainard's surgical reputation is not alone civic but continental; his scientific attainments were catholic, his literary ability eminent. His best monument is Rush Medical College, in whose interest he labored so indefatigably; his noblest eulogy the precedents he established by his skill. Dr. Brainard died of cholera, on October 10, 1866, at the Sherman House, aged fifty-five.

C. Carli announced himself as an M. D., in the Democrat of August 16, 1837; Lucius G. Dole is specified as an "eye-doctor," in the 1839 directory, and ten years subsequently appears as a botanical physician. Dr. Charles V. Dyer came to Chicago on the 23d of August, 1835, and was a candidate for State Representative the subsequent year, but was ineligible on account of the period of his residence not having embraced one year; he was elected Judge of Probate in 1837, and was commissioned surgeon, City Guards, Sixtieth Regiment, on May 15, 1840. Dr. Dyer died in this city, April 24, 1878. Dr. Charles H. Duck is registered in Fergus's directory for 1829, and was for sometime afterward a practitioner here. Dr. James Anson Dunn opened an office in Sherman's brick block, nearly opposite the Tremont House on November 25, 1835; after his arrival here from Buffalo, N. Y. Dr. John Herbert Foster is specified in the 1839 directory; having come to this city after participation in the Black Hawk War; remaining here until his death on May 18, 1874, at the age of seventy-nine. Dr. N. Gunn received mention in the newspapers of March, 1836. Dr. S. Z. Haven was one of the disputants before the Chicago Lyceum, February 27, 1836, and was in partnership with Dr. J. C. Goodhue, February, 15, 1836. Under date of August 24, 1836, Dr. R. J. Harvey advertised the inauguration of his practice in Chicago. Reuben B. Heacock is designated as a medical student with Dr. C. V. Dyer and Benjamin F. Hale, as a botanic physician in Fergus's directory for 1839. Dr. James R. Irvine, from Philadelphia, specifies that he has opened an office, first door south of the corner of Lake and Wells, in the American of December 3, 1836. The primary hydropathic practitioner, as a proprietor of vapor baths, is given in 1839 directory, being John J. Keenan. Dr. Richard Murphy appears in the 1839 directory and pursued literary labors in this city for some time, but nothing is obtainable that identifies him with the medical profession here. The same work cites Dr. (Leonard) Proctor. This latter gentleman was married to Miss Frances Burbank, daughter of Henry Wolcott, and sister of Alexander Wolcott, county surveyor, by Rev. J. Harrington, January 7, 1841. Dr. John Mark Smith, brother of Hon. S. Lisle Smith, came to Chicago in the spring of 1837 and remained here until 1842. J. Oldham Sweetser, dentist, is accredited with a residence here in 1839; he advertised in the daily American during the year following. Prof. George C. Tew is designated as a phrenologist in the Fergus's directory; and appears to have been successful in his presentations of this science, as he was also here in 1844–45. Place is only given this follower of Gall and Spurzheim on account of his precedence in that branch of physiological science. Dr. Simeon Willard appears in the 1839 directory and advertised, July 13, 1840, in the Daily American. December 17, 1836, Dr. Joseph Walker, late physician of Philadelphia Hospital, advertised in the American; and on May 20, 1837,

* In Early Medical Chicago, Dr. Hyde states that he was informed by Dr. Joseph W. Freer that this case was one of enchondroma of the femur.

Walker and Brainard advertised that they would always keep fresh vaccine matter. The following are designated as physicians in Fergus's directory for 1839; Dr J. T. Betts, Dr. S. B. Gay, Dr. Merrick, Dr. Moore, Dr. L. Post, Dr. William Russell and Dr. Wood.

How much, or how little, many of these pioneer practitioners were identified with the material progress of Chicago, or in what manner their individual talent accelerated the growth of sciences is impossible to state. In cases where they became identified with any of the institutions that were evidences of scientific advancement, their names as such integers appear. Dr. Lucius Abbott is stated to have married Mrs. Margaret Helm, at Chicago, in 1836. No account appears of his having practiced in this city until 1845, and in that year he is stated to have returned to Connecticut, and have died there.

A question arose in the course of the compilation of this history, whether it was just to those who were *bona fide*, qualified practitioners, to have mentioned with them those who may have been the veriest quacks; but how is the citizen of Chicago of 1883 to decide?

In the pioneer days of medical practice, when the possible patients were few, the duties devolvent upon physicians were onerous and detractive from proficiency in their profession. Unless possessed of a competency, it was requisite for them to win bread for the sustenance of themselves and families, to eke out the slender honoraria obtainable from the sparsely settled country by agriculture, speculation, or trade; therefore, in some instances, it is not surprising that a physician's repute is greater because of achievement without the pale of medical science, than for his scientific diagnosis and practice consequent thereupon. It is certainly a moot question whether the enterprise of an individual in commerce, or the display of scientific attainment in a profession, most accelerates material progress in a city; in the early medical inhabitants of Chicago, however, they were usually, perforce, united.

As the population increased and the ills to which man is heir augmented in proportion, there was a larger scope for the exclusive exercise of medical skill and consequent ability to exist upon the fees received for such practice; thus, the practice which makes perfect was not alone attainable by the physician, but his mind being easier upon the subject of his means of subsistence he was enabled to devote more time to study; he was not compelled to abandon the scalpel for the spade to fill the epigastric regions of his family.

The names of some of those who achieved distinction are given, who were in Chicago anterior to 1845; the establishment of Rush Medical College, in 1844, forming a medical center from which the rays of achievement were diffused. These ante-1844 physicians are James Van Zandt Blaney, H. H. Beardsley, Alfred W. Davison, M. L. Knapp, John McLean, Matthew McIlwaine, C. A. F. Van Wattenwylle. Some other celebrities of the medical profession who have dwelt in Chicago during the epoch treated of in this volume are Nathan S. Davis, William B. Herrick, John Evans (subsequently Governor of Colorado), Graham N. Fitch, J. C. Dass (son of the celebrated Peter Dass, the Norwegian poet), H. A. Johnson, Brockholst McVickar, Joseph W. Freer, C. A. Helmuth, Erial McArthur, Edwin G. Meek, John E. and Patrick McGirr, Max Meyers, DeLaskie Miller, George Wallingford Wentworth, E. S. Carr, William H. Byford, John H. Rauch, Edwin Powell, Thomas Spencer, Edmund Andrews and others whose names occur in the recitals of various sub-topics in this chapter.

Joseph Warren Freer was born at Fort Ann, Wash-

ington Co., N. Y., July 10, 1816; removing to Chicago June 14, 1836, but shortly thereafter leaving the city to join his parents at Forked Creek, near Wilmington, Ill. About 1846 he returned to Chicago, and commenced the pursuit of medical knowledge under the auspices of Dr. Brainard; graduating in the class of 1848-49 of Rush Medical College, in which institution he subsequently held several offices. Perhaps he did not originate much in surgery, but he suggested and practised several things of value. He is entitled to priority in suggestion of the use of collodion in erysipelas, burns, etc. So, also, the first publication of the use of adhesive plaster in fractures of the clavicle, a form of treatment, the advantages of which are not even yet fully appreciated by the profession, is due to him. Dr. Freer died April 12, 1877.

George Wallingford Wentworth was the son of Hon. Paul and Lydia (Cogswell) Wentworth, and was born on the 2d of November, 1820, at Sandwich, N. H., being the brother of Hon. John Wentworth, of this city. He was a matriculate of Dartmouth College in the years 1841 and 1842, but was compelled to relinquish his intention, in both instances, of proceeding with a collegiate course, and legal studies, on account of delicate health. In 1843 he came to Chicago and remained a year, during which time he performed some literary work for the Democrat; but his health remaining poor, he returned to the East and determined upon pursuing the study of medicine; and took courses of study at Concord, N. H., New York City and Philadelphia, becoming an alumnus of the latter city in 1847. Upon taking his degree, he returned to Chicago, and commenced practice at an office upon the west bank of the river, near the western end of the present Randolph-street bridge. While the cholera prevailed in this city in 1849, the Alderman of the Sixth Ward resigned; and Dr. Wentworth's labors among the poor, and his faithful performance of the medical duties among those who required his professional services, so endeared him to the inhabitants of that ward that they unanimously requested him to fill the unexpired term of the resigned Alderman; and upon his consenting, he was elected therefor. At the ensuing election he was re-elected for the term of two years. In 1850 the cholera was again a visitant of this city, and during his efforts to ameliorate the condition of the afflicted and to perform his aldermanic duties, he was himself taken with the disease, and died at his office on August 14, 1850, after a sickness of only about ten hours. John Murphy, the landlord of the United States Hotel at which Dr. Wentworth boarded, called to see the Doctor about 7 A. M. and though himself in perfect health, was seized and died before Dr. Wentworth demised. Dr. Wentworth is alleged to have been the first physician in Chicago who commenced the practice of his profession upon the west side of the river. The Chicago Medical Society held a meeting, whereat they passed a deserved eulogium upon the character and services of Dr. Wentworth; especially testifying their esteem for his persistent and self-abnegating efforts to alleviate the sick and distressed, particularly during the epidemic to which he had fallen a victim, and that such effort had rendered it a matter of justice that his memory should be gratefully cherished by the citizens of Chicago. The Mayor called a special meeting of the Common Council, which likewise passed resolutions of respect and condolence. The Medical Society, and the Common Council, attended the funeral of Dr. Wentworth in a body, subsequent to which his remains were taken to the family burial place at Concord, N. H., for interment.

Mrs. Lydia H. Sigourney, of Hartford, Conn., composed the following poem upon his death:

Science doth mourn for thee,
Who thus at opening day,
Didst shroud thy manly head, and pass
From her fair halls away.

But poverty and pain
Lament with deeper woe
Their benefactor laid in dust,
Where turf and wild flowers grow;

Lament his faithful care
Their gushing tears that dried,
And sought them in these dark abodes
That few explored beside.

Yet better thus beloved,
Ere faded prime, to fall,
Affections pearl-drops on thy brow,
And o'er thy sable pall.

The medical colleges and hygienic institutions of Chicago bear mute, though substantial, testimony to the medical prowess of her doctors, as her many hospitals, infirmaries and charitable institutions do to their benevolence and love for their species. These are as much evidences of their exerted endeavor, as the individual honor and fame that attaches to their names.

The early medical history may be accurately divided into three epochs: one, anterior to 1834, when individual, isolated effort characterized the medical fraternity; the second, from 1835 to 1844, when the various individuals commingled, established societies and medical sodalities; and the third epoch, subsequent to the establishment of Rush Medical College in 1844, when Chicago became a recognized center of medical instruction, and the alumni of this institution dispersed throughout the country, carrying the impress of their *alma mater* with them.

But two additional items remain to be mentioned in this chapter: one the names of three dentists, two representative Chicago men, Dr. Aaron Gibbs, who came here about 1845; Dr. James Kennicott, who commenced dental practice about 1848, and John C. Pride, a phenomenal dentist, who not alone extracted the offending molar or incisor, but gave instruction in vocal and piano music, thorough-bass, etc., in the year 1852. Also the name of John Webster deserves mention as the first hydropathic physician announcing himself as such in 1852; and W. Atkinson, in 1853, is the primal "confidential" physician.

EARLY DRUGGISTS.—The second item concerns those who provided the means, whereby the physicians were enabled to combat disease. The earliest pharmacist of Chicago was Philo Carpenter, who arrived here in July, 1832, shortly thereafter opening a variety and drug store on what is now known as Lake Street, near the eastern bank of the river; and subsequently removing to South Water Street. Early in 1833, Peter Pruyne* and Edmund Stoughton Kimberly opened the second of Chicago's drug-stores. William Hull Clarke arrived in Chicago May 23, 1835, and opened a drug store with Abram F. Clarke. Under date of November 11, 1835, this firm advertised that they have opened a new drug store at the store formerly occupied by Kimball & Porter, corner of Water and Clark streets. This firm subsequently removed to 102 Lake Street; dissolving partnership March 1, 1841; W. H. entering into copartnership with Samuel C. Clarke, his brother, and remaining with him until about 1850. About 1855, W. H. Clarke became assistant engineer of the Chicago Board of Public Works, which position he retained until

* On August 26, 1835, Mr. Peter Pruyne married Rebecca only daughter of Silas W. Sherman.

his death in August, 1878. Frederick Thomas, in the American of June 8, 1835, advertised the proprietorship of the Chicago New Drug, Medical and Paint Store, on Water Street, two doors from the American office, near the drawbridge; and also advertised that he performed "bleeding, leeching and tooth-drawing;" thus establishing himself as Chicago's first barber-surgeon. In the American of January 16, 1836, under date of January 11, Mr. Thomas announced a copartnership with Thomas Jenkins, at a new store on Lake Street, one door west of Clark; for the sale of dry goods, groceries, paints, drugs and medicines; but the advertisement does not specify that the phlebotomical practice was maintained. On April 2, 1836, the partnership was dissolved, Mr. Thomas retiring. The names of the other early druggists are given in Fergus's directory of 1839: Edward R. Allen and Leroy M. Boyce; Leroy M. Boyce continuing the business alone at 121 Lake Street, July 10, 1840, and subsequently at 113 Lake Street; being succeeded, in 1851, by J. Sears, Jr., and E. R. Bay. Dr. E. Dewey, who advertised on July 1, 1840, as being at Apothecaries' Hall, Dearborn Street; Nelson Buchanan, and Sidney Sawyer, who were in business for a number of years subsequent to 1839.

RUSH MEDICAL COLLEGE.

The act of incorporation for this institution was drawn by Drs. Daniel Brainard and Josiah C. Goodhue; was passed by the Legislature; and approved by the Governor on March 2, 1837. The Chicago Amer-

FIRST RUSH MEDICAL COLLEGE.

ican of March 25, 1837, commenting thereupon, states that "this act may be regarded as not the least of the favors which Chicago has received at the hands of the State. Being the first institution of the kind in Illinois, or indeed west of Cincinnati and Lexington, it must soon possess advantages of location which but few medical schools enjoy. With such a situation, if it receive the fostering care of the public, cannot fail to become an ornament and an honor to our infant city. The benefits resulting from the establishment of literary and scientific institutions in a community are very great.

The name selected, "Rush Medical College," seems particularly appropriate. It is intended as an honor to the memory of Benjamin Rush, that eminent physician and illustrious patriot, whose name is so dear to every American.

The following are the names of the trustees: Hon. Theophilus W. Smith, Dr. J. C. Goodhue, Rev. Isaac T. Hinton, Dr. John T. Temple, James H. Collins, Dr. Edmund S. Kimberly, Justin Butterfield, Ebenezer Peck, John H. Kinzie, John Wright, Henry Moore,

W. B. OGDEN

William B. Ogden, John D. Caton, Grant Goodrich, E. D. Taylor, all of Chicago; Rev. Seth S. Whitman, of Belvidere; Hon Thomas Ford, of Oregon City; and the Governor, and the presiding officers of the Senate and the House of Representatives, ex-officio members. In October, 1843, an organization was effected, and on the 24th of that month an announcement made that the first annual course of lectures would commence December 4, 1843, and continue sixteen weeks. The faculty were: Daniel Brainard, M. D., professor of anatomy and surgery; James V. Z. Blaney, M. D., professor of chemistry and materia medica; John McLean, M. D., professor of theory and practice of medicine; M. L. Knapp, M. D., professor of obstetrics. The ticket fees are announced as sixty dollars; dissecting ticket, five dollars; graduation fee, twenty dollars. The lectures were delivered in two small rooms situated on Clark Street. William Butterfield was the only graduate that year; an honorary degree being conferred upon Thomas P. Whipple and upon John McLean.

In 1844 the college building was erected by John M. Van Osdel, architect, at the southwest corner of Dearborn and Indiana streets. It was constructed of brick with stone facings and contained two large lecture

rooms, beside rooms for chemical, anatomical and other demonstrations. Its cost was about \$3,500.

The first lecture was delivered on December 11, 1844, in the new edifice, and the formal opening occurred on Friday, December 13, 1844; when, before a large and cultivated audience, the Rev. R. W. Patterson offered a prayer appropriate to the occasion, and Daniel Brainard, president of the faculty, delivered an able address. The Weekly Democrat of December 25, 1844, reviewing the opening exercises states: "Dr. Brainard, indeed, may almost be said to be the founder of this institution, and he and our citizens generally may well be proud of the intelligence and enterprise, which in so short a time have erected a beautiful and costly edifice dedicated to science, in which are already gathered about forty students from our own and neighboring States." The faculty in 1845 were Daniel Brainard, M. D., professor of surgery; Austin Flint, M. D., professor of institutes and practice of medicine; G. N. Fitch, M. D., professor of obstetrics and the diseases of women and children; James V. Z. Blaney, M. D., professor of chemistry and pharmacy; John McLean, M. D., professor of materia medica and therapeutics; W. B. Herrick, M. D., professor of anatomy. The directory for 1844 gives, in addition to the names of the four gentlemen who were the first faculty of the incipient college, A. W. Davison, prosecutor to the professor of anatomy.

In 1846, the cabinets of morbid and general anatomy, materia medica, mineralogy, etc., were enlarged and a library of about six hundred volumes, for the convenience of students, formed. On December 24, 1846, a free dispensary was opened at the College, where advice and medicine were gratuitously dispensed and surgical cases treated and requisite operations performed without charge.

On Wednesday evening, January 5, 1847, protoxide of nitrogen (laughing gas) was first administered in the presence of an audience, by Professor Blaney; and upon January 21, 1848, chloroform was first used as an anæsthetic in surgery, the hypnotic agent being administered and the operation subsequently performed by Dr. Brainard, assisted by Drs. Herrick and Blaney.

From October 28, 1847, to February 2, 1848, forty-nine operations were performed by Dr. Brainard; who also performed the first recorded case of emasculation during the session of 1849-50,

In October, 1850, Dr. Thomas Spencer, resigned the chair of the principles and practice of medicine, on account of ill-health, and the trustees of the College tendered him the honorary appointment of emeritus professor thereof in acknowledgment of their appreciation of his valuable services.

The Gem of the Prairie, of November 10, 1850, states that Mrs. Brockway, of Jonesville, Mich., arrived in this city to attend lectures in Rush Medical College; but no record is extant of this lady having become a matriculate. In 1852, the name Emily Blackwell, of Ohio, appears as a student of the session of 1852-53; but in consequence of the misogyny of the State Medical Society, the liberality of the college faculty was unable to grant a second course of lectures to Miss Blackwell, and she subsequently graduated at a medical college in Cleveland, Ohio.

In the interregnum of the collegiate terms of 1854 and 1855, the College was rebuilt and its interior remodeled and additional rooms were furnished for the museum,* and for post mortem examinations, the cost of such alterations being about \$15,000. This expense

* Prof. Daniel Brainard made an extensive collection in Europe, which he deposited in the new museum.

and all others relevant to the institution, maintenance and alteration of the college were sustained by the various faculties of the institution; the faculty being, as Dr. J. Adams Allen remarked, "privileged to pay all expenses, after the manner of Mr. Pickwick and Messieurs Snodgrass, Tupman and Winkle; and, like them, have been subject to acrimony and animadversion as a reward for their expenditure." The only donation that had been made to Rush Medical College toward its establishment or support, was the lot originally given whereupon the first college was erected. This fact is but an additional evidence of the worthiness of the College to be honored by Chicago citizens, for the faculty have, from pure, disinterested love of their profession, devoted their money, time, energy and intellect to enhancing the proficiency, and ability of the students of the college, with the most flattering results to themselves as professors, and to the college as a medical *alma mater*.

The following table * exhibits the number of matriculates and graduates during the several collegiate years:

Years.	No. of Students.	Graduates.
1843-44	22	1
1844-45	46	11
1845-46	50	10
1846-47	70	16
1847-48	140	33
1848-49	100	19
1849-50	104	42
1850-51	125	44
1851-52	105	30
1852-53	108	34
1853-54	122	37
1854-55	116	41
1855-56	150	42
1856-57	116	41
†1857-58	100	36

William Butterfield was the son of the Hon. Justin Butterfield, who is distinguished in the forensic annals of early Chicago. After Mr. Butterfield graduated he practiced his profession until February, 1847; on the 3d of March of that year, being commissioned Second Lieutenant of the United States Marine Corps, in which capacity he performed service during the Mexican War. During his stay in Mexico he became a confirmed invalid, from the climatic rigors. He resigned his commission on May 1, 1858. On August 5, 1861, he was commissioned Captain and Commissary of subsistence, and was stationed at Hannibal, Mo., from the autumn of 1861 until December, 1863; and at Rock Island, Ill., during the year 1864, resigning his commission on December 3, 1864. Subsequent to this period Dr. Butterfield led the simple life of a private citizen, dying on the 13th of January, 1878, aged fifty-seven years.

THE CHICAGO MEDICAL SOCIETY has become commingled, in the recollection of many of the early physicians of this city, with that of Cook County Medical Society. Medical societies arose, endured for a brief season, and passed away, in the early years of Chicago's existence, with such frequency that their nomenclature even is lost to recollection; but the first society that attained any prominence appears to have been the Cook County Medical Society—of which Dr. Levi D. Boone was secretary—whose first meeting was held at the office of the Chicago Insurance Company October 3, 1836. Subsequent to this Society, and anterior to 1857, the only one that achieved any protracted vitality was the Chi-

cago Medical Society,* that was inaugurated some time during the first quarter of 1850; the first meeting having been held in a room on Randolph Street, near the corner of Clark, and was attended by a large number the prominent practitioners of the city, among whom were Drs. Daniel Brainard, Levi D. Boone, Brockholst McVickar, W. B. Herrick, John Evans, Edwin G. Meek, J. Herman Bird,* J. V. Z. Blaney, Samuel W. Ritchey,† Philip Maxwell and Nathan S. Davis. At this meeting a committee was designated to prepare a constitution and by-laws, which was adopted at a subsequent meeting of the Society, held April 5, 1850; whereat officers were elected and the name of Chicago Medical Society adopted. Dr. Levi D. Boone was the first president of the Society, and Dr. John Evans was elected delegate to the American Medical Association; Dr. Evans attending the annual meeting of this Association in Cincinnati, in May, 1850, as representative of the Chicago Society. Dr. Davis states that "Previous to the formation of this Society, the profession of the city had been so divided into rival factions that many thought it would be impossible to secure sufficient harmony of action to maintain a social organization among the members. To show that there was some reason for this opinion, I may mention that Dr. Brainard and several others who participated in the preliminary meetings, never attended a meeting after the first election of officers. And before the first six months had elapsed charges were preferred against a number for unprofessional conduct: who, instead of submitting to a trial in conformity to the by-laws, simply treated both the charges and the Society with contempt, which caused some others to abandon the meetings of the Society; and so lessened the number of the members who continued to attend, that after the second election of officers in April, 1851, no constitutional quorum could be obtained."

Drs. Bird, Blaney, Boone, Davis, Evans, Herrick, Meek, and two or three other physicians, continued to hold meetings at stated dates each month; although the meetings partook rather of the character of pathological sociables, than of autocrats of the medical profession, because of there being an insufficient number in attendance to poll votes requiring the presence of a quorum. The Society, though moribund, continued to exist, consequent upon the fidelity and persistence of these few gentlemen until the period for the annual election of officers in April, 1852. Prior to this meeting the secretary made strenuous efforts to convoke an adequate number of physicians for a quorum for the election of officers; and to amend the by-laws so that a smaller number than was therein designated would constitute a quorum for the transaction of business. Despite the energies of the secretary and the convocation of the quasi-members, but an insufficient number for the intent of the meeting were present; and these simply adjourned the Chicago Medical Society, and immediately constituted themselves the Cook County Medical Society; elected a physician—who was present, but who resided outside of Chicago—a member to give it a semblance of a Cook County organization; elected Dr. Erial McArthur, president, and Dr. H. A. Johnson, secretary; adopted a few simple rules for the government of the Society, and appointed Dr. Alonzo B. Palmer, delegate to the National Medical Association to convene at Richmond, Va., in the ensuing May.‡

* From the Sixteenth Annual Catalogue of Rush Medical College, for 1858-59. Chicago Historical Society.

† The Twenty-fourth Annual Catalogue had graduates differing in number from those specified above, as follows: 1846-47, 19; 1847-48, 30; 1848-49, 18; 1849-50, 43; 1850-51, 30; 1851-52, 37; 1853-54, 41; 1857-58, 37.

* "History of Chicago Medical Society," by Nathan S. Davis, M. D., in minutes of Society; a scrutiny of said minutes having been afforded by Dr. Linton H. Montgomery, secretary.

† Graduates of Rush Medical College, class 1845-46.

‡ The Daily Democrat of April 7, 1852, states that this meeting was held at the office of Drs. Davis and Palmer, on April 5, 1852.

The transfusion of the Chicago, into the Cook County Medical Society, at this meeting, occasioned the anachronisms observable in the recitals of physicians as to the date of inception of the Society. The metamorphosed Society held its stated monthly meetings, whereat a gradual accession of attendance and interest was observable; and was annually represented by its accredited delegates, at the meetings of the American Medical Association and the Illinois State Medical Society, until September or October, 1858, when its membership included a large proportion of the active practitioners of the city—especially those in their medical youth. Being thus possessed of a civic clientele, that presaged well for the influence, growth, and stability of the Society, and the solitary member from the rural district having died: it was deemed advisable to rechange the name of the Society, to the Chicago Medical Society, as more expressive of the membership constituting it, and also to identify it with the original organization of which the Cook County Society had been a continuation. This was done by the unanimous voice of the members at the regular meeting of the Society held—presumably—in October, 1858.

Since that epoch the Chicago Medical Society has maintained its entity with a mutative membership and a corresponding degree of changeeful success and prosperity. But the regular meetings have been held and attended to the manifest improvement of its members and the advancement of their professional knowledge and interests. The fire of 1871 made but a brief hiatus in the sessions, as Dr. Nathan S. Davis—the sole surviving, continuous member of the original body—invited the Society to meet at his residence on Wabash Avenue; after which the Society met in a court-room, that remained tenable, in the partially incinerated courthouse; until more suitable and commodious quarters could be procured, during which period the growth of the Society, the professional skill and talent of its members and the beneficent influence exerted have made a notable mark in the medical annals of the city.

In September, 1857, the German Medical Society of Chicago was organized; with William Wagner, M. D., president; E. Schmidt, M. D., vice-president, and George D. Schloetzer, M. D., secretary.

The State Medical Society was first organized at Springfield, June 4, 1850, and Chicago received its meed of recognition by William B. Herrick, M. D., then professor of anatomy and physiology in Rush Medical College, being elected president, and Edwin G. Meek, M. D., being appointed one of the secretaries.

HOMEOPATHY.

The discovery of homeopathy, as a distinctive specialty of medical practice, is conceded to Samuel Hahnemann, who became a systematic pathological heresiarch about 1810. But however ancient the phrase or system, its disciples have increased from the days of Ferdinand L. Wilsey—the first convert to homeopathy in the United States, in 1826—until now they are numbered by thousands.

The history of homeopathy in Chicago may be summarized in two words—effort and success. In any departure from an accepted dictum, the schismatic encounters intense opposition; this, the homeopaths have encountered, and their status at the present day is a stronger, more unerring and satisfactory testimonial than any eulogium that could be penned; and this success has been achieved notwithstanding the fact that in the ranks of the adherents of any novel tenet or dogma,

charlatans flock to the newly raised standard and cover the disciples with discredit because of their disreputable practices; which are as possible in a new body of medical practitioners, as of troops—merely from defective organization.

David Sheppard Smith, to whom belongs the honorable title of "Father of Western Homeopathy," arrived in Chicago in May, 1836; a graduate from the Jefferson Medical College in Philadelphia, of the class of 1836; and thus enjoys the honor of being the oldest medical practitioner now living (1883) in this city. Dr. Smith became convinced of the verity of the homeopathic practice in 1837, and pursued a further course of medical investigation. After unsuccessfully treating his oldest child according to the regular school, and achieving its cure by homeopathic treatment, early in 1843, he became a firm enunciator of the "*similia similibus curantur*" creed. In 1842, Dr. R. E. W. Adams came to Chicago, and became associated in the medical practice with Dr. Smith; and, after the latter gentleman embraced homeopathy, Dr. Adams also became a convert. In August, 1843, Dr. Aaron Pitney arrived in Chicago, and this triumvirate were the earliest homeopaths of this city.

DR. DAVID SHEPPARD SMITH was born in Camden, N. J., on the 28th of April, 1816, and is the son of Isaac Smith, of Salem County, in that State. The immediate ancestors of Dr. Smith's mother were Welsh, and manifested in a high degree, the tenacity of purpose, determination of character and healthful physique that are characteristic of that nation. To these inherited qualities Dr. Smith united laborious and painstaking industry, and early exhibited intense desire for the best moral and intellectual culture; the first he received from his mother; the latter he obtained by persevering application. At the age of seventeen he entered the office of Dr. Isaac S. Mulford, as a medical student, and attended three courses of lectures at the Jefferson Medical College in Philadelphia; graduating from that justly celebrated school in 1836. In 1837, he returned to Camden, N. J., to visit his parents; and, at that time, became a catechumen of the Hahnemann school, and the investigations he pursued resulted in his embracing the tenets of this branch of medical science in 1843; Dr. Smith having returned to Illinois in 1838. The success that has attended his practice has been equaled by the advancement he has made in the scientific and social circles of Chicago. A man of great natural endowments, of sterling integrity, of comprehensive benevolence and indiscriminating humanity; the poor of the city learned the name of David Sheppard Smith as one whose heart was open to their appeals, and whose medical skill was always exercised to the healing of their diseases;—and this, too, at a time when the influential and wealthy made constant demands upon his services as a physician. His unremitting professional labors have twice necessitated the temporary relinquishment of his practice; the first time in 1856, when he removed to Waukegan; and the second in 1866, when he visited Europe. Dr. Smith married Miss Rebecca Ann Dennis, of Salem, New Jersey, in 1836. Four children resulted from this marriage, two of whom survive; one, Mrs. Whitehead, wife of Major F. F. Whitehead, U. S. A.; and the other Mrs. J. L. Ely, of New York City. Dr. Smith was president of the board of trustees of the Hahnemann Medical College from its inception; and had conferred upon him, by the Homeopathic Medical College of Cleveland, an honorary degree in 1856. In 1857 he was elected general secretary of the American Institute of Homeopathy; and, in 1858, was selected as

president, and in 1865, as treasurer, of this national institution of physicians; and the conferring of these honors on this typical Chicago physician are but a fitting tribute to him.

DR. JOHN TAYLOR TEMPLE, to whom reference is made elsewhere in this chapter, became a convert to homeopathy about 1842, under the tutelage of Dr. D. S. Smith, and commenced practicing at Galena, that year. Dr. Temple was born in Virginia in 1804, and married the daughter of the Rev. Dr. Staughton (who delivered the address of welcome to General LaFayette at Castle Garden, in 1822), when he was about twenty-two years old. His eldest daughter, Leonora M. Temple, is the widow of the Hon. Thomas Hoynes. Three

other daughters—Elizabeth, Marcella and Josephine—are living, as is one son, John Howard Temple. About 1845, Dr. Temple made the overland trip to California, a difficult journey in those days, and deemed almost as venturesome as a voyage to find the survivors of an Arctic exploration would be now. In the very early days of Chicago's history the Doctor, during his peregrinations, discovered copper in the Lake Superior region; excavated three sections of earthwork of the Illinois & Michigan Canal; and, with John M. VanOsdel, applied new machinery for pumping water in the works of the canal. Dr. Temple was a proficient geologist, botanist and chemist, and had one of those comprehensive and discriminative minds that instinctively descry the salient points of any topic or project. He was a restless, earnest, indefatigable worker, and whatever he did, he did with all his might; whether it was an anatomical demonstration, or duck-hunting; the latter amusement being a favorite one with the Doctor, he being an ardent devotee of the rod and gun. His life was an example to the men of his time; his death a loss to the scientific professions, and the society wherein he lived.

JAMES STERLING BEACH, who was a printer during the early days of Chicago, determined on abandoning the stick for the scalpel; and, in 1843, commenced reading medicine with Dr. Aaron Pitney. In July, 1846, Dr. Beach commenced practicing, somewhat before his course of study had qualified him to do so—according to the Doctor's statement—but in any case of undecided diagnosis he submitted the point in question to his preceptor, and acted according to his decision. It is pertinent to remark here, that Dr. Beach's strong point in his medical career has been the unflinching accuracy in diagnosing the diseases of his patients. One other fact

remains to be stated, in connection with his early entry into the ranks of practicing physicians, that he was compelled to fill a hiatus in the corps of physicians occasioned by so many of them being sick with typhoid fever, when that disease was epidemic in 1846. Dr. Beach was born in Detroit, Mich., February 24, 1826, and came to Chicago in July, 1838; was married to

Miss Helen M. Stone in September, 1847; practiced with Dr. William Pierce, at 53 Randolph Street, in 1849; and was elected Coroner in 1854; completed the term of James Andrews, as Sheriff, in 1856; and graduated from the Cleveland Homeopathic College the class of 1856-57. After Dr. Beach commenced the practice of medicine he abandoned all literary pursuits, either in the manufacture of "copy" or its transmutation to the "galley" ere it sailed before the public as printed matter. The Doctor has an extensive practice; and his cheery, jocund manner enlivens a sick-room fully as potentially as his skill alleviates the suffering of his patient.

The other homeopathic practitioners of early Chicago, who achieved reputation in their profession and remained in the city, are: George E. Shipman, Henry Kirke White Boardman, D. Alphonso Colton, Gaylord D. Beebe, Nicholas Francis Cooke, Reuben Ludlam and Alvan Edmund Small. There were, of course, many other practitioners, but they only coruscated for a brief period in the homeopathic orbit.

Henry Kirke White Boardman came to Chicago in the fall of 1846, and practiced medicine according to the old school until 1851; when he became a homeopathist. He was a graduate of the Jefferson Medical College of Philadelphia, and was a student of the celebrated Dr. Mütter. The distinguishing feature of Dr. Boardman's practice was his surgery; in this branch he had few compeers. He was married; and died about 1874.

GAYLORD D. BEEBE was born May 28, 1835, at Palmyra, Wayne Co., N. Y. His father was a farmer in rather indigent circumstances; and being unable to provide the means to furnish his son with a liberal education, the latter determined upon leaving home and endeavoring to gratify his thirst for knowledge. In this project he was opposed by his father, and sustained by

his mother—a noble Christian woman—and acting upon her advice and following his own intense desire, Dr. Beebe, at the age of seventeen, attended the Genesee Wesleyan Seminary; studied hard and worked harder in laboring for farmers and teaching school during vacations, and, by economy, not alone paid for his tuition but saved enough money to support himself while studying medicine. He pursued his medical studies for one year in Rochester, N. Y., and then entered Albany Medical College. During his occupancy of this institution he read medicine with Dr. Pratt, a leading homeopathic physician. He pursued a full course of study at the Albany College and graduated with great credit. He then went through his complete curriculum at the Homeopathic School of Medicine at Philadelphia; graduating therefrom in 1857; subsequent to which he settled in Chicago, and very shortly afterward was associated in homeopathic practice with Dr. A. E. Small; a conclusive evidence of his medical proficiency. At the outbreak of the Civil War, President Lincoln commissioned him as brigade surgeon, but when he presented himself before the State Medical Board for examination for this military position, they declined catechising him, simply because he was a homeopathist. Dr. Beebe then went to Washington, carrying with him

a numerously-signed petition, asking for the appointment of a homeopathic surgeon, and the action of the officials there rendered his application a species of test case. Dr. Beebe procured an order from President Lincoln, decreeing that he should be examined, and presented himself before a board imbued with prejudice, not alone against homeopathy, but against Dr. Beebe individually. His examination was consequently unusually rigorous, but his scientific knowledge was equal to the occasion. He triumphantly underwent the ordeal, and received his appointment as brigade surgeon. He was assigned to the command of General Hunter in Kansas, and while on duty there was once arrested by some Federal troops who mistook him for the celebrated Quantrell. He occupied several important positions upon the medical staff, until—when medical director of the Fourteenth Army Corps—he was compelled to resign on account of ill-health, in April, 1863, superinduced by unremitting labor and over exertion. Dr. Beebe then returned to Chicago and resumed his civic practice, continuing therein until 1868, when his chronic cardiac affection recurred, and compelled the relinquishment of his practice, until 1874, when he resumed his office practice only, which he continued until the hypertrophy and dilatation of the heart, with which he had been so long afflicted, prostrated him in his last sickness in April, 1877; from which disease he died on the 11th day of that month. Dr. Beebe was married in 1863, to Miss Mary Brewster, of Erie, Penn. Dr. Beebe was a close, earnest and aggressive student in applying medical expedients that commended themselves to his reasoning faculties. He was the first to use sulpho-carbolate of sodium as a preventive in scarlet fever; and although he made no claim to the discovery of this agent as a prophylactic, yet the world is indebted to him for its primary appliances, and the initial step to demonstrate the efficacy of this substance. Dr. Beebe was also the first to introduce the method of torsion in ovarian diseases, in place of the old clamps and ligatures. As a surgeon he was probably unexcelled in the profession, and the success that attended his intestinal operations is a matter of surgical emulation to the present day; one distinctive feature of such surgery being his fortuitous use of disinfectants to preclude gangrene. He made a special study of this class of drugs, and contended to the day of his death that carbolic acid was a sovereign remedy for cancer, but that the danger attendant upon its use was such as to prevent its general adoption. The successful utilization of phenic acid, however, has demonstrated that the jeopardy was principally attributable to the chemical impurity of carbolic acid, and has revived and strengthened the claim Dr. Beebe originally made. His most successful operation was one performed upon a Mrs. Childs, of Lee Centre, Ill., and was one wherein strangulated hernia had produced mortification of the abdominal viscera. In the operation a large quantity of the viscera was excised; and in commenting upon this phenomenal case, that medical authority of the world, the London Lancet, said, "that since this operation life was never to be despaired of under any circumstances." An affectionate and just tribute is paid to him by Dr. N. F. Cooke, in the dedication of his work, "Antiseptic Medication:—" "To the memory of Gaylord D. Beebe, the great surgeon whose genius foretold all that is herein demonstrated; this book is dedicated, by his life-long friend and co-laborer, the author."

The names of the gentlemen that have been cited are not to be considered as embracing all of Hahnemann's followers who have flourished in Chicago, but

only as those who have become fused into the history of homeopathy in this city. They formed the medical Macedonian phalanx that penetrated opposition, that received the brunt of the affray; and the survivors of which little coterie now enjoy the merited fruits of their perseverance and earnestness of purpose. They are a hardy, working assemblage of pugnacious pathological pioneers, and, like the pilgrim fathers of Mrs. Hemans, "have left unstained what there they" formed: freedom to practice medicine according to the convictions of the individual.

One obstacle encountered by the new school can be discerned by reading the following open letters that appeared in the Northwestern Journal of Homeopathy for October, 1850:

DR. SHIPMAN: During the session of 1849 and 1850 I attended a course of lectures at the Rush Medical College in Chicago, and was desirous of attending the ensuing course, and receiving the honors of the College, as I should have been entitled to do had none but the ordinary tests of qualification been applied to me. But wishing to have the matter fully understood previous to securing tickets for another course, I addressed the following to the Secretary of the faculty, and received the accompanying reply:

ST. CHARLES, Ill., September 12, 1850.

DR. N. S. DAVIS—*Sir*: I am a homeopathist from a conviction of the truth of the principles and the efficacy of the practice of homeopathy. With these views, will you graduate me if I comply with the ordinary requisitions of the faculty?

Yours, etc.,

M. DANIEL COE.

CHICAGO, September 16, 1850.

MR. DANIEL COE—*Dear Sir*: I am directed to inform you that the faculty of Rush Medical College will not recommend you to the trustees for a degree so long as they have any reason to suppose that you entertain the doctrines, and intend to trifle with human life on the principles you avow in your letter. To do otherwise would involve both parties in the grossest inconsistency,

Very respectfully yours,

N. S. DAVIS,

Secretary of the Faculty of Rush Medical College.

There is no need of recounting the various arguments used pro and con relative to this correspondence; it demonstrated, however, that homeopathists could not graduate from Rush Medical College; and the fact must have been apparent to them of the necessity for a college of their own, where the adherents of the homeopathic school could pursue the requisite course of study and graduate as doctors of medicine. To discuss the necessities of the new school of medicine, a homeopathic convention was convened, and the Gem of the Prairie thus commented upon the science whose adherents were about to assemble: "That although old-school practitioners at first regarded the 'infinitesimal philosophy' as a delusion, and that it was still regarded by the great body of them as a system of quackery, it had gained a strong position, and was growing daily, both in this country and in England. In fact, it recognized homeopathy as something which could not be ignored or sneered out of existence."

A preliminary meeting was held at the office of Messrs Skinner and Hoyne,* at the corner of Lake and Dearborn streets, on June 3d, 1851. Prof. L. Dodge, of Cleveland, was called to the chair, and Dr. T. G. Comstock, of St. Louis, appointed secretary. The special design of the meeting was announced to be the formation of a Western homeopathic association. A committee on credentials was appointed, consisting of D. S. Smith, M. D., Chicago; L. M. Tracy, M. D., Milwaukee, and George E. Shipman, M. D., Chicago, who presented the following resolution as a basis of the action of the convention:

*Hon. Jonathan Young Scammon, Hon. William B. Ogden and Hon. Thomas Hoyne were among the earliest of the homeopathic laymen.

Resolved, That those present shall be considered members of this convention who have conformed to the existing medical institutions of the country, or who have been engaged in the practice of medicine five years, (being avowed believers in, and practitioners of, homeopathy,) or who shall have passed an examination before the committee

This resolution was passed, and, under its provisions, the following gentlemen were reported by the committee as qualified to seats in the convention: Lewis Dodge, M. D., Cleveland; T. G. Comstock, M. D., St. Louis; H. C. Foote, M. D., Galesburg; A. Giles, M. D., Southport, Wis.; Dr. M. D. Coe, St. Charles; Dr. A. P. Holt, Lyndon; Dr. William Vallette, Elgin; Dr. W. C. Barker, Waukegan; D. S. Smith, M. D., Chicago; L. M. Tracy, M. D., Milwaukee; George E. Shipman, M. D., Chicago.

The convention met at Warner's Hall on the following day, and Dr. I. S. P. Lord, Batavia; John Granger, M. D., St. Louis; Thomas J. Vastine, M. D., St. Louis; Prof. Charles D. Williams, M. D., Cleveland; John Wheeler, M. D., Cleveland; M. S. Carr, M. D., Peoria; Dr. N. Clark Burnham, Peoria; E. H. Kennedy, M. D., Galena; D. T. Brown, M. D., Waukesha; G. W. Crittenden, M. D., Janesville; E. H. Clapp, M. D., Farmington, were reported to the convention and elected members thereof. By-laws and constitution were drafted and adopted and the "Western Institute of Homeopathy" thereby created. The following officers of the Institute were then unanimously elected: L. M. Tracy, M. D., Milwaukee, president; D. S. Smith, M. D., Chicago; T. G. Comstock, M. D., St. Louis; Lewis Dodge, M. D., Cleveland, and A. Giles, M. D., Southport, vice-presidents; George E. Shipman, M. D. Chicago, secretary. On the evening of June 5, Prof. Lewis Dodge delivered an address before the Institute and a public audience.

The antagonism between the two medical schools remained quiescent, until the friends of homeopathy considered that official recognition was due the practitioners thereof, and on March 14, 1857, a petition numerously signed by prominent citizens of Chicago, was presented to the Common Council, requesting that some portion of the new City Hospital might be allotted to the homeopathic physicians, for the treatment of patients according to their school of practice. The petition was referred to the Board of Health, and this body, upon July 9, 1857, appointed two medical and surgical boards for the City Hospital, constituted as follows:

Allopathic Board.—Consulting physicians: Drs. N. S. Davis and G. K. Amerman; physicians and surgeons, Drs. R. N. Isham, John Craig, DeLaskie Miller, W. Wagner, J. P. Ross, George D. Schloetzer.

Homeopathic Board.—Consulting physicians: Drs. A. E. Small and A. Pitney; physicians and surgeons, Drs. H. K. W. Boardman, Reuben Ludlam, D. Alphonso Colton, S. Seymour, N. F. Cooke, George E. Shipman.

To the first board, three-fourths of the hospital were allotted; to the latter board, one-fourth. But the designation "Allopathic Board" caused a perfect Pandora's box of discussion and objection. The regular physicians objected to being called a board of "other diseases" (*allos*, other; *pathos*, disease); and also to practice with those whom they classified as irregular practitioners. Correspondence abounded; pamphlets were prolific; the Cook County Medical Society denounced the homeopaths, perhaps a little "ex cathedra;" and the homeopaths erected bulwarks of statistical facts against which the darts of the regulars hurtled harmlessly; one pamphleteer getting rather worsted because of a Hellenic typographical error. In fact, the Montagues and Capulets of the medical pro-

fession had a decided tourney, and the Board of Health, unable to discern any way of bridging the pathological abyss and of acceding to the petition referred to them, took refuge in inaction; and the hospital remained, not alone unprovided with physicians, but without furniture. The Common Council also evaded the issue by declaring the city too poor to make the expenditures requisite for the establishment of the hospital, and then, in 1858, leased the building to some "regular" physicians, who established therein a public hospital, cared for the county poor and gave clinical demonstrations, principally to the students of Rush Medical College. In 1863 the General Government confiscated the building and transformed it into a general hospital, with Surgeon Brockholst McVickar in charge, and with George K. Amerman and J. P. Ross, as acting assistant surgeons. The hospital was shortly afterward changed in its scope of treatment, and soldiers afflicted with ophthalmic or auricular diseases were alone received there; Dr. Joseph S. Hildreth being in charge; the hospital remaining under his administration until the close of the civil war, when it became the DeMarr Eye and Ear Hospital; subsequent to which it became the County Hospital.

HOMEOPATHIC PHARMACY.—The first homeopathic pharmacy was established by Dr. David Sheppard Smith, at his office, in 1844. The rapid growth of homeopathic practice necessitated the establishment of a depot in Chicago, and Dr. Smith procured a supply of the medicines of this school, which he furnished to his brother physicians as required. The pharmacy was an unpretentious affair, but was fully adequate to the purpose for which it was designed; enabling the homeopathic practitioners to prescribe "*secundum artem*," for their patients. About 1854, Dr. Reuben Ludlam became associated with Dr. Smith, and the business amounted to several thousands of dollars annually. In 1856, Dr. George E. Shipman started a pharmacy at 94 La Salle Street, but the management was, shortly after its inception, transferred to C. S. Halsey, who removed the pharmacy to 108 Wells Street, and associated with him Benjamin Cowell, Jr. No homeopathic dispensary appears to have been regularly established before the year 1858.

The first Homeopathic Hospital was established in 1854, by Dr. George E. Shipman, at 20 Kinzie Street, a little east of State; the funds being supplied by private subscription. The impetus to the founding of the hospital was given by Madame Wright, who promised Dr. Shipman \$1,000 a year toward the maintenance of the hospital, if it was established. Dr. S. W. Graves, a homeopathic physician, was among the first of those who died in the hospital; he being seized with the cholera while in attendance upon his patients and, having neither intimate friends nor relatives in the city, went to the hospital. Of this physician it is authoritatively stated, that, in the unremitting exercise of his duties among those afflicted with the cholera, he went almost without sleep for fourteen nights and partook of the merest snatches of food, taken irregularly; and thus from the enfeebled condition of his constitution, fell an easy prey to the disease; a martyr to his profession. In January, 1855, Mrs. Peter Nelson, assumed the position of matron of the institution, which she retained until its close. In the commencement of May, 1855, a species of "*ex post facto*" organization of the hospital was made by a meeting of homeopathic physicians, held at the office of Dr. D. S. Smith, on LaSalle Street, near Madison; the site of which office is now occupied by the Mercantile Building. At this meeting J. H. Dunham was president, Dr. D. S. Smith, vice-president, and

Dr. George E. Shipman, secretary. The following gentlemen were elected to attend the patients at Dr. Shipman's hospital: Physicians: George E. Shipman, D. S. Smith and Reuben Ludlam.

Surgeons: H. K. W. Boardman and L. A. Douglass.

The following gentlemen were also appointed a Board of Directors; J. H. Dunham, Hon. J. M. Wilson, Hon. Norman B. Judd, Orrington Lunt, J. S. Doggett, Dr. D. S. Smith, Dr. George E. Shipman, George A. Gibbs, William H. Brown and Thomas Hoyne.

In addition to the physicians thus appointed, and who took monthly tours of service in the performance of their duties, a large proportion of the other homeopathic physicians, then in the city, attended the patients, and so successful was this exercise of their skill, that of three hundred and twenty-one patients treated in the twenty-eight months prior to the closing of the hospital, but nine died; and of twenty-seven small-pox cases, clinically treated, but one terminated fatally, and this case was the first admitted to the hospital.

Upon the death of Mrs. Wright, her trustees could not recognize the verbal arrangement made with Dr. Shipman, and the homeopaths of those days being but a small fraction of the population of the city, the treasury became depleted. A vain effort was made by the attending physicians to tide over the financial dearth by contributing \$500 of their own sparse funds, the rent of the hospital also having augmented from nothing to \$1,000 per annum. Dr. Shipman therefore

determined upon its suspension, and on May 1, 1857, the hospital was permanently closed.

HAHNEMANN COLLEGE.—As recounted in the history of homeopathy, the urgent need for a homeopathic college was early experienced by the practitioners of that science, and David Sheppard Smith determined on supplying the want. Accordingly, in 1853, a draft for a charter was sent to a member of the Legislature of this State, in whose hands it failed of fruition. Dr. Smith then went to Springfield and endeavored to find the missing charter, contemplating making a personal effort to secure its legalization, but the charter was nowhere to be found. Meeting Hon. Thomas Hoyne, Dr. Smith explained the predicament, and Mr. Hoyne took the Doctor to the law-office of Abraham Lincoln, where Dr. Smith drafted a new charter, and exerted himself to achieve its passage; which was accomplished in January, 1855. The trustees under the act of incorporation were: D. S. Smith, M. D., Hon. Thomas Hoyne,* Orrington Lunt, George A. Gibbs, Joseph B. Doggett, George E. Shipman, M. D., Hon. John M. Wilson, William H. Brown, Hon. Norman B. Judd, and J. H. Dunham. The trustees upon organization installed J. H. Dunham, as president; D. S. Smith, M. D., as vice-president, and George E. Shipman, M. D., as secretary and treasurer.

* Dr. Smith and Mr. Hoyne were *de facto* the Hahnemann College for many years, but the infusion of new material into the board, gave it an accession of modern vitality, and imparted the vigorous growth it now enjoys.

THE DRAMA, MUSIC, LITERATURE AND ART.

EARLY AMUSEMENTS.

To mock reality with puny show; to counterfeit emotion, and enact such scenes as thrill the human heart, are means of recreation from the constant theme of how to gain subsistence, as old as history. The monarch and the serf, the savage, the savant,—all grades which go to make the total sum of social life, find entertainment in dramatic art.

It is gratifying to record that the first systematic venture in the way of diversion, by the residents of Chicago, was of an intellectual character. During the winter of 1831-32 a debating society was formed by the few white men then in this section, most of whom were located at the fort. Col. J. B. Beaubien was chosen president of the society. There is no record of the transactions of this body preserved, and mention can be here made only on traditionary statement.

The little band of pioneers who braved the hardships of life in a new country, depended upon their own resources for entertainment. Charles Cleaver, who came to Chicago in 1833, remarks:

"Some of the young folks would like to know what amusements there were, and how we spent our evenings. The storekeepers played checkers, while waiting for customers, and, after closing, played cards. Those religiously inclined went to prayer-meeting at least once a week. Then when boarders and travelers were satisfied as to the inner man in the old Sauganash hotel, Mark Beaubien would bring out his fiddle and play, for those who wished to trip the light fantastic toe. To be sure, there were no theatres, no concert-halls, or reading-rooms. * * * The fact is, in the winter of 1833-34, amusements of any kind were few and far between, although we made the most of what there were."

In 1834 instructive and entertaining meetings were held by the Chicago Lyceum, although those assemblies partook but slightly of the nature of amusements.

The first public entertainment given by a professional performer in Chicago, and to which an admission fee was charged, took place February 24, 1834. Readers will observe that this statement conflicts with several historical sketches already published, but our proof is indisputable. The information is gained from the Chicago Democrat, which was established November 26, 1833. In its issue of February 18, 1834, appeared the following advertisement:

EXHIBITION.

"Joy hath its limits. We but borrow one hour of mirth from months of sorrow."

The ladies and gentlemen of Chicago are most respectfully informed that Mr. Bowers, *Professeur de Tours Amusant*, has arrived in town and will give an exhibition at the house of Mr. D. Graves on Monday evening next [February 24].

PART FIRST.

Mr. Bowers will fully personate Monsieur Chaubert, the celebrated Fire King, who so much astonished the people of Europe, and go through his wonderful Chemical Performance. He will draw a red hot iron across his tongue, hands, etc., and will partake of a comfortable warm supper by eating fire-balls, burning sealing-wax, live coals of fire and melted lead. He will dip his fingers in

melted lead, and make use of a red hot iron to convey the same to his mouth.

PART SECOND.

Mr. Bowers will introduce many very amusing feats of Ventriloquism and Legerdemain, many of which are original and too numerous to mention. Admittance 50 cents, children half price. Performance to commence at early candle light. Seats will be reserved for ladies, and every attention paid to the comfort and convenience of the spectators. Tickets to be had at the bar.

The scene of this entertainment was the hostelry of Dexter Graves, known as the Mansion House, and located at Nos. 84 and 86 Lake Street.

The next performances of which any record is preserved were given at the Travelers' Home, a hotel kept by Chester Ingersoll, on Wolf Point, during June, 1834. A traveling showman named Kenworthy announced, through the Democrat of June 10, the conclusion of his Chicago engagement in these words:

Mr. Kenworthy (the ventriloquist) respectfully requests the honor of a parting interview with his Chicago friends on Wednesday evening, June 11, at "Bromback Hall," better known as the Travelers' Home. He will be *at home* at 7 o'clock P. M., and will offer for the amusement of his visitors his whims, stories, adventures, etc., of a ventriloquist, as embodied in his entertaining monologue of the Bromback Family.

During the next two years it is probable that professional showmen visited Chicago, as Bowers and Kenworthy did, but we have been able to find no direct proof of the presence of such men.

On Wednesday, September 14, 1836, the town was thrown into a fever of excitement by the arrival of the first circus, which was under the management of Oscar Stone, who was somewhat famous as an equestrian. An eye-witness of that notable event relates:

"They pitched their tent on Lake Street. * * * Just west, and adjoining, stood the old New York House * * * a two-story building, with eaves to the street, in the style of country taverns of those days. * * * In the rear stood its large barn, which was a necessary attachment to a hotel in Chicago at that time. As the circus tent stood a little way back from the street, it was near the barn, which was made use of as a convenience for passing the horses to and from the tent. The circus—I think it was called 'The Grand Equestrian Arena'—was not so extensive as Barnum's, nor did it have separate tents for horses or anything else. But the performance was wonderful. One rider, by the name of Stone, was put forward by the management as the greatest living equestrian; and so he was, for aught the boys knew. In fact, we believed it implicitly. Mr. Stone, in closing the performance, would appear in Indian character. This was very thrilling; at least the advertisements said so. But the redeeming feature of the show—that upon which we dwelt with ever-recurring pleasure and satisfaction—was the singing of 'Billy Barlow,' in costume."

The Chicago American of September 17, 1836, said: "A traveling circus has been some days in town, and is doing a fair business. It commenced Wednesday (September 14) and has been crowded to suffocation every afternoon and evening since. The length of time the company will spend with us depends upon patronage."

An admission fee of twenty-five cents was charged, and the youth of Chicago exercised the customary shrewdness in compassing the all-important end of securing the necessary sum daily. The exhibition was continued for several weeks.

The American of November 5, 1836, remarked: "The Boston Arena Company have been exhibiting since last Tuesday (November 1), to crowded houses. It is the best establishment we have ever seen traveling the country." On referring this item to old residents, it is ascertained, with as great a degree of certainty as is possible to attain when memory alone is relied upon, that this circus was the same as that previously mentioned, though under another name, and perhaps with increased attractions. One who attended the performances recalls the fact that two anaconda serpents were exhibited, being the first animals placed before the public in Chicago by professional showmen.

The fire of 1871 swept from existence nearly all of the records, public and private, which had been gradually accumulating from the date of the founding of the city. Encountering such a grave calamity at the very outset of our work, it is not possible to proceed with the measure of detail, or the preciseness of statement, which usually characterizes historical methods. Among the irreparable losses was the destruction of a private diary kept by J. H. McVicker from the commencement of his dramatic career, and which, were it now available, would be invaluable in this connection. Relying, therefore, upon newspaper files and scanty official records, and, where these fail, upon that most treacherous of all aids, human recollection, the task of preparing an historical sketch of the drama in Chicago is undertaken.

As fortune would have it, among the papers stored in the original vault of the City Hall, prior to the conflagration, were a few of the applications for licenses desired by theatrical managers and showmen, covering a period of nine years from 1837. The despised vault proved to be the only compartment worthy of the name. The tempest of flame assailed its walls in vain, and from the ruins there were dragged forth a few faded papers, which now possess a double historic value. They are not only originals of early official documents; they are the few originals that passed the ordeal of October, 1871, and still exist.

By virtue of the restrictions contained in the charter of 1837, those persons who wished to give public entertainments were obliged to obtain a license, and pay for the privileges appertaining to the franchise a sum determined upon by the Common Council.

The first application presented to the Council for permission to entertain a Chicago audience with dramatic performances is here quoted from the original document:

"CHICAGO, May 29, 1837.

"To His Honor, the Mayor, and Members of the City Council:—We, the undersigned (Messrs. Dean & McKinney), managers of the Eagle-street Theater, Buffalo, N. Y., humbly petition [sic] that you will grant a license (or permite) [sic] to open a theater in some suitable building within said city, for the term of one or more months, as the business may answer—the sum affixed for license to be per week or for the season—to commence from the time of the opening of the theater.

Yours respectfully,
"DEAN & MCKINNEY,
per E. R. TROWBRIDGE, Agent.

"The object of this early application is to form an estimate of the Natural Expense of Bringing a company to this place.

"D. & MCK.,
"E. R. T."

A memorandum upon this document reads: "Granted. \$100 per year." It will thus be observed that the

Council ignored the request to state the sum demanded "per week or for the season." It was manifestly the purpose of Messrs Dean & McKinney to remain in Chicago but a short time, as an expedient to fill a summer date, and the amount demanded for a license was so great that, coupled possibly with the heavy expense of bringing a company from Buffalo, the managers determined not to undertake the hazardous experiment. Messrs. Dean & McKinney never brought a company to Chicago, and on the authority of an old resident, we state that Mr. McKinney managed a theater in Detroit, Mich., during the year 1837. It is not probable that he then visited Chicago in any capacity. Mr. Dean was here several years later, as will be shown, though not as a manager of a local theater. No money was paid into the city treasury by the firm referred to, and the first license authorized was never issued.

Second upon the list of applications stands the following:

"To the honorable Mare and Common Counsel of the City of Chicago: The petition of the undersigned subscriber of the city of Chicago respectfully represents—that your honorable body to grant him a licens to arect a Show of flying Horses for amusement and excise to all who may wish to patronise the same and your petitioner further says that it will be conducted in quiet and decent manner and therefore prays that your honorable body will grant the same.

"City of Chicago, June 6, A. D. 1837.

"CLARK S. BROWN.

Indorsed: "License granted 1 yr. \$50."

It is but just to the memory of Mr. Brown to state that it must have been an unconscious association of ideas, and not an intentional disrespect to a high functionary, which caused the lapse from the established rules of orthography, in the style and method of his address. There is no positive proof that the stand of flying horses was erected, although the prospective profits of such a venture were sufficient to induce a competitive application for a license by George Sigsby, whose promise that "no immorality shall be permitted," was not potent enough to command even passing comment by the Council. Mr. Sigsby's petition bears no memorandum of official action.

The fourth petition varied the nature of the amusement by introducing living equines; but, on the strength of memory alone, it is asserted that the extremely high license demanded prohibited the grand entrance of this circus into Chicago. The application reads thus:

"To the Hon. the Mayor and Aldermen of the City of Chicago.—

The petition of J. N. Eldred showeth that it is the intention of your petitioner to open for exhibition in the city of Chicago a circus and menagerie, whereof he is proprietor, and therefore prays your honorable body to grant a license therefore. Your petitioner would call the attention of your honorable body to the circumstances of your petitioner being unable from the peculiar nature of his establishment to remain long in any city, and therefore prays the license may be granted to him weekly. And your petitioner will ever pray, etc.

"J. N. ELDRD,
"Agent, H. ELDRD.

"26th June, 1837."

Indorsed: "Granted by paying \$20 per week."

Not daunted by the misfortunes of their fellows, another firm made overtures at the shrine of authority. The next petition reads:

"We the proprietors of the New York Arena do ask of the Mayr of the city of Chicaugo his honor for a permission to exhibit our Exhibition consisting of Natural & Artificial Curiosities together with acts of Horsemanship in the City of Chicago.

"August 15, 1837.

"Messrs. HOADLEY & LATHAM.

Indorsed: "Granted at \$100 per month.

"Granted August 27, 1837."

This fee could not be paid by the manager, in the then existing financial condition of the Arena, and it

wended its way hence without enlivening the youthful element of Chicago.

THE FIRST THEATER.—A period is reached when the transient glories of the primitive arena, and even the giddy pleasures of the flying horse, pale before the dawning lights of the dramatic art. Chicago, then a city seven months old, was deficient in that essential feature of metropolitanism—an established place of amusement. The auction-room on Dearborn Street, where not only merchants but politicians and citizens generally most did congregate, no longer supplied a satisfactory degree of entertainment; and when, October 17, 1837, two venturesome men, Isherwood & McKenzie, announced their intention to open a theater, the proposition was hailed with approving demonstrations. A

an entry certifying to the payment of the sum, and demonstrating the sanguineness of the managers.

The only available building in Chicago at that time was the historic Sauganash Hotel, that famous edifice wherein so many weary pilgrims found rest and refreshment. The building stood on the southeast corner of Lake and Market streets, a locality convenient alike to transient sojourner and permanent resident.

In September, 1837, the proprietor of the hotel, John Murphy, moved into his new house, on the west side of the river, leaving the Sauganash tenantless. The spacious dining-room, wherein so many noted men had feasted upon the bounties of Mrs. Murphy's well-spread board, stood silently inviting. The managers were quick to take advantage of the opportunity to secure

Copyright secured by A. T. Andreas, 1884.

THE SAUGANASH HOTEL.

Where the first Dramatic Performance in Chicago was held

literal copy of the petition presented to the Council, praying for a license to conduct a theater, is here given:

"The subscribers respectfully petition the Hon. the Mayor and Council of the city of Chicago for a license to perform plays in the city of Chicago. They respectfully represent that this establishment is intended to afford instruction as well as amusement; that they are encouraged and patronized by the leading portion of the inhabitants of the city, who are interested in their success; that they propose to remain here during the winter, and that, consequently, they make no calculation to receive more money in the city than what they shall expend during their stay, and they trust that, in affixing a rate for license, these facts may be taken into consideration. ISHERWOOD & MCKENZIE.

"Chicago Theater, October 17, 1837.

"The petitioners request this license for six months, if agreeable to the Board."

Concurring in this request, the Council fixed the rate of license at \$125 per year. This exceeded the amount deemed just and reasonable by the applicants, who protested, though without avail, against so burdensome a tax. The treasurer's report, however, contains

this house, and soon transformed the banquet-hall into a temple of dramatic art. Crude and uncomfortable as the appointments were, the entertainments given there possessed a charm which even modern tastes could not easily find reason to disparage; for where accessories fell short, the merits of the actors supplied a compensation for deficiencies. Those were the days when action alone, and not display by carpenter or scenic artist, held the public firm in its approval of the drama. Men judged of genius by the actor's power to portray human interest by force of intellectual strength.

The room was not a model of theatric beauty. At one end yawned a chimney, through whose open mouth the fire roared a welcome to the coming guest, and cheered the hearts of tired travelers, as, with quickened pace, they sought the genial warmth within. The house was built for entertainment of another sort, it is true, but ingenuity transformed the hall into a cosy play-room. Rough seats and chairs, upon the level floor,

where all men met in a spirit of equality ; rude scenery, and smoking lamps—these were the most conspicuous characteristics of the furnishings. The censorious critic of to-day, who frowns disdainfully upon anachronisms and rails at the paucity of realistic effect, had no counterpart here in 1837. A play was a play, and so that the comedy was broad and the drama well enacted, what cared the audience if the same interior served for kitchen, parlor, palace-hall, the same wood scene did duty as a lovers' rendezvous and gloomy den whereto the villain lured his unsuspecting victim? When the lights burned low, it was because an agile boy blew out the tallow-dips, or deftly dropped the row of lamps beneath the stage. What if the atmosphere was rank with smoke? It was but a foretaste of the city's air to-day. Here the drama had its birth, and here, obscured by the dust of half a century, lie facts which cannot be exhumed.

The exact date of the opening night is not remembered, but as the petition was written October 17, which in 1837 fell on Tuesday, the inference is reasonable that the house was inaugurated prior to the close of the month. The first play produced is also a matter of

Master Burk, juvenile parts and fancy dancer. There were, perhaps, others in the company, whose names are forgotten. An evening's performance consisted always of a drama and a farce, and sometimes as many as three pieces were given. The curtain was lifted usually at half-past seven, and was rarely dropped until the approach of midnight. Play-bills were printed on sheets of coarse paper, about six by twelve inches in size, and distributed throughout the town by carriers. Not one of these is extant.

It cannot be stated how long this season continued ; but it is known that the theater was not kept open longer than six weeks. The company then proceeded on a tour through the South, possibly turning eastward as the winter advanced.

The old Sauganash Hotel, wherein the drama had its birth, was destroyed by fire March 3, 1851. The house was occupied at that time by B. F. Foster.

Harry Isherwood is still living (1884), and until within five years or so was employed as principal scenic artist at Wallack's New York theater. In a letter addressed to J. H. McVicker the veteran says :

NEW YORK CITY, December 10, 1883.

MR. J. H. McVICKER,

Dear Sir:—Your letter directed to Wallack's, dated November 30, did not come to hand until five days ago. I am no longer under the employ of Mr. Wallack, having quitted him five years ago. It would be very gratifying to me to aid your wishes in giving you an account of our doings during our stay in Chicago. Many years have rolled away, and unfortunately I possess a scant knowledge of what occurred at that time. In 1837 I arrived in Chicago, at night, and was driven to a hotel in the pelting rain. The next morning it was still raining. Went out to take a view of the place. A plank road, about three feet wide, was in front of the building. I saw to my astonishment a flock of quail on the plank. I returned to the hotel, disappointed at what I saw of the town, and made up my mind that this was no place for a show. I told my landlord of my intention to return, but he advised me not to do so, and gave such a glowing account of what our success would be that he induced me to remain. We wandered, next day, all over to find a place that would answer my purpose. None was to be found. At length some one hit upon a place that would do. It was a queer-looking place. It had been a rough tavern, with an extension of about fifty feet in length added to it. It stood at some distance out on the prairie, solitary and alone. I arranged with the owner, and painted several pretty scenes. I then wrote to Mr. McKenzie, and he came. We opened either in November or December.* I have no recollection of that opening. The company consisted of Messrs. Sankey, Childs, Wright and others. A young Irishman, who made one of the party, became very unruly, and I was obliged to tell him to go. He replied: "Where can I go, with Lake Michigan roaring on one side and the bloody prairie wolves on the other?" The ladies of the company were Mrs. Ingersoll and Mrs. McKenzie. Of the plays, I can remember but one—"The Stranger." When the season was concluded, we took to the prairie, visiting most of the towns in the interior; returned to Chicago in the spring, and fitted up a new place. It was in the street leading to a bridge. Joseph Jefferson and his wife, with young Joe, joined us here. All else is mere oblivion. I must conclude this rambling epistle by saying, with King Lear, "You do me wrong to take me from the grave." I am eighty years of age.

HARRY ISHERWOOD.

doubt, but "The Idiot Witness," "The Stranger" and "The Carpenter of Rouen" were given early in the season. The bill was changed nightly.

It is stated that the capacity of the room was about three hundred, and the admission fee charged was seventy-five cents. The principal members of the company were H. Leicester, leading man ; T. Sankey, old man ; J. S. Wright, walking gentleman ; Mr. Isherwood, scenic artist, and Mr. McKenzie, utility ; Mrs. Ingersoll, leading lady, and one of the best actresses ever belonging to a Chicago stock company ; Mrs. McKenzie, wife of the proprietor of the theater, and a lady of rare abilities ; Madame Analine, danseuse and actress ; and

THE RIALTO.—The next authentic record carries this narrative onward to the spring of 1838, at which period the drama in Chicago assumed a more distinctive form. The experimental season proved a satisfactory

* Mr. Isherwood's memory must be at fault. The license was granted in October.

one to the managers, and they concluded to return to this place, with the intention of establishing a permanent theater. In April Isherwood & McKenzie petitioned the Council as follows:

"CHICAGO, April 28, 1838.

"Dear Sirs: Intending to resume our theatrical amusements in your city, we would respectfully solicit the action of your honorable body in reference to a license, granting us the privilege to 'strut and fret our [year] upon the stage,' for one year from and after the 12th day of May, A. D. 1838. Intending (subject to your decision on this point) to make ourselves the permanent residents of your city, we have, at much expense and trouble, commenced the adapting and fitting up of the upper portion of the 'Rialto' (a room thirty by eighty) as a theater; and intend to fit it up in such a manner as to reflect credit upon our infant city. We trust, under all the circumstances of the case, the license will be made as moderate as is consistent with justice. We should like, if possible, the exclusive privilege, but do not urge it. The early action of your body on this subject is respectfully requested.

"We remain, gentlemen,

"Your obedient servants,

"ISHERWOOD & MCKENZIE."

The building referred to was a wooden structure, erected in 1833 or 1834, by John Bates, for an auction-room. Prior to 1838 this place was used by various parties as an auction-room. According to J. M. Hannahs, "It was at the very center of business and resort; the only bridge on the main river being at that time at Dearborn Street, and one of the principal hotels, the Tremont House, being on the same block. The only eating-house, the City Refectory, as it was called, was on the east side of the street, nearly opposite the theater; and the auction-rooms, which, as before stated, were, previous to the establishment of this theater, the only place of amusement in the town, were in the immediate neighborhood. Above all, there was adjoining the theater the famous 'Eagle,' kept by Isaac Cook, which was the resort of politicians; and as every man was, in those days, a politician, it will be readily understood that the theater was at the center of gravity." Dr. Egan, the wit of the company, named the place the "Rialto," for obvious reasons. Thus, it will be seen, that although the Sauganash was the birthplace of dramatic art in Chicago, the Rialto was the nursery of the muse, and from within the walls of that historic pile issued the infant's feeble wails as it struggled for existence. The building stood on the west side of Dearborn, Nos. 8 and 10, between Lake and South Water streets, and was "a den of a place, looking more like a dismantled grist-mill than a temple of anybody. The gloomy entrance could have furnished the scenery for a nightmare, and the lights within were sepulchral enough to show up the coffin scene in 'Lucretia Borgia.' But for all this, those dingy old walls used to ring sometimes with renderings fine enough to grace grander Thespian temples; though there was a farce now and then somewhat broader than it was long." So wrote that genial critic, Benjamin F. Taylor, when subsequently commenting on those early days.

Manifestly the public quite agreed with Mr. Taylor on the subject of the Rialto as a theater site, for no sooner had the action of Messrs. Isherwood & McKenzie been made known than the following remonstrance was sent to the Council:

"To the Honorable the Common Council of the City of Chicago: Your petitioners would represent to your honorable body that they have understood that a petition is pending before your honorable body for the license of a theater, to be held and maintained in the room of the Rialto, which is a wooden building, and surrounded by wooden and combustible buildings. Your petitioners would further represent that theaters are subject to take fire, and [are] believed to be dangerous on that account to property in their vicinity, and that insurance cannot be obtained on property in their

vicinity, except at greatly advanced premiums. And your petitioners do solemnly protest against the granting of such license to keep a theater in such building, and thereby endangering the property and lives of your petitioners.

The matter was referred, by the Council, to a special committee, consisting of Messrs. H. L. Rucker, Eli B. Williams and Grant Goodrich, who were empowered to decide upon the propriety of issuing a license.

Grant Goodrich submitted a minority report, in which he forcibly expressed his opposition to the new theater. The basis of this antagonism was, primarily, the unsuitableness of the Rialto as a public hall, located as it was "in one of the most compact blocks in the city, composed chiefly of wooden buildings." Life was endangered on every occasion when an audience assembled within the fragile walls, and the enhanced liability to fire by the production of theatrical spectacles caused added apprehension of peril. But the objection which Mr. Goodrich urged more strongly, if possible, than the material danger, was the menace to the moral welfare of society by the permanent establishment of a theater in the city. He believed "that the tendencies of the performances of modern theaters were grossly demoralizing, destructive of principle," and that they "were the nurseries of crime." He regarded the project as an alarming assault on the stronghold of youthful rectitude; and while expressing favorable appreciation of the benefits to be derived from the presentation of Shakspearean plays, and the classical drama generally, he considered the likelihood to baser plays sufficiently potent in the controlling mind to justify the withholding of a license. The city treasury was, he admitted, in a condition to call for increased revenue, but no necessity was stern enough to offer a compensating excuse for this process of raising funds.

A majority of the committee, however, viewed the subject in a different light, as is shown by the appended report:

"To the Mayor, etc.: The committee to whom was referred the petition of Messrs. Isherwood & MacKenzie, relative to the establishment of a theater in the city of Chicago, have examined into the subject, and a majority beg leave to report: that it is inexpedient, in examining into the subject referred to, to enter into an inquiry of the morality of the drama in general, or of its moral tendencies in this community. The moral world has long been divided on the first proposition; and your committee have no doubt but that such performances are approved by a large majority of the citizens of Chicago. It is true that the committee are advised that some opposition is made to the prayer of the petitioners, in consequence of the proposed locality of the theater; and should the subject be brought before the Council in a proper manner, your committee would feel bound to examine the subject, and give it such decision as the same demands; but in the subject referred to them, the committee see nothing to warrant an examination into the questions not involved in the matter before the Council. Your committee, therefore, would recommend that the prayer of the petitioners be granted and that they be licensed, under such restrictions

as the nature of the case may require; and that the license be fixed at the sum of one hundred and twenty-five dollars [per year].

"H. L. RUCKER.

"ELI B. WILLIAMS.

"Committee."

Acting upon the judgment of the majority report, the Council granted the license prayed for, dating it from May 20, 1838; but the tax imposed on the managers was fixed at \$100, instead of the sum recommended by the majority of the committee.

Fortified by this official indorsement, Messrs. Isherwood & McKenzie fitted up an auditorium in the Rialto, with boxes, gallery and pit, supplying seatings for about four hundred persons. The stage furnishings were improvements on those of the Sauganash Theater, but they were scarcely worthy of commendation. Dropping the title Rialto, the place was renamed "The Chicago Theater," and a stock company of actors was employed, several of whom have since attained distinction in the profession.

The oldest copy of a play-bill we have been able to discover (a reproduction, not an original) is that which was issued on the occasion of a benefit tendered Mr. McKenzie by the citizens of the place. It is interesting particularly because of the names appended to the letter, showing who were then lovers of the drama and friends of the pioneer in dramatic art, as well as because of the company roster, which probably includes the entire list.

Alexander McKenzie was an educated gentleman, as his letter of acceptance proves. He was devoted to the profession of his choice, and regarded his mission here as one far above the mere acquisition of wealth. The tone of the correspondence evinces a profound respect for him on the part of the public, and his reply conveys to us an impression of his real merit as a man, and of his conscientiousness as a manager.

"TO ALEXANDER MCKENZIE, ESQ.—*Sir*: The undersigned citizens of Chicago, entertaining a high estimate of your private worth and of your efforts to establish a theater in this city, which should recommend itself to public regard by the combination of amusement and instruction which it presents; and believing that in no theater in the Western country can a company be found more respectable in private life or more excellent as actors, than in the one under your charge, and feeling that, in this respect, as well as in the judicious selection of plays, you have contributed essentially to the pleasure and amusement of the public, desire that before you leave this city you will afford them an opportunity to testify their regard for you by appointing an evening for a benefit for yourself.

"CHICAGO, October 3, 1838."

"TO MESSRS. RUCKER, STRODE, MORRIS, ETC.:—*Gentlemen*: I have the pleasure to acknowledge the receipt of a highly complimentary letter addressed to me by my fellow-citizens of Chicago, in which I am requested to name an evening for my benefit, on which my friends may have an opportunity of proving their regard for what they are pleased to term the histrionic ability and correct deportment of myself and company.

"I will not deny, gentlemen, that in assuming the highly responsible situation that I now occupy, I have strained every nerve so to comport myself that my conduct should appear void of offense before my fellow-men. I have endeavored, so far as lay in my power, to present such plays as have a virtuous and moral tendency, inculcating sentiments that are calculated to rouse the love of what is noble, and the contempt of what is base and mean. Looking upon the stage as the standard of our literary taste, the model of our public oratory, and the pride of our national amusement, I have allowed no pecuniary consideration to deter me from securing a company of comedians whose public reputation would be the surest guarantee that their conduct in private would never give the lie to the sentiments they nightly utter. I consider a good actor a very useful member of society; if he succeeds in uniting in the bosoms of hundreds a sympathetic admiration of virtue, abhorrence of vice, or derision of folly, his task is no mean one, when performed with ability. To do this he must have an eye to look upon nature with the poet and the painter; a mind that will enable him to discover the lights and shades of character in mankind; his knowledge of the world must be that of experience, his manners those of a gentleman, his acquirements above mediocrity.

"If in my endeavors to establish the drama in the State of Illinois, I have gratified my patrons in this city, I am amply repaid; and let me assure them that their kindness has fallen upon a heart that is like the wave to receive and the marble to retain the impression.

"In conclusion, allow me to name Thursday evening the 18th inst., for my benefit, if that night will coincide with the views of those friends who have so kindly interested themselves on the occasion. I remain, gentlemen, your obedient servant,

"ALEX. MCKENZIE.

"CHICAGO THEATER, October 11, 1838."

With characteristic generosity, the company no sooner learned of the public desire to compliment Mr. McKenzie than they united in tendering their services on that occasion. In behalf of the company the following note was transmitted to the beneficiary:

"CHICAGO THEATER, October 10, 1838.

"MR. MCKENZIE—*Sir*: Having been informed that the citizens of this place propose testifying their respect for the ability with which you have conducted the interests of the theater, by a complimentary benefit, the members of your company avail themselves of this opportunity to express their sense of your gentlemanly conduct as a manager, and the kindness they have received at your hands, by respectfully tendering their gratuitous services on the above occasion. Allow us to congratulate you on the able manner in which you have surmounted your many difficulties. In conclusion we sincerely hope that prosperity may ever attend the establisher of the drama in the 'Far West.'

"Yours truly,

H. LEICESTER,

"G. C. GERMON,

"T. SANKEY,

"For the Company."

On the evening of the benefit performance, Mr. McKenzie issued the following play-bill:

CHICAGO THEATER.

MR. MCKENZIE'S BENEFIT.

MR. MCKENZIE

Respectfully announces that, in compliance with a wish very generally expressed by his fellow-citizens of Chicago, he is induced to announce his Benefit, which will take place on

Thursday Evening,

October 18, 1838,

When will be presented Sir E. L. Bulwer's play, in 5 acts, entitled

THE LADY

OF

LYONS!

Or, Love and Pride.

Claude Melnotte.....Mr. Leicester.

Beausant.....Mr. Warren.

Glavis.....Mr. Germon.

Col. Damas Mr. Sankey.
 Deschappelles Mr. Wright.
 Gaspar Mr. Burk.
 Officer Mr. Watts.
 Pauline Mrs. Ingersoll.
 Madame Deschappelles Mrs. Jefferson.
 Widow Melnotte Mrs. McKenzie.

After the play, MASTER J. JEFFERSON will sing the comic song of

"Lord Lovel and Lady Nancy."

Mr. Germon will sing for the first time

"The Hunters of Kentucky."

The evening's Entertainment to conclude with, first time here,
 THE TWO FRIENDS.

Ambrose Mr. Sankey.
 Herbert Mr. Leicester.
 Valentine Mr. Warren.
 Elinor Mrs. Ingersoll.
 Rose Mrs. McKenzie.

The curtain will rise at 7 precisely.

The box plan is in charge of Mr. W. H. Davis (at the store of Mr. Hatch on Lake Street), who has consented to act as treasurer on this occasion, where seats and tickets may be procured.

The name of Mrs. Germon does not appear in the foregoing bill, but that lady, then a bride and only seventeen years of age, was here in 1838.

The Jeffersons were the parents of Joseph Jefferson, famous now for his impersonation of "Rip Van Winkle," and characters in standard comedy. The elder Jefferson and his wife were, it is needless to observe, among the foremost actors of the time.

In a letter addressed to Manager J. H. McVicker, bearing date Christmas, 1882, written from St. Louis, Joseph Jefferson, Jr., gave these facts:

"My father and his family arrived in Chicago, by way of the lakes, in a steamer, somewhere about May, in the year 1838. He came to join Alexander McKenzie (my uncle) in the management of his new theater. * * * The new theater was quite the pride of the city, and the idol of the manager; for it had one tier of boxes, and a gallery at the back. I don't think the seats of the dress-circle were stuffed, but I am almost sure that they were *planned*. The company consisted of H. Leicester, William Warren, James Wright, Charles Burk, Joseph Jefferson, Thomas Sankey, William Childs, Harry Isherwood, artist, Joseph Jefferson, Jr., Mrs. McKenzie, Mrs. Jefferson (my mother), Mrs. Ingersoll and Mrs. Jane Germon. I was the comic singer of this party, and 'small first villager;' now and then doing duty as a Roman senator, at the back, wrapped in a clean hotel sheet, with my head just peering over the profile banquet tables. I was just nine years old. I was found useful as Albert, Duke of York. In those days the audience used to throw money on the stage, either for comic songs or dances. And, oh! (with that thoughtful prudence which has characterized my after life) how I used to lengthen out the verses. The stars during the season were: Mrs. McCluer, Dan Marble, and A. A. Adams. Some of the plays acted were: 'Lady of Lyons,' 'The Stranger,' 'Rob Roy,' 'Damon and Pythias,' 'Wives as they Were,' and 'Sam Patch.' * * * The city then had from three thousand to four thousand inhabitants; and I can remember following my father along the shore, when he went hunting on what is now Michigan Avenue." * * *

It is probable that the season began on or about May 20, but as Chicago was then unable to support a theater during the quiet months of winter, when transient custom was light, the company ceased its labors soon after Mr. Kenzie's benefit. The company was taken to other towns, an itinerant season being indulged in. William Warren states that they visited Galena, Alton, and several places, traveling in open wagons. The weather was severe, and the rides were far from comfortable. During the winter of 1838-39 no theater was maintained here. In those days "stars" traveled without companies, depending on stock support.

A circus performance was licensed by the Council October 3, 1838, on the application of John Miller & Co. A tax of \$5.00 per night was imposed.

There is no mention of further dramatic entertainments by the local papers until the spring of 1839. The Daily American of April 17 editorially observed:

"Alexander McKenzie, Esq., the former worthy and enterprising manager of the theatrical company which have heretofore exhibited in this city, with so much credit and general satisfaction, has obtained a license from the Common Council to start his theater again, on payment of \$75, provided no fireworks are allowed in his theatrical exhibitions. We think that the special committee who reported in favor of the license have shown good sense and a practical philosophical view of such matters. We are aware that theaters are obnoxious to a respectable and intelligent part of every community, but they are permitted, and must be permitted, on the ground of general expediency, if for no other reason."

The sentiment against theatrical performances was a pronounced bar to financial success at that time, for the fickle goddess of fashion did not ordain the propriety of general attendance. It was not deemed wholly proper for ladies to attend, and patronage came largely from the transient element of society, which was attracted here during the summer months by the inducements for speculation.

In the issue of May 13, 1839, the American published an announcement that Messrs. McKenzie & Jefferson, who had succeeded to the business of Messrs. Isherwood & McKenzie, were then on their way to Chicago, with a "popular" company, to spend the summer months, if sufficient encouragement was extended them. Mr. Jefferson, the elder, was then the stage manager, and to his skill and admirable judgment is attributed the prosperity, or at least the artistic excellence, of the season of 1839. Quoting from the American of May 13, it is ascertained that the firm possessed "a substantial and pleasant theater in this place, and one is erecting in Galena, to be completed in the fall. When theaters are conducted so as 'to shoot folly as it flies,' if they are not always successful in their design 'to raise the genius and to mend the heart,' they still perform a valuable service in a very pleasant manner; and people will, in spite of cynics and moralizers to the contrary, lend them the light of their countenance."

On the 19th of August, 1839, the American stated that "Mr. Jefferson, the worthy actor, is now in Chicago, preparing entirely new scenery, and otherwise fitting up and improving the theater building for the arrival of the [Illinois Theatrical] Company. * * * It is expected here in a short time, to remain during the fall, for the entertainment of the theater-going public."

The American of August 30 said: "The Illinois Theatrical Company re-open their theater in this city next Saturday night [August 31], with new scenery and decorations. The stock company we consider unsurpassed either in the East or West. The entertainment

begins with Colman's operatic piece, 'The Review, or the Wag of Windsor,' and closes with the farce of 'The Illustrious Stranger, or Buried Alive!'"

The season opened auspiciously, and merited commendatory notice in the American of September 3:

"The Chicago Theater, under the polishing skill of Mr. Jefferson, appears in a new and beautiful dress—newly and neatly painted and provided with a complete change of fresh and tasteful scenery. The appropriate motto, 'For useful mirth and salutary woe,' which looks down over the drop-curtain upon the auditory, conveys an idea of the useful tendencies of the legitimate drama. The company have now come here from the South, somewhat debilitated and depressed by sickness, but for the two nights of their performance in the city have sustained themselves, under the circumstances of the case, with remarkable spirit and general satisfaction. The interesting melodrama of 'The Warlock of the Glen,' and the farce of 'The Midnight Hour,' went off last night with admirable effect, to a respectable audience. Mr. A. Sullivan, a new actor on our boards, acquitted himself in a very creditable manner, as the noble *Warlock*, and bids fair to be a popular actor and a valuable accession to the company. Mr. C. L. Green, also a new actor on our boards, performed the character of *Scotch Andrew*, the fisherman, in the place of Mr. William Warren, who was prevented from appearing through indisposition. Mr. Green, being called upon unexpectedly to sustain this new part, acquitted himself in an admirable manner. As a comic actor and singer he is also a valuable addition to the company. * * Mr. McKenzie, the manager, deserves much credit for his liberal and ambitious efforts to increase the attractions of his theater."

The foregoing editorial comment is interesting in a double sense, as it preserves in authentic manner the names of several gentlemen afterward more or less famous in the profession, and as it is the first newspaper critique of a dramatic performance in this city. Crude and stilted though it be, it is the precursor of a distinctive department of newspaper work which to-day commands attention and respect throughout the country.

Charles L. Green, the gentleman referred to, was an actor of sterling merit, and a man of noble traits. He subsequently became a popular comedian, and was an active member of J. B. Rice's company. During the cholera epidemic of 1849 he was seized with that terrible disease, and died in this city.

It is evident that the American not only appreciated dramatic art, but also entertained advanced opinions concerning the mission of the stage. September 5 its editorial page contained, in all the dignity which dwelt in large type, an enunciation of its views, and a comparative statement of facts, which is indicative of public sentiment at that time. It said:

"This evening is to be performed the highly interesting drama 'Isabelle, or Woman's Life,' to conclude with 'The Spectre Bridegroom, or A Ghost in Spite of Himself.' Between the performances Mr. Greene C. Germon will sing 'Rory O'More,' a very good song and very well sung—in fact, we think it a better song than even the celebrated 'Lass O'Gowry.' Why do not the fair ladies of our city lend the theater, occasionally, the light of their countenance? The play of 'Isabelle, or Woman's Life' this evening will give them a fair and appropriate opportunity. There is a police in attendance, whose duty it is to preserve strict order and decorum in the theater. If the ladies are waiting for *fashionable precedents*, we will inform them that at Spring-

field, in this State, the theater was attended generally by the beauty and fashion of the fair sex, and by the gentlemen of the place of all official dignities, from Judges of the Supreme Court down. This has been the case, we believe, also in other places of the State, at St. Louis and in the East. The theater at Springfield presented not a tittle of the inducements for attendance of the Chicago Theater. There the seats were of rough boards, without backs to them, and there were no divisions into boxes, etc., but still the theater was almost nightly crowded. Here is an example set by the capital of the State. If we believed that the tendency of the legitimate drama, as being exhibited in this city, was demoralizing, corrupting or injurious, we would be among the last to recommend it to the favor of the public. But we believe the exhibitions to exert no injurious influence, but on the contrary they afford an innocent and instructive recreation. We are in favor of having everything suppressed in a play which is calculated to suffuse a blush over the cheek of genuine and unaffected modesty, or to call forth the coarse laugh and disgusting applause of those whose vulgar tastes are best pleased with obscenities. For this reason we are opposed also to the habit of throwing out, extemporaneously, obscene witticisms which, while they catch the laugh of some, are very offensive to ladies and gentlemen in their attendance, and which, by keeping away the ladies and the more respectable portion of the gentlemen who would attend, deter more from than they attract to the theater. We like always to see wit, whether legitimately in the play or happily introduced on the spur of the occasion, but we want it to be chaste, and salty enough to preserve its purity. These remarks are all dictated for the best interests of the theater, and we trust will have that effect."

These indirect allusions to a weakness, too prevalent in the early days of the drama, indicate that even the excellent comedians of the Illinois Theatrical Company sometimes forgot the more delicate obligations of their calling; but the most noteworthy clause in the article is that which proves that Chicago did not then regard the theater as a fashionable place of amusement. But the advice of the local journal was not without effect, as will be seen in the following extract, of September 7:

"The first night of Mr. Dempster's engagement—the celebrated vocalist from the Nobility Concerts, London, New York and Philadelphia—went off last evening to a large and highly delighted audience. 'Dear Land of my Birth.' 'John Anderson, my Jo,' etc., were exquisite songs, exquisitely sung, to piano forte accompaniment. * * The performances of the evening were generally capital. The laughable comedy, 'Simpson & Co.' was played with admirable spirit and success. We doubt whether *Madame La Trappe* has a better representative on any American board than Mrs. Jefferson. * * Master Jefferson sang a comic song in which he won silver, if not golden, opinions." * *

It was customary in those days to manifest approval by throwing money on the stage. The company was composed of Mr. and Mrs. Joseph Jefferson, Master Joe Jefferson, Mrs. Ingersoll, Mrs. McKenzie, A. Sullivan, C. L. Green, William Warren, T. Sankey, Mr. and Mrs. G. C. Germon, H. Leicester, Mr. Mason, Mrs. McKenzie and Mrs. McCluer.

September 14 witnessed the first presentation of "Oliver Twist," with Mrs. Germon as Oliver; Mr. Warren as Bill Dawkins (as the part was then called), Mr. Sankey as Fagan and Mrs. McKenzie as Nancy. The American spoke warmly of the performance, and remarked that the "front seats and boxes were lighted up

with the beauty and smiles of the fair sex." Thus, it will be seen, the potent influence of the press, when directed as a medium to demonstrate the fashionableness of the theater, worked marvels in one short week. No longer were the actors dependent upon the flaring footlights for illumining encouragement. The smiles and beauty of the fair sex brightened the scene and cheered the susceptible hearts of the unmarried disciples of Thalia and Melpomene.

Public sentiment demanded a frequent change of bill. The number of regular attendants was small, and pecuniary interest compelled a constant variation of the attractions. Such enjoyable dramas and comedies as "The Golden Farmer, or Vell, vot of it?" "The Sleeping Draught." "The Magpie and the Maid," were given during the first weeks of this season. Between the plays Master Jefferson convulsed the audience with vocal selections, in character dress. Among these are remembered the touching ditties of "Titum-ti" and "The Steam Leg."

But with the appearance of the ladies and that better element among the sterner portions of society, as encouragers of the drama, came a demand for more finished effort. September 19 beheld Goldsmith's comedy "She Stoops to Conquer," with Mr. Leicester as leading man; September 20, "Jane Shore" was given; September 21, "The Lady of Lyons," and from that time on, until the engagement terminated, the bills were of a standard character.

The first spectacular play ever given in Chicago was enacted September 23, 1839. The American observed:

"The interesting drama of 'Cherry and Fairstar, or the Children of Cyprus,' was received by a full and applauding house. The new scenery and decorations were rich, tasteful and beautiful, and reflect much credit on the skill and ingenuity of Mr. Jefferson, the artist. The dresses were new, beautiful and appropriate. The plot and incidents of the drama are very interesting, and increase, to the last, the curiosity and applauses (sic) of the spectators. The original music and chorusus (sic) added much to the variety and animation of the performance. The blossoming of the Aloe was a beautiful and ingenious scenic representation. So were the moving, or dancing, waters, and especially the splendid Grecian Galley, at the conclusion of the second act, with Cherry, Fairstar, Topac, Sanguinbeck and Hassanbad on board, entirely filling up the stage. We think the play as rich and interesting a one as the company have yet got up. We were glad to see so many spectators to witness the triumph of the Western drama." Already was the leaven working which was destined to transform the sodden lump of public disapproval into a light and wholesome nourishment for the general mind. Cheered by the presence of the higher social element, the management provided a direct and special entrance to the theater, for the accommodation of those ladies who dreaded to encounter the bustling crowd. This delicate attention was appreciated, for in its issue of September 26, the American gallantly remarked: "The beautiful play of 'Cherry and Fairstar' went off last night to a very fair house—the *fairest*, considering the number of ladies present, of the season."

The patronage bestowed upon the Chicago Theater aroused a commendable desire to inaugurate a season of the higher drama, and to not only win, but to retain, the friendly interest of the public. Heretofore the chief aim appears to have been the securing of an audience irrespective of its intellectual caliber; or, at most, to break down the barrier of distrust which autocratic Fashion arbitrarily erected at the portal. This accom-

plished, and Fashion having waved its wand above the footlights, the company determined to convince the world of prejudice that evil held no rightful dominion in the realm of the sock and buskin.

September 26, that beautiful poem "Damon and Pythias" appealed for the first time to a Chicago audience. Mr. H. Leicester impersonated the noble statesman; Mrs. G. C. Germon drew the tear of pity as fair Calanthe.

From grave to gay, within the actor's province as in life, is but one step. Next upon the stage which echoed to the words of masterful devotion at friendship's shrine, comes William Warren, the fun and laughter-provoking child of Thalia, who in the comedy "Is it a Lie?" gave four distinct impersonations.

Turn down the lights, and let them dimly glow on gloomy "Fazio," which held the boards October 4, with Mrs. McCluer as the passionate Bianca. Turn up the lights again, for here comes Charles Kemble Mason, fierce of look, to tame the shrew, and show Chicago how Petruccio can crack the whip about the heels of luckless servitors.

Four days have passed, and now we see the truculent Petruccio transformed into the love-bedazzled Romeo; for Mason could put an antic disposition on as readily as Bianca could smooth her jealous frowns to sigh as Juliet. And be it known on good authority that these emotions touched the public heart and filled the house with sympathizing auditors.

October 10 a benefit was given Mr. Mason, on which occasion he assumed the Scottish kilt, and murdered Duncan, at the instance of the wife whose fierce ambition dried up nature's founts and changed the patient Juliet into a fiend. But that same night the mimic whirligig of time brought swift revenge; for from the bloody battlements of Dunsinane the mind takes rapid flight, on swift imagination's tireless wings, and gazes smilingly upon the balmy skies of Italy. The warlike thane has donned the grotesque garb of humorous Petruccio; the startled eyes of Mrs. McCluer, which but a moment since looked glassily as conscience racked her soul, now flash defiance on her hated lord. But the comments of the local critic afford an opportunity for quiet smiles to-day, for with no word of praise for either leading part, he says "the witch scene and the music went off admirably," in "Macbeth;" and, possibly with a view to cultivating realistic effects, during the "waits" between the plays, he approved of Mr. Mason's recital of "Tom O'Shanter." In those days an audience demanded quantity, it seems, regardless of what modern minds conceive as proper.

"Hamlet" pursued his melancholy way October 15, for the first time in this city; and two nights later, "The Merchant of Venice" was given. It proves, at least, the versatility of both Mr. Mason and Mrs. McCluer, who sustained, "remarkably well," this wide range of character within so brief a period. "Pizarro," with Mr. Sullivan as Rollo and Mrs. Germon as Cora, was given October 21.

The Illinois Theatrical Company terminated their season November 2. A benefit was given Mr. Warren, Mrs. Ingersoll and Mr. Jefferson respectively, during the last week of the engagement, and "large houses of beauty and fashion attended." Mrs. Ingersoll remained in the city, to give lessons in dancing, but the company moved East. This season must be regarded as the most brilliant of any prior to the opening of Rice's theater in 1847. It presented for the first time standard dramas, in the lines of tragedy and comedy, introduced five Shakspearean plays, brought out the first spectacular

effect, and distributed the roles among a company composed of ladies and gentlemen, many of whom afterward became prominent members of the profession. Locally, the influence of the work performed was wide-reaching, for not only was prejudice overcome to a considerable degree, but an improved taste created among the avowed patrons of the art which was never afterward eradicated. The season of 1839 will rank in the history of the drama in Chicago as the natal period of a higher standard in judgment.

Among the frequent visitors to this theater was Samuel S. Beach, from whom we have received the following recollections:

"The company introduced to the citizens of Chicago, in the year 1839, by Messrs. McKenzie & Jefferson, was one of remarkable ability and unprecedented strength in all the departments of the drama. The subsequent eminence of every prominent member of that famous company sustains this opinion. The pioneers of theatrical representations in Chicago reflected distinguished honor upon their profession as artists of pronounced merit, and challenged the admiration of the best citizens of the young city by their cultured manners and high sense of personal honor. The ladies and gentlemen composing this grand old company deserve a conspicuous place in the history of early amusements in this marvelous city.

"It must be remembered that the theater of 1839 was handicapped by all the prejudices that had existed against the stage from time immemorial. It had not received that recognition as a powerful and indispensable public instructor conceded to it at this day. The true mission of the drama, as the highest possible form of public amusement, was little understood and less appreciated by the great majority of fifty years ago; and the grand future of the theater was far beyond the reaches of their comprehension. It required a company similar in construction to our favorites, possessing great individual strength, to overcome those long-existing antipathies to dramatic exhibitions, and prepare the way for that cultured judgment that characterizes the Chicago audiences of the present time. Every play presented by this company was rendered in a most acceptable and conscientious manner. Without the aid of the gilded surroundings, rich wardrobes, magnificent scenery and elaborate appointments that are common adjuncts of the modern stage, our pioneers were forced to rely solely upon the sterling merits of each actor, if they would 'hold the mirror up to nature.' The standard comedies and musical dramas displayed the company to its greatest advantage. The delicate shades and lights of life were touched by master hands. The ensemble was nearly perfect, and is rarely equaled by modern companies.

"I shall briefly refer to the chief characteristics of the leading members of that noteworthy organization. The proprietors, Messrs. McKenzie & Jefferson, were managers in the most enlarged sense of that term, and not theatrical adventurers like many of the present time. To executive abilities of high order were united a sincere devotion to their profession and an experience of rare value, attained in the best schools of classic acting, which gave the widest scope to their intelligent appreciation of what was needed to elevate the stage. The purpose was to place the theater among the honored institutions of our enlarging civilization. After leaving Chicago, at the close of the season, in 1839, they visited Galena, in this State, and Nashville, Tenn., with a majority of their Chicago company. Mr. McKenzie, I be-

lieve, died in Nashville, a few years later. Neither of them ever returned to this city as managers.

"I have no information to impart concerning Mr. Leicester, after he left Chicago. During his stay here he held the position of leading tragedian in the company, and was a most admirable actor.

"Greene C. Germon was an actor of light comedy parts, and one of the finest vocalists of the time. He died in this city in either 1852 or 1853. Mr. Germon became the most famous impersonator of Uncle Tom, in Uncle Tom's Cabin, and used to sing the pathetic melodies with a depth of feeling and beauty of expression never surpassed. He was to have made his reappearance in that character on the night of his death.

"Mr. Sankey, the delineator of old man parts, was the peer of any actor; a gentleman of consummate ability, possessing the requisites of greatness, and would have undoubtedly attained high rank in his line of work had he not met with death by drowning, near New Orleans, in 1840. His sudden death was a great loss to the early stage. His mind was of superior quality, his methods were cultured, and his facial expressions were as varied as his conception of art was true.

"Charles Burke, a son of Mrs. Jefferson by a former husband, died of consumption in New York, sometime in the fifties. Mr. Burke was the superior of William E. Burton in his best days.

"Mrs. Ingersoll, the leading lady, was gifted with a fine presence and abilities of high order. The characters assumed by her were acceptably interpreted. During the season of 1839 Mrs. Ingersoll was much out of health, and did not often appear. Upon such occasions the leading roles were assumed by Mrs. McKenzie, who was a most painstaking artist. Mrs. Ingersoll subsequently married J. S. Wright, both of whom are still living.

"Mrs. Joseph Jefferson, the comedienne of the company, was one of the most charming ladies that ever adorned the stage. Slight of form, graceful of action, earnest in manner, a sweet singer, she captivated her audiences upon every appearance. With the citizens of long ago she was an especial favorite, and is remembered by every one who knew her then with the most profound respect and admiration, not only for the marked abilities displayed in her professional work, but also for the beautiful simplicity and quiet dignity of her private life. The subsequent eminence of her two sons amply testify to the faithful manner in which she discharged her motherly duties.

"For more than a generation Mr. Warren has been a member of the Boston Museum Company, and one of the greatest favorites on the American stage."

The time was not ripe, however, for the continuance of a superior theatrical company in Chicago. With a population of but 4,800, it was not possible to maintain a regular place of amusement, and upon the departure of McKenzie & Jefferson's company came a period of reaction, which may properly be termed the subsidence of the art here. From such meager sources as broken files of newspapers and stray correspondence—the only available indices of the times—little satisfaction can be gained. Those men who have attempted to write sketches of the drama in Chicago have but cursorily alluded to the seven years following, from 1840 to 1847, as "completely obscured," or as "worthy only of briefest mention." This convenient method of covering a doubtful period was less laborious than the one employed by us, although it must be admitted that the results attained by more patient research are not wholly

satisfactory. It may be summarized that with the departure of McKenzie & Jefferson's company a reaction set in, and many years elapsed before the drama was properly revived.

Howe & Sands's Circus obtained a license in 1839, but the document bears no date.

Some time in March, 1842, Mrs. Mary C. Porter played an engagement here, without obtaining the formal permission of the city authorities. April 4 she petitioned the Council to grant a license, and also urged the abandonment of a suit brought against her by the city for violating the ordinance. No record of action is preserved; but from the fact that April 9, on the occasion of a benefit performance, such significant plays as "The Stranger," "A Manager in Distress," and a "Day in Paris," were given, we are left to infer that chance alone did not dictate the selection of her bill.

On the 23d of the same month H. B. Nelson's company opened a season which lasted until May 7 following.

August 4, 1842, a license was granted Messrs. Lyne & Powell for a season of one month's duration at the Rialto.

In their application they referred to the hardness of the times and the lack of patronage. Governed, perhaps, by motives of generosity, or, possibly, by visions of agreeable diversion at nominal cost, the city fathers voted to issue a license for the paltry sum of \$15. The theatrical company consisted of Messrs. Powell, Lyne, Hastings, Graham, Sharp and Jackson; Mesdames Powell, Hastings and Ramsey. Among the dramas produced were "George Barnwell," "The Apos-tate," and "The Fratricide," but the engagement was an unprofitable one.

Dan Marble played an engagement in Chicago August 30, 1842, with Mrs. Sillisbe as the leading lady, in "Black-Eyed Susan" and "Forest Rose." In spite of the effectiveness of Mr. Marble's acting patronage was discouragingly light. The American remarked: "We are aware that a considerable portion of our community will not countenance a theater, no matter how talented its members."

Benjamin F. Taylor writes thus concerning those early days, and the appearance of Mr. Marble:

"It was in that dusty old trap [the Rialto], I think, that I saw Dan Marble, for the first and only time. The play was 'Black-Eyed Susan,' and Marble's admirable William melted the house as if it had been something in a crucible. It was, in its way, the perfection and simplicity of nature. The audience was a little mixed. There were the fellows that in New York would have 'Killed for Keiser'—the 'wake-me-up-when-Kirby-dies' stripe. There were a small handful of half-breeds, a sprinkling of lieutenants from the army, one or two worn-out paymasters. The pit was full of sailors, with occasionally a wharf-rat; but for fresh-water tars there was a wonderful effusion of salt water. Even the always conscious dress-circle flickered with any number of white cambric mops; and when the play took the right turn at last, the 'gods' applauded until the spiders swung in their webs and the mice in the walls were whist. Even the chaps that spent their time in the interludes in bawling 'boots' and 'supe,' and eating peanuts, mopped out the corners of their eyes with their dirty knuckles; and had the theatrical management furnished soap as well as sorrow, some of them might have put a better face on the matter. I can see the central figures in that dress circle to-day. Hands that I think of have shriveled out of the white kids they wore that night. The blue dress coats and buff vests have been

laid aside for other and stranger wear. Yonder, crowned with iron-gray Jacksonian hair, is the stately form of Colonel Kercheval. The man near him, with large, luminous eyes, is Hon. Giles Spring, owner of one of the finest judicial minds that ever graced the State. Beyond him is Dr. Maxwell, with a step as light as that of a wisp of a girl, for all of his two hundred and odd pounds of solid flesh. Close by are E. W. Tracy and George W. Meeker, and Dr. Stuart, and—but why keep on calling the dead man's roll? Some of the beauty as well as the manhood of the young city was there, and brightened up the dull old place like moonlight—but what matters it? The foot-lights are out, the players departed, and the air is full of dust withal. Down with the curtain."

The American, commenting on Mr. Marble's work in "Luke, the Laborer," September 3, said: "He proved that humor and pathos were not inseparable, but may be to a remarkable extent united in the same person."

But even this astonishing discovery failed to move the more confirmed opponents of the theater, and Mr. Marble's venture in Chicago is now recalled as much more of an artistic than a financial triumph.

A benefit was extended Mrs. Powell, September 14, which is historically noteworthy from the fact that it was also the occasion of the debut of "a gentleman of this city," the first to appeal to the public for local approval. The gentleman so mysteriously referred to by the American, and whose name was carefully excluded from the bills, was George Brier, noted in private life for the excellence of the ice cream he dispensed to the citizens. The play selected was Othello, and the performance was by no means a bad one, notwithstanding the silence of the Press upon that subject. But the American did not fail to preserve a glimpse of the state of dramatic education at that period; for in its preliminary announcement of this initial performance of the tragedy here, that faithful chronicler of the time suggestively said: "The audience would be much gratified by Mrs. Powell singing 'Strike the Light Guitar,' which she sings so admirably." Imagine Desdemona springing from beneath the fatal pillow, flushed with the violence of dodging an amateur Othello's vigorous efforts to appear realistic in the death scene, and skipping gaily to the footlights as she caught the key of "Strike the Light Guitar!"

In the fall of 1842 a theater was opened in Chapman's Building, which was located on the southwest corner of Wells (Fifth Avenue) and Randolph streets, under the management of Mr. Hastings, and was declared by the American to be in a "flourishing condition," because of "the indefatigable exertions of the manager." It was stocked with "new and splendid scenery."

A local theatrical society, known as the "Thespian," was formed in 1842, and in November addressed the following petition to the Council:

"To the Honorable Mayor, etc.: The Thespian Society respectfully represent that they are desirous of giving public exhibitions of a theatrical character occasionally—say once in two weeks. This Society is made up of young men belonging in the city, and they respectfully ask the privilege of giving such exhibitions without being required to pay for a license.

"CH. T. THORMER."

It is said that the Society enjoyed a brilliant existence for a time, until, in a moment of unguarded generosity, the properties belonging thereto were loaned to a traveling company, who carried them into "the provinces" and forgot to restore them to the rightful owners.

S. H. Nichols & Co.'s circus performed here for four

days beginning August 4, 1843. A license of \$50 was demanded.

John S. Potter, "formerly manager of the Louisville and Cincinnati theaters," as his announcement informed the public, petitioned the Council for permission to open the Chicago Theater August 9, 1843. He assured the honorable body that he had arrived in the city with a "talented and respectable company;" that he designed coming to Chicago every year, and that he would conduct his theater "respectably." In consideration of these promises he was permitted to proceed at an expense of \$25 per month, "in advance."

It has been remarked by some wise observer of natural phenomena that coming events cast their shadows before. No one will be surprised, therefore, to learn that, on February 14, 1844, the city of Chicago marveled at the intellectual wonders of a phenomenal pig, which had been advanced in learning under the tutelage of T. E. Osburn. It is not recorded that this porcine paragon predicted the proud eminence destined to be attained here by his race, but is it unreasonable to fancy its doing so? Mr. Osburn demonstrated his own distinctness from the nature of his pet by consenting to devote the proceeds of one entertainment to the assistance of the Ladies' Benevolent Society.

November 7, 1844, David Lewis craved official permission to play in the theater building.

A MUSEUM was sought to be established in November, 1844, on the petition of S. Sercomb, E. Price, E. W. Hadley and A. B. Lewis, who desired the right to found a "permanent" institution, wherein the "wonders of nature, the beauties of art, and the relics of antiquity" might be exhibited to the public. The projectors requested a free license, or one demanding no further compensation than "the necessary perquisites to the proper officer issuing the same." Inasmuch as the request was granted November 21, it is a safe inference that the potential effects of the pass system were felt as long ago as 1844, and the foundations of the pioneer museum were duly laid.

A theatrical company, under the management of Herr Hatch and A. Clare, played a brief engagement in November, 1844, but they reported the houses to be "generally so thin" that a reduction of license to one dollar per night was urgently desired. The Council promptly tabled the petition, and allowed the former rule to stand. The profits of this engagement may be comprehended when it is learned that, on the assurance of the managers, "it took all the proceeds to pay the license."

June 15, 1845, Howe & Mabie's circus performed here, and remained four days, paying \$10 per day license.

Prior to August, 1845, the sum charged by the Council for a show license was wholly discretionary with that body, but on the 29th of that month an ordinance was passed fixing the minimum at \$5 a performance and the maximum at \$50. The Mayor was empowered to act in the absence of the Council. This step was evidently taken to forestall impecunious managers in their insidious assaults upon the weak side of councilmen, through the medium of passes.

THE WESTERN MUSEUM.—In 1845 a museum was established in the Commercial buildings, No. 73 Lake Street, a few doors east of the Tremont House. An advertisement of the institution, published in the local papers of that date, assured the public that there were to be found the "best collection of specimens in natural history in the West, including an extensive variety in geology, mineralogy, chronology and ornithology. In addi-

tion are several groups of wax figures and a superior collection of cosmorama views." The special attractions of the place consisted of concerts, lectures and explanatory descriptions of the objects on exhibition. Automatic figures, "designed to entertain and instruct," performed their harmless and monotonous duties, and nothing was introduced within the walls of the museum which was not "in strict accordance with propriety, morality and religion." Instrumental music enlivened the scene of peaceful divertisement. The fee charged for admission was but twenty-five cents, and, owing probably to the highly instructive purposes of the director, who sought apparently to do good to others, children were allowed to gaze unmolested at the rarities for the sum of one shilling. On the 15th of November, 1845, Henry Fuller, manager of the museum, petitioned the Council to remove the license tax from his house, urging in support of his plea that the museum was strictly "a place of instruction," and therefore should not be compelled to pay a license fee. This petition was coldly received by the Council, and promptly denied. In spite of this refusal, the museum continued its precarious life, and February 13, 1846, again appealed for more liberal treatment at the hands of the Council. So grave a matter naturally involved much painful deliberation, and it was not until the 26th of that month that the board voted to remove the license tax, conditioned upon the managers agreeing to admit no transient entertainments to their hall. Theatrical performances were also prohibited therein without additional contributions to the general funds. The museum was then under the management of Henry Fuller and S. Sercomb, who exhibited their collection in a building on the corner of Dearborn and Randolph streets, in Hodgson's building, which was subsequently converted into a hotel.

The partial concession made by the Council did not conform with the wishes or ideas of those gentlemen, and a second application was made at a date not far removed from the first referred to, in which it was asserted that they "would be under the necessity of closing the museum unless theatrical performances could be given free of license." The petition was referred to a special committee of the Council, who reported:

"We feel that the efforts of Messrs. Fuller & Sercomb to establish a museum have not been properly appreciated by the citizens, and that they have not afforded that encouragement and patronage which the merits of the museum demand. Your committee find that the museum already embraces a very interesting collection of animals, insects, birds and minerals, together with a variety of artificial curiosities well worthy the attention of the citizens and the patronage of the city, and constituting a nucleus upon which, if adequately encouraged, a museum will grow up creditable to the city and profitable to the proprietors."

The committee, to confirm the sentiment expressed by them, proposed the following, which was received

"Resolved, That, in the opinion of the Common Council, the Museum of Messrs. Fuller & Sercomb is worthy of the support and patronage of the citizens of Chicago and the country generally; and that all persons having natural or artificial curiosities be respectfully invited to make contributions of the same to the Museum."

An order was passed granting the Museum a license for six months at the nominal fee of five dollars for the entire period. This action by the Council is, we believe, the first official indorsement of a place of public amusement in this city, and demonstrates that, however loth the city fathers may have been to grant free license

to theatrical companies, they were not impervious to the effect of an educational argument, even when the instructive medium was dressed in the garb of play-actor. Various entertainments of a theatrical, or semi-theatrical, nature were given in this Museum, from time to time. The Democrat of October 12, 1846, remarked that "Winchell, the drollerist, is in town, and performs at the Museum, this evening. When here six years ago the people would have it that there was nobody in the city but him." Miss Porter and Mr. Gilbert also played here, but the announcement is all that can be recorded now. The presence of J. C. Hough's company is vaguely recalled, and possibly other organizations visited Chicago during the years 1840-46.

RICE'S FIRST THEATER.—The year 1847 marks an epoch in the dramatic history of Chicago, for then it was that John B. Rice decided to return to theatrical management, and adopted Chicago as his future home. While to Isherwood, McKenzie and Jefferson belongs the honor of introducing the drama in its peripatetic form, yet to John B. Rice is due the credit and distinction of giving to this noble art a local habitation and a name. The former men were the precursors of the great results, which now are one of the chief badges of Chicago's metropolitanism, but the latter is the man to whom must be accorded the title of founder of the drama as a distinctive feature of the city's greatness.

Mr. Rice had about determined to retire from the stage, with which he had been identified in the East, when his attention was directed to this place, by a sanguine friend. He concluded to investigate the field, and with that purpose in mind, came to Chicago in the spring of 1847. While here he gave a public entertainment in the dining-room of the hotel where he was stopping. So favorably was he impressed with the prospect, and so firmly convinced of Chicago's future development, that he at once arranged for the construction of a theater building. The Democrat of May 11, 1847, said :

"Mr. Rice, of Buffalo, has contracted with one of our oldest and most substantial mechanics, Alderman Updike, to erect a frame building, forty by eighty, on the corner of Dearborn and Randolph streets. Mr. Rice comes here with an excellent reputation as a theater manager. There is no doubt now but Chicago will have a theater."

The site chosen was not upon the corner of Dearborn and Randolph streets, however, but on the south side of Randolph, one or two lots east of the southeast corner of those streets.

Pending the slow processes of erection in those days, let us digress from the theme long enough to observe the presence here of the Grand Olympic Arena and United States Circus, an institution whose polysyllabic title was invented by E. F. Mabie & Co. It was proudly asserted that no less than one hundred and fifty men and horses composed this stupendous organization. A new brass band was named as one of the many delightful features, somewhat contrary to modern conceptions of attractiveness, when the more surfeited taste regards newness as a questionable quality in bands. Among the performers were : M. Buckley, W. Waterman, the "beautiful female equestrian," Laura Buckley, and "the astonishing bare-back rider," young Henry Buckley, with various other notables of greater or lesser degree. The circus cast the city into a state of intense excitement for three days, beginning May 22.

A moving diorama, representing the burning of Warsaw, was placed on exhibition, in the public hall of the Saloon Building, May 26, 1847.

Returning to the subject of Rice's theater, from our casual diversions at the circus and diorama, we discover that six weeks have sped by, since the announcement was first made. The little theater has assumed the form and dimensions of an imposing edifice to our retrospective eyes. We saunter into a neighboring hotel, and, picking up the Democrat of June 22, read : "The new theater building on Randolph Street, which is now nearly finished, is worthy a visit. The economy of the interior arrangement is excellent, the stage is roomy and well designed for its purpose, the pit will be a very comfortable and convenient place, while the boxes would tempt any one to spend an evening there." Piqued with curiosity, we are about to visit the inviting place, when other duties interpose. The days fly by. Again the Democrat appears. We learn with pleasure that, "Mr. Rice will open his theater on the 28th day of June. The internal arrangements of the new theater, now nearly completed, are admirable. A full view of the stage can be obtained from every part of the house, and the plan of the old Coliseum has been followed. The boxes are elegantly furnished and fitted up with carpets and settees, rather resembling a boudoir, or private sitting-room in a gentleman's house, than an apartment in a place of public resort. The building has been completed in six weeks. A new era is unquestionably dawning in the theatrical world in this city, and under the efficient management of Mr. Rice, assisted by his talented corps, we shall always have, in the language of Dan Marble, 'Something new, something rich and something rare.' The scenic accompaniments are said to be beautiful, being the joint production of two distinguished artists."

The company engaged by Mr. Rice consisted of Edwin Harris, leading man; Mrs. Hunt (now Mrs. John Drew), leading lady; James Carroll, G. W. Phillimore, George Mossop, Mr. Meeker, Jerry Merrifield, Mrs. John B. Rice, and Miss Homer, the latter being proficient as a dancer; for at that time, and for many years later, the public demanded a divertisement of this sort between plays. The scarcity of actors and the limited revenue of the little theater caused strange and amusing doubling up of parts, at this early period of the drama, and it was no uncommon thing for one actor to assume several characters in the same play. The Common Council imposed a license fee of \$25 per month upon this theater.

On the evening of June 28, 1847, the opening performances at Rice's Theater took place. The play given was the ever popular one called the "The Four Sisters," in which Mrs. Hunt impersonated the quadruple role. Dan Marble was engaged as the "star" attraction, and carried the leading male part. Of this eventful night the Journal said, in its issue of June 29 :

"The new theater last evening was crowded with a large and delighted audience. Mrs. Hunt never played better. Dan Marble never gave greater satisfaction. The performance, and the good order preserved, was just what could be expected under the efficient management of Rice. The numbers that could not gain admittance last evening will be pleased to see by the announcement that Mrs. Hunt and Mr. Marble appear again this evening; and if they be not both complained of to-day, for the injuries occasioned by throwing last night's audience into convulsions, we apprehend the friends of the parties will be there to know the reason."

The inaugural exercises consisted of the delivery of an address, from the pen of G. W. Phillimore, by Mr. Harris, which is quoted :

In early Greece, where Pæans, sweetly sung,
Told a young world Art's lyre was newly strung;
And Reason, starting from chaotic dreams,
Threw o'er the classic land her sunny beams.
Commercial enterprise next caught the ray
And showed to Industry the golden way.
Fleets rode the wave, while fabrics filled the loom,
And sculpture decked the temple and the tomb.
The muse is heard, Helicon radiant flows,
And from the silvery fount the Drama rose.
Handmaid to Science in the march of mind,
Thalia moves free, lively, unconfined,
Nor pauses she to bless a favored clime,
But sheds on all an influence sublime.
Sometimes she rears a wild, fantastic throne
To soothe the savage of the torrid zone—
Hushes the death-wail, breaks the blood-stained lance,
Persuades to peace and leads the mazy dance.
Amid the rigor of the Polar storm
At times is seen her mirth-inspiring form,
Lighting a northern winter's gloomy hours,
And decking icebergs with her gayest flowers.
Where the domed city rises o'er the plain
There holds the Drama a distinguished reign.
Where waved the prairie, now behold the town,
See Art and Industry adventure crown.
Hither she comes, and in her gayest mood—
A buskined Hamadryad of the wood.
Of mental wealth the goddess owns a mine,
And unalloyed her golden numbers shine.
Be it our task, as we dispense her treasures,
To see instruction mingle with your pleasures.

(To the audience:)

Americans rejoice! the time foretold has come,
And you may glory in your fruitful home.
Genius of History, inscribe thy page
With the bright deeds that mark the passing age.
Tell how a valiant few, a Spartan band,
Scattered the myriads of a hostile land.
How with one hand America scourged a foe,
The other open at the cry of woe.
South'ard her war ships thundered o'er the main,
Northward they navigate with golden grain.
See how gaunt Europe, famished and opprest,
Sued to the growing giant of the West;
Nor sued in vain for freely was it given,
Overplus bounty of benignant Heaven,
Charity,* first of virtues, mild-eyed maid,
Thy acts munificent are all self paid.
And if some fell by battles' sweeping breath,
Record the numbers snatched from wasting death.

(To the boxes:)

And now to you, to whom each rolling sun
Brings the results of enterprise begun;
Who see the fruits that bounteous heaven decrees
Traverse the bosom of your inland seas,
View growing ports adorn the flashing strand,
Where takes the Tar the toil-brown Farmer's hand,
Commerce and Agriculture, side by side,
United stand, our country's glorious pride.
Nature's true noblemen such union brings—
Direct their patent from the King of Kings.
Appreciate these gifts dispensed by you,
And render thanks where all our praise is due.

(To the pit:)

From keel to truck, "a-taunto" for the trip,
Our anchor's stowed, all clear for working ship.
A skillful pilot in dramatic water,
Our anxious skipper takes the weather quarter.
On board of any craft beneath his care
Safe is the passage, bountiful the fare.
His crew, picked hands, all eager for the cause,
Your smiles their bounty, wages your applause.
Then say "good time," and bid propitious gales
Press in our wake and fill our spreading sails.

The Democrat of June 29 said:

"Last night our theater opened with a rush. Those who were late needed a pilot to get through the crowd. If Mr. Rice intends keeping his present company, the large new building so honorably and so enterprisingly

* Note.—Referring to the \$10,000 given that year by Chicago to the starving people in Scotland and Ireland.

erected, will have to be enlarged. Our city is under great obligation to Mr. Rice for his enterprise. The dress circle was the most brilliant ever brought out by any entertainment in our city. Dan Marble is here, and everybody knows him. Mrs. Hunt made herself known last night, and will never be forgotten. Rice proved himself a splendid actor, as well as theater builder. In fine, Chicago can boast of being ahead of any city of twice its size in the theatrical line."

A nightly change of bill was made. On the evening succeeding the opening, Mr. Harris impersonated The Stranger, and Mrs. Hunt gave her fine rendering of Mrs. Haller. Mr. Marble, who had won much favor in the character of Sam Patch, presented that peculiar individual as he was supposed to have appeared while in France. The local press assured its readers that both Mrs. Hunt and Mr. Marble "threw the audience in tears," though from very different reasons.

Mr. Marble's engagement lasted until July 10, during which he delighted the public with such plays as "The Backwoodsman," "Forest Rose," "Stage-struck Yankee," "Black-Eyed Susan," etc. On the 10th, a benefit was given him. Commenting upon this event, the Democrat said:

"No person has been so solicitous of the welfare of the stage and has done more to build up the drama in Chicago than Dan Marble. Nearly ten years ago, entirely unsupported by other actors, and with every disadvantage, he came here and played, and ever since has made his periodical visits, when other actors of his rank could not be induced to come here. He was the pioneer in giving character to the theater in the West, and deserves liberally of Western people. He is the first actor in the comic line, and was received with great *clat* in the old country."

While Mr. Marble was deserving of commendation both as an actor of merit and a man of liberal instincts, we cannot but feel, that the award of highest distinction, as regards the founding of the drama in Chicago, should be bestowed upon McKenzie & Jefferson, rather than on Mr. Marble, whose work was that of a transient "star," not a local manager.

Rice's stock company proved a very satisfactory one, and speedily overcame, to a degree, the prejudice against the theater as a means of diversion. The Journal of July 1, 1847, observed: "We notice a large number of ladies—the beauty and fashion of the city—in nightly attendance." Again, on the 10th of July, it said: "We are aware that many, and conscientiously we doubt not, utterly proscribe the theater; but we have to learn that this proscription may not be carried to an extreme. For we believe that many a sin has been unjustly charged to the stage, the result of association, which in itself proves nothing, save that a reform in society generally, is demanded. In the case of the new theater, but few of these evils are attendant, and while we discountenance anything of an immoral tendency that may attach to the drama, we take pleasure in commending what is commendable."

T. D. Rice, the famous negro character impersonator, who gained notoriety in Europe and America as "Jim Crow," appeared July 12, as the special attraction at Rice's Theater. It should be remembered that this actor was not related to Manager J. B. Rice. The engagement of "Daddy" Rice, as he was popularly called, continued until July 17. The plays in which he appeared were "The Mummy," "Jumbo Jum," and a burlesque called "Otello."

The company received several valued additions during July. On the 12th of that month Mr. and Mrs. Jerry

Merrifield, comedian and vocalist, first appeared; and on the 22d Mrs. J. B. Rice's name was placed upon the bills. The opening piece, in those days was usually of an emotional character, and the evening's performance concluded with a farce or two. Among the many plays were "The Wife," "The Youthful Queen," "Perfection," and similar standards, in which Mrs. Hunt sustained the leading roles. Christy's Minstrels were here July 22, and remained one week, as an after performance. Among the dramas in which Mrs. Hunt achieved success, was "Clari, the Maid of Milan." The Journal, which rarely noticed the theater editorially, said: "The domestic drama of 'Clari' was enthusiastically applauded. Mrs. Hunt played with her usual grace and spirit. It seems to us, however, that in all the characters she has delineated, from the indignant Queen [Christine of Sweden] to the wronged and suffering maiden, there is a trace of something that belongs to no one of them, stamping them with a certain degree of similarity. This, doubtless, results from the variety of characters in which she appears. Mr. Phillemore's action and expression were well conceived and executed. Mr. Harris, as the Duke, evinced study." It would tax the mental and physical ability of any actress, we imagine, to present a new play every night.

On the 28th of July Mrs. Hunt played Claude Melnotte to Mrs. Rice's Pauline. One of the most popular of Mrs. Rice's characters was Nancy Scraggs, in the play of "Uncle Sam," and proved her versatility by supporting Mrs. Hunt in such dramas as "Jane Shore" and "The Hunchback," and then assuming the leading comedy lines in an eccentric farce. The Journal gave a flattering notice of Mrs. Hunt's Julia, which was said to be the finest work she had done.

James E. Murdoch first appeared in Chicago, at Rice's Theater, August 2, 1847, in "Hamlet," with Mrs. Hunt as Ophelia, Mrs. Rice as Queen, Mr. Harris as the Ghost, and Mr. Mossop as Laertes. The Journal said: "Murdoch's Hamlet was a grand and vivid conception, most powerfully embodied and realized in action, expression, tone. There was more than the resemblance of a soul in Murdoch's acting—the heart and soul itself. The performance of Mrs. Hunt, as Ophelia, was touchingly beautiful." The repertory included "Romeo and Juliet," "Macbeth," "Pizarro," and possibly other plays, though there is no mention of others. The Democrat of August 5, 1847, said: "The play of 'Macbeth' went off last evening, all parts being executed in the most splendid manner. The audience were well pleased, and they all speak of the play and players as excellent. * * Mr. Murdoch and Mrs. Hunt executed their parts in the perfection of the art." The approval of "Macbeth," as "an excellent play," indicates an advancement in public taste; and the *execution* of the parts sustained by the leading actors was doubtless designed to have no concealed insinuation that the roles were "murdered."

E. S. Conner was the next addition to the company, in August. He played "Richelieu," with Mrs. Hunt as Julia de Mortimer, and Mrs. Rice as Francois.

George Ryer, the fashionable tailor at that time, left the bench for the stage in the summer of 1847, appearing in "Hamlet." A benefit was tendered him September 1, on which occasion he re-appeared in that character. September 20, Mr. Ryer played Iago to Mr. Harris's Othello.

Mrs. Rice assumed the part of Rachael, in "The Jewess," which was put on the stage, according to the Journal, with more elaborateness than was ordinarily bestowed on plays here.

"Full of pageant—the imposing rites of oriental worship, the banner-bearing trains, the rich and gorgeous costumes, the solemn chants, and withal the fearful punishment of that elder time—there is yet much of strongly marked character in the play. The rude nature of the Jew was brought out with startling distinctness and softly relieved by the truthful, proud, yet forgiving spirit of Rachael, which Mrs. Rice impersonates with grace, feeling and effect."

The Democrat was stricken with amazement at the presentation of "Mazeppa," September 22, and exclaimed:

"No one but our enterprising Mr. Rice would ever have thought of playing 'Mazeppa' on the stage of Chicago. And then he does it so well as to attract the encomiums and wonder of all. To take a living horse, and one of our own 'sucker' horses, too, and make him run over a stage in the second story, is doing wonders for a new country."

Mrs. Hunt was absent from the company during a part of the summer. Her place as leading lady being filled by Mrs. Rice. She returned October 5.

Miss Julia Dean made her first appearance in Chicago, October 5, but the repertory cannot be given, owing to a hiatus in the newspaper files. This excellent actress was one of the most popular ladies on the stage, in standard emotional roles.

The season of 1847 terminated November 27. The several members of the company, in accordance with custom, received complimentary benefits during the last week or two; and on the final night, Mr. Rice was remembered by his friends. The programme included Jerrold's drama, "The Rent Day," the farce "Used Up," and musical selections by Mossop, Merrifield and the entire company in the Star Spangled Banner. Throughout the season Miss Homer continued to receive applause for her artistic dancing.

The first season at Rice's was, viewed in a modern light, moderately remunerative, and encouraged the manager to persevere in his efforts.

The incidental amusements of the year 1847 were concerts at the Saloon Building, during July, by the Antonio family; June & Turner's circus, September 23, and Rockwell & Co.'s circus during that month. Littlewood & Robinson occupied the theater in the Rialto as a dancing hall, at this period.

A museum and theater was conducted by Dr. E. Mooney, at 71 Lake Street, during the winter of 1847-48. Farces and light plays were given. The first amusement furnished in 1848 was by Winchell, who gave an entertainment at the court-house April 3.

Prior to the close of the season Mr. Rice visited Milwaukee, and arranged to take his company there for this winter. The venture proved a profitable one.

Mr. Rice re-opened his Chicago theater May 1, 1848. The company included Mrs. Rice, Mrs. Price, Miss Willis, Edwin Harris, Mr. and Mrs. Merrifield, James Carroll, Mr. Clifford, George Mossop, D. Sandford, William Taylor, C. H. Wilson, and J. W. Burgess. The orchestra was under the direction of C. Brookton; the scenery was painted by J. D. Beckwith, and M. Conklin was treasurer. Mr. Rice enlarged and improved his house during the winter. Dan Marble opened the season of 1848, on May 1, in "Sam Patch in France" and "The Wool Dealer." The farce of "Hunting a Turtle" was also given.

The evening of May 2, 1848, witnessed the first appearance in Chicago of James H. McVicker, who impersonated Mr. Smith, in the farce of "My Neighbor's Wife;" and of Mrs. McVicker as Louisa, in the Yankee

comedy of "Hue and Cry," with Dan Marble as Lot Sap Sago. J. Greene also made his bow on this occasion. Mr. Marble concluded the bill with "All the World's a Stage." The next evening Mrs. J. Greene made her debut. Mr. Marble remained until May 13, appearing each evening in a different character.

Julia Dean began an engagement May 15, in "The Hunchback," and while here gave "Evadne," "Fazio," "The Wife," "Love's Sacrifice" and her round of impersonations. One of the strongest characters assumed by this lady was that of Lucretia Borgia.

Mrs. Hunt resumed her place as leading lady May 31.

Edwin Forrest made his first appearance in Chicago Thursday, June 8, 1848, in "Othello," supported by Augustus W. Fenno, Mrs. Hunt, Mrs. Rice, Mr. McVicker and the stock company. This engagement was announced as his farewell to the Chicago stage, he having determined to retire permanently to private life. On Friday evening Mr. Forrest played "Hamlet," and on Saturday evening "Macbeth." The week beginning June 12 saw the great tragedian in "Richelieu," "Virginus," "Lady of Lyons," "Jack Cade," "Damon and Pythias," with "Jack Cade" again on Saturday, the 17th. The latter play was one in which he was never equaled by any actor. The final week of this eventful period was devoted to "Metamora," "The Gladiator" and "King Lear," the engagement closing Friday night, June 23. The occasion was made memorable by the delivery of what afterward became known, among the enemies of this great man, as his "loop-hole speech." When called before the curtain, at the conclusion of the play, Mr. Forrest spoke nearly as follows:

"I thank you, ladies and gentlemen, for this mark of your approbation, and I cannot withhold the expression of my gratification, that the Drama finds especial favor among you—long may it continue to do so. Wherever civilization has spread its humanizing influence, the Drama has been upheld by the wise, and the good, and although from time to time, it has been bitterly assailed by intolerance, bigotry and fanaticism—for it is much easier to condemn than to appreciate—and so scowling bigots still denounce the theater, as they once denounced the inspired teaching of Galileo; yet it has triumphantly withstood their attacks, and will continue so to do, so long as there is taste and refinement in the world to appreciate the genius of Shakspeare, or, so long as man is composed of those elements, which the great bard of 'all time' has so truthfully depicted. The Drama then has an indestructible existence—for it is the offspring of immortal MIND. It is more impressive in its teachings than any other medium of instruction—for it speaks at once to the ear, the eye, the heart and to the understanding, with most persuasive and convincing art. To say that the theater is liable to abuses, is to say nothing more than what is equally applicable to any other institution in the world, civil or religious. It is for you, therefore, to guard against such abuses, by indignantly frowning down any attempt to pervert the stage from its legitimate mission, the object of which is to show how peaceful and pleasant is the practice of virtue, how unhappy and hideous the practice of vice. And now, ladies and gentlemen, though I shall never again have the pleasure to appear before you in the difficult art which I have so diligently pursued, yet my interest in the progress and success of the Drama will cease only with my life—and while from the loop-hole of my retirement I hope hereafter to survey the still increasing growth and prosperity of your lake-born, beautiful city, I shall look also to find that the Drama is held in corresponding estimation among you."

Mr. Forrest's intentions were honest. He expected at that time to leave the dramatic field forever, but circumstances forced him to again return, after an absence of eighteen years. The final appearances of this master of tragic art will be found recorded in the subsequent pages of this work, under the period of 1866 and 1868.

Mrs. Hunt was married to Mr. George Mossop June 25, 1848, and appeared in "Fortunio" and "The Happy Man" June 26.

The current of events flowed smoothly on, with no especially noteworthy incidents, until the summer was wellnigh gone.

Junius Brutus Booth for the first time graced the Chicago stage September 18, 1848. He remained here two weeks, playing meanwhile to audiences surpassing any before assembled in Rice's Theater, and portraying as he alone could do the marvelous subtleties of "Richard III," "Shylock," and other Shakspearean characters. Mr. Booth's complimentary benefit was given September 30, when he appeared as Shylock, and as John Dumps in a farce called "The Ways of Windsor."

Barney Williams began an engagement October 3, which was his first season in this city.

The principal actors of the stock company were given benefits, prior to the closing of the regular term. Mrs. Rice appeared as Meg Merrilies October 23, and Mrs. Mossop chose the comedy of "The Jealous Wife" for her own benefit. The season terminated November 25, and the company opened the new Milwaukee theater November 29, 1848.

The principal amusements during the year, besides the performances at Rice's, were Mabie's circus, which gave a three days' exhibition, beginning May 8; Winter's chemical dioramas at the Saloon, May 29; General Tom Thumb at the court-house, June 2; and the regular exhibitions at Mooney's Museum, 73 Lake Street. Minstrelsy was introduced at this place by Prater's Genuine Virginia Minstrels and the "real-natured" Kentucky Minstrels, as they were called, during the summer. The manager of the museum was himself a curiosity. On the 8th of November, David Kennison, the sole surviving member of the Boston Tea Party, was installed as nominal manager. His advertisement read:

"I have taken the Museum in this city, which I was obliged to do in order to get a comfortable living, as my pension is so small it scarcely affords the comforts of life. If I live until the 17th of November, 1848, I shall be 112 years old, and I intend making a donation party on that day at the Museum. I have fought in several battles for my country. All I ask of the generous public is to call at the Museum on the 17th of November, which is my birthday, and donate to me what they think I deserve."

It is unfortunate that no authentic account of the proceedings of the 17th can be found, for the amount donated might serve as a criterion of Chicago's estimate of a patriot's services.

The season of 1849, at Rice's Theater, began April 16. The auditorium was bright with fresh paint, and a new drop-curtain, by J. D. Beckwith, representing Byron's "Dream," added to the attractiveness of the place. Mrs. Mossop was the leading lady for a brief time, but bade farewell to Chicago May 12, selecting for her last appearance "Agnes De Vere, or the Wife's Revenge," and "St. Patrick's Eve." The Democrat spoke of her departure with regret, and said, "When such ladies as Mesdames Mossop and Rice honor the stage, the prejudices of all reasonable persons will be

greatly mollified, and the drama become all that its best friends could wish it to be."

The death of Dan Marble, at Louisville, Ky., in the spring of 1849, from cholera, deprived the stage of one of its most popular comedians.

That terrible scourge, the cholera, swept over the country in 1849, and brought desolation to many a home in Chicago. The public mind became depressed with grief and fear, opening the way more surely to the ravages of the insidious invader. Melancholy was conducive to the fatal assaults of this disease, and many able writers at that time advised the employment of all available means to temper the mind in lighter vein. With this thought in view, the Democrat suggestively remarked, under date of May 24:

"The only place of amusement we now have in the city is the theater, and, so far as talent and character are concerned, it is supported by better actors than any theater of twice its size in the United States. Mr. Rice has just engaged two very justly popular actresses. Mrs. M. Jones has been for several years the leading lady in the principal theaters of New York, New Orleans, and other large cities. She is just from New Orleans, and is now on her way to fill a summer engagement in New York. She will appear to-night as Kate O'Brien, in the drama called 'Perfection.' Miss Julia Turnbull lacks only the merit of fashion of being a foreigner to be extolled as the best dancer upon the American boards. She appears to-night in no less than three dances, during the plays of 'Lola Montez' and 'Spirit of the Fountain.'"

Miss Turnbull soon became a favorite with the public here. The stock company was composed of nearly all of the people here in 1848, among whom Mrs. Rice, Mr. Harris, and Mr. McVicker were the most prominent. From time to time new faces were seen, for brief seasons. The conspicuous names were: N. B. Clarke, Mr. Holland, and Mr. Jamieson. Miss Julia Dean and Barney Williams returned, in their respective roles, and C. D. Pitt made his debut before a Chicago audience. The occasion of Mr. Pitt's benefit, August 31, was rendered notable by the address of Stephen A. Douglas, Thomas Hoyne, P. Maxwell, and more than a hundred other leading citizens, who united in offering him a complimentary night. The plays selected were "Bertram," and "The Taming of the Shrew."

Mr. McVicker's benefit, September 17, furnished the opportunity to produce, for the first time here, W. E. Burton's drama, "Ellen Wareham." The evening's bill also included: "The Artful Dodger," and "Sweethearts and Wives," with the beneficiary in all the plays.

James E. Murdoch played an engagement terminating November 10, 1849, at Rice's. A fac-simile of the play-bill is here reproduced. This is the earliest copy of a bill which has come into our possession, and was furnished by A. H. Burley, who obtained it from Miss Harriet M. Gale, of Exeter, N. H.

The season closed in November, and a review of the principal bills shows that the regular company of 1849 contained Mr. and Mrs. Rice, Mr. and Mrs. J. H. McVicker, Mr. and Mrs. D. Clifford, Mrs. Coleman Pope, Joseph W. Burgess, N. B. Clarke, William Meeker, J. H. Warwick, C. H. Wilson. Mr. Beaver, and J. D. Beckwith, scenic artists. Perry Marshall served as treasurer.

The Museum on Lake Street, already referred to, passed into the possession of Thomas Buckley, in June, 1849, who refitted it. A "lecture room," as it was called, was attached to this place of amusement, wherein

EXTRAORDINARY NOVELTY!

LAST NIGHT

Of the Engagement of the Distinguished Tragedian,

MR. MURDOCH

First representation of Schiller's great Tragedy of the

ROBBERS!

Which has been for some time in preparation with characteristic

Scenery, Appointments, Music, &c.

MR. MURDOCH as CHARLES DE MOOR,

As performed by him in all the principal Theatres throughout the U. S. & A.

This Evening, SATURDAY, Nov. 10th, 1849,

Will be acted the Tragedy of the

ROBBERS

Maximilian Count de Moor,		Mr. Clifford.	
CHARLES DE MOOR,		MR. MURDOCH	
Francis de Moor,	his	Young	Clarks.
Spindelberg,	sons,	Libertines,	Rice.
Switzer,	Roller,	afterwards	Smith.
Grimm,	Warwick,	Robbers,	Beaver.
Shasturie,	Burgess,		Meeker.
A Commissary,	Adams,		Devis.
Amelia,	Shepard,	Daniel,	Mrs. Rice.

PAS DE DEUX BY MISSES EMMONS.

The whole to conclude with the Farce of

THE ARTFUL DODGER.

Tim Dodger,	Mr. McVicker.	Harding,	Mr. Rice.
Quicksilver,	Warwick.	Flightly,	Meeker.
Cook,	Shepard.	Margaret,	Miss Helen Mathews.
Grudge,	Beaver.	Emily,	S. Emmons.

The following Songs and Dance incident to the piece.
"We're all a Dodging," Mr. McVicker. "Heigoo for a Husband," Mrs. E. Mathews.
Duett and Dance, by Miss Mathews and Mr. McVicker.

On Monday Evening, Mr. Murdoch's Benefit.

Boxes, 50 cts; Pit, 25 cts.; Boxes for Colored Persons, 25 cts

Doors open at half-past 8 o'clock; Curtain will rise at a quarter-past 7 precisely.

JOURNAL'S PRINT JOY, LAKE ST. CHICAGO

entertainments of semi-dramatic character were given. Music, professional dancing, and farces were the principal features. On Saturday afternoons a special performance was provided for the benefit of families and school children. This was the beginning of the matinee system in Chicago. Among the attractions advertised for the Museum were a group of figures in wax representing the Judgment of Solomon and also a figure said to represent Queen Victoria.

Mabie's circus gave four performances, beginning May 2, 1849, and Crane & Co.'s circus was here July 2, 3 and 4 of that year.

Mrs. John B. Rice withdrew from the stage early in the season of 1850. This event called out many exceedingly kind notices from the Press, one of which we quote. The Gem of the Prairie, under date May 4, 1850, said:

"We noticed some time since the formal withdrawal of Mrs. J. B. Rice from the Milwaukee stage, and took occasion at that time to express our admiration not only of the actress but of the woman, in all the relations of private life. Since the opening of the theater here, for the present season, Mrs. Rice has appeared nightly, to the gratification of her numerous friends. We learn, however, it is a pleasure that will be of but short duration, as she has determined to retire wholly from the stage in a very few days. The theater-going public will regret to learn the fact; but the motive which determines her course will doubtless prove satisfactory to all—a desire to devote her undivided attention to the care and training of her children. This is the first duty in importance, and Mrs. Rice has not forgotten it in the excitement and applause of the stage. We understand that there is a general wish among her friends to give her, on the occasion of her withdrawal, a complimentary benefit, that shall in some measure express their warm admiration of her talents as an actress, and their esteem for the many virtues which are exemplified in her private life."

N. B. Clarke was leading man and stage manager at Rice's, in 1850.

Mr. and Mrs. Barney Williams were here in July, of that year.

James E. Murdoch, supported by Miss Eliza Logan, presented a repertory consisting of tragedy and comedy, during the two weeks beginning July 15.

BURNING OF RICE'S THEATER.—The evening of July 30, 1850, was the most startlingly memorable in the history of this theater. A company composed of Miss Eliza Brienti, Miss Helen Mathews, Mr. Guibelei, Mr. Manvers and a home-chorus, aided by a local orchestra, introduced opera for the first time in Chicago. The event was one, however, which did not call forth a large audience. The little theater was far from being crowded. The curtain rose upon the pleasing scene of "La Sonnambula," and all went well, promising a most satisfactory inauguration of this advanced phase of dramatic endeavor. In the midst of the opera, however, the appalling cry of fire rang through the house. The audience started to their feet in terror. No signs of disaster were discernable, and for an instant it was believed the alarm was false. A moment later the warning cry was heard again, and serious injury to many might have ensued, had it not been for the presence of mind evinced by Manager Rice. Hastening to the footlights he cried, "Sit down! Sit down! Do you think I would permit a fire to occur in my theater? Sit down!" and, obedient to his command, the panic-stricken people paused, half assured by the peremptory tone that all was safe. But, while Mr. Rice was still standing on the

stage, some one from the prompter's place said, "Mr. Rice, the theater is on fire?" The alarm spread, and soon the building was cleared of its audience. J. H. McVicker was on the stage at the time. He began to pull down scenery, hoping to save something; but the flames spread so rapidly that everybody was driven away. Mr. McVicker hastened to his rooms, a few doors from the theater. Before he could reach there, that building was also on fire, and he was compelled to go to the Sherman house in his stage costume. He lost everything except the clothes then worn by him.

The cause of the alarm was the burning of stables on Dearborn Street, in the rear of the theater, owned and occupied by J. T. Kelley. So rapid was the progress of the fire that the audience were scarcely in the street before the stage of the theater was enveloped in flames. The firemen labored bravely to suppress the fire, but did not gain mastery over it until one-half the block was laid in ruins. The theater was totally destroyed, involving a loss of \$4,000 to Mr. Rice. Added to this material annihilation of his property was the interruption of business, and although the sum named seems inconsiderable at the present day, its real character is better understood when we take into account the fact that all things are relative. The disaster was a serious blow to Mr. Rice. It checked a prosperous career by summarily closing the season and disbanding the company in his employ.

But even great calamities have their humorous phases. A story is told at the expense of a somewhat noted character of those times, whom the chronicler refers to as Mr. B. From the Journal of that period we quote the following:

"Mr. B. and a small party of jolly English friends, who had been dining out, concluded to patronize the opera that evening, and Mr. B., whose rotundity was considerably better filled with the sparkle than the rest, had taken a front seat, and was saluting the song and sentiment of the occasion at every 'wait,' with unbounded applause, by clapping his hands and vociferating 'bravo! bravo!' Presently, like an electric shock, came the cry of 'fire!' The audience started suddenly for the doorway, though their retreat was checked to good order by Mr. Rice, who was on the stage at the time. Then all was confusion, and each member of the company, in endeavoring to save the properties, was rushing backward and forward across the stage. Meanwhile our friends outside had missed their comrade, and thinking perhaps he might have been injured, one of them stepped up to the boxes, just as the fire was bursting through the end of the building, in volumes, and Rice was crossing the stage with a side-scene on his shoulder. There sat Mr. B., solitary and alone, on the front seat, in perfect ecstasies at the performance, shouting 'Bravo! bravo! the most splendid imitation of a fire I ever saw!'"

The public sympathized (?) with Mr. Rice in his loss, and a movement was made to give him a complimentary benefit at the City Hall. The members of the opera company, and those who could sing of the regular company, volunteered. The profundity of the alleged sympathy was manifested by the numbers—who remained away from the concert; for when the receipts were counted, it was known that the munificent sum of *sixty dollars* had been taken at the door!

The opera company visited Milwaukee, where a brief season of their so-called Italian opera was given. The lines were rendered in Italian by those of the party who could speak that tongue, and in English by those who could not.

Mr. Rice took the majority of his own stock to Milwaukee, in August, and played to light business until January, 1851, when he terminated his labors there. Mrs. Mossop was with Mr. Rice at Milwaukee in September.

Meanwhile, undaunted by the destruction of his Chicago house and the wretched returns for his Milwaukee endeavors, Mr. Rice at once set about building a theater in this city. A lot on Dearborn Street, south of Randolph, wherein Launder's livery stable formerly stood, was purchased, and arrangements at once made to construct a brick theater. The building was eighty by one hundred feet in size.

Prior to the opening of the Milwaukee Theater, Mr. McVicker, Mr. Archer, and other members of the company started on a provincial tour, hoping thereby to relieve present pecuniary distress. They played at Aurora, Naperville, St. Charles, and other towns, returning to Chicago August 19. Mrs. Coleman Pope went to Boston and Miss Mathews to New York.

An incident is related by Mr. McVicker which illustrates the trials of those days. The price of admission in country towns was but twenty-five cents. While in St. Charles one of the citizens waited on Mr. McVicker, who was regarded as manager, although the company was a commonwealth affair, and said, "See here, my family is five in number—the old woman and three children; the oldest eight and the youngest four. So I think you ought to let me see the show for a dollar." Mr. McVicker assented. The next day his patron returned, and said, "See here, your show put my boy asleep, last night, and he didn't see any of it; so I think you ought to give me back a quarter." McVicker argued that he had received but twenty cents each; but the man silenced him by saying, "Well, I know; but its worth twenty-five cents to carry a boy home when he's asleep!" The quarter was refunded.

TREMONT HALL was fitted up after the burning of Rice's Theater, and used by local and traveling companies. This hall was located in the Tremont House, and was a large dancing-room, facing on Lake Street, over the dining-room of the hotel.

The Bateman children, Kate and Ellen, then but five and seven years of age respectively, first appeared in Chicago, at Tremont Hall, November 18, 1850, and gave three performances. The opening bill embraced a wide range of characters. The precocious girls were supported by a company in comedies, and gave costume scenes from "The Merchant of Venice," "Macbeth," and "Richard III." The plays produced were, "Old and Young," with Kate in the quadruple role of Matilda, Gobbleton, Hector, and Tuffington, while Ellen impersonated Peter; and "Swiss Cottage," with Ellen as Natz Teik, and Kate as Lisette. The length of this entertainment alone is sufficient to exhaust the strongest actress, and when the youthfulness of these marvelous children is considered, it becomes painful to contemplate. The following evening the bill was repeated. November 23, at a benefit performance, there were given a scene from "Macbeth," and the plays "Paul Pry," and "A Day after the Fair."

After the burning of the theater, dramatic affairs naturally waned for a time, and nothing of importance transpired subsequent to the departure of the Batemans.

RICE'S SECOND THEATER.—John B. Rice completed his second theater in January, 1851. The building stood on Dearborn Street, between Randolph and Washington streets, eighty feet front by one hundred in depth. It was of brick, with cornices of galvanized iron. The cost of the structure was \$11,000. Those who devised and erected the edifice, under Mr. Rice's supervision,

were: J. M. Van Osdel, architect; C. & W. Price, masons, and Updike & Sollett, builders. The stage scenery and drop curtain were painted by J. D. Beckwith; the stage machinery by Morris & Watson. The orchestra was under the direction of Mr. Le Brun.

The company contained Mr. and Mrs. Rice, Mr. and Mrs. McVicker, Mr. Hann, Mr. Warwick, Mr. Archer, and Mr. and Mrs. Gilbert, the latter being also dancers. Mr. McVicker at this time became Mr. Rice's stage manager.

Manager McVicker, in his lecture entitled "The Press, the Pulpit, and the Stage," relates an incident of the days which taxed both the ingenuity and the ability of actors to their utmost. He says:

"In Chicago, during my time, some good old days have passed. No manager was ever more loyal to his patrons than J. B. Rice, who built the first regular theater in this city in 1847. His companies were necessarily small, but he expected each member to be competent to act many parts and set the example by doing so himself. He would act two or three important characters in a play, and if numbers were wanted he would throw a black cloak over his other dress and act the mob with a spirit that would appal the villain of the play. He was a general actor and thoroughly understood the requirements of his profession and how to surmount difficulties. He would argue and convince an ordinary star that it was better to hang William, in the drama of 'Black-Eyed Susan,' from the limb of a tree than from the yard-arm of His Majesty's ship—when he had no ship in the theater. In time I became his stage manager. On one occasion 'Othello' was to be given, but when night came I learned that the leading man who was to personate Othello had gone out to dine with a party of gentlemen at a suburban hotel, and could not possibly be back in time to commence the play. Rice was a stickler for giving his audience the play the bill announced, and as I had heard him say he had acted everything in Buffalo, I went to his room where he was dressing for the Duke, and without letting him know the situation I said: 'Mr. Rice, did you ever act Othello?' He looked up with a pride which can only be appreciated by a professional Shakspearean character, and replied: 'Yes, in Skaneateles.' 'Well,' said I, 'now you shall have a chance in Chicago,' and then I told him how matters stood. He expostulated—would rather dismiss the audience—but he had made me his manager and I would be obeyed. Othello was announced and the audience must not be disappointed while it was in my power to give the play. He desired me to apologize to the audience, but I argued that would only attract attention to his weak points, and the audience would discover them soon enough. I did not believe in advance apologies. He dressed for Othello; I, in addition to Roderigo, with the aid of wigs and robes, assumed the characters of the Duke and Desdemona's uncle, and the play went on, Rice acting Othello and swearing at the leading man. He knew most of the lines and, like a well-trained actor, had the faculty of omitting that which he did not know in a pleasing manner. He labored through three acts, when the absent Othello appeared upon the scene. I told him to prepare to finish the play, and I notified Rice that I had no further use for his services that night, as Mr. McFarland would finish the part. He was thankful and resigned, and so the audience had two Othellos, one for the first three acts weighing about two hundred and forty pounds, and for the last acts one weighing about one hundred and fifty pounds. A short time since my

attention was called to this incident by an old play-goer, who had just witnessed Salvini as Othello, saying: 'Mack, Salvini is good, but no Othello has ever satisfied me since I saw Rice and McFarland in the part. That was a realistic Othello—a fine, noble looking one in the first part of the play, and a thin, cadaverous one at the end, making it appear as if the Moor had lost flesh when his domestic troubles began. Salvini cannot reach that point of excellence.' Chicago has grown so rapidly that the primitive and mature days of the drama 'tread upon each other's heels,' and I am frequently asked by the old play-goers, who now feel like retiring before the play is over, if we have as much fun at the theaters now as in the 'good old times?' We do, but of a different kind. Much of the mirth in new places is of a personal character, a familiarity between actor and audience, which disappears with age and large populations. Early impressions cling to us; the flavor of a peach is better during the first decade of our existence than when we are three-score. The peach is as good, perhaps better, but we have lost our taste, and frequently blame it on the fruit. So, with many, the good old days of the drama are those of youth and familiarity, and can be found now by those who emigrate to Dakota, Leadville, or New Mexico; but those who remain at home will, upon observation, find that in all its appurtenances and comforts, in all its illusions and effects, in all that makes the theater attractive, the stage of to-day exceeds its forerunner in brilliancy as much as the electric light outshines the tallow dip."

The new house was opened to the public February 3, 1851. The curtain rose upon the assembled company, who sang the Star Spangled Banner, after which Mrs. Rice delivered an address prepared for the occasion, but of which no copy is extant. The bill contained three plays: "Love in Humble Life," "Captain of the Watch," and "The Dumb Belle."

Mrs. Rice, it will be noticed, for a time resumed her place upon the stage, this year, as leading lady.

Mrs. Louisa Mossop, who had for several months been starring, was married to Mr. John F. Drew, at Albany, N. Y., January 26, 1851.

After the death of Dan Marble, Mr. McVicker conceived the idea of purchasing from his widow the plays and costumes of the "great Yankee comedian," and during the winter of 1851 carried it into effect. In this move he was heartily seconded by Mr. Rice, who kindly set apart a week which was wholly devoted to the production of the plays, in which Mr. McVicker assumed the Yankee characters. Meeting with a success which was as flattering as, perhaps, well deserved, in the rendition of the new comedy parts he had assumed, Mr. McVicker resolved to retire from the stock company and venture before Eastern audiences as a star. His popularity in the West was acknowledged, and the Press of this city bestowed upon him the warmest praise. The last months of his stay in Chicago were devoted to hard study and careful preparation. He appeared nightly in a round of comedy parts that would astonish modern actors, but attained so marked a degree of success in them that adverse criticism was almost unknown. The undertaking proved a wise one, for Mr. McVicker soon became a favorite in Eastern cities. The New York Mirror, in August, 1851, remarked: "Mr. J. H. McVicker, formerly of the Chicago Theater, who has been playing an engagement at the National, in this city, has made himself highly popular at this house, and very deservedly so. He is a man of talent, and will become the best representative of Yankee characters on the

stage, if we are not much mistaken." Mr. McVicker continued as a Yankee star in this country until 1855, when he went to Europe, playing twelve weeks in London. He then returned home and assumed the management of the "People's Theater" in St. Louis, which position he continued to hold until, in 1857, he returned to Chicago to build his first theater.

In March of 1851 the old and vexing question of high license came up again. It was now fixed at \$25 per month. As it was no inconsiderable tax upon Mr. Rice's resources, he presented a petition to the City Council asking a reduction of only \$5 per month from the sum he was then paying. The prayer of the petitioner was not granted; whereupon the Daily Journal took occasion to inquire of the Common Council whether or not it wouldn't be well to confiscate Mr. Rice's property at once and be done with it.

Among the leading plays which in that month held the boards, were "The Drunkard," played March 26, on the occasion of a benefit being tendered to Mrs. McVicker, "The Jewess," on the 27th, "Carpenter of Rouen" and "Beacon of Death," "Lady of the Lake," "Macbeth" and others.

March 6, 1852, F. S. Buxton, a prominent man at Rice's was given a benefit, at which "The Cricket on the Hearth," and a farcical afterpiece satirizing the woman's rights question were played, Mrs. Coleman Pope taking the leading female characters. Mrs. Pope's benefit, March 29, was the occasion of that lady's appearance as Nina Sforza, in a tragedy of that name, and as Mrs. Lyonel Lynx, in "Married Life." The ability of an actress in those days was tested in so crucial a manner.

Susan and Kate Denin were complimented by a benefit, under the especial patronage of Mayor Gurnee and one hundred citizens, April 24, after a successful engagement at Rice's.

The theater was given up to vaudeville entertainments for a time in May. On the 17th of that month Mrs. Warner, the tragedienne, began a round of legitimate dramas—"Winter's Tale," "Macbeth," "The Hunchback," "Ingomar," and "The Stranger." The supporting company included Mrs. J. B. Rice, Mrs. Coleman Pope, Mrs. Frary, Mrs. Marble, Mrs. Farron, Mr. Buxton, Mr. Hann, Mr. Warwick, and Mr. Samuel Myers.

Miss Julia Dean, supported by H. A. Perry and Mr. Dean, her father, opened a season May 31. The same evening Mr. and Mrs. McMillan, comedians, made their first appearance in Chicago. Mr. and Mrs. Danforth were engaged at that time as dancers.

The Democrat of June 14, 1852, paid the following tribute to Mr. Hann, on the occasion of his benefit and last appearance, at that date: "Mr. Hann has now been for two years Mr. Rice's leading stock actor, and during that time has won his way to a popularity and sterling reputation which is seldom the lot of a stock actor to enjoy. He is preferred by many to most of the stars who visit us."

Mr. Hanley succeeded Mr. Hann in the company.

The sensational drama is not a modern incubus upon art. As early as July 7, 1852, a play called "The Cattle Stealers," introducing trained dogs and partially trained actors, was given at Rice's. Various changes were rung on this combination plan, and the impersonation of an ape was successfully achieved by one of this company, which was managed by Messrs. Cony & Taylor.

Benjamin DeBar began a star engagement here July

22, supported by M'lle. Valle. Among their plays were: "The Disowned," "Esmeralda," "Peter Wilkins," and "The Bronze Horse."

Joseph Parker, the comedian, was at this house in July, and Mrs. Julia Bennett, the genteel comedienne, played a star engagement during August. Mr. Couldock was also billed for a short season, in Shakspearean tragedy.

J. H. McVicker returned to Chicago, as a star, August 31, 1852, in "The People's Candidate," with "a first-rate political stump speech and patriotic song," supported by Mrs. McVicker, Mrs. Rice, and the full company. The Democrat of September 8, said:

"Mr. McVicker's engagement has proved very successful, and he may now be considered one of the most attractive stars we have. The theater has been crowded. But while we admit 'Mac' to be a host in himself, we must say that he has received no little aid from the appearance of his wife. Although she is not starred in the bills, she has hosts of admirers. Her voice is not powerful, but there is a sweetness of tone that entrances the hearers, while the depth of feeling she transmits to language leads them to believe they are gazing at reality."

The number of stars then traveling was very small. Miss Dean made her appearance here as often as three or four times a year. Mr. Neaffie, the tragedian, appeared October 21, 1852, and J. B. Roberts November 8. "The Corsican Brothers" was a popular success with both of these actors, and their repertory included "Hamlet," "Macbeth," and leading tragedies.

A benefit was given, November 22, 1852, the fire company, at which Mr. Kerrigan made his debut, and "acquitted himself creditably." Over \$200 was realized.

Among the favorite members of the stock company during the fall of 1852, were J. G. Hanley, H. T. Stone and Mr. and Mrs. Ryner.

December 13, 1852, was presented "a new play called 'Uncle Tom's Cabin,' dramatized by Mrs. Anna Marble." The cast was as follows: George Harris, Mr. Hanley; Uncle Tom, Mr. McMillan; Shelby, Mr. Myers; Haley, Mr. Rice; Sambo, Mr. Stone; Wilson, Mr. Wright; Cassie, Mrs. Ryner; Emeline, Mrs. Putnam; Eliza, Mrs. Hanley; Mrs. Shelby, Mrs. Marble; Legree, Mr. Ryner. Topsy and Marks were not given, nor were the bloodhounds and donkey thought of. The play made a decided hit, running about three weeks, which was an unprecedented time in those days of rapid changes.

In 1852 the first German theater was erected in Chicago on West Randolph Street near Canal. Its existence, however, was so brief that it scarcely figures at all in the development of the drama here, as it burned early in the following year.

The season of 1853 opened at Rice's, February 28; the programme for the first night, was first the comedy, "Married Life," followed by "The Jacobite," the whole concluding with a mask ball. In this entertainment Mr. McVicker appeared in three different characters. The roster of the leading attractions for the year were March 5, "Paul Pry," Mr. McVicker in the leading role, "Ingomar, the Barbarian," with H. A. Perry as Ingomar; 7th, "Sweethearts and Wives," with Mr. McVicker as Billy Lackaday, the afterpiece was "Family Ties, or the Will of Uncle Josh;" 8th, "The Wife" and "The Toodles;" 9th, "Much Ado about Nothing" and the "Peoples' Candidate;" 12th a new play first presentation in this city, "Writing on the Wall;" the leading characters were: Box Smithers, H. A. Perry;

Fergusson Trotter, Mr. McVicker; Margaret Elton, Mrs. Ryan; Lotty Smithers, Mrs. Rice. P. T. Barnum's museum and menagerie was here July 25. The leading features of Mr. Barnum's show at that time were a lot of wax statuary, the renowned Tom Thumb, and a man born without arms in the museum department, while the menagerie was made up of a small collection of animals, among which was a cage of performing lions, under the control of Pierce, the lion tamer. At the same date, Miss Julia Bennett began an engagement at Rice's, lasting until August 1, closing with a benefit performance for herself. July 23 a complimentary benefit was tendered Mrs. Rice; the "Heir at Law" being the piece presented on this occasion, closing with the amusing farce "Box and Cox." August 16, Julia Dean appeared in the "Hunchback," playing a week's engagement. September 10, Mr. and Mrs. W. J. Florence in the drama "Ireland as it Is" and "The Limerick Boy," and on the 26th of the month Miss "Charlotte Loyette" made her first appearance in this city at Rice's. On the 15th J. M. Mitchell, a young actor from Southern's Theater, New York, made his first bow to a Chicago audience, as Cecil Claud, the young fisherman in a new play, the "Smugglers of Northumberland;" the 28th a benefit was tendered to Mrs. Marble, at which her daughter, Miss Mary Marble, made her first appearance on any stage as Madelaine in "The Child of the Regiment." At the same performance Mr. and Mrs. Florence also appeared in a comedy, "Irish Assurance." Of the acting of Miss Marble the daily Journal said:

"The debut of this young lady was most creditable. On her first appearance she was greeted by the spontaneous cheers of the audience, and as the play proceeded she was loudly applauded. The two songs, which were given with great sweetness and beauty, were encored, and at the conclusion of the piece Miss Marble was called before the curtain, when Mr. Rice tendered his thanks for the warm welcome which had been given her, on her entrance into a profession of which she had now become a permanent member.

"Taken altogether, the first appearance of this young lady—yet scarce fifteen—affords abundant promise of a bright future, and with proper study and application, claims to no second place in the profession, may be expected for her."

October 1 was the occasion of a farewell benefit tendered the Florences, and on the 3d is noted the return of Mr. and Mrs. McVicker in their play "Home of the West," concluding with the farce "Hue and Cry." On the 12th Mr. Neaffie began an engagement, playing "Macbeth," until the 25th. The month closed with an entertainment given by the Italian Opera Company. November 8 Mr. Couldock began a week's engagement, opening with "Willow Copse," and playing successively, "Hamlet," "Othello," "Richelieu" and "Betrothal."

December 10 it was announced through the Press that the play of "Uncle Tom's Cabin," having been through a six weeks' course of preparation, would shortly be presented with new and realistic scenic effects, to contain also a panorama of the Mississippi, painted by the scenic artist R. D. Smith. The 12th, Christie's Nightingale Serenaders appeared at North Market Hall, and on the 28th a performance was given at Rice's for the benefit of Engine Company No. 1. The programme on this occasion was the rendition of a new drama, the "King and the Freebooter," after which was presented the comedy "Lend me Five Shillings," concluding with the farce, "Hidden Thoughts or Fashionable Society."

January 4 and 5, 1854, Campbell's Minstrels were

at Tremont Hall. This company was a popular one, and at that time had among its members such well-known talent as Luke West, Matt Peel, Joe Murphy, and others of scarcely less notoriety in the profession; the 12th Miss A. D. Hart closed an engagement at Rice's in which she had appeared as Clari in the "Maid of Milan," also in a new play "The Farmer's Daughter," in which she took the leading character. In February, little Cordelia Howard, the talented child actress, left this city to fulfill an engagement in Philadelphia. The Florences were also here in that month, closing their engagement on the 25th, with a benefit performance. Early in March came Maggie Mitchell who, as the critics then said, "united a very charming person with spirited and graceful acting." On the 3d of the month, the occasion of her last appearance here, she was presented by her friends with a handsome gold watch. April 8, the Marsh Troupe began, at Tremont Hall, the presentation of a new dramatization of "Uncle Tom's Cabin," by George L. Aiken. The play as then given contained six acts, nine tableaux and thirty-three scenes. The cast was as follows:

Infant Woman Geureneau.....	Eva
Little Mary Marsh.....	Little Harry
Master A. Marsh.....	Aunt Ophelia
Mrs. Marsh.....	Mrs. St. Clair
Mr. Marsh.....	Uncle Tom
Mr. G. C. Germon.....	George Harris
Mr. Le Moyne.....	Deacon Perry
Mr. Douglass.....	Lagree
Mr. Lennox.....	Cute
Mrs. Lennox.....	Topsy
Mrs. G. C. Germon.....	Cassie

The company was a good one, and on the opening night Tremont Hall was packed with a delighted audience; but the following day trouble arose between the manager of the company and Mr. Couch, the proprietor of the hall, which resulted in an abrupt termination of the company's engagement.

May 11 Butler's Circus opened for a short season on Lake Street, between Wabash Avenue and State Street. June 12, 13 and 14, the circus and menagerie of E. T. & J. Mabie, exhibited at the corner of State and Polk streets; and on the 23d and 24th of the month Dan Stone's Railroad Circus and Hippodrome also spread its canvas within the "city's gates."

June 21, Miss Kimberly appeared at Rice's in "Hamlet." This lady was a talented actress, and met with a hearty reception in her delineation of this and other parts, at the hands of her Chicago audiences. The Democratic Press said: "Her personation of 'Hamlet' was stamped with the spirit of genius." On the 26th, at the request of Mayor Wilkinson and many other prominent citizens, she repeated her performance in this play on the Friday (June 30) following. On the 27th, Mrs. Hayne appeared in the "Priestess." July 2, Maggie Mitchell began a two-weeks engagement at Rice's, her second appearance in this city. The 21st, Sir William Don, an eminent comedian, held the boards a short season, playing to crowded and delighted audiences. The Press said: "Sir William Don possesses an inexhaustible fund of comic humor, which, after the manner of Leicester, Buckstone, Burton and Placide, cannot fail to betray the most obstinate stoic into a hearty laugh. We know not when we have enjoyed so unrestrained and refreshing a bravo! bravo! as we had on Tuesday night, on seeing him perform in the play of a 'Rough Diamond.' On the 23d, a complimentary benefit was given to Mrs. John B. Rice, at which the following persons appeared: Sir William Don, Mr. Warren, Mrs. Rice's brother, and

Miss Thomain of the Boston Museum; the principal pieces, from which selections were presented were "The Heir at Law" and "Rough Diamond." At that time Miss Eliza Logan was in the second week of a successful engagement, playing in Sheridan's comedy, "School for Scandal." Concerning this lady the Daily Press said: "In passages betraying the strong passions of scorn, hate and revenge, she is very effective in voice, expression and gesture; but in the exhibition of the more tender emotions she does not do so well."

August 13, John Brougham, the eminent English comedian, began an engagement at Rice's, playing in the standard English comedies of the day.

September 5, a notice appeared in the Democratic Press, that Phelps's Burlesque Ethiopian Opera House (Warner's Hall), 104 Randolph Street, would be opened on the 8th of the month for the production of minstrel concerts, under the direction of Daniel D. Emmett; L. Phelps, proprietor. The 10th, Mr. and Mrs. W. J. Florence began a season of two weeks at Rice's, playing to large and appreciative audiences.

October 9, just before the rise of the curtain, the manager announced from the stage the death of Mr. Artemus, one of the company, in consequence of which no performance could be given. The 15th, Miss Caroline Richings and her father were at Rice's. L. G. Butler's North American Circus opened November 29 for a short season, on the grounds corner of Lake Street and Wabash Avenue.

In the Democratic Press of January 20, 1855, is found the following notice which, without comment, explains itself: "Little Cordelia Howard has reached Chicago, and commences an engagement on the 22d at the theater. She played Eva, in "Uncle Tom" for one-hundred nights in New York, and has also won laurels as Little Katy in "Hot Corn," and the Strawberry Girl in "Fashion and Famine."

February 19 the Sable Melodists, in connection with the panorama "A Voyage to Europe," began a week's engagement at North Market Hall.

Early in March the Florences played another engagement at Rice's, their last appearance in this country before their departure to Europe, so said the bills. The latter part of the month brought the Richings again, father and daughter, playing "Clari, the Maid of Milan," and "Court Favors."

The first circus of the season, Spalding & Rogers's Combined Attractions, made its appearance April 11, showing four days at corner of Clark and Adams streets. Under date of May 3, the Press had the following notice: "Metropolitan Hall has been taken by some enterprising individual, who is constructing a stage at the north end. Under the name of Metropolitan Atheneum, it will be opened May 7, by Mrs. Macready, in dramatic readings."

The music was furnished by an orchestra, engaged from New York, for this new place of amusement.

On that same date, Mr. Anderson, the tragedian, began an engagement at Rice's theater. May 10 Mr. Samuel Myers of Rice's theater was married in this city to Miss Mary Marble, who it will be remembered, was the daughter of Dan Marble, the eminent comedian. The nuptial knot was tied by Rev. Mr. Hibbard, a Chicago clergyman. On the 18th Mr. Collins, the celebrated Irish comedian and vocalist, was at the Atheneum, and on the following evening Mr. Anderson closed his engagement at Rice's. The 26th Cordelia Howard the comedienne, began an engagement at the theater, and on the same date Bachus's Minstrels were billed at the Atheneum.

June 1, the Great Western Railroad Circus put in an appearance, showing four days; on the same date, Mrs. Julia Dean Hayne was announced in an engagement at the theater; the 13th a poem from the pen of Ben. F. Taylor, of the Journal, was spoken, by Mr. McFarland, as an address of welcome to an excursion party, the guests at the city—from Burlington and Quincy; the play on this occasion was the "Lady of Lyons," Mrs. Julia Dean Hayne, appearing in the part of Pauline. On the 21st Sands, Nathan & Co.'s American Circus, exhibited on the grounds usually allotted to tent shows, corner of Lake Street and Wabash Avenue.

July 3 and 4, came VanAmburgh's Menagerie and Dan Stone's Circus, combined with Tyler's Indian Exhibition, followed on the 30th of the month by the Great Western. July 31, Mr. Frank Conway and wife began a short season at the theater, in a range of Shakespearian characters.

An hiatus, now occurs, until in October, when the records again show what was occurring in the amusement world. The 26th of the month, Miss Richings the comedienne and vocalist was at Rice's, being succeeded on the 29th by Miss E. L. Davenport and Miss Fanny Vining.

November 10, the papers announced that North's National Amphitheater was nearly finished. This building, which was situated on Monroe Street between Clark and South Wells (now Fifth Avenue), was a wooden structure, two stories in height, ninety feet front by two hundred and six feet in depth, and was built by Levi J. North and Harry Turner. The main entrance was eighteen feet wide, besides which were two stairways, each eight feet wide, leading to the boxes in the gallery. Its seating capacity was three thousand and sixty-two persons; it had a performing ring forty-two feet in diameter, and the building was lighted by one-hundred and twenty gas jets. In the rear were the accommodations for the company, also stabling quarters for an entire stud of horses. The amphitheater was opened on the 19th of the month, when it became for its class, a popular place of amusement.

December 5, a performance for the benefit of Mr. Myers was given at the theater; performances were given during the month by the Slvik Company; Christmas night a benefit was given to John McNally the doorkeeper of the theater, which position he had held for five years. The bill for the evening was "The Game of Love," and "Ladies Beware."

January 22, 1856, as spectacular piece "Cinderella," with forty children in fairy or gala dresses, and a droll afterpiece, "The Cavalry," was announced at North's Amphitheater, to run until further notice.

February 7, Neaffie appeared at Rice's in the "Corsican Brothers." The Ethiopian Opera House, under the management of Dan Emmett, Frank Lumbard, musical director, was also giving nightly entertainments, in burlesque opera and negro minstrelsy; the 13th, Mr. Neaffie was playing at Rice's in "Jack Cade;" on the 18th Couldock began an engagement in "Richelieu;" the Florences were here on the 25th.

March 17 is noted the engagement of the Misses Denin at the theater.

April 4, at the Atheneum a complimentary benefit was given to Mr. and Mrs. D. L. Scott; on the 7th, Miss Eliza Logan, the tragedienne, began an engagement at Rice's; she was a popular and pleasing actress and a favorite with Chicago people.

A German theater was opened on the 19th, in a new building, at the corner of Wells and Indiana Streets; several stars, among the number Mme. Kenkel and

Mlle Dremmel, and a strong stock company were engaged; the piece for the opening night was one of Schiller's dramas, "Love and Intrigue;" it was well presented, so said the critics, producing a decided sensation and at once establishing the claims of the company to public favor; beginning on the 28th, and continuing the week following, were Campbell's Minstrels, numbering fourteen performers, at Metropolitan Hall.

May 5, Christy's Minstrels were billed at the Amphitheater, and the following day Merhling & Co.'s Circus exhibited on Lake Street, opposite the American House. This was followed by Sands, Nathan & Co.'s Circus, exhibiting at corner of Lake Street and Wabash Avenue, May 26, 27 and 28. June 11 and 12 came still another, this time Raymond & Van Amburgh's Circus and Menagerie; on account of the immense size of the tent, which was three hundred feet long by one hundred feet in width, the show was compelled to make its stand at the corner of State and Harrison streets, where more ground could be obtained. The Hutchinson family were at Metropolitan Hall on the 30th, and the week following, while at the same time Maggie Mitchell was playing to crowded houses at Rice's theater.

July 2, three circus shows were in the city; one, Herr Driesback & Co., on Clark between Polk and Harrison, the other Butler's Great Western, on Lake Street, near the City Hotel, and the third the United States Circus of Older & Co., at Lake Street and Wabash Avenue. The same day Colonel Wood opened a museum, containing eight living wonders, at 101 Lake Street. The 19th, 20th, and 21st brought June's French Circus; the 24th, Mr. Pfeiffer, a German actor of note in his own country, made his first appearance in this city, in a play presenting a period in the life of Schiller, the poet.

The Democratic Press of the 28th had the following:

"NEW THEATER.—The demand of the amusement-seekers, for a more commodious theater than the one built for the Chicago of five years ago—quite a different place from the Chicago of to-day—is about to be satisfied. North's Theater has been leased and remodeled, and will be opened August 4, by the lessee, Charles Thorne."

The company comprised Mr. and Mrs. Thorne, Charles Thorne, Jr., Mr. McClosky, and L. G. Mestayer; Miss Emily Thorne, Miss Cogswell, Miss Hanson and Miss Julia Smith, from the New York and Philadelphia theaters; also D. H. Howard, from Laura Keane's New York Theater, and C. Wilson, formerly of Rice's Theater. The piece for the opening night was the well known comedy, "The Honeymoon" with the following cast:

Duke.....	Mr. Charles Thorne
Rolando.....	Mr. Mestayer
Jacques.....	Mr. Johnson
Count.....	Mr. W. H. Thorne
Balthazie.....	Mr. St. Maui
Lopez.....	Mr. I. Crouta
Campillo.....	Mr. C. Wilson
Juliana.....	Mrs. C. R. Thorne
Volante.....	Miss Emily Thorne
Lamoria.....	Miss Allen

After the comedy, was given a grand National Jubilee performance, commencing with the singing of the "Marseillaise," by Miss Thorne with a full chorus. The "Star Spangled Banner," by Mestayer, St. Maui, and Miss Thorne, with the latter attired as the Goddess of Liberty, concluding with "Hail Columbia" by the whole company. The evening's performance concluded with the comedy of "Simpson & Co."

But the adage of "There's many a slip 'twixt the cup and the lip," proved but too true in the case of the opening performance of the new theater. On the evening in question, fully one thousand people assembled in front of the theater, either expecting to attend the performance, or to learn why the doors were not opened. They found, however, a card posted by Mr. Thorne which read as follows:

"To the Citizens of Chicago and the Public in General:

This is to inform the public why I do not open the Amphitheater on Monroe Street as I intended and advertised—and I now make an appeal to the people. I leased the building of Mr. Harvey, the agent of North, up to October 1, certain, with a notice on either side, to quit after that date. I have gone ahead in good faith. I have fitted the house in good and costly style, at an outlay of \$2,500, and now, when everything was finished, between twelve o'clock at night and five in the morning, men under the direction of Mr. Harvey, agent of L. J. North & Co., proceeded to take possession of all my effects. I am a stranger in this city, but an American. I am aware that I have recourse to law, but I have a company of twenty-five persons on my hands, and you, fellow-citizens, all know the law's delays. I throw myself for sympathy and protection on the citizens of Chicago.

"C. R. THORNE"

To this card Mr. Harvey replied with another, reading as follows:

"The statement of Mr. Thorne is untrue in every material assertion. C. R. Thorne never had a lease of North's National Amphitheater, he never had legal possession of the building, and neither I nor any one by my direction has taken possession of any effects or private property of C. R. Thorne.

"ANDREW HARVEY."

Whether all this war of words was only a shrewd advertising dodge on the part of Mr. Thorne, aided and abetted by Mr. Harvey, or whether *bona fide* legal difficulties had arisen, does not clearly appear. At any rate, whatever was the difficulty, everything was satisfactorily adjusted, and on August 12 the new theater was opened with great *eclat*, the programme already given being produced in full. On the 28th a benefit performance was given to Mr. Mestayer, at which Miss Kate Denin appeared in the play of "The Wife." The following day the Daily Press, speaking of the National, as this theater was now called, said: "The National is having an auspicious season thus far, which demonstrates that Chicago has become too large to be satisfied with one small theater and an illiberal management. Miss Kate Denin plays again to-night as Julia in the 'Hunchback,' and will, no doubt, be greeted with as large an audience as on last evening. The performance will conclude with the 'Irish Emigrant.'"

August 21, General Tom Thumb began a week's engagement at South Market Hall.

September 1 the bill at the National for the week following was "Love and Murder," "The Soldier's Daughter," and "The Irish Suitor." The 12th was the occasion of a benefit performance tendered to Miss Thorne; the bill was first, "Asmodeus or Little Devil's Share," followed with the comedy, "My Sister Kate," and concluding with "A Capital Match."

The 17th, Buckley & Co's National Circus exhibited at the corner of Clark and Adams streets. During that week Campbell's Minstrels were playing at Metropolitan Hall; Billy Newcomb was at that time a member of the company. On the 19th Dan Emmett, the proprietor of the variety show bearing his name, and located at 104 Randolph Street, announced for sale the lease, fixtures, scenery, etc., of his establishment. His reasons for offering his property for sale are quaintly put in his own words thus: "I have entered into an agreement to quit the profession, whereby I can realize more than if I were to remain in the minstrel profession all my life, with all the success I could desire." It is

scarcely necessary to add that Mr. Emmett did not at that time retire from minstrelsy, as in later years he achieved the reputation which placed him at the very head of the profession. On the 21st John E. Owens made his first appearance in this city at the National; and on the 29th Mr. Collins, the Irish comedian and vocalist, commenced an engagement at the same theater, playing in the comedy, "The Nervous Man and the Man of Nerve."

October 1, Spaulding & Rogers's North American Circus was first on the list of attractions; on the 5th "Hamlet" was on at Rice's, with Mr. Ledley in the leading part, and Mr. McVicker as the Grave-digger. On the 7th Mr. Thorne's company played the last performance at the National under his management; the next night they appeared at Metropolitan Hall playing "The Irish Ambassador." The reasons for the change above mentioned are apparent from the following notice taken from the Daily Press of October 18:

"Within the last few weeks, North's Amphitheatre has been enlarged, two tiers of seats have been added looking toward the ring and stage, also a dress circle and gallery capable together of seating three thousand persons, have replaced the old arrangements. The ring for equestrian performances is the same size as before. Behind it the building is to be finished into a spacious stage, green room, property room and all the adjuncts of a first-class theater. It is Mr. North's intention to combine the attractions of the circle with those of the stage. The performance will generally commence with feats of the ring, and close with plays on the stage."

On the 28th of the month Miss Emma Stanley, in her celebrated "Lyric Drawing-room Entertainments," was billed at Metropolitan Hall, and at the same time Miss Logan was playing to good houses at Rice's Theater. November 16 Yankee Robinson opened what he called his Atheneum, at the German Theater on Kinzie Street. The same date also marks the opening of North's New Amphitheatre. On the 29th at Rice's was announced the engagement of Chanfrau in "In and Out of Place." December 1, at Kinzie Hall was the English Gymnastic and Pantomime Troupe. During this month the performances at North's Amphitheatre were of the most popular character, drawing crowded audiences night after night. The 2d, Chanfrau was again at the Chicago Theater playing in the "Widow's Victim or the Stage Struck Baker;" on the 9th he was followed by Miss Kate Denin in the "Lady of Lyons," Miss Denin appearing as Claude Melnotte, and Miss Woodbury as Pauline. For the remainder of the year the leading attractions at this theater were, on the 12th, "Bride of Lammermoor" and the "Gypsy Farmer;" 15th, "Ernest Maltravers, or a Father's Curse;" 17th, the "Idiot Witness, or the Murder of the Heath;" 18th, "A Grandmother's Pet;" 19th, "A Momentous Question, or a Woman's Faith;" an afterpiece on this occasion was a three act drama by Major Richardson entitled, "The Massacre of Fort Dearborn." On the 23d appeared Mr. and Mrs. Locke, in "True Love Never Runs Smooth;" 24th, the same company in "Hermit of the Rocks."

William McFarland was manager of Rice's Theater in 1856.

Public sentiment was no less divided in those days than in the earlier moments of the drama here. A strong feeling of opposition was encountered by managers, who were obliged to contend against the disadvantage of limited numbers in point of attendance. As an indication of this phase of antagonism, we quote from the Congregational Herald of October 2, 1856, which edi-

torially said, as counsel to the parents of those who were attracted to the growing city of Chicago :

"We advise your sons who come to reside in the city not to attend the theater. Should they tell you that they must attend a few times in order to know what it is, we think it will not be difficult to show them that they have no need to attend for this reason. * * * No judicious parent would recommend his son to visit a liquor saloon a few times, and participate in its carousals, in order to know what it is. He surely would not advise him to try his hand at the gambling table, till he had for himself experienced the effect of winning and losing, of cheating and lying. Nor could such a father advise his son even once to enter a den of ill-fame, that he might know from observation and experience what it is ; and the same reasons which would dispense with an experimental knowledge in these cases would also excuse him from attending the theater even once. Not that the theater is, of necessity, so low a place as these others, and yet the same reasoning holds equally pertinent and conclusive. There is no reason that one should visit, in order to know, while the influence of the first visit might be such as would never be shaken off. The first visit would, in most cases, lead to a second, and the second might introduce the series with all its train of cause and consequence. * * If, as many parents do, you have taught them [the sons] that it is always best they should touch and taste and see for themselves, even though the touch should be defiling, the taste poisonous and the sight polluting, they will doubtless on their taking up their residence in the city, feel at liberty to 'go the rounds;' and if they do so, when they have been once, they will be still more inclined to repeat the circuit. This is the law, and if your sons do not follow it, they will come under the exceptions and not the rule. We, therefore, cordially invite them not to go the first time. Visits to such places are a poor investment of time, and, in the most favorable issue, bring no gain, but are often attended with incalculable loss. If entire bankruptcy of character and entire ruin of soul for time and eternity do not ensue in the case of your son, his will be one of the favored cases. * * We need men who, from principle, will be more diligent in business than others ; and yet who, in their diligence, will not bow down to the God of this world. * * We need more than Christian statesmen. * * We need more who can stand at the very head of their departments in business, and at the same time be the support of all good institutions. * * But the foundations of such a character can never be laid in the theater."

C. W. Couldock, supported by Miss Woodbury and Mrs. Pennoyer, opened the year 1857 at Rice's, as Luke Fielding in the "Willow Copse." His repertory included "Richelieu," "Othello," "The Iron Chest," "Lear," and "School of Reform;" but in the character of Luke Fielding the most popular success was attained. This play was originally played by Madame Celeste ; but when she saw Mr. Couldock in the leading role, she at once sent the manuscript to him as a token of her profound appreciation of his acting, and never afterward appeared in it.

The company, regularly employed in 1857, contained Mr. and Mrs. McFarland, Mrs. Marble, Mrs. Altemus, Mrs. Pennoyer, Mrs. Linden, Miss Woodbury, Mr. Wright and Mr. Myers. The house was leased February 23 by Perry Marshall, and managed by J. G. Hanley.

The stars who held dates during the year, were J. W. Wallack, Jr., January 26 ; Mr. and Mrs. Florence,

February 10 ; Maggie Mitchell, for three weeks from February 23, with a constant change of bill, which did not include "Fanchon," as this was several years prior to her success in that character; Mrs. Farrem, March 16; Miss Irving, March 18; J. H. Hackett, March 30, in Rip Van Winkle, Falstaff and farces; Mr. Neafie, in tragedy, April 14; J. S. Wright, in comedy, with "Yankee" Robinson in his company; Lola Montez, who failed as an actress, April 28, in the play "Lola Montez in Bavaria," "Follies of a Night" and "Rosalie Boget;" Ione Davenport, May 18; Couldock, as Louis XI, June 8; the Raval family and Blondin, July 1; Mr. and Mrs. Conway, August 3; F. S. Chanfrau, August 31; John Brougham, as Micawber, October 19; Mr. and Mrs. J. W. Wallack, October 26.

Rice's theater then changed hands, William McFarland becoming its lessee and manager, and U. P. Harris treasurer. The season of 1857-58 opened in November, 1857, with "The Corsican Brothers." Frank Lombard sang the Star Spangled Banner, a song so popular with the actors and audiences that, from the night Mr. Hardinge first sang it at the Baltimore Theater, October 19, 1819, no theater could be opened, apparently, without the introduction of the stirring melody.

The erection of McVicker's Theater in 1857 (for history of which see second volume of this work) and the opening of Metropolitan and Bryan halls, attracted the more popular companies from this house. It gradually lost its hold on public favor, and in 1861 was converted into a business block.

The first regular bill-poster in the city, of whom mention is made, was S. C. A. Lattridge, who was in business in 1852.

MUSIC.

The history of music, in a high professional sense, begins at a comparatively recent date, subsequent to the period treated of in this volume, although in an amateur way it is coeval with the settlement of the city. Take from Mark Beaubien his famous fiddle and you deprive his memory of one of the most conspicuous adjuncts of his primitive life.

On the authority of statements made by Gurdon S. Hubbard and Hon. John Wentworth, it is recorded that the first piano brought to Chicago was the property of John B. Beaubien, probably in 1834. Soon after that date Mrs. J. B. F. Russell, Mrs. J. H. Kinzie and Samuel Brooks brought pianos here; to which number, as time rolled on, others were added by those who, besides their love for music, possessed the means to enable them to become the owners of instruments so costly as were pianos in those times. Undoubtedly the first musical organization in this city was the Chicago Harmonic Society, although the exact date of this institution cannot be ascertained. It was, however, as early as December, 1835; for on the 11th of that month it gave its first concert at the Presbyterian church, the proceeds going to the benefit of the association. As this was also without question the first public concert given in Chicago, the programme on that occasion is not without interest. It was as follows:

PART FIRST.

The Allegro movement in the Overture to Lodoiska.....Krietzer.
Wreath—Glee for three voices.....Mazinghi.
"While with ceaseless course the Sun".....Webbe.
"Di tanti Palpiti".....Rosini.
"Behold, how brightly breaks the morning".....Masiello.
Sprig of Shillalah, with variations—Violin Solo.....Lewis.
"Oh! Lady fair"—Glee for three voices.....Moore.
Nightingale—Favorite Military Rondo.
"O, sing unto the Lord"—Anthem.....Whitfield.

PART SECOND.

Soldier tired—Celebrated movement in Artaxerxes.
 The Muleteers—Duet.
 La Flora..... Mozart.
 Canadian Boat song—Glee for three voices.
 "Away with Melancholy," variations—Violin Obligato. Lewis.
 Deep Blue Sea—Glee for three voices.
 Dead March in the Oratorio of Saul.
 Schoolmaster—Glee for three voices—Basso Obligato—Violoncello
 Accompaniment.
 To commence at half past six. Tickets 50 cents.

How long this society flourished it has also been impossible to ascertain, but its life was probably of short duration. In January, 1836, the records show that it gave its second concert at the Presbyterian church; after this it is not mentioned.

With the coming of Isherwood & McKenzie, the theatrical managers in 1837 singing became more popular; for between the plays, of which there were usually three given each night, ballet dancing and vocalization relieved the tediousness of "the waits." Among the most popular singers of those days was Joseph Jefferson, Jr., then a lad of about ten years. With the removal of the theater to the Rialto, on Dearborn Street, began not only the foundation of the drama in Chicago, but also of the musical art. The year 1839 was the most remarkable of any, from the settlement of Chicago to 1847, in point of dramatic representation; and music necessarily received from the prosperity of this kindred art a consequential benefit.

Among the very early notable managers who visited Chicago with a musical company was P. T. Barnum, who brought Master Diamond, a negro delineator, thirteen years of age, "Yankee" Jenkins, a tenor singer, Signor Marriotte and Falocinni. Three concerts were given at the Saloon, November 25, 26, and 27, 1840. John A. Still entertained the public at the Saloon, August 17, 1841, and during the dramatic engagement of Miss Porter and Mrs. Duff, at the theater, in March, 1842, music formed a special feature of the performances. The Chicago Sacred Music Society was instituted February 13, 1842. The officers were: B. W. Raymond, president; Benjamin Smith, secretary; T. B. Carter, treasurer; Seth P. Warren, C. A. Collier, directors; W. H. Brown, E. Smith, executive committee. During the summer of 1842 Mrs. Powell played an engagement at the theater, and, although a tragedienne of no mean ability, that lady won the favor of her audience by her excellent singing. In fact, the local press of that time suggested the advisability of her lessening the tragic intensity of "Othello," on the occasion of the production of that play, September 14, by the rendering of "Strike the Light Guitar" between the acts. It is not recorded, however, whether the lady accepted the advice or not. H. Cramer, who resided on Clark Street, between Washington and Madison, and Charles Sofftje, who lived with John H. Kinzie, were professional instructors in music in 1844. One T. B. Carter is also spoken of as the first singing master in Chicago, and although no date is given of his labors in this field of instruction, yet he was doubtless here several years before either of the gentlemen above mentioned. Mrs. Strangman, organist at the Catholic church, gave a concert at the Saloon, January 5, 1843. The record for 1845 shows that the Slater sisters, performers on the viola and violoncello, appeared at the Saloon January 23. In May Mr. Cutter and his company were at the Western Museum, and on the 12th of that month gave a concert at the Saloon. Master Howard, who was declared to be the "young Ole Bull," demonstrated his facility with the violin, at the Saloon, May 15, and Mr.

Hazelton conducted a concert December 22. Concerts were also given in this city, during the year by others whose names cannot now be recalled.

Hazelton and Clemens did much to foster musical tastes during the winter of 1845-46, and by repeated public entertainments of genuine merit, encouraged vocal and instrumental culture. Concerning the character of their entertainments, the Democrat, of February 18, has the following:

"Hazelton and Clemens's concert came off last night (February 17, 1846), and the audience, which was large, was delighted with the performance; and if it is creditable to our community to patronize these efforts to excel and please on the part of our city, the performance was still more so as to the performers. It was announced that the concert would be repeated again with variations, in both vocal and instrumental pieces, when those who lost the opportunity of hearing the rich melody last night, and those who enjoyed it, will avail themselves of the rich treat."

An anonymous correspondent of the Democrat, under date of May 5, 1846, also wrote:

"I had the pleasure of being present at a private concert given by Mr. Hazelton and his juvenile choir, at the City Saloon, on last Saturday afternoon (April 26), and may safely say that all present were highly delighted. The Newhall family give high promise of becoming splendid vocalists. The two little nightingales, one only five and the other six years old, are charming creatures, and reflect great credit on their zealous and experienced instructor."

A society called the Choral Union was formed in 1846, with the following officers: A. D. Sturtevant, president; A. S. Downs, secretary; J. Johnson, first leader; S. P. Warner, second leader; J. A. Hosington, third leader. The organization continued about two years.

A benefit was given Samuel Johnson, at the Universalist church July 2, 1847, on which occasion the programme was composed principally of ballads and glees. Mr. Wall, the blind harper, was at the Saloon July 15. A more imposing entertainment was that given at the court-house December 21, under Signor Martinez's direction. An orchestra of twelve pieces furnished the instrumental portion of the programme, and "a young lady, a celebrated vocalist from the East," whose name is lost to history in this connection, sang. The Signor himself astonished and delighted all by "holding a guitar in each hand and performing Mozart's melodies, waltzes, overtures and other popular airs." A "soiree musicale" was given by theb and of the steamer "Louisiana," five in number, at the Saloon, December 17; a "grand concert on the piano," at the theater, by B. Auguste Bode, December 27; and a plain concert by A. R. Dempster, assisted by local amateur talent, at the Saloon, January 5, 1847. A repetition of this performance was requested by the citizens, January 19.

The Alleghanians, a troupe famous in their day, first sang here December 7, 1848. In May, 1848, a musical convention, composed of delegates from the various religious denominations in the city, was held in the First Baptist church. The object of the convention was to discuss for adoption the best measures for securing the advantages of a general musical education of the young of the city; the adoption of the study of music in the public schools, and the mode of conducting singing in church services. The officers of the convention, which met on the 9th, were: George Davis, president; L. D. Boone and S. P. Warner, vice-presidents; B. W. Thomas, secretary. A committee consisting of L. D. Boone, George Brown, S. D. Breed, C. B. Nelson and D. S. Lockwood, submitted the following resolutions, which were adopted as the sentiments of the convention:

1. *Resolved*, That music is naturally in the soul, and if properly exercised, is one of the most powerful of all means used for the elevation, spiritually, of mankind.
2. That instruction in vocal music should begin in public and

private schools, and it is the duty of those who have the management of them to provide for said instruction.

3. That exercise in vocal music is conducive to health, and all who have at heart the physical, as well as the spiritual welfare of mankind, will advocate its study.

4. That like all choice blessings which are bestowed on mankind, through the beneficence of God, music, as well as other gifts, must be cultivated to insure the benefits resulting therefrom.

5. That the "musical ear," when possessed to any degree, may be improved by study, but cannot be produced where originally deficient.

6. That it is the duty of choirs to study sacred music, and assist in imparting to religious services that spirit of devotion which their duty properly performed enables them to do.

It was also resolved that, in the opinion of the convention, congregational singing was the most desirable method to be employed by religious bodies.

The Misses Newhall and Perry sang at Market Hall, March 22, 1849.

Professor Nathan Dye's first juvenile concert, consisting of sacred music, was given at the First Baptist church, April 3, 1849. Rev. J. B. Tucker delivered a lecture on the importance of instructing children in the elements and practice of vocal music, during the evening.

The Empire Minstrels, a company composed of E. D. Palmer, J. F. Taunt, G. G. Snyder, I. Gardiner, E. L. Baker, R. H. Sliter, J. H. Goodrich, G. W. Vining, musical director, Williams & Hubbard, proprietors, gave an entertainment at the city hall, May 15, 1849. The special attraction was Sliter's "appearance in his popular rattlesnake jig statue dance and Lucy Long in character."

The Alleghanians returned May 25, 1849, and the Columbians first sang July 15 and 16, at the City Hall. Conrad Charles Reisenger, a pupil of Ole Bull, was here in August, and David G. Griswold, aided by amateur vocalists, gave an elaborate concert September 27.

Mozart Society was formed December 4, 1849, by the members of the late Choral Union; C. N. Holden, president. At the initial meeting, the constitution of the defunct organization was adopted, with the exception of the name of the society. The officers elected were: George Davis, president; A. D. Sturtevant, secretary and treasurer; A. Runyon, C. N. Holden, S. Johnson, executive committee; W. N. Dunham, first director; Frank Lumbard, second director; W. B. Aiken, third director. It should here be noted, that George Davis, whose name has already been mentioned in connection with several of the earlier leading musical organizations, was always an active and indefatigable worker in promoting the advancement of musical culture in the city. He was himself a pleasing and popular singer, and was highly esteemed as a man and citizen by all who knew him.

During 1850 concerts were given by various traveling companies. Joseph Burke, violinist; Richard Hoffman, pianist, and George Davis, vocalist, were at the court-house June 28. The Original Ethiopian Serenaders sang at the city hall September 24. A concert-room was opened in the Tremont House, called Tremont Music Hall, in October. This room was one hundred by forty in size, and seventeen feet in height, and was "lighted by forty-eight burners in massive chandeliers." The inauguration took place on the 24th of that month, by the first concert of the Philharmonic Society under Julius Dyhrenfurth. This society which had just been organized was a most promising institution, and the first concert, given on the occasion just mentioned, was the first of a series of eight subscription entertainments given with the object of placing the organization on a permanent financial basis. Following

is the programme presented at the opening of this new hall:

1. Potpourri—Fille du Regiment.
Orchestra.
2. Song. (With vocal quartette accompaniment.)
3. Violoncello Solo. Carlino Lensen.
4. Comic Song and Chorus. Weinman.
5. The "Chicago Waltz". Lensen.
Composed for the occasion.—Orchestra.
6. Vocal Trio. Messrs. Davis, Lumbard and Dunham.
7. Polka—French Song. Lensen.
Orchestra.
8. Medley Overtures (Negro Airs). Dyhrenfurth.
Orchestra.
9. French Grand Chorus. Weinman.
(With full orchestral accompaniment, arranged from "Precioso.")

November 20, the Alleghanians were at Tremont Hall, and December 6 and 7 Van Wormer's Minstrels. A company bearing up under the terrific name of the Campanologians, with Herr Freebertshyer and his three sons gave a performance. Mrs. Reignolds, and her daughter, Miss C. M. Reignolds, sang in concert December 23, and on the 26th, Frank Lumbard's Glee Club delighted the public.

In 1851, the Baker family was the first troupe to appear, singing at Tremont Hall January 2. On the same date Julius Dyhrenfurth began a series of promenade concerts on Tuesday evening of each week at the City Hall. The order of exercises at these concerts was first music, then promenading, after which dancing closed the entertainment. It was not long until the young people became more interested in dancing than in the music and came so late to the concerts that Mr. Dyhrenfurth wisely discontinued them.

The Kilmiste family, consisting of father and three daughters, gave a concert at Warner's Hall January 1, 1852. Mr. Weinman also gave subscription concerts in Dearborn Park during the summer evenings of 1851 and 1852. The second series of Prof. Julius Dyhrenfurth's subscription or Philharmonic concerts began January 5, 1852, at Tremont Hall, and entertainments were given from time to time, at brief intervals during the year. Among the number Henry Ahner also gave a series of concerts at Old Metropolitan Hall.

The professional musical events of the year 1852 were: February 2, Malone Raymond and family, Tremont Hall; the Blakely family, February 7, at Tremont Hall; Rose Jacques, vocalist, Henry Squires, tenor, and Herr Brandeis, in concert at Tremont Hall, April 5, an occasion remembered as one of the most satisfactory to the public of those early days; Miss Greenfield, "The Black Swan," April 22, at Tremont Hall; Kunkel's Minstrels, at City Hall, May 13, 14 and 15; Catherine Hayes, in concerts, at Tremont Hall, June 21 and 23; Alfred Howard, the violinist, whose first appearance here was in 1845, when but a lad, July 12; Monsieur and Madame Thillon, Frederick Holmes and Mr. Hudson, at Tremont Hall, July 16, in concerts; Mrs. Emma G. Bostwick, who became a favorite with Chicago people, assisted in concert August 2, by Henry Appy, the noted violinist, Felix J. Eben, flutist, and Herr Herold, pianist, a pupil of Mendelssohn; Nathan Dye's music class, August 5, at the Indiana-street Methodist Episcopal church; Mrs. Bostwick's second concert, at Tremont Hall, August 6, on which event the Democrat said: "Mrs. Bostwick has achieved one of the greatest triumphs ever obtained by a public singer in this city." Felix Simon, violinist, August 16; the Baker family, at Tremont Hall, August 16; Mr. Kemmerer's juvenile class of two hundred pupils, September 30, at the City Hall; Campbell's Minstrels, Tremont Hall, October 4 and 5; a musical convention,

directed by William B. Bradbury, and lasting three days, at Warner's Hall, beginning October 26; Campbell's Minstrels, return engagement, October 15 and 16; John Muir, the Scottish vocalist, aided by Mr. and Mrs. Kerrigan, November 6; and Well's Minstrels, beginning December 8, lasting one week.

FIRST OPERA IN CHICAGO.—The first opera season in Chicago was inaugurated under what were far from flattering auspices, and its duration was confined to a very small part of a single evening's entertainment. On the evening of July 30, 1850, an opera company consisting of Mr. Manvers, Mr. Guibelet, Mr. Lippert and Miss Brienti, assisted by a home-chorus and orchestra, began the first season of opera ever given, or rather ever attempted, in this city. The piece for the opening night was "Son-nambula," and the place of presentation Rice's first theater, located on Randolph Street. A fair audience was present to witness this initial performance and everything had progressed smoothly until the rising of the curtain on the second act. At this juncture the alarm of fire was given, and in an hour's time, the theater in which the opera was progressing lay in ashes, involving a loss to its owners of over \$4,000.* Thus abruptly terminated, before it had even fairly begun, the first opera season in Chicago. Undaunted by his ill-fortunes, Mr. Rice soon purchased a lot on Dear-born Street, and immediately began the erection of a new theater. From this time until in October, 1853, no operas were given. The second season of this class of entertainments began in Rice's new theater on the 27th of October, 1853, and lasted one week. The company was the Italian Opera Troupe from New York. In the Democratic Press preceding the opening of the season the following card from the manager of the troupe is found:

"The undersigned, acting in the name and in behalf of Madame De Vries and Signor L'Arditi, known by the name and style of the Artists' Association, has the honor of calling the attention of the musical community and of the citizens of Chicago in general, to the fact that he has made arrangements with Mr. Rice, the manager, to have the Italian Opera Troupe on Thursday evening, October 27, at the Chicago Theater, to perform the opera, in three acts, of "Lucia di Lammermoor." The undersigned begs leave to introduce the following artists: The grand prima donna, Signorina R. De Vries, the favorite tenor, Signor Pozzolini, the tenor Signor Arnoldi, the comprimaria, Mme. Sidenbourg, late of Madame Albani's troupe, the unrivaled baritone, Signor Taffanelli, and the eminent basso, Signor Calletti. Also a grand and efficient chorus, and grand orchestra. This great company numbers over forty members, the whole under the most able direction of the distinguished maestro, Signor L'Arditi.

C. POGLIANI.

The leading characters in the opera were cast as follows:

Lucia.....	..Signora R. De Vries.
Elgardo.....	..Signor Pozzolini.
Lord Asthoro.....	..Signor Taffanelli.
Lord Aurthur Bouchsland.....	..Signor Barattini.
Raimond.....	..Signor Candi.

This was no doubt a meritorious company of artists and were well received by both press and public.

Among the musical events for the year 1853, none equaled in importance the coming of those justly celebrated characters in the musical world, Adelina Patti and Ole Bull. These famous artists made each their first appearance in this city, at Tremont Music Hall, April 21, of that year. The season of this company consisted of three concerts given April 21, 23, and 26. The appended programme of the opening night illustrates the excellent character of the entertainments.

PART I.

1. Overture from Rossini's Grand Opera of "William Tell," performed by M. Strakosch.

* See History of the Drama.

2. Madame Sontag's celebrated Cavatina from "Lindi di Chamouni" "Pluce di quest'anima," sung by Adelina Patti.
3. The Mother's Prayer. A Fantasia Religiosa, composed and executed by Ole Bull.
4. "Ah non giungi," the celebrated Rondo Finelle from "La Son-nambula," sung by Adelina Patti.
5. Paganini's famous Witch Dance, performed by Ole Bull.

PART II.

1. The banjo, a new Capriccio Characteristic, composed and performed by Maurice Strakosch.
2. "Comin' through the Rye," the favorite Scotch ballad, sung by Adelina Patti.
3. Grand National Fantasia, for the violin, alone performed by Ole Bull.
4. Jenny Lind's "Echo Song," sung by Adalina Patti.
5. "The Carnival of Venice," by Ole Bull.

Tickets of admission to these concerts were one and two dollars, and with each one was given a certificate, bearing the number corresponding to the ticket. These certificates were to remain in the hands of the original holders, and established their ownership to their seats. In May following, Ole Bull and his company returned and gave a concert in the same hall, for the benefit of the Norwegian Lutheran Church; the affair was a success, netting five hundred dollars to the beneficiary. On the 18th of June, an excellent home concert was given at Warner's Hall by the pupils of Henry Lippert, who was, at that time, a popular and efficient teacher of music in Chicago. On June 29, Signorina Balbina Steffamore, a prima donna, assisted by Mrs. Amelia Patti Strakosch, and the wonderful boy violinist, Paul Julien, appeared at Tremont Hall two nights, June 29 and 30.

In November was announced the revival of the subscription concerts of the Philharmonic Society, under the direction of Christopher Plagge. In that month the New York Italian Opera Company returned, singing this time only in operatic selections. On the last night of their stay they gave a "grand sacred concert." Early in March, 1854, the Blakey family appeared at Tremont Hall, and on the 21st, 23d and 25th of the month Ole Bull and Adelina Patti gave a series of their popular performances at the same place. In May the Philharmonic Society held its yearly meeting for the election of officers. Charles N. Holden was re-chosen as president; the other officers were A. D. Tittsworth, vice-president; R. G. Green, treasurer; and I. D. Cole, librarian. The directors of the society were J. W. Bogue, Henry Johnson, C. H. Lawrens, J. Q. Thompson, A. D. Tittsworth, J. T. Jewett, C. O. Thompson and W. H. Rice. This organization was at this time in a flourishing condition, having in January and February of this year given a series of concerts which, aside from being popular and pleasing entertainments, had netted it handsome financial returns. On the 24th of May the Germanic Musical Society gave a concert at Tremont Hall, in which appeared in solo parts M'lle Caroline Lehman, a vocalist from his Majesty's Theater at Copenhagen, Carl Zarrhn, flutist, W. Meyers, English horn, I. Shuetz, clarionetist, and F. Thriede, bassoonist. September 21, the Philharmonic Society gave a re-union in the First Baptist church, on which occasion the musical exercises were conducted by Prof. Carl Bergmann, subsequently one of America's noted musicians, the newly elected director of the association. On the 26th the new Metropolitan Hall was opened with a concert by Frank Lombard, assisted by the best musical talent in the city, including instrumental selections by the Garden City Band. Of this new hall, and this the initial performance, the editor of the Press said, "This is the finest hall in the city. We would rather hear Frank Lombard and his assistants sing one evening in plain

Saxon, than to hear all the Italian artists in christendom screech and squall until doomsday."

The vocal score was made up of the following persons: Miss C. Hugunin, soprano, Miss Mary Bristol, alto, A. Marechall and H. C. Boutwell, tenors, J. B. Thompson, baritone, J. G. Lombard, basso. In October a local company, the Metropolitan Serenaders, gave a concert at Metropolitan Hall, and on the 17th of the month the Chicago "Freier Sangerbund," a new musical organization, gave its first concert at North Market Hall. In this month the New York Italian Opera Company en route for St. Louis, New Orleans and other southern cities gave one entertainment at Metropolitan Hall. At the same hall November 21, the Philharmonic Society gave a concert, composed of classic and modern selections; this was conducted by Professor Bergmann and was a pronounced success. In the early part of this month the Ole Bull and Strakosch troupe again visited the city, playing to packed houses, and giving a rich and varied programme, which in excellence and style of rendition was of the very highest order. In the closing month of the year concerts were given by the Philharmonic Society and an Italian Opera Company, headed by Madam Rosa de Vries, who it will be remembered, sang here in the previous year.

It is worthy of note that in the year 1854 the first music printed in Chicago, from movable music type, was set in the composing rooms of the Literary Budget, by Joseph Cockroft; the words to the music being written by Francis Clarke. In January there appeared in the Budget a piece of music, a song—"It will be all right in the morning." The words were from the pen of the poet Benjamin F. Taylor, the music by J. Dyhrenfurth. Also another a few weeks later, "The Moonlight Serenade." This piece was composed and arranged by George P. Graff, of this city, and dedicated to Miss Anna M. Edwards, of Rockfort, Ill. The piece was sung by a club calling itself the Moonlight Harmonists.

The year 1855 opened with a concert, by the Philharmonic Society at Metropolitan Hall, being a benefit tendered to Henry E. Lippert, the popular music teacher. In February came the Continental Vocalists at South Market Hall, and early in March the American Harmonic Opera Troupe appeared at Metropolitan Hall. In April, the Peake family of Swiss bell ringers, and a few concerts by local companies, made up the list. Among the leading companies here during the remainder of the year were, Madame De Vries, the Campbell Concert Company, M'lle. Theresa Parodi, the Hutchinson family, Christy's Minstrels and Adelina Patti. A notable local entertainment was given at Phelps's Burlesque Opera House, by Frank Lombard's "Best Quartette in the World," which consisted of Frank Lombard, J. G. Lombard, R. Sylvia and M. J. Ritter.

In January, 1856, the Ephonians, a local society, gave a concert at the Metropolitan Hall, and in February an entertainment at the same hall was given by volunteer performers, for the benefit of St. Paul's Lutheran Church. In May the Alleghanians returned and appeared at Metropolitan Hall. In this month, too, M'lle. Theresa Parodi, assisted by Mme. Amelia Patti Strakosch and Mr. Arthurson, under the direction of Maurice Strakosch, gave two concerts, which were among the notable musical events of the year. June 27 Ole Bull, assisted by Adelina Patti, surnamed the young Malibran; Signor Morino, baritone; Louis Schreiber, cornet player, and Franz Rath, pianist, were at Metropolitan Hall. In July, at the same place, appeared Madame Albamowicz and Herr Ernest Jaeger,

pianist. August 20 and 22 the Pyne and Harrison English Opera Company gave two excellent concerts at Metropolitan Hall, the programme embracing selections from the popular English and Italian operas. In September a local company gave, at German Hall, a comic opera, "The Village Barber," and the papers also announced others in course of preparation. On the 29th Mrs. Emma Gallingham Bostwick, assisted by Henry D'Antin and W. H. Curry, and orchestra by the Great Western Band, gave a grand concert at the Metropolitan Hall. In November Henry Ahner began a series of Saturday afternoon concerts at this Hall, and on the 10th of the month M'lle. Theresa Parodi and company appeared for the second time during this season.

The only event of note in the closing month of the year was the appearance of a troupe, the New England Bards, in a series of holiday concerts. On Christmas night a benefit was tendered to Frank Lombard, at which the New England Bards assisted.

In this sketch of the growth of musical culture in Chicago, no attempt has been made to discuss it as an abstract theme. Glancing over the subject in its mere chronological presentation, the deductions are apparent, in fact unavoidable, that in the earliest days Chicago was made up of a music-loving people. The fact is also broadly presented that in this, as in everything which tends to ennoble, elevate and refine, its people have ever striven, and with that success born of earnest effort, to attain the highest standard of excellence. Marked as has been the progress in musical taste and culture from 1835 to 1857, the period treated in the present chapter, yet a still more surprising advancement remains to be noted in the succeeding years, the history of which must form a part of the other volumes of this work.

EARLY LITERATURE.

WILLIAM ASBURY KENYON.—It is not strange that in the earlier history of Chicago there is a paucity of local literature. A people engaged in the work of building for themselves homes and habitations; in a comparative wilderness, and in reclaiming the soil from a state of nature, until it blossoms and teems with the fruits of their civilizing labors, have but little time at their command which they can devote to literary pursuits. Still, among those who were pioneers in this particular spot in the West, there were those who have left behind them works that are entitled to mention as being distinctively of those days. The writers were persons of education and culture, and possessed of intellectual attainments fitting them to adorn any of the highest stations in life.

It is impossible to notice the literary productions which appeared only in fugitive forms. Many of them were contributed by local writers to the magazines and newspapers of that day, either anonymously or under assumed names, which effectually buries in oblivion the identity of the authors. Those only which appeared in book form can be referred to in these pages.

In the columns of the Gem of the Prairie, a literary paper published here as early as 1844, are to be found many poems which bear abundant testimony that their authors were gifted with true poetic instincts. But the first writer, so far as known, who published a book of poems in this city was William Asbury Kenyon. There is to-day in the library of the Chicago Historical Society a copy of this book, a small duodecimo volume, bound in cloth, looking not unlike a pocket edition of Cushing's Manual. Turning to the title page we read: "Miscellaneous Poems, to which are added writings in

prose on various subjects, by William Asbury Kenyon; Chicago, printed by James Campbell & Co., 1845." In his preface and speaking of the poems found in the work, the author says :

"I should indeed be culpable in augmenting the poetical flood (which, if the universal wish is universally attained, is likely to soon deluge the literary world) if I did not believe there was something of merit in the productions thus put forth. But while I am thus convinced, I am also assured there are some to which no important value will attach. * * * As a whole, the collection has been designed for this community. The specimens here presented have spontaneously sprung and blossomed upon the prairie, and, it is hoped, if they possess either beauty or fragrance, will not, like the flowers which spring to greet us, become extinct by the hoofs of rudeness."

The preface bears date Chicago, January, 1845, although no evidence has been obtained that the author ever lived in this city; yet it must be inferred that he resided so near to it that, for all practical purposes, he could and did claim it as his home. To one of his poems, written in 1842, is a note appended concerning the gaiety of the society in the town of Warrenville, one of the oldest villages in DuPage County. And again in his preface the author has returned his sincere thanks to Captain Joseph Naper, Mr. Ellsworth and Mr. Skinner, all citizens of Naperville, for material assistance rendered in bringing out his book. To show the poet in his lighter and doubtless his happiest moods, as well as to express the character of his work, a few stanzas from a "Prairie Song" are given :

"Oh, some may choose the forest glade,
And some may love the sea,
Others may seek the city's din;
But none of these for me.

"No hermit's cave, no crowded hive,
No storm-tossed prison lone;
But life at ease, in joy's own breeze,
A prairie cot my own.

"A prairie cot? What joys do not
Come clustering around the charm;
Scarce ripening fruits to autumn cling
As pleasures hither swarm.

"Dream, hunters, dream of seas of game,
Unused to following hound;
The generous Lord, his bounteous board,
And plenty laughing round.

"Dream of the home where hearts have room,
Where nice restraint is not;
Dream, dream of joy free from alloy,
Found in the prairie cot.

"Here, Clara, here love's mutual care
Shall smile around our hearth;
While hand in hand, we prove the land
The paradise of earth."

The poet has also put into some rhythmic lines his impressions concerning the Black Hawk War, his views of which are here reproduced for the edification of those who have read the history of that bloody strife. Mr. Kenyon has entitled his lines, "Our Late Indian Hunt," a title strongly suggestive of the poet's grave doubts of the justice of the white men's cause "against the famished remnants of a murdered race."

"Say: Did you hear of Black Hawk's War,
When nature's own was struggled for?
Terror struck all the country through,
Raised by aggression's bugaboo.

"A few poor Indians, cornered up,
Saw, day by day, the whites usurp
Their lost game-grounds, their childhood's homes,
And even profane their father's tombs.

"They saw, they wept with deep, still grief:
Hope held no prospect of relief;
'Farther, yet farther, we must go:
Swim to new wilds, like buffalo!'

"They bore in silence till their wives,
'Whipped like the dogs, we loath our lives,'
Till from their mouths was snatched their bread
Till the last star of peace had sped.

"Then roused they pride's expiring ray,
Their thickening deaths to hold at bay;
They roused for home, they stood for life;
Peace heaped their wrongs,—wrong's called for strife.

"Blow came for blow! The cry was raised,
'Behold, by savage fury blazed,
The frontier wide in ruins lies,'
'Death to the race,' the aggressor cries.

"Death to the race? Yes, when no more
They turned the cheek, as heretofore,
'Tis 'savage fury' prompts the stand
On the last hold of childhood's land.

"Take back the term! The wild man's heart
Abhors the deeds of savage art;
Expiring, starved, they fled like deer;
Still, still the gorgeless hounds pressed near.

"Wisconsin, and the Broad-Axe, tell
Tales which your final dirge may knell
A war! Alas! A ruthless chase
For famished remnants of a murdered race."

Turning over the leaves of this quaintly written, yet really interesting, little volume, there are to be found many selections, the perusal of which would doubtless interest the reader. Indeed the author's merits as a poet must not be judged wholly from the character of his stanzas given; for the shorter poems are not his best efforts. Among the more pretentious ones are many really fine evidences of superior thought and grace of diction. Here is one, for instance, which in the very opening lines, seems to have caught the fresh breezy air of winter, the merry jingle of the bells, and the light, joyous mirth inseparably connected with the delights of a winter's night "Sleigh Ride."

"Come! The moonbeams are glancing, the horses are
prancing,
The land-shallop waits at the door,
Hearts akin to the lark, let us gaily embark;
Heed Winter's keen pinching no more:

"In Winter 'tis time to be gay;
Love glows with its quickening ray;
For the fresher the air, the more bright is the glare;
All ready;—now swiftly away.

"At the whips' sounding thwack, now we speed o'er the track,
'Mid joyous confusion of bells
And the shrill creaking of snow as we rapidly go,
The mingling wild harmony swells.

"The music of mirth is as light
As rays from the army of night,
When they play on the snow with a luminous glow,
And radiate witching delight."

The poet drew his inspirations from the genial surroundings and amid the primal beauties of "our own Prairie State." He has left behind him evidences that he was a man of thoughtful and observant mind, that he possessed an apt appreciation of the beautiful in art and of the grand and sublime in nature. That he has studied man with his faults and his follies, his virtues and his vices; and, running through all his poetry, there is much of a plain philosophy, which although in homely phrase, is pure in its teachings, and leaves no doubt that he wrote to better, to elevate and to refine, and to grave "the living virtues on the heart."

JUDGE HENRY BROWN.—Passing from the field of Poetry to the more practical one of History, it is a source of pleasure to note the fact that, in this most important domain of literary work, Chicago was early represented. In 1844 Henry Brown, a Chicago lawyer, and a Judge, wrote a work, which was at that time, doubtless, not only the most complete history of Illi-

nois but also of the Northwest Territory. Although put forth as being only a history of the State "from its first discovery and settlement" to the time at which the book was written, yet it contains almost necessarily a full and comprehensive account of the earliest explorations in the Northwest, together with brief histories of those sanguinary contests for the control of this territory, which for years raged between the French and English nations. The history of this region from its formation as a Territory to 1845 is fully and exhaustively given. The story is well told, being written in easy, narrative style, and so embellished with incident that the usually dry historic details are invested with almost romantic charm and interest. In fact the book is as pleasant and entertaining as the facts treated of are useful and instructive. The book was written at a time when the author was busily engaged in the practice of his profession (see Bench and Bar), but it was well done, with a careful detail attending the selection and arrangement of matter, and with a patience and closeness of inquiry, which illustrates the author's conscientious regard for the truth. Not that the history does not, in the light of subsequent research, contain many errors, both as to dates and in the correctness of its subject matter, yet no one would be warranted in the assertion that Judge Brown did not make the best use of all available means to secure accuracy. Moreover, he did the work at a time when it was needed; and, with whatever imperfections it may have possessed, it met the popular want, was appreciated by those who read it, and it still lives a modest but enduring memento to the memory of its author, who was an able lawyer, a just Judge, and an impartial historian.

RICHARD L. WILSON.—In 1842 a little book of tracts, from the pen of Richard L. Wilson, the well-known journalist, made its appearance, and met with public favor. The book was entitled, "A Trip to Santa Fé," and was a graphic description of a country about which at that time comparatively little was known. A few years later Mr. Wilson published another small volume, "Short Ravellings from a Long Yarn," which met with quite as hearty a reception as did his first production. Like its predecessor, this was also a book of travel, and contained a well-written account of a trip made by its author by the overland route, then a long and perilous journey, to the newly discovered land of gold.

MRS. JULIETTE A. KINZIE.—An interesting book is "Waubun, or the Early Day in the Northwest," by the lady whose name appears at the head of this article. Herself one of the early pioneers of the West, a woman who had the historical distinction of living in the first house built in Chicago, of remaining here until she saw the fort and its few straggling houses grow to a thrifty little town, and, later, of witnessing its rapid and truly marvelous strides as a city, she was eminently well qualified in her later years to put into narrative form her personal reminiscences of early life in this region. But what enhances more than anything else the value of the book, is its importance as a faithful history of persons and things as they were in Chicago a half century ago. True, to the citizen of to-day, it reads like a romance, and to those who have never experienced "life on the frontier," it seems hard to realize that the story of Waubun is not a tale of fiction, rather than an authentic account of life, and in those times. But the well-known character of the author, and her connection with the oldest family in Chicago, aside from her own early residence here, leaves no more room for doubting the truthfulness of the narrative than for disputing the

authenticity of the book itself. Indeed, neither has ever been questioned; but after reading its interesting pages, one lays the book down with the thought almost involuntarily expressed, "it is true; and verily truth is stranger than fiction." The thrilling and pathetic account of the massacre of 1812, as told by Mrs. Kinzie, who obtained her facts concerning it from a relative who was an eye-witness and in a degree a sufferer from its horrors, has been read by thousands. Waubun was first published in 1855, but the edition was soon exhausted, and about ten years later, in accordance with a popular demand for the work, a second edition was printed, which was speedily sold. To-day the book is out of print, and copies of it are difficult to obtain. The author has years since gone to her reward; but in Waubun her name and character, as well as those of many of her associates in the early days in the Northwest, will long be preserved in this tribute to the memory of those brave pioneers who paved the way, and laid the foundations of what has since become the great metropolis of the West. See history of the Kinzie family on page 98.

T. HERBERT WHIPPLE.—As a writer of short stories, sketches, reviews and biographies T. Herbert Whipple, still a resident of Chicago, early won for himself a reputation, which at that time augured well for a brilliant literary career. And while he wrote much which served to convince the public of his decided talent in a literary way, it is to be regretted that he soon abandoned his purely literary labors to engage in the routine duties of editorial work on a daily paper. Mr. Whipple's father, Thomas P. Whipple, came to this State in 1836 from Buffalo, N. Y., and settled on a farm about thirty-five miles west of Chicago. Here the subject of this sketch, who was six years of age at the time of his arrival in Illinois, grew up and remained until 1852. He then began the publication of a temperance paper in St. Charles, which was subsequently removed to this city, and became a prominent temperance organ under the name of the *Temperance Messenger*. In 1854 Mr. Whipple was made the editor of a literary weekly, published in this city by W. W. Danenhower and called the *Literary Budget*. He remained here until 1856, when he resigned his position, on account of the paper being changed from a literary journal to a political organ, espousing the doctrine of Know-nothingism; a political faith to which Mr. Whipple did not heartily subscribe. January 10, 1854, Mr. Whipple married Miss Mira B. Fuller, a lady of St. Charles, and with her returned to his father's farm, that year, following the quiet pursuits of a farmer until 1857, when he took a position as night editor and local reporter on the *Democratic Press* of this city. From then until 1861 he was engaged on several of the city papers, but on the commencement of active hostilities in the South, he was sent to the front as the war correspondent of the *Chicago Tribune*. In that position Mr. Whipple discharged his duties so well, and his enterprise and ability as a writer and gatherer of news attracted so much attention that, at the close of the war, he was offered a position on the *New York Herald*, and shortly afterward became its city editor. In two years a change in the force of that paper was effected, new influences controlling. Mr. Whipple resigned his position and returned to Chicago. Mr. Storey offered him a place on the *Times*, which he accepted. His next move was the establishment of a private detective agency; and from that time up to 1878, he edited newspapers at Galesburg, Ill., Vidalia, La., and Denver, Col. In the last named year, his health failing in the West, he

returned to Chicago and entered the employ of Captain Turtle, as a detective, superintending his business and assisting upon the Penny Press at Cleveland, Ohio, until 1882, at which date the Mooney & Boland Detective Agency, of New York, established a branch agency here, and he accepted the position of superintendent, a place he still holds (1884). As editor, from 1854 to 1856, of a paper that ranked as the leading literary journal of the West, he was better acquainted with the writers of the country than most men at that time. Among the more noted of his own works, in fact the one which, perhaps, gained him most reputation, was a novelette, "Ethzelda, or Sunbeams and Shadows," published as a serial in the columns of the Literary Budget. It was a tale of the prairie region as it once existed, and was subsequently issued in book form by Rufus Blanchard, who then had a publishing house on LaSalle Street, and also in Philadelphia by a prominent publishing house. The story deals with a band of robbers and counterfeiters whose headquarters were in a large cave in the banks of the Mississippi, somewhere on the western boundary of the State of Illinois. Its dramatic arrangement is very good, the incidents as interesting and exciting as the nature of the tale would suggest. In addition to this, Mr. Whipple contributed a great number of short sketches to the columns of the Literary Budget, together with book reviews and biographical sketches of the then leading writers of the West. Among the latter was an extended and ably written article on the life and writings of that popular novelist, Emerson Bennett. This article was widely read and copied by the leading papers of the country.

W. H. BUSHNELL.—Previous to and contemporary with Mr. Whipple, and also a popular writer and contributor to the paper of which he was editor, was a gentleman, by profession a civil engineer, William H. Bushnell, then of this city. This gentleman, aside from being a poet of acknowledged ability, a sketch of whose life, together with specimens of his poetry, can be found in "Coggshall's Poets and Poetry of the West," was a pleasing and graceful writer of prose stories, sketches, Indian legends, etc. He was born in the city of Hudson, N. Y., June 4, 1823, and was educated at the University of New York City. He was first announced as a poet in the year 1843, when he delivered, before the Young Men's Lyceum of Chicago a poem entitled "Knowledge is Power." He then lived in this city engaged in the practice of his profession, but found, it seems, time to contribute to the columns of the Gem of the Prairie, and later to the Literary Budget, stories, poems, and graphic sketches of Indian life in the West. He was also connected in various capacities, editorially or otherwise, to many other Chicago publications. Under the pseudonym of "Frank Weber" he wrote a novel, "Prairie Fire," first published in the Garden City, which was well received throughout the West; in fact so popular did it become that it was printed in book form, rapidly ran through six editions, and is to-day found in the trade. Subsequently he became one of the editors and contributed largely to the Sunday Leader, the proprietor of which was the now public printer, Hon. S. P. Rounds, who was also the publisher of the Printer's Cabinet, for which Mr. Bushnell has continuously written for over a quarter of a century. Leaving Chicago for New York, just prior to the war, Mr. Bushnell then devoted his time mainly to authorship. He became a contributor to the best literary publications, and has written many serial novels, sketches, poems, etc., which have made his name familiar throughout the land. As a writer of passionate fiction he may justly be proud of the name he has won;

as a writer of Indian romance so great an authority as B. P. Shillaber ("Mrs. Partington") has declared he had no equal since Cooper; and Mrs. Ann S. Stephens that his "Indians were too good and true to their subtle character to be appreciated by the masses" and that "each of his poems contained a sufficient number of beautiful similes to exhaust any author." He has been twice married

A writer in the Criterion for August, 1882, said:

"Haste of composition has much marred the literary work of Mr. Bushnell. All of his productions reveal this, and it is to be regretted. He has written an amount scarcely to be credited, his other engagements considered, and still accomplishes far more than many a younger man, and one who has all his hours at command. Yet, as a rule, he has written strong, well, and with a wonderful command of language and illustration; his serials exhibiting a deep insight into the mature passions of the human heart, and his poetry the love of the beautiful and tenderness of a woman."

Mr. Bushnell is now engaged as a proof-reader in the Treasury Branch of the Government Printing Office at Washington, a position his years of newspaper life have well fitted him to fill. He still finds time to write much for the Press.

HENRY A. CLARK.—Another writer of those days, also an occasional contributor to the literary journals, was Henry A. Clark, an attorney of this city. Mr. Clark wrote, among others, a novel, the "Banditti of the Prairie," which was published early in the fifties, though at that time its authorship was credited to Edward Bonny, a then noted detective who lived in Du Page County, near what is now Prospect Park. Later, however, it became well known that Mr. Clark was the author. The book had an immense sale, and at once took its place among the popular romances of the day.

BENJAMIN F. TAYLOR, whose literary works have long since given him more than a national reputation, was for many years a resident of this city. For thirteen years he occupied an editorial position on the Chicago Evening Journal, during which time he wrote much that contributed to the fame which has since been accorded him as one of the most graceful and pleasing writers in the West. Mr. Taylor was born in the town of Lowville, Cass Co., N. Y., in 1822. His father, Stephen W. Taylor, LL. D., was president for many years of the Madison University, at Madison, N. Y. The son received a good education and, coming

Benj. F. Taylor

West while yet a young man, began life surrounded with all the generous possibilities of a new and growing country. His writings early attracted attention, and were distinguished by an originality of thought and a vigor of style hitherto almost unknown in the literature of the West. Among the earlier poems written by Mr. Taylor, and which at once gave him prominence, were: "Rhymes of the River," "June Dews," "Shall I Know Her Again?" "God Bless Our Stars," and "The World's Embodied Thought." In 1855 a volume of his editorial writings, entitled "January and June," was published in New York, and a few years later a second edition was issued by a firm in this city. Mr. Taylor now lives on a farm in northern Indiana, from the quiet seclusion of which he contributes occasional articles to several of the leading periodicals in the East, as well as to various journals in this and other States.

WILLIAM ROUNSEVILLE, who began, in October,

1845, the publication of the Western Magazine, the first literary periodical published in this city, was a writer of rare and versatile talent. Bits of poetry, charming sketches in prose, historical reminiscences, and well-written fiction, all flowed from his ready pen; and into whatever field he entered, he treated his subject with a grace, vigor, and thoroughness which bespoke the rarest qualities of intellectual strength and culture. Aside from his editorial duties, he contributed a great number of articles to his magazine, which well deserve to be preserved as among the best specimens of early literature in the West. In the initial number of the Magazine, there appear credited to his pen the following articles: A charming sketch, "The Pioneer of the Prairies;" a well-written article on the "Arms and Armour of the Ancients," a subject which he carried through all the numbers in the first volume; an historical sketch, "An Incident of the Revolution;" and two short poems, "They Bid me be Sad," and "Can the Mother Forget her Child?" The pages of every number teem with the fruits of his prolific pen. Among the other contributors to this periodical were W. H. Bushnell and Judge Brown, whose works have already been noticed in this chapter. The Western Magazine lived but one year, when it was discontinued, and its editor turned his attention to journalism, but later engaged in the publication of an Odd-Fellows' Monthly. Mr. Rounseville then removed to Peoria, where he remained several years. He again returned to this city, living here until his death, in 1878.

ARCHITECTURE.

The first house built in Chicago from plans drawn by an architect was the residence of William B. Ogden. In the fall of 1836, Mr. Ogden, being then in New York on a visit, employed the services of J. M. VanOsdel, an architect of that city, in drawing plans for a dwelling which he proposed building during the following year. He also induced Mr. VanOsdel to come to Chicago, in the spring of 1837, and personally superintend the erection of the house. This residence, which was still standing at the time of the fire of 1871, was the finest and most attractive in the city. It stood in the center of Block 35, Kinzie's addition, and was bounded on the east by Rush, on the south by Ontario, on the west by Cass and on the north by Erie. The building was of the Grecian style of architecture, and was almost square, two stories in height, the roof surmounted with an observatory, while on two sides were recess-porches flanked with large ornamental columns. Mr. VanOsdel, after completing the building, decided to make Chicago his home and is now living here. Not long since he began a series of articles on the "History of Chicago Architecture," which were published in the Inland Architect, a monthly journal of this city. In the first paper are found the following interesting recollections, stated in the third person:

"Mr. VanOsdel arrived early in June of 1837. Passing from the landing toward Mr. Ogden's office on Kinzie Street, he noticed a block of three buildings, three stories high, the fronts of which had fallen outward and laid prone upon the street. Upon inquiring he found that the frost of the preceding winter had penetrated to a great depth below the foundations, and the buildings, having a south front, the sun acting upon the frozen quicksand under the south half of the block, rendered it incapable of sustaining the weight of the building. At the same time, the rear, or north part, of the block, being in shadow, the frozen ground thawed gradually and continued to support the weight resting upon it. The consequence was that the block careened. Mr. VanOsdel's first work in Chicago was to readjust the floors in this block, which, at first designed for stores, was completed for dwelling houses. * * *

The brick buildings in the city in the spring of 1837 were the Lake House, on the southeast corner of Rush and Michigan streets, a building about eighty by one hundred feet, four stories high; the St. James church, a pretentious semi-Gothic structure, with a square brick tower, located on Cass, between Michigan and Illinois; William Norton who built the first bridge across the river at Dearborn Street, had a two story brick residence on Indiana, near Dearborn Street; there were two stores, two stories high, on North Water Street near the foot of Cass. These, with the frontless block first mentioned, included all the brick structures in the North Division of the city. There were but two brick buildings in the West Division, one a two story dwelling, corner of Jackson and Canal streets, owned by Laframboise, an Indian chief; the other was Archibald Clybourne's residence, in the (then) extreme northwest corner of the city. In the South Division was the court-house, on the northeast corner of the public square, having a basement and principal story, dimensions about thirty by sixty feet; the court-room and jury rooms on the principal floor; clerk's and recorder's offices and vaults in the basement; the front was ornamented with a four-column Doric portico of wood work."

On the opposite corner, where the Sherman House now stands, was the City Hotel, and north of that, on Clark Street, was a two-story building occupied by Peter Pruyn, and the "Saloon Building," which was four stories high. It was discovered, after the roof was put on, that there were no chimney tops, and not a flue in the building, and they were constructed afterward inside the walls, as they were needed. There was a three-story building on the southwest corner of South Water and LaSalle streets; also a three-story dwelling, southwest corner of Randolph and Wells, owned by Charles Chapman, and a two-story dwelling, southwest corner of LaSalle and Washington streets, the property of P. F. W. Peck. The foregoing comprises all the brick buildings in Chicago in the spring of 1837. In that year the principal builders in the city were A. D. Taylor, Azel Peck, Alexander Loyd, Peter L. Updike, Charles Lowber, Asbel Steele, F. C. Sherman, Alson S. Sherman, and William Worthington. In his second paper Mr. VanOsdel continues as follows:

"Among the very few buildings that made any pretensions to architectural ornament were the residences of W. H. Brown and John H. Kinzie in the North Division, and of Dr. John T. Temple and George W. Snow in the South Division. Mr. Snow was the inventor of the 'balloon frame' method of constructing wooden buildings, which in this city, completely superseded the old style of framing with posts, girts, beams and braces. The great rapidity in the construction and the large saving in cost, compared with the old fashioned frame, brought the 'balloon frame' into general use. It is conceded that a frame with every part spiked together offers greater resistance to lateral force than any other method of construction. As an evidence of its power to resist such force it may be stated that the 'Bull's Head Hotel,' built by Mathew Lafin in 1848, at the junction of Ogden Avenue and Madison Street, was a three-story 'balloon frame' of large dimensions. Standing upon the open prairie, with hardly a building within a mile of it, this structure was exposed to the fierce, unbroken prairie winds, yet remained unshaken for many years, until it was taken down to give place to the Washingtonian Home, which now occupies its former site."

The balloon frame, however, proved its dangerous character in the fire of 1871, since which time, the erection of frame buildings within the city limits is forbidden by law. That conflagration destroyed nearly every building in the city which had been erected before 1838, only a few which had been removed to the outskirts of the town being left. Among them was a block of buildings which formerly stood on Lake Street, but were, long before 1871, removed to State Street, near Twelfth. The corniced pediment of these buildings was of the Grecian-Ionic order; the broad entablature, under the front eaves, was surmounted with a frieze, ornamented with oblong quadrangular openings, which besides serving to adorn were also utilized to light the attic story of the building. In 1839 this was the finest business block in the city.

The difficulties and obstacles which faced the archi-

tect and builder in the early days of Chicago have now long since disappeared; indeed many of them are almost forgotten by the builders of to-day. The most serious difficulty encountered was in the character of the soil and the low elevation of the original surface of the ground, on which the main part of the city is situated. As is now well known, the strata underlying the city was first a black loam soil, varying in depth from one to two feet; underneath was a bed of quicksand, three to four feet in depth, resting on a stratum of blue clay, which was almost impervious to water. In wet seasons it was next to impossible to dig trenches for foundations, as the water would fill such excavations to the surface; drainage was out of the question, owing to the low and level surface of the ground; and, owing to the water-tight stratum of blue clay, already mentioned; the only resource of builders was to wait until the ground became dry and firm by the slow process of evaporation. In consequence of these difficulties many of the earlier frame buildings of Chicago were built on posts, sunk into the ground and resting on the hard clay, which under the circumstances furnished the best foundation to be had. The convenience of having a cellar under a building was practically impossible. Mr. VanOsdel on this subject says:

"In 1849 the owner of a brick building on the southwest corner of Lake and State streets determined to have a cellar under his store. He made the necessary excavations, and succeeded in planking the bottom and walls with three-inch plank, with caulked and pitched seams, rendering the basement water-tight. The depth was about five feet. Upright posts were placed between the floor and ceiling to resist the upward floating tendency of the cellar floor; but it was soon discovered that the hydrostatic force was more than equal to the weight of the principal floor, and all the goods resting thereon; and an upward movement of the interior of the building was manifest. The ark was scuttled and filled in with earth, thus ending the first attempt at cellar construction in the business portion of our city."

Prior to 1852 there were few brick buildings noted for architectural beauty. The majority of them were conspicuous for their plain and simple style and for the utter absence of anything tending to embellish or adorn. In those days, men who built had not the means to indulge in architectural ornament nor any other extravagance; hence four walls, well roofed, properly lighted and ventilated, and partitioned into suitable apartments answered every purpose. However, as Mr. VanOsdel observes, "the increase of wealth and prosperity in after years permitted these same men to indulge their latent taste and desire for the beautiful, in causing the erection of many business edifices that would ornament and adorn any city in the world."

Another difficulty in the way of constructing elegant and permanent buildings in early times, was the scarcity of suitable stone for building purposes. The nearest quarries were located at Joliet, a distance of forty miles, and before the opening of the canal, in 1848, the only means of transportation was by wagons. The Scammon school building, which was built in 1846, had its caps, sills and water-tables cut at these quarries, from which they were transported across the country by teams to Chicago.

The Tremont House (see Chapter on Hotels), which was eighty by one hundred feet in dimensions, and five stories in height, was furnished with cut stone from the quarries at Lockport, N. Y., as was also the court-house, built in 1853. In May, 1855, the system of sewerage (q. v.) was devised which led to the elevation of the street grades; and a few years later, the Tremont House, notwithstanding the size of the building and its massive character, being built wholly of brick and stone,

was placed on jack-screws and elevated to a level with the new grade. The distance necessary to raise it was seven feet. This remarkable undertaking was safely accomplished, and a new basement was constructed under the building. To better enable the reader to understand the importance of elevating the grade of the city, for the purpose of promoting its architectural and sanitary advancement, reference is made to the topic entitled "Street Improvements," which will be found elsewhere in this volume. But as has already been indicated, until this elevation of grade was accomplished, the difficulties to be met in the construction of large buildings were of the most serious and aggravating character.

The court-house (q. v.) was of the Roman Gothic style and was a handsome and well-proportioned structure. It stood in the center of the public square and was one hundred and sixty feet front from east to west, and one hundred and thirty-two feet in depth from front to rear. The county jail was in the basement, offices, court-rooms, etc., on the upper floors.

In filling the square about the court house up to the required grade, it was essential that the lighting and ventilating of the jail apartments should not be interfered with. To avoid doing this "an area wall was built on a circular plan, one hundred and eighty feet in diameter, and circumscribing the entire building." It was built three feet above the street-grade with a coping of heavy cut stone, the whole surmounted with heavy iron railing. This arrangement gave ample space for light and air in the basement of the building, while the surrounding yard was filled with dirt obtained in dredging the river.

The first brick building in the city to be raised, by means of jack-screws, to the new grade, was a brick store, situated on the northeast corner of Dearborn and Randolph streets, and owned by J. D. Jennings. This was done in 1859, and the work was done by James Brown, of Boston. Two years later an entire block of buildings on Lake Street, extending from Clark to LaSalle, was raised by the same process simultaneously and without damaging the block in the least. The business of raising stores and blocks continued through a period of seven years, from 1857 to 1864.

The first churches of Chicago (see Religious), while exceedingly plain and simple in style and construction, as compared with the costly and magnificent edifices of the present time, were yet buildings in which was displayed a decided taste in architectural design and finish. The First Universalist church on Washington Street, between Clark and Dearborn, built in 1844, was a frame building, resting on a stone foundation six feet in height. The building was of the Ionic order and cost near \$3,000. The First Methodist church, completed in 1845, was then one of the most beautiful and spacious church edifices in the city. Two plans for the building were drawn by Mr. Sullivan and Mr. VanOsdel, and the church was built embodying features from both designs. It was of the Doric style of architecture, though the entablature was void of any ornament. The other churches in the city, belonging to the same school of architecture, were the Tabernacle church, built in 1843, on LaSalle Street, and the Unitarian church on Washington Street, built in 1840. The latter was rather a handsome edifice, being erected at a cost of \$5,000. St. Mary's church (Catholic), erected in 1843, on the corner of Wabash Avenue and Madison Street, was an imposing structure, built of brick, with stone foundation, and was one hundred and twelve feet long by fifty-five feet in breadth. The side walls were thirty-four

feet in height. Twelve feet of the length in front was devoted to a portico, or recess porch, supported by six Ionic columns, which order of architecture prevailed throughout the entire building. Another building of the Ionic school was the First Baptist church, built in 1844-45, on the corner of Washington and LaSalle streets. The St. James church, built in 1836, was a large and handsome building of the English Gothic style—one of the first houses in the city constructed on this order of architecture. Rush Medical College (q. v.), erected in 1844, the plan of which was drawn by Mr. VanOsdel, was a heavy massive building of the Roman order. From its center arose a huge circular dome, which gave to the structure a marked resemblance to the roof of that celebrated Roman edifice of ancient times, the Pantheon. The Second Presbyterian church, which was built in 1849, was, from an architectural standpoint, a splendid and imposing edifice of the English-Gothic style. A peculiarity about it which made it almost a famous building was the character of the stone of which it was built. Its walls were constructed from a limestone rock, taken from the quarries near this city, and was the first building of any importance constructed of material thus obtained at home. This stone was filled with a black, bituminous substance, strongly impregnated with petroleum, which from the action of the sun exuded from the pores of the stone, and, running down the face of the walls, gave to the edifice an appearance strikingly peculiar and antiquated. The house was regarded as a curiosity, and sightseers in the Garden City were always shown, as among its objects of interest, the Second Presbyterian church. It was destroyed in the fire of 1871, but the stones, uninjured by the heat, were removed, and to-day form a part of the walls of a church since created on Wabash Avenue.

Having thus noticed the character of the early architecture of Chicago, its subsequent growth and development are subjects which logically belong to a later period, in the history of which it will be fully and appropriately treated.

ART AND ARTISTS.

Samuel M. Brooks, who was here as early as 1833, was the first artist in Chicago. He subsequently removed to California. In 1845 he offered for sale the paintings then owned by him, to enable him to indulge in European study.

In 1842 Mrs. Strangman advertised in the Daily American that she was prepared to give instruction in music, painting and ornamental needlework.

J. L. Porter, a miniature painter, had a studio in the Exchange Building. His advertisements show that he

remained here from 1845 to 1847, and possibly longer.

R. M. White, an engraver, was also a lover of art work, and in 1845 received a complimentary notice in the Democrat.

In November, 1850, Powers's "Greek Slave" was exhibited at Tremont Hall, and aroused much discussion as to the propriety of the nude in art.

A large painting entitled "Christ Healing the Sick," was exhibited here in 1850, but did not receive profitable patronage.

The daguerrean artists at that period were C. C. Kelsey, 136 Lake Street, P. Von Schneidau, 122 Lake Street, and John Hunter, at 85 on the same thoroughfare.

Charles Peck painted a panorama of the Mississippi and scenes from Chicago to the Pacific, in an early day, which was exhibited in this country and Europe.

Monsieur Andreu, an excellent artist in landscape work, resided here in 1854-55. In the latter year he painted and exhibited a representation of the Garden City, in four sections. His views were taken from the observatory of the Tremont House.

Monsieur Montel, an artist in monochromatic drawing, oil and water colors, also a teacher of the French language, in 1854 had his studio at 84 Dearborn Street, opposite the theater. In the next year there were C. V. Bond in the Exchange Building, C. E. Cridland at 189 La Salle Street, E. S. Lennox and W. W. Pendergast at 131 Lake Street, H. D. Theilcke in the Metropolitan Block; of this number, Mr. Cridland excelled in landscape pieces. He painted that year for Robert Fergus a piece of this kind, which was pronounced a very fine painting. Mr. Fergus exhibited it at the State fair, where it received the award of being the best landscape work on exhibition.

St. Alary, an artist of some note, was here in 1856, and later. Among his pieces which attracted much attention, and which were painted in this city, were "Contemplation," "Calypso," the "Spanish Belle," the "Canadian Belle," and "Child at the Brook."

J. Healy, an excellent portrait artist, in 1856-57 had his studio in the Exchange Building. An item in a number of the Democratic Press of that time, says that Mr. Healy had painted portraits of William B. Ogden, E. L. Wadsworth and wife, Dr. Brainard and wife, Mrs. E. Tinkham, and many others.

In October of that year, a very fine painting, "An English Farm-yard," by J. F. Herring, was brought to this city and exhibited in a room rented for the purpose at No. 10 South Clark Street. Each animal in the picture was painted from life. The painting which was valued at \$3,000, was pronounced the best which at that time had ever been brought to Chicago.

BENEVOLENT, LITERARY AND SOCIAL SOCIETIES.

MASONIC.

Who was the first Freemason to become a resident of Chicago, is a difficult question to answer, and one that is not essential to the history of the fraternity in the city. Masons in the segregate may do a great deal by personal example, but the increase of the Order, and the dissemination of its recognized principles and doctrines, only become practicable upon the organization of a lodge, and its establishment as a working body.

The primitive germ, the first "sprig of acacia," planted in the soil of Illinois, was the lodge established at Kaskaskia by a dispensation from the Grand Lodge of Pennsylvania, dated September 24, 1805, and at their meeting on December 14, 1805, the lodge received an auto-baptism, which gave it the name of Western Star Lodge.

The officers of this first of Illinois lodges were James Edgar, W. M.; Rufus Easton, S. W.; Michael Jones, J. W.; Robert Robinson, S. D.; Alexander Anderson, J. D.; William Arundel, secretary. Thomas J. V. Owen, a subsequent Chicagoan, was a member of the lodge in 1826. The first initiation of record in the State was that of Charles Querey, who took the Entered Apprentice degree in this lodge, on February 3, 1806. Upon September 13, 1806, the lodge assembled under a charter dated June 18, 1806, from the Grand Lodge of Pennsylvania, wherein the lodge was established as "Western Star Lodge, No. 107."

The Order increased and multiplied, and at a convention held at Vandalia, December 9, 1822, a Grand Lodge was instituted, whereof Shadrack Bond was Grand Master. This Grand Lodge* lasted until about 1828, but received the homage of several of the Illinois lodges during its continuance, as they withdrew from the various Grand Lodges by whom they were constituted, and paid tribute unto the Masonic Cæsar of Illinois.

Until 1835, from the date of the discontinuance of the Grand Lodge, the history of Masonry in Illinois is a *tabula rasa*. The supposition is that "they lived and moved, and had a being;" but their existence was overt, their motions unattended with publicity, and their being emulative of the cryptic status of the early Christians at Rome. History records the fiery trials, the unjust opprobrium, the bigoted antagonism that were heaped upon Masons in these years, inaugurated in 1826; and Illinois Masons apparently bowed their heads before the tornado of blind passion and fury that swept over the country, disbanded their organizations and waited until the calm light of reason should again have assumed its dominance. The last to surrender its existence was "Western Star Lodge, No. 107."

In 1835 the dispersed brethren commenced re-uniting, and the impetus this year given to the Masonic fraternity has but gathered momentum with each succeeding year; the light then kindled has burnt with a steady, lambent, increasing flame.†

* Richard J. Hamilton was G. J. W. in 1824.

† The History of the Grand Lodge of Illinois, by H. G. Reynolds; and the proceedings of the Grand Lodge, from 1840 to 1860, have been invaluable in the compilation of this topic.

On February 24, 1838, is the first instance of a corner-stone having been laid with Masonic ceremonies in the State; Equality Lodge, No. 102, having performed that office for the public works at Shawneetown.

One word of explanation is necessary relative to the numbers borne by the early lodges of Illinois; they derived their charters from various Grand Lodges, and took the numbers from the category of each specific source of being.

On April 6, 1840, at the Masons' Hall, in Jacksonville, a convocation assembled and formed the Grand Lodge of Masons of Illinois, said Grand Lodge having a constituency of one hundred and twenty-seven members in a segregation of six lodges. In 1841, Stephen A. Douglas was elected Grand Orator, but was unable to serve. He was at the time Junior Warden of Springfield Lodge, No. 4.

Upon October 4, 1841, charters were voted to lodges at Dixon, Chicago, and Joliet upon their complying with Section six of the by-laws of the Grand Lodge. In the case of the Chicago Lodge, the by-laws would appear to have not been obeyed, as no charter is recorded as having been issued.

Dr. William B. Herrick, subsequently Master of Oriental Lodge, took the third degree on January 29, 1842; he having been initiated June 16, 1841, and passed June 21, 1841. The lodge to which he belonged at this time was called Mount Moriah, No. 33, but was chartered as Hillsboro Lodge. Dr. John T. Temple also appears September 24, 1842, as a member of Far West Lodge, No. 29.

LAFAYETTE LODGE, No. 18.—At the meeting of the Grand Lodge on October 2, 1843, LaFayette Lodge, of Chicago, under dispensation, was represented by L. C. Kercheval, and on this date the charter was granted to LaFayette Lodge, No. 18, and Kercheval admitted as its representative to the Grand Lodge. He was subsequently appointed Grand Steward; being the first Chicago Mason who held a position in the Grand Lodge. The dispensation for LaFayette Lodge was recommended by Joliet Lodge, No. 10, and was granted on October 2, 1842, by the Grand Master, but the lodge did not meet until June 13, 1843, when their organization was perfected by the installation of officers. At this ceremonial there were present: N. Hawley, W. M. Juliet, No. 10; Samuel H. Gilbert, W. M.; T. W. Smith, S. W.; Carding Jackson, J. W.; L. C. Kercheval, secretary, pro tem.; Isaac Haight, treasurer, pro tem.; John Davis, S. D., pro tem.; Joseph Fischbene, J. D.; F. A. Howe, tyler; and J. H. Sullivan and William Harman, M. M. The names appended to the by-laws are: Samuel H. Gilbert, Carding Jackson, H. W. Bigelow, Samuel J. Lowe, L. C. Kercheval, John Davis, J. Fischbene, F. A. Howe, Barnabas Horton, William Harman and John Ferns. The first raising was that of P. T. McMahan, but the date is unknown. On October 16, 1843, John Ferns was elected tyler. On December 18, the following officers were elected: Carding Jackson, W. M.; H. W. Bigelow, S. W.; Mathias Taylor, J. W.; Samuel J. Lowe, treasurer; L. C. Kercheval, secretary; John Davis, S. D.; Joseph Fischbene, J. D.;

F. A. Howe and "Barney Horton," stewards; John Ferns, tyler.

The following comprise those who were raised to perpendicularity in 1844 by LaFayette Lodge: W. B. Snowhook, J. L. Howe, on the third Monday in January; E. L. Sherman, William Sheer, February 17; Samuel J. Surdam, February 20; * J. J. Huntley, A. C. Taylor, P. P. Robinson, Valentine A. Boyer, March 18; Cornelius Lansing, March 25; Thomas Brooks, April 1; A. Getzler, June 3; Isaac N. Arnold, June 17; John J. Jackson, August 20; Joshua Bell,† September 2; Isaac P. Hatfield, October 1; John B. Irvin, November 4; Charles R. Starkweather and William S. Brown, December 2; Lot Whitcomb, December 3; Virgil H. Eachus, December 11. June 17, a semi-annual election was held resulting in the choice of Carding Jackson, W. M.; H. W. Bigelow, S. W.; M. Taylor, J. W.; Samuel J. Lowe, treasurer; L. C. Kercheval, secretary; John Davis, S. D.; Alfred C. Taylor, J. D.; John Ferns, tyler; R. Chester and R. J. Hamilton, stewards. September 2, Kercheval resigned as secretary and Valentine A. Boyer was installed as wielder of the instrument "that is mightier than the (tyler's) sword." On November 18, William Jackson was initiated, no charge being made for the degree; it being conferred gratuitously upon the son in recognition of the services of the father—Carding Jackson. On December 2, 1844, the lodge endorsed a petition for the establishment of a new lodge; this petition to the Grand Lodge being, presumptively, for a dispensation for Apollo Lodge, No. 32. December 16, 1844, an election was had resulting in placing Carding Jackson as W. M.; M. Taylor, S. W.; Samuel J. Lowe, J. W.; H. W. Bigelow, treasurer; William S. Brown, secretary; Thomas Brooks and George B. Fearing, deacons; Captain J. Jackson and I. P. Hatfield, stewards, and I. P. Hatfield, tyler.

In 1845 the officers of LaFayette, No. 18, were Carding Jackson, W. M.; M. Taylor, S. W.; Hart L. Stewart, J. W.; H. W. Bigelow, treasurer; C. G. Wicker, secretary; Isaac P. Hatfield, S. D.; Thomas Brooks, J. D.; B. Horton and J. L. Thompson, stewards; N. Christy, tyler; R. J. Hamilton and Henry Brown, past-masters. In 1846 the officers were Richard J. Hamilton, W. M.; Mathias Taylor, S. W.; Hart, L. Stewart, J. W.; H. W. Bigelow, treasurer; C. G. Wicker, secretary; J. L. Thompson, S. D.; Thomas Brooks, J. D.; Abraham Kohn and J. Y. Sanger, stewards; I. P. Hatfield, tyler. The officers for 1847 were Mathias Taylor, W. M.; Charles G. Wicker, S. W.; J. C. Miller, J. W.; H. W. Bigelow, treasurer; Abraham Kohn, secretary; Thomas Brooks, S. D.; Philip Newberg, J. D.; J. L. Thompson, tyler. In 1848, the occupants of official positions were Carding Jackson, W. M.; Isaac N. Arnold, S. W.; J. C. Miller, J. W.; H. W. Bigelow, treasurer; Isaac P. Hatfield, secretary; Philip Newberg, S. D.; J. L. Thompson, J. D.; V. W. Potter and John B. Weir, stewards; Nathan Christy, tyler; and the lodge had ninety-four members. The lodge in 1849 had the following officers: Carding Jackson, W. M.; J. C. Miller, S. W.; Philip Newberg, J. W.; H. W. Bigelow, treasurer; I. P. Hatfield, secretary; Jacob Gauch, Jr., and William A. Begole, deacons; Heman Hatch and J. G. Howe, stewards; Nathan Christy, tyler.

* Samuel Johnson Surdam is the oldest living Mason (September, 1883) made in Chicago.

† Joshua Bell experienced some difficulty in arriving at the degree of Master Mason. He took the E. A. degree, but during his reciprocity of the F. C. degree allowed some atheistical proclivities to dominate over his responses; whereupon he was led forth by the article provided for that purpose. Subsequent investigation and explanation demonstrated his eligibility and he successively took the remaining two degrees. Vide paragraph on Anti-Masonry.

In 1850 the offices were filled as follows: J. C. Miller, W. M.; Philip Newberg, S. W.; R. E. Goodrich, J. W.; H. W. Bigelow, treasurer; I. P. Hatfield, secretary; George Cowper, S. D.; William McMillan, J. D.; Martin Dodge and H. R. Taylor, stewards; John Daly, tyler; and eighty-four members were represented by the annual contributions to the Grand Lodge fund; and the following list comprises the names of Master Masons of LaFayette Lodge, No. 18, not heretofore mentioned: Samuel McKay, James McGuire, N. F. Butler, Samuel Aikins, A. Garrett, Leonard Falch, Duane J. Surdam, Francis Edwards, James Campbell, John Blackstone, Joseph Atkinson, J. F. Colby, M. L. Knapp, J. W. Dunlap, Levi Rosenfelt, William Locke, Daniel Lyons, W. B. Smith, D. S. Cady, Joseph Filkins, Scott Benedict, Matthew McIlvaine, G. Wetherbee, N. W. Watson, S. J. Huntley, B. Nietschmann, Jacob Rosenberg, J. A. W. Donahoo, Frederick Weis, W. H. Dobson, George Chacksfield, Solomon Kellogg, W. H. Wells, John Pfund, F. Burckey, Joseph Goodrich, Jacob Rosenbaum, J. M. Lowe, Theodore Hubbard, James McCord, J. D. Jennings, James A. Marshall, David Sheppard Smith.

In the proceedings of the Grand Lodge for 1847 occurs a peculiar case; that of Isaac P. Hatfield, of LaFayette Lodge, No. 18. It appears that he was summarily suspended from Apollo Encampment, by receiving notice October 5, 1846, and in said notice his attention was called to a resolution, purporting to have been adopted by the Grand Lodge, declaring that suspension from an encampment carried with it suspension from all lower degrees. The Grand Lodge, upon being petitioned by Hatfield on the subject, decided that the resolution had never received deliberate sanction and was therefore void.

APOLLO LODGE, No. 32.—The first authentic notice concerning Apollo Lodge, No. 32, and Oriental Lodge, No. 33, is in the proceedings of the Grand Lodge for 1845; at which session Rev. W. F. Walker, of Oriental Lodge, and William Stuart, of Apollo Lodge, both under dispensation at Chicago, were admitted as proxies of Joliet Lodge, No. 10. At this session the Grand Master reported granting dispensations to Apollo* and Oriental lodges; and charters were recommended to be granted them under the numbers thirty-two and thirty-three respectively. Messieurs Stuart and Walker, at the request of the Grand Lodge, rehearsed the lectures in the first and second degrees; as recited, they were commended by the Grand Lodge and unanimously adopted for the work in those degrees. Whereby Chicago was complimented, and again was distinguished by the election of Rev. William F. Walker to the office of Grand Master, and William Stuart to the office of Grand Orator.

The directory for 1845 specifies that Apollo Lodge was instituted by dispensation from the R. W. D. G. Master, November, 1844, and that the officers were William Stuart, W. M.; John R. Case, S. W.; Cornelius Lansing, J. W.; Charles Follansbee, treasurer; William H. Adams, secretary; C. R. Starkweather, S. D.; C. C. Norton, J. D.; Rev. W. F. Walker, chaplain; James A. Marshall, L. Mower, G. Wadhams, stewards; and G. Wadhams, tyler.

The charters for Apollo, No. 32, and Oriental, No. 33,† must have been granted this session, as on November 8, 1845, the Grand Master granted a dispensation to

* The dispensation was granted to William Stuart, W. M.; John R. Case, S. W.; and Cornelius Lansing, J. W.

† The charter for Oriental Lodge was dated October 9, 1845.

Apollo, No. 32, to pass and raise John Wentworth; and reports having, upon the same day, consecrated these lodges and installed their officers.*

The following is the earliest list on record of the officers and members of Apollo Lodge, No. 32; and is the list for the year 1846: John R. Case, W. M.; Cornelius Lansing, S. W.; Charles R. Starkweather, J. W.; Charles Follansbee, treasurer; William H. Adams, secretary; J. Herman Bird, S. D.; Carlton Holland, J. D.; James A. Marshall and Joseph Keen, stewards. The tyler was not a member of the lodge. Past Masters were William Stuart and John Barney; and the Master Masons were: John Brinkerhoff, Charles H. Larabee, Joseph C. Brautigam, Adam Gibbs, John A. Ruckhart, J. Milo Strail, M. Leopold, Lyman Mower, E. W. Herrick, Charles R. Vandercook, Alonzo G. Huntington, Sylvester N. Rice, William M. Jackson, James Long, John Wentworth, L. W. Clark, Edward R. Harmon and Cyprian C. Norton.

The lodge made no report to the Grand Lodge for the year 1847, but presented the following statement, on the date designated:

"CHICAGO, September 23, 1848.

"To the Most Worshipful Grand Lodge of the State of Illinois:

"The undersigned, officers of Apollo Lodge, No. 32, held in the city of Chicago, would respectfully represent that, in the spring of 1847, Apollo Lodge made an agreement with Oriental Lodge, whereby the two lodges might be consolidated, and thereby form one lodge, more respectable as to numbers and more economical as to expenses than if two distinct organizations existed. Besides, the wants of the fraternity did not require so many lodges in this vicinity.

"In accordance with the above agreement, and with the consent and by the advice of the M. W. Grand Master, Nelson D. Morse, the members of Apollo Lodge, as per our returns, severally dimitted from the lodge, June 25, 1847, and soon afterward the majority of them became members of Oriental Lodge.

"A sufficient number dimitted to reduce the remaining members as per our report, to the first three officers; since which time Apollo Lodge has held no meetings, nor has it had in the opinion of the fraternity, an existence as a lodge. Our charter has been removed from the lodge room, and has been for more than a year at the disposal of the Grand Lodge. The unexpected absence of the W. M. last year prevented any action being taken upon it at your last Annual Communication. The officers are willing to abide by the decision of the Grand Lodge, either to return their charter or to place it in the hands of some person appointed by your honorable body to receive it.

"The officers would state that they have no funds or property remaining in their hands belonging to the lodge, and that the books of the lodge, placed in the hands of the Senior Warden for safe keeping, were, among other things belonging to him, unfortunately destroyed by fire during the present summer; that they have but their charter and the usual fee to return.

"The officers would therefore respectfully petition your honorable body to relieve them of their responsibility and enable them to connect themselves with other lodges, and thereby enable them the better to enjoy the privileges of the Masonic institution.

"And that your honorable body will direct us in relation to our charter, either to return it to the Grand Secretary or place it in the hands of some appointed person, your petitioners will ever pray.

"JOHN R. CASE, W. M.

"J. HERMAN BIRD, S. W.

"J. A. MARSHALL, J. W." †

And at this date, October 3, 1848, the charter of Apollo Lodge, No. 32, was directed to be returned to the Grand Secretary. *Hic jacet Apollo!* yet though here he sank to rest, he awoke with the Orient; and as under those auspices shone with a steady, lambent flame, constantly increasing, steadily growing, until the light of Oriental Lodge, No. 33, is disseminated amid the Chicago of six hundred thousand inhabitants.

ORIENTAL LODGE, No. 33.—LaFayette Lodge, No.

* As a matter of general Masonic history, it may be remarked that the creed that it is indispensable for a Mason to believe in the Deity was this year fulminated by resolutions in Illinois lodges.

† Case and Bird subsequently joined Oriental, No. 33, and Marshall remained with LaFayette No. 18.

18, by the accretion of members, became perforce endowed with the maternity of Apollo, No. 32, to relieve herself of the super-abundant Masonic *clientel*. Notwithstanding this fact, by July, 1845, LaFayette Lodge was again unduly distended by membership, beyond the number recommended as the maximum by constitutions and the Grand Lodge; a number of the members consequently decided upon instituting another lodge, among whom were William B. Herrick, J. V. Z. Blaney, George Davis, W. H. Davis, William Henry, Hamilton Hough, C. L. Schlatter, W. S. Brown, S. W. Sherman, Samuel Hoard, W. F. Walker, Reuben Tayler; these Masons signing the petition to the Grand Lodge and being the charter members of Oriental, No. 33.

A dispensation was granted August 8, 1845, and the first meeting was held August 9, 1845; whereat were William F. Walker, W. M.; William B. Herrick, S. W.; C. L. Schlatter, J. W.; J. V. Z. Blaney, S. W. Sherman, W. H. Davis, Hamilton Hough, members; W. H. Adams, Charles R. Starkweather and J. R. Case of No. 32, visitors. The dispensation was read, by-laws adopted and Oriental Lodge launched for the East.

ORIENTAL LODGE, No. 33.—On October 9, 1845, the charter was granted by the Grand Lodge of Illinois to Oriental Lodge, No. 33, with the three senior officers therein named as at the first lodge meeting. On December 20, 1845, the following officers were elected: J. V. Z. Blaney, W. M.; William B. Herrick, S. W.; C. L. Schlatter, J. W.; Samuel Hoard, treasurer; George Davis, secretary; Hamilton Hough, S. D.; T. A. Stewart, J. D.; W. H. Davis and S. W. Sherman, stewards; W. F. Walker, chaplain; Isaac P. Hatfield of LaFayette, No. 18, tyler.

December 19, 1846, the annual election was held with this result: James V. Z. Blaney, W. M.; George Davis, S. W.; C. L. Schlatter, J. W.; Samuel Hoard, treasurer; L. P. Hilliard, secretary; George Ryer, S. D.; Nathan C. Geer, J. D.; William W. Mitchell, chaplain; W. H. Davis, and S. W. Sherman, stewards; J. L. Thompson, of LaFayette, No. 18, tyler.

Upon April 26, 1847, a committee consisting of J. V. Z. Blaney, George Davis and C. L. Schlatter—the three senior officers of the lodge—was appointed to deliberate with a like committee from Apollo Lodge, No. 32, upon the feasibility of consolidating the two lodges, and on May 26 this committee reported favorably upon the project. Pursuant thereto on June 28, twenty members of Apollo Lodge presented petitions for affiliation, which were, after reference to the proper committee, accepted. The case of Isaac P. Hatfield, before referred to, was acted upon by Oriental Lodge at this meeting; the lodge declaring, by resolution, that the record of Apollo Encampment having declared him expelled, Isaac P. Hatfield was "expelled." On December 17, however, a communication was received from the encampment stating that I. P. Hatfield was not expelled, whereupon the resolution was rescinded and ordered expunged from the record. Just what Oriental Lodge had to do with the matter is unknown; the decree of the Grand Lodge was averse to his expulsion, and he was a member of LaFayette, not Oriental, Lodge. Election was then had, with the result as follows: George Davis, W. M.; W. H. Davis, S. W.; J. A. Reichart, J. W.; J. V. Z. Blaney, treasurer; L. P. Hilliard, secretary; R. V. M. Croes, S. D.; J. H. Pahlman, J. D.; W. Mitchell, chaplain; John Daly and S. W. Sherman, stewards; J. L. Thompson, tyler. This year the lodge had thirty-four members.

The election of December 15, 1848, made the following officers: George Davis, W. M.; William H. Davis,

MASONIC.

S. W.; J. A. Reichart, J. W.; A. G. Burley,* treasurer; L. P. Hilliard, secretary; C. Drake, S. D.; J. H. Pahlman, J. D.; William Barlow, chaplain; J. Herman Bird, J. V. Z. Blaney and William B. Herrick, stewards; N. Christie, tyler. Forty members were the quota of the lodge this year.

On December 21, 1849, the annual election resulted as follows: J. Herman Bird, W. M.; L. P. Hilliard, S. W.; Carlton Drake, J. W.; A. G. Burley, treasurer; Peter A. Lantze, secretary; W. H. Adams, S. D.; P. Ballingall, J. D.; J. V. S. Blaney, C. R. Starkweather and George Davis, stewards; J. Daly, tyler. The officers subsequent to these years are contained in the hand-book of this lodge. The members this year numbered forty-six.

The preceding pages exhibit the officers and membership of the two lodges that endured until 1850, and in thus showing their constituency the early Masons of Chicago are displayed; the apostles whose teachings and practice laid the foundation for the edifice, "not made with hands," that adorns the city of the present. They had their periods of sunshine and storm, their moments of doubt and their times of assurance; in fact, a storm was raised about the ears of Apollo, No. 32, in 1845, because it was deemed this lodge had too much assurance.

The *casus belli* was this: A. B. Lewis, a musician, genealogically descended from a Cherokee by an African paternal progenitor, for two years or so a resident of Chicago, duly qualified with a diploma from an acknowledged Grand Lodge, was admitted a few times to the lodge of Chicago as a visitor. Those who remember the bitterness of the pro and anti slavery factions, will readily understand how the chivalric tentacles of the Southern lodges retracted with horror, at the spectacle of a negro bowing before the Holy Altar at the mention of the name of our common Father. The Chicago lodges said, the half Indian, half negro, was an undoubted brother Mason, a modest, worthy man who came under the tongue of good report, and how his exclusion from any lodge to which he might apply for admission and display his credentials, would comport with the respect due to the Grand Lodge whose diploma he presented—one of the most intelligent and respectable bodies of Masons in the United States—was a question difficult of solution. But Apollo, No. 32, piled Ossa upon Pelion; by the entertaining of petitions from John Johnson and Davidson, barbers in Chicago, of commingled Anglo-Saxon and African blood, reputed of free birth and certainly of good report, for degrees in this lodge; said petition being presented at a regular communication held May 2, 1845, and referred in the customary manner. On May 5, however, a special meeting was held, and a resolution adopted, instructing the committee to whom the petition was referred not to report until after the next meeting of the Grand Lodge in October proximo, in order that an expression of opinion might be had from the Grand Lodge. The intention of Apollo Lodge appears to have been to ignore color lines, but it was a little timorous as to the result of its action.

On November 21, next following, at a regular communication, with W. M. William Stuart in the East, the committee upon said petition reported favorably; but the delegate to the Grand Lodge having stated that the Grand Lodge had not expressed any dictum on the matter, a resolution was unanimously adopted,

allowing the petitioners to withdraw their petitions and to resume their status as profane persons, *de novo*. It was also desired by the Master of Apollo Lodge, that it might be made a matter of record; that at the time of this action, no instructions had been received from the Grand Lodge with which the action of the lodge was inconsistent. But the lodges arose in their wrath, headed by Harmony, No. 3, who, for the nonce, was the Até of the Masonic confederation. Circulars were sent to each lodge asking for an expression of opinion; the question of a Black Lodge was gravely discussed; committees met, acted and parted; one gravely stating that "the Author of all has placed a distinguishing mark upon them (the negroes), clearly indicating that there was a distinctiveness to be kept up," etc. The tempest was full of acerbity, rancor and harsh sentiment, and was distinguished, in the main, by anything rather than the comprehensive charity that should extend from the nadir to the zenith. The whole fact appears to be that the Chicago lodge was some years ahead of time. It is surmised that the antagonism engendered by the pioneer abolitionism of Apollo Lodge, No. 32, led to its disintegration. Apollo was the deity before whom darkness fled; and Apollo, No. 32, made quite an illuminative innovation upon the pro-slavery ideas of that period.

On October 1, 1849, the Grand Lodge held its session for the first time in Chicago, and on February 10, 1850, the record of the proceedings was destroyed by fire, in consequence of which a special session of the Grand Lodge was convoked at Springfield, April 8, 1850, to restore records, etc., destroyed. This session of the Grand Lodge was christened, on this account, "The Grand Lodge of Recovery."

One act of justice requires to be performed to the memory of Nathan C. Geer: he is reported upon the hand-book of Oriental Lodge as expelled; he was expelled, but was restored by Grand Master J. H. Hibbard June 16, 1857, to good Masonic standing in the fraternity, upon the unanimous petition of the lodge,* and died at Peoria in 1860, a member of Peoria Commandery.

The Chicago lodges were by no means deficient in the great Masonic virtue, charity, as the following preamble and resolution, introduced in the Grand Lodge at the session of 1853, will satisfactorily demonstrate: "Whereas: It has been represented to this Grand Lodge that the finances of LaFayette and Oriental lodges of Chicago are now almost entirely exhausted by their frequent disbursements of charity to indigent traveling brethren; therefore Resolved: That the Grand Lodge of Illinois, out of its Charity Fund donate to LaFayette Lodge, No. 18, and Oriental Lodge, No. 33, to be equally divided among them, the sum of five hundred dollars." The Grand Lodge accounts do not exhibit its payment, however.

On May 18, 1854, the corner-stone of the Masonic Temple, 83 and 85 Dearborn Street, was laid, the officers and members of the Grand Lodge meeting at the lodge room, 171 Lake Street, and thence proceeding to the location of the temple, where eloquent addresses were delivered by Drs. J. V. Z. Blaney and W. B. Herrick. The first lodge room in Chicago was at the Harmon & Loomis Building, at the southwest corner of Clark and South Water streets, third story; and subsequently the lodges met at Cobb's Building, 171 Lake Street, and over the Apollo Hall, 250 Lake Street, corner of Lake and South Water streets.

The dedication of the temple occurred on St. John's

* Proceedings of Grand Lodge, 1840-60, page 491.

* This gentleman is the Blue-Ribbon Lodge-treasurer, and is still the occupant of this office, having held it without lapse, except for the years 1851-52-53-54; thirty years.

Day, June 24, 1856, the fraternity assembling at Metropolitan Hall, and thence proceeding, processionaly, to the Amphitheater, where the oration was delivered by S. Y. McMasters, D. D., of Alton. After the oration, the procession again got into line and marched to the temple, where the esoteric ceremonies were performed by the Grand Lodge, under the gavel of M. W. William

MASONIC TEMPLE.

B. Herrick, Grand Master, who delivered an eloquent address. About 5 p. m. the brethren and guests assembled at Dearborn Park, where a collation was laid, after the discussion of which toasts and speeches were rife. The banquet terminated at about 8:30, the brethren and guests meeting at Metropolitan Hall in the evening and winding up the proceedings of the day by a grand ball, whereat the élite of the city were present.

GARDEN CITY LODGE, No. 141, was instituted by dispensation on November 23, 1853, and was chartered October 2, 1854, with the following charter members: William McMillen, W. M.; George E. Pitkin, S. W.; L. P. Cheney, J. W.; Cheney Reed, treasurer; C. L. Watkins, secretary; C. Sassaman, S. D.; A. H. Merrill, J. D.; Carding Jackson and A. T. Dusenbury, M. M.

WAUBANSIA LODGE, No. 160.—In the proceedings of the Grand Lodge for 1854, L. Lusk, B. B. Payne and Larkin M. Riley, the committee on Lodges Under Dispensation, report having had consideration of petition for a lodge at Chicago, to be called Waubansia, and recommend the issue of a dispensation therefor to William B. Olmsted, master; E. J. Higgins, senior warden

and William A. Wilson, junior warden. Shortly afterward, Olmsted, being unable to attend to the duties resigned, and Deputy Grand Master T. O. Wilson, appointed John H. Dart, worshipful master, in his stead. The dispensation appears to have been granted October 12, 1854, and a charter to have been issued October 3, 1855, to Waubansia, No. 160. The history of Waubansia Lodge states that J. A. Hahn, J. T. Holt, Henry Fuller, George H. Phelps, James P. Russell, Horace Foster, Samuel Ashton, Frank Parmelee, William F. Orcutt, William H. L. Wilbur, Thomas Speer, William T. Hancock, S. S. Rogers, J. S. White, James S. Beach, William S. Bond, Norman Wiard, C. P. Albee, Henry A. Dean, S. C. Lum, Josiah H. Bross, T. O. Wilson, D. S. Smith, Isaac P. Poiner and James Sinclair were also charter members; that the primary ascensions of the 3-5-7 staircase were made by J. P. Brewster, John V. Farwell, G. S. Barstow, P. A. Hoyne, J. E. Church, R. C. Garrabrant, J. L. Marsh, C. T. Bowen, H. W. Zimmerman and J. M. Witherell, and that the meetings were held in Masonic Hall, 171 Lake Street, and subsequently in the Temple on Dearborn Street.

GERMANIA LODGE, No. 182.—April 16, 1855, a dispensation was granted to George B. Glaessner, Frederick C. Brandes and Rudolph Woehrly, as the three senior officers, for Germania Lodge to perform the Masonic rites and ceremonies of a Blue Lodge, and for the work to be done in the German language. At the session of the Grand Lodge, this year, the committee on Lodges Under Dispensation was divided in its opinion upon the legitimacy of a lodge working exclusively in a foreign language and, on October 2, 1855, the committee reported adversely to a continuance of the dispensation; ostensibly because the application had no avoucher endorsed of the ability of the lodge to do the work and confer the degrees. This report was accepted by the Grand Lodge, but subsequently, on the same day, a resolution was offered that a charter be granted Germania Lodge; which was adopted after the word dispensation had been inserted in lieu of charter. At the evening session, however, in consequence of the persistent efforts of Brother Hutton, the resolution was called up, reconsidered and amended so as to give a charter to Germania Lodge, No. 182, and the succeeding day she was represented in the Grand Lodge; the first German lodge in the State. The charter was granted under date of October 5, 1855, the charter members being George B. Glaessner, Frederick C. Brandes, Frederick Burky, Rudolph Woehrly and August F. Otto. The first officers of the lodge were George B. Glaessner, W. M.; Frederick C. Brandes, S. W.; Rudolph Woehrly, J. W.; George P. Hansen, treasurer; A. Boyer, secretary; F. Schoenwald, S. D.; Frederick Burky, J. D., and J. G. Higgins, tyler. Thus the claims of Chicago to recognition for polyglot Masons were conceded and validated.

WILLIAM B. WARREN LODGE, No. 209.—On November 15, 1855, a dispensation was granted to William B. Warren Lodge, and upon the 7th day of October, 1856, a charter was issued therefor. The charter members were: William T. Raifsnider, first W. M.; A. Loyd, first S. W.; I. Kellogg, first J. W.; and A. W. Rood, John Hughes, Harvey Danks, H. F. Hurn, and N. W. Douglass.

CLEVELAND LODGE, No. 211.—On January 16, 1856, Reuben Cleveland, Josiah H. Bross, John K. Russell, Caleb D. Fitts, Edwin A. Webber, Charles A. Case, Jacob B. Stansell, Edwin Hamilton, Wiley M. Egan, Lucian P. Cheney, Joseph P. Ross, Samuel I. Russell,

Reuben Tayler, and Albert C. Ellithorpe met at 79 Lake Street, the office of Dr. Lucian P. Cheney, to debate upon the feasibility of establishing a lodge upon the West Side. After an adjourned meeting they resolved that the name of the embryo lodge should be Cleveland, and a dispensation was applied for. On Thursday, January 23, 1856, at Temperance Hall, corner of West Randolph and Clinton streets, the dispensation was read; and the officers at this first meeting of Cleveland Lodge, U. D., were: Reuben Cleveland, W. M.; Josiah H. Bross, S. W.; John K. Russell, J. W.; Caleb D. Fitts, treasurer; Edwin A. Webber, secretary; Charles A. Case, S. D.; Jacob B. Stansell, J. D. On February 14, 1856, Alvin Salisbury became the first novice. At the annual communication of the Grand Lodge, held in Springfield October 3, 1856, a charter was granted to Cleveland Lodge, No. 211; and on Wednesday evening, October 22, 1856, at a special communication, the lodge was constituted and the officers installed by P. G. M. William B. Herrick. These were: Reuben Cleveland, W. M.; Josiah H. Bross, S. W.; Ira Goddard, J. W.; Ira S. Chamberlain, treasurer; Edwin A. Webber, secretary; John H. Dart, S. D.; Joel M. Chamberlain, J. D.; Isaac P. Hatfield, tyler. The following were the charter members of this lodge: Charles A. Case, Wiley M. Egan, Albert C. Ellithorpe, Caleb D. Fitts, Edwin Hamilton, A. P. Haywood, Josiah H. Bross, Reuben Cleveland, James P. Ross, John K. Russell, Samuel I. Russell, Jacob B. Stansell, Reuben Tayler, A. A. Webber, and Edwin A. Webber.

With this closes the recital of the journeyings of the various Blue Lodge pilgrims in search of light. In 1857 the Grand Lodge had two hundred and thirty-nine chartered lodges, fifty-four working under dispensation, and about ten thousand Masons who divided their time by tripartite measurement. The leaven which was hidden in a few measures of meal, and which was so strenuously antagonized, has risen and permeated the whole mass. "So mote it be."

LA FAYETTE CHAPTER, No. 2.—Cryptic Masonry was of very early establishment in Chicago, La Fayette Chapter, No. 2, having been instituted by dispensation from the M. E. Deputy Grand High Priest of the United States July 12, 1844, constituted by charter from the General Grand Chapter of the United States September, 1844, and by charter from the Grand Chapter of the State of Illinois October 14, 1850. The charter members were William F. Walker, John R. Case, Samuel H. Gilbert, Henry Brown, Matthew Taylor, Reuben Tayler, Carding Jackson, Henry W. Bigelow, Luther Marsh, A. Garrett, and John Davis. The first officers of the chapter were: Rev. William F. Walker, high priest; John R. Case, king; Samuel H. Gilbert, scribe; M. L. Knapp, captain of the host; Reuben Tayler, principal sojourner; John Davis, royal arch captain; Cornelius Lansing, G. M. 3d V.; P. P. Robinson, G. M. 2d V.; John Brinkerhoff, G. M. 1st V.; Samuel Hoard, secretary; H. W. Bigelow, treasurer; Rev. William M. D. Ryan, chaplain; Luther Marsh, William Harmon, and Isaac P. Hatfield, stewards; Isaac P. Hatfield, guard.

WASHINGTON CHAPTER, R.A.M., was first organized December 26, 1857, at a meeting where Reuben Tayler,* Reuben Cleveland, Dr. Franklin Wilson, Wiley Michael Egan, Theodore Tuthill Gurney, George Cowper, William Train Muir, Lucian Prentiss Cheeney, Joshua Howell Gest, John Kniffin Russell, Enoch Bunker Stevens, John T. Holt and William B. Milne

were present. The name of the chapter was decided upon, application made for a dispensation, and a solicitation made to La Fayette Chapter, No. 2, for a recommendation therefor. The following were elected as officers for the inchoate chapter: Reuben Tayler, H. P.; Reuben Cleveland, K.; Franklin Wilson, S.; Wiley Michael Egan, C. of the H.; Theodore Tuthill Gurney, P. S.; George Cowper, R. A. C.; Lucian Prentiss Cheeney, treasurer, and Joshua Howell Gest, secretary.

CHICAGO COUNCIL.—On June 3, 1854, James H. Hibbard, Grand Puissant, granted a dispensation to Joseph Filkins, M. Brayman, J. Herman Bird, Charles R. Starkweather, C. R. Vandercook, James McNair, Isaac P. Hatfield, John R. Case, L. P. Hilliard, Reuben Tayler and Carlton Drake to form a council of Royal and Select Masters under the name of Chicago Council No. —. The Grand Council, however, of which J. H. Hibbard was the senior officer, was found to be illegal, as upon September 29, 1853, the date of its constituting, Springfield Council—one of the three constituent councils—had no charter. Upon March 10, 1854, a new Grand Council was organized, and at its annual convocation on September 27, 1854, a letter was received from J. V. Z. Blaney, T. I. G. M. of Chicago Council, stating that no work had been done under the old dispensation and asking that a new one might be issued. Authority to this effect was granted, the officers being J. V. Z. Blaney, T. I. G. M.; Carlton Drake, D. I. G. M.; L. P. Hilliard, P. C. W.; and the council having fourteen members. This second dispensation was either never issued or lost in transit to Chicago Council, as J. H. Hibbard received a communication from J. V. Z. Blaney in January, 1855, stating that the dispensation had not been received, and accordingly one was made out and sent to the council that was suffering for credentials. They were received by Chicago Council, and on March 8, 1855, the council regularly and legally convened, the following being the officers: James V. Z. Blaney, T. I. G. M.; L. P. Hilliard, D. I. G. M.; Carlton Drake, P. C. W.; J. H. Bird, C. G. *pro tem*. Companions Ring, Shirley, McNair, Starkweather and Filkins; and visiting Companions, B. Sondheim and Levi Leibalt were present. E. J. Higgins, George W. Deering, W. C. Hunt and A. Liebenstein received degrees. The charter was issued September 26, 1855, and the following were the first officers under the charter: Companions James V. Z. Blaney, T. I. G. M.; Carlton Drake, D. I. G. M.; L. P. Hilliard, P. C. W.; Thomas Shirley, C. G.; J. H. Bird, recorder; C. R. Vandercook, steward, and E. J. Higgins, sentinel.*

APOLLO COMMANDERY, No. 1, Knights Templar, was granted a dispensation by the General Grand Encampment of the United States, on May 15, 1845. Upon September 17, 1847, *anno ordinis*, 729; the same august Masonic body confirmed the dispensation and granted a perpetual charter. The first conclave held by Apollo Encampment was at the Masonic Hall, in the forenoon of May 20, 1845, with William Frederick Walker, E. C.; John Roman Case, G.; and William Stuart, C. G.; and at this conclave petitions were presented from Jacob Beeson, of Niles, and C. Britain, of St. Joseph, Mich.; and from W. A. Rowlett, W. S. Brown, Philip P. Robinson, Charles Follansbe and Charles Robert Starkweather, of Chicago. It was agreed that the petitions should be referred to a committee, who should report immediately. Their report was favorable, and the ballot being clear,

* Reuben Tayler is one of the oldest living Masons, having been made April 18, 1820, his twenty-second birthday occurring May 3, 1820.

* To John Oscar Dickenson, Recorder of Chicago Council, No. 4, the collaborator is indebted for aid in compiling this history.

the applicants were declared elected, were introduced and created Rosicrucians. Sir Knight W. E. Russel, was the first affiliate, his petition being presented at the second conclave of the encampment, on May 23, 1845; when W. S. Brown, W. A. Rowlett and P. P. Robinson, were created Knights of Malta and Knights Templar. The charter members of Apollo Encampment were Henry Brown, John Barney, G. C. Blodget, John Roman Case, Samuel H. Gilbert, Isaac Haight, A. B. Lewis, William Moreland Davis Ryan, William Stuart and William Frederick Walker. The commanders of the encampment have been William Frederick Walker, 1845; John Roman Case, 1845-52; Reuben Tayler, 1853; James Van Zandt Blaney, 1854; John Herman Bird, 1855; Thomas Shirley, 1856, and Hosmer Allen Johnson, 1857; in which last year the designation Encampment appears to have been changed to Commandery*.

Three commanderies having been instituted in the State, preliminaries were perfected for the formation of a Grand Commandery; and, upon October 27, 1857, a convocation was had at the Masonic Temple, Chicago, whereat Apollo, No. 1, Belvidere, No. 2, and Peoria, No. 3, were represented, and where a warrant, dated September 15, 1857, was received from the Grand Encampment of the United States, authorizing the organization of a Grand Commandery of Knights Templar, for the State of Illinois. Pursuant thereto the following Knights Templar were elected officers of the Grand Commandery: James Van Zandt Blaney, G. C.; Clark Brown Stebbins, D. G. C.; Benjamin F. Barry, G. G.; Hosmer Allen Johnson, G. C. G.; Reuben Tayler, G. P.; Robert Harris Foss, G. T.; William Harbron Turner, G. R.; Henry L. Gaines, G. S. W.; DeWitt Clinton Martin, G. J. W.; Josiah Hunt, G. St. B.; Isaac Underhill, G. S. B.; Charles Robert Starkweather, G. W., and Ezra James Higgins, G. C. G.

Relative to the Ancient and Accepted Scottish Rite, G. W. Barnard states, that during the proceedings on the first and second days of May, 1846, Most Puissant Sovereign Grand Commander John James Joseph Gourgas, 33°, was authorized to issue to Brothers W. F. Walker, William Stuart, Charles R. Starkweather, John R. Case, William L. Brown and Samuel Hoard, all of the city of Chicago, a charter for an Ineffable Lodge of Perfection, but that his closest search has not revealed the issuance of any such charter. But in July, 1856, Killian Henry Van Rensselaer visited Chicago and, assisted by Charles Robert Starkweather, initiated, elevated and proclaimed the requisite number of worthy brethren to be S. P. R. S. 32°; and fully organized and constituted them in lodge, council, chapter and consistory, and on the 20th day of Ijar, A. M., 5617,—May 14, 1857,—charters were issued to these organizations, under the name of Occidental Sovereign Consistory of Sublime Princes of the Royal Secret; Gourgas Chapter of Rose Croix; Illinois Grand Council Princes of Jerusalem, and Van Rensselaer Grand Lodge of Perfection; the charter members being, in each case, Charles R. Starkweather, James V. Z. Blaney, George W. Deering, James L. Dalliba, William B. Herrick, Robert H. Foss, William W. Mitchell and Hosmer A. Johnson.

Thus, in 1857, all the various Masonic confraternities were constituted and in a flourishing condition. But one item of general interest has been undiscoverable, the first brother who was buried with Masonic honors. Old residents state, that prior to the establishment of a

* H. S. Tiffany of Apollo Commandery, and the Blue Book of that organization, have furnished valuable data that is presented in this summary.

lodge in Chicago, some one who died at the fort was buried by such Masons as were in the town of Chicago, with Masonic honors; but the most careful research has failed to verify this assertion by documentary evidence. Masonry, at the close of 1857, was a vital, augmenting power.

ANTI-MASONIC.—In April, 1846, was organized the Illinois State Anti-Masonic Society, of which James H. Collins was president; Joshua Bell and James H. Rickey, vice-presidents; Joseph Peacock, recording secretary; George W. Gardiner, corresponding secretary, and A. Rossiter, treasurer. The recital of the progress of Masonry from 1844 until 1857 demonstrates that the anti-masonic antagonism was no great obstacle to the advancement of the Order.

ODD FELLOWSHIP.

The first lodge of Odd Fellows organized in the State of Illinois was Western Star Lodge, No. 1, at Alton. In 1835 Samuel L. Miller, a past-grand of a lodge in Maryland, came West and brought with him a warrant from the Grand Sire, for the institution of an I. O. O. F. lodge at St. Louis, at or near which city it was his intention to reside. Under this warrant he instituted Traveler's Rest Lodge, No. 1, at that place, in the jurisdiction of Missouri, and the following year, August 11, he aided in the institution of the first lodge in Illinois, namely, Western Star Lodge, No. 1, at Alton. The charter members were Samuel L. Miller, John R. Woods, Stephen Lansing, Thomas Wright and John Fisher. Samuel L. Miller, the founder of the two first lodges in Illinois and Missouri, became the first Grand Secretary of Illinois, and was for some years prominently identified with the Order in this State.

UNION LODGE No. 9.—From 1836 to 1844 the Order evidently grew but slowly, for on the 28th of February of the latter year the first lodge was instituted in Chicago, under the name of Union Lodge, No. 9,* so that in eight years from the time of its introduction into the State, nine lodges constituted the strength of the Order all told. This lodge was established on a petition to the Grand Lodge, from Past Grand A. L. Jacobus, B. W. Thomas, Edward Burling, Francis Marshall and others, early in January, and on Wednesday night, February 28, 1844, the Grand Master of the Grand Lodge, Thomas J. Burns, being present, the first meeting was held in a building which then stood on the corner of Randolph Street and Fifth Avenue. The charter members were B. W. Thomas, E. Burling, Charles Wheelock, Francis Marshall, Augustus L. Jacobus, Daniel Heald, Jr., William Anderson, J. M. Morton, C. P. Kellogg and J. Burrows. Its first officers were A. L. Jacobus, N. G.; F. McFall, V. G.; B. W. Thomas, secretary, and Daniel Heald, treasurer. Among its early initiatory members were Samuel B. Walker, now living in retirement on the West Side, E. W. Denisons, E. A. Rucker, H. L. Rucker, W. W. Danenhower, H. O. Stone, Robert H. Foss, A. G. Burley, and many others whose names it has been impossible to obtain. There were thirty-nine members by August 14. Isaac N. Arnold joined in 1846. After it was fairly started and in good working order, the lodge moved its place of meeting to a hall on the corner of Lake and State streets, where it remained until the erection of Odd Fellows Hall, at Nos. 98 and 100 Randolph Street, when it removed to that place. From the first, Union

* Prior to the institution of Union, No. 9, the eight lodges in the State were located as follows: Nos. 1 and 2 at Alton; No. 3 at Greenville; No. 4 at Jacksonville; No. 5 at Galena; No. 6 at Springfield, and Nos. 7 and 8 at Belleville.

Lodge prospered finely, and its membership increased so rapidly that in a little over a year, using the language of a veteran Odd Fellow, "The boys swarmed and a new lodge was started." This was

DUANE LODGE, No. 11, was instituted March 5, 1845. Its place of meeting was in the fourth story of the Loomis Building, corner of Clark and South Water streets. Of course the charter members of Duane were all members of Union; but, feeling that a new lodge was needed, they had acted as they thought wisely in thus establishing it. Their names were: Francis McFall, Robert P. Hamilton, Allen S. Robison, Thomas George, Lewis H. Todd, Augustin D. Boyce, Perley D. Cummings, and William Anderson. The new members fitted their lodge-room up in excellent style, and it was generally conceded to be the finest and best appointed hall then existing in the West. Owing to this fact and the pride its members took in their organization, Duane soon came to be known as the "Silk Stocking Lodge," a title which clung to it for many years. With the starting of Duane Lodge, the Order continued to grow in Chicago, but nearly two years elapsed before the third lodge was established.

EXCELSIOR LODGE, No. 22. This was instituted January 6, 1847. The formation of this lodge was the result of a second "swarming" from the mother hive. Its charter members were James K. Webster, S. W. Grannis, James W. Grauks, Horace Lamb, J. DeLa-Croix Davis, Herman H. Benson, Elisha Lane, F. Campbell, Abel H. Dauffer, William E. Knibloe, Thomas Manahan, William Henry, George W. Carley, and L. Dauffer. Excelsior Lodge held its meetings in the hall of Duane Lodge until the building of the hall on Randolph Street when it also moved to that place. Concerning the formation of this lodge, an interesting bit of history is found in the report of Grand Master S. S. Jones to the Grand Lodge, in its session held at Springfield, in January, 1847. He says:

"Since the November session of this body, a petition has been received from fourteen highly worthy brethren of Chicago, asking for a charter for a new lodge at that place, to be known and hailed as Excelsior, No. 22. The prayer was granted, and on the 6th of January, 1, in company with other Odd Fellows, from sister lodges, repaired to Chicago, and there instituted Excelsior Lodge, No. 22, and installed their officers under the most flattering circumstances. The petitioners for the charter were all worthy gentlemen and well worthy to receive it, and we may look forward with the brightest anticipations, for a high state of prosperity in that lodge. They will do honor to the title and name they have assumed." Continuing his report, the Grand Master adds, "We, on Tuesday evening, visited Duane Lodge, No. 11, and there installed the officers for the current term. The petitioners for Excelsior Lodge were principally an accession from Duane, which lodge they left with the best of feeling; as I am informed they presented the out-going members with the amount of their initiation fee for the purpose of aiding them to commence the work under the charter. Excelsior Lodge was instituted in the Duane lodge-room, where their meetings are to be permanently held. In a word, I may say, the Order in Chicago is in a highly flourishing condition."

It was in December of that year that the Order was called on to perform the last solemn rites at the burial of a brother. The Daily Journal of December 13, 1847, thus refers to it:

"On yesterday the different lodges of I. O. O. F. assembled at the Methodist church to pay the last tribute to a departed brother, A. P. Spencer, who died on Saturday (December 11). Rev. Mr. Hibbard, of the New Jerusalem faith, though not a member of the Order, officiated by request of the deceased. Mr. Spencer was a printer and formerly a workman in this office. A large number of the craft was in attendance and followed his remains to the grave. This is the first instance where the brethren of the mystic tie have been called upon to perform the solemn rites of their Order."

CHICAGO LODGE, No. 55, the third in point of

seniority, was organized in July, 1849, and held its meetings on each Monday evening in the hall of Union Lodge, which was still situated on the corner of Lake and State streets. In the two years which had elapsed since the institution of Excelsior, the Order had continued its rapid growth in strength and numbers, until the institution of Chicago Lodge was a necessity occasioned by the number of applications for membership in the existing lodges. On its charter can be found the names of many who are still its members. The following is the list: Edward Burling, William Anderson, Benjamin G. Johnson, Patrick O'Donaghue, Robert H. Foss, Isaac Spear, Timothy H. Ladd, Isaac Coburn, Charles M. Gray, George M. Gray, B. C. Welch, H. H. Husted, Ambrose Burnam, James Launder, David S. Smith, William Dickens, John P. Foss, Samuel T. Foss, William P. Roche, John M. Merserve, Moses Kohn, Joseph Harrison, John J. Brown, Simon V. Kline, and Jacob V. A. Wemple. A glance at the number of the lodges as they were organized in this city, and an observation also of the time elapsing from the institution of Union Lodge, No. 9, in 1844, to the establishment of Chicago Lodge, No. 55, in 1849, will give the reader some idea of the growth of the Order in the State, and its comparative advancement in this city. For instance, there were eight lodges in the State when Union Lodge was organized; five years later, when Chicago had four lodges, there were fifty-five, so that it is apparent that the growth of the Order here was more rapid than in any other portion of the State.

ROBERT BLUM LODGE, No. 58, was organized in October, 1849, and was the first German society of the Order. Its meetings were held in the hall of Union Lodge. It was from the beginning a prosperous body. Its charter members were: Peter Schmitz, Philip Friedrich, John Fischer, Frederick Singer, George Funk, C. Frederick Schott, Joseph Schlereth, Gottfried Laugheirich, V. A. Boyer and John M. Pahlman.

The following year, at the session of the Grand Lodge, held at Peoria in July, the Grand Master reported the fact that permission had been granted Robert Blum Lodge to work in the German language. Commenting on this action, and referring to the policy of permitting lodges in this country to work in a foreign tongue, the Grand Master remarked:

"As it is the established policy of the Order to allow lodges to work in other languages than the English, I requested the secretary to send for six copies of the books in the German languages, as more would probably be needed. I am happy to say that I have none but good accounts of the working of this lodge. Since this occurred I have doubted whether it was the true policy to have lodges working in foreign languages—whether our duty to our country does not require us to use all our influence to Americanize all foreigners among us as soon as possible, and afford them no facilities for their being satisfied or comfortable without conforming to the genius, institutions and language of the land."

The Grand Master's suggestions, it appears, have never been carried out by the Order, for all over the land are lodges working in foreign tongues, whose power for good is unquestioned and whose members are in every sense true Odd Fellows.

In July, 1850, a Degree Lodge was organized, which met on the second and fourth Fridays of each month for work in the degrees, in Odd Fellows Hall on Randolph Street. Previous to this two encampments had been formed, but as they will be treated separately later on, no further mention is necessary here. But, pursuing the history of the lodges, it is found that a period of seven years elapsed before the formation of a new lodge marked the growth of the Order here, and that one was established on the West Side.

FORT DEARBORN LODGE, No. 214, the last referred to, dates from October 4, 1856. Dr. Samuel Willard, of this city, who for many years has been a prominent Odd Fellow in this State, and who has represented the Grand Lodge in the councils of the Sovereign Grand Lodge of the United States, has written an interesting history of Fort Dearborn Lodge, of which he has for years been a member. Concerning the formation of the lodge he says:

"There were then in this city but five lodges, Union, Duane, Excelsior, Chicago and Robert Blum; and the last of these lacked but a week of being seven years old. The city had grown greatly; these lodges had increased in membership, and now two more lodges were to be formed to work on the west side of the river, Fort Dearborn, No. 214, to work in English, and Harmonia, No. 221, about four months younger, to work in German. * * * * Curiously, Fort Dearborn Lodge is closely associated with my own memory and work in the Order; for this was the last lodge instituted before I became Grand Secretary, and the first representative to the Grand Lodge from this body, assisted in choosing me to that office within two weeks after this lodge was opened, and transacted business with me at the session of 1856." * * * "On the night of the institution the Grand Master, Perry A. Armstrong, met the charter members of Fort Dearborn Lodge in the hall of Excelsior, with members of other lodges to aid. Brother George F. Crocker, of No. 22, an active Odd Fellow, long since dead, acted as D. G. M.; our long time-friend, Albert G. Lull, now P. G. Rep., was grand marshal; James F. Jillson, grand secretary and Andrew Tauber, of No. 58, deceased, was grand treasurer. The charter members were Allen C. Lewis, F. H. Sleeper, Thomas Manahan, E. B. Kingsley, J. K. Thompson, Reuben Cleveland, N. W. Condit, Pleasant Amick, J. P. Cook, A. G. Warner, George W. Noble and P. B. Lamb. The records of the first month do not show the places of meeting after the institution; but the lodge seems to have gone at once upon the West Side, to a hall held by Cleveland Lodge of Masons, on the southeast corner of Clinton and Randolph streets."

The seal adopted by the lodge and still in use, bears as a device a representation of old Fort Dearborn. The first term closed auspiciously, having in the first fourteen weeks of its existence taken in thirty new members and a revenue of \$122.50. The lodge was now firmly established and from this time on its history would probably be of but little interest to the general reader, and the limits of this work preclude its further consideration; suffice it to say that Fort Dearborn Lodge passed through various vicissitudes, alternate periods of prosperity and adversity, survived all, and is to-day one of the strong working lodges in the city.

HARMONIA LODGE, No. 221, was instituted in January, 1857, by German residents of the West Side. Its charter members were John C. Smith, John A. Boerner, Louis Hientz, George Petermann, John Hoffman, Charles Ippel, Charles Rietz, Conrad Schertel, F. W. Forch, and August Schenkowitz. The lodge is still recognized as one of the foremost German lodges in the city.

ODD FELLOWS HALL.—In the foregoing history of the different lodges in this city, frequent references have been made to Odd Fellows Hall, which was situated on Randolph Street, near Clark. As it is peculiarly an institution of the Order, a brief history is not inappropriate here. This hall was built by Union, Duane and Excelsior lodges, and on the 21st of February, 1853, was thrown open to the public for inspection. It was elegantly furnished and was pronounced then the finest hall in the city. The following evening it was dedicated to the uses of the Order, with appropriate public ceremonies; Hon. Schuyler Colfax was the orator of the occasion.

At this meeting the degree of Rebekah was conferred upon some thirty or forty ladies, wives and daughters of the members of the different lodges.

ILLINOIS ENCAMPMENT, No. 3, was the first of that

degree established in Chicago, and the third camp instituted in the State. The first one was Wildey, No. 1, at Alton; the next, No. 2, known as Lebanon Encampment, at Springfield; the third as above, which dates from February, 1845. Its charter members were R. W. Thomas, Arthur Johnston, A. D. Boyce, Sylvester Marsh, N. Sherman, Jr., P. D. Cumings and S. N. Davis. The application for the charter for this Encampment was made in December, 1844, and on the 24th of that month Grand Master William Duane Wilson, of Michigan, secured the warrant to confer degrees and to open Illinois Encampment, No. 3. In accordance with this commission Grand Master Wilson, assisted by Charles T. Adams, Past Senior Warden of Michigan Encampment, No. 1, came to this city and conferred the Encampment degrees upon the petitioners, whose names have already been given, and duly instituted the body on the night of February 7, 1845. The ceremonies took place in the hall of Union Lodge, No. 9, and the following officers were installed: N. Sherman, Jr., C. P.; P. D. Cumings, H. P.; R. W. Thomas, S. W.; A. D. Boyce, S.; S. N. Davis, T.; Sylvester Marsh, J. W., and Anthony Johnston, S. The Encampment did not, it appears, thrive as vigorously as its friends had hoped; for three years later, March 20, 1848, for some reason, the members surrendered their charter and it ceased to exist. No doubt the mistake was made of planting the Encampment too early in a comparatively new field, as the Order itself had only been introduced here in the preceding year. Living but so short a time and dying as it did before the institution of the Grand Encampment in the State, facts concerning its history have been obtained only with great difficulty. A careful search of records here and the records of the Grand Lodge and Grand Encampment of the State disclose no facts worthy of note. And it was only from T. A. Ross, Grand Secretary of the Sovereign Grand Lodge of the United States, that the date of its organization and the names of its charter members were obtained. But notwithstanding the failure to continue the existence of Illinois Encampment, No. 3, it seems that the Odd Fellows were determined to try again; for in August, 1848, the records of the Grand Lodge of the United States show that a charter had been issued for the institution of

CHICAGO ENCAMPMENT, No. 10, and on the night of September 21, 1848, in the hall of Duane Lodge, No. 11, Patriarch A. L. Jacobus, by the authority vested in him by the Grand Sire, instituted the new encampment. The charter members were F. Scammon, T. H. Ladd, E. A. Rucker, Charles Cumberland, S. N. Davis, N. Sherman, Jr., W. H. Minard, George G. Andrews and Peter A. Lantz. In addition, the following Odd Fellows were initiated: C. G. Drake, T. L. Perdue, John Gray, Henry L. Rucker, Moses Kohn, Charles M. Gray, Samuel Rattle, Patrick A. Donahue, Truman Whitcomb and W. A. Eliason. Its first officers were F. Scammon, C. P.; R. H. Foss, H. P.; T. H. Ladd, S. W.; N. Sherman, J. W.; S. B. Walker, T., and E. A. Rucker, S. The new Encampment being started under more favorable auspices than the old one, soon attained a permanent footing, and is to-day a prosperous and active organization. In concluding this brief chapter, it should be stated that the records of Chicago Encampment were all destroyed in the great fire, and that, previous to this, the records of the Grand Encampment had also suffered a similar fate. Owing to these losses, it has been found a matter of much delay and difficulty to obtain the few facts here given concerning this Encampment. Indeed, it is due to the thoughtful foresight of A. T. Sherman, an old and honored member of the Encampment, who

took the pains, immediately after the fire, to collect by interviews and from all obtainable records, information concerning its institution and early history, that the information herein given has been obtained.

It is to be regretted that a more detailed history of the Order, in this city, cannot be presented, but it is believed enough has been written to include, in a general way, the really important facts concerning its institution and subsequent growth; while a history of its workings, in which would be included a discussion of the power and influences of the Order as a social factor, does not properly belong to a work of this character. Of the lodges mentioned, which embrace those established here during the period included in the present book, all are to-day in a satisfactory condition, and from them have gone out scores of sister lodges whose history will receive appropriate treatment in the pages of another volume.

SOCIAL AND TEMPERANCE REFORMS.

In the primitive state of society; in the embryonic stage of association of pioneer settlement, one of the first wants felt by the individual is that of frequent communion with his fellow-creatures—hence, in very immature settlements are seen the “stag-dance” and “hoe-down;” in those a little more advanced, the Wabano. Consequent upon the assembling of the individuals of any sparsely settled region must result a discussion of the means whereby their opportunities for social and intellectual culture may be increased; and then, how those vices which militate against the welfare of the little commonalty may be abrogated or destroyed. It goes without saying, that of the latter class, intoxication is the most potent source of evil; and to those who nullified its possibility of harmful influences in Chicago, Captain Heald takes precedence, by the destruction of the liquor in Fort Dearborn, prior to its evacuation in 1812. This, however, was but a piece of quasi-philanthropy; the destruction was only accomplished to preclude the augmentation of rancor and ferocity in the Indian heart. The evils that might arise from its consumption by the soldiers were undeserving of the exercise of the stratocratic prerogative. But in 1832, Philo Carpenter inaugurated a temperance society in the little coterie of settlers. How largely it was attended, or how many were permanently influenced by its precepts, are unknown facts. No effort, however, but attains some result. Meanwhile the settlers met at their balls and parties, formed reading-circles and debating clubs, and by the ennobling influence of the society of good women, prevented the too great spread of lax habits that are so prevalent in frontier settlements where the majority of the settlers are masculine, and Indians in an uncivilized state as to good habits, but in a highly civilized condition as to bad ones, frequent the settlement. There were likewise meetings held by various apostles of various denominations, but exactly the power that a church has in social reformation in a new settlement, it is hard to designate; as a church *per se* is established by the devotees of that creed, and their presence in the community has made itself felt long before it assumes form as a congregation. Association with the ladies of early Chicago softened the rugged voyageur, ennobled the ferocious half-breed, stifled the half uttered expletive upon the lips of the careless hunter, and made the resident more careful as to his dress, demeanor and habits; but this casual association was insufficient to check the fatal evil, intemperance. The first organized secret society that attempted to

thwart the saloon interest was the Independent Order of Rechabites, organized August 20, 1844. It did excellent and efficient work, in alluring the young men from infemperance. This may be esteemed the fruitage of Philo Carpenter's temperance society, and many other societies that succeeded it. Temperance societies divested of the halo of initiations and degrees are not eminently successful in restraining mature persons. Swaddling clothes of blue and red ribbons do not prevent the illicit potation; but the responsibility to a society that the infringement of the obligation, of which the cordon is an emblem, is a serious deterrent and preventive. The rock upon which temperance reform was built may then be said to be the Rechabite Lodge of 1844. This statement, however, to be literally accurate, should be qualified by stating that the temperance reform of the *hereafter* was erected upon a basis of 1844, for no tidal wave of prohibitory amendment, or restrictive legislation swept over Chicago anterior to 1857. The temperance reforms of those early days were individual and not general, persuasive in lieu of coercive, appealing instead of mandatory, and possibly none the less effectual because of these characteristics; that the co-operative efforts that were exerted were successful is proven by history; for, despite the large element that speculation introduced of lawless, careless characters, drunkenness was not a widely spread vice.

The results that were produced by the efforts of individuals to cultivate their moral and intellectual forces are seen in the Young Men's Association of 1841, and the Mechanic's Institute of February 23, 1842. The amelioration of the dearth of intellectual food produced by the establishment of these Lycea can not be over-estimated, and their moral effect was extremely beneficial in the providing of pure, healthy subjects of thought. Herein lies the secret of moral warfare; fill the mind of youth with good, pure thoughts and resolves and he will be moral; let him be contaminated by impure association and the result is nearly certain. Repression will not reform him any more than the *argumentum ad aquam*, used by the fire companies of early Chicago upon the demi-monde, extirpated the social evil. It only caused its abiding place to be more carefully hidden, to avoid similar unpleasant results. These two vices, immorality and intemperance, have kept pace with the growth of the city, but the ratio of increase was impeded by the social and temperance reforms of these times; their particularization is summarized about as follows: Social etiquette and the conventionalities of polite intercourse were ingrafted by travelers from the outside world and acquired by those who had means and opportunities for travel, and from them the “home-keeping youth” procured his example; but the amenities and purities of home-life, the effort at the cure of intemperance, proceeded from the rectitude of the Chicagoans themselves and to their personal efforts. To their irrepressible desire to do right themselves and have their neighbor do so likewise, may be ascribed the results that made the Chicago of 1857— notwithstanding its being the Mecca of the speculator and adventurer—the law-abiding and orderly city that it was.

The various temperance societies that prevailed in Chicago may be summarized as follows:

The Chicago Temperance Society was organized some time in 1832, and was requested to convene at Baptist meeting-room, December 26, 1833, by J. Watkins, secretary; and on January 30, 1834, elected John Taylor Temple, president; Josiah C. Goodhue, vice-president; Philo Carpenter, secretary and treasurer;

Captain DeLafayette Wilcox, U. S. A.; M. D. Harmon; H. Van Der Bogart and Lieutenant J. L. Thompson, U. S. A., executive committee.

The Washington Temperance Society, instituted January 1, 1840, had an alleged membership of eleven hundred in 1843, and of fifteen hundred in 1845. The earliest list of officers attainable is that of 1843, and comprises: L. C. Kercheval, president; T. W. Smith, first vice-president; John Davis, second vice-president; Luther Nichols, third vice-president; H. L. Rucker, recording secretary; John L. Smith, assistant secretary; James Curtiss, corresponding secretary; James L. Howe, treasurer; B. W. Raymond and William Harman, managers.

The Bethel, or Mariners' Temperance Society, instituted July 10, 1842, had an accredited membership in 1843 of two hundred and seventy-one, and of one thousand in 1845; officers: G. A. Robb, president; Grant Goodrich, vice-president; Captain Henry Cortney, secretary; Captain G. Peterson, A. B. Gould, D. McIntosh, floating committee; Samuel Jerome, J. Prenderville,* T. F. Hunter, H. Smith and J. Lawson, vigilance committee.

Junior Washington Temperance Society, organized March 11, 1843, with one hundred and eighteen members, and had some three hundred members in 1845. The first officers were: Edward A. Rucker, president; Edward Morey, first vice president; Alfred Scranton, second vice-president; William Wayman, third vice-president; David D. Griswold, recording secretary; James A. Martling, assistant secretary; Asa Covey, corresponding secretary; William H. Scoville, treasurer; Reuben B. Heacock and Richard H. Morey, managers.

Independent Order of Rechabites, Chicago Tent, No. 65, organized August 20, 1844, with one hundred and ten members, and the following officers: J. A. Hoisington, S.; G. C. Thompson, C. R.; William Gamble, D. R.; William Harman, P. C. R.; H. B. Bay, treasurer; F. L. Kent, secretary; J. B. Nickerson, C. R. R. H. S.; J. P. Thompson, levite; O. S. Hough and J. A. M. Hoisington, stewards; John Guthrie, I. G.; H. Norris, O. G.

Independent Order of Rechabites, Western Star Tent, No. 125.†

Independent Sons of Temperance, first organized November 8, 1845, with ten members, as Illinois Division, No. 1, S. O. T., and first convened in the Rechabite Hall. The following divisions were subsequently organized: Prairie, No. 8,‡ on February 13, 1847; Mariners, No. 42, † on January 1, 1848; Mechanics', No. 44,§ on April 12, 1848; Germania, No. 107, † on June 13, 1848; Cadets of Temperance, † Garden City Section, organized September 6, 1848. These numerous lodges appear to have diminished, as in the directory of 1855-56, but Chicago Division, No 1, and Garden City Division, No. 422, are cited as being in existence.

In May, 1849, the Chicago Temperance Savings' Association was organized. The officers were: William H. Brown, president; C. Walker, vice-president; J. Wilcox, secretary; T. B. Carter, treasurer; Alfred Cowles, attorney; Loaning Committee: B. W. Raymond, Thomas Richmond and H. Smith. Trustees: W. H. Brown, C. Walker, B. W. Raymond, A. Cowles, H. Smith, T. B. Carter, Jairus Wilcox, S. D. Childs, S. L. Brown, B. W. Thomas, Samuel Hoard, L. A.

* John Prindiville.

† The two Rechabite lodges met at 92 Lake Street.

‡ These lodges, and Illinois, No. 1, subsequently met in the top story of a brick building corner of Clark and South Water streets.

§ Convened in Yates's Building, corner of Randolph and Canal streets.

Brown, Thomas Richmond, Jeduthan Brown, H. M. Thompson.

The Independent Order of Good Templars instituted a Grand Lodge on April 18, 1855, of which Orlo W. Strong was G. W. C. T. The subordinate lodges were: Star of Hope, No. 15, instituted December 27, 1854, met at Templars' Hall, corner of Wells and South Water streets; Houston, No. 32, instituted April 2, 1855; met corner of Randolph and Clinton streets; Arethusa, No. 48, instituted July 6, 1855; met at Odd Fellows Hall, Metropolitan Block.

Star of Hope Lodge is still in existence, being the oldest lodge in the Order, and has amongst its members two of the charter members—J. S. McIntire and James Welch. It celebrated its twenty-ninth anniversary December 27, 1883.

The Temple of Honor is stated to have been instituted in Chicago in the winter of 1845, but the first account of any organization gives the date August 20, 1849. The various Temples were Radiant, No. 9; Metropolitan, No. 35; Chicago Degree, No. 7, and Chicago Social Degree, No. 18.

On February 11, 1851, a meeting was held by Scotch residents in the basement of the First Presbyterian church to form a Scotch Temperance Society. S. Lind was in the chair, and J. F. Ballantyne was secretary, and at the meeting about seventy signed the pledge to refrain from usquebaugh and kindred drinks. A committee of Alexander Brand, S. Lind, Hugh Dunlop, W. J. Patterson, Joseph Johnston, Thomas Scott, John Shanks and J. F. Ballantyne, were appointed to draft resolutions, etc., which were adopted at a subsequent meeting.

MECHANICS' INSTITUTE.

On the night of January 3, 1837, a number of Chicago mechanics met at the Eagle Coffee House, for the purpose of organizing a Mechanics' Institute. Samuel Southerdon was called to the chair and Francis Kessler was chosen secretary. The following committee was appointed to draft a constitution: John Mitchell, Francis Kessler, William Duncan, I. L. Kimberly, Isaac N. Arnold, David Foot, P. Ballingall, I. N. Balestier, Samuel Southerdon, Dr. Murphy, Henry Baldwin, John Black, E. E. Hunter, C. A. Lobei and P. Nichols. At a subsequent meeting, held January 21, a constitution was adopted, officers elected and arrangements made for starting a library and museum. Five years later a re-organization was effected and early in 1843 it was chartered as a corporation. Its incorporators were Charles M. Gray, A. S. Sherman, Elijah Smith and Ira Miltimore. Its first officers were Ira Miltimore, presi-

Ira Miltimore

dent; J. M. Adsit, first vice-president; G. F. Foster, second vice-president; J. B. Weir, recording secretary; John Gage, corresponding secretary; J. H. Hodson, treasurer; Horatio Cook, librarian; C. M. Gray, assistant librarian; I. L. Milliken, Isaac Speer, E. D. Bates, B. Bailey and E. Smith, directors. At the time of the organization, and for several years thereafter, its meetings were held in the hall of the old Saloon Building, corner Lake and Clark streets.

The objects of the society as set forth in its constitution were "to diffuse knowledge and information

throughout the mechanical classes; to found lectures on natural, mechanical, and chemical philosophy and other scientific subjects; to create a library and museum for the benefit of mechanics and others; and to establish schools for the benefit of their youth, and to establish annual fairs." The constitution further provided that the institution might consist of an unlimited number of members, divided into three classes, regular or life members, honorary, and corresponding members. The only requisite for membership was good moral character in the applicant, who was to be proposed by one or more members of the Institute, and who was required to receive a majority of the votes cast relative to admission, and to pay the initiative fee demanded under its by-laws. The officers were chosen annually and regular meetings were held on the first Tuesday evening of each month. Recognizing early the importance of obtaining a library, the leading members of the Institute set vigorously to work to accomplish this much desired end. Indeed, so enthusiastic were they on this subject, that it was unanimously voted to make no attempt to hold a mechanical fair until at least the foundation was laid for the establishment of such a library as the Institute desired. With the incorporation of the Institute, the *Prairie Farmer*, then the best agricultural monthly in the West, was made its official organ, and the mechanical department of the paper was edited by John Gage, a prominent and active member, who was as thorough and able an editor as he was a skilled and practical mechanic. Especially did he bend his energies to the acquirement of the library; not an issue of the *Prairie Farmer* in which he did not discuss its importance and urge the members of the Institute to united and vigorous measures for its speedy accomplishment. In accordance with his suggestions, the Institute, on the 22d of March, adopted a proposition to raise subscriptions for this purpose, to be paid in July following. This meeting, though not largely attended, was a very enthusiastic one, and \$128 were subscribed and paid on the spot. Mr. Gage published this in the *Prairie Farmer* and said that if each of the one hundred and fifty members would subscribe five dollars each, the net sum thus obtained would furnish money sufficient to purchase books enough to form quite a respectable library. Isaac Speer, J. B. Weir, G. F. Foster, C. M. Gray, A. F. Bradley and John Gage were appointed a committee to solicit subscriptions. They went to work with a will, and with such success that by December, six hundred and twenty new volumes were purchased and placed in the library-room, swelling the number of books thus acquired in the first year to nearly one thousand standard works. About this time arrangements were made by which lectures were delivered before the Institute, by local as well as traveling lecturers. Speaking of this subject, the *Prairie Farmer* says: "Whenever a traveling lecturer comes along, if he be an able one and promises an interesting course, an arrangement is made by which he is furnished with their room, lights, etc., and the members of the Institute admitted free, other citizens paying what the lecturer may demand." At the close of the year 1843, President Miltimore, on yielding up his office to his newly elected successor, delivered an address in which he briefly reviewed the history of the Institute, and congratulated the members on the uninterrupted prosperity which had attended the first year of its corporate existence. At the election of officers for the year 1844, the following gentlemen were selected: G. F. Foster, president; William H. Kennicott, first vice-president; Azel Peck, second vice-president;

Isaac Speer, corresponding secretary; Elijah Smith, treasurer; G. M. Gray, librarian; I. L. Milliken, William Blair, H. Barney, S. S. Foster, A. F. Bradley, and J. E. Brown, directors. The Institute was now fairly on the way to success and had already established its claims on the public as an institution meriting its hearty support. In the following year (1845) the first annual fair under its auspices was held, and was a success beyond the hopes of the most sanguine of its projectors. No records are at hand to give any details of the exhibits of this fair, more than to say in a general way that a large number of mechanical models were contributed, many of them being furnished by mechanics in this city. The fair, too, proved a stimulus to the Institute, for during the year it rapidly increased in membership; its course of lectures attracted always good audiences and proved a source of considerable revenue; the library was enriched with the addition of many new and standard works, and the reading-room was enlarged and comfortably fitted up for the accommodation of its visitors. In January of that year the annual election of officers was held, and resulted as follows: S. D. Childs, president; H. L. Fulton, first vice-president; Jason Gurley, second vice-president; W. Blair, treasurer; S. S. Foster, recording secretary; Zebina Eastman, corresponding secretary; J. G. Brown, librarian. The directors for this year were: C. M. Gray, I. Speer, J. Meeker, I. L. Milliken, A. Bent and S. Johnson. Two years now elapsed, of the events of which it has been found impossible to obtain any record, and no information except that which may be gleaned, or rather inferred from later years. In a general way it can be said they were prosperous and happy years for the Institute. This much is deduced from a statement made by a member who, in writing a brief sketch of it, says: "Until the year 1857 the prosperity of the society continually increased. In January, 1848, an election of officers was held, and Azel Peck, a prominent member of the society and later its benefactor, was chosen its president. The other officers were: S. J. Lowe and S. S. Foster, vice-presidents; J. E. Wheeler, corresponding secretary; O. Jagger, librarian; Isaac Speer, treasurer; Sanford Johnson, C. M. Gray, Peter Graff, H. H. Husted, A. D. Gibbons, and G. R. Sloat, directors. The regular meetings were still held in the Saloon Building, on the first Tuesday evening in each month. During 1848 the lecture course of the Institute was the best yet given, consisting of lectures on the arts and sciences, and delivered by the best informed and most scientific men in the city, who prepared them for the special benefit of the members of the Institute, more than for the edification of the general public. Although the regular meetings of the society were held but monthly, the library was kept constantly open to its members, each of whom was entitled to draw from it one book at a time, to be retained not longer than one week without renewal. The officers for 1849 were: Edward Burling, president; Robert Foss and R. Shephard, vice-presidents; A. D. Taylor, recording secretary; George Davis, corresponding secretary; and I. Speer, treasurer. The directors were: H. H. Husted, I. L. Milliken, P. L. Updike, W. Anderson, P. W. Gates, and Ives Scoville; librarian, Oliver Jagger.

In November of the following year the question of establishing an evening school for the benefit of apprentices and the sons of members, was discussed, and at a meeting of the board of directors held on the 19th of the month, it was determined to start such a school. A call was issued for competent persons who were will-

ing to teach to send in their names to the board at once. It was also decided to devote four evenings of the week to the school and one to the lectures. The experiment proved from the start a success; and the night-school was regularly maintained for years. The rate of tuition was but trifling, hence the sessions were attended and the school, as an educator, became a recognized power in the community. In this year Hon. William Bross delivered before the society a course of interesting and instructive lectures on geology. Dr. Blaney also lectured on various occasions on "Chemistry as applied to the Arts." It was during this year, too, that the Smithsonian Institute at Washington donated copies of its own publications to the society. Dr. J. E. McGirr, a then prominent physician of Chicago, also delivered a series of lectures on physiology and hygiene for the especial benefit of the young students at the night-school. The officials for this year were William H. Kennicott, president; I. Speer, vice-president and treasurer; A. D. Taylor, recording secretary and librarian; Alfred Dutch, corresponding secretary. The directors were S. D. Childs, William Bross, O. P. Hathaway, J. V. A. Wemple, Edward Burling and G. R. Sloat. At the beginning of 1851 the annual election of officers was again held and H. H. Husted chosen president; A. Bent and J. Couthbel, vice-presidents; A. D. Taylor and G. R. Sloat, secretaries; Isaac Speer, treasurer; A. D. Taylor, librarian. The directors were H. L. Fulton, A. C. Wood, Edward Burling, Henry Colson, Elihu Granger and S. T. Hinckley. This year little is to be noted except the continued growth and prosperity of the society, and that in the winter its lecture course was better than ever before in its history, being supplied with the most celebrated lecturers then before the public. The annual fair held in October, 1851, was a marked success. The officers elected in 1852 were G. R. Sloat, president; W. H. Kennicott and George W. Snow, vice-presidents; A. D. Taylor, recording secretary and librarian; S. D. Childs, corresponding secretary; and Isaac Speer, treasurer. The directors were H. L. Fulton, J. A. Kennicott, Peter Page, James Curtiss, Allen Vane and F. E. Demiry. About this time a change was made in the constitution of the society, by which citizens other than mechanics were admitted to its privileges. This had the effect to greatly increase its prosperity, as well as to extend its influence and widen its field of usefulness. Its library numbered over two thousand choice volumes and was open to the public, as well as to the members of the Institute, the year round.

With the opening of the year 1853, the Institute doubtless had reached the zenith of its prosperous and highly useful career; it had nearly three hundred members, a library of over two thousand volumes, and the best winter lecture course given before any association or society in the land. This year Hon. John Wentworth made donation to the society of a great number of books and an extensive collection of important public documents. Beginning on the first Tuesday in November was held its sixth annual fair at the city hall. This was among the best and most important in its character of any that had been conducted.

The officers for 1853 were Robert Foss, president; Peter Page and Ives Scoville, vice-presidents; Lewis Dodge, secretary; Isaac Speer, treasurer; directors, Stephen Derr, A. S. Calvert, George P. Hanson, John C. Rue and James Hollingsworth; Lewis Dodge, secretary of the board.

The year closed with the society in a most satisfactory condition, and in January, 1854, it had the grati-

fication of knowing that its last art and mechanical fair had been the means of calling out a display of exhibits, the like of which had never been equaled by any society in the West. The officers elected for 1854 were Peter Gräff, president; James F. Jillson and E. Granger, vice-presidents; Louis Dodge and George P. Hansen, secretaries; Isaac Speer, treasurer, and Louis Dodge, librarian. Directors: Stephen Derr, Ives Scoville, E. McAuthur, S. D. Childs and Noble Martin. In 1855 the Institute had reached that point in its history where its importance was recognized in a most flattering and substantial manner, both by the State and Nation. Congress passed an act providing that the scientific reports and books of the Smithsonian Institute should be printed and distributed to the three most important institutions in the country. The Chicago Mechanics' Institute was included among the three, and received its due share. At this time the State Executive Committee on Agriculture at Springfield authorized the Institute to hold and conduct an agricultural and mechanical fair in this city. This it did in the fall of 1855, being the first general agricultural and mechanical fair ever held in the State of Illinois. The officers then were: C. T. Boggs, president; William Price and Ives Scoville, vice-presidents; C. E. Holmes and H. M. Zimmerman, secretaries; Isaac Speer, treasurer, and E. C. Holmes, librarian. The directors were E. Granger, L. Waterhouse, S. D. Childs, I. L. Milliken, N. Mason and H. W. Zimmerman.

In 1856 the officers of the Institute began making extensive arrangements for enlarging its quarters, extending the library, and also providing a suitable place in which to hold its annual fairs. In doing this they were simply carrying out the privileges granted in their charter, which gave them the right to establish a permanent public library, a thing which the committee had now determined to do. They therefore divided the library into two departments, one for circulation, the other for reference. In the circulating department there were now over two thousand volumes, embracing the best works in all departments of miscellaneous literature, while in the reference library were fifteen hundred volumes, including permanent and valuable publications in every branch of knowledge. An official catalogue of the books in both libraries was also prepared. The committee issued an address to the public, from which is taken the following extract:

"Our city and country are so rapidly filling up with new citizens that it could not be expected that the public should be fully advised of the value of every institution which has been prepared in advance for their good. Therefore we invite the mechanics of Chicago, and the public generally, to visit our hall, attend our meetings, and avail themselves of the library, lectures, and privileges which this institute may be able to confer."

The Institute during 1856 held regular weekly meetings for the exhibition of any new invention, natural curiosity, chemical compounds, or rare specimens of art. To these meetings strangers and visitors in the city were cordially invited; and in any event they were always well attended.

The officers for 1856 were George P. Hansen, president; Isaac Speer and I. L. Milliken, vice-presidents; Ulrich Gregory and Z. Eastman, secretaries; U. Gregory, librarian, and Isaac Speer, treasurer. The directors were N. S. Cushing, Z. Eastman, S. D. Childs, U. Gregory, Lewis Dodge and R. E. Moss. With the beginning of the year 1857, and at which period its history in this volume must be closed, the Institute had never seen brighter days, nor had it ever had rosier prospects for the future. But clouds were gathering, which, although then unseen and unnoticed, were but

the forerunners of the storms which so swiftly followed. Already men of sagacious minds and far-seeing wisdom had predicted a financial crash as inevitable, and that, too, in the near future. It is a matter of history now that it came, ruthless and terrible in its destructive effects upon trade, commerce, business, values. Everything went down before it. The Chicago Mechanics' Institute, unfortunately, had just contracted a considerable indebtedness, which, had not this trouble come, it would have easily paid. But the fact that its officers and the warmest friends of the Institute were themselves seriously embarrassed, many of them being financially ruined, as a matter of course, seriously interfered with the carrying out of certain plans already fully matured, and upon the realization of which the highest hopes had been reared for the future welfare of the society.

YOUNG MEN'S ASSOCIATION.

The predecessor, in time only, of the present Public Library of Chicago was an institution, called the "Young Men's Association of Chicago," afterwards changed to the "Chicago Library Association." On the evening of January 30, 1841, Walter L. Newberry, Mark Skinner, Hugh T. Dickey, Peter Page, Walter S. Gurnee, William L. Church and a number of other citizens convened at the chamber of the Common Council for the purpose of establishing a library association. The movement met with a fair amount of encouragement, and on February 6 a constitution was adopted and the following officers elected: W. L. Newberry, president; Mark Skinner, vice-president; Hugh T. Dickey, corresponding secretary; Leroy M. Boyce, recording secretary; Walter Vail, treasurer; and Charles H. Starkweather, Peter Page, Walter S. Gurnee, Francis Howe, Norman B. Judd, William L. Church and Charles Sturttwait, managers.

"The first election," says Mr. Page, "was made, from motives of policy, a very novel and interesting affair. Five tickets were put into the field, the Regular, the Opposition, the Lawyers, the Respectable, and the Whole-Hog tickets, which last was headed by a printed cut of a genuine porker. The regular ticket was elected, Mr. Newberry being chosen president." Seth T. Otis, the third president of the association and always one of its active and influential members, has written the following interesting account of its formation and the earlier days of its history. He says:

"Up to 1841 there had been no permanent reading-room in the city, the lack of which was felt to be a serious drawback to the best interests of the young of the community. Dr. Sidney Sawyer and myself had formerly been members of a young men's association in the city of Albany, N. Y., which had prospered finely at the low tax of \$2 per annum to each of its members. Hence we advocated the establishment of a similar institution here and urged upon the citizens of Chicago its necessity and the benefits to be derived from it. No one entered into active opposition against the measure, but many doubted its success at so low a tax per capita as was proposed, and with the limited number of subscriptions we could obtain. But we proposed to bring in all classes of citizens, and I believed it could be done. At length about the 10th of January, 1841, a half dozen gentleman friendly to the enterprise, met at my hardware store one evening and we decided the effort should at once be made. Hon. Mark Skinner drew up a subscription paper and all present signed it. It was left with me to circulate, and I went at it with a will. At the end of a couple of weeks, I should say, we had nearly one hundred and fifty subscribers, each one of whom had paid his subscription fee of \$2 in advance, with the understanding, however, that it would be refunded in event the association was not formed. At this point a mischievous and unwarranted report was put in circulation, by one or more leading mechanics, that the association was to be an aristocratic and exclusive affair, and their friends were advised by them to keep aloof and form an association of their own. * * * During the week I was assisted by other members of the committee in getting additional

subscribers. I was anxious that an even two hundred should be obtained, and to accomplish this I personally advanced the tax for a dozen or more young men, who afterwards became members of the association. When the two hundred subscribers had been obtained, I pasted all the subscription papers upon a piece of canvas and attached it to a wooden roller. On the 6th of February I unrolled the long list of subscribers, hung it over the chairman's desk and handed him a package containing four hundred dollars in cash as the result of my canvass. It is pleasant to me as I write (November, 1880) to remember at this day the outburst of applause which followed. Nearly every subscriber was present and the best of feeling prevailed. It was voted at once that the cash on hand should be considered as initiation fees, and used in fitting up a reading-room; and that an annual tax of \$2 should be paid in addition. It was also voted that the association should be known by the name of the 'Young Men's Association of the City of Chicago.' A reading-room on the northwest corner of Lake and Clark streets was leased at an annual rental of \$125, and fitted up under the supervision of Peter Page. It was supplied with the principal newspapers and periodicals published at that time. The nucleus for a library was provided by a selection of books presented to the association by Walter L. Newberry, on the 24th of April, 1841. This was immediately increased by generous donations from Messrs. S. Lisle Smith, Dr. S. B. Ogden, W. H. Clark, Dr. S. Sawyer and other citizens and members of the association."

Thus by such men and for such objects as already stated the Association was formed. In the winter after its organization, the first lecture was delivered before the Association by William M. Brown, and during the same season, lectures on various subjects were delivered by Dr. Brainard and others. Afterward the Association occupied commodious and pleasant rooms in the old Saloon Building on the corner of Lake and Clark streets. At the discontinuance of the Chicago Lyceum, the library of that society found lodgment on the shelves of the Association, sometime about 1845. The Association library was subsequently removed to Warner's Block, on Randolph Street, and here rooms on the third floor were occupied. Better quarters were secured in the brick block at 95 Washington Street. The next move was into the Portland Block; from there, in 1866, to Metropolitan Hall, corner of Randolph and LaSalle streets, where it occupied rooms on the second floor, behind the lecture room (a public hall, also leased by the Association) and there remained until destroyed by the fire of 1871.

The Association was incorporated January 30, 1851, but this act did not change its character, except as to its legal rights and liabilities,* that is, it was never in the strict sense of the term a public library, as it was open only to its paying or elected members. It was a subscription library, wholly different in its character from the Public Library of to-day, which is supported by public taxation and which is free to all; being sustained in the same manner, and as open to the public as are the public schools of the city.

The presidents of the society up to 1857 were: Walter L. Newberry, elected February, 1841; Hugh T. Dickey, 1842; Seth T. Otis, 1843; Peter Page, 1844; David S. Lee, 1845; George Manierre, 1846; Samuel J. Lorne, 1847; Walter Wright, 1848; James H. Reed, 1849; Thomas Hoyne, 1850-51; H. G. Shumway, 1853; Samuel D. Ward, 1854; Henry E. Sulyle, 1855; Thomas B. Bryan, 1856; George W. Gage, 1857. The founders of this institution were, as one writer has said, "young men who having selected this city as their place of residence, were desirous of securing, at an early day, the establishment of an association which should afford at a trifling expense the means of intellectual improvement, not only for themselves, but for

* From the rules of the Association: "Any member may have the privilege of introducing strangers to the rooms of the Association, by registering their names in a book to be kept for that purpose; and such strangers shall have free access to the rooms of the Association for two weeks after such introduction. Any person may have access to the rooms of the Association by paying therefor fifty cents per month."

others who afterwards might avail themselves of its privileges." From the time of its organization up to its incorporation in 1851, the Association was sustained by the voluntary contributions and efforts of its members and during this period its success fully equaled the expectations of its projectors. At the beginning, the Association started with only about one hundred volumes, contributed by friends; but in 1851, this number was increased to over twenty-five hundred, and by the spring of 1857 to four thousand seven hundred and fifty, embracing works from standard authors in literature, fiction, travel, art, science, history, and biography, making a valuable library, the benefit of which to its patrons can hardly be overestimated. In fact, at this stage of its existence, its growing value and importance were fully recognized, and it was already regarded as one of the indispensable institutions of the city. Here, for the present, it is necessary to close the account of its further growth and works, to be again taken up and carried along in proper time and order in the second volume of this work.

THE CHICAGO LYCEUM.

The Chicago Lyceum, an institution in which for many years were centered largely the social, as well as the intellectual interests of Chicago's citizens, was instituted December 2, 1834. From this time until the 22d of December of the following year, it had a mere informal existence, no attempt being made for a permanent organization until the last-named date. At this time, however, a constitution was adopted, by-laws framed, and the following persons chosen its first officers: A Cowles, George Manierre, William Jones and O. M. Dorman, vice-presidents; (name of president not given;) George O. Haddock, recording secretary; E. I. Tinkham, treasurer, and H. K. W. Boardman, librarian. At its weekly meetings were discussed questions of importance, and there was not a prominent citizen of Chicago in those days who was not a member of the Lyceum and who did not take a lively interest in its proceedings.

Hon. Thomas Hoyne, who was an early member of the Lyceum, and in 1840 its secretary, recalled just prior to his death, which occurred July, 1883, some of his recollections of its early days. He said:

"It was the foremost institution in the city, when I came here in 1837. At the time I became a member, not a man of note, not a man in the city of any trade or profession, who had any taste for intellectual and social enjoyment, who loved books, conversation and debate, but who belonged to the Lyceum. Why, to-day I can recall the names of old friends, by scores almost, whose eloquence I have listened to in its meetings. Some of them have long since paid the debt of nature; others are still living, honored and respected citizens of this and other towns throughout the country, and not a few have, since the days when they were active members of the Chicago Lyceum, achieved for themselves brilliant reputations in their various walks in life. When I came here the society had, for those days, an excellent library, consisting of, as I remember, over three hundred volumes. Its meetings were generally held in the old court-room, corner of Randolph and Clark streets. I say were generally held there, for it was not infrequent that the bad weather and the condition of the streets made it necessary for us to appoint the meetings in a locality most convenient for the majority to attend. Later its meetings were held in the hall of the old Saloon Building and in the Presbyterian church. We ran along until 1843 or 1844. The city was then entering upon its career of rapid growth and development, which has since astonished the world, and which about that time absorbed the interests of the citizens so much that the Lyceum meetings began to be poorly attended and finally, as an institution, it died from sheer neglect."

Among the leading members of the Lyceum in its flourishing days, were J. C. Butterfield, E. G. Ryan, late Chief Justice of Wisconsin, "Buck" Morris, Dr.

Egan (noted as being the best after-dinner speaker of his time in the country), Stephen Lisle Smith, Dr. John T. Temple, Judge Brown, Mark Skinner, George Manierre, J. H. Foster, J. Y. Scammon, Thomas Hoyne, G. W. Meachan, Dr. Boone, Rev. I. T. Hinton, C. V. Dyer, and many others of not less repute and standing, whose names are not at hand. Rev. I. T. Hinton was the pastor of the Baptist Church, and a remarkably able man. He used frequently to deliver public lectures on various topics to the citizens of Chicago, and such was his reputation as a scholar and orator, that rarely did he find a room sufficiently large to contain his audiences. C. V. Dyer, another active member of the Lyceum, was the acknowledged wit of the town, and aside from this quality, was a man of sound worth and merit. Mr. Hoyne, related of him the following anecdote, illustrating his ready wit:

"The old cemetery was in those days located in what is now Lincoln Park. Beyond that was only a scattering settlement. Here, to this locality, about the year 1840, Mr. Dyer moved, from a former residence in the city. One day, in the street, a friend accosted him with the remark, 'Hello, Dyer, I don't see you very often; where do you live now?' 'O, I am very comfortably situated,' replied Mr. Dyer without relaxing a muscle of his features, 'I have a home beyond the grave.' His friend saw the point, circulated the story, and Dyer was long known as the sojourner on earth who had a 'home beyond the grave.'"

As an institution exercising a healthy and energizing influence in this community, as promoting the social and intellectual interests of the society of early Chicago, the Lyceum deserves more than the passing notice here given. It is to be regretted that the material is not obtainable from which to write a fuller history of its life and growth from its organization to the close of its existence as a distinct and separate society.

On the discontinuance of the Chicago Lyceum, the Young Men's Association was organized (see article on same), and the library of the first-named society finally drifted into the hands of the latter, where it remained until destroyed by fire October, 1871.

YOUNG MEN'S LYCEUM.—This institution was exclusively a young men's affair. No doubt its origin was a direct outgrowth of the influences emanating from the Chicago Lyceum, inspiring the young to higher intellectual attainments. It was organized September 25, 1843, with the following officers: David D. Griswold, president; Edwin C. Stone, vice-president; William H. Scovill, secretary, and Edward Morey, treasurer. For some reasons (whether from lack of proper support, or whether merged into the Young Men's Association) which it has been impossible to ascertain, the Young Men's Lyceum was only a short-lived institution. After much research, nothing could be learned of its history more than has been here given. It was little more than a debating-club.

SOCIETIES OTHER THAN SECRET.

Of this class there were many, some purely social in their character, others combining charitable and social features. From 1840 to 1857 there were: New England Society, organized in 1846; W. H. Brown, president; George A. Robb, George W. Snow, John P. Chapin, J. B. F. Russell, W. T. DeWolf, Jacob Russell, vice-presidents; S. W. Stebbins, secretary; E. I. Tinkham, treasurer; Rev. W. M. Barlow, chaplain; O. Lunt, E. H. Haddock, A. H. Squier, John S. Wright, E. E. Larned, Thomas Dyer, managers; J. A. Wight and S. C. Clarke, library-committee. This society met each

year on the 22d of December, to celebrate the landing of the Pilgrims.

The Illinois St. Andrew's Society was organized January, 1846; A. S. Sherman, president; William Brown, vice-president; James Smith, treasurer; John Sheriffs, secretary; John Olston, assistant secretary; Alexander Morrison, Hugh Dunlop, Alexander White, Solomon McKitchen, managers. Held four meetings each year, second Thursdays in February, May, August and November; also an anniversary assembly on St. Andrew's Day.

St. George's Society, organized April 27, 1847. Benevolent in purpose. Daniel Elston, president; S. J. Lon, James Dike, vice-presidents; J. Dike, treasurer; J. McMilluns, secretary. Four meetings annually, 10th of April, July, October, January.

Excelsior Society, organized December 18, 1848; one hundred and twelve members, natives of New York. Mahlon D. Ogden, president; I. N. Arnold, Dr. Brainard and John Beard, vice-presidents; H. G. Shumway, secretary; William Blair, treasurer.

Chicago Bible Society, organized April 7, 1840. O. Lunt, president; O. M. Dorman, W. F. Domimers, A. J. Brown, G. W. Southworth and Thomas George, vice-presidents; T. B. Carter, secretary; A. G. Downs, treasurer.

St. Peter's Society. Benevolent in purpose. Organized November 15, 1847. Charles Bumgarten,

president; Christian Lohn, vice-president; Peter Kerich, secretary; Jacob Weidzel, treasurer.

Hibernian Benevolent Society, organized in 1848. Monthly meetings at Apollo Hall. Dr. J. E. McGirr, president; James McMullen, vice-president; Charles McDonnell and John Murphy, secretaries; John Breen, treasurer.

Sons of Penn, a society composed of those who were natives of Pennsylvania, was organized January 16, 1850. David Rutler, president; Dr. Henry Ritchie, A. H. Hoge and Calvin DeWolf, vice-presidents; W. W. Danenhower, secretary; Thomas Parker, treasurer; Rev. A. M. Stewart, chaplain.

Hebrew Benevolent Society, organized April 1, 1854, and had in 1856 forty members.

Chicago Phrenological Society, organized November, 1855.

Chicago Historical Society,* organized April 24, 1856. W. H. Brown, president; W. B. Ogden and J. Y. Scammon, vice-presidents; Dr. H. Ray, secretary; S. D. Ward, treasurer; William Barry, librarian.

There were in 1857 the following societies, the names of which suggest without comment their character and objects:

The American Sunday School Union, the American Protestant Association, Young People's Christian Association, the American Tract and Mission Society, and the American Tract Society.

* Will be treated fully in subsequent volumes.

BANKS AND BANKING.

THE CURRENCY of the early days prior to 1830 was subject to wide suspicion, limited only by the extreme necessities which make money necessary at any cost. In fact, the volume of money (coin) in all the regions west of Detroit was too meager to be computed. Money was little needed, as nearly the entire business consisted of barter of blankets, beads, traps, guns and ammunition with the Indians for the products of the hunt. The very early exchanges which involved the payment of money were made through the Indian traders. Perhaps Gurdon S. Hubbard was the first white man who ever did anything resembling a banking business in Chicago. Although not then known as a banker, he kept a good credit account at several points east of Chicago and could draw a bill of exchange on Buffalo which was sure to be honored on presentation. The currency in use at that time was mostly silver coin. No paper money was known except such rude scrip as might be issued by the Indian traders, which, to their credit, was always redeemed according to promise.

FIRST BANKING LAW.—No State legislation on banking which had any direct bearing on the banking business of Chicago was had prior to 1835. As early as 1816 an act was passed incorporating the "President, Directors and Company of the Bank of Illinois," at Shawneetown. It was the earliest effort at legal banking in Illinois and the provisions of the charter were not unlike those of the other "wild-cat" banks that furnished the worthless and irredeemable paper money scattered through the West in early times, and which was the only paper money issued by banks then known in Chicago. The act is given entire as furnishing the modern reader a definite idea of the legal basis on which "wild-cat" banking formerly flourished. It was as follows:

An Act to incorporate the President, Directors and Company of the Bank of Illinois at Shawneetown.

SECTION 1. Be it enacted by the Legislative Council and House of Representatives of the Illinois Territory, and it is hereby enacted by the authority of the same, that a bank shall be established at Shawneetown, the capital stock whereof shall not exceed three hundred thousand dollars each, one-third thereof to remain open to be subscribed by the Legislature of this Territory and State, when a State Government shall be formed, which Territory or State shall be entitled to such part of the dividend of the said corporation in proportion to the amount actually subscribed by such Territory or State, which one-third shall be divided into shares of one hundred dollars each, in the same manner as the individual stock is divided, and that subscriptions for constituting the said stock shall, on the first Monday in January next, be opened at Shawneetown, and at such other places as may be thought proper, under the superintendence of such persons as shall hereafter be appointed, which subscriptions shall continue open until the whole capital stock shall have been subscribed for: Provided, however, That so soon as there shall be fifty thousand dollars subscribed for in the whole and ten thousand dollars actually paid in, the said corporation may commence business and issue their notes accordingly.

SEC. 2. Be it further enacted, That it shall be lawful for any persons, or partnership, or body politic to subscribe for such or so many shares as he, she, or they may think fit, nor shall there be more than ten shares subscribed in one day by any person, copartnership or body politic, for the first ten days after opening subscriptions. The payments of said subscriptions shall be made by the subscribers respectively, at the time and manner following—that is to say, at the time of subscribing there shall be paid into the hands of the person appointed to receive the same, the sum of ten dollars in gold or silver on each share subscribed for, and the residue of

the stock shall be paid at such times and in such installments as the directors may order: Provided, That no installment shall exceed twenty-five per cent on the stock subscribed for, and that at least sixty days' notice be given in one or more public newspapers in the Territory: And provided also, that if any subscriber shall fail to make the second payment at the time appointed by the directors for such payment to be made, shall forfeit the sum so by him, her, or them first paid, to and for the use of the corporation.

SEC. 3. Be it further enacted, That all those who shall become subscribers to the said bank, their successors and assigns, shall be and they are hereby enacted and made a corporation and body politic, by the name and style of "The President, Director and Company of the Bank of Illinois," and shall so continue until the first day of January, one thousand eight hundred and thirty-seven, and by that name shall be and is hereby made able and capable in law, to have, purchase, receive, possess, enjoy, and retain to them and their successors, lands, rents, tenements, hereditaments, goods, chattels and effects of what kind, nature or quality soever, to an amount not exceeding in the whole five hundred thousand dollars, including the capital stock aforesaid, and the same to grant, demise, alien, or dispose of, to sue and be sued, plead and be impleaded, answer and answered, defend and be defended, in courts of record or any other place whatever; and also to make, have and use a seal, and the same to break, alter and renew at pleasure, and also to ordain, establish and put into execution such by-laws, ordinances and regulations as they shall deem necessary and convenient for the government of the said corporation, not inconsistent with the laws of the Territory or constitution, and generally to do, perform and execute all and singular acts, matters and things which to them it may appertain to do, subject however to the rules, regulations, limitations, and provisions hereinafter prescribed and declared.

SEC. 4. Be it further enacted, That for the well ordering of the affairs of the said corporation, there shall be twelve directors, the first election of whom shall be by the stockholders by plurality of votes actually given, on such day as the person appointed to superintend the subscriptions for stock shall appoint, by giving at least thirty days' notice in all the public newspapers of the Territory, and those who shall be duly chosen at any election shall be capable of serving as directors by virtue of such choice, until the full end or expiration of the first Monday of January next ensuing the time of such election, and no longer; and on the first Monday of January in each and every year thereafter, the election for directors shall be holden, and the said directors at their first meeting after each election, shall choose one of their number as president.

SEC. 5. Be it further enacted, That in case it should happen at any time that an election for directors should not be had upon any day, when, pursuant to this act, it ought to have been holden, the corporation shall not for that cause be considered as dissolved; but it shall be lawful to hold an election for directors on any other day, agreeable to such by-laws and regulations as may be made for the government of said corporation, and in such case the directors for the time being shall continue to execute and discharge the several duties of the directors until such election is duly had and made; anything in the fourth section of this act to the contrary notwithstanding: And it is further provided, That in case of death, resignation or removal of director or directors, the vacancy shall be filled by election for the balance of the year.

SEC. 6. Be it further enacted, That a majority of the directors, for the time being, shall have power to appoint such officers, clerks and servants under them, as shall be necessary for executing the business of the said corporation, and to allow them such compensation for their services respectively as shall be reasonable, and shall be capable of exercising such other powers and authorities for the well governing and ordering of the affairs of the said corporation as shall be prescribed, fixed and determined by the laws, regulations and ordinances of the same: Provided always, That a majority of the whole number of directors shall be requisite in the choice of a president and cashier.

SEC. 7. Be it further enacted, That the following rules, restrictions, limitations and provisions, shall form and be the fundamental articles of the constitution of the said corporation, to wit:

(1). The number of votes to which the stockholders shall be

entitled in voting for directors, shall be according to the number of shares he, she or they may respectively hold, in the proportions following—that is to say, for one share and not more than two shares, one vote; for every two shares above two and not exceeding ten, one vote; for every four shares above ten and not exceeding thirty, one vote; for every six shares above thirty and not exceeding sixty, one vote; for every eight shares above sixty and not exceeding one hundred, one vote; for every ten shares exceeding one hundred shares, one vote; and after the election, no share or shares shall confer a right of voting, which shall not have been holders three calendar months previous to the day of election.

(2). The Governor of the State or Territory is hereby appointed agent for the Legislature to vote for president, directors and cashier of said bank, and is hereby entitled to exercise the right of voting for the same in proportion to the number of shares actually subscribed for by the Legislature, in the same ratio that individuals, or other bodies politic or corporate, are entitled to vote for; and the said agents hereby appointed shall exercise the power hereby vested in him until the Legislature shall make other regulations respecting the same, and no longer.

(3). None but a bona fide stockholder, being a resident citizen of the Territory, shall be a director; nor shall a director be entitled to any other emolument than such as shall be allowed by the stockholders at a general meeting, but the directors may make such compensation to the president for his extraordinary attendance at the bank as shall appear to them reasonable and just.

(4). Not less than four directors shall constitute a board for the transaction of business, of whom the president shall always be one, except in case of sickness, or necessary absence, in which case his plate may be supplied by any other director, whom he, by writing under his own hand, may depute for that purpose.

(5). Any number of stockholders, not less than fifteen, who shall be proprietors of not less than fifty shares, shall have power to call a general meeting of the stockholders for purposes relative to the institution, by giving at least thirty days' notice in one or more of the public newspapers of the Territory, specifying in such notice the object or objects of such meeting, and may, moreover, appoint three of their members as a committee to examine into the state and condition of the bank, and the manner in which its affairs have been conducted: Provided, That no member of such committee shall be a director, president or other officer of any other bank.

(6). Every cashier, before he enters upon the duties of his office, shall be required to give bond with two or more sureties to the satisfaction of the directors in a sum not less than \$10,000, conditioned for his good behavior and the faithful performance of his duties to the said corporation; and the other officers and servants shall also enter into bond and security in such sum as the president and directors may prescribe.

(7). The lands, tenements, and hereditaments which it shall be lawful for the said corporation to hold, shall be only such as shall be requisite for its immediate accommodation in relation to the convenient transaction of its business, and such as shall have been bona fide mortgaged to it by way of security, or conveyed to it in satisfaction of debts previously contracted in course of its dealings, or purchased upon judgments which shall have been obtained for such debts.

(8). The total amount of debts which the said corporation shall at any time owe, whether by bond, bill or note or other contract, shall not exceed twice the amount of their capital actually paid over and above the moneys then actually deposited in the bank for safe keeping; and in case of excess the directors, under whose administration it shall happen, shall be liable for the same in their natural and private capacities, and an action of debt may be brought against them, their or any of their heirs, executors or administrators, in any court competent to try the same, or either of them, by any creditor or creditors of the said corporation; but this provision shall not be construed to exempt the said corporation, or the lands, tenements, goods or chattels of the same from being liable for and chargeable with the said excess; such of the said directors who may have been absent when the said excess was contracted or created, or who may have dissented from the resolution or act whereby it was contracted or created, may respectively exonerate themselves from being so liable by forthwith giving notice of the fact, and of their absence or dissent, at a general meeting of the stockholders, which they shall have power to call for that purpose.

(9). The said corporation shall not directly or indirectly deal or trade in anything except bills of exchange, gold or silver, or in sale of goods really and truly pledged for money lent and not legally redeemed in due time, or of goods which shall be the produce of its lands; neither shall the said corporation take more than at the rate of six per cent per annum for or upon its loans or discounts.

(10). The shares of the capital stock of the said corporation shall be assignable and transferable at any time, according to such rules as shall be established in that behalf, by the laws and ordi-

nances of the same; but no stock shall be transferred, the holder thereof being indebted to the bank, until such debts be satisfied, except the president and directors shall otherwise order it.

(11). The bills obligatory and of credit, under the seal of said corporation, which shall be made payable to any person or persons, shall be assignable by an endorsement thereupon, and shall possess the like qualities as to negotiability, and the holders thereof shall have and maintain the like actions thereon as if such bills obligatory and of credit had been made by or on behalf of a natural person; and all bills or notes which may be issued by order of the said corporation, signed by the president and countersigned by the principal cashier or treasurer thereof, promising the payment of money to any person or persons, his, her or their order, or to bearer, though not under the seal of the said corporation, shall be binding and obligatory upon the same, in like manner and with like force and effect as upon any private person or persons, if issued by him, her or them, in his, her or their private or natural capacity or capacities, and shall be assignable and negotiable in the like manner as if they were so issued by such private person or persons—that is to say, which shall be payable to any person or persons, his, her or their order—shall be assignable by endorsement, in like manner and with like effect as bills of exchange now are; and those which are payable to bearer shall be assignable and negotiable by delivery only.

(12). Half yearly dividends shall be made of so much of the profits of the bank as shall be deemed expedient and proper; and once in every three years the directors shall lay before the stockholders, at a general meeting, an exact and particular statement of the debts which shall have remained unpaid, after the expiration of the original credit, for a period of treble the time of that credit, and of surplus of profit (if any) after deducting losses and dividends. If there shall be a failure in the payment of any part of any sum subscribed to the capital stock of said bank, the party failing shall lose the dividend which may have accrued prior to the time of making such payment during the delay of the same.

SEC. 8. And be it further enacted, That the said corporation shall not at any time suspend or refuse payment in gold and silver, or of any of its notes, bills or obligations, nor of any moneys received upon deposit in said bank or in its office of discount and deposit; and if the said corporation shall at any time refuse or neglect to pay on demand any bill, note or obligation issued by the corporation according to contract, promise or undertaking therein expressed, or shall neglect or refuse to pay on demand any moneys received in said bank, or in its office aforesaid or deposit, the person or persons entitled to receive the same, then, and in every such case, the holder of any such note, bill or obligation, or the person or persons entitled to demand and receive the same, shall recover interest in the said bills, notes, obligations or moneys until the same shall be fully paid and satisfied at the rate of twelve per centum per annum from the time of such demand as aforesaid: Provided, That the Legislature of this Territory may, at any time hereafter, enact laws to enforce and regulate the recovery of the amount of the notes, bills, obligations, or debts, of which payment shall have been refused as aforesaid, with the rate of interest above mentioned; vesting jurisdiction for that purpose in any courts either of law or equity within this Territory.

SEC. 9. Be it further enacted, That John Marshall, David Apperson, Samuel Hays, Leonard White and Samuel R. Campbell, or any three of them, shall be commissioners for the purpose of receiving subscriptions and who shall have power to appoint a person to receive the money required to be paid at the time of subscribing, and the said receiver shall, as soon as the directors are appointed, pay over the same into the hands of such person as the directors may direct.

SEC. 10. Be it further enacted, That the aforesaid corporation shall not be dissolved previous to the expiration of their charter, nor until their debts, contracts, notes, bills of exchange, and undertakings in their corporate capacity, shall be finally and faithfully settled: Provided, also, That after the expiration of their charter, they shall not transact business, according to the true intent and meaning of this act, further than to settle and close their contracts as above provided. This act to take effect from and after its passage.

WILLIS HARGRAVE, *Speaker of the House of Representatives.*

PIERRE MENARD, *President of the Legislative Council.*

Approved December 28, 1816.

NINIAN EDWARDS, (*Governor.*)

Under the Territorial Government, two other banks were chartered, one at Edwardsville and one at Cairo, under charters the provisions of which were similar to that above quoted. Their existence had ceased before Chicago became an element in the banking of the State. The Cairo Bank had a somewhat mythical existence until 1836, at which time it was brought into actual life

for speculative purposes, issued its full quota of paper money, flourished for a time, and finally succumbed to the rough financial storms of the times. Its charter was repealed on the 4th of March, 1843.

The Edwardsville Bank and the Bank of Illinois at Shawneetown became banks of deposit, and received the public moneys arising from the sale of public lands in Illinois. The Edwardsville Bank failed in 1819-20, owing large sums to depositors, which it never paid. The United States brought suit against the bank for its deposits and obtained a judgment for \$54,000, which proved valueless. The bills, of course, became worthless. The bank at Shawneetown showed more vitality, being under more skillful financial management. It went into business immediately after its charter was granted, and being a repository of Government funds, acquired an extensive credit, which it kept unimpaired until the general failure of all the Kentucky banks in 1821. It was one of the last to suspend, which it did August 21, and was one of the very few banks of the time that ever paid even a dividend on its indebtedness. It managed to compromise its debts both public and private, by means it is not necessary here to explain, and save its franchises under its charter. It remained dormant until February 12, 1835, at which time an act was passed to extend its charter for twenty years, from the first day of January, 1837. Under the extended charter the bank was authorized to receive interest for loans made: "On loans for six months or under, at the rate of six per cent per annum; and on loans over six months at the rate of eight per cent per annum." All stock not responding to the calls to be forfeited, and the one hundred thousand dollars of stock reserved to the State to be sold to the highest bidder, and the proceeds paid over to the State Treasurer for the benefit of the State. In lieu of all other taxes, the Bank was to pay into the State Treasury, annually, one-half of one per cent on the capital stock paid in.

STATE BANKS.—On the adoption of the State Constitution, August 26, 1818, there was in existence within the bounds of the State, only the bank of Shawneetown, then in good credit, and the Edwardsville Bank already in the throes of dissolution. The constitution first adopted declared that there should be no other banks or moneyed institutions in Illinois, but those already provided by law, except a State Bank and its branches.

March 22, 1819, the first State bank was incorporated under the name and style of the "President, Directors and Company of the State Bank of Illinois." The amount of capital was limited to five hundred thousand dollars, all of which was owned by the State, which through the Legislature was invested with its entire management and control. The president and directors were to be elected by the Senate and House of Representatives, on a joint ballot, and the cashiers appointed by a majority of the directors. The property, lands and faith of the State were pledged without any restrictions for the redemption of the bills issued, and the State was pledged, at or before the expiration of the ten years (the time of its charter), to redeem all bills presented in gold or silver. The bills were declared legal tender for all debts due the State. The school-fund and all specie, or "land-office money," were required to be deposited in the principal bank. Two thousand dollars was appropriated to procure plates and start the financial institution on its career of beneficence. Three hundred thousand dollars was to be put in circulation. It was to be distributed in the several districts in ratio with the population. The bills were to be loaned on notes, secured by mortgage, at the rate of

six per cent per annum. As the bills themselves bore an interest of two per cent per annum the borrower virtually paid but four per cent. for his money. No person was entitled to a loan of more than one thousand dollars. The officers of the bank were entitled for their services to banking accommodations, on approved security, at two per cent per annum, in the following amounts: President of the principal bank, \$2,000; the president of each branch, \$1,000; and each director, \$750. Four branches were established: At Edwardsville, Madison County; at Brownsville, Jackson County; at Shawneetown, Gallatin County; and at the seat of justice in Edwards County.

The currency soon flooded the State and all gold and silver disappeared as a circulating medium, and, as was quite natural, did not enter the vaults of the wild-cat bank or any of its branches. The money was scarcely in circulation before it depreciated to seventy cents on the dollar, then to fifty and so on down to twenty-five cents, when it disappeared from circulation and found its way into the hands of shrewd speculators who looked to its ultimate redemption by the State. There was subsequently a special law passed legalizing the payment of the officers of the State government in this depreciated paper at its current value. As under the terms of the charter all taxes and revenue of the State were payable in these bills, the State at last became hopelessly entangled in its own financial system and was forced to withdraw the circulation. This was begun in 1824, but the currency continued to circulate in the channels of the State receipts and disbursements until the expiration of the charter in 1831, when the State closed its banking business at a loss exceeding the full amount of the original issue. Governor Thomas Ford, in his History of Illinois, sums up the result as follows:

"In the course of ten years, it (the State) must have lost more than \$150,000 by receiving a depreciated currency, \$150,000 more by paying it out, and \$100,000 of the loans, which were never repaid by the borrowers, and which the State had to make good, by receiving the bills of the bank for taxes, by funding some at six per cent interest, and paying a part in cash, in the year 1831. In closing up the affairs of the bank the State borrowed of one Samuel Wiggins, January 29, 1831, the sum of \$100,000. It is stated by contemporary writers that the shrewd and provident Wiggins paid over a large part of the loan to the State in bills of the old State Bank which had been bought up by him at a low price and which the State now redeemed at par. The loan was at the time extremely unpopular, and threats of repudiation were rife for years afterward. It was however, paid ultimately, principal and interest, and the credit of the State saved from blemish."

For two or three years succeeding the closing up of the old State Bank no bank legislation was had. The citizens of the State were wholly engrossed in the Indian troubles which culminated in the Black Hawk War, so called. The treaties which followed its close opened up a vast domain for settlement, and, in 1834, the tide of emigration from the East set strongly through Chicago toward the region lying west and northwest, soon to be open for settlement. Many on reaching Chicago cut short their prospective tours and found their permanent home here, thus swelling the population and making a most thriving village, which even then gave promise of becoming the center of trade for the great crowds of prospectors which were passing through. Thus during the short space of two years Chicago grew from a small and unimportant hamlet, with little trade

or commerce, to be an exceedingly busy center of trade, with a resident population, according to the State census taken in 1835, of three thousand two hundred and sixty-five inhabitants. All were filled with the intense desire to better their condition by availing themselves of the opportunities afforded in a new and rich country rapidly filling up with sturdy and thrifty settlers. Inspired with courage and hope adequate to the brilliant prospects offered, Chicago that year put on the armor of enterprise in which she has fought through flood, and fire, and war, and financial disaster, unflinchingly and with no backward step, to the proud position of the inland metropolis of the nation; a city, with its suburbs, of seven hundred and fifty thousand souls, as busy, as persistent, as sturdy, and with faith in its future yet beyond, as strong as appeared to the pioneer denizens of the little Chicago of fifty years ago.

It was not until 1835 that a banker could have found a paying business in Chicago. During that year began the great mania for land speculation which, from the pine forests of Maine swept the country to the prairies west of the great lakes. The purchase and sale of city lots in paper cities, and claims to vast tracts of land, at constantly enhancing prices, became the absorbing business of the times. The titles to the land in many cases was no less fictitious than the prices they realized; yet the immense volume of business transacted required a certain amount of money "to facilitate exchanges" if not sufficient to do a cash business, which at the time was not thought of. Chicago then felt for the first time in its history the sore need of money, and yearned for a bank of issue.

ANOTHER STATE BANK.—Chastened into some slight degree of caution, but by no means disheartened by the outcome of the business of the old State Bank, the Legislature, February 12, 1835, in addition to extending the charter of the Shawneetown Bank, as before mentioned, incorporated another State bank. The Legislature did not, as before, take upon itself in behalf of the State the responsibility of managing the bank, nor did it assume the payment of its obligations or the redemption of its bills in specie, either on demand or at any future period. With the wisdom which comes from experience it was content to leave the entire management of the bank to private enterprise. Following is a summary of the more important provisions of the charter. The title of the act was: "An Act to incorporate the subscribers to the bank of the State of Illinois;" the capital was to be \$1,500,000, divided into shares of one hundred dollars each; \$1,400,000 to be subscribed by individuals, while \$100,000 should be reserved to be subscribed for by the State, whenever the Legislature might deem it proper to subscribe the whole or such parts thereof as the condition of the treasury might justify. It was further provided that the capital stock might be increased \$1,000,000 by individual subscriptions. The style of the corporate body was: "The President, Directors and Company of the State Bank of Illinois," and the corporation was to continue until January 1, 1860. The principal bank was to be located at Springfield, with branches, not to exceed six in number, to be located within the State at such points as the president and directors should determine.

The bank was forbidden to commence business until \$250,000 of the capital stock should have been paid in in specie: rates of interest on loans for sixty days or less, six per cent; on loans over six months and under twelve, eight per cent per annum.

The amount of bills or notes in circulation was

limited to twice and a half the amount of capital stock paid in and possessed, exclusive of the sum due on deposits; and its loans and discounts were never to exceed three times the amount of such stock, exclusive of the deposits aforesaid. Directors were declared liable in their natural and private capacity for any transgression of the above limits. The section concerning the redemption of bills read as follows:

"SECTION 25. If, at any time, the corporation hereby created, shall neglect or refuse, for ten days after demand, at the banking house, during the regular hours of business, to redeem, in specie, any evidence of debt issued by the said corporation, the said corporation shall discontinue and close all its operations of business except the securing and collecting of debts due or to become due to the said corporation, and the charter hereby granted shall be forfeited.

"SECTION 26. The said corporation shall be liable to pay to the holders of every evidence of debt made by it—the payment of which shall have been refused, damages for the non-payment thereof, in lieu of interest at and after the rate of ten per centum per annum, from the time of such refusal until the payment of such evidences of debt and the damages thereon."

It was further provided, that whenever the State should have subscribed for and paid the amount of \$100,000, for stock reserved for it, the Governor should nominate two directors to represent the interests of the State in the corporation. The issuing of bills of a less denomination than five dollars was forbidden under forfeiture of charter. The bank was to pay annually, on January 1, into the State treasury, one-half of one per cent on the amount of the capital stock actually paid in by individuals, in lieu of all taxes whatever. Interference on the part of the bank with the election of State officers forfeited the charter of the bank. Supplementary to this act, January 16, 1836, the bank was authorized to increase the number of its branches to nine; the time for redeeming its bills, without forfeiture of its charter, was extended from ten to fifty days. As a consideration for these favors the bank agreed to redeem what was known as the "Wiggins loan," together with what interest might thereafter accrue thereon. This, a part of the burden left by the old State Bank, became the heritage of its successor.

CHICAGO GETS HER FIRST BANK.—The citizens of Chicago immediately moved to secure the location of one of the branches of the State Bank in their town. Their efforts were successful, and the announcement was made as early as June, 1835, that a branch was to be established there. December 5, 1835, the officers of the "Chicago branch of the Illinois State Bank" were announced in the American as follows: Directors—John H. Kinzie, president; G. S. Hubbard, Peter Pruyne, E. K. Hubbard, R. J. Hamilton, Walter Kimball, H. B. Clarke, G. W. Dole, E. D. Taylor; Cashier, W. H.

W. H. Brown

Brown. The bank was open for business about the middle of December, in the four-story brick block then owned by Garret, Brown & Bro., at the corner of La-Salle and South Water streets, and immediately started off with a flourishing business. The cashier advertised in the American, February 13, 1836, that the bank was to be kept open for business from 9 o'clock A.M., to 1 o'clock P.M., that "discount days" were Tuesdays and Fridays, and that all paper should be offered on Mondays and Thursdays. As an index of the magnitude of some of the accounts as well as the heavy business then

done by one of the leading firms it was stated in the American of March 12, 1836, that the Messrs. Garrett, Brown & Bro., from December 30, 1835, to February 27, 1836, deposited with the Chicago Branch Bank the sum of \$34,359.31. This was nearly an average of seven hundred dollars per day, and at that time was an item of news that reflected great credit upon the enterprising firm that did the immense business evinced by their huge deposits, as well as upon the solid financial institutions that could be trusted by them with such a fabulous amount.

Although the Chicago Branch was the only bank in the city at the beginning of 1836, the bills of the Illinois State Bank furnished but a small part of the currency in circulation. The value of the bills in circulation depended more on the facility with which they could be circulated than upon any knowledge as to their intrinsic worth. Anything that would go at the bank or that was not questioned on the street would do. The Shawneetown Bank, the Bank of Green Bay, working under charter from the Michigan Territorial Legislature and other banks, sufficiently remote for safety, helped to swell the volume of currency and buoy up the inflated trade of the times.

Things went on swimmingly all through 1836 and until the spring of 1837. Then came the sudden crash in the East, a decline in values, a general suspension or failure of banks, and individual ruin on every hand. The far West was at first believed to be too remote to be drawn into the Eastern whirlpool of destruction. Its banks had no circulation in the Eastern States, and therefore were not subject to the sudden and overwhelming demand for redemption and liquidation which fell upon the Eastern banks without warning. The banks of Illinois and the speculation in Western lands seemed to have little in common with the speculative craze in the far East, except that it was a psychological development of the same mental disorder. It was reasoned that with her own money and her own lands, and her own prices, Illinois might float securely in her own tub. Forthwith the wise men set about fortifying for the coming storm. The bank was, of course, the palladium of safety. It was determined to have money of home manufacture in sufficient quantity to keep the Illinois tub afloat. In the summer and fall of 1836, in connection with the great speculative excitement then near its culminating point, a great system of public improvements began to be discussed. It embraced the stupendous work of pledging the public credit to such an amount as might complete a water way from Chicago to the Mississippi River, and cover the whole State with a system of railroads that would reach nearly every prominent paper city which had been laid out, and which only needed railroad facilities to make them habitable as well as inhabited. The necessity of a population in order to keep up prices, began to dawn upon the people of Illinois almost simultaneously, with the determination to create through the banks an ample supply of money. The two ideas seemed to have a correlative fitness to together raise the State to the highest point of prosperity at once. The building of the railroads and the canal and the improvement of the river navigation, would open up the country to immediate and rapid settlement, and the highest hopes of the wildest speculators thus find fruition. Public meetings were held in most of the towns, where the plan was discussed and resolutions favoring the project passed, and, from most of the counties, delegates appointed to attend an Internal Improvement convention, to be held at the capital. The convention assembled at the same time as did the Legis-

lature of 1836-37, and recommended to that body a system of internal improvements, which, as stated in the resolutions, "should be commensurate with the wants of the people." The scheme was without doubt, worked up to this point, by a few shrewd designing men for purposes not entirely patriotic or unselfish, but when presented, it was most eagerly adopted by the Legislature. The building of the proposed railways, and the improvements of navigable streams, allayed the bitter opposition which had developed in sections of the State too remote from the Illinois & Michigan Canal to be benefited by the project, and the canal section could well afford to support the general scheme, however visionary, if thereby could be secured further appropriations for the continuance of the work. The banking interest could but approve of a plan that would make the banks the fiscal agents of the State in the carrying out of the scheme; the people saw in it a flood of money, sudden wealth without toil, and a continuance of good times, and Illinois, basking in the sun of prosperity, the haven of rest to which the pauperized inhabitants of less favored States would flock for homes, in numbers sufficient to occupy the whole domain and ever after remain the richest, the most populous and the most powerful of all the States. There were conservatives who saw the danger, warned the people and opposed the plan as inopportune, visionary, dangerous to the credit of the State and ruinous to its people; but all their efforts to stem the popular tide of enthusiasm for the project proved futile.

On February 27, 1837, the great scheme of internal improvements was legally inaugurated in the Legislature, by the passage of a bill, the provision of which, if carried out, would have met the wishes and expectations of the wildest enthusiast of those visionary times.

The act created a Board of Fund Commissioners, consisting of three members, who were to be "practical and experienced financiers;" and also a Board of Commissioners of Public Works, consisting of seven members. The members of those two executive boards were to be appointed by the General Assembly, and to hold their offices for two years. The Commissioners were authorized and required to complete, "within a reasonable time certain public works, and for which appropriations were made as follows:

For the improvement of the navigation of the	
Great Wabash.....	\$100,000
The Illinois River	100,000
The Rock River	100,000
The Kaskaskia River.....	50,000
The Little Wabash.....	50,000
Total	\$400,000
For the building of railroads:	
The Great Western Railroad from Vincennes to St. Louis	\$ 250,000
A railroad from the city of Cairo, at or near the confluence of the Ohio and Mississippi rivers, via Vandalia, Shelbyville and Decatur, and Bloomington to the southern termination of the Illinois & Michigan Canal, and from thence by way of Savannah to Galena	3,500,000
A southern cross railroad, from Alton to Mount Carmel, via Edwardsville, Carlyle, Salem, Fairfield and Albion; and also a railroad from Alton to Shawneetown.....	1,600,000
A northern cross railroad, from Quincy to Springfield, and from thence to the Indiana State line, in the direction of LaFayette.....	1,850,000
A branch from the central railroad, from near Shelbyville to the Indiana line in the direction of Terre Haute.....	650,000
A railroad from Peoria, on the Illinois River, to Warsaw, on the Mississippi.....	700,000

J. Young Scammon

A railroad from lower Alton to the central railroad	600,000
A railroad from Belleville, via Lebanon, to intersect the railroad from Alton to Mount Carmel.....	150,000
A railroad from Bloomington, McLean County, to Mackinaw, in Tazewell County, and a branch through Tremont to Pekin.....	350,000
Total appropriated for railroad building..	\$9,650,000

There was a further appropriation of \$200,000, to counties which neither of the proposed railroads nor the canal would pass, "for the improvements of roads and bridges," the said amount to be paid to the counties designated, "from the first money that should be obtained under the provisions of this act." This appropriation was little less than a legislative bribe to the few counties that otherwise, seeing themselves shut out from the distribution of benefits, might have jeopardized the passage of the bill by their opposition. The total amount appropriated was \$10,250,000; and the total length of roads contemplated was 1,341 miles.

The fund constituted for the work proposed was to consist 1. Of money to be borrowed. 2. All appropriations which should be made from time to time out of the State revenues, arising from lands and taxes. 3. All moneys to be received from tolls, etc. 4. All rents, issues, and profits arising from lands to be purchased by the State. 5. The proceeds of all lands which might be donated by the General Government in aid of the undertaking. 6. All grants and donations from individuals. 7. All profits and interest which may accrue from said works, together with the balance (after paying the debt due to the school, college, and seminary fund) to be received under the distribution law of Congress, which amount of said deposit, so funded, was "to be charged to the said fund of internal improvements, and repaid out of the same when demanded by the General Government." 8. All net profits, to arise from bank and other stocks thereafter to be subscribed for, or owned by the State, after liquidating the interest on loans contracted by the purchase of such bank or other stock.* The passage of the bill of which the foregoing is a digest involved the necessity of enlarged banking facilities in the State,—indeed the bolstering up of the banks, or rather their absorption by the State was but a part of the scheme to be worked in a co-operative way to the attainment of the same end. The banks were to receive a large amount of the bonds of the State in payment for stock to be subscribed for, and would, at the same time, become the fiscal agents of the State for the receipt and disbursement of the vast sums involved in the prosecution of the work. Accordingly March 4, 1837, an act was passed increasing the capital stock of the Shawneetown Bank \$1,400,000, all of which with the consent of the bank was to be subscribed by the State; also, during the same session, an act increasing the capital of the State Bank \$2,000,000, which increased stock was likewise to be taken by the State. To pay for the stock subscribed for, the Fund Commissioners were authorized to subscribe for the amount, payment for which was to be made, a part from the State's dividend of the surplus revenues of the United States, and the remainder from the sale of State bonds. The total amount of the capital stock of the two Illinois banks after the increase was: Shawneetown Bank, \$1,700,000; State Bank, \$3,100,000. Of these amounts the stock was owned as follows: Of the Shawneetown Bank, \$200,000 by private individuals and \$1,500,000 by the State;

* For a further history of the scheme up to the time of its utter failure and abandonment, see article on Railroads.

of the State Bank \$1,000,000 by individual stockholders, and \$2,100,000 by the State. Governor Ford* gives the following account of the manner in which these banks were started in their enlarged sphere of usefulness by the State:

"Although the State was to have the majority of stock in both banks, yet were the private stockholders to have a majority of the directors. The banks were made the fiscal agents of the canal and railroad funds; and, upon the whole, it is a mere chance that the State did not lose its entire capital thus invested. It was supposed that the State bonds would sell for a premium of about ten per cent, which would go to swell the interest fund; and that the dividends upon stock would not only pay the interest on the bonds, but furnish a large surplus to be carried, likewise to the interest fund. However, when these bonds were offered in market, they could not be sold even at par. The banks were accommodating, and rather than the speculation should fail, they agreed to take the bonds at par, as cash, amounting to \$2,665,000. The Bank of Illinois (Shawneetown) sold their lot of \$900,000, but the \$1,765,000 in bonds disposed of to the State Bank, it is alleged, were never sold. They were, however, used as bank capital, and the bank expanded its business accordingly."

It will be seen by the above that in the onset the banks were obliged to come forward and sustain the credit of the State by taking its bonds at par, which was above the market value, and in the case of the State Bank, in so far as it extended its business upon the basis of the sold or unsaleable State bonds, it was doing it on dead capital and running the imminent risk of failure. It did not take long to show the fallacy of the system. In the spring of 1837 the speculative bubble burst, prices collapsed, and the banks of the whole country suspended specie payment. It became at once apparent that the State Bank must suspend with the other banks of the country or fail. It had already become crippled by many failures among its speculative customers, to whom it had loaned money, and had still further weakened its position by extending its business largely on the unavailable capital of Illinois bonds. Being, as it was, one of the fiscal agents for both the canal and railroads, and indebted to both these funds to a large amount, its failure would have involved in ruin the whole system of public improvements. To avert the threatened calamity, a special session of the Legislature was called in July. Of this session, Governor Ford, in his history, says:

"The Governor's message made a statement of the matter, without any direct recommendation to legalize the suspension, and did recommend a repeal or modification of the internal improvement system. The Legislature did legalize the suspension of specie payments, but refused to touch the subject of internal improvements. It was plain that nothing could be done to arrest the evil for nearly two years more."

The act passed, legalizing suspension, was general in its nature, and was as follows:

An Act to suspend, for a limited time, certain Laws in relation to the Banks of this State.

SECTION I. Be it enacted by the people of the State of Illinois, represented in the General Assembly,—That every provision of law, requiring or authorizing proceedings against any bank in this State, with a view to forfeit its charter or wind up its concerns, or which requires said bank to suspend its operations and proceedings, in consequence of its refusal to pay its notes or evidences of debt in specie, is hereby suspended until the end of next general or special session of the General Assembly, unless banks shall have generally resumed specie payment at an earlier date, in which case

* "History of Illinois," pp. 90-91.

the Governor shall give notice thereof by proclamation, and the said bank shall, within twenty days thereafter, also, resume specie payments: Provided, however, That to secure the benefit of the foregoing provision, said banks shall agree to conform to, and comply with, the following conditions, restrictions and limitations, viz.:

First—That it will not, either directly or indirectly, divide or pay among its stockholders, or to any person for them, any dividends, interest, or profits whatever, until it shall *bona fide* resume the payment of its notes and evidences of debt in specie, which dividends shall be retained in bank as an additional security to the holders of its notes.

Second—That it will not, directly or indirectly, during the suspension of specie payment, sell, dispose of, or part with any of its specie, or gold or silver bullion, except for the purpose of change to the amount of five dollars, or under the sum of five dollars.

Third—That it will furnish monthly, upon the oath of its president or cashier, to the Executive of the State, a full and complete statement of the condition and financial operations of said bank and branches, which shall be published in the newspapers of the State Printer.

Fourth—That it will not, directly or indirectly, issue or put in circulation, during the period of its suspension of specie payments, any bank bills or notes, or any evidence of debt by which the amount of its circulation shall be increased beyond the amount of capital stock paid in by the stockholders.

Fifth—That it will receive upon deposit any funds belonging to the State, which may be required to be so deposited, and pay the same out upon the order of the proper officer, or agent of the State, in kind, free from charge; and also all funds heretofore deposited by the State.

Sixth—That until the banks shall resume specie payment, citizens and residents of the State who are indebted to them upon notes heretofore discounted, shall be allowed to pay their debts in installments, at the rate of ten per cent, upon each and every renewal of the amount originally due, upon condition that such debtors shall execute new notes, with satisfactory security and pay the aforesaid per cent, and the interest in advance, according to the usage and custom of banking: Provided, That this section shall not apply to notes or bonds assigned or endorsed to the bank.

Seventh—That any violation of the provisions of this act, or any failure to comply with and conform to the same, shall subject the bank in default to a forfeiture of its charter.

SEC. 2. Whenever any bank shall accept the provisions of this act, and the president thereof shall furnish the Governor with a certificate of the fact of such acceptance, under their corporate seal, the Governor shall issue a proclamation, stating the fact of such acceptance; and from and after the date of such proclamation such bank shall be considered as being entitled to all the benefits hereby conferred, and bound by all the conditions, restrictions and limitations herein contained.

SEC. 3. This act shall not be construed so as to impair any rights required by individuals, or to exonerate the bank from any liability to the holders of its notes, for the non-payment of the same; and the provisions of this section shall apply as well to notes heretofore issued as to notes which may hereafter be issued.

Approved 21st July, 1837.

The State Bank, under the provisions of the act, continued to do business as the fiscal agent of the State, although it never again redeemed its obligations in specie. So long as the fund commissioners could dispose of the State bonds in sufficient amounts to continue the internal improvements it had a fair although somewhat soiled reputation as a monetary institution. The work was continued until near the close of 1838, when the fund commissioners had exhausted every means their ingenuity could devise for raising money on State bonds to continue the work, and were compelled to report an empty treasury, their inability to replenish it by the sale of more bonds, and the consequent necessity of suspending the work. An extra session of the Legislature was called, and the bubble was as legally burst as it had been legally inflated by the passage of an act in 1839 which repealed the system and provided for winding it up.

The indebtedness incurred by the State in this ill-starred enterprise amounted to \$6,014,749.53, for which she had to show only one small section of railroad com-

pleted (from Springfield to Meredosia) and a network of unfinished roads spread across the State in all directions which, thus left uncompleted, soon became nearly worthless. The credit of the State had become so impaired that its bonds had no staple or quotable value, and were bandied about in the money markets of New York and London at prices varying from fifty to seventy-five per cent below par. The credit of the banks which had been so closely identified with the State improvement scheme, and whose only valid claim to solvency rested on the credit of the State, it being the owner of a great majority of the stock in both banks, sank even below the credit of the State. Their stocks were worth in the neighborhood of fifty cents on the dollar, and, at that quotation, the banks could not redeem their own bills. As banks of issue their mission was at an end in 1839. The State Bank, however, continued to perform some of the functions of banking, such as dealing in exchange, and disbursing the canal fund, for a few years thereafter. The end came during the winter of 1843. The Legislature at that time had come to a realizing sense of the situation, and determined to retire from the banking business by forcing into liquidation the banks it virtually owned. On January 24 an act was passed "to diminish the State debt, and put the State Bank into liquidation," and on February 25 an act "to diminish the State debt one million dollars, and put the Bank of Illinois (Shawneetown) into liquidation."

The "diminishing the State debt" was to be brought about by forcing the banks to surrender up to the Governor State bonds, scrip, or other evidences of State indebtedness—the Shawneetown Bank \$1,000,000, and the State Bank \$2,050,000—for which a like amount of the stock held in either bank was to be surrendered by the State. As the securities sought to be exchanged were at the time about on par, each with the other, it might be deemed that the exchange contemplated was no robbery. It was, however, an arbitrary and unjust act to thus force the banks to deliver up its securities for its stock, and leave the burden of the past losses of the bank upon the individual stockholders who had paid good money for their stock, now worthless, instead of giving their notes, still unpaid, as the State had done. The scheme worked, nevertheless; the bonds to the amount of \$3,050,000 were delivered up, the State indebtedness thus reduced, and the banks finally wound up at the expense of the individual stockholders, the holders of their bills, and their other creditors, who realized but little out of the final settlement.*

Thus the Chicago Branch of the State Bank went out in 1843. Its demise was not generally regretted by the citizens. It had not proved the unmixed blessing anticipated by those who had been instrumental in its establishment seven years before. For nine years after the close of the State banks there was no attempt to establish any system of State banking in Illinois. During that period the business was done entirely by private bankers, and on the currency of other State banks or on other issues not authorized by the laws of the State to be used as money.

From 1836 to 1843, during which time a branch of the State Bank of Illinois was located in Chicago,† the young city nearly doubled its population. The enum-

* In justification of this arbitrary procedure on part of the Legislature it was claimed that the bonds thus demanded were not the identical bonds which had been received by the banks; that the bonds had been sold at par, and repurchased at a great discount, and that the banks had made money by the operation.

† In the nominal compliance with an act of the Legislature passed January 31, 1840, the branch was removed to Lockport, but its business, through an "agency," still went on in Chicago.

eration of 1837 gave a population of four thousand one hundred and seventy-nine; that of 1843, seven thousand five hundred and eighty. The growth was not entirely attributable to the bank; on the contrary that institution proved quite inadequate to furnish the banking facilities to meet the legitimate requirements of the fast growing town, and, after the first year was little better than a stumbling block in the way of progress. Outside its own immediate circle of friends, it could grant but little banking accommodation. Its discredited currency had driven all silver coin out of circulation, and in its place the citizens were forced to use anything that would enable them to carry on the business of the city. Canal scrip was used, payable at the "Chicago Branch," some bearing interest, some payable on demand, and issued on engraved paper in the semblance of bank notes, in denominations of \$1, \$2, \$2.50, \$3 and \$5. The city corporations, having been refused a discount at the

people in the personal responsibility, ability and honesty of those who had promised to redeem it.

ILLEGAL BANKING.—The Legislature of 1836–37 chartered the Chicago Marine & Fire Insurance Company. In the charter it was specifically forbidden that the company should do a banking business, or issue any notes or bills in the semblance of bank notes to be passed as money. The company organized under their charter and one of their earliest advertisements, which appeared in the American, May 16, 1837, read as follows:

The Directors of the Chicago Marine & Fire Insurance Company, being desirous of rendering to the community, during the existing deranged condition of the monetary system of the country, every legitimate aid sanctioned by prudence which the provisions of the charter of the company admit, when there are so many pressing causes urging to action every power capable of affording relief, have determined to avail themselves of that portion of the 5th section which is contained in the clause following:

FAC-SIMILE OF PLATE ENGRAVED BY THE CHICAGO MARINE AND FIRE INSURANCE COMPANY, BUT NOT ISSUED IN ANY LARGE AMOUNTS.

bank and being unable to obtain a loan elsewhere, issued scrip also, in small denominations. The small tradesmen issued tickets of credit for change, from five cents to 50 cents, "good for groceries," "payable in goods," "good for tobacco," "good for a drink," or good for anything else which the issuer might happen to deal in. In addition to this was county scrip, State-Auditor's scrip, St. Louis scrip, and subsequent to 1837, a flood of bills issued by Michigan banks under the Land Loan banking law of that State. Of all this variety not a bill could be found that would be taken for postage, or for lands by the General Government, and, when found necessary to convert any of them into gold or silver, it was done at a frightful discount, varying from ten to eighty per cent, according to the character of the paper offered, and the whims, avarice, or necessities of the parties to the trade. All the bank bills might be termed legal issues, as the banks were all working under franchises granted them by some State or Territory. During this period, 1837–43, besides these, there came into general use as money, an issue of certificates of indebtedness which in contrast might be distinguished as illegal money; since its issue was not authorized under the laws of any State, and its current value as money was based entirely on the confidence of the

"And also to receive moneys on deposit, and to loan the same, on bottomry, and respondentia, or otherwise, at such rates of interest as may now be done by the existing laws of the State." * * *

The condition of the company is entirely solid and beyond doubt, as there is a surplus, beyond its capital stock paid in, of a considerable amount and because it has met with no loss since its organization, and its present risks are very few and limited to small amounts.

The Articles of the By-Laws, in relation to deposits are:

- (1) All deposits shall be either general or special.
- (2) General deposits are those which shall be made by the depositor, subject to be drawn out at any time on his check or order.
- (3) Special deposits shall be those which are made for any specific time, and for which the depositor shall receive an interest.
- (4) No sum of money less than ten dollars shall be received on a general deposit, nor less than five dollars on special deposit.
- (5) All money deposited specially on trust for a shorter term than one year shall be deposited for a certified number of months—not less in any case than three months from date of deposit.
- (6) The rate of interest to be allowed on such special deposits of not less than six months shall be at the rate of six per cent per annum; in all other cases the rate shall be settled by special agreement between the depositor and the officer of the institution at the time of depositing.
- (7) When the time of deposit shall exceed a year, interest may be made payable before the principal becomes due, annually or semi-annually, as may be agreed on; but when the deposit shall be for a shorter time than a year, no interest will be paid until the principal becomes due.

(8) Certificates of deposit, for money deposited, whether general or special, specifying the time and amount of the deposit, and when payable, and in what fund, and whether with or without interest, shall be issued when required, and in such cases the money so received shall be payable according to the terms of the certificate, on the production and surrender of such certificate.

Office in Russell's Brick Block, corner of Lake and Clark streets.

Office hours, from 9 A. M. to 1 P. M.

J. S. BREESE, *President*.

L. D. BOONE, *Secretary*.

In accordance with the above notice, the company immediately commenced a "banking business." It received deposits, it loaned money, it bought and sold exchange and coin, and its demand certificates of deposit in the course of business, performed the functions of money, although they were not in the semblance of "bank notes," and it would have been impossible to prove that they had been issued in violation of the provisions of the charter. What circulation they had was based on the confidence of the people in the solvency of the institution, rather than on any authority or power conferred on it by State legislation. It does not appear that the directors of this company designed to create a circulating medium in their certificates, nor did they do so to any great extent, but, perhaps, sufficiently to suggest the feasibility of the plan to a class of men having the ability to put it in practice successfully, and to such an extent as to render it the leading monetary system, and a prominent factor in the trade and commerce of the Northwest for many years.

Among the shrewdest financiers then living in Chicago were George Smith and Messrs. Strachan & Scott, all from Scotland. Smith* first came to Chicago as a prospector in 1834. He became strongly impressed with the immense field for profitable investment of money offered by the great Northwest, then for the first time open for settlement, and returned to Scotland full of enthusiasm over the glorious business prospects which his sagacity enabled him to discern. He there organized the "Scottish Illinois Land Investment Company;" Strachan & Scott came out with him, on his return, as managers of the affairs of the company; George Smith was a large stockholder, and a sort of advisory director, and did his business at their office which they opened as agents of the Scotch company, real estate agents, and private bankers, immediately after their arrival (late in 1836). The three were comfortably settled and doing business in August, 1837, as appears by the following advertisement which appeared in the Democrat of August 16:

"TO RENT.

"Several houses and rooms suitable for families. Apply to Strachan & Scott, corner of Lake and Wells streets, or to George Smith, Lake House."

These Scotch gentlemen, whose business in the country was to make money, watched with intense interest the developments of the new phase of banking

* George Smith was a native of Old Deer, Aberdeenshire, Scotland, where he was born about the year 1809. He was bred a farmer, spent two years at Aberdeen University and came to America and the great West, not to establish a banking business but to become a great land-holder on the vast unoccupied domain of the new country. It seems a matter of chance or accident that the business in which he engaged made him the great banker of the West instead the owner and cultivator of immense tracts of land. His connection with Strachan & Scott, and Alexander Mitchell, shrewd and educated bankers, had undoubtedly much to do with changing the character of his business, and turning it into the unexpected channel it afterward followed.

which had its basis outside of any legislative authority. The act gave the company a corporate existence, and empowered it to hold property, to buy and sell, to sue and be sued, which seemed to them all that was necessary for their purposes. Accordingly, in 1839, the times having become propitious through the collapse of the State internal improvement scheme, and the abridged importance and prominence of the State banks, which followed, they took a transcript of the charter of the Chicago Marine & Fire Insurance Company, and without important changes obtained from the Territorial Legislature of Wisconsin, its passage as an act incorporating the Wisconsin Marine & Fire Insurance Company. Another Scotchman now joined the trio. Alexander Mitchell, a young banker from Aberdeen, came out at the solicitation of his friend, George Smith, to assume the secretaryship and local management of the new company at Milwaukee. The stock of the company was \$225,000, one-half of which was held in Scotland, and the other half by George Smith, Alexander Mitchell, and Strachan & Scott. The office was established at Milwaukee. The sign read: "Wisconsin Fire & Marine Insurance Company." The proprietors immediately commenced the business for which they had obtained the charter, leaving the people to judge as to whether they were doing a banking business or not. To their customers they issued certificates of deposit, engraved like bank bills, of various denominations from one dollar to ten dollars. Below is a copy of one of the few, if not the only original certificate issued by the company, now in existence:

WISCONSIN MARINE & FIRE INSURANCE COMPANY.

No. 113,897.

This is to certify that E. I. Tinkham has deposited in this institution one dollar, which will be paid on demand to bearer.

Milwaukee, W. T., 11th July, 1845.

GEORGE SMITH, *President*.

ALEXANDER MITCHELL, *Secretary*.

These certificates were redeemed in Chicago at the banking house of Strachan & Scott, until their removal to New York in 1840, and subsequently by George Smith & Co., so long as they continued in circulation. The issue worked its way into circulation slowly at first, and against the opposition of the banks still doing business under State charters. From the first appearance of these bills until the State banks, under the old regime, were powerless and useless, they were subject to their bitter hostility. The people, however, favored them, as they were always promptly paid on presentation and showed in favorable contrast with the Illinois bills afloat, all of which were below par, and none of which were ever redeemed at their face value after the Wisconsin Fire & Marine Insurance Company started business. December 1, 1841, the company had out of its certificates of deposit (afloat as currency) only \$34,028. The issue from that time rapidly increased. In 1843 the circulation was \$100,000; in November, 1845, \$250,000; in July, 1847, \$300,000; in November, 1847, \$400,000; in November, 1848, \$600,000; in October, 1849, over \$1,000,000; in December, 1851 (the year before the banking law was passed in Wisconsin), \$1,470,000. From that point the circulation was gradually contracted. Every dollar of this vast amount was paid according to its tenor, on presentation. Nearly \$34,000 was never presented, that amount being probably lost by fire, shipwreck and wear. In 1853 the company was re-organized as a legal banking institution under the general banking law of Wisconsin, its name, already too long, being lengthened by the important word, Bank, to which it had an unquestionable title by an illegal but

honorable career in the banking business for thirteen years. It received its legal christening under the name of "The Wisconsin Marine & Fire Insurance Company Bank," and as such is known to this day. The name was, and is, too long for practical adoption. In its early days it was more generally dubbed Smith's Bank, or Mitchell's Bank, and under the latter name, after half a century, stands with unlimited credit in all the marts of the world.

As has been stated, the issues of the bank were slow in gaining the confidence of the people. The irregular and illegal form in which the currency was put out was kept constantly in the mind of the people by those who were interested in perpetuating what they were pleased to term legal banking. Runs on Strachan & Scott and Smith, and on the bank of Milwaukee, were organized with a view to discredit the currency, and destroy the growing confidence in its stability and value. None of them succeeded further than to create temporary panic outside the bank; on the contrary, each run, either on the bank at Milwaukee or on Smith at Chicago, or on any other agents for the redemption of its bills, was promptly met, and left the bank in better standing than it was before. As its business increased, in order to enlarge the field of its circulation, it established agencies for the redemption of its bills at Galena, St. Louis, Cincinnati and Detroit. The result was that the illegal bills, issued honestly and honestly paid, drove from circulation the legal bills, dishonestly issued and afterward dishonored. A few banks stood the stern Scotch test, and kept their bills in circulation; but it is but truth to say that the illegal issue of the Wisconsin Fire & Marine Insurance Company drove the depreciated paper of the legally constituted State banks out of circulation.

As contrasting the two systems of banking then in vogue the Milwaukee Courier, May 9, 1842, published the following statements, with comments, as follows :

BANKING.

Statement of the Wisconsin Marine & Fire Insurance Company, December 1, 1841:

ASSETS.	
Bills and notes, chiefly at or under 60 and 90 days' date, not due and bearing interest.....	\$ 8,439.00
Real Estate and Real Estate Securities, mostly in Milwaukee, Walworth and Racine counties, sold, and now in course of being paid for.....	94,442.70
Cash in hands of correspondents at New York, Detroit, Chicago and St. Louis—part bearing interest.....	155,789.76
Cash on hand—Western funds.....	16,518.00
Gold, silver, treasury notes and Eastern bills.....	5,346.95
Company's office furniture, etc.....	2,011.83
Expense account.....	177.93
Premiums of fire insurance, being loss sustained by fire, insurance after absorbing all premiums heretofore received.....	828.72
Due from Territory of Wisconsin for expenses of Legislature, for which certificates are held, bearing 10 per cent interest.....	16,873.01
Current and miscellaneous accounts.....	5,465.81
	<u>\$299,893.71</u>

LIABILITIES.	
Capital stock paid in.....	\$224,475.00
Deposits and check account, in \$1, \$2, \$3 and \$5 evidences of debt outstanding (circulation).....	34,028.00
Due correspondents.....	5,000.00
Sum of credit of individuals on current and miscellaneous accounts.....	6,177.48
Unpaid dividends.....	45.00
Profit and loss account.....	20,597.64
(\$20,000 of this sum is premium received on company stock sold.).....	

Premiums of marine insurance, being profits on account of marine insurance, subject to losses that may yet be ascertained.....	570.59
	<u>\$299,893.71</u>

(Signed) ALEX. MITCHELL, Secretary.

STATE BANK OF ILLINOIS.

The cashier of this institution has made an authorized expose of its affairs, and it shows it to be irretrievably insolvent—from the Missouri (St. Louis) of the 25th.

The immediate liabilities of the bank are:	
Circulation.....	\$2,861,288.00
Unclaimed dividends.....	811.00
Discount, exchange and interest.....	212,380.91
Due to other banks.....	46,826.31
Deposits.....	157,448.64
Total.....	<u>\$3,278,754.86</u>
To meet these liabilities which are instantaneous, he reports. Specie.....	\$ 526,096.65
\$144,476 of other bank bills which may be worth...	75,000.00
Total.....	<u>\$ 601,096.65</u>

IMMEDIATE ASSETS.

Resources of which part may be realized:	
\$60,236.07, bank balances.....	\$ 60,000
\$311,801.00, real estate taken from broken debtors, probably worth.....	200,000
\$1,686,000, State stock, worth.....	337,200
\$673,975.32, loans on real estate, of which may be collected.....	150,000
\$825,469.50, suspended debt of which it is possible there may be collected.....	100,000
\$1,317,954.36, bills discounted of which may be collected.....	1,000,000
\$547,171.17, bills of exchange on pork, worth.....	300,000
\$156,492.42, due from Fund Commissioners, and \$350,165.20 due from the State, on which nothing can be realized for years.....	
\$336,827.04, due from other banks—probably most of it from Cairo—may be worth.....	175,000
Total resources.....	<u>\$2,943,296.65</u>

The last exhibit showing the condition of the State Bank of Illinois, is the work of prejudice. The estimates of the value of securities, although, in the aggregate, not far from the truth, were made at the time with a view to discrediting the bank. The reader will remember that, as has been told, the State soon after closed up the bank and robbed it of its State stock, leaving it unable to pay its other creditors. On the part of the members of the Legislature who forced the bank to close up, it was a shameless repudiation, since many of them were debtors to the bank, and it was openly charged that the ruling motive for closing it up was to thus avoid the payment of their honest debts.

The only object of the foregoing exhibit is to show the reader how the illegal system of banking honestly conducted, compared with legal banking dishonestly carried on. A State may be dishonest as well as an individual, and lacking the control coming from fear of punishment, do more mischief than the citizen who has a wholesome fear of the penalties of the law before his eyes. It is sufficient to say that in 1843 legal banking ceased in Illinois, and that illegal banking had, meantime established itself. For the succeeding eight years, the banking of Chicago was carried on by private bankers or banks, using as currency the bills of

Wisconsin Marine & Fire Insurance Company, and the bills of other State banks which had managed to resume specie payment and sustain their credit against the first-named institution.

EARLY BANKS AND BANKERS—(1836 to 1851).—The banking of Chicago was carried on prior to 1851, by the following corporations, firms and individuals:

1836—Chicago Branch of the State Bank of Illinois, corner of LaSalle and Water streets, removed to Lockport in 1840; agency remained in Chicago until bank closed in 1843.

1837—Strachan & Scott; remained in business until 1840; sold out private banking business to Murray & Brand. George Smith succeeded them as agents of the Wisconsin Marine & Fire Insurance Company. The Chicago Marine & Fire Insurance Company did a full

banking business with the exception of issuing bills. Its charter was amended in 1849, and it was the predecessor of the Marine Company of Chicago.

1838—No changes.

1840—George Smith & Co., LaSalle Street, bankers, continued in business in Chicago until 1856-57, at which time the business of the house was closed up. Mr. Smith after an honorable and successful career of twenty

years as a Western banker, retired with a very large fortune, and returned to Scotland. He now lives in London. He has still large property interests in Chicago.

The first full and reliable business directory published in Chicago was issued by Norris in 1844. It contained the following names of persons engaged in banking and brokerage:

Murray & Brand, exchange brokers, corner of Lake and Clark streets; Noah Buckley, pawnbroker, corner of Randolph and Wells streets; Newberry (Walter L.) & Burch (I. H.), bankers, 97 Lake Street; Griffin & Vincent, brokers, corner of Dearborn and State streets; George Smith & Co., private bankers, and exchange brokers, Bank Building, LaSalle Street; Elijah Swift, broker, 102 Lake Street; R. K. Swift, broker, 102 Lake Street; H. W. Wells, agent of Farmer's and Mechanic's Bank, 112 Lake Street, upstairs.

The directory of 1845 shows no additions to the banking facilities of the city. The names and advertisements of banks and bankers were as follows:

Alexander Brand & Co. (Murray & Brand), private bankers and exchange brokers, 127 Lake and Clark Street. "Collections and remittances made on all parts of the United States, Great Britain and Ireland, and the Continent of Europe. Money remitted to or from settlers or emigrants in sums as may be required. Deposit accounts kept. Interest paid on special deposits. Money and property commissions attended to." J. Coe Clarke, north of Lake Street, between Clarke and South Water streets; Newberry & Burch, 97 Lake Street; George Smith & Co., bankers and exchange brokers, Clark Street, between Lake and Randolph; R. K. Swift, office 102 Lake Street, upstairs; "money loaned on

real estate and other undoubted securities;" Agency of the Farmer's and Mechanic's Bank of Michigan, H. W. Wells, agent, office Saloon Building, Clark Street. Agency of the Mississippi Marine & Fire Insurance Company, office 87 Lake Street, M. M. Hayden, vice-president.

The directory of 1849-50 has the following:

Money Lenders—G. P. Baker, 193 Lake Street; J. S. Dole, 181 Lake Street; Thomas Parker, 40 Clark Street; E. G. Hall, 103 Lake Street; R. K. Swift, 111 Lake Street.

Banks, bankers, and dealers in exchange—Alexander Brand & Co., 127 Lake Street; I. H. Burch, 125 Lake Street; Chicago Savings Bank,* 125 Lake Street; Chicago Bank,* 125 Lake Street; Curtis & Tinkham, 40 Clark Street; D. C. Eddy, 97 Lake Street; George Smith & Co., 41 and 43 Clark Street.

In 1851 a general banking law was passed by the State Legislature and legal banks of issue incorporated under its provisions, ultimately superseded the private banking which had been carried on since 1843. Many of the private bankers organized banks, and continued their business under new corporate names. The survivors of the period of illegal banking as shown in the directory of 1851 were:

Bankers—Alexander Brand & Co., 127 Lake Street, corner of Clark; I. H. Burch, 125 Lake (Chicago Bank, also Chicago Savings Bank); George Smith & Co., 41 and 43 Clark Street; Tucker, Bronson & Co., 85 Clark Street; Jones (William) & Patrick (Milton S.) 40 Clark Street; Richard K. Swift, 45 Clark Street.

Money Lenders—John Denniston, 111 Lake Street; E. G. Hall, 103 Lake Street.

The directory also shows that, in that year, Charles B. Farwell was teller at George Smith's Bank, and that Edward I. Tinkham was secretary of the Chicago Marine & Fire Insurance Company.

The "illegal banks" and bankers that lived through the period, and continued after the passage of the Banking Law, in 1851, to do business had shown a vitality not to be despised. "Smith's Bank" (The Wisconsin Marine & Fire Insurance Company) was in constant danger, and attacks on its credit were so persistent that it may be said to have been in a constant state of siege from the time its bills first appeared in 1839, until it finally became a legal banking institution, under the banking law of Wisconsin, in 1853.

As early as 1841, before the collapse of the State Bank of Illinois, the following appeared in the Chicago American of September 28, 1841: "The present circulation of the Wisconsin Marine & Fire Insurance Company, whether in Illinois or elsewhere, is \$29,000. In addition to the guarantee afforded by stockholders, both here and in Great Britain, we are enabled to communicate the facts, that the parties by whom the bills of the institution are redeemed in the city have never been without the means of taking up its whole circulation at a moment's notice, either in Illinois funds or Eastern exchange, and have at this time, deposits, available for the redemption of the bills, in the Chicago Branch Bank, to an amount exceeding the entire circulation."

A statement like the above silenced the Illinois Bank men for the time being, as a run on Smith's Bank would be virtually a run on their own bank, the deposits for the redemption of the bills being kept in that institution. But when, in 1843, the State Bank was closed up, the war was carried on by all the outside banks of issue whose circulation came in competition. The most formidable attempt to ruin the bank occurred in Novem-

* Owned by I. H. Burch.

ber, 1839. For weeks before, the Michigan banks, with allies in Chicago, had been employing brokers to gather "Smith's bills," of which there were out at the time \$1,000,000. On Thanksgiving day Smith closed his bank in Chicago for the holiday as was customary. The news was immediately sent to Milwaukee that "Smith had closed his bank in Chicago," and a local panic was thus inaugurated. Simultaneously the accumulated bills began to pour in for redemption, both in Milwaukee and Chicago. Mr. Mitchell, secretary at Milwaukee, immediately sent an express to Chicago for a supply of specie, which was promptly forwarded in double the amount required, one-half by land express and the other by way of the lake. In the History of Milwaukee, published in 1881, the run on the bank and its result is thus stated: "There was much excitement and large crowds of panic-stricken depositors thronged the bank and withdrew their deposits. The more intelligent classes, however, proved their staunch friendship and supreme confidence in Mr. Mitchell and his bank, by furnishing him all they could rake together at first, and afterward replenishing his coffers by depositing with him such amounts as had been placed in his hands for safe-keeping. Thus the run became nearly self-supporting, and, as the supply of coin seemed inexhaustible, the local panic among small depositors had entirely subsided before the arrival of the coin from Chicago, the deposits being actually decreased at the end of the run only about \$100,000."

Mr. Smith promptly redeemed the bills presented in Chicago. The plot failed and left the bank ultimately stronger in the confidence of the public than ever before.

The panic, however, was not confined to Milwaukee and Chicago, where it was short lived, but spread all through the West where the bills were current and constituted the greater part of the circulating medium.

Concerning the panic and the bank, the Chicago Democrat, December 1, 1849, discoursed thus: "Wisconsin Marine & Fire Insurance Company—Panic—Some considerable excitement has been created within the past few weeks with regard to this institution; and on account of articles published in the papers of this city, many of the holders of its bills abroad have been alarmed. In St. Louis the excitement was intense and its bills were selling at five to six per cent discount. They were, however, redeemed at the company agency, at one per cent discount—the usual rate. Upon the line of the canal, also, we learn that the bills have been selling at eight per cent discount." After alluding to its hatred of banking and broken banks it continued: "We do not wonder that they (the failures of the banks) should cause the people to enquire whether the owners of the institution are legally responsible for its liabilities. In this state of things, we agree with our contemporaries of the Press that it is due to the public on the part of its proprietor that the Wisconsin Marine & Fire Insurance Company should make such arrangements as will prevent these panics in the future. Mr. Smith is now in a position in which he can make such a disposition of the property which he possesses, or securities that he can command, as will amply secure the public, so far as a bank can be said to be secure. We should think that a regard alone of his own interest would lead to this. Such security would restore confidence, and give his institution a stability which it can never possess under its present character. Mr. Smith has been made a wealthy man by the people of this city. Why then withhold legal responsibility which should long ago have

been given, but without which the public have been so generous as to put confidence in the institution?"

As showing that both Mr. Smith and Mr. Mitchell were not unmindful of the demands the public had upon them in return for the confidence it had shown in their institutions, the following appeared in the Democrat of December 7, 1849.

"Wisconsin Marine & Fire Insurance Company and George Smith. We copy the following from Thompson's Bank Note Reporter of December 1, just received:

"WISCONSIN MARINE & FIRE INSURANCE COMPANY,
"MILWAUKEE, November 22, 1849.

"J. THOMPSON, ESQ.—*Dear Sir:* In the Bank Note Reporter of the 15th current I observe reference is made to this institution in a communication in which you append certain remarks of your own and inquire whether the public have a legal claim on me for the redemption of its notes. In answer to this question, I have to inform you that being aware that doubt existed with respect to the extent of my liability for the issues of the company, and being desirous of satisfying what I am not prepared to call an unreasonable wish on the parts of a portion of the public, I did, in March, 1846, create a legal liability on my part for all such issues, and that in order to remove all ground of doubt on this subject, and acting under the advice of able counsel as to the most effectual manner of accomplishing the desired end, I have recently, together with Mr. Mitchell, the secretary, executed instruments creating a personal liability on the part of both of us, to trustees, for the benefit of the holders of the company's notes now outstanding, and those that may be hereafter issued; the trustees being William H. Brown at Chicago and Hans Crocker of this city.

"Yours respectfully,
"GEORGE SMITH."

The following appeared in the Democrat of December 11, 1849: "Some fifty or sixty of the merchants of the city have published a circular expressing confidence in the notes of the Wisconsin Marine & Fire Insurance Company."

There was very little popular distrust of the bank after this date. Its circulation was still further increased in amount, and for the succeeding three years was the favorite currency throughout the West.

The Chicago Democrat was at this time violently opposed to banks and banking as carried on in the West, whether legal or illegal, and kept up a constant fusillade against them all. It represented, however, quite fairly the different phases of the business as they transpired. The following excerpts are deemed of historic value:

Issue of April 16, 1849:

"Chicago Temperance Saving Association.—Deposits from a dollar, upwards, received, drawing seven per cent interest, payable half yearly. William H. Brown, president; Charles Walker, vice-president; J. Wilcox, secretary; T. B. Carter, treasurer; Alfred Cowles, attorney. Loaning Committee: B. W. Raymond, Thomas Richmond, Henry Smith."

June 26.—"A new banking and exchange house has been opened in this city by Messrs. Curtiss & Tinkham who, having command of considerable funds in Ohio and other currency, it is expected by the produce operators and others, will be able to extend the facilities now afforded for the purchase of the productions of the country. E. I. Tinkham, late cashier of Wisconsin Marine & Fire Insurance Company, is a partner in the firm."

September 19, under the head of "Money Table:"

"Bills bankable and commanding specie at one per cent: New England banks in good credit, New York State banks in good credit, New Jersey and Maryland banks in good credit, Ohio, Indiana and Kentucky banks in good credit, Michigan, Virginia and Missouri banks

in good credit, Wisconsin Marine and Fire Insurance Company certificates, Pennsylvania banks, not over one per cent, discount in New York.

"Uncurrent.—Canada, three per cent discount, Pennsylvania, par to three per cent discount, Tennessee, not taken, State Bank of Illinois, fifty per cent discount, State Bank of Shawneetown, seventy-five per cent discount."

"Scrip.—Chicago city orders, par to five per cent discount; Cook County orders, thirty to thirty-five per cent discount; auditor's warrants, ten to fifteen per cent discount; one hundred and sixty acre land warrants, \$132 to \$154 each.

"Exchange.—On New York, Albany and Boston, one and a half per cent premium for currency; on New York, Albany and Boston, one per cent for specie; on Buffalo, three-quarters of one per cent premium for currency; on Buffalo, one-quarter of one per cent premium for specie; on England, \$5.10, the pound sterling, in sums to suit."

In the same issue (September 19) R. K. Swift advertised as follows:

"R. K. Swift will receive deposits of money and allow interest as follows: On certificates payable five days after demand, four per cent; ten days, five per cent; fifteen days, six per cent; twenty days, seven per cent; twenty-five days, eight per cent; thirty days, nine per cent; forty-five days, ten per cent. If the sum or sums deposited by one person should exceed \$1,000, the time of demand is to be arranged by special contract. A deposit book will be opened from 1 till 2 P. M. every day (holidays and Sunday excepted) at the residence of the subscriber, 48 Michigan Avenue, for the benefit of ladies, and one per cent more will be allowed them over the rates above named.

"R. K. SWIFT,

"Office over Kohn's store, 111 Lake Street."

Mr. Swift was the first banker in Chicago to inaugurate banking exchanges with California and the Pacific coast. In the same paper from which the above is quoted appears the following:

"California Loan Office.—Parties who make loans or discounts of the undersigned may, if they desire, contract to make payments at the office of E. & R. K. Swift, San Francisco, and have interest stopped *pro rata* from the date of such payment; or to make payment by drafts to be drawn on the subscriber by said E. & R. K. Swift, of San Francisco; and such drafts to be received as payments and stop interest *pro rata*, either from date, sight, or maturity of the same, as may be contracted at the time of making the loans or discount. The rate of interest will necessarily be high, and the most rigid scrutiny will be required.

"R. K. SWIFT, 111 Lake Street."

"Exchange Office—San Francisco—E. & R. K. Swift will remit money to and from San Francisco, and will also receive deposits of money at San Francisco and cause the same to be remitted to any of the leading cities in the United States, Canada or Europe, and will

ship packages of goods from Chicago, by way of New York and Cape Horn, to San Francisco.

"R. K. SWIFT, Chicago.

"ELIJAH SWIFT, San Francisco."

The intensity of the hatred which the Democrat cherished toward wild-cat currency is evinced in the following, which appeared in the issue of December 1, 1849:

"Private Banking.—We understand that before long we shall be blessed (?) with more home-made money. Among those who intend to issue bills we have heard mentioned: R. K. Swift (we have not learned the name of his bank), I. H. Burch, Esq. (Chicago Bank, we suppose), and J. Y. Scammon, Esq. (Chicago Marine & Fire Insurance Company). Glorious times, bye and bye, if paper money will make them."

The above brought the following response from Mr. Scammon, which was published December 8:

"BANKING OFFICE OF CHICAGO MARINE & FIRE INSURANCE COMPANY, December 1, 1849. To Editor of Democrat: In your paper of this morning I find my name as connected with this institution included among those who intend to issue bills. Permit me to say through the same medium that it is not my intention to issue bills or any other circulation. The object and design of the Board of Directors of this company are to establish a substantial and responsible marine insurance company, in which our citizens shall be interested, and which shall be chiefly owned and managed here. Besides the business of insurance, the company will receive money on deposit, and loan it and the capital of the institution, and it is our intention to organize a savings department, under such guarantees as will make it undoubtedly safe to depositors. Your obedient servant,

"J. YOUNG SCAMMON."

As further proof that the Chicago Marine & Fire Insurance Company did not intend to issue bills, the following, which appeared in the Democrat of December 6, 1849, is given:

"Chicago Marine & Fire Insurance Company.—At a meeting of the Board of Directors of the Chicago Marine & Fire Insurance Company, held November 26, 1849, the following resolutions were read and adopted:

"Resolved, That the business of this institution shall be divided into two general departments; one to be styled the Insurance Department, and the other the Deposit and Loan Department. The business of the first department shall be mainly confined for the present to marine insurance; that of the second to the receiving of money on deposit and the loaning of the same. The second department shall be subdivided into a general deposit department and a savings department.

"Resolved, That for the protection and security of all persons who shall make deposits in the savings department of this institution, it is hereby declared, and the company do hereby contract and agree that all such sums of money as shall be deposited in the savings department of this institution shall be held in trust for said depositors, and shall not be mingled with the general funds of the institution, but shall be kept, used and invested by this company as a distinct fund, the principal thereof belonging in equity to such depositors respectively, and not to the institution, so that, in no event, shall such funds be jeopardized by other transactions of this institution, this institution agreeing to return such deposits with interest, at the rate stipulated in the respective deposit books or certificates of deposit, but this institution and all its property and funds shall nevertheless be liable for the payment of such deposits.

"Resolved, That it is not the design or intention of this institution to exercise any doubtful powers, or to do any act not clearly within the limits of its charter.

"J. YOUNG SCAMMON, President.

"E. B. MCCAGG, Secretary."

In the same issue (December 6, 1849), appears the following advertisement:

"Exchange Bank. S. Bronson & Co., 60 Clark Street. Collections and remittances made on all parts of the United States. Deposit accounts kept. Lots and farms for sale. Drafts on New York at one per cent. Premium for currency."

"The subscribers are selling exchange on New York, Albany and Boston, for currency at one per cent premiums; for Eastern bills at one-half per cent premium. GEORGE SMITH & CO."

BANKING UNDER THE STATE LAW (1851 to 1861).—The period from 1843 to 1860 was one of marked growth in business and population, and it is not strange that acute financiers should have discovered that the deprivation of a local circulation was becoming each year, as business increased, an increasing loss to the State. In 1851, the business of the State, and especially of the northern part, of which Chicago had become the trade center, had so increased that a new banking law had become an imperative necessity. The irresponsible issues of individual bankers, however well secured, and the currency of banks outside the State were not considered adequate, safe or profitable, for the best business interests of the commonwealth. Accordingly in 1851, the Legislature passed a general law, under which legal banking was again established. The law was passed February 15, 1851, and amended February 10, 1853.

It was copied in its essential provisions after that of the State of New York, and is so generally familiar to the intelligent reader as to render it unnecessary to give it entire. The general provisions were as follows:

The State Auditor was authorized and required to cause to be printed and engraved, in the best manner to guard against counterfeiting such quantity of circulating notes, in similitude of bank notes, in blank of different denominations, not less than one dollar, as he might from time to time deem necessary to carry into effect the provisions of the act. These blank bills were to be countersigned and registered, and, when given out under the provisions of the law became the legal money of the State.

Any person or association of persons formed for the purpose of banking under the act were required to legally transfer to and deposit with the Auditor any portion of the public stock issued or to be issued by the United States or any State stocks on which full interest is annually paid, or the stocks of the State of Illinois—the State stocks to be valued at a rate twenty per centum less in value than the market price of such stocks to be estimated and governed by the average rate at which such stocks have been sold in the city of New York, within the previous six months preceding the time when such stocks may be left on deposit with the Auditor. The Auditor was forbidden to issue bills for banking purposes on the security of any State bonds, on which less than six per cent per annum was not regularly paid, except at least two dollars in such bonds, exclusive of interest, be deposited for one dollar of bills so issued.

At the valuation thus prescribed the corporators were entitled to receive a like amount of bills, which on being countersigned by the officers of the bank thus created, they were authorized to loan and circulate as money, such bills being made payable on demand, at the place of business, in the State, where the bank had been established.

In case any bank should fail to redeem its bills on presentation, and on formal complaint thereof, made in manner prescribed in the act, the said bank was to be restrained from doing further business and the securities deposited were to be applied first, to the redemption of the outstanding circulation, and the residue, if any should remain, to the payment of other liabilities of the bank.

Each stockholder was made individually liable in proportion to the full amount of capital stock owned by him. The banks were to be examined annually by a

board of commissioners, and a detailed report of the financial condition of each bank doing business under the act filed with the Auditor. Quarterly reports were also to be made by the officers of such banks to the Auditor.

The law was submitted to the people for ratification, at the fall election, and ratified. The vote in the State was: for the banking law, 37,578; against, 31,321. The majority in Cook County for the law was 2,332.

Pending the ratification of the law the Gem of the Prairie, November 15, 1851, said:

"Our local currency is now supplied by the following banks: The Wisconsin, Marine & Fire Insurance Company, the Chicago bank of I. H. Burch & Co., the city bank of Bradley & Curtiss, the Southwestern Plank Road Company, Macomb County Bank, Michigan, Oswego & State Line Plank Road Company, and the Illinois River Bank. The bills of these banks passed readily among us. They were called into existence by the necessities of the times, and, although everybody is dissatisfied with the establishment of money institutions in our midst, without the sanction and control of law, they have met the sanction and countenance of the community, and will continue to do so, unless it shall turn out that the State has adopted a general banking law. In that case, we apprehend that whatever banking institutions may be in Illinois must comply with the law, or their bills will be forced out of circulation."

In advocacy of a general banking law the Gem of the Prairie, October 26, 1851, said:

"Illinois is flooded with the issues of foreign banks. Our people pay several hundred thousand dollars for a currency, the whole of which goes to enrich private corporations of the Eastern States. The general banking law, on which we are to vote in a week or two provides securities far superior to those of a large majority of the banks whose issues go to make up our present currency, and it effectually guards against over issues. It will furnish us with a home currency to be kept under the control of laws of our own making, the interest of which will be retained in the State, augmenting the general wealth, instead of being carried off, thereby impoverishing our people to the tune of hundreds of thousands of dollars annually." * * * "Shall we have this or that? That is really the question before us. One or the other we must and will have."

Under the provisions of the act passed and ratified by the people, what was termed legal banking was again begun in Illinois. The first bank organized in Chicago was the Marine Bank. It filed its certificate of organization January 13, 1852. Its capital was at that time \$50,000, which was increased May 20 by an addition of \$500,000. Bonds were deposited, according to the Auditor's report, October 20, 1852, to secure a circulation of \$99,044. J. Y. Scammon was the president of the institution and Edward I. Tinkham its cashier. The first appearance of its bills was announced in the Democrat of April 21, 1852, as follows:

"MARINE BANK.—The bills of this bank, the first issue under the General Banking law, made their appearance on Saturday (April 17). The plate is a very fine one and will not be an easy one to counterfeit."

On the following day the Democrat described the bill as follows:

"We received yesterday in the course of business a \$5 bill of the Marine Bank. It is finely engraved, having for a vignette, the bust of that distinguished philosopher and theologian, Baron Swedenborg, with rays emanating therefrom, placed between two beautiful

women. The only thing we objected to in the bill is the embellishing it with ladies—emblems of innocence—as though there were anything innocent about banking institutions. The bills are secured by stock deposited with the Auditor.”

The Democrat of February 18, 1852, announced the organization of the Merchant's and Mechanic's Banks of Chicago.

“Banking House, No. 5, Clark Street; Levi D. Boone, president; Stephen Bronson, Jr., cashier.”

Messrs. I. H. Burch & Co., proprietors of the Chicago Bank, promptly legalized their institution. The Democrat, July 7, 1852, announced the fact:

“Messrs. I. H. Burch & Co., of the Chicago Bank have filed the necessary papers for the organization of their bank under the general law of the State, with a capital of \$1,000,000. Mr. Burch has done business in this city for a number of years, and earned an enviable reputation.”

October 9, the same paper said:

“The Chicago Bank is now in full operation, \$108,000 of State stock having been deposited with the Auditor as a basis of circulation. Additional deposits of stock will be made soon. The nominal capital is \$1,000,000. The following is the list of officers: Thomas Burch, president; Alfred Spink, vice-president; I. H. Burch, cashier.”

The Southwestern Plank Road Company filed the necessary papers with the Auditor to render it a legal bank, in the latter part of May, 1852, and was thereafter known as the Commercial Bank.

Messrs. Bradley & Curtiss started banking under the law in June. Their bank was known as the Chicago City Bank.

In May, Forrest Brothers & Co., opened a new banking house. On the announcement, the Democrat of May 6, 1852, says: “They have done business both in this and the old country, which will give them advantage on foreign exchange. Banks are now getting as thick as groceries in our city, and, as we are to have them, the more we have the greater the competition and the less the shave.” This banking house did business as the Union Bank. The Democrat of August 19 said concerning it: “A new bank is that of Forrest Brothers & Co., which commenced business with a capital of \$200,000. The gentlemen connected with this establishment have long been well known in this city. The stocks have been purchased, the company organized and they will proceed to business as soon as the notes can be engraved. The officers are: Andrew J. Brown, president, and Henry L. Forrest and Thomas L. Forrest, joint cashiers.

The Democrat of August 5, 1852, announced: “The old post-office building has been refitted by Dr. Davison, and is now occupied by Messrs. Davison & McCalla as a banking office, under the name of the Bank of Commerce.” The announcement in the same paper, October 7, 1852, shows that at that time, it was doing, or preparing to do, a legal business. It read as follows: “The Bank of Commerce is now organized under the general banking law, with a capital of \$600,000. A. W. Davison is president and T. McCalla, cashier.”

Chase Brothers & Co., advertised in the Democrat, December 25, 1852, that the Farmer's Bank, No. 100 Randolph Street, was opened and ready for business.

Foreign banking institutions also advertised offices of redemption in Chicago. The bills of the Bank of the City of Washington, D. C., were redeemed at 104 Randolph Street, “in current funds or bank

bills,” by S. Vrooms. The Mechanic's Bank, Georgetown, D. C., pledged a contingent Safety Fund of United States stock for the redemption of its bills. The Democrat of October 8, 1852, in which the above information appeared, said: The Mechanic's Bank, of Georgetown, comes into our market to compete with our bankers and brokers, in the fiscal transactions growing out of our large trade and commerce.”

Bills purporting to be issued by the Bank of America, Washington, D. C., were redeemed by George Smith, who had bought a controlling interest in the institution in April, 1852, and became its president. He organized a bank under the same name under the State law, July 19, 1852, depositing bonds sufficient for the redemption of a circulation of \$50,000. Between the two he floated a large circulation.

THE TRANSITION PERIOD.—As has already appeared the capitalists of Chicago who believed in legal banking were not slow to avail themselves of the benefits of the new law. During 1852, the following Chicago banks were organized:

Marine Bank, January 13, 1851, J. Y. Scammon, president; Edward I. Tinkham, cashier.

Merchants' and Mechanics' Bank, February, 1852, Levi D. Boone, president; Stephen Bronson, cashier.

Commercial Bank, successor to the Southwestern Plank Road Company.

The Bank of Commerce, papers filed in May, 1852; bonds deposited to secure circulation in October, A. W. Davison, president; T. McCalla, cashier.

City Bank, June, 1852, was a proprietary bank owned by the firm of Bradley & Curtiss.

Chicago Bank, July 1, 1852, was the successor to the banking business of I. H. Burch & Co.; president, Thomas Burch; cashier, I. H. Burch.

Union Bank, August, 1852, owned by Forrest Bros. & Co. Andrew J. Brown, president; Henry L. Forrest and Thomas L. Forrest, joint cashiers.

Bank of America, owned by George Smith & Co. (Elisha W. Willard being the co-partner), July 19, 1852.

Farmer's Bank, December 25, 1852, was established and organized by Messrs. Chase Bros. & Co.

At the beginning of 1853, the new city directory published, contained the names of the following persons and firms, at that time identified with the banking business of the city:

James M. Adsit, broker, 35 Clark Street.

George J. Brewer (Marine Bank), 37 Clark Street.

I. H. Burch & Co. (Chicago Bank), corner of Lake and Clark streets.

Chicago Marine and Fire Insurance Company, 37 Clark Street.

Chicago Bank, corner of Lake and Clark streets.

Marine Bank, 37 Clark Street.

City Bank, 24 Clark Street.

Bank of Commerce (Davison McCalla & Co.), 50 Clark Street.

Exchange Bank, (H. A. Tucker), corner of Lake and Clark streets.

Bank of Chicago* (Seth Paine & Co.).

Commercial Exchange Company, 66 Clark Street; David Gamble, with George Smith & Co.; Henry Greenbaum, at R. K. Swift's bank; Elbridge G. Hall, money loaner, 103 Lake Street; Jones & Patrick, bankers, 40 Clark Street; Alfred Spink, teller of Chicago Bank; Richard K. Swift, banker, corner of Lake and Clark Streets; George Smith & Co. (Wisconsin Marine & Fire Insurance Company, and Bank of America),

* The place of business does not appear in the directory. It was then known as Eddy's new building, adjoining the old post-office building on Clark Street.

bankers, 41 and 43 Clark Street; John K. Valentine, with George Smith & Co.

The year 1852, which witnessed the reestablishment of banking under the State laws of Illinois, was an exciting one in the annals of Chicago banking. It was soon discovered that, although a new and legal currency had been provided, it was not supplanting the well-established and largely-circulated bills issued by the Wisconsin Marine & Fire Insurance Company. "Smith's bills" were still plenty, and were current wherever known, as they were always kept at par with the money of other banks, and redeemable in gold at one per cent discount. Smith had grown rich and somewhat arrogant in his consciousness of financial strength. He continued to flaunt his bills in the face of the new banking law in a manner exasperating in the extreme to J. Young Scammon and other stanch and honest advocates of "legal banking" who had established banks in the city. It was not deemed prudent or practicable by the enemies of his bank to repeat the old-time attempts to ruin it by a run. He kept himself constantly fortified against aggressive moves in that line, and could have turned the tables on any bank or combination of bankers who should attempt it, in a way which it was not pleasant to contemplate. There existed, however, from the beginning a determination on the part of the banks doing business in good faith under the State law to drive the illegal issues out of circulation if possible. Meantime a state of armed neutrality prevailed.

Sometime in the early spring complaints became rife among the people at the current charge of one per cent for gold for bank bills. This was the rate which had been established by Mr. Smith, and it was found impracticable for the legal banks to redeem at par, while his money still circulated as currency, as theirs would be constantly returning for gold while Smith's would remain out performing the functions of money.

The following extracts from the Chicago Democrat, not partial to banks, whether legal or illegal, shows something of the public sentiment on the subject. On the 4th of May, 1852, it said:

"We understand that arrangements are now being made by all the banks in our city to bring up their notes to 100 cents to the dollar, instead of keeping them at 99 cents, where they have been for a long time. If all go into this operation, by exchanging notes every Saturday night, they have nothing to fear from each other. Some are afraid of the land sales about to take place in our city. But we think that land warrants will be used at them instead of specie and so this is no objection."

On the 6th of May it said:

"The people are becoming very much excited upon the subject of the banks not redeeming in specie. We have talked with our bankers upon this subject. Each alone says there ought to be specie payment, but each is afraid of his rivals. Each is afraid that if he pays specie some of his rivals will make a run upon him. There is some plausibility in these pleas, but there is a way to obviate them all. Let there be a common day to all. Let our Board of Trade take hold of this matter. Let there be a committee appointed to see all the banks in the city and make an amicable arrangement whereby all the banks shall commence paying by June 1, or at farthest by July 1. Our Legislature ought to take hold of this subject, as it is clearly embraced within the terms of the Governor's proclamation; and it is in their power to stop all illegal banking. The Marine Bank is paying specie now, and several of the other bankers have authorized us to say that they are ready and willing to begin whenever a day shall be agreed upon."

From the Democrat of May 24:

"We have conversed with the most of our bankers upon the subject (of paying specie) and they have all said that they would pay specie the moment Mr. Smith did; that they could not pay specie unless he did, for it was in his power to ruin them. Mr. Smith is now here, and is willing to make any arrangement that will give him an equal chance with the other banks, but any arrangement

made must be adhered to in good faith and strictly adhered to by every one. A combination of merchants, to deposit with no one who issues bills not equivalent to specie or to New York exchange at one-half per cent premium, is on foot and should be resorted to. The Chicago & Galena Railroad and canal trustees have the matter under advisement of taking no bills not equal to specie here. If our bankers have no respect for themselves; if they do not value their own notes at par, it is time they were taught to do so. A people are not free whilst they submit to have a currency that those who issue it at par will not take back at par. Our Legislature is soon to convene, when a stringent law against present abuses should be passed, and there should be no law to collect a note given for such stuff as we are having now for money."

From the foregoing extracts it appears that at that time Mr. Smith, with his illegal issue, was master of the situation, and, with the exception of the Marine Bank, could dictate terms to the legal banks of the city. The proposed arrangement with him fell through. To establish a clearing-house, as was proposed, and exchange bills, would have been in defiance of the very law under which the other banks had been organized.

As the banking law seemed inadequate to drive out of circulation Smith's certificates of deposit, some of the banks decided to avail themselves of the advantages of this system of banking as well as their own, and thus reap the advantage of a larger circulation than was authorized under the law. How many banks entered into this double-headed system of banking, or the amount of their issues cannot now be ascertained.

The Merchants' & Mechanics' Bank did quite a thriving business. The Democrat, August 20, 1852, stated that there were counterfeits of the bank afloat, and warned its readers to take no bills not countersigned by the register, John Neal. In the issue of the next day, the president of the bank, L. D. Boone, replied that there were no counterfeits on his bank, and that he supposed the bill alluded to as a counterfeit was "a certificate of deposit, which the bank was prepared to redeem at any time." An indignant citizen, in answer to Mr. Boone's avowal, wrote that "these certificates, in arrangements, vignettes, figures, and stamps are well calculated to deceive the unfortunate receiver. Such an issue is void, because unauthorized by law, and worthless because the illegal acts of the officers cannot bind the stockholders." The editor added: "If the banking law of Illinois is worth anything, it is in compelling those who issue a paper currency to put up some sort of security to the bill holder with the Auditor."

In the Democrat, September 3, 1852, appeared the following:

"'Damn Shinplasters.'—Excuse us, dear reader—we are in bad humor. We cannot see deception substituted for fair dealing so long as open honesty is the only sure road to success. The Merchants' & Mechanics' Bank of Chicago has issued a shinplaster exactly like their notes which are secured as the law requires. The Western papers call it a "dangerous counterfeit." 'Tis worse, 'tis a device, a deception, a fraud, and the only way to avoid it is to refuse all notes on the Merchants' & Mechanics' Bank of Chicago. We have quoted it a doubtful (D. D.) and dashed it on our list, and so long as the safety of our readers requires this course we will pursue it."

"The above, from Thompson's Bank Note Reporter is plain talk. We insert it, not so much to injure this one bank in particular, but because others of our city banks are going into the same operation. The thing ought to be stopped at once. Under our new banking law the bill holder is secured, but there is no security for the depositor. So people who prefer security to no security will hereafter take the legal countersigned bills, instead of the illegal certificates of deposit."

By September 1, an irrepressible conflict had been worked up between the legal and illegal bank interests. At about this date a new element of financial disturbance was added. All banking in Chicago had, whether legal or illegal, been heretofore conducted on worldly principles and for the object, more or less sordid, of

worldly gain. A new departure in the business was inaugurated by Seth Paine & Co.

The senior partner, Seth Paine, was a native of New England, and, when a young man, came West. He left Montpelier, Vt., in April, 1834, in company with Chester Smith, who was at that time an Illinois merchant, being a partner of a Mr. Goss at Walker's Grove, now Plainfield. He traveled with him on his western journey by stage, canal and schooner as far as Detroit, where they separated, Smith going through to Chicago by stage, and Paine taking the longer but less expensive route in the schooner "Commerce," by way of the lake. It took his last dollar to pay his deck passage to Chicago, where he arrived after a rough voyage of twelve days, with no capital except health, strength, and a most earnest endeavor to do his work in life according to his eccentric views of right. He was tall and straight. He had a frank, open countenance, and a pleasing and prepossessing address. His conversational powers were excellent, and as a public speaker he was far above mediocrity. He was good humored, and made friends rapidly. He hired out with the firm of Taylor, Breese & Co., and was for a time a partner. Subsequently he entered into a copartnership with Theron Norton, under the firm name of Paine & Norton. They did a fairly successful business for several years. Paine sold out to Norton July 1, 1842, and retired from mercantile business in Chicago. He was married in Chicago on Thursday evening, August 25, 1837, to Mrs. Francis Jones, eldest daughter of Major Whitlock. Paine was always a rabid and uncompromising Abolitionist, and, subsequent to the dissolution of the firm of Paine & Norton, became a convert to the socialistic theories of Fourier, went into Lake County, where he bought a large farm, christened the place "Lake Zurich," and in company with other kindred reformers attempted to carry into practice the socialistic theories he had accepted. How well or poorly he succeeded is not known. It is certain, however, that the enterprise did not prove ruinous nor so discouraging to him as to break his faith in the Fourierite doctrines. He was also for a time a heavy owner and one of the managers of the Illinois River Bank, an unchartered bank at LaSalle, Ill. On the first appearance of what are now termed "spiritual manifestations," in the form of rappings or knockings at Rochester, N. Y., through the mediumship of the Fox girls, he became deeply interested in the phenomena, and soon after became an ardent convert and earnest advocate and believer in modern spiritualism—so ardent and earnest as to render him a credulous victim of the many designing mountebanks who attached themselves to that much abused and little understood philosophy. The character of Paine was naturally radical, and molded and fashioned by the many utopias he had embraced, could but impel him to the adoption of modes and methods of action quite at variance with those prevailing, in whatever he might undertake. To his vision the affairs of this world were badly out of joint. They were sadly in need of re-organization, and it required Seth Paine to adjust things properly. So he left "Lake Zurich" and his farm, and returned to Chicago to teach his old friends and the world at large how banking could be carried on in accordance with what he deemed a higher law than the banking law of Illinois—the law of humanity.

THE BANK OF THE CITY OF CHICAGO.—The firm of Seth Paine & Co. was formed early in August, 1852. The following announcement appeared in the Democrat of August 10: "Seth Paine & Co. are about to open a

banking and exchange office in Eddy's new building, adjoining the old post-office, on Clark Street." The firm was composed of Seth Paine, who put in about \$1,100, and Ira B. Eddy, who put in something over \$4,000. The capital stock of the concern never exceeded \$6,000, although it was believed that it was backed by capitalists of some strength and character, and at the start it had such financial standing as to obtain quite a number of depositors.

By the middle of October, the bank was opened for business, as appears by the following notice in the weekly Democrat of October 18: "The Bank of Chicago has determined upon issuing certificates of deposit, and issues are now out, which for artistic skill and beauty of finish are not exceeded by any bills we have seen. On the right of the ones is a beautifully executed portrait of Senator Douglas, engraved by the well-known Tappan, Carpenter, Cassilear & Co. On the right of the twos is Washington crossing the Delaware, and on the threes a fine portrait of Henry Clay. Mr. Paine, who is at the head of the banking house of Seth Paine & Co., is president and W. T. Muier is cashier."

So soon as the bank commenced business it was apparent that Paine's theory of banking was as unique as were his other theories, and, if carried out, would be equally subversive of the interests of both legal and illegal banking; indeed, it was his idea to work as radical a change in banking, as he believed would come to society as a whole by the adoption of the theories of Fourier.

The prospectus of the bank, written by Paine himself, gives the high moral grounds on which the bank was to be conducted. It read as follows:

"BANK OF CHICAGO.

"PAINE, BROS. & CO.

"Rates of discount according to time and circumstances—six per cent being the highest.

"We loan to no one to pay debts.

"We loan to no one to aid in murder of anything which has life.

"We loan to no man to aid in speculating in that which is necessary to life.

"We loan nothing on real estate—believing that real estate cannot be bought and sold; and that possession with use, is the only title.

"We loan nothing to aid in making or selling intoxicating liquors, or tobacco in any of its forms.

"We loan nothing to gamblers or usurers who borrow to loan again.

"We loan nothing except for aiding the natural exchange between the producer and consumer, whether of body, soul or spirit—and for the time necessary to produce the exchange.

"Our basis for making loans is the established character of the borrower. He must be a temperate, honest and religious man or woman, with a mind sufficiently developed to understand his business. We are prepared to loan any amount needed for such business by such men. Our money corresponds in commerce, to the blood in the human system. It is the circulating medium. When money is used for the purposes of slaughter and shedding of blood, it makes the blood run cold; and it stagnates, and ceases to be healthy, and does not circulate freely, and finally ends in death.

"When used by any of the other classes excluded, it also ends in death. We want no business done which is death to the human body, or hell to the soul; and we would as soon furnish a rope to our brother for hanging himself, as the money to buy it with. We would as soon kill ourselves, as lend our money to aid in killing. We would as soon drink ourselves, as lend our money to drunkards. We would as soon take high rates of interest, as loan the usurer facilities to do the same thing. We would as soon take the life of our brother, as lend our aid to speculators in the bread of life, who may starve him into a living death, while they permit not the prayer for desolution. All has its foundation in Hate; and 'He that hateth his brother is a murderer!'—We will no longer murder!"

"His established rate of interest was not to exceed

six per cent per annum. He proposed to loan his certificates on satisfactory security, for three-fourths of the amount, and an even exchange of the other one-fourth in current bank notes (such as the certificates were payable in) with the agreement on the part of the borrower that as often as one-tenth of the amount borrowed was returned for redemption, he should take them again, giving in exchange current bank notes. The plan, in other terms, was to make each borrower a sort of fiscal agent of the bank, pledged to keep in circulation or redeem so much of the money as he had borrowed and put in circulation. Had the people given Seth Paine their confidence and supported in as full measure as did the people of the Loyal States the Government during the war, and had Seth Paine's fiat money been

quarters of as ardent a set of Spiritualists as could be found in the country. Both Paine and Eddy, his moneyed partner, were bright and shining lights of this Spiritual Church, and prominent and loud exhorters at the frequent meetings held over the bank. It was not long before the bank became so identified with the spiritualistic views of the proprietors as to be inseparable in the minds of the outside community.

January 1, 1853, Mr. Paine issued the first number of a paper styled the Christian Banker. The articles were somewhat incoherent, abounded in wit and sarcasm, and so intermingled spiritualism, banking, and anti-monopoly, that it is no wonder many believed Paine had gone stark mad. In addition to his polemical articles, he was bitterly personal, and in his efforts

FAC-SIMILE OF SETH PAINE'S THREE DOLLAR BILL.

backed by a power co-equal to that of the General Government: and had Paine possessed the power, as did the Government to put out of circulation all other issues save his own, his money would have proved as good as greenbacks. Unhappily for Paine, none of these conditions indispensable to success as a fiat-money manufacturer were vouchsafed to him.

For a few weeks after it was opened for business, the bank did a quiet and unostentatious business with a class of very respectable citizens, who believed in the applications of moral principles to banking, as inculcated in Paine's manifesto, and who were not sufficiently practical to foresee the obstacles to be encountered in establishing the institution in a not over moral community, made up largely of men who drank spirituous liquors, smoked and chewed tobacco, butchered cattle and hogs, and ate the meat, speculated in bread stuffs and other articles of food, bought, sold, mortgaged and owned land, loaned money at over six per cent, and otherwise brought contempt upon the code of morals on which the bank had been set up.

Perhaps Paine's overweening confidence and often ill-timed advocacy of the many vagaries which he cherished, and which in a most illogical manner he managed to attach to, or mingle with his banking business, had something to do with precipitating the calamities that befell the institution.

Over the bank was "Harmony Hall," the head-

to pull down the strongholds of sin, spared none who stood in the way. The articles became more vituperative with each succeeding issue, as increasing outside annoyance gave fresh cause, from his view, for righteous

Seth Paine

indignation. As showing the mental condition of Paine at this period in his banking career, and as relics of the time, quite copious extracts from the Christian Banker, Vol. 1. No. 4, date January 29, 1853, are here given.

Extracts from the Christian Banker:

"*Our Pulpit.*—We preach daily (Sunday excepted, when we talk, as the spirit moves, in Harmony Hall, at half-past ten in the morning and seven in the evening) in the Bank of Chicago. Our hearers give increasing evidence of hope within thir souls, and go forth as radiators of new light. If a cigar-smoker or a rum-sucker, or hog-eater comes in (for there are such men in Chicago yet), who not only have so little respect for themselves, but actually intrude such offensive influence before us as would make a dog puke; we refuse to do business with them, but send them right over to Swift, who smokes to drown conscience, which has been violated so long by huge shaves of his fellow-men, that

the hair has all come off over that organ.—See Eddy on phrenological bumps. There all smokers can find sympathy.

“Our pulpit brings faith and works together. Ignorance supposes we would loan our bills for the sake of money. But intelligence radiates from our pulpit, and permeates their addled brains as far as wholesome truth can reach a tobacco bloat or a sucker of rum, and tells them that our faith is true, and they can't borrow for love or money. Some come in to exchange our bills for something which our addle-headed bankers take on deposit, (they take nothing which goes out at less than ten per cent)—that being their standard of both faith and dumplings. Well, Illinois River bills are bankable, and why should they not be? Taylor is interested in him, especially in this crisis, for they regard him as a great manager.

“So we give them bankable bills—Illinois River bills. Our bills are signed by Seth Paine, president, and are issued in pursuance of law. Those bills are signed by Seth Paine, treasurer of the Salisbury Plank Road, which was never built or intended to be—and my responsibility passed from the concern long ago. Churchill Coffing was president, but he, too, has sold out, and we both know there has been no responsibility there since. Taylor & Gurnee make a newspaper advertisement saying that they are responsible—but this amounts to nothing—they are not legally holden, and they have no moral responsibility—and if they had both, they are unable to pay their own debts, much less to give responsibility for several hundred thousand dollars, which they have loaned to themselves and others, and which they never intend to pay. This trash is bankable, and so Seth Paine, plank-road treasurer, goes for his subsequent issues. This shows the need of our pulpit—the need of light. * * * From present indications preaching is still needed. So bring on your bills for redemption, and when objection is made to the various trash paid out by Tucker, Burch, Smith and other chaps here, we will open our mouth or the Lord will open the mouth of Balaam's Ass to keep you from being shaved twelve per cent by the Great Mogul and his undertrappers, who, next to R. K., pursue the people with swiftest destruction, and keep you trotting over here with bills for redemption, till you wear out more shoe leather than Jo. Kenyon's whole stock amounts to—all because you don't know any better than to keep your accounts with men who throw us out because we reduce rates.”

In an article on taxation the editor says:

“In our first number, I said we would pay no more taxes—and on that lovely spot at Lake Zurich, the Lord of Hosts and the devotees of Mammon shall measure swords, and test the right of a set of vampires to prey upon my substance.

“We well considered what we said, and we have been greatly strengthened in our convictions since that time. We say that man has an inalienable right to as much soil as he can occupy and cultivate; that he cannot acquire any title to more, nor be restricted in his title to less. Any attempt to acquire more is as great a crime as to submit your right to less.

“It was a great crime in the Jews to crucify Jesus, yet no greater than for a man to attempt holding this earth by a parchment claim. * *

“I claim the right to my land by the right of nature. God gave it to me, and I say to those who claim it, ‘show me the title superior to God.’ If I have a right to the soil I have to my sinews, and the turnips which those sinews and God's rains and sunshine produce.

They are either God's or mine. If God's, levy your taxes on Him, take the turnips if you dare, for taxes or anything else. If they are mine, take them if you can.”

The opening paragraph of a lengthy article on “Spiritualism,” shows that Paine believed that the directors of his bank were not all taxpayers or property owners in Chicago. It read:

“The subject (Spiritualism) may hardly seem appropriate in even the ‘Christian Banker,’ but when men come to an understanding of the truth as it is in Jesus, they will see clearly that it is appropriate and necessary. When men come to know of the connection and exchanges between mind and matter, surely they will not wonder that we have sustained our position against the entire moneyed hosts, and in the face of falsehood, detraction, Grand Juries, corrupted Judges and bribed lawyers. No, if the dark minds of Clark-street bankers were open to the knowledge of our minds, and the hosts of God who are managing this whole matter, and could only be made aware how little and how dark their point of vision, they would no more think of contending against us than of an attempt to dethrone Almighty God.

“We have not only direct communication with God, but we are surrounded by the mightiest intellects who have swayed this world and this country. Thus armed, it is not us, but God, against whom you fight. We have no feeling or war against any banker in this city. We regard every one a brother, and would rather do him good than anything else, but our course is rendered necessary by the false attitude they assume and the false position in which they have placed themselves. The scourges which we have and shall inflict, are all for their present and eternal good, and the moment they assume a true and teachable position, we shall show them this by impressions which will be made by the spirits upon their own minds. But they must let reason and charity, not passion and avarice, be their guiding star.”

The prospects of “Union Stores” was discussed thus:

“Be patient, brothers. The good time is close at hand. Lying, cheating and stealing, as competition needs and cannot live without, shall give place to truth, love, and honesty. We will soon have the matter in hand. You selfish fellows may as well wind up before we administer on your estates.”

Following are extracts from his “Market Reports”:

“We commence our market report this week, and it will be seen there is a strange coincidence between the high prices of pork and preaching, money and falsehood, and the great difference between theory and practice, talk and work, intelligence and ignorance, priest and people, saint and sinner, shaver and shaved, gouger and gouged, banker and customer, dancer and fiddler, twelve per cent and upwards and six per cent and downwards, man and hogs, God and the Devil, Christian bankers and Christian shoemakers,* the Chicago Press and common honesty, the higher law and the lower law, and many articles offered in Chicago at the board of brokers, and in the higher and more spiritual circles, at the board of robbers, which public sentiment tolerates and keeps in being, while it will be seen that in proportion to the rise in steeples has been the fall in morals.

“There has been but little Christianity in market, and much that is offered is of the scurvy order. This kind, however, bears a much better price than the more

* Under this name a paper was issued a few weeks as a travesty on Paine's “Christian Banker.”

perfect, as the tastes of consumers have been destroyed by rum and smoke, until their heads and hams are in a perfect pickle.

"Christianity being the purest and scarcest metal, like gold among bankers, we take it for our standard; and everything and everybody which does not come up to that standard, we quote below par, until they reach the point where neither zero nor Nero can measure them.

"In money of the outer circles, we place the Bank of Chicago at par.

"Bills received on deposit so long as they keep good credit.

"Commercial Bank, I. Cook.

"Union Bank, Forrest Bros. & Co.

"Bank of Commerce, Davisson, McCalla & Co.

"Bank of America, Smith & Willard—Don't mistake this kitten of Illinois, for the old cat at Washington, lest you get your eyes scratched out by mother of frauds. Reject this as you would the small-pox. It was gotten up to bolster Wisconsin, but will be the fruitful source of speedy dissolution to the whole brood of cats, both wild and tame—regular and irregular.

"Merchants and Mechanics' Bank, Boone & Bronson.

"Chicago Bank: not the Chicago Bank of I. H. Burch, or a shinplaster of Little Falls in the State of New York. This was conceived in iniquity, and went forth a fraud—a draft upon somebody not accepted, payable at some place, without legal identity.

"Exchange Bank, H. A. Tucker & Co. This concern exists only in name, and exists only as the nurse of unfledged goslings hatched from rotten eggs, by the Macomb County goose at Mt. Clemens, the issues of which, like Smith's fraud at Washington, are not taken on deposit by us, any more than those Illinois River issues, which are sustained in being by the same system of 'Kiting.'

"City Bank—This bank is said to be on its last legs, and the Penn Yan attachment which floods the country and which has been driven to protest by us again and again, will not be worth half price in a very short time. Depositors in this like those of Smith, are daily losing confidence, and the day of its doom is written. For some time past, they have shinned about for even shinplasters, to meet their returning circulation, and have deposited their best securities with different bankers, leaving their remaining circulation without foundation. We don't think they can keep open doors one week longer."

Sufficient has been quoted to show that the editor of the Christian Banker was not disposed to "turn the other cheek" when he was smitten, and that he did not propose to give up his cloak nor even his coat without a vigorous fight. By his indiscriminate attacks on every body and everything, outside his own circle, he alienated the common sympathy which otherwise would have been bestowed upon him. He became the Ishmael among Chicago bankers, whose hand was against all others, and against whom every other banker's hand was raised. During the month of January, 1853, Paine's bank was constantly called upon to redeem every bill which came into the possession of rival banks. The circulation at its highest did not exceed four thousand dollars, yet this small amount kept Paine quite busy, as through the machinations of his rivals and enemies, it seemed to find its way back to his bank for redemption as fast as it could be paid out, and the circulation thus became a source of constant annoyance to him instead of proving, as he had hoped, a source of profit to himself and a bless-

ing to the community. In his tribulation, he looked to the departed spirits of illustrious bankers for counsel. It was given through a Mrs. Herrick, a speaking and trance medium, who, at that time presided as "high priestess" over the Spiritual Church in Harmony Hall. She, or rather Alexander Hamilton, through her, advised Paine and Eddy what course to pursue, and, in order to give specific advice on the daily and hourly emergencies as they might arise, the High Priestess came down from the altar and was installed behind the counter of the bank, as a spiritual director. She told them for whom to redeem, and who were to be denied. No smokers, drinkers nor bankers were to be paid. Women, children, negroes and spiritual minded men were to be served first. So soon as it became known that the bank was being thus conducted, on petition of Ira B. Eddy's friends, he was brought before Judge Skinner, and on hearing of testimony, a commission of lunacy was granted and he was declared incapable of managing his business affairs. An injunction was served in order to protect and preserve Mr. Eddy's interest in the bank. By the commission of lunacy Devotion C. Eddy was appointed conservator of the estate of Ira B. Eddy, and John W. Holmes, book-keeper. As soon as this became known there was excitement without and within the bank. The holders of the bills began to flock in crowds to the bank, where Mr. Paine and the priestess were installed behind the counter grimly awaiting the assault of their enemies. Most of the bills were redeemed, but occasionally a man came up whom for spiritual reasons the priestess spurned. Such persons were collared by the husband of the priestess and one or two other stalwart Spiritualists who acted as door-keepers, and incontinently hustled out. Judge Hoard was thus tumbled, and Ezra L. Sherman, after a smart tussle with the spiritual police, came out in a dishevelled and flurried condition. The worthy Colonel (then Captain) James R. Hugunin made a wager at Swift's bank (cigars for the crowd) that he could go over to the bank, being a friend of Seth, and get his bills redeemed. He took \$35, and walked confidently across the street into the bank, and up to the counter, where he affably presented his bills for redemption. Paine looked favorably upon his case and would have redeemed on the spot, but the spirit of Alexander Hamilton looked sternly out of the eyes of Mrs. Herrick, and out of her mouth his words came in startling cadence. "Never! get out!!" "Then give me back my money," said the mild-mannered Captain; "Never! get out!!" again quote the priestess, and forthwith the Captain was hastily leaving the bank, wildly clawing the air as he proceeded toward the sidewalk, and the bank door was slammed, not exactly in his face. A moment after it was reopened, Seth appeared and gave to the shaken-up Captain the bills, and he returned to his friends at Swift's. "What luck, Captain?" cried the crowd. "Good!" "What kind of bills did Paine give you?" "The very same I carried over, and I was deuced lucky to get them. I think I can afford to pay the cigars."

Things culminated at the bank on the following day, February 11, when the conservator of Eddy's estate undertook to get possession of the bank. Ira P. threatened to shoot, and the priestess refused to abdicate in favor of Holmes the book-keeper, whom the court had appointed. On complaint of Holmes, for attempt to intimidate by personal violence, the whole corps of the bank, including mediums and spiritual friends, were arrested and brought before Judge Rucker. The trial resulted in the discharge of two or three, and the binding over in \$500, to keep the peace,

of all others except the high priestess. During the trial she became unduly demonstrative, and was taken to jail, resisting the officers on her way quite stubbornly. She was held in durance vile until the storm was over. Ira B. Eddy was for a short time in the Hartford Insane Asylum, but was soon liberated on petition of many respectable citizens who had known him long and well, and who had doubted from the beginning the means by which his committal had been brought about, as well as the alleged fact of his insanity.

The Bank of Chicago was, by the removal of Eddy's deposits, crippled to that extent that it never rallied sufficiently afterward to be even a disturbing factor in the finances of the city. So far as is known, every bill was redeemed and every indebtedness of the bank honorably paid, either by Paine, Eddy, or the conservators of Eddy's estate. The bank, eccentric as it was, was not, as were many of its contemporaries, buried either in dishonor or insolvency.

Paine continued to protest through his Christian Banker, and other channels, until summer had come, when he returned to Lake Zurich, where he lived several years indulging in his vagaries in a harmless manner. His theories and plans, however they may have occasionally brought discredit to his head as a well-balanced motive power, were ever creditable to his heart. Among his large-hearted enterprises, which he started after his banking experiment had come to grief, was a school on his farm. He named it the Stable of Humanity. He returned to Chicago in 1868, and organized a "Woman's Home." The object of the institution was to better the condition of that class of women who, having no homes, are forced to take such accommodation as the ordinary city boarding-house afforded. The Woman's Home was to be so conducted as to give to friendless women the comfort and protection of a home at a moderate price. Paine managed the "Home" for several years. It was located at the corner of Jackson and Halsted streets, where the Farwell House now is. Mr. Paine died in Chicago in 1871.

THE BANK WAR.—The collapse of Paine's bank did not end, but rather intensified the antagonism between the legal and the illegal bankers. Indeed, the war had been carried on unceasingly all through the period covered by the preceding history of Paine's raid on both camps.

December 23, 1852, the Grand Jury found bills of indictment for carrying on a banking business in violation of the laws of the State, against the following persons: Henry T. Adams and Charles L. Chase, of the Farmer's Bank; Seth Paine and W. T. Maier, Bank of Chicago; L. D. Boone and S. Bronson, Merchants' and Mechanics' Bank; Thomas McCalla, Bank of Commerce; J. R. Valentine, cashier of the Bank of America; and George Smith and E. W. Willard, Wisconsin Marine & Fire Insurance Company. The following allusions to the matter are taken from the Chicago Democrat of December 25, 1852:

"*Bank War.*—The regular banks have succeeded in getting about a dozen of the irregular banks indicted. Those interested in the irregular ones are going to swear away the suit from Cook County because both the Judges are stockholders in the bank whose head man * was mainly instrumental in getting up the crusade against the irregular ones. Meanwhile the irregular ones are demanding specie as fast as they can get bills to demand it upon. But the joke is, many of our regular banks

are irregular ones too, and keep some old corporation or some old name to get extra shinplasters under or extra interest with. Thus they carry water upon both shoulders. The Spiritual Bank, so called, is believed to be backed by some of the wealthiest bankers in our city. At any rate it has good references, as see the card of Seth Paine & Co. under our advertising head. Let this bank fight go on until banks like individuals shall be made to obey the laws in every respect, in taking interest as well as issuing bills."

On the 1st of January, 1853, the Democrat said:

"Yesterday, all through the streets there was more excitement against the irregular banks than we ever knew before, and the irregular banks were searching in every direction for the bills of the regular banks so as to demand the specie. It is hard now to get hold of a regular bill. Great inquiry was made to know why some irregular banks were indicted and some not. We have inquired of the jury, and find that while their intentions were good they could not get the requisite information against some, whilst certain of the regular bankers were over anxious to furnish information against others, the complainants being as prompt in withholding information against some as they were to furnish information against others. The fact speaks volumes, that the wild-cats who have regular bankers for dormant partners were not indicted."

All was not harmonious even in the regular camp. There was bickering and heart-burning, and crimination also there, as is evinced by the following which appeared in the Democrat, January 1, under the caption of "Bank Reform:"

"See cards of Messrs. I. H. Burch & Co., Forrest Bros & Co., R. K. Swift and others in our columns (the cards do not appear in the issue). We are informed that these gentlemen and several others of the regular banks in our city are ready to live up to the general banking law as to rates of interest, the moment another of the regular banks which abuses its own charter by resorting to an old insurance company * to protect itself in a gross violation of the letter and spirit of the General banking law, will loan to its customers as it does to that insurance company."

The suits brought under the indictments amounted to but little. There is no record that anybody was ever punished for a violation of the law. Some of the irregular or illegal banks went out of existence because of their inherent weakness, and others, having financial strength, took refuge under the statutes of Illinois, Wisconsin and other States. Under the indictments, it was found that the end was likely to be too far from the beginning, and that pending the decision of the Superior Courts, to which every case would be carried, illegal banking would go on as before. So the regular bankers, headed by Hon. J. Y. Scammon of the Marine Bank, determined to put an end to it by amending the banking law, so that it should not only authorize banks, but should prohibit under penalty, the prosecution of any banking business in the State which should interfere with the franchises granted to the regular banks under the banking law already passed. Accordingly the Legislature passed a prohibitory law against illegal banking, and supplementary to the banking law of 1851, whereby it was made little less than felony to do a banking business within the State, except under the provisions of the statutes. The law read as follows:

* The Chicago Marine & Fire Insurance Company had been revived and was virtually under the same management as the Marine Bank. It was charged that the bank lent the insurance company at legal rates and that the insurance company put out the same money for its benefit at illegal rates.

* Hon. J. Young Scammon, president of the Marine Bank.

An Act supplemental to and explanatory of an act entitled "An act to establish a general system of banking," and to prevent the issuing and circulating of illegal currency.

SECTION 1. Be it enacted by the people of the State of Illinois represented in the General Assembly, That the act to which this is supplementary shall be so construed that no person or persons shall become incorporated under the said act, until he, she or they shall have deposited with the Auditor United States or State stocks, as required by said act, so that the capital stock of said incorporation shall amount, in such United States stocks or State stocks, at the rate and value fixed by said act, to the sum of fifty thousand dollars; and at no period during the existence of said bank shall the capital stock of the same, in stocks deposited as aforesaid, be less than the sum of fifty thousand dollars.

2. No bank, banking association, corporation, broker, banker, dealer in money, produce or foreign merchandise, or other person, shall emit, issue, utter, pay out, pass or receive in payment, or on deposit, any bill of credit, bond, promissory note, written instrument, or instrument partly written and partly printed, to be used as a general circulating medium, or in lieu of money, or other currency or intended by the makers thereof to be so used, other than the bills or notes of banks of this State, counter-signed in the Auditor's office, according to the provisions of the act to establish a general system of banking, or the notes or bills (of a denomination not less than five dollars), of specie paying banks, created by an express authority of law, in either of the United States, Territories, the District of Columbia or Canada. Every bank, banking association, corporation, broker, dealer in money, produce or foreign merchandise, or other person, who shall violate the provisions of this section, shall forfeit and pay to any person or persons, who may sue for the same, the sum of fifty dollars for each and every bill of credit, bond, promissory note, bill of exchange, order, draft, certificate of deposit, or other instrument so issued, uttered, paid out, passed or received, contrary to the provisions of this section, to be recovered in action of debt, before any justice, magistrate or court having jurisdiction to the amount claimed in any such suit.

3. In addition to the penalties provided for in the foregoing section, every broker, banker, dealer in money, produce or foreign merchandise, and every officer, agent or employé, of any bank, banking association, corporation, broker, banker, dealer in money, produce or foreign merchandise, who shall offend against the provisions of this act, shall, for every bill, bond, note, order, certificate of deposit, or other instrument or piece of paper emitted, issued, uttered, paid out, passed or received contrary to the provisions of this act, be liable to be indicted, and, on conviction, shall be imprisoned in the county jail not more than one year. It shall not be necessary in any indictment, suit or prosecution, under the provisions of this act, to specify or particularize any particular bill, note, bond, order, certificate of deposit, or other instrument, but it shall be sufficient to allege generally that the defendant or defendants have been guilty of violating the provisions of this act, by uttering, emitting, paying out, passing or receiving, as the case may be, any such bill, note, bond, order, certificate of deposit, or other instrument, of the character or description which, by this act, are forbidden, or prohibited to be issued, passed or received, and proof of such general nature shall be sufficient to sustain such indictment, suit or prosecution.

4. Whenever it shall be represented to any one of the bank commissioners, upon the oath or affirmation of any credible person, setting forth the facts, or whenever, from any information, any one of the said commissioners shall have reason to believe that any bank, corporation, broker, banker, dealer in money, produce or foreign merchandise, shall have been guilty of any violations of the provisions of this act, it shall be the duty of said commissioner forthwith to proceed to the said bank, or place of business of such bank, corporation, broker, banker, dealer in money, produce, or foreign merchandise, officer, clerk, agent or employé, and then and there to inquire, by the oaths of the said broker, banker, dealer, officer, clerk, agent or employé, or other testimony, whether the said bank corporation, broker, banker, dealer in money, produce, or foreign merchandise, officer, clerk, agent or employé, have been guilty of any violation of this act. The said bank commissioner shall have full power and authority to issue subpoenas and attachments to compel the attendance of witnesses before him, from any part of the State, and shall have power and authority to administer all oaths and affirmations to parties, witnesses, or others, required to be administered or taken by this act; and shall have power to compel such broker, banker, dealer in money, produce, or foreign merchandise, or any officer, clerk, agent, or other employé, to answer all proper interrogatories propounded to him, her or them, touching any violation of the provisions of this act, and may commit any such person to jail, for refusal so to do, there to remain until such party consents to answer such interrogatory, or is otherwise discharged by due course

of law. He shall reduce the said evidence and answers to writing and report the same to the other bank commissioners and also to the State's Attorney for the judicial court in which the said bank, or other corporation, or the place of business of any such broker, banker, dealer, officer, clerk, agent, or other employé, may be situated. And if the said commissioner shall be of the opinion that any such banker, broker, dealer, officer, agent, or employé has been guilty of any violation of the provisions of this act, he shall make complaint before some judge, justice of the peace, or other proper officer, and the said judge, justice of the peace, or other officer shall proceed against the person or persons named in said complaint in all respects, as provided by the eighteenth division of chapter thirty of Revised Statutes, entitled "Criminal Jurisprudence;" and, for the purpose of compelling the witnesses to attend, may issue subpoenas and attachments to any part of the State: Provided, that no answer made by any broker, banker, dealer in money, produce or foreign merchandise, officer, clerk, agent, or employé, or any other person, upon any examination, made by or before any bank commissioner, judge, justice of the peace, or other officer, touching any violation of this act, shall be given in evidence against him, her, or them, on the trial of any indictment, suit or prosecution, for the recovery of any penalty of forfeiture imposed or provided for by this act, or in any other writ or legal proceeding whatsoever.

5. In case the bank commissioners, or a majority of them, shall be satisfied that any bank, corporation, broker, banker, dealer in money, produce, or foreign merchandise, or such officer, clerk, agent, or employé, has been guilty of any violation of the provisions of this act, they shall immediately apply to some judge of a Circuit or Supreme Court for a writ of injunction against such bank, corporation, broker, banker, dealer in money, produce, or foreign merchandise, such officer, clerk, agent, or employé, forbidding and restraining him or them from violating any of the provisions of this act; and such judge, after reasonable notice given to such bank, corporation, banker, broker, dealer in money, produce, or foreign merchandise, or such officer, clerk, agent or employé shall proceed, without delay, to investigate the questions involved in such application, and shall have power to compel the production of all books, papers, vouchers, and documents in the possession of the defendants, or cause and to require answers, on oath, from such defendant or defendants; which answer shall not be evidence on trial of any other action or suit in law or equity; and if upon such examination, he shall be of the opinion that any of the provisions of this act have been violated, he shall issue such writ of injunction and enforce the same, in case it shall be disregarded, according to the practice of the courts of chancery; and further proceedings shall be had upon such application in the Circuit Court of the county where the office, or place of business, of such bank, corporation, broker, banker, dealer, officer, clerk, agent, or employé may be situated, as may be necessary to enforce the provisions of this act. And if it shall be finally determined by the judge or court, be certified to the Auditor, which shall be sufficient authority to him, and he shall proceed to put the said bank into liquidation, in the manner contemplated by this act, and the act to which this is a supplement.

6. The bank commissioners to be appointed under the provisions of the act to which this is supplemented, before entering upon the duties of their office, shall take and subscribe an oath or affirmation, faithfully and impartially to perform all the duties enjoined upon and required to be performed by them, under the provisions of this act and the act to which this is a supplement, which said oath or affirmation shall be filed in the office of the Secretary of State.

7. Every payment made, in whole or part, in any bill, note, bond, order, draft, certificate of deposit, or other instrument or paper, the passing, uttering, emitting, or use of which is prohibited by this act, shall be utterly null and void, and the persons or corporation to whom any such payment may have been made therein may sue and recover upon the original contract or cause of action, in the same manner and with like effect as if no such payment had been made.

8. No action shall be maintained in any court of this State upon any contract, expressed or implied, the consideration of which in whole or in part, shall be by any bill, note, check, draft, or other instrument or paper, the use, receipt, or emission of which is prohibited by this act, but the same shall be judged to be utterly null and void.

9. In all prosecutions and suits for the recovery of penalties imposed for any violation of the provisions of this act, the persons suing for the same, (notwithstanding he may be liable for, or may have given bond for the costs of such penalties when recovered,) and the defendant or defendants shall be competent witnesses.

10. This act to be enforced and take effect from and after the first day of August next.

Approved February 10, 1853.

So soon as the foregoing act was passed, illegal banking went out of sight in Illinois.

Smith's banking thereafter was legalized under a charter from the State of Wisconsin and became the Wisconsin Marine & Fire Insurance Company Bank; the deposit of bonds equivalent to the professed circulation of his Bank of America had legalized that, and he went on with his banking as before. If his currency

ran short he had only to buy some bank outside of the State, legally organized. He thus bought the Atlanta Bank of Georgia, the International Bank, Griffin, Ga., and others.

A reference to the sketches of the State banks will show the reader that the circulation furnished by them was, at its largest, but a small proportion of the capital invested by them, and that they gradually diminished it until in 1856, the aggregate authorized circulation of all the Chicago State banks was only \$250,000, and of this sum it seldom occurred that it was all in circulation. The amount was entirely inadequate for the business wants of the community. As the illegal issues had been suppressed, the bills of banks of other States, more particularly those of Georgia banks, gained a wide circulation. Many of them were owned or controlled by Chicago capitalists and were redeemable at the banking offices of their sponsors. Besides this there appeared the bills of many banks not guaranteed by any local banking firm, which were tolerated, though suspected of being of the wild-cat breed. In fact the currency was, so far as safety or reliability went, but little improved by the substitution of Georgia bills for the irregular issues of home bankers which had been suppressed. The character of circulating bills is shown by a list turned over by Oscar L. Caldwell, a conductor on the Burlington railroad, as taken by him during one trip in September, 1855. The whole amount was \$203, made up of the following: Five \$5s on Atlanta Bank, Georgia; eight \$5s and one \$10, on Interior Bank of Georgia; five \$5s and one \$10, on LaGrange Bank, Georgia; two \$5s on Michigan Insurance Company, Detroit; one \$1 on Marine Bank, Chicago; one \$5, one \$2, and one \$3 on State Bank of Illinois; one \$10 on Mahoning County Bank, Youngstown, Ohio; one \$1 on Dairyman's Bank, N. Y.; one \$3 on People's Bank, Wisconsin; one \$2 on City Bank, Racine, Wis.; one \$1 on Kenosha Bank, Wis.; one \$5 on Charter Oak Bank, Connecticut; one \$3 on Alton Bank, Illinois; one \$2 on Bank of Naperville, Illinois; one \$5 on Bank of Cumberland, Maine; one \$5 on State Bank of Indiana; one \$5 on Agricultural Bank, Tennessee; one \$5 on Luther Wright's Bank, Oswego, N. Y.; one \$5 on Bank of Virginia; one \$5 on Fire & Marine Insurance Company, Burlington, Iowa; one \$5 on Merchant's Bank, Macon, Ga.; one \$5 on Bank of Binghamton, New York; and one \$5 on Granville Bank, Granville, Ill. Of the \$203, Georgia banks furnished \$115; New York, \$11; Iowa, \$5; Virginia, \$5; Tennessee, \$5; Indiana, \$5; Wisconsin, \$6; Ohio, \$10; Michigan, \$10; Connecticut, \$5; Maine, \$5; Illinois country banks, \$20; Chicago city banks, \$1.

Although this list may not show the true proportion of the various issues in general circulation, it shows that under the banking law the State banks furnished but a tithe of the money in circulation, and that the stringent law passed in 1853 against irregular banking in the State had not been effectual

MICHIGAN WILDCAT MONEY

in closing the gates against a flood of paper money from all quarters outside its jurisdiction. Of these the Georgia Bank bills gained the largest circulation, as many of them were made redeemable in Chicago in current bank bills. This forced the strong Illinois banks to keep their own circulation constantly fortified with an undue amount of specie for its redemption, and thereby rendered their circulation unprofitable to them however desirable it might be to the public. Any attempt to drive the better class of Georgia money out of circulation by gathering it up and demanding its redemption in current money in Chicago was sure to result in the gathering up of all current Chicago bank notes as an offset. To eradicate the one was to suppress the other, and the wild-cats still flourished. Banks which had depended solely on the profits arising from the circulation of their bills as money were many of them forced into liquidation, and others abandoned the business except that outside the issue of bills, which they continued to sturdily pursue. The statement of two of them on the first Monday of January, 1856, shows how strongly their circulation was fortified. On that date the Marine Bank reported a circulation of \$84,850, with specie on hand, \$90,000, and the Chicago Bank \$50,000 in circulation, and \$50,000 of specie on hand.

Several attempts were made to drive the Georgia money out of circulation by bringing it into popular discredit. In the fall of 1855 the railroads seriously discussed but never fully agreed to the measure of refusing all Georgia and Tennessee bills. December 27, 1855, a card appeared in the daily papers, addressed to the banks and bankers of Chicago, signed by one hundred and twenty merchants and firms, which read as follows:

"The undersigned merchants and business men of this city respectfully solicit your aid in suppressing and driving out of circulation all Georgia and Tennessee money from our city and State, believing it highly injurious to the business interests of the community and unworthy of a longer credit. We hereby assure you that we heartily concur in the late movement of our prominent railroad companies against the issue of Georgia and Tennessee banks, and would urge the banks and bankers of this city to refuse receiving them on deposit on and after the 15th of January next."

The editor of the Democrat, commenting on the above, said:

"So long as the bills of the sound Georgia banks are convertible into New York exchange at three-quarter per cent, and into gold at a rate no higher than one per cent, they will be freely taken by all business men."

In the Democratic Press of January 6, 1856, appeared, under the heading, "Georgia Banks Sustained," a counter card signed by one hundred and twenty-five firms. It read:

"We the undersigned, persons engaged in business in the city of Chicago, having been familiar for years with its immense and rapid growth and unparalleled increase of business, and the every-day increasing demand for money to carry on the business so rapidly pouring in upon us, have observed with regret an effort on the part of some of our newspapers and brokers, as well as people at a distance, to discredit and render useless the currency upon which this city has mainly relied and used in the various transactions of business. If the general banking law of the State had been such that legitimate banking could have been done under it, or if it could be immediately so amended as to admit of such

successful banking, and thus supply a circulating medium at once for this city and State, the undersigned would have no objection to forcing out of circulation all foreign bills, or bills of other States. Since it is conceded that this banking law cannot be altered or amended until the State Constitution is amended, and since that cannot be effected under three or four years, there appears no remedy for the use of foreign bills. The undersigned therefore look upon any successful effort to discredit any circulating medium that is redeemed promptly where issued, as not only unwise but exceedingly mischievous to the general interests of the State and city and individuals, and it generally would most seriously effect the value of both personal and real property. The rate of interest money commands here is proof that we have too little rather than too much. The undersigned are decidedly opposed to the invidious distinction sought to be made by some of our newspapers and brokers against the issues of the banks of the State of Georgia, the bills of which we have become familiar with, the owners of which we have become acquainted with, and the security of many of which we are perfectly satisfied with. The fact that two of the Georgia banks have stood a continuous run for four months or more, and have redeemed a half million per month of their issue in gold and silver, have increased our confidence in these banks, and the ability and disposition of the stockholders to promptly redeem all their issues. We shall therefore continue to receive and pay out, use and give credit to Georgia money, the same as the bills of other States, so long as they are redeemed in specie at the banks where issued, and we advise others who are engaged in business to do the same, until a full remedy can be had by amending our own banking law."

The Marine Bank, and the banking house of R. K. Swift, advertised on January 16, 1856, that they would no longer receive on deposit Georgia or Tennessee bank bills. In the same paper, Preston & Co., bankers, advertised that they were partial stockholders of the Planter's and Mechanic's Bank, Dalton, Georgia, were liable for its issues, and that its notes would be received by them, the same as Illinois, Wisconsin, Ohio, and other Western currency. Smith redeemed the issues of the Atlanta Bank, the International Bank, and others in which he was interested.

It does not appear that the Southern banks having reliable fiscal agencies at Chicago were much restricted in their general circulation by the partially successful effort to discredit them. They continued as a part of the circulating medium, in spite of all the local opposition until extraneous circumstances destroyed the entire system of State banking throughout the land.

The history of legitimate banking in Illinois or Chicago after 1853 was uneventful until 1856. The panic of that year brought the banks of Illinois in common with those of the whole country, to the severest test. It is truth to say that the Chicago banks stood the test well. Some of them failed, some went into voluntary liquidation, and a few weathered the storm and continued to do business until they were superseded by the National Banks in 1863-64. Of changes subsequent to 1857 this history will treat hereafter. The following is a sketch of each bank doing business in Chicago and recognized under the laws of the State from 1851 to 1857.

THE MARINE BANK OF CHICAGO.—Chartered January 13, 1852. Officers, J. Young Scammon, president; Edward I. Tinkham, cashier. Capital \$50,000—increased, May 20, 1852, by \$500,000. Paid in, \$150,000.

Circulation of \$99,044, secured, by Auditor's report of November 20, 1852, by Virginia six per cent bonds, valued at par, \$30,000; Illinois State bonds and Illinois & Michigan Canal securities amounting to \$142,398.14, valued at \$69,052.23. In 1854 its circulation had increased to \$158,901, to secure which it had deposited \$42,000 of Virginia bonds and \$244,623.40 of Illinois State and canal bonds, having a market value of \$128,303.85. In 1856, its circulation had been reduced to \$100,705. Its securities were: \$9,000 of Missouri bonds and \$198,705.15 of State bonds of Illinois, valued at \$100,705.73. November 30, 1858, the circulation had been reduced to \$50,000, for the redemption of which there were deposited with the State Auditor, \$47,276 Illinois New Internal Improvement bonds, valued at \$1.05, and \$12,000 Illinois interest bonds valued at \$0.96. November, 1860, the amount of the circulation remained unchanged (\$50,000), secured by Illinois State bonds valued at \$53,098. Its charter expired in 1877, at which time it went out as a solvent bank.

BANK OF AMERICA.—This was a proprietary bank, owned by George Smith and Elisha Willard (George Smith & Co.) Chartered July 19, 1852; capital, \$1,000,000; paid in, \$50,000. Circulation, November, 1852, \$50,000, secured by deposit with the State Auditor of \$10,000 Pacific Railroad bonds of the State of Missouri, valued at par, and \$77,000 of various canal bonds, valued at fifty cents on the dollar, and \$6,501.87 of canal certificates, valued at thirty-three cents on the dollar. For the succeeding four years the amount of circulation and the securities deposited remained unchanged. In November, 1859, the circulation had been reduced to \$1,162, for the security of which \$2,000 of Missouri sixes were deposited.

THE BANK OF COMMERCE was owned by Davisson, McCalla & Co.; incorporated in May, 1852. Capital, \$260,000; paid in, \$52,000. Officers, Alfred W. Davisson, president; Thomas McCalla, cashier. Its first circulation amounted to \$50,000, to secure which were deposited July 24, 1852, \$35,000 of Missouri State bonds, \$10,000 of Kentucky State bonds, and \$5,000 of Ohio canal bonds. November, 1854, the circulation had increased \$4,998, and \$5,000 additional Kentucky State bonds had been deposited for security. In the Auditor's report for 1858, its name appears among the suspended banks. Its final showing in the Auditor's report of 1860 speaks well for the Illinois banking law, under which the bank had been organized and its bills issued. It was as follows:

1858.	DR.
Sept. 18, To amount of stock deposited.	\$2,005 00
Sept. 28, To amount of sale of securities	2,089 00
	\$4,094 00
1858.	CR.
Sept. 28, By amount of notes in circulation.	\$2,005 00
1860.	
Nov. 30, By amount of notes redeemed.	522 00
Nov. 30, By express account.	5 00
Nov. 30, By specie on hand.	1,562 00
	\$4,094 00

THE CITY BANK was a proprietary bank owned by Messrs. Bradley & Curtiss; chartered June 26, 1852; capital, \$200,000. Its place of business was No. 24 Clark Street. Amount of circulation, November, 1852, \$59,994, which was secured by deposits of \$60,000 in Virginia State bonds, valued at par. In 1854 the circulation had diminished \$10,000. November, 1856, the Auditor reported a circulation outstanding of \$1,539, against which was held \$1,537.40 in specie. The bank

went into involuntary liquidation, being "closed by protest."

THE CHICAGO BANK was owned by I. H. Burch & Co., the firm being Isaac Howe Burch and Samuel Howe. President, Thomas Burch; cashier, I. H. Burch. Incorporated July, 1852; capital, \$100,000; paid in, \$59,501.29. Circulation in November, 1852, was \$53,997, secured by deposit with the State Auditor of \$10,000 in Missouri State bonds and \$77,501.57 in canal securities. In November, 1856, the circulation was \$50,000, secured by \$8,000 in Virginia sixes and \$86,000 in Illinois and canal bonds. In November, 1860, the amount of circulation had been reduced to \$4,903 (2,281 ones, 1,060 twos, 94 threes, and 43 fives), to redeem which the State Auditor held \$5,454 of Illinois State bonds.

THE EXCHANGE BANK was owned by Messrs. H. A. Tucker & Co.; organized in January, 1853. Officers: President, H. A. Tucker; cashier, Hamilton B. Dox. Capital unknown. Place of business, 34 Clark Street. The circulation in 1854 was \$49,995; security deposited, \$50,000 in Missouri State bonds. In 1856, the circulation had been withdrawn. At that time there was only \$675 outstanding, for which the Auditor held \$675 in specie.

THE UNION BANK was owned largely by Forrest Bros. & Co. It was organized August 18, 1852; capital, \$200,000; paid in, \$50,000. The circulation was, in October, 1852, \$49,995, secured by \$50,000 of Virginia sixes. This bank was "closed by protest" in 1856. At the closing up of its business in 1857 there was of its bills outstanding \$1,611, of which amount there was subsequently redeemed \$78. Lost, \$1,533.

THE FARMER'S BANK was organized December 25, 1853, by Messrs. Chase Bros. & Co. Its circulation was secured by \$50,000 Missouri State bonds. It was forced into liquidation in 1854. The bonds proved ample to redeem its circulation.

THE PHOENIX BANK was organized in 1854. It had a circulation of \$50,000, secured by \$50,000 in Missouri State bonds. It was forced into liquidation in 1855. In November, 1856, the Auditor reported of its bills outstanding, \$415, to redeem which he held a deposit of \$413.40 in specie. The bank was owned by N. C. Roe & Co., 42 Clark Street.

MERCHANTS' AND MECHANICS' BANK was organized in February, 1852. Officers: President, Levi Boone; cashier, Stephen Bronson. Capital, \$100,000. The circulation, in 1853 was \$54,700, for which it had pledged to the State Auditor \$50,000 in Virginia sixes and \$10,000 in canal bonds. In 1854 its circulation had increased to \$58,700, with a corresponding increase of securities in canal bonds. The bank closed business in 1856. The Auditor's report in the fall of that year showed \$2,068 of bills still outstanding, with a deposit of a like amount of specie.

Whatever of disaster may have befallen these banks, it will be seen that no material loss ever came upon the holders of their bills. The financial storms of 1856 forced some of them to close up business, but the law under which they had been organized grew in favor with the people until the unexpected contingencies which grew out of the civil war in 1861 destroyed the basis on which banking had been done, and, shortly after, forced an abandonment of banking under State laws altogether, and the law was repealed.

OTHER FINANCIAL INSTITUTIONS.—In addition to the banks of issue which flourished during the period subsequent to the passage of the State banking law of 1851, there were several stanch financial institutions

worthy of mention. The Butchers and Drovers' Bank was the only bank on the North Side. It issued no bills, but did a thriving business. It was located at the corner of North Water and North Clark streets.

The METROPOLITAN BANK was also a bank of deposit, owned and run by Gurley & Farlin.

"SWIFT'S BANK," the proprietors of which were R. K. Swift, Lyman P. Swift, and J. S. Johnson, did a very extensive business at the corner of Randolph and La Salle streets.

The leading savings banks were: The Chicago Savings Bank, 125 Lake Street; Dollar Savings Bank, 22 Clark Street; Marine Savings Bank (a department of the Marine Company); and the Dime Savings Bank.

The Illinois Saving Institution, which for many years was regarded as being undoubtedly secure, was organized in 1855-6. Its first president was John H. Kinzie. He was succeeded in 1859 by John C. Haines. George E. Stanton was its vice-president, and Nathan B. Kidder its cashier. Among its permanent trustees were: John H. Kinzie, Gurdon S. Hubbard, Erastus S. Williams, Alexander C. Coventry, William B. Ogden, George W. Dole, Benjamin W. Raymond, John S. Reed, O. R. W. Lull, George E. Stanton, and Nathan B. Kidder. Serving as directors for brief periods were: John H. Dunham, Henry Witbeck, John C. Haines, and Conrad L. Deihl.

In 1857 was organized the Merchants' Savings, Loan and Trust Company, the only financial institution now in existence, under its old name, organized prior to 1858. Its office was at the corner of Water and La-Salle streets. Its capital was \$500,000. Its first president was J. H. Dunham, and its first vice-president Walter L. Newberry. D. R. Holt was its first permanent cashier, although before him M. B. Bartlett had served as cashier and secretary *pro tem*. The directors, prior to 1861, were: John H. Foster, 1857-61; Jonathan Burr, 1857-61; W. L. Newberry, 1857-61; D. R. Holt, 1857-61; William E. Doggett, 1857-61; Henry Farnam, 1857-61; I. N. Arnold, 1857-61; A. H. Burley, 1857-61; J. H. Dunham, 1857-61; William B. Ogden, 1857-58; George Steel, 1857-58; M. D. Ogden, 1858-61; S. A. Smith, 1858-61; C. H. McCormick, 1858-61.

The Western World Insurance and Trust Company, 142 and 144 South Water Street, was chartered in 1853. Its authorized capital was \$500,000, of which it issued \$250,000, the par value of its shares being \$50. George H. Hazelton was its first president, and Charles H. Abbott its first cashier. He subsequently became the treasurer of the company, and Alfred Edwards succeeded him as cashier. The early directors were: O. Kendall, George H. Hazelton, Amzi Benedict, L. S. Church, and Charles H. Abbott.

The Chicago Marine & Fire Insurance Company was first chartered in 1836 by Theophilus W. Smith and others. It did a banking business to the extent of any private bank or banker not issuing currency. It ceased to do business in 1839 or 1840, but did not thereby forfeit or resign its charter. In 1848, its stock having passed into other hands, its business, under the old charter, was revived.* It commenced with a nominal capital of \$35,000, and an actual cash capital of \$25,000. J. Young Scammon was the largest stockholder, the president, and managing head of the institution, and so remained, with the exception of three years while he was abroad, until it finally closed up business in 1874. Until 1857 its career was that of unprecedented success. It had at that time extended its business more widely

than any like institution in the West, had an actual cash capital of half a million dollars, and was the largest moneyed institution in the State. The Marine Bank, chartered in 1852, was owned by the same stockholders and was under the same management. In 1857 Mr. Scammon retired from the active management of both institutions and visited Europe, where he remained about three years. At the time of his departure the joint capital of the two concerns was \$1,050,000. Under the new management a train of misfortunes befell the company, which seriously depleted its financial strength and impaired its credit. Mr. Scammon on his return resumed the management, and it again regained its credit and prestige, which it held until the great fire of 1871. This disaster followed, before recuperation was possible, by the financial disaster of 1873, rendered it necessary to permanently close its business, which was done in the winter of 1874 or spring of 1875.

The bankers and banks of Chicago which survived the panic of 1856, and appeared as doing business in 1857, were given in the directory of that year, with the time they had done business in the city, as follows:

F. Granger Adams, 44 Clark Street, forty-seven years in city.

J. M. Adsit, 39 Clark Street, ten years in the city.

Brewster, Hoyt & Co., 24 Clark Street, nine months in the city.

I. H. Burch & Co., 123-125 Lake Street, twelve years in the city.

Davisson, McCalla & Co. (Bank of Commerce), 128 Lake Street, corner of Clark.

John Denniston, money broker, 111 Lake Street, eight years in the city.

Evans, Whipple & French, money brokers, 48 Randolph Street, four months in the city.

Gurley & Farlin (Metropolitan Bank), 48 LaSalle Street—Joel Gurley and D. H. Farlin.

Hoffman & Gelpecke, 58 LaSalle Street, two years in the city.

E. H. Huntington & Co., 34 Clark Street, two years in the city.

Morford Bros. (R. H. Morford), 32 Clark Street, one year in the city.

Officer & Brother (R. W. & S. P. Officer), 154 Lake Street, one year and three months in the city.

Charles G. E. Prussing, 40 Clark Street, eleven years in the city.

Daniel Richards, 29 Randolph Street.

Strong & Wiley, 141 Randolph Street (D. C. Strong and C. V. Wiley), six months in the city.

H. A. Tucker & Co. (Exchange Bank), H. A. Tucker, president; Hamilton B. Dox, cashier, four years in the city.

Wadsworth & Hitz (Strong Wadsworth and Louis J. Hitz), 66 Clark Street.

R. K. Swift, Brother & Johnson, northwest corner of Randolph and LaSalle streets, three years in the city.

E. I. Tinkham & Co., 34 Clark Street, two years in the city.

Wheeler, Bunker & Co., 65 Clark Street (George H. Wheeler, New York, Edward H. Bunker, Chicago), nine months in the city.

G. C. Whitney & Son (G. C. and C. H. Whitney), 36 Clark Street, one and one-half years in the city.

Bank of America, George Smith & Co., proprietors, 41 Clark Street.

Bank of Commerce (Commercial Bank), Davisson, McCalla & Co., proprietors, northwest corner of Lake and Clark streets.

* See on previous pages of bank history, and biography of Hon. J. Y. Scammon.

Chicago Bank (I. H. Burch & Co.), corner of Lake and Clark streets.

Exchange Bank (H. A. Tucker & Co.), 34 Clark Street.

Marine Bank & Chicago Marine Insurance Company (incorporated in 1836), 154 Lake Street, twenty

years in the city. J. Young Scammon, president; Benjamin F. Carver, cashier.

State Bank, 55 Clark Street, William B. Rogers, house 103 Adams Street.

It is appropriate to close this chapter with a biographical sketch of one who filled an important place in the banking history of that period.

J. YOUNG SCAMMON was born in Whitfield, Lincoln Co., Maine, July 27, 1812. His father, Hon. Eliakim Scammon, was an early settler and a long resident of East Pittston, Kennebec Co., Maine. He was a man widely known and esteemed and represented his town and county in both branches of the State Legislature. His mother was the daughter of David Young, who was a wealthy man of affairs, and had represented the town of Pittston, District of Maine, where he resided, in the General Court of Massachusetts, before the separation of Maine from Massachusetts.

The subject of this sketch was bred on a farm, and would quite likely have followed the vocation of a farmer, had not an accident, which occurred when he was a youth of ten years, deprived him of the full use of his left hand.

Subsequent to the accident he pursued his studies with a view to following a profession. He received an academic education at the Maine Wesleyan Seminary, Kent's Hill, Readfield, and Lincoln Academy, New Castle, Maine. He entered Waterville College (now Colby University) in the class of 1831. He received the degree of LL. D. from that institution in 1865. After leaving college he studied law in Hallowell, Maine, in the office of Hon. John Otis. Having completed his legal studies he was admitted to the Bar in Kennebec County, and immediately after started on a tour of observation with a view to settlement West. He arrived in Chicago September, 1835, after a tempestuous and dangerous passage, on the steamboat "Pennsylvania," at that time plying between Buffalo and other Lake Erie ports, and occasionally making the round trip to Chicago, via Green Bay. The steamer anchored outside the bar, and the passengers, Scammon among them, were landed in a skiff or yawl under the south end of a bridge which crossed Dearborn Street, from whence they made their way, through the tall prairie grass, across what is now the heart of the city, to the Sauganash Hotel, then located on Market Street, near Lake.

Through letters to Mr. Henry Moore, then an attorney of the town and Deputy Clerk of the Cook County Circuit Court, under Colonel Richard J. Hamilton, who then held most of the offices in the county, he made the acquaintance of the latter gentleman. The Circuit Court commenced its session not long after Scammon's arrival, and, on the solicitation of Mr. Moore, whose private business prevented his further service as Deputy Clerk, he consented to remain temporarily and fill the position during the session of the court. Thus Mr. Scammon began active life in Chicago in 1835, in the

WISCONSIN WILDCAT MONEY.

office of the Circuit Court of Cook County. His services were appreciated by Colonel Hamilton. He was subsequently appointed Deputy Clerk, in place of Moore, who resigned his claim to the official position, and was allowed to open an office as an attorney at law in the somewhat contracted precincts of one corner of the Clerk's office, having been admitted to the Bar of Illinois December 7, 1835. The young lawyer grew rapidly into favor, and filled, during the succeeding two years, many offices of trust and responsibility under Colonel Hamilton, who was then Clerk of the Circuit Court, Clerk of the County Commissioner's Court, School Commissioner, Recorder of Deeds, notary public, and bank commissioner. He continued studiously to apply himself to the duties of his profession. December 5, 1836, he entered into a copartnership for the practice of law with Buckner S. Morris. The firm had a successful and increasing practice for eighteen months, when it was dissolved. For a year after the dissolution Mr. Scammon practiced alone. In 1839 he again entered into a copartnership with Norman B. Judd. The firm existed until 1847, and, during its continuance, ranked as one of the strongest and most reliable legal firms in the Northwest. Mr. Scammon, up to this time, had devoted his energies and attention assiduously to his profession and had attained the foremost rank as a practitioner in Cook County and throughout the State of Illinois. Subsequently, in 1849, he entered into a law partnership with Ezra B. McCagg, who had previously been his confidential law clerk. This copartnership remained unbroken until 1856, when Mr. McCagg went to Europe, and Mr. Samuel W. Fuller assumed charge of the law office, and conducted the business under the name of Scammon & Fuller. Mr. McCagg, returning home in 1857, and entering into the active business of the office, the name of the firm became Scammon, McCagg & Fuller, and so remained until after the great fire of 1871.

From the dissolution of the partnership with Mr. Judd, although continuing to practice and to be retained in many important suits, he became more identified with the public affairs of the commonwealth, and more engrossed in private business. His dissolution of that copartnership was consummated on account of his interest in railroad matters, which largely absorbed his attention at that time, he being then one of the projectors and builders of the Galena & Chicago Union Railroad.* In 1837, while known exclusively as a lawyer, he was, without solicitation on his part, appointed attorney of the State Bank of Illinois. He also held the position of reporter of the Supreme Court of Illinois from 1839 to 1845, during which time the Court Reports were published in a style of excellence hitherto unknown in the West, and not inferior to like publications in the Eastern States.

Subsequent to 1857 Mr. Scammon became so prominently engaged in the business interests of Chicago and the State as to overshadow for years the well-earned and merited prominence which he had attained in his profession. He was identified with the earliest efforts to establish the common-school system in Chicago, being appointed one of the school inspectors in 1839, and remained a member of the school board until 1845, † when he was nominated as an Alderman from the First Ward. His candidacy was opposed by some on account of his "building big school-houses," as it was expressed, he being the strong advocate of expenditures for school purposes, considered at that

time prodigal in the extreme, and far beyond the present or prospective wants of the city. He was elected by a most flattering vote, and in his new office helped to lay the broad foundations of the present magnificent school system of the city.

Mr. Scammon was, however, more strictly identified with the financial institutions of the State than with any other department of its material progress. He had, by the knowledge gained through his legal connection with banks as an attorney, become an expert in all the details of the various theories of banking then in vogue, and, naturally, his attention became directed to that business. The amended Constitution of 1848 permitted the general banking law of 1851 to be passed. He was, at the time the law passed, the president and leading stockholder of the Chicago Marine & Fire Insurance Company, an institution performing all the functions of a bank, except that of issuing currency. Soon after the passage of the act and its adoption by popular vote, he established, under its provisions, the first institution under the general law called the Marine Bank. His bank was considered the strongest and most reliable of the State banks established under the law, and under his direction was so conducted as to not only vindicate the law, but bring it into especial favor throughout the State, where a strong prejudice had previously prevailed against banks, and especially against State banking.* He became the open and fearless antagonist of all who sought to evade the banking law. The illegal or irregular bankers were indicted in January, 1853, under a law then recently enacted, which drove illegal banking from the city and State, or forced it to seek cover under the ægis of law. This act was framed by him, and passed through his advisement.

In 1857, having accumulated an ample fortune, he decided to temporarily retire from active business and to take a rest, after his arduous and successful career of nearly a quarter of a century. He accordingly sailed for Europe where he remained for about three years. On his return in 1860, and finding that through mismanagement or misfortune, or both, the Chicago Marine & Fire Insurance Company, which he had left the strongest institution of its kind in the West, was on the verge of bankruptcy, he immediately re-assumed its personal management and plunged anew with his accustomed energy into the vortex of Chicago business of which this great monetary institution was the center. Success crowned his efforts, as always before. The institution regained its former prestige, as the leading monetary institution of the city, and so remained, under his management, until the destruction of the Illinois currency, in consequence of the depreciation of Southern State stocks, upon which it was in part based, compelled a general suspension of banks which had received and held that currency on deposit. Mr. Scammon then opened a private bank, settled up the affairs of the old institution, and re-organized it, and made it again a prosperous institution until the destruction of the city by fire in October, 1871. The enormous and unexpected losses then incurred, followed by the business panic of 1873, rendered it expedient to wind up its affairs, and it ceased business in 1874.

In things temporal, the tide which "taken at its flood leads on to fortune," oftentimes at its ebb, leaves the hitherto fortunate mortal stranded on the shore among the wrecks of his former possessions. From causes over which Mr. Scammon had little control, disaster in worldly affairs became his lot, against which

* See article on Railroads.

* Mr. Scammon's connection with the banking of the city further appears in the topical history of banking.

he struggled with such energy, determination, fortitude and philosophy as evinced a type of character more exalted and more worthy of emulation than is often evolved from a life of uninterrupted success. At the time of the great fire Mr. Scammon was possessed of a vast fortune, was a banker of the highest standing both as to executive ability and commercial integrity, and was possessed of almost unlimited financial credit throughout the country. As a lawyer he stood in the front rank, and as a man of affairs in the great public enterprises which concerned the welfare and prosperity of the city and State, he ranked as one of the foremost.

Full half a million dollars of his property vanished in the smoke and flames of the great conflagration. His banks, his warehouses, his stores, and his home, all disappeared in the general ruin.

But his courage remained undaunted, and his credit unimpaired. He immediately set about the task of rebuilding, with his full share of that wonderful delirium of energy which characterized the renovation of the destroyed city. In fifteen months he expended more than one million dollars in rebuilding the new Chicago. Much of the capital required was necessarily borrowed, either on the personal credit of Mr. Scammon or on such collateral security as his property, remaining after the fire, enabled him to offer. The panic of 1873 depreciated the value of his securities, although it did not decrease the amount of his debts, and his monetary credit became so impaired as to leave him hopelessly involved. Out of the wreck something may be saved to him who buidled the ship, but, perhaps, nothing beyond what would be required to earn the same anew.

Losing his fortune, Mr. Scammon still retained all of himself that is imperishable, and has since that time borne himself as a Christian philosopher and as a true man should. His reputation, save that ephemeral form which is measured by dollars and re-acts on itself when the dollars vanish, is unsullied. He is (1884) engaged in practice as a lawyer in Chicago, taking little part in public affairs outside the duties of his profession.

The active years of his life identified him with nearly every branch of Chicago development. He was the first professed receiver in northern Illinois of the doctrines contained in the religious writings of Emanuel Swedenborg, and organized the first "Church of the New Jerusalem" west of the lakes. He was the first homeopath in Chicago. He was also one of the first organizers and directors of the Chicago & Galena Railroad, and the acknowledged leader in the State bank reform of 1851, being the managing head of one of the first banks organized under its provisions. Although engrossed in business, he ever took an active interest in politics. He, however, was never an office-seeker or an office-holder in a political sense, though the Whig candidate for Congress in the Chicago District in 1848, and was elected and served as a member of the State Assembly in 1860-61. In politics he was formerly a staunch Whig, and, on the disintegration of the party became, and has since continued, an unswerving Republican. In the interest of that party he established the Inter-Ocean* in 1872.

This sketch, treating of the public and civil life of Mr. Scammon, although giving the reader an idea of the many paths of usefulness through which he won the gratitude and respect of his fellow-citizens, does not touch upon the deeper and broader traits of his character, which are known only to such as have been drawn to him within his Church, his large circle of personal friends, and his family. The inner and better life of a

* See History of Chicago Journalism in later volume.

true man is seldom written. It is more fitting that it be engraved in the hearts and cherished in the memories of those whose lives have been intimately interwoven with his own.

While in affluent circumstances his public as well as private benefactions were bountiful to the full measure of his ability. The Hahnemann Homeopathic Society received from him as a free gift a commodious hospital. The Chicago Astronomical Society and the Dearborn Observatory owe their existence mainly to Mr. Scammon. He was elected the first president of the Society, built, at a cost of \$30,000, the Observatory, and paid the salary of its director until the fire of 1871. On his retirement from the presidency of the Society in 1882, the following was placed on the records:

"The Hon. John Young Scammon having resigned the office of President of the Chicago Astronomical Society, which office he has held from the organization of the Society in 1862 to the present time, the directors take this occasion to express their sense of obligation for his untiring interest in the success of the Dearborn Observatory, and for the munificent benefactions he has bestowed upon it.

"It is to Mr. Scammon that the Society is indebted for the tower of the Observatory, which he furnished the means to erect at a cost of \$30,000.

"Mr. Scammon also made a generous contribution toward the purchase of the Great Refractor, and, in the early history of the Society, the salary of the director was for a considerable period paid entirely by the same liberal hand.

"Whenever a history of Chicago shall be written in which justice shall be done to those who have made our city what it is, then will the name of J. Y. Scammon be found to occupy an honored place in the records of those whose benefactions have contributed most to the growth and prosperity of the city and its institutions."

Mr. Scammon was married in Bath, Me., July —, 1837, to Miss Mary Ann Haven Dearborn. They had four children, two of whom survive. One daughter died in infancy.

Charles Trufant was born July 7, 1840. His youth was spent in Chicago. He was graduated from the Chicago University and soon after entered the service as a Lieutenant in the Ninth Illinois Cavalry. He was subsequently appointed on the staff of General Steele, and served through the war, bearing himself as a true and brave soldier throughout. At the close of the war he commenced the study of law in the office of that eminent lawyer and statesman, Hon. George Evans, Portland, Me. In 1869, having completed his legal studies and been admitted to the Bar, he entered into a copartnership with Robert T. Lincoln, who had been a law student in the office of Scammon, McCagg & Fuller. The career of the promising young firm was cut short by the failing health and early death of young Scammon. He died August 23, 1876.

Of the two surviving daughters, Florence A. D. (now Mrs. J. S. Reed) was born in Chicago November 12, 1844. She now resides in South Carolina. Arianna Evans Scammon was born April 2, 1848, and is now a resident of New York City. Mrs. Scammon died at Soden, Nassau, Germany, ten miles from Frankfurt-on-the-Main, July 9, 1858, where she was buried, and over her remains rests an appropriate marble monument.

On December 5, 1867, Mr. Scammon married Mrs. Maria Sheldon Wright.

WILLIAM H. BROWN was born in Connecticut about 1795. His father was a native of Rhode Island and by profession a lawyer. He practiced for twenty-five

years in Auburn, N. Y., and toward the end of his life removed to New York City. Young Brown studied law with his father, with whom he also practiced for a short time, and then removed to Illinois Territory, where he was licensed to practice September 28, 1817. He took up his residence in Kaskaskia as early as December, 1818, and in the spring of 1819 was appointed Clerk of the United States Court for Illinois, a position he held until 1835. On the change of the State capital in 1820, he removed to Vandalia, where he purchased a half interest in "The Illinois Intelligencer," established in 1815, and the first newspaper published in Illinois, of which he became the editor. In December, 1822, he married Harriet C., daughter of Colonel John Seward, of Montgomery County, Ill.

In February, 1823, the pro-slavery faction in the Legislature by the high handed methods, which became historic, secured the passage of a resolution submitting to the people a call for a constitutional convention, the covert purpose of which was to legalize slavery in the State. Mr. Brown's partner in the Intelligencer was William Berry, a pro-slavery member of the Legislature; and at this critical juncture in presence of so well defined an issue, their views could not well be harmonized. Mr. Brown's interest was bought out, but before the close of the year the paper, in other hands, was again brought under the influence of free principles, and for eight months before the general election did good service in securing the memorable victory for freedom of August 2, 1824. In that contest Mr. Brown was one of the working force which revolutionized the public opinion of the State in that pivotal epoch of its history.

In October, 1835, he removed to Chicago, having been appointed cashier of the branch of the State Bank which was to be established here. December 5, 1835, he formally announced the names of the officers of the bank, which thereupon became an institution of the ambitious and speculating town. In 1836 Mr. Brown gave evidence of taste and wealth by building a ten thousand dollar residence on the northwest corner of Pine and Illinois streets.

In 1840 he was elected School Agent by a majority of one, on the Whig ticket, having offered to serve without salary. For thirteen years he filled that office with marked efficiency and general acceptance. In that relation, and as one of the Board of Inspectors he contributed largely to the increasing success of the schools

of Chicago. December 8, 1840, he delivered a lecture before the Lyceum on "The Early History of Illinois;" and January 20, 1842, one on "The Social and Legal Rights of Women."

In 1845 Mr. Brown formed a partnership with Alfred Cowles, a lawyer, and in 1846 he was one of the syndicate who bought the charter of the Galena & Chicago Union Railroad from the estate of E. K. Hubbard, deceased. In 1857 he built a more costly residence than before on Michigan Avenue, keeping well to the front in that class of expenditure by an outlay of \$30,000.

In 1860 he was nominated for the State Legislature by the Republicans, and worked hard for the success of the party in the State and Nation. He was elected and acquitted himself with credit in that position, being especially marked for his zeal in the support of the national administration throughout the Civil War. December 5, 1864, he delivered a lecture before the Chicago Historical Society, of which he had been the first president, 1856 to 1863, on the "Early Movement in Illinois for the Legalization of Slavery."

At the close of the war, Mr. Brown retired from active business pursuits; and, in 1866, accompanied by Mrs. Brown, he went to Europe, partly for recreation and partly in the hope of recruiting his failing health. In Amsterdam he was taken ill with small-pox, and while convalescing was struck with paralysis, of which he died June 17, 1867. All his children, four sons and one daughter, with their mother, survived to mourn his loss, surrounded by the regret and respect of the whole community.

On three critical occasions in the life of the State, the city, and the Nation, respectively, Mr. Brown was not only on the right, but also the victorious side; and he has deservedly taken high rank among his fellow-citizens as a philanthropist, a friend of education and a patriot. The public cannot minutely discriminate between good fortune and victorious choice; and, if it could, there is no doubt that Mr. Brown would be entitled to its applause on the higher ground. Intellectually, he was not great, but his talents were respectable; and though perhaps opinionated and stubborn, as the wont of successful men, he was esteemed for his kindness of heart by those who knew him best.*

* If a more extended analysis of Mr. Brown's character be thought desirable, see Dr. Patterson's tribute to his memory.—Fergus 6, p. xi., etc.

TRADE, COMMERCE AND MANUFACTURES.

PRIMITIVE PERIOD—1833 TO 1848.

Chicago has now the largest trade and the most extended commerce of any inland city in the world. It is the most important primary market in the world for cereals, live stock, and all their manufactured products, such as flour, pork, lard, beef, tallow, etc.

The commerce of Chicago began quite early, as the reader well knows who has read the history of the American Fur Company and the Government Factories, both of which had agencies there at a very early time in its history. Chicago had nothing to export, except furs and peltry, until 1833. Up to that time there were no products of husbandry raised west of Lake Michigan in sufficient quantity to more than supply the wants of the resident people. The records prior to that date showed that each vessel which arrived at the port of Chicago brought passengers and provisions, and took little back. Indeed, the balance of trade was most sadly against the port. When the first modern merchants established themselves in Chicago, they did not look for any profit from an export trade, but entirely from the sale of goods brought from the East. Among them were flour, wheat (for seed), beef, pork, and nearly all the ordinary necessities of life.

It is stated by Judge Caton that, as late as 1836, during the fall, an actual scarcity of provisions prevailed, and quite a panic set in among the inhabitants. Some of the merchants—all, in fact, but George W. Dole—put up the price of flour, of which they held but small stocks, to the exorbitant price of \$28 per barrel. Mr. Dole, who held the largest stock, not only refused to take an interest in this first "Chicago corner," but actually broke it by refusing to sell to these extortionate dealers, while he, himself, continued to sell at retail, at the old price of \$11, until further supplies arrived.

From 1832 to 1838 the incoming settlers consumed nearly all the products of those who had come before them. Those who had raised crops in 1833 found a ready market for their surplus among the comers of 1834, who, in turn, found an equally urgent demand for their products in the increasing throng of emigrants of the succeeding year. The early trade and traffic in furs, or the correlative barter of goods in exchange for them, could hardly be classed even as the beginning of Chicago commerce. The Factory at Chicago and the agents of the American Fur Company show in their records all that will ever be known of early Chicago commerce. The vast commerce of the city to-day has no connection with it whatever. The Indian trade was virtually extinct before the American commerce which now centers at Chicago had begun. Only a single man (Gurdon S. Hubbard) became identified with the modern commerce and trade of the city, who had been connected with the rude Indian traffic which centered in Chicago in the earlier times.

The beginning of what is now the vast trade and commerce of Chicago dates back to the spring of 1833, at which time the first invoice of what might be termed the first products of civilized industry was shipped from

the port of Chicago to an Eastern market. The slaughtering of cattle and swine seems to have furnished the first surplus products for export. The early history of that branch of industry has been told elsewhere. George W. Dole made the first shipment of beef in barrels in the spring of 1833, which is believed to be the first consignment of Western products to Eastern markets, excepting furs, peltry, and hides, ever shipped as a commercial venture from Chicago. The bill of lading read as follows:

"SHIPPED IN GOOD ORDER and well conditioned by Newberry & Dole, on board the schooner called 'Napoleon,' whereof is master for the present voyage John Stewart, now lying in the port of Chicago, and bound for Detroit.—To say:

O. Newberry, Detroit :

287 barrels beef.

14 " tallow.

2 " bees-wax—115½, 94½, 210½.

152 dry hides, weighing 4659 pounds.

"Being marked and numbered as in the margin, and to be delivered at the port of Detroit in like good order, (the dangers of the lakes and rivers to be excepted,) unto consignees or to their assignees—he or they paying freight at—per barrel bulk.

"In witness whereof, the master of said vessel hath affirmed to two bills of lading, all of this tenor and date, one of which to be accomplished, the other to stand void.

"JOHN STEWART.

"Dated, CHICAGO, April 17, 1833."

From this first shipment dates the beginning of Chicago commerce. Following soon after came the trade in lumber, which, so soon as the town and tributary country began to be settled, became a most important article of import. A large part of the region west of Chicago was prairie with large areas destitute of timber, and the forests of Michigan and Wisconsin, along the lake shore, became early sources of wealth to the enterprising lumbermen; and building material became the second essential article of Chicago commerce. Charles Cleaver, in a letter written, descriptive of Chicago, in 1833, says that the stock of lumber at that time in the town did not exceed ten thousand feet, and that prices ranged from \$60 to \$70 per thousand. Two small saw-mills, one, (water-power) some six miles up the North Branch; and the other (steam-power), owned by Captain Huntton, south of the present line of Division Street, cut such timber as grew in the vicinity. It was generally of small growth and of varieties not valuable for building purposes: mostly oak, elm, poplar and white ash. Of course, with such a meager supply of growing timber and such inadequate facilities for its manufacture, the commerce in lumber was evolved from necessity, so soon as the town began to grow and the surrounding country began to be settled.

David Carver was the first lumber merchant in Chicago, and the first to inaugurate that important branch of commerce. He came to Chicago in 1833, either in the spring or early summer. He owned a schooner, named for himself, the "David Carver," which plied as a lumber craft—probably the first—between St. Joseph, Mich., and Chicago. It was sometime during the summer or fall of that year that he brought in the first cargo of lumber, and started the first lumber yard in the city. He worked his vessel into the main river, and

discharged his cargo of pine on the south bank, between LaSalle and Wells streets, where the first lumber yard was thus started. Two years later, Kinzie, Hunter & Co., Jones, Clark & Co., and perhaps others had engaged in the business; quite a lumber fleet was employed, and Chicago became the great center of lumber trade, which trade has ever since been an essential element in its commercial importance.

With the exception of the lumber trade and the shipment of beef and pork, both of which branches increased in amount and importance from year to year, the commerce of Chicago was still one of large receipts of food, clothing material, building material, agricultural implements, etc., etc., with small exports in return. It was not until 1838 that Chicago, now the greatest primary grain market in the world, exported its first invoice of wheat. It amounted to *seventy-eight bushels*, and was shipped in bags to Buffalo, on the steamer "Great Western," by Charles Walker, of the firm of Walker & Co. The following year (1839) Messrs. Newberry & Dole commenced as shippers of wheat, on a scale which completely overshadowed Walker in the magnitude of the business done. Governor Bross, in one of his historical papers in 1868, writes of this early shipment and of the elevator facilities of the time as follows:

"The history of the next shipment, in 1839, of three thousand six hundred and seventy-eight bushels, on board the brig 'Osceola,' is scarcely less interesting. It was made by Newberry & Dole, whose warehouse was on the North Side, immediately east of where Rush-street bridge now stands. The wheat was bought from farmers' wagons and hoisted to the upper story by Irish power, with rope and pulley. The problem of loading on the brig was solved by fixing a spout in one of the upper doors and making it gradually narrow till it reached the deck, where the wheat was discharged into boxes holding four bushels, weighed and transferred into the hold of the vessel."

A reminiscence of this period in the commercial history of the city appeared in the Democrat of September 25, 1848, from which are given the following extracts:

"In 1830 Chicago was a mere trading post, where some one hundred persons, principally Government agents, troops, Indian traders, etc., resided. In 1831 there was but one store, and that was kept by G. W. Dole inside the palisades of the fort.* From this year until 1839 the post and country, to the distance of one hundred miles and over, was supplied with the necessities of life—flour, corn, pork, beans—from the East, principally from Ohio. † In 1839 the export trade commenced. That year a vessel which came to this port with seven hundred barrels of flour returned to Ohio without disposing of the article. This year also the first cargo of wheat was shipped from this port by Giles Williams. The pile of wheat lay in a shanty where the Winslow warehouse now stands (South Water, between Dearborn and Clark streets), and was quite a curiosity at the time. This was the commencement of the export trade, which in 1842 ran up to 586,907 bushels of wheat and 2,920 barrels of flour."

The above extracts mention a shipment of wheat in 1839, other than that of Newberry & Dole before mentioned. It is possible that there is a confusion in names, and that both accounts refer to the same shipment.

It appears that at that time the importation of flour to Chicago ceased, and from that date the city became an exporting point, not only for provisions, but for wheat and flour. The commodities heretofore named as first becoming articles of commerce have ever since been the most important in the trade of the city, and the con-

stantly increasing volumes of trade in them has been a never failing source of prosperity. As the country became settled, the agricultural products became more diversified, and, with the increased facilities for transportation, first by the completion of the canal, and later by the railroad system, all the diversified products of the richest and most extended agricultural region on the continent, poured with a never ceasing stream through the marts of the growing city, increasing its wealth and importance, in a ratio from year to year such as was never known before in the history of any commercial city on the earth. The wonderful growth of Chicago's trade cannot be told in narrative. It is a matter of comparative statistics, and will be thus treated further on. Supplementary to the export of beef and pork in 1833, and wheat in 1839, flour was first exported in 1839, in small quantity, by John Gage. Corn, now the most important cereal raised in the West, and the largest in quantity of any exported, was not shipped in large amount until 1847. Although raised in large quantity it was fed to stock, or otherwise found a local consumption until long after the surplus wheat had become a regular article of export.

In 1841, a memorial was presented to Congress for a further appropriation for the improvement of the harbor of Chicago, and for other relief. It was accompanied by most elaborate statistics of the trade and commerce of the city during the preceding six years and a full list of the mercantile firms which had suspended business since 1837.* The memorial was drawn and the statistics compiled by the late Thomas Hoyne, and are, so far as can be found, the only comprehensive statistics of Chicago trade and commerce, in the articles mentioned, compiled during the period treated, sufficiently accurate to be deemed of historic value. His statement of the trade and commerce of the city for the years 1836 to 1841, inclusive, with names of dealers, description of products, and valuation, is given below:

1836—Walker & Co. exported \$1,000 in hides.

1837—Walker & Co. exported \$10,000 in hides, and Absalom Funk \$1,000 in beef and pork. Total, \$11,000.

1838—Walker & Co. \$25,000 in hides and thirty-nine bags of wheat shipped in the steamer "Great Western"; Funk, \$1,000 in beef and pork. Total, \$26,000.

1839—Walker & Co., \$15,000 in hides; Giles Williams & Co., forty-three thousand six hundred and ninety-five bushels of wheat, † \$6,000, and corn and flour, \$780; C. McDonnell, merchandise, \$1,000; John Gage, flour, \$2,063; Payne & Norton, pork, beef and lard, \$10,000; and Funk, beef and pork, \$1,000. Total, \$35,843. Newberry & Dole shipped three thousand six hundred and seventy-eight bushels of wheat on the "Osceola" in October.

1840—C. Walker & Co., hides and wheat, \$185,000; Giles, Williams & Co., wheat, corn, flour, pork, beef, tallow and hams, \$5,280; Church & Selden, white beans, \$50; L. Lynd & Co., flour, salt and pork, \$180; C. McDonnell, merchandise, \$1,000; B. W. Raymond, flour, wool, pork, wheat and beans, \$3,000; S. B. Collins, lead, \$150; John Gage, flour, \$626; Crawford & Harvey, wheat, \$1,552; Bristol & Porter, wheat, \$10,120; John Finnerts, hides and furs, \$2,000; Payne &

* The list of suspended firms appears elsewhere, in its proper historic connection.

† There is no record of the shipment of this wheat to any Eastern market. It was probably bought of farmers and sold to the local trade of the city and surrounding country. The same may be said of a considerable portion of the hides, provisions, flour, corn, and other commodities mentioned in the report. The statement is valuable as showing the growth of trade in these important commodities, whether they were shipped to Eastern markets or sold at home. It is a comprehensive statement of the whole trade of the city embracing not only the exports, but the home trade also.

* The writer is not historically correct. There were other traders in Chicago at that time. See early history.

† The writer is in error concerning the article of pork. Both beef and pork were in fair supply after 1834. There were slaughtered that year in Chicago 4,400 hogs and 1,000 cattle.

Norton, pork, beef and lard, \$6,700; H. C. Stone, wheat, flaxseed and beans, \$2,271; Gurnee & Mattison, hides and furs, \$9,454; Funk, beef and pork, \$1,500. Total, \$228,883.

1841.—W. W. Saltonstall, 7,326 bushels of wheat, \$6,165; C. Walker & Co., 42,200 bushels of wheat, \$29,536; W. L. Whiting, 94,548 bushels of wheat, \$75,362; H. Norton & Co., 24,038 bushels of wheat, and 170 barrels of pork, \$24,432; Giles, Williams & Co., 43,695 bushels of wheat, 1,781 bushels of corn, 553 barrels of flour, 141 barrels of pork, 401 barrels of beef, 2,718 hams, 33 bushels of grass seed, 39 bushels of beans, \$33,733; Church & Selden, 162 1/2 barrels of beans, \$414.50; Harmon & Lewis, 8 tons of lead, \$640; Lynd & Co., 70 barrels of flour, salt and pork, \$240; C. McDonnell, merchandise, \$1,500; B. W. Raymond, pork, beans, flour, wheat and wool, \$6,000; Hiram Norton, butter, \$200; G. W. Merrill, 12,212 bushels of wheat, \$9,359; John Gage, flour, 1,852 barrels, \$6,144.75; Crawford & Harvey, 18,700 bushels of wheat, and 1,000 barrels of beef and pork, \$21,200; Dodge & Tucker, pork, lard and hams, \$5,000; Bristol & Porter, 19,493 bushels of wheat, \$10,120; Payne & Norton, pork, beef and lard, \$2,000; H. Buht, furs, \$3,000; S. O. Stone, flour, pork, flaxseed and beans, \$1,044; S. T. Otis, pork, hams and lard, \$500; Gurnee & Mattison, hides and furs, \$17,500; Absalom Funk, beef and pork, \$1,200; M. & S. Co., beef and pork, \$1,000; Smith & Webster, 42,000 bushels of wheat with beef, pork and flour, \$72,000. Total, \$328,290.25.

The statement also comprised the following schedule of products, shipped during the period which could not be apportioned:

Shipped by Newberry & Dole, 6,627 barrels of pork, beef, flour and whisky, valued at \$60,270; 50,136 bushels of wheat, \$50,136; 704 packages of furs, \$7,000; 3,235 hides, \$9,705; 40 tons of lead and shot, \$800.

Shipped by W. S. Whiting, 566 tons of pork, beef, flour and whisky, valued at \$33,360.

Shipped by Smith & Webster, 3,450 barrels of beef, pork and flour, valued at \$20,700.

Shipped by Bristol & Porter, 17,057 barrels of provisions and flour, valued at \$102,402; 244 tons of merchandise, \$14,000; 6,223 hides, \$18,669; and 421 packages of furs, \$4,210. Total shipments above named, \$321,252.

The aggregate value of the trade in produce and native products for six years, as shown in the foregoing statements, is summarized as follows:

1836, \$1,000; 1837, \$11,000; 1838, \$26,000; 1839, \$35,843; 1840, \$228,883; 1841, \$328,290.25;	
Total	\$631,016 25
Newberry & Dole and other shippers, not in above..	321,252 00

Total for six years, 1836 to 1841, inclusive..... \$952,268 25

The commerce of Chicago for this period, and for the two succeeding years, so far as imports and exports showed, was, according to the records of Captain Seth Johnson, Deputy Collector of the port, as shown in the following tabulated statements:

EXPORTS.		IMPORTS.	
1836.....	\$ 1,000 64	1836.....	\$325,203 90
1837.....	11,065 00	1837.....	373,667 12
1838.....	16,044 75	1838.....	579,174 61

Salt.....	27,038 bbl.	Staves.....	57,000
Whisky.....	2,585 "	Bark.....	430 cds.
Lumber.....	7,545,142 feet		

The shipments of wheat and flour up to the year 1842, inclusive, were given by early statisticians as follows:

Wheat, 1838, 78 bushels; 1839, 3,678 bushels; 1840, 10,000 bushels; 1841, 40,000 bushels; 1842, 586,907 bushels. Flour, 1842, 2,920 barrels, which was the first considerable shipment recorded in the annals of the trade.

No reliable statistics of the shipment of corn are extant earlier than 1847, although unimportant shipments were made prior to that date. In 1847, 67,315 bushels were shipped to Buffalo, Cleveland, Detroit, and other Eastern markets, the immense export trade in that cereal being inaugurated that year.

Oats also appears for the first time in the statistics of the year 1847, as an article of export, 38,892 bushels being shipped.

The first shipment of wool, 1,500 pounds, was made in 1842.

The following price current, from the Daily American, April 11, 1840, shows the variety of commodities then dealt in, and the prevailing prices at that time:

<i>Provisions:—</i>			
Beef, per 100 lb.....	\$ 4.00	@	\$ 4.50
Pork, per 100 lb.....	5.00	@	5.50
Pork, per bbl.....	12.00	@	14.00
Hams, smoked per 100 lb.....	9.00	@	10.00
Lard, per 100 lb.....	9.00	@	10.00
Butter, per 100 lb.....	15.00	@	20.00
Cheese, per 100 lb.....	10.00	@	12.00
<i>Flour:—</i>

Shingles, per M	2.50 @	4.00

Wood:—

Hickory, per cord	4.00	
Oak, per cord	3.25 @	3.50

From the foregoing the reader may trace the growth of the commerce of Chicago from its beginning in 1833 to 1843, at which time the city had fairly taken its place as the most important inland commercial mart in the country. In 1842, for the first time the exports were more than the imports. The succeeding five years to the close of 1847, at which time the Chicago Board of Trade was organized, the increase in the commerce and trade of the city kept pace with its own marvelous growth, and the rapid settlement and development of the vast region lying to the west and northwest, which then and ever since has been tributary to it.

The imports from the beginning showed the importance of Chicago as a distributing point for general merchandise, and marked it as the central inland emporium of trade it has since become. It is unnecessary in this connection to trace, except so far as appears statistically, the growth of the trade in dry goods, groceries, crockery, hardware, and other branches of merchandising from the beginning. The columns in the tables given and to be given, showing the increase of imports from year to year, are sufficient. They show

that in the distribution of goods the city has, in its increase, kept even pace with its exports of the natural products, and that it has with uninterrupted progress come to be, not only the greatest inland market for cereals and provisions, but the greatest inland distributing point for general merchandise in the world. So, from the small beginnings here recorded each year, the increasing tides of trade have ebbed and flowed, carrying out the golden harvest to feed the nations, and bringing in the products and manufactures of other climes and other people for the enrichment, enjoyment, and comfort of the millions who now acknowledge Chicago as their great emporium.*

Supplementary to statistics already given, the following shows the growth of trade and commerce for the succeeding five years, from 1844 to 1847, inclusive:

IMPORTS.		EXPORTS.	
1841.....	\$ 564,347 88	1841.....	\$ 348,362 24
1842.....	800,427 24	1842.....	650,302 20
1843.....	1,435,886 70	1843.....	1,008,207 94
1844.....	1,686,416 00	1844.....	785,504 23
1845.....	2,043,445 73	1845.....	1,543,519 85
1846.....	2,027,150 00	1846.....	1,813,468 00
1847.....	2,641,852 52	1847.....	2,296,299 00

The leading articles of export were:

	Wheat, bu.	Flour, bbls.	Beef, Pork, bls.	Wool, lbs.
1842 ...	587,207	2,920	16,209	1,500
1843	628,966	10,876	21,795	22,952
1844	891,894	6,320	14,938	96,635
1845	956,860	13,752	13,268	216,616
1846	1,459,594	28,045	31,224	281,222
1847	1,974,304	32,538	48,920	411,488

As showing the character and variety of the general mercantile trade of the city in 1847, the following analytical table of the imports of that year are given. The amount of goods, wares, and merchandise received at Chicago from the opening of navigation in 1847 to November 1 of the same year, not including goods landed here and taken to the interior, compiled from the original invoices of merchants, was as follows:

Dry goods.....	\$837,451 22	Liquors.....	\$86,334 67
Groceries.....	506,027 56	Tobacco and cigars.	3,716 00
Hardware.....	148,811 50	Ship chandlery....	23,000 00
Iron and nails....	88,275 00	Tools & hardware..	15,000 00
Stoves and hol'ware	68,612 00	Furniture trimming.	5,564 07
Crockery.....	30,505 00	Glass.....	8,949 24
Boots and shoes....	94,275 00	Scales.....	4,044 55
Hats, caps and furs.	68,200 00	Coaches, etc.....	1,500 00
Jewelry, etc.....	51,000 00	Looking glasses, etc.	2,500 00
Books and station'y.	43,580 00	Marble.....	800 00
Printing paper....	7,284 11	Oysters.....	2,500 00
Presses, type, and printing materials	7,432 50	Sportsmen's articles.	2,000 00
Drugs & medicines.	92,081 41	Musical instruments.	6,426 00
Paints and oils....	25,460 00	Machinery, etc....	30,000 00

Total value of imports of merchandise... .. \$2,259,309 83

The total value of miscellaneous articles imported in 1847, exclusive of lumber, and not included in the above, was \$117,210.29. It comprised: Salt, 24,817 bbls., and 5,537 sacks; coal, 15,782 tons; water lime, 1,618 bu.; besides grindstones, iron, fish, cider, and other articles altogether of considerable value.

The amount of lumber, etc., received at Chicago for

* The city from the beginning did a large retail trade in dry goods, groceries, hardware, boots and shoes, etc., with the settlers of the surrounding country. The wholesale trade in dry goods was started in 1845, by Hamilton & Day. Cooley, Wadsworth & Co., two years after commenced wholesaling dry goods on a large scale, and for years did a widely extended business throughout the West. In hardware and iron, William Blair was the pioneer in the wholesale trade, which he began in 1844. The wholesale trade in groceries began quite early, but the question as to who was the first wholesale dealer cannot be definitely decided. The jobbing trade in clothing was begun by Henry A. Huntingdon, in November, 1852, afterward Huntingdon, Wadsworth & Parks. Their sales for the first year amounted to \$300,000. C. N. Henderson & Co. were the first wholesale dealers in boots and shoes, beginning in a small way in 1851. O. F. Fuller commenced the wholesale trade in drugs, dyes and chemicals in 1852.

1847, from the opening of navigation to November 1, was as follows:

Plank, boards, etc., ft. 32,118,225	Shingles-bolts, cords. 328
Shingles, M 12,148,500	Tanner's bark, cords. 600
Lath, M. 5,655,700	Staves 50,000
Square timber, feet 24,000	Spokes 109,000
Total value, \$265,332.50.	

The exports from the port of Chicago during navigation season of 1847, were as follows :

Wheat, bushels. 1,974,304	Flax Seed, bushels. 2,262
Flour, barrels. 32,598	Mustard Seed, bushels. 520
Corn, bushels. 67,315	Timothy " " 536
Oats, " 38,892	Hay, tons, 415
Beef, barrels. 26,504	Cranberries, bushels. 250
Pork, " 22,416	Buffalo Robes, bales. 60
Hams and shoulds. 47,248	Dry Hides. 8,774
Tallow, pounds. 208,435	Deer Skins, pounds. 28,259
Butter, " 47,536	Sheep Pelts. 1,133
Beans, bushels. 440	Furs, packages. 278
Wool, pounds. 411,088	Ginseng, pounds. 3,625
Tobacco, " 28,423	Ashes, barrels. 16
Lard, " 139,069	Bristles, pounds. 4,548
Leather, " 2,740	Glue, " 2,480
Beeswax, " 5,390	Brooms, 3,168
Oil, gallons. 8,793	White-fish, barrels. 1,229
Lead, pounds. 10,254	Barley, bushels. 400
Hemp, " 6,521	Value, \$2,296,299.

Besides a large amount of merchandise, produce, provisions, grain, horses, cattle, salt, and supplies of all kinds sent to the lumber and mining regions, and different ports on the upper and lower lakes.*

The preceding pages have given a history of the commerce of Chicago from its beginning to a time when it was primarily established; and had attained such magnitude and importance as to have evolved a commercial association, the Chicago Board of Trade, which thereafter became the exponent of mercantile thought and the representative of the executive force of trade in the city. The specific history of this organization will be given further on.

From the annual reports of the Chicago Daily Democratic Press, the less elaborate reports of other contemporaneous journals, the reports of Federal officials, and from all other accessible sources of information, the following tables have been compiled showing statistically the commercial progress of Chicago from 1848 to 1857.†

Jesse B. Thomas's Statistical Report.
† The tables, to insure perspicuity, have in some instances, been extended beyond the date mentioned.

LUMBER.

* The statistics of the provision trade prior to 1851 were not sufficiently full or reliable to admit of tabulation, so large a part of the receipts of cattle were driven in on foot that it was not attempted to enumerate the receipts.

PRIMITIVE MANUFACTURES.

Following, in good time, the ample supply of grain, cattle, hogs and other products of the field and farm, came the establishment of various branches of dependent manufacture—milling, slaughtering, packing, rendering, soap and candle making, brewing, distilling, tanning, glue making, etc., which, as distinguished from the more intricate and varied manufactures of wood

ucts, and were naturally the outgrowth of a bounteous supply of the raw products of the soil. Other manufactures are treated elsewhere. It will be interesting to note in future volumes the immense development of these primitive branches of manufacture, and to mark how largely the manufactures of the great city have sprung from the agricultural products of which it is the great mart.

Of the branches above enumerated, the most impor-

FAT CATTLE FAIR IN 1856.

and metal, may be termed primitive manufactures. Of these there were in Chicago, in 1857, well-established, the following branches, with capital invested, value of manufactures, and number of hands employed, as below stated:

Description of Business.	Capital Invested.	Annual Product.	Hands Employed.
Flour	\$325,000	\$ 636,569	73
Beef and pork	154,100	1,250,000	175
Soap, candles, lard, etc.	296,000	528,021	100
Glue and neats-foot oil	20,000	25,000	15
Starch	15,000	75,000	25
High wines, beer and ale	497,000	1,150,320	165
Leather	332,000	432,000	126
Total	\$1,639,100	\$4,096,910	679

The above statistics are only of such branches of manufacture as spring directly from agricultural prod-

tant up to 1857 were: milling, packing, brewing and distilling, and tanning hides; and their gradual development is deemed worthy of further specific mention.

PACKING HOUSES AND MEAT PRODUCTS.—The first slaughter-house was built on the south bank of the North Branch of the Chicago River, south of the Bloomingdale Road and opposite the North Chicago Rolling Mills. The site of the original log slaughter-house, built by Archibald Clybourne in 1827, for the killing of such cattle as were required by the garrison at Fort Dearborn, is now (1883) occupied by an old frame building that was used by Archibald Clybourne, also as a slaughter-house, now falling into pieces from sheer old age and dry rot. In October, 1832, George W. Dole packed one hundred and fifty-two head of cattle for Oliver Newberry, of Detroit, which were purchased of Charles Reed, of Hickory Creek, at \$2.75 per hundred pounds; the hides and tallow being a perquisite of the slaughterers, who, in this instance, were John and Mark Noble, and the cattle were killed on the prairie.

near what is now the corner of Michigan Avenue and Madison Street. The packing-house was near the southeast corner of Dearborn and South Water streets; the barrels in which the beef was packed being brought from, and the beef shipped to, Detroit. In December, 1832, three hundred and thirty-eight hogs were killed and packed by Mr. Dole; they were purchased from John Blackstone for \$3 per one hundred pounds net, and were killed in the back yard of the warehouse and salted and stowed away in bulk until barrels could be made during the winter. Elias Colbert states, in his History of Chicago, that these meats were sent to New York from Detroit; also that in an old account book of Mr. Dole's was an entry of a sale of a barrel of mess-pork at \$6 and of a barrel of "one hog pork" at \$14. The following year Archibald Clybourne, the Government butcher for the Pottawatomies, engaged in the packing business, at his log slaughter-house on the east side of the North Branch, where he packed some two hundred and fifty head of cattle and about two thousand hogs; at this place also George W. Dole packed two hundred and fifty head of cattle and one thousand hogs; the average cost of the cattle was \$2.80, and of the hogs \$3 per hundred pounds net. In 1834, Oliver Newberry and George W. Dole had a slaughter-house erected on the South Branch of the river, where some three hundred head of cattle and fourteen hundred hogs were packed during the year. Gurdon S. Hubbard also commenced packing during 1834 in the old bank building, corner of Lake and La Salle streets, but, in consequence of the lack of barrels, the five thousand hogs killed had to be stowed away in bulk until the ensuing spring, when barrels were brought from Cleveland at a cost of \$1 apiece. In 1837-38 Mr. Hubbard built a packing-house on Kinzie Street, near Rush Street, where he carried on business until 1840, when he built a house on South Water Street, between Clark and LaSalle streets. There he continued the packing business until 1848, when he removed to the North Branch. In 1836, Sylvester Marsh, who packed with Mr. Hubbard from 1833 until 1834, built a packing-house on Kinzie Street, near Rush Street, and in 1838, or 1839, entered into partnership with George W. Dole.

Mr. Marsh remained in business in Chicago until 1855. He was, in the fall of 1883, still alive, and a resident of Concord, N. H. On October 22, 1883, he appeared before the United States Senate committee on education and labor, then in session at Boston, and, prompted by the questions of the members, told the interesting story of his long and busy life. From the published interview the extracts below are taken:

Q. Where were you born?

A. In Campton, N. H.

Q. That is about how far north from here?

A. By the old stage route it would be about one hundred and seventeen miles.

Q. You may state the places where you have since resided, without, at present, giving any particulars with regard to your residence.

A. I was born in 1803, and resided in New Hampshire until I was nineteen.

Q. At Campton?

A. Yes. From Campton I came to Boston; from Boston I went to Ashtabula County, Ohio; from Ohio to Chicago; (I was in Davenport, Iowa, in 1852-53, but did not stay there much); from Chicago I came back to Jamaica Plain, near Boston, in 1855; was there six years; went back to Chicago and staid there three years, until 1863. In 1863 I went to Brooklyn, N. Y., and was there from 1863 until 1864. I went from there to Littleton, N. H., for the purpose of building the railroad up Mount Washington. I lived there fifteen years and then came to Concord, where I now live.

Q. You are the inventor and constructor of the Mount Washington Railroad?

A. Yes, sir.

Q. My object in taking your testimony is, by the statement of your experience during your lifetime, to be enabled to give the people of the present day an idea or picture of the industrial life of the American people, and of their development during your lifetime and within your recollection. Your father was a farmer, was he not?

A. Yes.

Passing over the period of his life prior to his reaching Chicago in 1833, the interview continued as follows:

Q. How long did you remain there?

A. From 1828 to the winter of 1833-34.

Q. Where did you go then?

A. To Chicago.

Q. In what condition was Chicago then?

A. Chicago then had about three hundred inhabitants, besides Fort Dearborn, which had eighty soldiers and their officers, making it amount to about one hundred. There was no business done in the winter. Provisions were all taken from Ohio for them to live on.

Q. What made you go there?

A. Well, I heard of it, looked at it, and saw that it was a good point. I had faith in the growth of the country, and went there to open a market. There was no slaughter-house there, no place to kill a beef, and for sixty days I led the cattle out to an old elm tree that stood on Monroe Street, about where the court-house is, and there I took a tackle and swung them up on the elm after killing them.

Q. What animals did you kill?

A. Beef, principally; there was not anything else there to kill, the first little while that I was there. They had hardly any sheep.

Q. Were there any hogs?

A. Very few hogs. The hogs had all to come from Wabash, one hundred and fifty miles down. I went into that business afterward, and went down to Wabash and drove them up.

Q. You killed those animals to ship to the East?

A. No; I killed those for the local market, as much beef each day as was needed for home consumption.

Q. Did you commence the meat business there?

A. Yes, sir.

Q. You were the first one that established it?

A. Yes, sir.

Q. Tell us something of its development afterward.

A. Chicago grew very fast and in 1835 there must have been two thousand five hundred people there. We then went down to the Wabash country, as we called it, and bought cattle and hogs and drove them up for market. We did not ship them then. In 1836 they commenced building the canal, and in that year I packed six thousand hogs there, mostly for home consumption. They were building the Illinois & Michigan Canal then, and the contractors in 1837-38 took the pork for their men. The State failed to pay in 1838-39, and work on the canal was stopped. State bonds went down to twenty-five cents on the dollar, and the State issued what was called "canal-scrip" to pay the contractors what they owed them for work that they had done. That was afterward redeemed dollar for dollar. In 1836 the old town of Chicago was sold. The Government gave the State of Illinois every alternate section for fifteen miles wide, to aid in building the canal from Chicago to the Illinois River—Peru, I think, is at the end of the canal—and one section of that canal was right in the heart of old Chicago. It was sold in June, 1836, by the State of Illinois for a quarter down, and the balance in one, two and three years, and I think there was but one man in the city that made his second payment. That was P. F. W. Peck. The thing all burst up, and there was but that one man that made his second payment. They had all paid one-quarter down and given notes at interest for the rest. I did so myself, and so did others; but only one made the second payment.

Q. Why so?

A. Because everybody burst up—the banks and everybody else went up.

Q. What became of the canal?

A. The canal went along for awhile. Contracts were entered into by the State, and work went along until 1839, the State trying in every way to pay, and about that time they stopped. There was an appropriation of \$4,000,000 made by the State for internal improvements, but when the canal and railroad were partly done, it all burst up, and these improvements were not again begun until about 1847 or 1848.

Q. What was the condition of the people around there then? How were they clad, and how were they housed, and what was the condition of their wages?

Well, from 1836 to 1842, when the United States bankrupt law was passed, there was no responsibility. No man had anything, hardly, that he could call his own at the time the law was passed in 1842.

Q. You think that the bankrupt act was necessary, do you?

A. Oh, yes; they never would have started in the world, if it had not been for that.

Q. During that time how were prices?

A. In 1838 I paid \$6 a hundred pounds for pork in Chicago. In 1841, with a view of finishing the canal next summer, I bought pork for \$2, that is to say, I paid \$2 for all pork that weighed two hundred; for all hogs that did not weigh two hundred, I paid \$1.50 a hundred. I bought beef there for barreling in 1843-44 for \$2 a hundred, for the fore-quarters of the beef, if the ox weighed six hundred pounds, and \$1.50 per hundred pounds if he fell under it. That is the lowest price I ever heard of it being sold for.

Q. That was owing to the condition of credit and of the currency?

A. Yes, and then there was more of this stuff raised than was needed up to about 1846 or 1847, when the famine in Ireland cleaned out the West almost entirely. Wheat was worth twenty-five cents a bushel in 1844 in Chicago. Produce commenced rising from that time, and, you might say, has kept on rising since. Cattle and pork rose a good deal from a small price until in 1850 cattle were worth \$4 to \$5 a hundred pounds, and hogs were worth the same. There has been a steady increase each year. I made money for the reason that everything was going up.

Q. That comes down to when?

A. From 1844 to 1850.

Q. You still remained at Chicago?

A. Yes.

Q. I suppose Chicago was developing all the time?

A. Yes.

Q. Do you recollect about the price of wheat or corn in those days?

A. In 1848 corn was worth twenty-five cents a bushel.

Q. That is, at Chicago?

A. Yes. Freight then was as high as twenty-five cents a bushel to Buffalo.

Q. And from Buffalo on to Boston what was it?

A. I do not know what freight was to Boston then. I stayed in that provision business until I killed one hundred and eighty-five head of large cattle and five hundred hogs for a day's work, and that is not, comparatively speaking, more than a teaspoonful to what they have come to since I left the business. Chicago had no start, no life, until the Legislature passed what we called the relief law, that is, they gave us as much of the land as we had paid for. If a man had bought four lots and paid the full value of one, the relief law gave us one lot, and then gave us up our notes. That was the first sign of life after the break-up in Chicago. Then, you see, a man who was cleared through bankruptcy, if he could only raise a hundred dollars, had credit, but up to that time, when we were all in debt, nobody could trust his brother. In 1851 and 1852 I spent most of my time in northern New York and Vermont. In January, 1851, I received an appointment as agent for the Ogdensburg & Lake Champlain and Burlington & Rutland railroads. My business was to procure freight and passengers from the West over these roads, for the Boston market. In the fall of 1850, I shipped a propeller-load of about three thousand barrels of provisions to Ogdensburg, which were stored there till the railroad was completed in January, 1851. I bought seven thousand kegs of nails at the Keeseville Iron Works, on Lake Champlain, as return freight for Chicago. Nails were worth only \$2.87½ per hundred, but during the next six months they rose to \$4 per hundred. These northern railroads were not successful in getting much business for the Eastern markets for a few years, as they could not compete with the New York Central Railroad and the Erie Canal.

Q. From Chicago where did you go?

A. I went from Chicago to Davenport, Iowa, in 1852. I was there two years.

Q. Did you follow the same business there?

A. No; I was in the grain business there.

Q. How were the prices of provisions there?

A. Well, hogs were \$3 a hundred in Davenport in 1852.

Q. What are they worth now?

A. I don't know what they are worth now. They vary. They have been as high as eight, ten and twelve cents a pound, though they are down now, I believe.

Q. You do not know the price of other kinds of meat—beef and mutton, at Davenport at that time, do you?

A. No.

Q. You were in the grain business mostly?

A. Yes.

Q. Do you recollect about the prices of grain there?

A. Corn was worth twenty to twenty-five cents a bushel; wheat from forty to fifty cents; oats about twelve cents.

Q. Did you ship to the East?

A. I did, from Chicago to Buffalo. I did not ship much from Davenport. In 1852 I went into the grain drying business, making kiln-dried meal for the West India Islands, from a process of my own invention. I made five hundred barrels of kiln-dried meal a day, and shipped it to the West India Islands.

Q. What sort of market did you get for it?

A. A very fair market. The negroes in the West India Islands ate it.

Q. Did you ship it down the Mississippi?

A. Some of it, but most of it by way of New York. I made money the last year that I sent kiln-dried meal there, by my own process.

Q. Is the invention still in use?

A. Yes; much of the article is put up now for the European markets under my same brand, "Marsh's Caloric Dried Meal." I have five patents for drying grain. There is not so much of this kind made as there used to be, because farmers take care of their own corn now, and if the corn begins to heat they will put it into cars. When I began it they would put it in their warehouses and let it stay there awhile, and it would heat.

Q. From Davenport where did you go?

A. I went to Chicago. I did not really move to Davenport.

Q. You went back then to Chicago. How long did you remain there?

A. I remained in Chicago until 1855, all the time.

Q. There was no special change in the condition of things in Chicago, I suppose, during that time, that you remember?

A. No.

In 1839, Oramel S. Hough and R. M. Hough were with Sylvester Marsh. In 1837-38, D. H. Underhill came to Chicago and engaged in the packing business for a brief period, killing his hogs near Absalom Funk's butcher-shop, corner North Water and North State streets. About 1841, Eri Reynolds commenced packing in Dole's packing-house. In the winter 1841-42, Oren Sherman and Nathaniel Pitkin, a dry-goods firm, packed several hundred hogs, pork being then at the lowest price ever known in Chicago; Charles Cleaver stating that several loads of hogs were bought by him at that time for \$1.25 per hundred. Archibald Clybourne during the winter of 1842-43 slaughtered and packed for William and Norman Felt—William Felt & Co.—about three thousand head of cattle for shipment to New York City; alleged to be the first beef packed in Chicago for an eastern market. In 1843-44, Thomas Dyer and John P. Chapin commenced packing in Reynolds' house, associating with them Julius Wadsworth, in 1844, and then built a packing house on the South Branch near North Street; being succeeded in 1845 or 1846, by Wadsworth & Dyer. During the season of 1844-45 this firm packed the first tierce of beef ever put up in Chicago for the English market; the barrels for the firm's use were furnished by Hugh Maher. In 1843, George Steel packed hogs on South Water Street, near the corner of Franklin Street. About 1849, William B. Clapp entered the pork packing arena. In 1850, Oramel S. and R. M. Hough built a packing house on the South Branch at a cost of \$3,000; in 1853, they built a large stone packing-house costing \$20,000, which was burned in the fall of 1856. They rebuilt in 1857 at a cost of \$25,000. In 1852, Orville H. Tobey and Heman D. Booth commenced packing pork; and, in 1854, John L. Hancock—as agent for Craigin & Co., of New York—built a packing house on the South Branch at a cost of \$45,000, and did what was then deemed an enormous business. In 1853-54, Andrew Brown & Co. commenced packing, as did Moore, Seaverns & Co., in the fall of 1854. The following table exhibits the capacity and valuation of the packing houses in 1858, not including the value of the real estate.

	Capacity Per Day.		Cost of Erecting Packing Houses.
	Cattle.	Hogs.	
G. S. Hubbard & Co.....	200	1,000	\$10,000
Hough & Co.....	225	1,000	25,000
Cragin & Co.....	400	1,000	45,000
Thomas Nash (afterward Van Brunt & Watrous).....	400	1,400	19,100
Moore, Seaverns & Co.....	200	600	15,000
A. Brown & Co.....	200	600	10,000
Tobey, Booth & Co.....	600	10,000
John Hayward.....	140	400	5,000
Jones & Culbertson.....	1,200	9,000
J. & J. Stewart.....	300	3,000
George Steel & Co.....	300	3,000
W. Leland.....	100
Small Packing Houses.....	500
*Total.....	1,765	9,000	\$154,100

Beef packing was for years the most ostentatious business in Chicago, and gave the newspapers of the day a most splendid foothold for boasting. Compared with the volume of business in that line now carried on, when single houses do more business daily than was at that time done in a year by the whole city, there was little to brag of; but the journalists of then, as now, looked back for comparisons, and found in them the grand satisfaction which came from past progress and unlimited hope for the future. Below are two extracts concerning the business in its early days from the Daily Democrat of September 26, 1848:

"The beef-packing season has opened unprecedentedly early this year, and already a brisk little business is being done by one firm in this city—Messrs. Marsh & Sherry. The firm kills from fifty to sixty head per day, and has already shipped seven hundred barrels of beef to the East. Chicago will rely for its supplies of cattle this season principally, if not altogether, on the northern portion of the State. One firm, Wadsworth, Dyer & Co., have already contracted for one thousand head of cattle. We have seen letters to Mr. Marsh from his commission house in Boston, stating that his beef takes the lead altogether of that shipped from Maine; also one from England to Wadsworth, Dyer & Co., stating that as long as their beef is kept up to its present standard there is no fear but it will compete successfully with the best Irish brands. This firm kills none but the heaviest cattle, and uses foreign salt altogether in packing. In consequence of this superiority most of the beef packed in this city goes to England or Boston. It is expected that eighteen thousand to twenty thousand barrels of beef will be packed this season, or perhaps more. Of this Marsh & Sherry expect to pack four thousand barrels, Wadsworth, Dyer & Co. ten thousand, and the remainder by Slocum & Clapp and one other firm. Barrels are selling at \$1.00, at which price contracts for large numbers have been made."

In 1850, November 16, the Gem of the Prairie gave the following exhaustive review of the business, the mention of the firms and business done being as follows:

"The slaughtering and rendering establishment of Sylvester Marsh is situated upon the beach immediately north of the North Pier. The packing-house is situated on the bank of the river, at the corner of North Water and Wolcott streets. It was built during the present year, is three stories high, and sixty by eighty-four feet in size. He employs seventy-five hands, and slaughters one hundred and eighty-five cattle per day. He pays out for the season, cash, for cattle, \$90,-

* From Annual Review of Chicago Daily Press and Tribune for 1858.

000; for salt and barrels, \$15,000; for labor, \$5,000—total, \$110,000.

"The slaughtering and packing house of Gurdon S. Hubbard is situated upon the North Branch, on East Water Street, between Michigan and Illinois streets. Number slaughtered per day, one hundred and five; hands usually employed, seventy-five. He packs this year for Norman Felt, of New York; Joseph Draper, of Boston, and W. Smith, of New Haven. Pays for cattle, \$100,000; for salt and barrels, \$21,000—total, \$121,000.

"The establishment of Wadsworth, Dyer & Co. is situated upon the South Branch, in the suburb of the city. The various buildings cover half an acre. The number of cattle slaughtered this season by the firm will probably exceed six thousand. The firm employs one hundred and ten men, and slaughters two hundred and ten head of cattle per day. They commenced operations here seven years ago. Their brand in the London and Liverpool markets take precedence over beef from every other quarter of the world. Their hides are purchased by Gurnee, Hayden & Co., and their refuse is carted by C. Beers to his farm beyond Bridgeport. Paid for cattle, \$132,000; for salt, barrels and labor, \$28,000—total, \$160,000.

"R. M. & O. S. Hough are located a short distance below Bridgeport, immediately on the banks of the river. Their building is thirty by sixty feet in size, with wings. They are working fifty hands, and slaughtering one hundred and thirty head of cattle per day. Cash paid for cattle, \$70,000; for salt, barrels and labor, \$15,000; total, \$85,000.

"Passing down the river until within a short distance of the tannery of Gurnee, Hayden & Co., we come to the slaughtering and packing house of William B. Clapp. He is killing one hundred cattle per day, and working forty hands. He has a contract for supplying one thousand eight hundred barrels to the United States Navy. Cash paid for cattle, \$56,000; for salt, barrels and labor, \$16,000; total, \$72,000.

"A little further down is the establishment of Eri Reynolds, a brick building, fifty by one hundred and twenty feet in size. He packs for himself and W. & H. Felt, of Earlville, N. Y., employs thirty hands and slaughters about ninety head of cattle per day. His estimates for the season are: Cash for cattle, \$48,000; for salt, barrels and labor, \$10,000; total, \$58,000.

"The seventh and last establishment, that of Messrs. Clybourne & Ellis, we did not find time to visit. It is situated upon the North Branch, about a mile above Ogden's Bridge. They will slaughter this season about two thousand head of cattle, and the cost of the same, including salt, barrels, labor, etc., will amount to about \$45,000.

"Hence we have twenty-seven thousand five hundred cattle packed and \$651,000 paid out. The majority of cattle are fattened in Illinois, McLean County bearing the palm; but a portion are brought from Indiana and Iowa."

The first cattle-yards were opened in 1848, at the "Bull's Head," and occupied the immediate vicinage of Madison Street and Ashland Avenue; but they were but a make-shift for supplying the necessities of the growing cattle trade, and the live stock dealers became disgusted with the long drive to and from the yard to railroad depots and slaughter houses. In 1856, the wants of the public were met by John B. Sherman, who leased the Myrick property on the lake shore, north of Thirty-first Street, and laid out what were known as Sherman's yards, and this entrepot at once took the

place of the old Bull's Head, and, being upon the line of the Illinois Central Railroad, was eminently adapted to the needs of the live-stock traffic.

FLOURING MILLS.—The first flouring mill erected in this city was located on the South Branch and was built by Jared Gage in 1836. In partnership with one Lyman, he conducted this mill until in January 1847, when with John C. Haines he purchased the Chicago Mills. These mills were massive, yet commodious buildings of stone situated on South Water Street and the river, and had excellent facilities for receiving grain direct from vessels or canal boats, and for loading the same. They had four run of buhrs and appropriate machinery for elevating and handling grain, all driven by a pair of reciprocating engines, to supply whose consumption of steam required the use of twelve hundred tons of coal annually. The total investment in the plant was \$150,000; in 1854, the proprietors employed thirty men and ground one hundred and twenty-five thousand bushels of wheat and ten thousand bushels of corn, turning out twenty-five thousand barrels of flour and six hundred thousand pounds of meal. At that time the out-put of these mills was nearly all consumed in this city; in the year mentioned less than two thousand barrels were shipped to a foreign market.

The Hydraulic Mills, operated by the old water works engine, were built in 1842 by James Long. They were situated at the corner of Lake Street and Michigan Avenue. In 1848 they were owned and run by J. P. Hodgkiss & Co.; and in that year ground up over one hundred thousand bushels of grain, seventy-five thousand bushels of this amount being wheat. This would be turning out nearly fifty barrels of flour per day. Speaking of these mills the Democratic Press in its commercial review for 1854 says: "The Hydraulic Mills, corner of Lake Street and Michigan Avenue, have until the last season done a large business in the manufacture of flour. Since the construction of the new water works, these mills, having fulfilled their destiny, have brought their business to a close. From the first of January, 1854, to the 28th of September, which was the time included in their last year's operations, they ground eleven thousand barrels of flour and two hundred and ten thousand pounds of corn meal."

In that year there were but two mills in operation in the city; the Hydraulic Mills, having shut down in September; and a steam mill built in the spring of 1854, by Messrs. Ricord, Bierlein & Co., was in the fall of the same year, completely destroyed by fire. The remaining one, besides that of Gage & Haines, already mentioned, was known as the "Adams Mills," and was an extensive and superior establishment situated on North Water Street and the river. Thirty men were employed here, and in 1854 the output was one hundred and fifty thousand bushels of wheat and five thousand bushels of corn. This was equal to thirty thousand barrels of flour and three hundred thousand pounds of cornmeal. The Adams Mills brand of flour was considered a choice article in the markets and was much sought after by Eastern shippers.

In July, 1855, the Hydraulic Mills were again started, making three mills in operation for that year, the total output of which was nearly eighty thousand barrels of flour, an increase for the year of over thirteen thousand barrels.

In 1856 there were the following mills in operation: Gage & Haines, South Water Street, capital invested \$150,000, flour manufactured 35,000 barrels, value of the same \$250,000, hands employed 30; Adams & Co.'s Mills, North Water Street, capital invested \$125,000,

flour manufactured 38,000 barrels, value \$240,000, hands employed 25; Empire Mills, corner North and LaSalle streets, run by Ricord, Bierlein & Co., capital invested \$10,000, flour manufactured 6,000 barrels, value \$39,000, number of hands 5; N. A. Chase, Jr., 12 and 14 North Canal Street, capital invested \$10,000, value of manufactures \$57,569, number of hands 7; Stevens, Lane & Co., 143 West Lake Street, capital invested \$3,500, cost of building \$8,000, barrels of flour manufactured 12,000, number of hands 6; Novelty Mills, owned and run by James McNair, 53 State Street, capital invested \$5,000. A summary of the above statements would be as follows:

Capital invested.....	\$325,000
Value of manufactures.....	636,569
Barrels of flour.....	89,000
Hands employed.....	73

During the year 1857, three new mills were built; Shawmut Mills, Star Mills and the mills of Grist, Robbins & Co. The total output of flour of all the city mills for the year was 96,000 barrels.

BREWING.—The immense brewing interests of Chicago had their origin in the small beginnings of William Lill and William Haas, in September, 1839. They were really employed by William B. Ogden, who established Mr. Lill in business, at the corner of Pine Street and Chicago Avenue. The "brewery" was a little tenement building in that locality, and the extent of Mr. Lill's manufacture, at first, is said to have averaged about nine barrels per week. After a few years Michael Diversey entered into an active partnership with Mr. Lill, and Mr. Ogden's silent connection with the business ceased. Under the management of Lill & Diversey, the "Chicago Brewery" grew by 1857 to be the most extensive establishment of the kind in the West. It was situated on the corner of Pine Street and Chicago Avenue, the buildings covering a whole block. At the time of the panic of 1857 the firm had invested nearly \$250,000 in their business, and successfully weathered the financial storm. Besides being known as good business men, Lill & Diversey were noted for their benevolence and generosity, the latter being a large benefactor to the German Catholic churches of Chicago.

James Carney, who had formerly kept a grocery store, commenced brewing in a small way in 1840. His establishment was on South Water Street, between State Street and Wabash Avenue. He continued the business until 1855, at which time he retired, renting his brewery to John O'Neill.

F. Busch was also an early brewer, his establishment being called the "North Brewery," and was situated on the Green Bay road, near the lake shore, North Side.

The "Columbian Brewery" was built by J. J. Sands, on the corner of Pine and Pearson streets, in 1855. He manufactured cream ale.

In October, 1855, James Carney, one of the oldest brewers of Chicago, rented his establishment to John O'Neill.

In 1856 Conrad Seipp, now one of the most extensive and wealthy brewers in the West, commenced this business in Chicago, investing \$18,000 and turning out \$8,960 worth of malt liquors the first year. In 1857 the entire capital invested in breweries, outside of Lill & Diversey's did not exceed \$70,000.

The annual report of the Democratic Press, issued January 1, 1855, names and locates the firms engaged in brewing as follows:

"Frederick Burroughs—brewing and malting—Lake Street, near Union Street, West Side.

"The North Brewery (F. Busch)—Green Bay road, near the lake shore, North Side.

"James Carney—No. 39 South Water Street.

"J. A. Huck—Wolcott, corner of Division Street, North Side.

"Lill & Diversey—Chicago Avenue, corner of Pine Street, on the lake shore. The largest establishment in the city and the West. They manufacture all kinds of ale, porter, vinegar, etc.

"Union Brewery (George Metz)—Wolcott Street, north end, near the lake.

"Garden City Brewery (John Parker), erected in 1854—No. 115 Dearborn Street.

"J. S. Saberton, brewer and distiller—Wolcott Street, near the cemetery.

"North Star Brewery (Isaac and John A. Irvin)—Wolcott Street, near North Division."

The names of brewers engaged in the business January, 1857, with statistics of the business for 1856, were as appears below :

NAMES OF FIRMS.	Capital invested.	Value of manufactures in 1856.	No hands employed	Bbls beer manufactured.	Bushels grain used.	Pounds Hops consumed.
Conrad Seipp..	\$18,000	\$ 8,960	6	1,120	2,240	2,000
George Metz. .	15,000	19,200	6	2,400	4,800	4,000
Braham & Co..	8,000	8,000	2	1,000	3,000	2,400
V. Busch.....	6,000	25,600	4	3,200	6,400	600
J. F. Rodermyer	8,000	40,000	6	5,000	8,750	8,000
Bucher & Co..	5,000	11,200	2	1,400	2,800	832
Blattner & Co..	1,000	2,000	2	250	700	700
S. Irwin.....	3,000	8,000	2	1,000	2,000	2,000
— Spriggs.....	3,000	7,200	3	900	1,800	900
Total	67,000	130,160	33	16,270	32,490	21,432

At that time there were several rectifiers, vinegar manufacturers and a few small brewers whose trade statistics do not appear in the above.

DISTILLING.—The business of distilling high wines came in quite early, but to whom belongs the honor of being the pioneer in the business has not been ascertained. In 1854, there were two quite extensive distilleries. D. Ballentyne's establishment was on the lake shore, south of Twelfth Street; and that of A. Crosby & Co. on the North Branch, near Chicago Avenue. J. S. Saberton also distilled on a small scale, in connection with his brewing business. In 1857, only two distilleries were reported as follows :

Charles H. Curtiss (successor to Ballentyne)—lake shore, south of Twelfth Street. He had a capital invested of \$50,000, employed twenty-five hands, and paid out for raw material and wages \$150,000. He produced, annually, 10,000 barrels of high wines, valued at \$150,000.

A. & W. H. Crosby & Co.—North Branch, had invested \$75,000, employed fifty hands, and consumed annually 300,000 bushels of grain and 3,000 tons of coal. The yearly production of high wines was 1,050,000 gallons, valued at \$310,000.

The comparative summary of the brewing and distilling business made by the Democratic Press at the close of 1856 was as follows :

CAPITAL.	
Capital invested.....	\$297,000
Unreported (estimated).....	200,000
Total.....	\$497,000
Capital invested in 1855.....	397,200
Increase in 1856.....	\$99,800

VALUE OF MANUFACTURES.

Value of manufactures.....	\$950,320
Unreported (estimated).....	200,000
Total	\$1,150,320
Value of manufactures in 1856.....	826,645

TANNING.—During the year 1831 John Miller, the brother of Samuel Miller, built a tannery just north of the latter's tavern, near the junction of the two branches of Chicago River. They were in the business together, and in the spring of 1832 Benjamin Hall joined them in the enterprise. They continued in that business for a number of years. W. S. Gurnee was one of the earliest of this class of workers. In 1843 the "Chicago Hide and Leather Company" was formed, with Mr. Gurnee as president. Gurnee, Hayden & Co., Gurnee & Yoe, etc., are firms whose names are familiar to early settlers. George Bickerdike and James Knox also had tanneries on the South Branch for a number of years. In November, 1848, George Burr established a morocco leather manufactory in a large four-story building, on the South Branch.

The business of tanning did not, however, assume any large proportions until subsequent to 1857. A reference to the table showing the receipts and shipments of hides, show that nearly the whole amount received and slaughtered were shipped to Eastern markets.

SOAP, CANDLES, OILS, ETC.—In 1833, Elston & Woodruff commenced to make soap and candles, in a log barn which had already been built on Kinzie Street, at the junction of the North Branch with the main river. In 1835 Charles Cleaver, a young Englishman, purchased Mr. Woodruff's interest, and the next year bought Mr. Elston's share in the business. Mr. Cleaver removed his factory to the corner of Kinzie and West Water streets in 1836. His enterprise had so prospered by

Charles Cleaver

1837, that he was obliged to erect a two-story-and-basement building, situated on the corner of Washington and Jefferson streets, where he remained for five years. In 1842 he moved to the corner of Madison Street and Canal, and in 1849 to the North Branch, near Division Street. Mr. Cleaver changed his location to Cleaverville, now Oakland, in 1851. Here, notwithstanding the smiles and even derisive laughter of many who thought him foolish in establishing a large manufacturing industry "so far out in the country," he erected a three-story brick building, where he not only made soap and candles, but also the packing boxes desired for his trade. He built a pier into the lake, at which vessels loaded and unloaded, and had the satisfaction, a few years afterward, of seeing the Illinois Central, Michigan Central, and Chicago, Alton & St. Louis roads pass in front of his factory. In 1857 the village of Cleaverville was laid out upon Mr. Cleaver's land. Until that year his fac-

tory did nearly all the rendering for Chicago packers, and was one of the most extensive in the city.

Charles Shillitoe & Co. commenced to manufacture soap and candles in August, 1836, but the firm was dissolved in about a year. Joseph Johnston was also engaged in this line of business. "The Chicago Oil Mill" was established by Scammon & Haven in 1852, the building being located on the South Branch near Van Buren-street bridge. The "Chicago Oil Manufacturing Company" was formed in 1855, with F. C. Sherman as president.

Christian Wall & Sons commenced the manufacture of glue and neats-foot oil in August, 1855. Their factory was situated on the west side of the North Branch, above Chicago Avenue. The capital invested was \$10,000. Up to January 1, 1856, they had manufactured one hundred and fifty barrels of glue, one thousand two hundred gallons of neats-foot oil, and four thousand pounds of tallow. They employed fifteen hands.

A starch factory was also started in 1855, at Cleaver-ville, by M. L. Keith.

The beginning and development of other manufactures, farther removed from the native products, and requiring more special skill, were as appears in the following sketch of

EARLY MANUFACTORIES OF WOOD, IRON, ETC.— Although the hypercritical may deny that a blacksmith is, strictly speaking, a manufacturer, the development of this individual into the foundryman is so gradual, and, if the Knight of the Anvil is successful, so certain, that for all practical purposes a starting point in this topic of "Early Manufactories" will be found here. In most new countries of the Northwest the horse and the man occupied the wilds together; and man's mute but indispensable help-mate may be said to have not infrequently been the means of establishing the first branch of manufacture therein. The first blacksmith to visit Chicago, of whom there is any record, was Jean Baptiste Mirandea, the pioneer settler of Milwaukee, who used to come down from there to repair the soldiers' guns and shoe their horses, long before the first Fort Dearborn was destroyed. After the second Fort Dearborn was built, David McKee was appointed Government blacksmith, his shop being situated near the Agency House, at the foot of State Street. Later came William See, sometimes called "Rev.", a Methodist exhorter, whose daughter, Leah, became Mrs. James Kinzie. In the fall of 1833 Mathias Mason opened a blacksmith shop. Clement Stose and Lemuel Brown established themselves about the same time. These include the earliest blacksmiths or "iron manufacturers," of Chicago; although it must be acknowledged that David McKee's little shop and scant kit of tools bore but a slight family resemblance to the machine shops and rolling mills of to-day.

Lemuel Brown was born in Cumberland, R. I., December, 1784, and died at the residence of his nephew, D. G. Brown, in Kenwood, December 29, 1883; at the unusual age of ninety-nine years and thirteen days. In the fall of 1832 Mr. Brown left Massachusetts for Chicago, being sent by the Government to take charge of the firearms of Fort Dearborn. He was delayed at Cleveland, Ohio, and made his way to Chicago by team during the winter. He arrived in Chicago in the spring of 1833, and with the exception of brief intervals, has resided here since that time. He resided in Hyde Park for the last six years, and voted at every village and school election during his residence. He voted for every President but two, voting for the first

time, though under age, by virtue of the ancient law providing that each free-holder to the extent of four hundred dollars was entitled to vote. He was a consistent Whig, and since the day of the present political parties, a staunch Republican. He was an expert steel temperer by trade, and worked at the forge until past eighty years of age.

In 1832 a number of saw-mills were built along Hickory Creek, and one at the mouth of the slough which then emptied itself into the river just south of Division Street, Chicago. The mill was burned in 1834, and refitted in 1835. During the summer it was mostly engaged in sawing out three-inch plank, which were used in covering the North Pier. Colonel G. S. Hubbard and Captain Bemsley Huntoon were, successively, proprietors. The latter operated it for five or six years, adding to the saw-mill a shingle machine. Captain Huntoon's mill and the water-power establishment of John Miller, fourteen miles up the North Branch, sawed out such timber as grew adjoining, consisting of oak, elm, poplar, white ash, etc. Of such "lumber," in its green state, most of the houses were built, and the reader can easily imagine what these structures must have looked like after the summer's heat had warped and twisted the material.

In the spring of 1833, Tyler K. Blodgett established a brick-yard, on the North Side, not far from the river bank, between Dearborn and Clark streets. He engaged Henry S. Lampman, then of Ann Arbor, as a workman. As Mr. Blodgett operated the first brick-yard in the city, so Mr. Lampman was undoubtedly the first brick-maker. If any brick were manufactured in Cook County before then it is not known. From this yard came the brick for the first building constructed of this material—the dwelling house of Mr. Blodgett, afterward occupied and added to by Colonel M. E. Stearns. The structure was located across the river, opposite this yard, and was originally a one-and-a-half story building, twenty feet square. It was upon the eighth day of October, 1833, that a young man named Asahel Pierce arrived in Chicago from Vermont, and commenced the erection of a blacksmith shop, on Lake Street, corner of Canal. Being unable to find suitable lumber in Chicago, he was obliged to haul his material from Plainfield, forty miles,* and, after he had purchased Rev. Mr. See's old set of tools, he had a money capital of only a few dollars with which to establish himself in business. But Mr. Pierce set out with such a determination to succeed that he was soon obliged to enlarge his shop. He obtained from John T. Temple & Co., an order for doing the ironing for the first stage line between Chicago and St. Louis. This was in January, 1834. In the spring of that year he commenced the manufacture of the old-fashioned "Bull" plow, with wooden mould-board. This was certainly the first agricultural implement manufactured in Chicago, and the first one made in the State north of Springfield. Mr. Pierce afterward devised many improvements in plows, manufacturing the first steel, or self-scouring plow in the West. In the fall of 1835 David Bradley came from Syracuse, N. Y., in the employ of William H. Stow, to assist in the erection of the first foundry, located on Polk Street, on the west side of the South Branch. The money for the construction of the so-called "Chicago Furnace," was furnished by Jones, King & Co., who, at this time, employed William H. Stow & Co. The old hardware firm of Jones (William) & King (Byran) had been formed in 1834. The next year W.

* This circumstance leads to the belief that, at that time, there was no large manufactory of lumber nearer than Plainfield.

B. Clarke was admitted to the partnership, forming the "Co." It was this management which furnished the money referred to. The first castings were made as early as December, 1835. In March, 1837, Stow & Co., formed a partnership with King, Walker (J. H.) & Co., (E. Peck), the old firm of Jones, King & Co. having been dissolved, and commenced the operation of a foundry, under the firm name of William H. Stow & Co. They continued to operate it until about 1842.

In the spring of 1834 Briggs & Humphrey inaugurated the business of manufacturing wagons and carriages by starting a small shop on Randolph Street. They continued in partnership for some six or seven years. Soon afterward, Peter Schuttler, who, by 1857, had one of the largest establishments of the kind in the West, also started a small wagon shop.

Charles Morgan commenced the manufacture of furniture in the spring of 1837. His large factory on Lake Street was burned in 1852, but was rebuilt. In 1857 he occupied a five-story building and had invested \$60,000 in the business.

Among the first sash, door and blind factories, if not the first, was that established in 1837 or 1838 by Ira Miltimore, on the South Branch. It was purchased by David Scott in 1838 and was burned in July, 1842.

One of the earliest machinists and foundrymen of Chicago, and among her prominent citizens was Elihu Granger, Alderman for a number of years and, later, Superintendent of Public Works. Although a native of New Hampshire, he became a resident of New York when a young man, following in various localities his vocation of mechanic and millwright. He came to Chicago in the winter of 1836 for the purpose of building Lyman & Gage's flour mill, the first one erected in Chicago. It was situated on the west bank of the Chicago River, at what is now the west end of Van Buren-street bridge. The machinery was furnished by the Auburn (N.Y.) State Prison. In February, 1837, having completed his contract with Lyman & Gage, Mr. Granger became a heavy canal contractor, and like all others of that class, became financially embarrassed, being paid in State scrip and bonds upon which he was able to realize but comparatively a small amount. In 1839 Mr. Granger pre-empted Block 4, of the original town, on the north side of Chicago River, which was canal land, and established thereon a small foundry and finishing shop. He made a specialty of manufacturing machinery for elevating grain. The locality of Mr. Granger's first foundry was North Water Street, west of Clark-street bridge.

An attempt has been made in the foregoing pages to chronicle the first appearances of those branches of manufacture previous to 1840, which afterward developed into magnitude, viz., the manufacture of iron and of wood in its various forms. The full list of manufactures of Chicago in 1839 compiled from Fergus's directory for that year, the files of the Daily American, and other sources and including primitive manufactures was as follows:

"Candle and Soap-Makers.—Charles Cleaver, South Branch; Joseph Johnston, West Washington Street.

"Fanning Mill Manufacturers.—James V. Dickey, North Clinton Street; Albert C. Ellithorpe, Monroe, near Franklin Street.

"Iron and Brass Founders and Machinists.—Elihu Granger, foundry North Water Street, near LaSalle; P. W. Gates, machinist, No. 42 Canal Street; William and John Rankin, brass founders, No. 55 Clark Street; William H. Stow, foundry, West Randolph Street.

"Wagon and Carriage-Makers.—Briggs & Hum-

phrey, Randolph Street, near Franklin; John Lang, North State Street and Kinzie; John Burgess, Randolph, east of Wells; Henry Bower, Wabash Avenue, near Randolph.

"Brewers and Distillers.—William Haas, brewer, corner of Chicago Avenue and Pine Street; William Lill, brewer, same location; Edward Nicholson, distiller, Illinois Street, near the lake.

"Steam Saw Mill.—Captain Bensley Huntoon, proprietor, North Branch.

"Sash and Door Factories.—Francis McFall, Market Street; Ira Miltimore, South Branch; Edwin B. Colvin, corner North Water and Dearborn streets.

"Tanners.—James H. Knox, Wells Street, south of Polk; John Miller, North Branch; Marvin M. Ford, Clark, northeast corner of Madison.

"Flour Mill.—South Branch, Canal Street, Lyman & Gage, proprietors.

"Miscellaneous.—Charles M. Gray, grain cradle factory, No. 78 Dearborn Street; Hayward & Co., buhr mill-stone manufactory, Kinzie Street; Noah Scranton, block and pump-maker, corner North State and North Water; V. Detrich, match-maker, corner Division and North State; John Penny, brick-maker, North Branch."

Among the earliest of the metal workers who commenced business about the time that William H. Stow & Co. assumed charge of the "Chicago Furnace" in 1839, were the brothers William and J. Rankin. They established a brass foundry, on the corner of Clark and Illinois streets. Hiram P. Moses, Mr. Stow's successor in 1842, owned a shop at this time on the South Branch, at the Polk-street crossing. The firm, at first B. P. Andrews & Co., became afterward Moses & Ayres, and then Hiram P. Moses. The latter was a brass founder and steam-engine and boiler builder. Mr. Moses was perhaps the first manufacturer in Chicago to make a specialty of steam-engine building. In later days his foundry was known as the "Chicago Steam-Engine Works." At this establishment, in 1848, the engines and boiler of the propeller, "A. Rossetter" were made. The "Chicago Eagle Foundry," also operated a similar concern in 1840.

It will be remembered that, in 1839, Elihu Granger established his iron foundry on North Water Street, upon canal land. On account of a decision of the court against his claim, in 1842 he was obliged to change his location to the corner of Franklin and Indiana streets, where for many years he did a large and successful business, adding good facilities for iron and brass castings. In 1853 Mr. Granger sold out to his sons, and they conducted the business until the panic of 1857, when they were obliged to make an assignment to their father and George W. Dole, as trustees.

In 1842 Philetus W. Gates formed a partnership with his father-in-law, Hiram H. Scoville, and opened a small blacksmith and wagon shop on Randolph Street. Mr. Scoville had been engaged in contracting on the canal and had met with serious reverses. Mr. Gates was also without capital. To show the financial condition of the new firm it is only necessary to state that they were obliged to buy one thousand feet of lumber on credit, with which to erect their building, which was situated near the bridge. At the end of the year a foundry and machine shop was built, on the corner of Washington and West Water streets. The firm conducted the business for about five years, when Mr. Gates purchased Mr. Scoville's interest. In 1848, after being alone one year, Mr. Gates admitted A. H. Hoge into partnership. Before the end of the year George S.

McKnight had purchased Mr. Hoge's interest, the firm becoming P. W. Gates & Co. Soon afterward E. S. and A. G. Warner, Thomas Chalmers, and Andrew and David Fraser became associated with Mr. Gates, adding to their already extensive business the manufacture of cars. The panic of 1857 found them encumbered with debts amounting to \$350,000; but, although the affairs of the firm were placed in the hands of an assignee, by 1860, every dollar of this indebtedness was paid off.

In 1848, soon after Mr. Scoville severed his business relations with Mr. Gates, he, with his sons, Adison, William and Ives, established a foundry on the corner of Canal and Adams streets. About this time the Galena & Chicago Union Railroad Company commenced laying iron, and Scoville & Sons contracted for building a number of freight and passenger cars. They also built the first locomotive manufactured west of the Allegheny Mountains, called the "Enterprise." The formation of this firm of Scoville & Sons, in 1848, was the origin of the present (1883) Scoville Iron Works, Nos. 51-53 Lake Street.

In 1846 another branch of iron manufacturing was established in Chicago. During that year C. R. Vandercook & Co. commenced to operate the "Phoenix Foundry," on the south side of the river, near the lake shore. The firm made a specialty of manufacturing "Queen of the Prairies," a new hot-air cooking stove, and also turned out furnaces, grates, etc. This was the first stove foundry in Chicago.

By 1848 a number of firms were operating quite large brass foundries. Thomas George & Co., on Lake Street, was not only one of the oldest of the brass founders, but the most extensive. Nugent & Owens established their works on Market Street in 1848, but they were burned out in 1854, and afterward the foundry was operated by M. Nugent alone. H. W. Rincker was proprietor of the first bell-foundry on Canal Street near Adams, and in 1848 cast probably the largest bell in the city, for St. Peter's church. In 1854 he also cast the large alarm bell for the court-house. In those days F. Letz's Chicago Iron Works on Wells Street, and James Hannah & Co.'s foundry in Wabansia's addition, West Side, were turning out considerable work. Letz's works had been established some years, and in 1853 he purchased land on Franklin Street, between Washington and Madison, where he erected a substantial cut-stone and brick building of three stories.

In 1851 Charles Reissig established the "Chicago Steam Boiler Works" on Jackson Street, west side of the river. He constructed the large mains for the water works in 1854.

Mason & McArthur commenced to manufacture purifiers and various wrought-iron work for the gas works in 1852, in a small wooden shop on Randolph Street. A removal was afterward made to the corner of Canal and Carroll streets, and in 1855 the facilities of the establishment were greatly increased. By 1857 the "Excelsior Iron Works" were among the leading iron manufactories of the city.

The year 1852 marks an epoch in the history of Chicago and Cook County manufactories. It was then evident that the city was to become a great railroad center, and all branches of manufactures were fostered. The building of cars and locomotives, especially, grew into large proportions. As has previously been stated P. W. Gates and Hiram H. Scoville engaged in the manufacture of cars on a small scale, when the Galena & Chicago Union Railroad first commenced to call for rolling stock in 1848. Stone & Boomer, in February of that year, began the construction of wooden bridges on

the Howe principle. In November, 1852, they completed the "Union Car Works," on South Clark Street, which were destroyed by fire in September, 1855. In February, 1853, they turned out the first car, and during 1854 four hundred cars were completed. The firm had the contract for equipping the Western Division of the Chicago, Rock Island & Pacific Railroad, and the Ohio & Mississippi Company. At the time of the destruction of the works they were the most extensive of the kind in the West, the gross annual earnings of the firm in the building of bridges being \$800,000. They had contracts with twenty-four different railroads in Illinois, Missouri and Wisconsin. After the fire, the firm purchased the "American Car Works," on the lake shore, in the southern part of the city, and associated with themselves N. S. Bouton. Mr. Bouton had purchased the works of G. W. Sizer & Co. This manufactory was completed in the fall of 1852, but did not fairly commence business until March, 1853. When Messrs. Stone, Boomer & Bouton assumed charge in 1855, everything was in fine working order, the buildings and necessary yard-room covering thirteen acres of ground. The Michigan Central and the Illinois Central roads passed by the manufactory, so that every transportation facility was at hand. The works consisted of a foundry, blacksmith shop, engine house, machine shop, paint shop and two passenger-car shops, and were known as the "Union Car and Bridge Works." In addition to these buildings the new firm continued to use their old foundry on South Clark Street. It should be remarked, however, that before the American Car Company's works came into their possession, they did a very extensive business under the former management and under the superintendency of D. H. Lyman. During the first year (1853) seven hundred cars were constructed, mostly freight. The passenger coaches of the Illinois Central Company were also built by the American Car Company. The value of the finished work amounted to \$450,000. In 1854 the company manufactured thirty-nine first-class passenger cars and two hundred and thirty platform cars. This work, with the railroad castings, brought the value of manufactures up to \$600,000 in the year 1855. In December, 1856, the car works were bought by the Illinois Central Company. The partnership was dissolved. Mr. Stone went into business as a contractor, Mr. Boomer as a bridge builder, and Mr. Bouton started a foundry on Clark Street, being appointed, soon after, to the position of City Superintendent of Public Works.

In September, 1853, the attention of business men was called to the importance of establishing, at this point, a locomotive manufactory. A company was therefore formed, in 1854, of which William H. Brown was president. The works of H. H. Scoville & Sons, corner of Adams and Canal streets, being adapted to the wants of the locomotive company, were purchased by the new organization. The Messrs. Scoville had already commenced the construction of a locomotive, which was placed upon the track soon after the organization of the company. It was the first locomotive built in Chicago—the "Enterprise"—and entered the services of the Galena & Chicago Union Railroad Company. Afterward the locomotive company built the "Falcon" for the same road, and during the year of its existence turned out some ten locomotives, when its works and "good will" passed into the hands of the Galena & Chicago Union Railroad Company.

In 1854 the Galena & Chicago Union Railroad Company established a machine and repairing shop on West Kinzie Street. Locomotives were also built there,

the "Black Hawk" being one of its productions. The next year (1855) the Illinois Central followed the example of the Galena road and established shops on the lake shore, south of Twelfth Street. As stated, in 1856, the company purchased the American Car Works, at Carville. In 1855 the Chicago, Rock Island & Pacific Company erected machine and repair works on Buffalo Street, and the Chicago, Burlington & Quincy Company put up similar shops on West Kinzie. The Chicago, St. Paul & Fond du Lac Company also established works on the North Branch of the river. Consequently there was little need for private assistance in the manufacturing of cars and locomotives.

Within the five years succeeding 1852, a number of new iron manufactories started into life. In June, 1853, the "Chicago Iron Railing Manufactory," A. F. Stoddard, proprietor, commences business on Randolph Street. Vincent, Himrod & Company's stove foundry was built the same year, being located on the South Branch. John Peattie's steam engine works were located the same year on North Water Street. In 1854, Stephens & Brother established a steam-engine manufactory, and J. W. Cobb's establishment on the corner of Kinzie and Desplaines streets, devoted to the same objects, was burned. The "Chicago Lead Pipe and Sheet Iron Works," corner of Clinton and Fulton streets, were established the same year by Collins & Blatchford, on the corner of Clinton and Fulton streets. Pressed bar lead was also made. The parent house for lead manufacture was located in St. Louis. M. C. Barrel established a foundry corner of Canal and Adams, in 1855; and during the same year Russe!! & Angel commenced business on the corner of Kinzie and Halsted; and Sherman, Bay & Co., on Canal Street. In April of this year, Perkins & Krause began to manufacture steam engines and flour and saw mills, their works being situated on the corner of Canal and Washington.

The following establishments commenced business in 1856: Evarts & Butler, manufacturers of shingle machines, steam engines, etc., North Water Street; James Campbell & Co., boiler manufacturers, Jefferson, near Kinzie; W. M. Horton & Co., founders, corner Canal and Adams.

In July, 1857, Captain E. B. Ward established his mills for the re-rolling of iron rails. They were situated on the North Branch, three miles from Lake-street bridge. The buildings covered fifteen acres. The machinery was made in Detroit.

But few manufactories of any kind were established in 1857, those already in existence feeling satisfied if they could tide over the hard times.

By the year 1857 the capital invested in iron works, car manufactories, etc., exceeded \$1,700,000, and the value of manufactures over twice that amount. Some two thousand eight hundred workmen were employed and eight thousand tons of wrought and fourteen thousand tons of cast iron were consumed. In the manufacture of stoves a capital of about \$185,000 was employed, and the value of the products was \$238,000 per annum.

Asahel Pierce, as has been stated, was the pioneer manufacturer of agricultural implements in Cook County, and the first one in northern Illinois. In 1847 Cyrus H. McCormick removed from Cincinnati to Chicago, and made arrangements with C. M. Gray for the manufacturing of his celebrated reaper. About seven hundred machines were made the first year, and fifteen hundred the second. In 1848 Mr. McCormick entered into a contract with Ogden & Jones under the firm

name of McCormick, Ogden & Co. The contract embraced the supplying of Illinois (except four counties), Tennessee, Kentucky, Indiana and Michigan. Arrangements were also made to enlarge the manufactory on the north side of the river, near the mouth of the harbor. During this year (1848) Mr. McCormick's brother, Leander, was taken into the business, and in 1849 William S. McCormick was associated. They afterward (1859) became partners in the manufactory. By 1857 the establishment was turning out over four thousand reapers annually, a capital of about \$360,000 being invested.

In 1853 J. S. Wright commenced manufacturing the Atkin's self-raking reaper and mower, his building being on Peyton Street, North Side. The next year three hundred reapers were turned out from this factory. In 1855 Mr. Wright changed his location. In 1857 he was manufacturing one thousand eight hundred machines.

In 1854, as stated, Asahel Pierce turned over the manufacture of plows to David Bradley, his brother-in-law. Mr. Bradley associated with himself Conrad Furst, and the foundation of the present extensive establishment of the "Furst & Bradley Manufacturing Company" was laid.

H. A. Pitts, manufacturer of threshing machines and horse powers, was also prominent in this branch of industry. His factory, corner of West Randolph and Jefferson streets, was burned in September, 1855, but re-built on a greatly extended scale. In October, 1855, H. D. Emery & Co. established the "Chicago Agricultural Works."

An idea of the growth of this class of manufacturing may be obtained from the statement that in 1856 the capital invested amounted to \$597,000, and the total value of the production was \$1,134,300.

Among the pioneers in planing and the manufacture of builders' materials—sash, doors, blinds, etc.—after Ira Miltimore were Foss & Brothers and J. W. Noble, who established themselves in 1848; also F. McFall & Co. and Goss & Phillips, successors to Goss & Abbott. Mr. Goss commenced the business in 1848, and the firm of Goss & Phillips was formed in 1850. Goss & Phillips' factory was consumed by fire in August, 1856, but suspended business only a few weeks, and even then showed the enterprise which the "Goss & Phillips Manufacturing Company" possess to the present day. By 1857 there were some twenty planing mills and sash, door and blind factories, in which establishments was invested a capital of \$445,000. The value of manufactures turned out during the year 1856 was over \$1,000,000.

From the most reliable accounts, as stated, Briggs & Humphrey were the first regular wagon and carriage makers, with Peter Schuttler a "good second." In November, 1837, J. C. Outhet started a wagon manufactory, and continued in business many years, his location being on Randolph Street, between Franklin and Wells streets. B. C. Welch established the first omnibus factory in the city in 1846. The firm name was at first B. C. Welch & Co., then Welch & Mensden, and after Mr. Welch's death in 1856, J. T. Mensden & Co. The factory was situated on Randolph, between LaSalle and Clark streets, and the business had widely extended by 1857. F. Busch commenced to manufacture wagons on Washington Street in 1847. H. Witbeck was one of the largest and best known wagon manufacturers in Chicago for many years. His manufactory, which he greatly enlarged in 1853, was situated on the corner of West Randolph and Jefferson streets.

In 1854 Mr. Pierce, after having conducted the business of manufacturing wagons and plows for twenty years until it had grown into immense proportions, gave up the latter branch of the industry to his brother-in-law, David Bradley, and established the "Chicago Carriage and Wagon Factory" at Holstein, three miles northwest of the city, on Milwaukee Avenue, being the largest and best known house of the kind in the city. Mr. Pierce carried on the business up to September, 1856, when the management was assumed by Tucker & Steinhouse. Mr. Bradley, in the meantime, had associated himself with Conrad Furst, an experienced carriage and wagon maker, and thus was laid the basis of the "Furst & Bradley Manufacturing Company," still alive and wonderfully prosperous.

Among the prominent wagon and carriage manufacturers of early days may also be mentioned Ellithorpe & Kline. John H. Kline went into business for himself in 1856.

By 1857 the total capital invested in the business was \$356,000, and the value of the manufactures \$948,160. Over seven thousand wagons and carriages were manufactured in 1856.

Charles Morgan has the reputation of being the earliest furniture manufacturer in Chicago. John Phillips commenced to make chairs in 1845. His factory was on the corner of Green and Third streets, and was the first establishment devoted exclusively to the manufacture of chairs. Both were in business in 1857. Furniture making took a fresh start in 1855; such new firms as Jacob Strehl and Hutchings & Brown going into the business. The capital invested in this branch of industry in 1857 was \$354,000, and during 1856 the manufactures were valued at \$543,000. Among the most extensive then doing business were D. L. Jacobus & Bro., on Randolph Street, and John Finerty, on the same thoroughfare, the latter of whom confined himself to the manufacture of fine goods.

The sub-soil of Chicago and vicinity is a blue clay, underlying the surface from three to six feet. This material is found in great abundance on the South Branch of the River, in Green's addition. Next to Mr. Blodgett, among the first of Chicago's citizens to fairly establish this branch of manufacture was John Penny. Other Pennys followed, and in the forties John Penny was re-enforced by A. J., and G. W., his sons. Penny & Meacham, Penny, Meacham & Harvey, etc., were all in the same business up to 1857. In 1853 the total manufacture of bricks had reached only twenty million, but the entire product was used at home, Milwaukee also furnishing this city a portion of her cream colored articles. By 1854 there were five brick-yards in operation, that of Daniel Elston being the largest. F. T. & E. Sherman had also obtained a reputation for the excellence of their manufacture. In 1857 there were fifteen yards and they turned out about ninety-one million of brick, valued at over \$700,000.

About eighteen miles southwest from Chicago, are situated the famous "Athens Quarries," near Lemont. In 1846 the stone was discovered by some workman while they were excavating for the Illinois & Michigan Canal, but was not then considered of superior quality. It was, at first, used merely for foundation stone. In 1851 the "Illinois Stone Company" opened a quarry there, but even then no one thought of using the stone for facing purposes, or of calling it "marble." In 1852, however, the Merchant's & Mechanic's Bank of Chicago was faced with the Athens stone, the first used for this purpose in the city. F. C. Sherman and William B. Ogden then used it in their buildings, next to the Sher-

man House, and on the corner of Lake and Clark streets. Several large marble yards started up in Chicago during the year 1852, several of them drawing their supply from the Athens quarries. H. & O. Wilson had extensive yards, on the corner of State and Washington streets, established in the summer of 1853. John Shumer & Co., successors to A. S. Sherman, on Water Street, also were actively engaged in that business. The "Illinois Stone & Lime Company" was organized in December, 1853, purchasing A. S. & O. Sherman's interest in the quarry at Lemont, and also the lime kiln near Bridgeport. The organization consisted of W. S. Gurnee, president; M. C. Stearns, secretary and treasurer; A. S. & O. Sherman, superintendents. The reputation of the Athens stone extended until it became the favorite building material in the city. Professor Hitchcock while on a visit to Chicago, during the winter of 1855-56, examined and analyzed it, and called it "Athens Marble." Although really a magnesian limestone, it has since been known by that name.

In 1857 the amount of capital employed in the stone business of Chicago was fully \$1,500,000. During that year the six thousand tons of Athens marble, shipped mostly from Chicago, found its way to all the important cities in the Northwest, and became a serious competitor in the market with the products of the Lockport quarries, in New York.

In 1838 S. B. Collins & Co. began the manufacture of boots and shoes, in a small way. It increased yearly until 1855, at which time the business passed into the hands of Pearson & Dana. In 1854 E. S. Wells opened the Metropolitan Boot and Shoe Store, and commenced the manufacture on an extensive scale.

In 1855 C. G. Sheffield, as agent of the old type foundry of John T. White & Co., New York, established a branch in Chicago—the only one of the kind west of Cincinnati. It was in a large four-story brick building on Washington Street.

Messrs. Rossetter & Pahlman established the "Chicago Woodenware Manufactory" in 1854. The value of its product the next year amounted to \$100,000. At this time it was the only establishment of the kind in the West, and the largest one in the United States. E. & D. Brunswick established their billiard table manufactory on Randolph Street at an early day. I. Brown started the first match factory on Wells Street. In 1854 Chapman & Atwood established the "Eagle Match Factory." In June, 1854, the first paper box factory was started at No. 71 Lake Street by Wiegler & Co. The first manufacturer of tobacco was A. Meyers, who commenced business in 1849. In 1856 L. Lyon erected a factory for the manufacture of white lead on Halsted Street, corner of Fulton.

The manufacture of musical instruments was started in 1854. During that year R. G. Green started a melodeon manufactory at the southeast corner of Washington and Market streets. The business had been carried on by Mr. Green and partners in an unostentatious way for two years, and assumed a prominent place among the manufactures of the city and county at this time, when he became sole proprietor of the business. He employed twenty workmen, and made three hundred instruments during the year, valued at \$25,000. The capital invested was \$10,000. Following this first manufactory came additions in 1855. During that year Knaub & Sons began the manufacture of pianos at 145 North Clark Street. Their invested capital was \$3,000. They employed nine workmen, and made the first year thirty pianos, valued at \$10,000. H. Stone also began the manufacture of pianos the same year, at the corner

of Clark and Water streets. His capital was \$200; he employed two workmen and made, in one year, eight instruments, valued at \$2,000. John Preston was also making pianos at this time, but his capital, the number of operatives employed, or the extent of his business, are not matters of record. The summary of this branch of business; for 1855, as shown by the Democratic Press, was: Capital invested, \$13,200; number of hands employed, 31; pianos manufactured, 38; melodeons made, 300; total production, valued at \$37,000.

Late in 1855, the first type foundry was started by C. G. Sheffield, at 43 Franklin Street, where he advertised a "type foundry and printers' warehouse." His first investment was \$15,000, and he employed fifteen hands. Besides the type he manufactured, he kept for sale the first full stock of printers' material ever offered in the city. His advertisement stated that it included everything in the printer's line, "from a Washington press to a bodkin."

As has been remarked, the revival of manufacturing dates from the "wholesale" introduction of railroads in 1852. In 1851 the total capital invested in foundries was \$55,000; in agricultural implements, \$98,000; in wagon and carriage manufactories, \$22,300, and in the black smithing business, \$10,700. By 1854, \$1,650,000 was invested in locomotive, engine and machine shops; \$310,000 in agricultural implements; \$220,000 in wagon and carriage manufactories, and many other lines of manufacture were represented in proportion. A comparison of the value of manufactures for 1854, 1855 and 1856, shows that within those three years it more than doubled.

In 1854 the value of manufactures was as follows: Locomotives, engine, machinery and iron works, railroad cars, furnishings, etc., \$3,200,000; agricultural implements, \$350,000; carriages and wagons, \$500,000; furniture and cabinet work, \$350,000; planing mills, sash factories, etc., \$500,000; brass and copper works, \$135,000; stoves, leather, soaps and candles, and all other branches, \$2,800,000.

A comparison for the years 1855 and 1856 is given in detail. No reports were received in 1857, the year of the panic, but upon the authority of the Democratic Press it may be stated that before the end of the year the total value of the manufactures had equaled that of 1856.

COMPARATIVE VALUE OF CERTAIN MANUFACTURES.

	1855.	1856.
Locomotive, engine, machinery and iron works	\$2,876,000	\$3,887,084
Agricultural implements	649,790	1,134,300
Carriages and wagons	702,104	948,160
Furniture and cabinet works	455,500	543,000
Planing mills, sash, door and blind factories	749,684	1,092,397
Brass and copper works	377,200	471,000
Whisky, ale, porter, beer, etc.	826,645	1,150,320
Oils, soap, candles, etc.	464,130	528,021
Leather	290,000	432,000
Marble and stone	588,900	896,775
Brick	260,000	712,000
Stoves	195,000	238,000

Besides the important branches especially mentioned were many others which should be recorded as having become established prior to the close of 1856. The following table from the Democratic Press gives the essential particulars concerning many of them:

MISCELLANEOUS MANUFACTURES OF CHICAGO, JANUARY 1, 1857.

Name of Firm.	Manufacturers.	Capital Invested	Value of Manufactures.	Hands Employed
Stearns & Co.	Lime	\$80,000	\$ 87,350	88
William Holmes	Look'g glass, &c.	25,000	150,000	10
Jordan & Olcott	Ship builders	80,000	75,000	60
Weeks Bros.	Ship builders	10,000	20,000	50
Huntson & Towner	Coffee, Spic's &c.	8,000	100,000	50
John C. Garland	Trunks, etc.	50,000	100,000	50
W. & G. Wright	Trunks, etc.	15,000	50,000	20
L. Speer	Jewelry	30,000	5,000	4
W. A. Hendrie	Jewelry	20,000	4
D. A. Frost	Silver Plater	3,000	15,000	8
A. S. Beckwith	Gold Pens	2,000	2
W. & E. Cook	Glass Stainers	2,000	5
Held & Bro.	Scales, etc.	1,000	2,000	4
E. Smalley	Cisterns	200	4,000	2
H. C. Rosin	Patterns	600	300	2
A. Hesler	Daguerreans	22,000	40,000	12
Fassett & Cook	Daguerreans	5,000	15,000	5
Aker & Downer	Malster	3,000	4,000	2
George Drake	Painter	2,500	8,300	7
F. Weigle	Paper Boxes	500	5,000	9
Sundell & Co.	Soda Water	3,000	10,000	6
E. Scanlan	Confections	5,000	75,000	15
Simm & Co.	Confections	4,000	25,750	5
Page & Co.	Confections	7,000	105,000	15
E. R. Bowen	Gloves, etc.	3,000	7,500	5
C. Schilling	Gloves, etc.	200	500	1
Frazier & Forsythe	Baking, etc.	4,600	15,000	8
C. J. Wilder	Crackers, etc.	5,500	20,000	8
Worthing & Melville	Crackers, etc.	2,500	15,000	8
E. Case	Crackers, etc.	1,000	5
M. Guvies	Crackers, etc.	300	10,000	6
G. J. Sutter	Bakers' Tools	500	..
E. S. Wells	Shoes, etc.	8,000	10,000	8
Pearson & Dana	Shoes, etc.	20,000	17,000	20
J. Kirby & Co.	Boxes	5,000	8,000	20
Culver, Page & Hoyne	Blank Books, etc.	12,000	44,247	27
T. Asmus	Blank Books, etc.	200	250	1
S. Fisser	Caps, etc.	400
Totals		\$439,700	\$1,644,697	502

The Democratic Press gave the following:

SUMMARY OF MANUFACTURES, JANUARY 1, 1857.

	Capital.	Hands.	Value of Manufactures
Iron works, steam engines, etc.	\$1,763,900	2,866	\$3,887,084
Stoves	185,000	70	238,000
Agricultural implements	597,000	575	1,134,300
Brass and tin ware, etc.	257,000	351	471,000
Carriages, wagons, etc.	356,000	881	948,160
High wines, beer, ale, etc.	497,000	165	1,150,320
Soap, candles, lard, etc.	296,000	100	528,021
Furniture	354,000	504	543,000
Stone, marble, etc.	617,950	843	896,775
Planing mills, sash, doors, etc.	445,000	554	1,092,397
Musical instruments	13,200	31	37,000
Leather	332,000	126	432,000
Barrels, wooden ware, etc.	178,700	171	357,250
Brick	300,000	500	712,000
Flour	325,000	73	636,569
Chemicals	15,000	15	32,000
Harness, saddles, etc.	82,900	220	271,000
Sheet and bar lead	25,000	75	100,000
Glue and neats-foot oil	20,000	15	25,000
Starch, estimated	15,000	25	75,000
Daguerreotypes, ambrotypes, etc.	75,000	75	100,000
Engraving, etc.	11,000	30	29,500
Cigars	8,050	26	16,800
White lead	50,000	10	7,200
Types, etc.	20
Boots, shoes, clothing, and other manufactures, estimated	500,000	1,750	750,000
Miscellaneous	439,700	502	1,044,697
Total, 1856	\$7,759,400	10,573	\$15,515,063
Total, 1855	6,295,000	8,740	11,031,491
Total, 1854	4,220,000	5,000	7,870,000

MISCELLANEOUS MANUFACTURING ITEMS FOR 1856.

Number of establishments propelled by steam.....	137
Tons of cast iron consumed (reported).....	18,402
Tons of wrought iron consumed (reported).....	11,196
Tons of coal consumed (reported).....	38,516
Cords of wood consumed (reported).....	3,000

REVIEW OF TRADE IN 1857.

The year 1857, which closes the period treated in this volume, was one of wide-spread business disaster. One of those periodical business convulsions had swept over the land. Following the unexpected failure of the Ohio Life & Trust Company, a panic occurred in the great Eastern money centers, so general as to completely destroy for the time all business confidence. The sudden and forced liquidation of all debts which followed so lessened values that insolvency became the rule rather than the exception among business men. Trade at the close of the year was completely paralyzed, and the new year showed more business wrecks than any five years before. Chicago could not and did not come out of the storm unscathed. The sudden withdrawal of all orders for the purchase of her grain and other products of export on which the stability of her trade was built, and the great depreciation of all State securities, on which rested the solvency of the Illinois banks, brought many of her citizens to sudden ruin, and forced several of her banks into liquidation. Up to that time the opinion most widely held concerning Chicago by those not personally interested in her was, that her marvelous growth had been of the mushroom order; more largely on the basis of speculative hopes in what the city was to become than on any well-grounded confidence in her based on what she had already achieved. The conservative business element of the East had ever viewed her sudden growth with more of suspicion than of wonder, and predictions had been common that the first business collapse would burst the bubble and leave her the ruin of ruins among the speculative cities of the land. The crisis came as unexpectedly to Chicago as to the other cities of the country. For a few weeks each individual and each community was entirely engrossed in endeavors for self-preservation. When the storm had spent its fury, and so far abated as to allow a comparison of damage done and reserve force remaining, the "mushroom city on the lake" was found to have endured the financial storm with more equanimity and apparently less damage than any of the older cities, and to be awaiting the tide of returning prosperity with a courage and strength which her business reverses had only redoubled. Thenceforth her business standing among the cities of the country was not as it had been before; the problematical distrust as to its stability and inherent merit and strength was supplanted by a confidence in its inevitable future which has since then made it the center of confidence for all outside capital as well as the center of hope for all local enterprise.

The sixth annual review of the trade and commerce of Chicago for the year 1857, published by the Chicago Press, gave a full statistical report of the trade of that year, and in its editorial comments reflected the prevailing spirit and sentiment of Chicago. The report was incited by a combination of the spirits of pluck and brag which was then and has ever since been characteristic of the city. The following excerpts are given:

"In accordance with our invariable custom we present to the readers of the Chicago Daily Press, and the public generally, the Sixth Annual Review of the Trade and Commerce of our city; and in doing so it is

proper to remark that such a statement for the year 1857 will be looked upon with an unusual degree of interest—for in many respects it has been the most important one in the history of Chicago. While old and wealthy cities on the Atlantic seaboard succumbed to the financial revulsion—while crash after crash occurred in the commercial world, and ruin left its traces on every hand—from all parts of the country, North, South, East and West, we heard the momentous query put—'How stands Chicago?' For years the assertion had been made that our city was but a bubble, to be exploded by the first breath of adverse fortune. How nobly she has weathered the storm and falsified the predictions of envious rivals, it devolves upon us, in dry facts and figures that cannot be disputed, to demonstrate. We will show the people of the East that notwithstanding they have rolled desolation and panics from the Atlantic seaboard to the Mississippi, that there is in the commerce of our city a vigor and elasticity which are equal to every emergency. We will show that, all things considered, the Trade and Commerce of Chicago throughout the past year, have been most fully maintained, and that the falling off in some departments of business is due to the general stagnation of trade throughout the whole country. It will be fully demonstrated by our tables of exports and imports—by the well-known fact that the Northwest was never before so rich in the elements of genuine prosperity—that had there been money and confidence in the East, our products would have moved forward in abundance, and the West would have in return depleted the store-houses of the East of their overstocked importations—that so far as the Northwest is concerned, there was no cause for a panic; and that had the East not spent her substance in over-trading, over-speculating, and by a long series of violations of the laws of commerce, the West would have saved her from the ruin that followed.

"One of the principal sources of strength which, amid the recent panic and wide-spread disaster, has enabled Chicago to achieve so commanding a position among her sister cities of the Union is to be found in the solid capital which her bankers and business men possessed—the accumulations of the energy, the prudence, and the successful commerce of the last dozen years. To this should be added the wisdom and far-reaching forecast which induced them to sustain and give confidence to our home currency—the bills of the Illinois and Wisconsin banks. These bills are secured by State stocks, and though at one time, had these stocks been thrown on the market, the bills could scarcely have been worth fifty cents on the dollar—the actual value according to the sales in the New York market, for most of them ranging at from sixty to eighty cents—yet the people gave them their confidence and passed them from hand to hand in the payment of debts and for the purchase of goods. Our city bankers also acted nobly. Though some of our country banks were forced to close their doors, and all the banks in Illinois and Wisconsin, except the Marine and the Chicago banks of this city, which to their honor be it said paid the coin on demand for all their issues, virtually suspended specie payments, yet our bankers received at par the bills of all the country banks, and thus saved the business of the city from utter stagnation and ruin. The position which our bankers assumed toward our business men, and that of business men toward each other, was not one of hostility but of mutual forbearance and support, and never in commercial, as well as in all other matters, was the motto more beautifully illustrated—'in union there is strength.'

"In striking contrast with this liberal policy was the course adopted in our sister city, St. Louis. The bankers there became alarmed, and under the self-confident dictation of the State Bank of Missouri, threw out the bills of the States of Illinois and Wisconsin. This at once effectually blocked the channels of trade; in a few days a large number of her oldest and most wealthy business houses went by the board, and in the end, as might have been foreseen, the banks themselves were forced to suspend. As a consequence, merchants in central and southern Illinois, and in southern Iowa have made their fall purchases in this city, and never has the great fact stood out in bolder relief that Chicago is the great commercial center of the Northwest than within the last few months. Their interests are identical, and their development and growth in wealth and all that elevates and refines our common humanity must go on in a rapidly increasing ratio for untold generations.

"Another fact deserves special notice here. The influence of our commanding commercial position in enabling us successfully to resist the panic, is patent to all men, and it will have a stimulating effect upon the future growth of the city. During the worst weeks of the panic our shipments of wheat were about a hundred thousand bushels per day, and, of all cereals averaged from one to two hundred thousand bushels. This produce went very far toward liquidating maturing Western indebtedness. When coin and exchange became dear, our merchants took currency from their customers, bought wheat for it and made exchange for themselves. Such an example of Western energy and shrewdness was duly appreciated by the creditors of Chicago dealers upon the seaboard. It is not a mere idle boast; but a simple fact that Western credit is now stronger than ever before.

"To all those who have persistently slandered our city—who have regarded it as an empty bubble soon to explode, and bring ruin upon all those who had placed any confidence in her stability, the figures which we lay before our readers to-day are a crushing, unanswerable reply.

"The opening of the year 1857 was not such as would have foreboded a period of commercial disaster. The country was rich in its products after a series of most bountiful harvests—the majority of our people, owing to the scarcity of money in the East, rather curtailing than expanding their business, and in no former period of our history did the average condition of the commercial houses of this city appear more favorable. As the season advanced, however, matters in the East grew worse, and the Wall-street gamblers, through their organs, raised the cry that the cause of all the disturbance was—the West. Libels on the character of our business men—on the general stability of our country, were published far and wide; and a most desperate effort was made to bring back to their coffers the capital which had forsaken them for a more profitable market in the West. The commercial communities in the East had over-traded, and by a long series of enormous importations, had plunged the country in debt, and now they began to see that unless they could revolutionize the entire country, West as well as East, they alone would be buried in the ruin which their own follies had engendered. But all this could have but slightly affected the Northwest, had the people and the journals of the West been true to themselves. Unfortunately there were some blind, dissatisfied and jaundiced leaders who most effectually played into the hands of the 'croakers' of the East. Parties who had large and

extensive time-contracts for produce—made during the winter of 1856-57—in order to affect the market, early in the spring published and most industriously circulated reports—said to have been 'carefully made up from actual observation'—that there was comparatively 'no grain in the country'—that our staples were exhausted—that the mighty Northwest had neither money nor produce. Unfortunately there were journals throughout the country—some even in this city—which were too stupid to see through the transparent trick—too corrupt to testify to the truth, or too lazy to investigate the matter for themselves—which, with blatant words, loudly re-echoed this false cry of the general poverty of the West. These slanders were most eagerly caught up by the journals of the East and extensively published under the head of 'Western Distrust of the West.' The effect was instantly felt. Our bankers stood appalled at the drain which immediately set in on them from their correspondents in the East. Large sums of money which had been sent forward for the purpose of moving the crops were at once withdrawn; and when navigation opened, it was a difficult matter for our merchants to accommodate the trade. The Chicago Daily Press stood alone in its position, that the Northwest was entirely solvent—that she was teeming with wealth in her products—that her farmers had their granaries and their storehouses full, and were ready to sell at a fair price. To counteract our statements, trade circulars and 'cooked up' newspaper articles were scattered broadcast over the country, stating that all along our rivers and lines of railroad, the country had run itself out, and that in the whole valley of the Illinois there were not two million bushels of grain of all kinds. In contradiction to this, we at that very time published reliable statements, showing that between Naples and Peoria, there had been found by actual count, over two million bushels of corn. The tables of statistics which follow in this review demonstrate to a certainty the truth of the assertions we then made. We find that the receipts of corn for the season by the Illinois & Michigan Canal are 4,122,601 bushels; by the Chicago & Rock Island Railroad, 407,437; by the Chicago, Burlington & Quincy Railroad, 1,892,219; by the Illinois Central Railroad, 192,102; and by the Galena & Chicago Union Railroad was 354,166 bushels—nearly all of which was from the crop of 1856. And yet at the commencement of the season, there was 'no corn in the country.'

"Not content, however, with slandering the West by representing her as poverty-stricken in respect to the crop of 1856, the same parties circulated false reports relative to the coming crop of 1857. Because, in some portions of our State, the small crop of winter wheat was injured by the winter of 1856-57, it was stated there would be 'no wheat in the country.' Then again, touching the corn crop of 1857, which proved to be the largest ever grown in this State, the same parties, in the face of the promising accounts which came in from all quarters misrepresented it, both as regards quantity and quality, carrying out the policy—or plan, as it would appear studiously arranged beforehand—to damage Western interests and Western men. True, all now know that the position of the Chicago Daily Press was correct—as the facts above given, and which may be found further in detail in this article abundantly prove; but these truths could not at the time spoken of be demonstrated beforehand to the people of the East—especially as there was a very active party there, who deemed it their only salvation to roll back the 'star of empire' from the Great Valley of the Mississippi. The honest friends of the West were frightened

by the misrepresentations that had been spread by interested gamblers and their abettors—and the consequent general lack of faith in the West was but the entering wedge to the widespread disaster which followed, and which all, more or less, have felt and do now experience.

“It is not our object or design to brood over the errors of the past; but it is the duty of the honest journalist to chronicle the events of the year, be they favorable or otherwise, so that our people may have an opportunity to learn wisdom from experience; and in this connection, it is interesting to look around and see the position which those now occupy who labored so industriously to damage the Northwest. They have been the first to fall into the pit they so earnestly dug for others; and if ever they be resurrected, it will be to be looked upon with general distrust. As for those journals which so violently opposed Western interests, while catering for Western support, they have spent their shot, and their shafts are for the future barbless. The mighty Northwest, even now, stands firmly in her position; Chicago, her center and index, still maintains her commercial supremacy—and it has been the wonder of the whole continent that she, so young, so ambitious and enterprising, should have so stoutly and so bravely withstood the revulsion.

“By reference to our commercial tables, it will be seen that while we have exercised a most laudable economy in our imports of merchandise, our exports, even in spite of the low prices which prevailed, have not materially fallen off. We have exported more wheat, packed more beef, and shipped more cattle than in the previous season; and still there is a large surplus in the country for next season's business. Unless some hitherto unknown mine be sprung upon the money markets of the world, the reasonable prospect is, that the business of Chicago the present year will far outstrip that of any previous one. There is but little grain in the East—with four months of winter before them. The banks of New York are overflowing with gold, ready for profitable investment; while we have an abundance of produce of all kinds, which, as soon as navigation opens, will go forward and relieve the embarrassed of all classes—for it is a well-known fact, that when the grain moves general prosperity follows.

“In the tables which follow in this article will be found the receipts, shipments and prevailing prices of almost every important article of trade and commerce for the year 1857, as well as for a series of years preceding. To the merchant, the trader, or the property-owner, they cannot fail to be interesting; as without a knowledge of the facts they demonstrate, any movement in the commercial world would be but groping in the dark.

“The grain trade—which is probably the most important branch of our commerce—has been active, and shows, contrary to general expectation, but a slight falling off on the business of 1856, and an increase over that of 1855. The receipts of all kinds of grain in 1855 were 20,487,953 bushels, while during the past year they foot up 21,856,206 bushels—a falling off on the receipts of 1856 of about three million bushels. The shipments of grain and flour reduced to its equivalent in wheat, during the past year, amount to 18,032,768 bushels—which is but 2,818,618 bushels less than was shipped in 1856, and over two millions more than were shipped in 1855. It will be noticed, however, that while there is a slight reduction in the general footing up for

the year, that in the great staples of the grain trade we show quite a large increase. Of wheat we have exported 9,485,052 bushels, or 1,147,632 bushels more than in 1856, and 3,286,897 bushels more than in 1855. In flour also, there is a large increase. We exported in 1857 259,648 barrels, or forty thousand barrels more than the shipments of 1856. Unfortunately, the people of the East became panic-stricken just as the wheat crop of 1857 was beginning to come in—else our shipments of wheat and flour (reduced to its equivalent in grain), would have been several million bushels more. For the present year there is a grand prospect for this trade—the crops of 1857 almost untouched, plenty of money in the East, and a general scarcity of the cereals.

“The provision trade has shown quite an important increase over the business of 1856. The number of cattle slaughtered and packed during the season just closed is 19,127—an increase on the business of 1856 of 4,000 head. Before the scarcity of money occurred, however, packers' estimates exceeded 30,000 head.

“In 1857 we find there were over twenty-five thousand cattle shipped East—an increase of over three thousand head on the business of the previous year. Had the season been longer this number would undoubtedly be greatly increased.

“Although the past year has not been very profitable to lumber manufacturers, yet the figures show the trade to be in a most favored position. The receipts are 459,639,198 feet, or over three millions more than in 1856. Had the business kept up during October and November at the same rate as the previous portion of the season, the receipts could not have fallen short of 500,000,000 feet. The shipments for the year are 58,221,063 feet more than those of 1856.

“The stone business in Chicago is quite a prominent branch of trade. In the following columns will be found statistics concerning its extent and position, which cannot fail but prove of interest to the commercial community.

“The position which the Chicago and Canadian trade has assumed within a year or two may be learned from an article in this review, which contains several valuable statistical tables. Our relations with Canada are of great importance, and our trade with our neighbors across the line is annually on the increase.

“In coal, salt, high wines, hides, cheese, butter, and many other important branches of trade, will be found a large increase on the business of 1856. Of course, even with this increase, we must take into account the general condition of the country during the past few months, which has no doubt operated to lessen the figures to a considerable extent.

“The growth of our lake commerce is worthy of some space in our review, and we have presented some statistics showing its growth and position. We give lists of steamers, propellers and sail vessels engaged in the general merchandise business of our city.

“We also give the rates which exchange on New York, Buffalo and St. Louis have commanded each week during the past four years. It is quite an interesting table and could not be well omitted in giving a general view of our trade and commerce.

“The shipping interest in our city is now large and extensive, and demands some attention. A carefully prepared table of the rates of freights for carrying wheat and corn to Buffalo and Oswego, will be found in this review.”

The following table shows the amount of some of the leading articles transported on the Illinois & Michigan Canal each year since its completion:

	1848.	1849.	1850.	1851.	1852.	1853.	1854.	1855.	1856.	1857.

TOTAL IMPORTS AND EXPORTS.—Below will be found a table showing the total imports and exports by lake, canal and railroads during 1857. We have spared neither pains nor expense to make it perfect, and so far as the books in our public offices are accurate, will this statement be found correct. The imports have, as a general thing, been properly classified, and may be relied upon; but the system of classification in regard to our exports is so general, that it is altogether impossible to make up a complete table from their books. We find that the item under the head of "merchandise" is made to include almost every article of trade, from a needle to an anchor. We trust that we will be able to report a better state of affairs next year. It is an important matter to know how much we export and import, and we are happy to learn that some of our railway companies are beginning to appreciate this, and classify and systematize more:

AUXILIARY AGENCIES.

In the foregoing pages the development of the trade, commerce and manufactures of Chicago have been traced from the beginning to a period when the city had attained the foremost rank among the commercial cities of the country. Thus far, the record has been of results, and of a progress so rapid as to be phenomenal. Such progress was not the result of chance, nor of what is sometimes termed good fortune. It was the result of a combination of energetic causes, rather than a combination of favorable circumstances; causes as remarkable as the growth of the city itself. Due allowance being made for all the natural advantages arising from its geographical location, and the fertility and productiveness of the tributary country, the unprecedented growth of Chicago is more largely attributable to human foresight, courage, energy and enterprise than any other modern city in the world.

So late as June, 1825, Prof. William H. Keating.

the geologist and historiographer, with Major Long's second expedition, at the close of a most disparaging description of Chicago and the surrounding country, said: "The dangers attending the navigation of the lake, and the scarcity of harbors along the shore, must ever prove an obstacle to the increase of the commercial importance of Chicago. The extent of the sand banks which are formed on the eastern and southern shore by the prevailing north and north-westerly winds, will likewise prevent any important works from being undertaken to improve the port of Chicago." In 1832, Milwaukee, eighty-five miles north, and Michigan City, twenty-five miles south, at the head of the lake, were both considered as likely to become great trade centers as Chicago. Only the residents of Chicago had supreme faith in her future. No city ever started under more discouraging conditions. The site was on a level so low that the waves of the lake, when driven by eastern storms submerged half the ground on which the present city is built, and inundations from the spring freshets were frequent when the Desplaines River, overflowing its banks joined its waters with those of the South Branch of the Chicago River, and sought an outlet through its low banked channel at the site of the amphibious town.

It is unnecessary to indulge in speculations as to the causes which brought together at such an unpromising spot, the wonderful aggregation of human energy which has overcome every natural obstacle, and built a city, where under other conditions no city would have been. In twenty years all was changed. The river creeping in tortuous course behind forbidding sand-bars to its shallow outlet had been made straight, and, through wide opening piers, welcomed to a safe haven the storm-tossed ships. Wharfs and docks, and warehouses lined its banks where trees had stood before, and forests of masts lined its borders. The city had been lifted, and stood on dry ground, high above the flood. The waters of the Desplaines no longer threatened devastation, but, turned into an artificial channel, bore a never ceasing flood of wealth to the city, veing in beneficent service with a dozen lines of railway, converging to this common center, and reaching their iron arms far out to the north, to the south, to the east and to the west.

The energy which had wrought such changes and achieved such wonderful results had one peculiar characteristic. It was prophetic, ever, in its immeasurable faith, providing for what was to come. The sudden avalanche of grain which came to Chicago with the completion of the canal, constantly increasing as each newly built railroad added to its volume, ever found waiting buyers, and shippers, and warehouses and elevators of ample capacity, ready built for the trade. The city has thus from the beginning always been found prepared to avail herself of each new branch of trade which has come to her; hence, no opportunity has been lost to her by being taken unawares, and no advantage wasted, however pressing or unexpected its appearance, for want of foresight in preparation or courageous promptness in its appropriation.

At the beginning of the commercial history of Chicago the avenues of trade, whether for the export and import of merchandise by lake, or the receipt and distribution inland, was restricted by most serious natural obstacles. Until 1834, there was no harbor. A sand-bar ran across the present mouth of the river, and the roadstead outside, unprotected by headlands, made what is now the safe harbor of Chicago a point on the western shore to be avoided, except in mild weather, when vessels might ride quietly at anchor off shore,

while their cargoes and passengers were debarked and landed by the primitive means of lighters.

Leading inland from Chicago were no roads that were passable. The land was a low, damp prairie, which, in the wet seasons of spring and fall, became little better than a bog, over which the roads were well nigh useless for heavy teams, except in the driest summer or the coldest winter. The radius of country tributary to Chicago was thus measured by the facilities for transportation. No farmer could safely bring a load of corn or wheat from a further distance than fifty miles with any expectation of profit. So, at the beginning, the radius of country directly tributary to Chicago as a grain mart may be safely set at that distance. The notable exceptions to the restrictions was in the marketing of cattle, sheep and horses, which could be driven in, thus being made to transport themselves to market. The first, and most important, commercial need of Chicago was better means of transportation centering at the chosen site of the great city.

PLANK ROADS superseded the primitive roadways over all the important thoroughfares leading from the city at a quite early date; thus essentially enlarging the area of trade subsidiary to the city. The Southwestern Plank Road, left the "Bull's Head" on Madison Street, and passed through Lyonsville to Brush Hill, near what is now LaGrange Station, on the Chicago, Burlington & Quincy Railroad, a distance of sixteen miles. From that point the Oswego Plank Road extended fourteen miles further in a southwestern direction, to the Naperville settlement. The Northwestern Plank Road started from the Galena depot, and extended seventeen miles to the present village of Desplaines in Maine Township. Seven miles out the Western Plank Road branched off toward Elgin, running, in 1853, some twelve miles in that direction. The Southern Plank Road started on State Street, at the south line of the city, and extended ten miles in a southerly direction toward Iroquois County. There were also projected in 1853, the Blue Island Plank Road, from that village due north to the southwest corner of the city; thence along Blue Island Avenue, which the City Council had planked to Madison Street; and the Lake Shore Plank Road, which commenced at the north line of the city on Clark Street, from thence it ran northwardly, nearly parallel with the lake shore by Rees & Hundley's tavern, through Pine Grove to Little River, and thence to Hood's tavern on the Green Bay Road.

These roads raised the mud embargo, which had before hampered the country trade a good part of each year, and greatly enlarged the circle of country that sought Chicago as a market.

THE ILLINOIS & MICHIGAN CANAL, completed in 1848, was the first great feeder, and remained, for many years, the most important avenue of transportation between the city and the interior of the State. During the five years, from 1850 to 1857, railroads were built in all directions centering in Chicago, and at the latter date the present magnificent system of transportation, which has since so developed in magnitude as to reach all points in the United States, the Canadas, and Mexico, was fairly inaugurated, and in such manner as to secure to Chicago the position she has come to hold as the great railroad center of the continent.

THE IMPROVEMENT OF THE HARBOR, or rather the building of the harbor, the dredging and straightening of the river, and the building of docks and wharves for the convenience of the immense commerce which the improved means of land transportation had centered in the city; kept even pace with those enterprises. In the

summer of 1833 the first pier was built, and in the spring of 1834 the first sand-bar had disappeared, and thereafter Chicago was open to a commerce which has increased each year until the present time.*

CUSTOMS.—Up to 1846, Chicago belonged to the Collection District of Detroit, being a port of delivery only. All the statistics pertaining to customs, foreign and lake trade were merged in the general reports of the whole district at Detroit. July 16, 1846, the new District of Chicago was created embracing in its jurisdiction the harbors, rivers and waters on the western shore of Lake Michigan as far north as the town and river of Sheboygan, and as far south as the dividing line between the States of Illinois and Indiana. Chicago at that time became a port of entry,† thus being recognized by the Government, and placed on an equal commercial footing with other American ports of the first class. The lake trade did not show a large foreign element in early years as is evinced by the following extracts from the Chicago Weekly Democrat. September 26, 1848, it said:

“Before 1846 there was no foreign trade at this point. In that year there was but \$14.10 received in payment of duties. In 1847, however, the following descriptions of goods were received here, paying duties to the amount below: Fire wood, 256¼ cords; peaches, 2 bbls.; saddles, 1. The duties received on these articles amounted to \$768.13, the value of articles was \$1,182.90.

“In 1848, to September 1, the following is the amount of dutiable goods imported: St. Urbes salt, 7,100 minots; sea oil, 18 barrels; cod oil, 68 barrels; mackerel, 150 barrels; salmon 10 barrels; herring, 21 barrels and 100 boxes; charcoal, 19 barrels; lumber, 149,900 feet; stone, 13 cords; wood, 142 cords; shingles, 2 bundles; crockery, 8 crates. The value of the above articles was \$6,600.70, and the duty \$1,629.48. The total value of articles paying duty at this point imported since Chicago was made a port of entry has been \$7,783.60, and the duty collected \$2,411.71.”

The first importation of foreign goods from the Atlantic was in 1848. It consisted of a cargo of salt, directed from Turk's Island, aboard the brig “McBride.” The vessel passed through the Gulf of St. Lawrence, and Canada waters, in bond, the duties being paid at the custom house in Chicago on its arrival, December 4. The Chicago Democrat of December 12, 1848, states that this was the first shipment ever made from the Atlantic direct to any port on the upper lakes, and adds that it passed through the Lachine and Welland canals.

The following tables furnished by the Revenue Department at Washington, give the statistical history of the port, for the twenty years succeeding its establishment.‡

Statement of the names of collectors, with dates of their first official bonds, for the port of Chicago, Ill., from July 16, 1846, to June 30, 1871.

Name of Collector.	Date of Bond.
William B. Snowhook.....	August 27, 1846
Jacob Russell.....	May 11, 1849
William B. Snowhook.....	June 6, 1853
Phillip Conley.....	July 17, 1855
Jacob Fry.....	April 13, 1857
Bolton F. Strother.....	June 21, 1858
Julius White.....	April 6, 1861
Luther Haven.....	October 10, 1861
T. J. Kinsella.....	March 22, 1866

* For detailed mention see articles on Harbor and Marine, Railroads, and the Illinois & Michigan Canal elsewhere in this volume.

† See Harbor and Marine.

‡ The series of years in the accompanying tables is extended beyond the period generally treated in this volume, as otherwise their value and interest would be impaired.

1859	24,818 90	1870	724,565 49
Amount forward	\$1,503,444 65	1871	838,265 57
		Total	\$5,927,728 98

Number of employes at the port of Chicago for the year 1847 was three; for the year 1850, five; for 1860, thirteen; and for 1870, thirty-seven.

Statistics furnished by J. Edward Wilkins, British Consul at Chicago, in 1856, gave the extent of trade between Chicago and Canadian ports, carried on in British vessels, to have been as follows:

IMPORTS.			
	Vessels.	Tons.	
1854	5	1,193	£ 5,178 2 6 \$ 24,855
1855	77	16,617	28,856 6 8 138,520
1856, to Nov. 1	95	22,664	40,892 8 4 194,843

EXPORTS.			
	Vessels.	Tons.	
1854	6	1,482	£ 16,429 7 6 \$ 79,101
1855	61	13,010	173,922 1 8 834,826
1856, to Nov. 1	97	23,377	174,838 5 9 829,223

The total trade with Canada, via Collingwood, Michigan Central and other lines, together with that in British bottoms, was estimated by Governor Bross, in 1856, to aggregate \$2,500,000.

ELEVATORS.—Allusions to Newberry & Dole's first elevator have been quite frequent in the preceding pages. Their first warehouse, which could be called an elevator from its mechanical appliances for loading grain, was located on the north end of Rush-street bridge. From it, in 1839, was made the second shipment of wheat from Chicago. The wheat was bought from farmers' wagons, and hoisted to upper story by old-style pulley blocks, and rope, by hand-power. The three thousand six hundred and seventy-eight bushels comprising the shipment, were to be transferred to the brig "Osceola." How it was done was thus described in Bross' history: "The problem of loading it on the brig was solved by fixing a spout in one of the upper doors and making it gradually narrower till it reached the deck, where the wheat was discharged into boxes holding four bushels, weighed and transferred to the hold of the vessel. From the bins holding the wheat in the upper story a row of men was formed, who passed it in buckets, precisely similar to the means used to pass buckets of water at a fire before the introduction of engines."

This firm afterward built and operated a warehouse and elevator; but on account of the increase in business, man-power gave place to horse-power in the elevating and transferring of the wheat. A bucket-belt, not unlike those now in use, was used to raise the grain to the upper story; and not only was the wheat elevated, but, in course of time, the horse also. "The endless treadle on which the horse traveled," says Mr. Bross, "was in the way, and, besides, it made a great deal of noise. Hence his tramway was transferred to the upper story, and with straps and pulleys a party of sailors soon transferred the faithful animal to the same locality, where he lived and traveled seven years without ever again setting foot on *terra firma*." The unfortunate animals who operated the elevating apparatus, continued in vogue for a number of years. The following concerning the wheat warehouses, or grain elevators, is copied from the Chicago Daily American, March 18, 1842. Speaking of new elevators it said:

"That run by H. Norton & Co. is the largest, being one hundred by forty feet in size. It is on the Reservation. Work in this mill will be performed by horses.

The wheat, instead of being shipped from it by the usual slow and tedious process, will, after being raised to the upper story by means of elevators not unlike the revolving buckets of the dredging machine, glide thence into the hold of the vessel in double quick time. That of Smith & Webster, on the corner of South Water and Dearborn streets, is also a great addition to our city. This, and the fine one of J. D. Merritt near it, has greatly improved the appearance of South Water Street. Five more warehouses will be put up the coming season—two on the Reservation, just above Clark-street bridge, one on the north and the other on the south side of the river, and one on the South Branch, near Lake Street."

The use of steam-power in the place of horse-power was not applied until 1848, and for years afterward was not in general use. J. S. Wright, in his history of "Chicago, Past, Present and Future," published in 1870, page 157, shows something of the condition of the elevator and warehouse business in 1848 and succeeding years. The quotation is as follows :

"STEAM ELEVATORS.—Such amounts of grain could never be handled in reasonable time for western operators, except by steam machinery. It seems like magic to compare present facilities with Mr. Dole's horse-power elevator which, with Messrs. Peck's, Wheeler's, Walker's and others, supplied requisite facilities, till that ingenious spirit, Captain R. C. Bristol, erected in 1848 the first steam elevator. Mr. Wheeler says that down to January 1, 1855, the whole storage room was not over seven hundred and fifty thousand bushels. So that the total only thirteen years ago, was but little over the average of one of seventeen elevators now, and every one before 1855 has gone out of use.

"Along the river, and South Branch, and lake basin, these huge, somber piles of two by six and two by twelve joisting, laid flat, rise high above surrounding structures. Their sides studded with iron plates, which are heads of large rods to hold against lateral pressure, bespeak the heavy stores they safely hold. Thinking an account of the *modus operandi* would be interesting, I went for information to the elevator last built by Messrs. Armour, Dole & Co., which was certain to have all improvements. An old settler, Mr. Baker, was in charge, who began to build in 1854 the elevator of Messrs. Gibbs & Griffin on a lot leased by me to them. After politely showing me through and explaining the operation, I asked him for the further favor of writing out what he had spoken, and here you have it :—

"Chicago has superior advantages in handling and storing grain, not only on account of steam elevators, but in absence of current, and the even stage of water. These are serious inconveniences on the Mississippi, and other large Western rivers. Then the wide prairie affords ample yard-room for cars, which the railroads and proprietors of elevators have wisely provided.

"Few persons, however, even of the old settlers in Chicago, have correct ideas of the ease and speed with which grain is handled. This is the *modus operandi* of Messrs. Armour, Dole & Co's new elevator on the South Branch, running from the C. B. & Q. R. R.

"The building is three hundred and twelve feet long, eighty-four feet wide and one hundred and thirty feet high, machinery driven by a four hundred horse-power engine. It is divided into one hundred and fifty bins, sixty-five feet deep, with storage capacity of one million two hundred and fifty thousand bushels. The yard will hold three hundred or four hundred cars. Two switch engines, when in full operation, are required to put in and take out cars. Two tracks receive each ten cars,

unloaded at once in six to eight minutes, each car having its elevator, conveying the grain to its large hopper-scale in the top of the building. There weighed, it is spouted to the bin appropriated to that kind and quality. To carry grain to the several bins renders the elevation necessary. Allowing fifteen minutes to unload each set of ten cars, four hundred are unloaded in ten hours, about one hundred and forty thousand bushels.

"Shipping facilities equal receiving, there being six elevators for that work, handling each three hundred bushels per hour, or one hundred and eighty thousand bushels in ten hours. The grain is run out of the bins to another set of elevators, which throw into large hoppers at the top of the building, in which it is weighed, and sent down in spouts into the hold of the vessel. The same company have another elevator on the opposite side of the slip—for a slip at right angles to the South Branch is cut to lay vessels alongside the warehouse—and ten other large elevators and five smaller, afford the same facilities. Any one of thirteen of them, too, will unload a canal boat of five thousand or six thousand bushels, in an hour and a half to two-hours ; an aggregate from sixty-five canal boats alone of three hundred and fifty-seven thousand bushels in ten hours."

From the foregoing extract it would appear that steam-power was first introduced in 1848, by R. C. Bristol. It was not until a much later day that steam-power entirely superseded horse-power.

In the report of "city improvements," made by the Chicago Democratic Press, January 1, 1855, for the year 1854, appears the following :

"GRAIN WAREHOUSE, on North Water Street and the river, for Gibbs, Griffin & Co. This is one of the gigantic grain houses which are being called into existence by the urgent want of storage room which it is easy to see must exist in a city which receives in a single season over fifteen million bushels of grain, with no prospect of its ever being any less. River front sixty feet, Galena Railroad front one hundred and ten feet, depth one hundred and ninety feet, and eighty-seven feet high. Built of timber, inclosed with brick, and calculated to hold over five hundred thousand bushels of grain ; two million feet of lumber used in its construction ; architects, Burling & Baumann ; mason, William Mortimer ; carpenters, Baker & McEwen ; machinist, Mr. Miller. Cost, \$75,000."

In 1855, Sturges & Buckingham built, under an arrangement with the Illinois Central Railroad Company, what was, at the time considered, as expressed in the newspapers of the time, an enormous grain house. It was on the east side of the freight depot, and east of the basin that connected with the Chicago River. It was built of Milwaukee brick, was one hundred by two hundred feet in size, capable of holding eight hundred thousand bushels of grain, and cost \$76,000.

The Press, in describing this elevator already built, said : "The same party is to erect, during the coming spring, a similar grain house, east of the present one. Its dimensions are to be one hundred by two hundred and thirty feet."

In January, 1858, the Democratic Press had the following description of the latest and largest elevator in the city :

"Our attentive correspondent Rural gave the readers of the Press a few days since a minute description of the mammoth grain warehouse of Messrs. Sturges & Buckingham, at the Illinois Central depot. Much as we have read about them—for they had before been noticed in these columns—till yesterday, when we visited them, we had no adequate conception of their gigantic pro-

portions or the perfection of their arrangements in every particular. The buildings are one hundred and three by two hundred and four feet, and one hundred and twenty feet high. In the operation of the machinery the grain is elevated one hundred and twenty-eight feet. The cost of the buildings complete will be about \$200,000 each. The machinery for handling the grain is worked by four steam engines, in each building, and every part of it is perfect in every particular. The brick walls are bound together by massive bolts only a few feet apart, and to give some idea of the amount of timber used, we state that twenty-nine ship loads were used during the last summer in the construction of the building now being completed. Two hundred and thirty-six car loads of grain were unloaded by one of the houses last summer in one day, and the amount of grain handled was between eighty and ninety thousand bushels. It is safe to say that each house can handle a hundred thousand bushels per day. Strangers at a distance can form some idea of the facilities for handling grain in this city from the above facts. And if, with the lands along the line of the Illinois Central Railroad only sparsely settled, a single firm has found it necessary to make so large an investment to accommodate the business now offering, what will the grain trade become when all the vast fertile prairies between Chicago and Cairo shall be covered with waving harvests? That day is not distant, and already does the enterprising, indomitable proprietor, Mr. Sturges, begin to look forward to a third house of equal proportions to accommodate the stupendous business which his magnificent road is beginning to pour into the lap of our city.

"We would that every farmer in the State could have gone with us through these immense warehouses, and, like ourselves, he could not have resisted the emotions of thankfulness and honest pride, that Providence has cast our lot in so goodly a land. The all-wise Creator has wrought on a vast scale in our beautiful valley, and it requires vast enterprise to provide for the development of the resources which His bounty has provided. We are glad to welcome Mr. Sturges to our city as a permanent resident, for he is one of the men who has the intelligence to appreciate the resources of the West, and also the capital to provide means for their adequate accommodation."

Up to 1857 the warehouse and elevator business had developed in full ratio with the requirements of the trade. An elevator, merely for the elevating of wheat, and its transfer to vessels had become inadequate to the wants of the trade, and an "elevator" had come to mean not only a means for shipping, but a repository for the storage of wheat, and the elevators of 1857 were also the store-houses wherein were held all the grain of the city, until such time as it might be required for delivery or shipment. An elevator had thus come to mean, in 1857, a store-house for grain, as well as a facility for shipping. The houses were partitioned into huge bins, into which the various grades were put for storage, either in special lots to be delivered in kind; or in general bins to be delivered according to grade. The issuing of receipts from these warehouses, with the grade of the wheat attached, began in 1857, and thus placed wheat in the list of articles which could be called purely speculative. The era of speculation in wheat dates from the issue of the first general warehouse receipt, in which the grade of the wheat was specified, and in which it was promised that a like grade should be delivered on demand.

Following is a table showing the status of the warehouses of Chicago in 1857:

WAREHOUSES.	Cost of Elevators and Buildings.	Value of Real Estate.	Total Value.	Capacity of Storage, in Bushels.	Capacity, Daily, for Receiving and Shipping, in Bushels.	Capacity for Shipping, per Day, in Bushels.
Sturges, Buckingham & Co. (Ill. Central R. R.)	\$175,000	\$150,000	\$325,000	700,000	65,000	225,000
New Warehouse.....	175,000	150,000	325,000	700,000	65,000	225,000
Flint, Wheeler & Co.....	150,000	90,000	240,000	700,000	55,000	200,000
(R. I. R. R.)
Chicago & C. U. R. R.....	300,000	500,000	50,000	125,000
Gibbs, Griffin & Co.....	200,000	500,000	60,000	150,000
Munger & Armour.....	80,000	80,000	160,000	300,000	50,000	100,000
Mann, Gill & Co.....	60,000	80,000	140,000	200,000	30,000	75,000
Flint, Wheeler & Co.....	25,000	50,000	75,000	160,000	5,000	50,000
Burlingame.....	20,000	30,000	50,000	100,000	25,000	50,000
S. A. Ford & Co.....	90,000	100,000	40,000
James A. Peck & Co.....	50,000	60,000	20,000	40,000
Walker, Bronson & Co.....	80,000	75,000	30,000	60,000
Total.....	\$3,057,000	4,095,000	455,000	1,340,000

THE CHICAGO BOARD OF TRADE.

The subject of organizing a Board of Trade in Chicago was first brought to public notice through a communication which appeared in the Chicago Daily American of December 4, 1841, over the signature of "Merchant." The writer said: "It is a subject upon which I have thought much, and in my experience of several years trading in the city, I have often known instances of much trouble and vexation that might have been avoided through the interference of some such institution, and I have several times thought of calling the attention of the mercantile community to its importance. It would be greatly to the interest of us all, were some active measures taken in regard to it." The early seed thus sown by this unknown merchant seems to have fallen on barren ground. It does not appear that his suggestions awakened any response in the mercantile breasts of the community.

The year 1848 saw the first infantile struggles of the Chicago Board of Trade. Under the head of "The Beginning," Colbert's History of Chicago, p. 48, has the following:

"Early in the year 1848—a time anterior to the introduction of the iron-horse, which now snorts over the broad and fertile prairies of Illinois—long before elevators of one million bushels capacity were even thought of—a time when the clearance of a lumber schooner from this port received a "local" notice—when elevators used horses as a motive power, Thomas Richmond and W. I. Whiting, discussed one afternoon the propriety of establishing a Board of Trade in Chicago.

Mr. Richmond was then in the elevating business, and Mr. Whiting a grain broker—the first who pursued this vocation in Chicago. These gentlemen consulted with other business men, and the result of this consultation was an invitation (published at the time) for the merchants generally to meet together on the 13th of March, 1848, to take the initiatory steps in regard to the formation of the Chicago Board of Trade. The following is a copy of the call:

Merchants and business men who are favorable to the establishment of a Board of Trade in this city, are requested to meet at the office of W. L. Whiting, on the 13th (March, 1848,) at three o'clock, P. M.

Wadsworth, Dyer & Chapin,
George Steel,
I. H. Burch & Co.,
Gurnee, Hayden & Co.,
H. H. Magie & Co.,
Neef & Church,
John H. Kinzie,

Norton, Walter & Co.
De Wolf & Co.,
Charles Walker,
Thomas Richmond,
Thomas Hale,
Raymond, Gibbs & Co.

"At this meeting nothing further was done than to pass resolutions stating that the growing trade of Chicago demanded the establishment of a Board of Trade. A constitution was then adopted and a committee appointed to draw up by-laws to be submitted at an adjourned meeting to be held on the first Monday in April following, when they were adopted. All interested were invited to meet daily at the rooms of the Board over Gage & Haines's flour store, on South Water Street, which had been rented at \$110 per annum. George Smith was elected president, but declining to serve, Thomas Dyer was chosen in his stead. Charles Walker and John P. Chapin were chosen first and second vice-presidents, and G. S. Hubbard, E. S. Wadsworth, George Steel, Thomas Richmond, John Rogers, H. G. Loomis, George F. Foster, K. C. Bristol, J. H. Dunham, Thomas Dyer, G. A. Gibbs, John H. Kinzie, C. Beers, W. S. Gurnee, J. H. Reed, E. K. Rogers, I. H. Burch, A. H. Burley, John Y. Read, W. B. Ogden, O. Lunt, Thomas Hale, E. W. Hadduck, I. V. Germain, and L. P. Hillard were appointed directors."

The members of the board at the time of its organization were as follows: Gurdon S. Hubbard, E. S. Wadsworth, Matthew Laflin, George Smith, Orrington Lunt, Ira V. Germain, J. B. F. Russell, Theron Pardee, Thomas Dyer, D. Humphrey, H. J. Winslow, George F. Foster, John King, Jr., James H. Rochester, Isaac Hardy, Zenas Cobb, Jr., R. C. Bristol, I. H. Dunham, A. V. G. D'Wolf, Almond Walker, H. H. Harrison, William F. DeWolf, James Winn, J. H. Reed, James H. Carpenter, J. P. Hotchkiss, John High Jr., S. L. Brown, J. R. Case, Joseph T. Ryerson, Andrew Blaikie, I. Whitcomb, George A. Gibbs, G. M. Higginson, Jared Gage, Sylvester Marsh, E. H. Hadduck, John P. Chapin, George Steel, J. H. Kenzie, John Rogers, Thomas Richmond, Thomas Hale, James Peck, George C. Drew, T. V. G. Loomis, B. W. Raymond, John W. Shoemaker, Albert Neeley, Joseph R. Beals, Amos G. Throop, John L. Marsh, E. K. Rogers, C. Beers, L. P. Hilliard, John C. Dodge, John Pearson, Thomas Thompson, W. S. Gurnee, Alexander Brand, Charles Walker, Allen Richmond, M. C. Stearns, O. Sherman, G. A. Robb, H. R. Payson, A. H. Burley, I. H. Burch, W. H. Clarke, J. C. Walter, J. A. Smith, T. S. Morgan, W. L. Whiting, John S. Reed, Thomas B. Carter, T. L. Parker, F. A. Stockbridge, Julian S. Rumsey, C. L. Harmon, John C. Haines, William B. Ogden, and Jabez B. Foster.—Total membership, eighty-two.

The organization as at first effected was not a corporate body. It had no legal status, being only a vol-

untary organization for the purpose of facilitating the business of the city and promoting her commercial interests by more united action than heretofore. At that time there was no general State statute under which a corporate organization of this kind could have been effected. So the functions of the Board in its early days were advisory rather than authoritative, and its many regulations, resolutions, and mandates commanded observance and respect only in accordance with the amount of common sense or wisdom they embodied, and from the respectable character of the mercantile body whose sentiments they promulgated. It was, however, the center of deliberation on nearly every question in which Chicago had an interest, from the time of its organization, and on nearly all of them it held pronounced views, on one side or the other, to which it gave public utterance through resolutions, manifestos, petitions to the Legislature and Congress, and by the appointment of committees to advise with the outside elements and report. Thus the early influence of this body, however great or important a factor it may have been in molding the commercial destinies of the city, or regulating and bringing into order its methods of business, were less apparent than actual.

At the first meeting of the Board, held in April 1848, Gurdon S. Hubbard, Sylvester Marsh and John Rogers were appointed Inspectors of Fish and Provisions, and John Rogers and James L. Hare, Inspectors of Flour. This was the first move ever made in the city toward securing uniformity in grades, or guaranteeing the quality of any of the merchantable products sold. As these officers had no legal authority to enforce an inspection, a committee of the Board was chosen to wait upon the City Council and ask the passage of an ordinance for the government of inspectors, whereby their offices might be recognized under the municipal law.

During the same year a committee on banks, chosen by the Board, reported a plan for a general system of State banking, which, with slight amendments, was adopted, and the committee requested to frame a bill in accordance with the amended report; to present it to the Legislature, and urge its passage. The committee were also instructed to secure a charter for the Board. The action of this committee resulted in the passage of a general act, February 8, 1849, for the establishment of Boards of Trade and Chambers of Commerce, under the provisions of which the Board was subsequently reorganized.

At the first annual meeting, held April 13, 1849, Thomas Dyer was re-elected president, and John P. Chapin and C. Walker as vice-presidents. John C. Dodge was chosen secretary and W. L. Whiting treasurer. Several public matters claimed the attention of the Board. The spring freshet of that year was the most disastrous that had ever occurred, totally destroying nearly every bridge in the city. The Board appointed a committee to devise means for facilitating intercourse with the North and West sides and the outlying settlements. The action of this city is not a matter of record.

The obtaining of daily telegraphic market reports for the benefit of members of the Board was for the first time discussed at the first annual meeting, and a committee appointed to confer with the telegraph companies.

The city authorities seem to have worked in confidential harmony with the Board, as is evinced in the fact that during the year they issued bonds for the improvement of the harbor, after the great freshet, amounting to \$1,000, which were turned over to the

Board to be negotiated, and the proceeds expended for the purpose mentioned under its direction. The Board accepted the trust, and doubtless made the money go as far as possible in dredging out the river.

The tolls on the canal, which on through freight to and from the Mississippi and from that river to tide water, and resolutions were passed favoring a rebate on the tolls on such shipments. The importance of further telegraphic extensions was discussed, and the discussions brought forth a series of resolutions favoring and earnestly urging such extension. The hour of meeting was changed from 9 to 9:30 A. M., the old hour having been found too early to insure a full attendance.

Although the proceedings of the Board had been sometimes Pickwickian in its discussions, and perhaps more miscellaneous than practical in its treatment of nearly every subject, however remotely it might concern the city, it had, by ignoring nothing, managed to have its say on everything. It had thus, during the first two years, not only kept itself busy, but had been instrumental in doing much to promote the prosperity of the city and to place its growing commercial importance more prominently before the outside world. It was aggressive in its efforts to build up the trade of Chicago from the very beginning, and entered its second stage of life with a quite extensive, if not yet world wide, reputation.

ORGANIZATION UNDER THE STATE LAW.—February 8, 1849, a general law relating to the establishment of boards of trade was passed by the State Legislature, and, at the annual meeting of the Board held in April, 1850, it was resolved to organize under its provisions. It was also resolved:

"That this organization shall be called 'The Board of Trade of the City of Chicago.'

"Each member joining the association shall sign the constitution, and, with the exception of old members, pay five dollars, and in addition pay such sums semi-annually as shall be decided on by the vote of the Board.

"Annual and semi-annual meetings shall be held, and special meetings may be called at any time at the written request of any five members."

The treasurer's report at this meeting showed a deficit in the treasury of \$146.20. To provide for this it was voted to raise the annual dues from two to three dollars. It was also resolved that the old members sign the new constitution which had been framed in accordance with the provisions of the State law, and pay three dollars each, to be applied to the payment of the outstanding debts of the old Board (about to be superseded by the new and legally constituted body) and that the office furniture be transferred to the new Board. It was then voted, "That the Board of Trade do now dissolve," and the voluntary organization ceased to exist.

The corporate life of the new Board began April 13, 1850, at which time the new constitution was presented for signatures. The following week the new organization was completed by the election of officers; the president, vice-president, treasurer and secretary of the old organization being re-elected. The new organization did not create any new enthusiasm or interest. In fact, the novelty having worn off, the membership decreased, in spite of the strenuous exertions of the officers and a few staunch supporters who appreciated its growing importance, as the trade of the city increased. The daily meetings were thinly attended, and the sessions devoid of interest except when some outside question

was brought up for discussion. To promote a more general attendance, the daily hour of meeting was again changed; the hour being from 12 M. to 1 P. M. During the year the Board had in consideration the free navigation of the St. Lawrence River, which was earnestly favored by the members, who, through a committee, prepared a report bristling with arguments and replete with statistics favoring the object. The report was published, but the scheme itself fell through.

The improvement of the Illinois River, by the removal of the sand-bars, so as to render it navigable, came up for consideration, and it was decided by resolution of the Board, that means should be taken to dredge them out. Votes of thanks were given to the Hon. Stephen A. Douglas and General James Shields, for their successful efforts in obtaining from Congress the magnificent grants of land, which insured the completion of the Illinois Central Railroad, which had already been begun; also for their unsuccessful, but no less meritorious efforts, in advocating the free navigation of the St. Lawrence.

The third annual meeting in April, 1851, showed by the official reports presented a somewhat discouraging aspect of affairs. The membership had fallen off largely, the number of members having paid their dues and being otherwise in good standing, being only thirty-eight. The treasurer reported a deficit of \$165.96, with no provisions to supply it. He recommended an assessment of four dollars on each member to pay up the old score. The time of meeting was again changed, with the object of securing a larger daily attendance, the hour of session decided upon being from 11:30 A. M., to 12:30 P. M. A bye-law was adopted forbidding members from giving untruthful or bogus reports of their transactions, on pain of expulsion. This early effort of the Board to place itself on the basis of honesty, and to purge itself of duplicity and deceit in its transactions, is worthy of note. The old officers were re-elected. During the year interest in the organization was at an extremely low point. The daily attendance dropped to nearly nothing at times, and the business transactions "on Change" were proportionately insignificant. A record was kept during the year, from which the following excerpt is given:

July 9.—Present: C. Walker. No transactions.

July 10.—Present: C. Walker, J. C. White, J. C. Walter.

July 12.—Present: O. Lunt.

July 13.—Present: None.

July 14.—Present: None.

July 15.—Present: C. Walker.

July 16.—Present: None.

July 17.—Present: J. C. Walter.

July 18.—Present: None.

It appears from the above that during the nine days, only five members had sufficient interest in the institution to put in an appearance at the place appointed for daily sessions.

The interest in outside topics also sensibly waned during the year. The only subject considered being the improvement of the Illinois River, on which subject they so far took action as to appoint a delegation to attend the convention for the consideration of the matter, which was held at Peoria December 26. New rooms were rented at the corner of South Water and Clark streets, which were for the first time occupied at the fourth annual meeting, which occurred in April, 1852.

At this meeting, despite the dull and uninteresting year that had passed, the official reports were more

encouraging. There had been an accession of fifteen members during the year, making a total of fifty-three, and the organization was out of debt. The election resulted in the choice of George Steele, president; Thomas Hale, vice-president; and John C. Dodge, secretary and treasurer. The new rooms did not seem to please the majority of members, and it was decided to move again, the rooms selected being those occupied by the secretary of the Chicago Mutual Insurance Company. The next meeting was held at No. 3 Tremont Block. Late in the year it was decided to move again, to No. 8 Dearborn Street. In February, Mr. Dodge tendered his resignation, and James E. Dullaba was appointed to serve out the unexpired term. The retiring secretary assumed the lease of the rooms then occupied by the Board, and instructions were given to sell the carpet and furniture. It is presumed that the new rooms were already furnished, or that if in accordance with the old adage, "three moves are as bad as a fire," the carpet and furniture were not worth moving again. The Board took no important action on outside matters during the year, except in the passage of some earnest resolutions, protesting against the repeal of the banking laws then in force.

The fifth annual meeting was held at the new rooms, No. 8 Dearborn Street, in April, 1853. The officers elected were: Thomas Hale, president; C. H. Walker, vice-president; L. P. Hilliard, secretary and treasurer. The new rooms did not suit, indeed they had only been hired for temporary accommodation, until a fitting place for a permanent location could be obtained. A committee was chosen to confer with certain parties then building, with a view to obtaining a long lease of rooms adapted to the wants of the Board. The quarters were not, however, changed during the year. The hour of meeting was again changed to 10 o'clock A. M., and the secretary was ordered to provide refreshments for such as attended the daily sessions, and in accordance with instructions, thereafter set up a free lunch each day consisting of crackers, cheese and ale.

Many important subjects were brought to the consideration of the Board during the year. The project of establishing a bank to increase the then very limited and inadequate banking facilities of the city—the proposed capital was \$5,000,000, and resolutions passed the Board favoring its establishment. The harbor being still in a dangerous condition, a committee was appointed to take soundings, and to devise ways and means for the further improvement of the north channel. The Board also passed resolutions favoring a ship canal around Niagara Falls, on the American side. It also petitioned the City Council to make an appropriation for such improvements of the harbor as might be deemed necessary, and Thomas Hale and Orrington Lunt were appointed delegates to go to Washington to represent the harbor interests of Chicago, and to secure such favorable action of Congress as was possible. They started on their mission bearing credentials from the Board, and fortified with a full set of resolutions and memorials from that body. The improvement of the St. Clair flats came up for consideration, and delegates were appointed to attend a joint convention of delegates from all the lake cities, held in Detroit, for the purpose of devising some plan for carrying on the desired improvement.

The sixth annual meeting was held in April, 1854. The new officers chosen were: George A. Gibbs, president; W. D. Houghteling, vice-president; and James E. Dullaba, secretary and treasurer. New rooms were rented on the corner of Wells and South Water streets

(over the store of Purington & Scranton) at \$250 per annum. W. D. Wilson, in consideration for services as janitor, was allowed the use of the rooms. It was voted to print the constitution and by-laws and the names of officers and members in pamphlet form. Several public questions, as they came up during the year, were, as usual, acted on by the Board. A remonstrance was made against the proposed location of the Government office, it being considered to far from the present or prospective center of business. The remonstrance and all other means used by the Board failed to change the location.

A most important question, and one entirely relevant to the legitimate business for which the Board was organized, came up for the first time during this year. Hitherto all grains had been measured in the old-fashioned way in a half-bushel measure. The process was slow, unreliable and cumbersome. The trade, in its accumulating proportions, had already outgrown it. It was proposed by the Board that the Boards of Trade of Milwaukee, Detroit, Toledo, and other points be requested to use their influence to secure such legislation in their respective States as should result in the use of weights, instead of measures in the measuring of grain, seeds, etc. This action, first started by the Chicago Board, resulted ultimately in bringing about the desired reform, thereby opening the way for all the improved methods of inspecting, grading, storing, transporting, and transferring grain in bulk, all of which may be traced in their inception to this change; and none of which, under the old system of measurement, would have been possible.

The seventh annual meeting was held in April, 1855. The officers elected were: Hiram Wheeler, president; C. B. Pomeroy, vice-president, and W. W. Mitchell, secretary and treasurer. The time of meeting was changed to 11:30 A. M., but not proving beneficial, was subsequently altered again to 9:30 A. M. The secretary seems to have grown lax in his duties as a caterer, as it was voted to employ some one to furnish the daily lunch of "crackers, cheese and ale." A reading-room was instituted for the use of members, and newspapers from the cities of Boston, New York, Montreal, Buffalo, Oswego, Detroit and Cincinnati ordered to be subscribed for and kept on file. The important public questions acted on by the Board during the year was the project to build the Georgian Canal. The action of the Board and the final outcome of the enterprise are thus told in Colbert's history: "During this summer the project of the Georgian Bay Canal was actively discussed, and many urgent and imperative reasons were set forth in favor of its being built. On July 28, William Bross, of the Tribune, addressed a meeting of the Board, representing the advantages to be derived from the proposed canal, and introduced Thomas Steers, of Toronto, C. W., who read a communication from the Board of Trade of that city, showing its willingness to coöperate with the "board" of Oswego regarding a survey. Mr. Bross then offered a resolution to the effect that the Chicago Board of Trade will coöperate with other boards (having any interest in the matter) in the building of the Georgian Bay Canal, subject to the control and direction of the Canadian Government. A committee, consisting of William Bross and George Steele, went to Canada and advocated the measure. A charter of incorporation was afterward obtained, but beyond the breaking of ground and presenting the president of the company with the usual gift, nothing was done, and the subject has almost entirely passed away from the memory of those who were once its most earnest advocates."

Sometime during the year a door-keeper was appointed. The free-lunch fiends had increased to such a degree as to seriously threaten the solvency of the institution. It was a flagrant abuse of hospitality, and, in the eyes of the more staid members, the free lunch was incompatible with the dignity which should attach to so important a body as the Board of Trade had become; while not a few had come to view the whole thing as an unmitigated and very costly nuisance. One disgusted member moved "that the Board will no longer be responsible for refreshments." His motion was lost, but, as a compromise, the door-keeper was chosen, whose duty it was to keep out all dead-heads whom he suspected had unholy designs on the lunch.

The eighth annual meeting was held at the Tremont House, April 7, 1856. The Board was now fairly established, and was deemed of sufficient importance to make its membership desirable to most merchants of standing in the city. The day when it was necessary to canvass for new members was passed. At this meeting forty-five new members were elected. The officers elected were: C. H. Walker, president; G. C. Martin, vice-president, and W. W. Mitchell, secretary and treasurer. The meetings were ever after this time well attended. The lunch was abolished; cards of membership were issued, a regular door-keeper appointed; and the Board, having passed its days of adolescence, started on the more business-like career of actual usefulness. More pretentious and commodious quarters were taken. May 1 the Board took possession of the lower floor of Walker's building at a rental of \$1,200 per annum.

Rooms were rented in George Steele's building, on the corner of South Water and LaSalle streets, at a rental of \$1,000 per year.

On the 6th of October one hundred and twenty-two new members were admitted.

During this year the projects of erecting a building suitable for a Merchants' Exchange, was discussed, and a committee appointed to prepare plans, solicit subscriptions, etc. The members of the committee reported in November that they had individually purchased a piece of ground, at the corner of Clark and Washington streets, for the sum of \$180,000, suitable for the proposed building, which the Board could have at the price they had paid. The offer was accepted on the condition that a sufficient amount of stock could be obtained to carry out the purpose of building. The stock was not raised, and, for years after, the building project was not revived.

Action was taken on various matters of commercial importance during the year. At that time the Welland Canal had grown to be of great importance as an avenue of transportation of Western products to tide water. The shipments through the canal were so large as to render it a serious competitor for the carrying trade with the New York & Erie Canal, which, at an early day, enjoyed almost a monopoly of the business. The freight thus diverted proved a like diminution in the trade of Buffalo, the western terminus of the Erie Canal. With the design of forcing the shipments back into their old channel, through Buffalo, a bill was presented in the New York Legislature, which, if passed, would establish a rate of tolls discriminating against all routes using the Welland Canal. Pending its passage resolutions were passed by the Chicago Board of Trade, protesting in the strongest terms against the injustice of the proposed scheme, and also urging all Canadian houses doing business in Chicago, to request their correspondents to memorialize the Canadian Government to enlarge the Welland Canal sufficiently to enable the

larger vessels in the carrying trade to pass through. Some further action was taken in conjunction with the St. Louis Chamber of Commerce, looking to the improvement of the Illinois River.

The first steps were taken this year for defining and regulating the standard and grades of wheat. The standards established were to be designated as "white wheat" (winter), "red wheat" (winter), and "spring wheat." From this crude classification has been evolved the whole system of the grading and inspecting now in vogue, under rules so unerring, that the grades are standard all over the commercial world, wherever American wheat is known.

In April, 1857, the ninth annual meeting was held. The officers elected were: C. H. Walker, president, G. W. Noble, vice president, and W. W. Mitchell, secretary and treasurer. Seventy-three new members were admitted. It was resolved to employ a superintendent, at a salary of \$1,500. P. L. Wells was subsequently appointed to the position. He had been for several years before, the commercial editor of the Daily Press, and, since 1854, had published annual reports of the trade, commerce and manufactures of the city. They were the only compilations of commercial statistics of those years approaching anything like completeness or accuracy. His appointment opened to the Board a new department of usefulness. Under his direction a system of gathering, preserving and publishing the trade statistics of each year, was inaugurated by the Board. The first annual trade report was issued under his supervision in 1859. Since which time the Board has been the great depository and conservator of the statistics of Chicago trade.

In the summer a system of lumber inspection was adopted by the Board, and during the year sixty more were added to the list of members.

The early history of the Board of Trade was uneventful and uninteresting, except that it is the history of an institution which has, from the small and apparently insignificant beginnings here chronicled, come to be the great central force which controls the business of half a continent and an important factor in the commerce of the whole civilized world. The crude efforts, often blindly made, to systematize business methods and unify the business interests and energies of the city, did not then show, save to the few gifted with extraordinary prescience, the wonderfully intricate and powerful instrumentality in directing and controlling trade and commerce it has since become. Nearly all the modern means, methods and facilities for transacting business or carrying on either local trade or foreign commerce, had their inception in the Board, and were in their perfection evolved from its action.

The inspection, warehousing and shipping of grain, in well-defined and standard grades; the standards of inspection of flour, pork, beef, lard, butter, lumber, etc., were all primarily established and ultimately perfected through its action. The rapid dissemination and interchange of reliable commercial news and market quotations was evolved from the mutual necessities of the boards of trade in the business centers of the world. The system of gathering all important commercial statistics has been carried to a point of comprehensiveness and accuracy far beyond that of the Government bureau of statistics. It has also become an essential agency in the direction of State and national legislation on all commercial questions. Its resolutions and suggestions, although made in less high-sounding phrase, with less all-absorbing frequency, and with less youthful fervor than formerly, carry with them now a tone of

authority which seldom passes unheeded. Much of the commercial law of to-day has grown out of questions brought to the notice of the courts through the transactions of its members and the rules established by the Board. The statutes pertaining to inspection, warehousing, and many others were the direct outgrowth of its action. The daily gathering on the floor, the Babel of trade, where more business is done than in any like place in the world, is, although the most conspicuous, thus seen to be but one of many phases of its executive work. In all great crises the Board has come to be the true index of the patriotism, the benevolence and humanity of its members, no less than that of their combined business force. Witness their acts of humanity when Chicago went up in flame and smoke, and their never failing loyalty and patriotism in the dark and troublous times of the Rebellion. The history of these years will in future volumes constitute the brightest pages in its annals.

In the efforts to facilitate legitimate trade, it will be curious to note how has been necessarily evolved the most tempting facilities for speculative trade, even to the point of gambling, pure and simple. So long as a trade involved the necessity of an actual delivery or receipt of the goods sold or bought there was little inducement for speculators to overtrade, since the consummation of each trade involved the expenditure of such large amount of labor and time. The storing of wheat in specified grades of an acknowledged standard, and the issuing of warehouse receipts for the same, placed wheat on the list of speculative articles so soon as the receipts came to be acknowledged as a delivery on a sale, thus mobilizing the article to that extent that large deliveries could be momentarily tendered on a sale at any specified hour. Such delivery had not before been possible. Thus the reader who follows the history

of the Board through the subsequent years will observe how the spirit of speculative gambling has been a natural outgrowth of the necessities of legitimate trade, and how, with the establishment of acknowledged grades of inspection, and their mobilization for speculative purposes through their representation by warehouse receipts, one after another, the various food products, as they came to be stored in sufficient quantity, have been added to the speculative list. Wheat, corn, rye, barley, oats, flour, pork, lard, butter, oil, have come successively to add volume to the speculative material, and the volume of speculative trading has grown in a tenfold ratio to that of the increasing basis. Reports of daily transactions on the Board have ceased to show the volume of legitimate trade, except when correlated with other known facts. It is not now uncommon, on an excited market, for the entire available stock of one of these articles to be sold and resold a dozen times in a single day.

Speculative trading in grain and provisions, as now developed, was entirely unknown during the period treated in this volume. It is of purely Western origin, and its birthplace was the Board of Trade of Chicago. It will not be the least interesting part of its future history to trace it from its legitimate birth, through all its stages of development, to the present reckless and riotous period of its life. This early sketch may therefore be deemed of more than passing interest, since it is but the necessary introduction to what in the succeeding years will prove a most interesting historic topic concerning the development of Western trade and commerce, and the unique experiences of Western business men.

The principal officers of the Board of Trade of Chicago, from its organization to 1857, were as below given:

YEAR OF INCUMBENCY.	PRESIDENTS.	VICE-PRESIDENTS.	SECRETARIES.	TREASURERS.	SECRETARIES AND TREASURERS.
1848	Thomas Dyer.	{ Charles Walker. } John P. Chapin.
1849-50	Thomas Dyer.	{ John P. Chapin. } Charles Walker.	W. L. Whiting.	John C. Dodge.
1850-51	Charles Walker.	John P. Chapin.	John C. Dodge.	Thomas Hale.
1851-52	Charles Walker.	John P. Chapin.	John C. Dodge.	Thomas Hale.
1852-53	George Steel.	Thomas Hale.	John C. Dodge.*
1853-54	Thomas Hale.	C. H. Walker.	C. P. Hilliard.
1854-55	George A. Gibbs.	W. D. Houghteling.	James E. Dullaba.
1855-56	Hiram Wheeler.	C. B. Pomeroy.	W. W. Mitchell.
1856-57	C. H. Walker.	G. C. Martin.	W. W. Mitchell.
1857-58	C. H. Walker.	G. W. Noble.	W. W. Mitchell.

* Mr. Dodge resigned in February, 1853. Mr. Dullaba served by appointment the unexpired time.

Subjoined are personal sketches of the several presidents of the Board. Hon. Thomas Dyer is mentioned in the political chapter, he having filled the office of Mayor of Chicago.

CHARLES WALKER, the eldest son of William W and Lucretia Walker, was born at Plainfield, Otsego Co., N. Y., February 2, 1802. Here and at Unadilla Forks he both attended and taught school. At the latter place he clerked in a store and also engaged in business for himself. In 1824 he removed to Burlington Flats, continuing as a merchant, and gradually adding to his other business a grist mill, a saw mill, a potash factory and a tannery. In a few years he was doing the largest business in these branches in that section of the country. He established himself at this point with a capital of

\$1,350, \$1,000 of which was borrowed. Mr. Walker continued in business at various points in the State, engaging in the grain and cattle trade, and by close and judicious management he prospered finely until 1828. During that year, however, all his savings were swept away, a large amount of cheese, butter and pork which he had shipped to the South being greatly damaged at sea. In the autumn of 1834 he sent his brother Almond to Chicago with a large stock of boots, shoes and leather, and during the succeeding spring he arrived himself, although he did not make the city his permanent home. He at once invested in real estate and otherwise showed the confidence he felt in the future supremacy of Chicago. In 1836 Mr. Walker admitted E. B. Hulbert to partnership, the firm name being C.

& A. Walker, and their business being the importation of farming implements from the East, besides carrying a general stock of goods. He weathered the storm of 1837, and in 1839 shipped the first grain from Chicago to the East. It consisted of thirty-nine bags of wheat, which he sent to his mills at Burlington Flats, Otsego County. During this period Mr. Walker divided his time about equally between Chicago and the State of New York, but by 1845 his business had so increased at the former point that he decided to remove hither. Accordingly he formed a partnership in Utica, N. Y., with Cyrus Clark, his brother-in-law, under the firm name of Walker & Clark, for the purpose of receiving Western produce. In May, 1845, he removed his family to Chicago. Although the crisis in the grain trade seriously affected Mr. Walker's business, his house continued to hold its position as the leading grain and produce establishment in the West. In 1851 C. Walker & Son, of Chicago; Walker & Kellogg, of Peoria, and Walker & Clark, of Buffalo, were the largest grain purchasers in the United States. At this period a severe attack of cholera made it necessary for Mr. Walker to leave the active management of his affairs to his eldest son, Charles H. Walker, who continued the business under the firm of C. Walker & Son, and C. Walker & Sons, until 1855, when the father was obliged to retire from business altogether. The management of the house was now left to his two sons and others, who continued the same under the firm of Walker, Bronson & Co. During the year 1856-57 the firm handled over 5,225,000 bushels of grain. As is usually the case with men who have successfully managed their private affairs, Mr. Walker was called to several public posts of responsibility. He was one of the original directors of the Chicago & Galena Union Railroad in 1847-48, taking an active part in its management from first to last, and also in 1856 acting as president and one of the main directors of the Chicago, Iowa & Nebraska line, which was intended to be a continuation of the Galena road. Mr. Walker was the second president of the Board of Trade, serving for three years from 1849. His death occurred June 28, 1869. Mr. Walker was twice married—the first time to Mary Clarke, at Unadilla Forks, and the second time to Nancy Bentley, at Lebanon Springs, N. Y.

C. H. WALKER, the eldest son of the above, who assumed the management of his father's extensive interests when he retired from business, was himself president of the Board of Trade in 1856 and 1857. Mr. Walker is now a resident of St. Mary's Parish, La. George C. and William B. Walker, also sons of Charles, are members of the prosperous commission house of George C. Walker & Co. There is one other child living, a daughter, now Mrs. Cornelia W. McLaury.

GEORGE STEEL was born in Forfarshire, Scotland, in 1797, one of a family of twelve sons, and removed to Canada about 1828, engaging as a contractor on the Lachine Canal. In 1837 he came to Chicago, having entered into a contract for constructing a portion of the Illinois & Michigan Canal. He built the works at Utica, known as the Clark Cement Works. After the stoppage of work on the canal, Mr. Steel came to Chicago and began business as produce and general commission merchant, and established a pork-packing trade on South Water Street, between what is now Fifth Avenue and Franklin Street, on the site of the Alston Manufacturing Company. At that time fifty hogs was a large day's packing business. His office and warehouses were at the foot of LaSalle Street on South Water. In 1856-57 a building was erected on this site and a

room finished in the third story for the use of the Board of Trade, that being the first room constructed expressly for the Board. The room was fifty by eighty feet in size, but was soon found to be too small for the purpose intended, and the Board removed to Newhouse's building, just west of the Steel building. Mr. Steel built the first steam elevator in Chicago to receive grain from canal and railroad. The elevator had a capacity of about one hundred thousand bushels. It was on the corner of North Franklin and River streets. It was burned about the year 1854. Mr. Steel was married in Montreal, about 1830, to Anna Stein Morrison, and was the father of nine children, seven of whom are still living—Jane, James, Marjorey, Mary, George, Susan, and William. In 1852-53 Mr. Steel was president of the Chicago Board of Trade. His death occurred in Chicago, in March, 1865. During his life he was a very popular man, and is remembered by his few surviving associates as one of the typical business representatives of the early period in Chicago.

THOMAS HALE, president of the Board in 1853, was a forwarding and commission merchant. He owned large warehouses both on North and South Water streets, and was one of the leading men of the city. Mr. Hale was one of those who signed the call in 1848 for the formation of the Board of Trade, but with the exception of this one office does not appear as a public functionary. S. T. Hale and Martin C. Hale are his sons. Mr. Hale died some years ago.

GEORGE AUGUSTIN GIBBS, son of Dr. Norrin E. Gibbs, a pioneer of Rochester, N. Y., was born in Rome, of that State, September 13, 1811. His mother, Sophia Gibbs, was a descendant of General Patterson, of Revolutionary fame. The subject of this sketch was given an academic education at Rochester, but at the age of nineteen, quitted school to engage in business for himself. In 1840 he came to Chicago as the agent for a forwarding line in Buffalo. He remained in that business for some time, but finally formed a connection with the firm of B. W. Raymond & Co., which later became known as George A. Gibbs & Co. About this time, in company with Edward W. Griffin, he built what was afterward known as the old Galena Elevator, and which was the first of its kind built in Chicago. In 1854-55 he was president of the Chicago Board of Trade and was for years a prominent member of that body. Mr. Gibbs was three times married; first in 1831 to Miss Bertha Strong, daughter of Judge Strong, of Rochester. By this marriage there were four children, two of whom died in infancy, and two, William S. and James S. Gibbs, are now both well-known residents of Chicago, the latter being the present cashier of the Illinois Trust & Savings Bank. His second marriage was to Miss Mindwell Woodbridge, daughter of Dr. John Woodbridge, of Hadley, Mass., during this marriage one child was born but which also died in infancy. He was last married to Miss Anna Milford, daughter of Major Milford, an old resident of Chicago. In 1865, December 8th, Mr. Gibbs died, leaving no issue by his last wife, who survived him until in July, 1881, when she too deceased.

HIRAM WHEELER, member of the firm, Munger, Wheeler & Co., has been in the grain and warehouse business for forty-five years. He came to Chicago in 1849, having previously been engaged in the lake trade at St. Joseph and Niles, Mich. Two sons, Charles W. and G. Henry Wheeler, are now members of the firm. Hiram Wheeler was elected president of the Board of Trade in 1855.

SCIENTIFIC DESCRIPTION OF LOCALITY.

GEOGRAPHICAL.

Chicago is situated at the embouchure of the Chicago River, near the southwestern corner of Lake Michigan. The geodesic position of various points in the city has been determined as follows:

Steeple of Roman Catholic Church of the Holy Name on Wolcott Street, between Huron and Superior streets, $41^{\circ} 53' 48''$ north latitude; $87^{\circ} 37' 47.73''$ longitude:

Dome of Chicago city hall, or court-house, $41^{\circ} 53' 6.2''$ north latitude; $87^{\circ} 36' 1.2''$ longitude.

Center of the base of iron light-house, $41^{\circ} 53' 24.9''$ north latitude; $87^{\circ} 36' 59''$ longitude.

Tall chimney of the Illinois Central Railroad Company's machine shops on the lake shore, $41^{\circ} 51' 50.5''$ north latitude; $87^{\circ} 37' 21.27''$ longitude.

These observations were made under the auspices of the United States Topographical Engineers, anterior to 1870.

The observations made by the United States Signal Service have determined the following geometrical data:

Station on Washington Street, one square from city hall, ante-fire, in 1871: latitude, $41^{\circ} 52'$; longitude, $87^{\circ} 35'$.

Station in Major Block, southeast corner of Madison and LaSalle, determined by Captain Powell, in 1881; latitude, $41^{\circ} 53' 4''$; longitude, $87^{\circ} 37' 45''$.

The position of old Fort Dearborn is of record in the archives of the War Department as $41^{\circ} 52'$ latitude; $87^{\circ} 35'$ longitude.

The center of the telescope in the Dearborn Observatory, situated within the Douglas University buildings on Cottage Grove Avenue, is $41^{\circ} 50' 1''$ latitude; $87^{\circ} 36' 41.7''$ longitude, or 5 hours 50 minutes 26.78 seconds west from Greenwich; or $10^{\circ} 33' 40.4''$ longitude; or 42 minutes 14.69 seconds west from Washington. This observation was taken by Prof. T. H. Safford, and is authenticated by Prof. Elias Colbert.

The Ephemeris, or American Nautical Almanac, gives the location of Chicago, as latitude, $41^{\circ} 50' 1''$; longitude, 5 hours 50 minutes 26.78 seconds, or $87^{\circ} 36' 26''$.

The latitude is, of course, north; and the longitude west from Greenwich.

METEOROLOGICAL.

The height of the barometer above mean tide is 661.17 feet.

The mean annual rainfall for eleven years ending December 31, 1882, is 33.92 inches, and excessive rainfalls during this period have been on September 9, 1875, 3.52 inches; on the night of July 25, 1878, 4.14 inches; on July 16, 1879, 3.25 inches, and on November 11, 1881, 3.18 inches.

The maximum temperature, since the establishment of the station of the United States Signal Service on November 1, 1870, and prior to July 24, 1883, was

$+99^{\circ}$, on July 29, 1874; the minimum temperature, during the same period, was 23° on February 24, 1872. The mean temperature for ten years from 1872 was $49^{\circ} 4'$.

Phenomenal meteorological occurrences have been: the continuance of navigation during the entire year of 1882, and the opening of navigation on May 1, 1883; a storm on August 5, 1875, wherein the wind attained a velocity of forty-five miles an hour; a storm on June 25, 1877, when the wind registered on the anemometer fifty miles an hour, and on May 6, 1876, when the city was visited by a tornado which accomplished damage to the amount of about \$250,000, during the few minutes of its passage. But Chicago has been singularly free from the devastating cyclones that have cut swathes of ruin in all the conterminous country, and the reasonable solution of this fact appears to be that the light, humid atmosphere of the lake absorbs the approaching cyclone and disseminates it. The force of a cyclone, as the force of dynamite, requires repression and compression to educe it.

No more favorable opportunity will be presented, in the course of this history to allude to the duties performed by the observer at the signal station, in carrying out the rules imposed by the United States Signal Service. He has to record, encipher and transmit to the Chief Signal Officer observations of the barometer, thermometer, hygrometer, anemometer and anemoscope; the kind, amount and direction of clouds; the time of the beginning, ending and amount of precipitation during storms; the depth and temperature of rivers and lakes; carefully note and record all atmospheric phenomena; prepare weather reports for the information of the public; attend to the hoisting and lowering of cautionary signals, and generally have a hundred eyes, like Argus, and a hundred arms, like Briareus, to see and annotate such matters meteorological, as will foretell coming storms and record the passage of those that assume entity. This subject is adverted to that the public may have some little conception of the sleepless watchfulness and care that obtains at the multifarious stations of the United States Signal Service all over the continent; and of the unceasing vigilance, that is the prerequisite to liberty for mariners to set sail without forebodings of impending shipwreck.*

No reference has been made, in this brief allusion to meteorological phases of Chicago's existence, to any observations that may have been made prior to the establishment of the United States Signal Station; there were observations, made cursorily, but no meteorological record is of value unless it is uninterrupted; casual observations are liable to omit the very phenomena, or occurrence, that is of prime importance; and another reason for ignoring sporadic data is, that such matters are treated in the course of the history or are noted in the chronological table.

Sufficient elaboration, however, has been given to the thermal status of Chicago's climate, to exhibit that the newspaper claim of its eligibility as a summer resort, is not without foundation in the truth-telling figures,

* To Sergeant William Nurrington, the observer at the signal station in Chicago, the collaborator is under obligations for valuable information.

registered upon the various thermometers during the summer months.

TOPOGRAPHICAL.

The authentic topography of Chicago is limited in consequence of the first survey not having been made until 1821, and then only of the shore-line; in fact, the surveys have nearly all been directed to this particular portion of the city, the interest of the general and municipal governments being concentrated upon the harbor, the river and the pier. When real estate speculation was rife in the city, then, of course, additions and subdivisions were made *cou amore*, but these surveys were sectional, not general, and the results of such surveying are not included in this article; which contemplates merely the configuration of the shore-line and the accretions and erosions that have been occasioned by the

and from Chicago Avenue to the north bank of the Chicago River, of about ninety-eight acres.

The surface configuration of the ground is thus accurately described by John M. Van Osdel:

"From the fort, at Rush-street bridge, south on Michigan Avenue, the surface of the ground was, as it is now, about nine or ten feet above the surface of the lake. The surface drainage was from Michigan Avenue west to the river, and from State Street west was nearly a level plain, elevated some two or three feet above the river. The topography of the North Division was similar, the surface declining from Rush Street toward the west. The surface water cut large gullies in the soil, known as sloughs; three of these sloughs opened into the main river. One at State Street was about sixty feet wide at the mouth and extended in a southwesterly direction to the site of the present Tremont House. Another had its outlet between Clark and LaSalle streets, and extended inland across Lake Street. The third and most formidable one was on the North Side, near Franklin Street, being eighty feet wide at the river and extending north through the Kingsbury and Newberry tracts to Chicago Avenue."*

constant current that sets toward the mouth of the harbor from the straits of Mackinaw. The same forces that caused the bar across the mouth of the river in times of yore, have made hundreds of acres of land upon the north side of the pier, and the detritus and deposit that was formerly a formidable obstacle to navigation has become dry land, and a valuable accessory to Chicago's greatness.

From 1821 until 1869 the lake eroded the shore south of the pier to a width of three hundred and twenty feet; but the piling driven along the lake front retarded this incursion, and then caused a deposit until the land lost has been more than recovered. That the soil along the lake, south of Thirty-ninth Street and as far west as Grand Boulevard, is "made land," is easily perceivable from its arenaceous character and the conchological remains with which it is replete. The accompanying plat* clearly shows the accretions alluded to, and which demonstrates that at a line near the north bank of the river the various accessions, in lineal feet, have been as follows: From 1821 to 1833, 420 feet; to 1838, 780 feet; to 1843, 1,036 feet; to 1849, 1,400 feet; to 1854, 1,520 feet; to 1864, 1,650 feet; to 1869, 1,758 feet; to 1876, 1,900 feet, and to 1880, 1,860 feet; this augmentation making an area, from the survey line of 1821 eastward,

* Taken from tracings furnished by the kindness of the Chief of Engineers, United States Army, and on file in the office of the Chief Engineer Officer, Military Division of the Missouri.

GEOLOGICAL.

Chicago lies on an apparently level plain which surrounds the whole of the head of Lake Michigan; the plain having a gradual, average ascent of from five to fifteen feet in a mile in its recession from the lake. The smooth surface of this vast prairie was leveled by the former waves of the lake, which left the oldest beach line at fifty-two feet above its present level. Upon this level the surface deposit is either black muck, or, in places, lake sand. For several eons the lake occupied three different levels, the highest of which—mentioned above—was not as high as around Lake Erie, and this level was that which the lake occupied at the close of the drift period. Then the water fell to about its present level and remained there for ages, while a dense forest in some places and extensive marshes in others, covered the surface where Chicago now stands and over a region to twenty miles north of the city. This was the Quaternary period, and the mastodon roamed† where the churches and schools of Chicago now stand. At the close of this epoch, the lake rose thirty feet, and there remained for ages, throwing up a great beach line, and covering the bones of the masto-

* These sloughs are located upon the plat of Chicago in 1830, in the chapter upon Early Chicago.

† The skeleton of a mastodon was found thirteen feet under ground in the northwestern part of the city; all of the skeleton, however, was not exhumed.

dons and the prostrate trunks of the forest with fresh water deposits.* The lake then fell to its present level, throwing up a series of beach lines as it receded. All the fresh water deposits lie on a slope of boulder-drift clay, except where protuberances of rock come above the surface; one of these, at Stony Island, is remarkable for a steep dip of the strata in every direction from its center,—anticlinal axis. This clay varies from zero to at least seventy feet in thickness, and is a hard, stony clay, containing ice-scratched boulders of rock transported from hyperborean regions, and lies everywhere upon a floor of Niagara limestone completely covered with glacial scratches, running approximately in a south-westerly direction. This clay has been thoroughly studied, because during the excavation of about ten miles of tunnels for the Chicago water works, etc., the working of them was watched by the members of the Academy of Sciences; it is so compact that even when the tunnels were driven two miles under the lake at a depth of sixty feet, there was scarcely any infiltration. Like the boulder clay of the West everywhere, its stratification is very obscure, except at a few certain points, and contains no synchronous fossils, except fragments of wood. The clay is also replete with pockets full of stratified gravel, having the general shape of boulders and surrounded by compact clay; the strata of the gravel was sometimes vertical. These masses were probably deposited in a frozen condition; the interstices of the gravel are filled in the upper part of the pocket with combustible carbureted hydrogen gas; the lower interstices filled with water, that, on analysis, yielded this singular result: that water taken from gravel pockets underneath the bed of the lake, contained about twice as much common salt as the artesian well water from the rock beneath the pockets, and about ten times as much salt as the water of the lake above; so that the boulder drift beneath the lake appeared, relatively, a salt deposit sandwiched between the fresher waters of the lake above and the rocks below; a fact which is considered of importance by those who believe in the marine origin of the boulder drift. In the boring of artesian wells it is a matter of much regret that careful records have not been kept that would elucidate the deeper geology; at the Union Stock Yards, however, a well was sunk to the depth of eleven hundred and five feet, and in this instance a record was kept by Johnston Ross, who superintended the boring. This itinerary and the known superficial data give the following section of all deposits down as far as known:

Surface soil :	} From one to seventy feet.†
Lake deposits :	
Quaternary forest and soil bed :	
Boulder drift :	

NIAGARA GROUP.

- 1. Bluish-gray limestone..... 16 feet.
- 2. Light-gray limestone, slightly varying in shade of color at different depths..... 138 feet
- 3. Limestone—nearly white..... 20 feet
- 4. Limestone—buff or drab..... 80 feet—254 feet.

CINCINNATI GROUP.

- 5. Shale—soft and fine..... 104 feet
- 6. Limestone—light-gray..... 20 feet
- 7. Shale—coarser and arenaceous..... 126 feet—250 feet.

TRENTON GROUP.

- 8. Brownish ferruginous limestone..... 25 feet
- 9. Grayish limestone—more or less dark..... 305 feet—330 feet.

* It is a matter of scientific credence that this rise corresponded to the inundation of the Loess found on the Mississippi River, and in most of the Southern States, where, as in Chicago, it covers a forest bed containing remains of the mastodons

† The drift and surface deposits were forty-six feet where the well was bored at the Stock Yards

ST. PETER'S.

- 10. Whitish-brown sandstone..... 155 feet—155 feet.

LOWER MAGNESIAN LIMESTONE.

- 11. Light-colored limestone—very hard..... 60 feet
- 12. Gray limestone..... 10 feet—70 feet.

The first forty feet of the Niagara limestone is extensively permeated with bitumen or petroleum, of which several ounces can often be taken out in a mass from cavities in the rock; an aggregation of protracted percolation. Green stains occur frequently in the limestone; analysis thereof determined them to be salts of chromium, but not in paying quantities. Of the bituminous rock several edifices in Chicago have been built; such buildings are readily recognized by their peculiarly antiquated, weatherbeaten appearance. Outcroppings of the Niagara limestone occur at Stony Island, South Chicago, at Stearns' lime kilns (Bridgeport), corner of Twenty-seventh and Halsted streets; at Phinney's lime kilns, corner of Nineteenth and Lincoln streets; at Rice & Son's and Keyes & Thatcher's quarries and kilns, corner of Grand Avenue and West Ohio Street; also near Hawthorn Station in Cicero Township. By these outcroppings, and by the fact that the Cincinnati shale comes to the surface in a northwesterly direction in central Wisconsin, the strike is manifested to be northwest and the dip consequently* northeast, and the clinometer demonstrates its angle to be nine degrees.

PALEONTOLOGICAL.

In presenting a list of the fossils found in Chicago and its immediate vicinity—the most primitive of the old settlers—a brief resumé of the paleontological researches that have been made here is requisite, as such explorations have considerable bearing on the identity of many species enumerated, and resulted in giving to the scientific world many new and interesting forms. Of the one hundred and twenty-one species given, Chicago has furnished forty-six type specimens, exclusive of instances where these quarries have provided material used in describing forms found in other localities. In 1860, Professor McChesney described and illustrated, in the Proceedings of the Chicago Academy of Sciences, *Bucania chicagoensis*, *Trematospira mathewsoni*, and other species. In 1865, Professors Winchell and Marcy read before the Boston Society of Natural History, a paper entitled: "Enumeration of Fossils collected in the Niagara Limestone at Chicago, Ill., with descriptions of several new species;" this paper was published and illustrated, and applied only to species found at Bridgeport, and therein thirty-nine established species were mentioned as having been identified and a similar number were described as new species. About the same time Professor James Hall, of Albany, N. Y., published a pamphlet entitled: "Account of some new, or little known, species of Fossils from the Niagara Group;" in which some of the species described by Professors Winchell and Marcy were figured and described under different nomenclature. This has occasioned confusion and synonyms, which, however, time will eradicate. In 1868, Professors Meek and Worthen described in the third volume of Illinois Survey, two new species, and illustrated a few others. During

* The dip of the rock in the immediate vicinity of Chicago has been given by the State Geologist as east and southeast. At Phinney's quarry—the only one opened at the time of the compilation of this report—when the observation was taken, the westerly presentation of the undulating stratum gives that appearance, but the opening of the quarry on other sides rectified the undulating appearance, and revealed the true dip to be northeast.

In the compilation of this topic Dr. Edmund Andrews furnished valuable data upon surface geology, and Albert D. Hager furnished important facts on deeper geology, without which this chapter would be barren and uninteresting.

1881-82-83, S. A. Miller, of Cincinnati, the author and eminent paleontologist, in the Cincinnati Journal of Natural History, described and illustrated some thirteen species from Bridgeport and from a quarry a few miles west of Chicago, and also redescribed and illustrated a few of the species of Professors Winchell and Marcy that had been in dispute. Among those described by S. A. Miller, is the enigmatical fossil *Myelodactylus bridgeportensis*, for which a new family—the Myelodactylidæ—has been proposed. The fossils that are found in Chicago and its vicinity are generally casts of the interior, and impressions on the rock of the exterior; the casts are, generally, clear and sharp, but broken, and perfect specimens are extremely rare, necessitating an extensive suit before identification is certain, except in pronounced forms; which fact has often been productive of confused identification among the prominent authors. The condition of the sea, at the time of the depositing of the rock, was very favorable to the *crinoidal fauna*, demonstrated by the large and robust forms and number of species of that representative of the *echinodermata*.*

The following list of the Batrachia and Reptilia that have been found in this region has been prepared by Dr. N. S. Davis, Jr., of Chicago.

BATRACHIA.

- TRACHYSTOMATA. SIRENIDÆ. *Siren lacertina*; Great Siren.
 PROTEIDA. PROTEIDÆ. *Necturus lateralis*; Mud-puppy or Water-dog.
 CADUCIBRANCHIATA. AMBLYSTOMIDÆ. *Amblystoma opacum*; Opaque Salamander: *A. punctatum*; Large Spotted Salamander: *A. tigrinum*; Tiger Salamander: *A. jeffersonianum*, sub-species, *laterale*; Jefferson's Salamander. PLETHODONTIDÆ. *Hemidactylum scutatum*; Four-toed Salamander: *Plethodon cinereus*; Red-backed Salamanders of both sub-species, *cinereus* and *erythronotus*; *Plethodon glutinosus*; Viscid Salamander: *Spelerpes bilineatus*; Two-striped Salamander: *S. longicaudus*, Cave, or long-tailed, Salamander: *S. ruber*, sub-species, *ruber*; Red Triton. DESMOGNATHIDÆ. *Desmognathus fusca*, sub-species, *fusca*; Dusky Salamander: *D. nigra*; Black Salamander. PLEURODELIDÆ. *Diemystylus miniatus*, sub-species, *miniatus*; Red Evet: *D. miniatus*, sub-species, *viridescens*; Spotted Evet.
 ANOÛRA. BUFONIDÆ. *Bufo lentiginosus*, sub-species, *americanus*; Common Toad. HYLIDÆ. *Acris gryllus*, sub-species, *crepitans*, Northern Cricket Frog: *Chorophilus triseriatus*, sub-species, *triseriatus*; Tree Frog: *Hyla pickeringi*; Pickering's Tree Toad: *H. versicolor*; Common Tree Toad. RANIDÆ. *Rana halecina*; Common Frog: *R. palustris*; Pickerel Frog: *R. clamitans*; Green or Spring Frog: *R. catesbiana*; Bull Frog: *R. temporaria*, sub-species, *silvatica*; *R. areolata*, sub-species, *circulosa*; Ringed Frog.

REPTILIA.

- OPHIDIA. CROTALIDÆ. *Crotalus horridus*; Banded, or Northern, Rattle Snake: *Caudisoma tergemina*; Massasauga, or Prairie Rattle Snake: *Ancistrodon contortrix*; Copper-head or Cotton-mouth. COLUBRIDÆ: *Cophophiops amarus*; Ground Snake: *Ophibolus doliiatus*, variety, *triangulus*; Milk Snake or Spotted Adder: *O. getulus*, variety, *sayi*; King Snake: *Diadophis punctatus*, sub-species, *punctatus*; Ring-necked snake: *Cyclophis vernalis*; Green or Grass snake: *Coluber vulpinus*; Fox Snake: *C. obsoletus*, sub-species, *obsoletus*; Pilot Snake: *Pityophis sayi*, sub-species, *sayi*; Western Pine Snake: *Bascantion constrictor*, sub-species, *constrictor*; Black Snake; Blue Racer: *Eutania saurita*; Riband Snake; Swift Garter Snake: *E. jayreii*; Fair's Garter Snake: *E. proxima*; Say's Garter Snake: *E. radix*; Hoy's Garter Snake: *E. vagrans*, sub-species, *vagrans*; Spotted Riband Snake: *E. sirtalis*, sub-species, *dorsalis*; Common Striped Snake: *E. sirtalis*, sub-species, *sirtalis*; Common Garter Snake: *E. sirtalis*, sub-species, *obscura*; *Storeria occipitomaculata*; Red-bellied Snake. *S. dekayi*; De Kay's Brown Snake: *Tropidoclonium kirtlandi*; Cora Kennicott's Snake: *Tropidonotus grhami*; Graham's Snake: *T. leberis*; Leather Snake: *T. sipedon*, sub-species, *sipedon*;

The mark * indicates species the type of which was found at the Chicago quarries, and the mark † indicates species designated as found in Chicago at the time of their description.

- Water Snake: *T. sipedon*, sub-species, *woodhousei*; Woodhouse's Water Snake: *T. sipedon*, sub-species, *erythrogaster*; Red-bellied Water Snake: *T. rhombifer*; *Heterodon platyrhinus*; Spreading Adder: *H. simus*, sub-species, *simus*; Hog-nosed Snake.

- LACERTILIA. SCINCIDÆ. *Emmece fasciatus*; Blue Tailed Lizard. TEIDÆ. *Cnemidophorus sexlineatus*; Six-lined Lizard. ANGUIDÆ. *Ophosaurus ventralis*; Glass Snake. IGUANIDÆ. *Sceloporus undulatus*, sub-species, *undulatus*; Swift Lizard.

- TESTUDINATA. TRIONYCHIDÆ. *Amyda mutica*; Leathery Turtle. *Aspidonectes spinifer*; Common Soft Shelled Turtle. CHELYDRIDÆ. *Chelydra serpentina*; Common Snapping Turtle. CINOSTERNIDÆ. *Aromochelys odoratus*; Musk Turtle or Stink Pot: *A. carinata*. EMYDIDÆ. *Malacoclemmys geographicus*; Map Turtle: *M. pseudo-geographicus*; Le Sueur's Map Turtle: *Chrysemys picta*; Painted Turtle: *Emys meleagris*; Blanding's Turtle: *Cistudo clausa*; Common Box Turtle.

ZOOLOGICAL.

The following list of animals, whose habitat is, or was, Chicago, is furnished by Jacob W. Velie, Secretary and Curator of the Chicago Academy of Science:

- BLARINA: Gray. *Blarina brevicauda*, Gray—Short-tailed Shrew.
 SCALOPS: Cuvier. *Scalops argentatus*, Aud. and Bach—Silvery Mole.
 CONDYLUURA: Illiger. *Condylura cristata*, Illiger—Star-nosed Mole.
 LYNX: Rafinisque. *Lynx rufus*, Rafinisque—Wild Cat.
 CANIS: Linnæus. *Canis occidentalis*, var. *griseo-albus*—White and Gray Wolf.
 VULPES: Baird. *Vulpes fulvas*, var. *fulvas*—Red Fox: *V. virginianus*, Richardson—Gray Fox.
 PUTORIUS: Cuvier. *Putorius noveboracensis*, De Kay—White Weasel: *P. vison*, Richardson—Brown Mink: *P. nigriscens*, Aud. and Bach—Black Mink.
 LUTRA: Linn. *Lutra canadensis*, Sabine—American Otter.
 MEPHITIS: Cuvier. *Mephitis mephitis*—Common Skunk.
 PROCYON: Storrer. *Procyon lotor*, Storrer—Common Raccoon.
 URBUS: Linn. *Ursus americanus*, Pallas—Black Bear.
 DIDELPHYS: Linn. *Didelphys virginiana*, Shaw—Opossum.
 SCIURUS: Linn. *Sciurus ludovicianus*, Curtis—Western Fox Squirrel: *S. carolinensis*, Gmelin—Gray Squirrel.
 PTEROMYS: Cuvier. *Pteromys volucella* Cuv. (?)—Flying Squirrel.
 SPERMOPHILUS: Cuvier. *Spermophilus franklinii*, Richardson—Gray Gopher: *S. tridecemlineatus*, Aud. and Bach—Striped Gopher.
 ARCTOMYS: Shreber. *Arctomys monax*, Gmelin—Woodchuck, Ground Hog.
 CASTOR: Linn. *Castor canadensis*, Kuhl—American Beaver.
 MUS: Linn. *Mus decumanus*, Pallas—Brown Rat (introduced 1846): *M. musculus*, Linn—Common Mouse (introduced).
 HESPEROMYS: Waterhouse. *Hesperomys michiganensis*, Wagner—Prairie Mouse.
 ARVICOLA: Lacepede. *Arvicola austeria*, Leconte—Prairie Meadow Mouse.
 FIBER: Cuvier. *Fiber sibiricus*, Cuvier—Musk Rat.
 LEPUS: Linn. *Lepus sylvaticus*, Bachmann—Gray Rabbit.
 CERVUS: Linn. *Cervus canadensis*, Erxl—American Elk: *C. virginianus*, Boddaert—Virginia Deer.
 Bos: Linn. *Bos americanus*, Gmelin—American Buffalo. Of this last species of mammalia a curious error obtained with the early explorers; an instance of which appears in the "Recueil de voyages de M. Thevenot, Paris, 1681," wherein are given the voyages of Père Marquette. Upon a chart entitled: "Carte de la decouverte faite l'an 1673 dans l'Amerique Septentrionale,"* illustrative of the regions over which Marquette passed, is one district noted as inhabited by "Nations qui ont des chevaux et des chameaux!" (Nations who have horses and camels). The peculiar appearance of the buffalo undoubtedly gave origin to this error.

ORNITHOLOGICAL.

The following table of families of birds in Chicago and its vicinity, is given by Jacob W. Velie, of the Chicago Academy of Science:

Turdidæ.....	Thrushes.....	9 species
Saxicolidæ.....	Bluebirds.....	1 species
Sylviidæ.....	Warblers.....	3 species
Paridæ.....	Titmice and Chickadees,	1 species

* Vide Maps in Early History of Chicago.

ENTOMOLOGICAL.

Of the entomology of this region nothing can be intelligently said within the limits of this chapter; as, to give a catalogue of the various Coleoptera, Lepidoptera, Diptera, Heminoptera, Orthoptera, etc., would occupy to ogreat a proportion of this work; and the possible benefits to the agricultural inhabitant of Chicago by the publication of such a catalogue would not repay the labor bestowed upon the compilation. There is no question as to the value of the science to both the sava and the agriculturist, but unfortunately, there is no classification made of the insects indigenous to this region, and to eliminate them from a general catalogue would require months of labor. In the comprehensive collection of Mr. Andrew Bolter are one hundred and fifty specimens not identified, and this gentleman states that new microscopic species are continually being discovered; hence a catalogue from this—the best collec-

tion in the State—would be necessarily imperfect; and the collection itself being extant, entomologists can consult that, and have the advantage of Mr. Bolter's exhaustive research and comprehensive information to aid their entomological investigations.

ICHTHYOLOGICAL.

The ichthyological specimens* that are found in the waters adjacent to Chicago, comprise, three specimens of the Darters; four specimens of the Perches; one of the Bass; eight of the Sun Fishes; one each of the Pirate Perches and the Maigres; four of the Sculpins; one of the Cod Fishes; two of the Sticklebacks; one each of the Silversides and Toothed Minnows; two of the Pikes; one of the Trout Perches; seven of the Salmon; one each of the Gizzard Shad and Herring; twelve of the Carps; seven of the Suckers; three of the Cat Fishes, and one each of the Eel and the Sturgeon family.

CONCHOLOGICAL.

Of the conchological specimens found in Lake Michigan, the Calumet and Chicago rivers and the Calumet, Hyde and Wolf lakes, the following classification has been made by W. W. Calkins:

LIMNÆA *reflexa*, *appressa*, *jugularis*, *palustris*, *caperata*, *umbrosus*; PHYSA *gyvina* and *heterostropha*; PLANORBINÆ *campanulatus*, *trivolvus*, *parvus*, *bicarinatus*; SEGMENTINA *armigera*; VALOATA *tricarinata*, *sincera* and *coctectoides*; MELANTHO *subsolidus*, *coarctata*, and the smaller species *Byth obtusa*; SOMATOGYRUS *depressus*; AMNICOLA *cincinnatiensis*; TRY. *subulare*; GON. *livescens*; SPHERIA *simile*, *partumeium*, *transversum*; PISIDIA *abditum* and *compressum*; UNIONIDÆ *cornutus*, *gracilis*, *gibbosus*, *luteolus*, *occidens*, *rectus*, *pustulosus*, *rubiginosus*, *elegans*, *undulatus*, *verrucosus*, *elliptis*, *tuberculatus*; MARGARITANA *complanata*; ANODONTA *footiana*, *imbecillis* and *plana*.

FLORAL.

In 1872, an exhaustive catalogue of the flora of Chicago, and the country within radii of about forty miles, was compiled by H. H. Babcock, and published in The Lens, a journal issued by the State Microscopical Society of Illinois. This classification was thorough and complete, and is—like the entomology—too large for insertion in this work. Dr. Lester Curtis, president of the Microscopical Society, courteously furnished this catalogue, and naturalists can obtain information of him relative thereto. In connection with this subject, it is germane to allude to the peat-beds that have been found in several localities; showing not alone the cryptogamic sphagni, but also demonstrating that the climate of Chicago in by-gone years was humid and cloudy; as sunlight and dry atmosphere are fatal to sphagnum, of which peat is the consequence. Microscopic investigation of this peat will reveal many of the floral antiquities of this region.

* A complete catalogue of the fishes of Illinois, will be found in Bulletin No. 2, Natural History of Illinois, by Professor David S. Jordan; issued under the auspices of Professor S. A. Forbes, Director Illinois State Laboratory of Natural History.

SANITARY HISTORY.

TOWN AND CITY REGULATIONS.—When, in the summer of 1832, General Scott brought his troops from the East to engage in the Black Hawk War, he introduced the first epidemic to the people of Chicago; and a full account of this cholera season will be found in the matter devoted to the Indian scare. It was not until the next year that the town authorities, in pursuance of their delegated powers, made the first sanitary regulation. On November 7, 1833, the Board of Trustees passed an order imposing a penalty of \$3 upon anybody who should throw refuse into the river. June 6, 1834, on account of the cholera scare, the Town Supervisor or Street Commissioner was ordered to remove many nuisances which then endangered the public health. In August ordinances were passed against throwing anything of an obstructive nature into the sewers. A vigilance committee was also appointed to see that the needed work was done. It consisted of Dr. W. B. Egan, Dr. J. C. Goodhue, A. Steele, Mark Beaubien, J. K. Palmer, South District; G. Kercheval, J. Miller, N. R. Norton, John Davis and Hiram Hugunin, North District; J. Kinzie, C. Taylor and J. Bates, West District. Drs. Clark and Kimberly were authorized, if necessary, to establish a cholera hospital outside the city limits.

In February, 1835, the corporate powers and limits of the town were changed, and among other privileges the Trustees were authorized to form a permanent Board of Health. A revival of the cholera excitement in the summer caused the formation of the board on June 19. It consisted of James Curtiss, B. S. Morris, E. Peck, B. King, A. N. Fullerton, John T. Temple, J. Jackson and H. Hugunin. They held their first meeting June 23. But the board seems to have died with its birth, and only one of its acts is distinctly stamped upon the history of these early days. To carry out their sanitary measures the board proposed to borrow \$2,000, which caused such a panic in the ranks of the strict economists that the board subsided into hopeless inaction.

In January, 1837, before the incorporation of the city, the establishment of a permanent hospital was urged, but it was not until the public had again suffered with cholera and other epidemics that the project was favorably looked upon. Under the act of incorporation of March, 1837 (Section 57), the Common Council were to appoint three commissioners annually to constitute a Board of Health. The Mayor of the city or the presiding officer of the Council was to be president of the board, and the City Clerk its clerk. The charter also provided for the appointment, annually, of a health officer, whose duty it should be to visit persons sick of infectious diseases, and to board vessels suspected of harboring any pestilential or infectious disease. Accordingly, on May 9, 1837, Dr. J. W. Eldredge, A. N. Fullerton and D. Cox were elected members of the board, and Dr. D. Brainard appointed health officer.

From this time on the sanitary affairs of the city were in the hands of its Board of Health, the executive officers of which were either known as the city physician, the health officer, or the marshal. In 1838, when

Dr. E. S. Kimberly was health officer, Chicago had first to battle with an epidemic in its municipal capacity, the "canal cholera" breaking out among the laborers of the Illinois & Michigan Canal. Dr. Charles V. Dyer was elected health officer at the beginning of the year 1839, but resigned his position in September, and was succeeded by Dr. Kimberly, who served until 1841. During this year Dr. John W. Eldredge was elected health officer, and in May an ordinance was passed requiring the attending physician to give a certificate upon the death of any person, thus establishing a basis for the gathering of vital statistics. The first regular mortuary record, however, was not published until 1851. In 1842, Dr. Egan was chosen city physician and Orson Smith health officer and city marshal. Mr. Smith served in that capacity until 1845. During this year Dr. Phillip Maxwell was chosen city physician and Phillip Dean city marshal and health officer. In 1846 Ambrose Burnham succeeded Mr. Dean, while in 1847 a separate choice was made for each office, viz.: J. F. Wait, health officer; Ambrose Burnham, City Marshal, and Dr. Henry S. Huber, physician. Dr. Levi D. Boone became city physician in 1849, and City Marshal Burnham also acted as health officer. A continuation of the roster is as follows: City physicians, Dr. Boone, 1850-51; Dr. A. B. Palmer, 1852; Dr. Brock McVickar, 1853-54; Dr. Isaac Lynn, 1855; Dr. McVickar, 1856; Dr. Gerhard Paoli, 1857. The health officers were Orson Smith, C. P. Bradley, W. B. H. Gray, W. W. Taylor, George P. Hansen, and Ambrose Burnham.

CHOLERA AND SMALL-POX EPIDEMICS.—After the cholera epidemic of 1832, the next season which came upon the city was in 1838, when the laborers on the Illinois & Michigan Canal were attacked by a disease which balked all medical skill. It was called "canal cholera," and as fast as its victims succumbed their bodies were sent to Chicago and thrown on the roads near Bridgeport, as citizens were afraid to touch them. It was in 1843 that the city or small-pox hospital was constructed, located just above North Avenue, near the lake shore, on the grounds purchased for a cemetery. In March, 1845, the building burned to the ground. The fire originated from some ashes which were carelessly left too near the building. Its burning was particularly unfortunate at this time, as there were several small-pox cases, and patients were then being treated in the pest house. Mayor Garrett had even issued a proclamation for general vaccination. While another hospital was being erected on the same site, the patients were accommodated at the house of a Mr. Shaw, in the northeastern part of the city. The County Hospital was opened in old Tippecanoe Hall, on March 30, 1847. During 1846-47 the population of the city increased rapidly and a great amount of sickness prevailed. Most of the patients without means, were accommodated at the Alms House. The accommodations becoming quite insufficient, it was found necessary to have a large number of sick persons boarded and cared for at private houses in the city. This was necessarily attended with great expense, and, to avoid it, the public authorities suggested the renting of a building on the north side of

the river. Upon second thought, however, the Common Council saw fit to apply for the temporary use of the garrison buildings.

In 1848, small-pox was epidemic in the regions adjacent to the city, and R. C. Ross, the City Marshal, advertised under date of January 28, that the following physicians would gratuitously vaccinate the poor: Henry S. Huber, L. D. Boone, D. Brainard, C. H. Duck, (J. Jay) Stuart, and (H. K. W.) Boardman, J. N. Banks, F. C. Hagerman, Aaron Pitney, Erial McArthur, George Wallingford Wentworth, J. Bassett, and John D. Bowlby; and the following physicians also advertise, under the same date, that they will gratuitously demonstrate the principles of Jenner upon those who are too poor to pay for their inoculation: Doctors C. H. Duck, Max Meyers, H. K. W. Boardman, M. L. Knapp, ——— Cross, W. B. Mead, and W. R. J. Reynolds. This appears to be the first official and medical co-operation, for precautionary measures, to prevent the introduction or spread of small-pox.

In 1849 the variola was prevalent in the city; and in February, a public meeting was held whereat resolutions were passed setting forth the necessity of cleansing the city, which resolutions were presented to the Common Council by Dr. B. McVickar, chairman of the committee, and referred to the Board of Health by the Council; and on April 2 the following gentlemen were appointed assistant health officers, to act as co-adjutors to the Board of Health; being in the ratio of one officer to each block in the city: Charles Walker, George W. Meeker, Nathaniel Sherman, Jr., Jeremiah Price, Mark Kimball, A. S. Sherman, Charles McDonnell, Jacob Bendler, J. Ambrose Wight, C. R. Starkweather, John Frink, Isaac Speer, Ezra Collins, T. B. Carter, John High, Samuel Bennett, J. O. Taylor, Caleb Shaw, Jared Gage, T. Whitlock, S. J. Sherwood, J. T. Edwards, A. H. Burley, Zebina Eastman, C. N. Holden, William Wheeler, A. F. Bradley, and A. Rossiter, and, in the latter part of April these additional gentlemen were appointed, so as to complete the ratio as designated: Thomas Church, Samuel B. Cobb, S. Sawyer, John Jennings, John B. Turner, John S. Wright, John S. Gray, G. M. Higginson, Elihu Granger, T. Weiler, Hugh Dunlap, A. Moon, Andrew Smith, A. Peck, Luther Marsh, Solomon Wait, and Samuel Hoard. If these gentlemen were only as efficient and distinguished in the enforcement of sanitary regulations as they have been as citizens of Chicago, there probably was never such a hygienic posse in any city in the Union.

Cholera did not make its appearance seriously until the winter of 1849. Anticipating its dread coming, the municipal authorities inaugurated a cleaning crusade. Small-pox was already quite prevalent, and there was such a marked increase of cholera in the country that a public meeting was held, February 12, demanding that more stringent measures be taken. Among other things, the Board of Health asked that additional sewers be built. On April 29, the malignant form of cholera was brought by the emigrant boat, "John Drew." Captain John Pendleton contracted the disease from the emigrants, who had arrived from New Orleans, via the Mississippi and Illinois rivers, and Illinois & Michigan Canal. He died a few hours after the arrival of the boat. Others who came also died soon after their arrival. At this time there were no quarantine regulations, and the disease was further introduced and spread by the arrival of emigrants from Europe. In May the Council authorized the Board of Health to construct a temporary hospital for the treatment of indigent persons attacked

by the cholera. It was located near the present site of the old County Hospital, near Eighteenth Street and the Chicago River. In September it was ordered closed by the Common Council, and was re-opened after a few days, cholera having appeared again among some newly arrived emigrants. It was closed in October, and finally burned in May, 1852.

From the time of its introduction, in 1849, cholera gradually spread, and prevailed as an epidemic from July 25 until August 28, during which time one thousand persons were attacked, of whom three hundred and fourteen died. More than any other locality in the city, the disease prevailed on a sandy elevation in the North Division, chiefly inhabited by Norwegians, and many of them recent arrivals. Forty-four out of the three hundred who lived in this region fell victims to the malady. Among the citizens of prominence who were carried off by the scourge this year were Hon. Henry Brown, Rev. W. H. Rice, Henry B. Clark, Dr. J. E. O'Leary, L. M. Boyce, James Knox, M. Kohn, W. N. Bentley, Samuel Jackson, Newell Stratton, A. J. Penny, E. Hitchcock, A. Calhoun, A. S. Robinson and George Ayers.

Descriptive of these terrible times is the following, written by an old settler who was a participator in the horrors of which he wrote and had a narrow escape from death himself:

"During the winter of 1848-49 cholera appeared at New Orleans, and began slowly to ascend the Mississippi, and before the frost had left the ground it appeared inevitable that the contagion would reach Chicago, which was, indeed, the case all too soon. The first case that came under my notice was that of Deacon Jackson, of the Tabernacle Baptist Church, who was a personal friend. One Sunday morning in May, or perhaps in June, on my way to church, I was crossing the river by ferry at Rush Street (all the bridges had been carried away that spring by a flood), when I overheard a fellow-passenger telling another one that Captain Jackson had died of cholera. I inquired what Captain Jackson was referred to, when I learned it was my friend, the Deacon. As the ferry landing was within a few rods of the Jackson dwelling, being one of the houses within the fort, I hastened thither. I found William Jones alone with the corpse, the family being in an upper room, from whence I could hear their united wailings. The face was a shade darker than usual, and around the mouth were the dark purple spots, which I soon learned to be the unmistakable deathmark of that dreaded and terrible disease—the Asiatic cholera. Mr. Jackson had been attacked the previous afternoon, while engaged in his usual employment of driving piles and building docks along the river; he hastened home and died within a few hours.

"The disease gradually, or, I may say rapidly spread, until on the 1st day of August the number of deaths reached thirty, which was the highest number for any one day. I think the death of Mr. Bentley, the father of Cyrus Bentley, soon followed that of Deacon Jackson. L. M. Boyce, a prominent druggist, died in his house alone, his family having just left for the country. Deacon Knox, also of the Tabernacle Baptist Church, died very suddenly. The Rev. W. H. Rice, pastor of the same Church, was attacked while returning from the bedside of Mr. Knox. It was Sunday morning, and he was intending to preach, and was hastening for that purpose. I happened to be at the door of his boarding-place when he arrived, and assisted him into the house. The house was that of Mr. Pillsbury, on Dearborn Street, a few doors south of where the Tribune building

now stands. Dr. D. S. Smith was called and attended him. Mr. Rice steadily failed until about 2 o'clock, when we gave him up. He then gave directions about his affairs and made his will. Among other remedies, by Smith's direction, we tried electricity, first insulating the patient by standing the bedstead on glass. Whether from this or other treatment, Mr. Rice lingered along and I staid with him till midnight, when I retired to another room to sleep, fully expecting to find him dead in the morning. But to my surprise I found him still living, and apparently improving. He continued thus through the day, when he again began to fail, and soon died. When Mr. Rice was attacked Sunday morning, the weather was very warm, and so continued till Monday afternoon, when there came one of our Lake Michigan chilling breezes. It was to this that I attributed Mr. Rice's relapse, for I had noticed that deaths were more numerous after these sudden changes from hot to cool.

"There was at this time an Englishman named Morrell, a blacksmith, who was just from England and but recently married, who was working for me. One Saturday night he came to me and said he wanted all the money that was due him, and that he would not be at work till the following Tuesday, as he had bought a lot from Mr. Elston, and he wanted on Monday to get lumber on the ground, and set carpenters at work on a little house which he had determined to build. Late Saturday night I saw him on his way home, appearing unusually cheerful. On Sunday morning following I went over into town on the South Side, and did not return till after the evening Church service, when I was met with the information, that Morrell was dead and buried. I was thunderstruck. Mrs. Morrell came to me in the morning to say that Mr. Elston had returned the money which had been paid on the lot, and that she was going back to her old home in England; and before night of that Monday she was on her sad and lonely journey thither.

"Another Englishman named Conn, a boiler-maker, was also at work, and with him was a boy of fourteen, who was at work also, as Conn was very desirous of keeping the boy with him. The boy was attacked with cholera. We ministered to him, and chafed his limbs to promote circulation for two or three hours. We rubbed till the skin was broken. When we found that all our efforts were in vain, Conn quietly arose from working over him, and began silently to pace the floor, occasionally stopping to look down on the dying boy. Soon, however, he began to curse and swear, and to half-soliloquize and half-relate, as he continued his walk. Such oaths and imprecations I have seldom heard. 'Here,' said he, 'I have brought the boy from his home, and I promised his mother that I would return him safely to her. And now, in this far-away country, the boy is dying. What am I going to say to his mother?' Rough as Conn was in speech and manner, he was kindly, and faithful, and true; that is as he understood his obligations.

"That summer I boarded with my partner in business, Mr. T. C. James. One day when I went in to dinner, Mrs. James asked me to go into another room and look at one of her daughters, a girl of fourteen, who had just begun to complain and had lain down. I saw at a glance that it was cholera. She died in about seven hours. Another daughter was taken while returning from the funeral the following day, and died before morning.

"Late in the season I resolved to go into the country to visit friends and recuperate. Travel then to Wis-

consin, where I was going, was by large steamers by the lake. On landing at Kenosha, I met a great-uncle, who invited me to his house. A few minutes after our arrival there, word came that a great-aunt, living but a few rods away, had been suddenly taken sick. We went there and found it to be cholera. She died during the night. I went over in the morning again, and found the undertaker there, but not another man about to help him place the corpse in the coffin. I took hold with him, and, as she was a heavy woman, it was with a great deal of difficulty that we accomplished the task. I then went immediately into the country, a few miles away, to my father's, and before night we heard that the uncle, with whom I had stayed the night before, was also dead. Such were cholera scenes throughout the country. On my return to Chicago the first acquaintance I met was Deacon Elisha Clark, of the First Presbyterian Church. He looked cheerful and animated, and the first word he said was: 'The cholera has left us.' This shows how depressing was its presence, and what relief was its departure."

A few physicians and (as a rule in such calamities) some Catholic priests and Sisters of Charity remained to care for those who otherwise would have been thrown upon the streets or be placed under the guardianship of the municipal authorities. During the month the deaths numbered nine hundred and thirty-one. Of the seven hundred and thirty-one fatal cases reported for August, two hundred and sixty-four were on account of cholera. Early in November, through the persistent warfare of the municipal authorities and physicians and Christian men and women, the epidemic was driven from the city. The disease was almost confined to the emigrant classes. For many years thereafter the city enjoyed comparative immunity from this epidemic.

The cholera scourge forced a strong conviction into the public mind that a permanent city hospital ought to be established. Dr. Brock McVickar, who had been re-elected City Physician for 1854, was ordered to report to the Board of Health what measures should be taken. During the height of the excitement, in July, a quarantine station was established, and in November the City Physician again urged the erection of a permanent hospital and also the establishment of a dispensary for each division of the city. The board offered \$100 for the best plan for a city hospital, and in April, 1855, awarded the premium to Carter & Bauer, who estimated the cost at \$30,000. In February of the next year a tax was levied to raise the necessary funds for its construction, and the architects visited New York to examine the city hospital there and perfect their plans. They returned in April, the Common Council adopted the plans, as improved, and the erection of the building was commenced, south of LaSalle Street, between Cross and Old. The hospital was completed in June, 1857, and two medical boards were established (the allopathic and homeopathic) to treat patients. The structure was of brick, sixty-six by one hundred and fifteen feet, three stories in height, and cost, ready for occupancy, \$45,000.

In December, 1850, there were a few cases of small-pox, the disease increasing in the spring of 1851, subsiding during the summer, and developing with increased virulence in December. But two deaths are, however, officially reported as resulting from small-pox in 1851.

On February 15, 1851, chiefly because of the ravages of cholera, the Legislature passed an act incorporating the Chicago City Hydraulic Company, that citizens might obtain a better water supply. Cholera continued to increase throughout the winter and spring of 1852, and in May the pest-house was opened to receive cases

of all contagious diseases. During the year there were six hundred and thirty deaths from cholera alone. The general health of the city was good in 1853. The next year was the great cholera season.

In January, 1852, small-pox broke out again, and, in June, the Small-Pox Hospital was ordered changed in its internal arrangement so as to have small-pox and cholera cases at either end of the building. The deaths from small-pox are reported as nine.

In April, 1854, a few scattering cases of cholera appeared, but the public prints and the Board of Health denied their existence, under the mistaken idea that to deny the existence of an evil goes far toward killing it. But the temporary hospital was ordered to be built in May. A train which entered the city June 29, brought a party of Norwegians, bound for Wisconsin, among whom the disease was raging. Six were dead on the train, and a seventh died in a few minutes after being taken out. Some twenty persons were taken, in various stages of the disease, from the train to the City Hospital. These were the first recorded cases. Until about the 5th or 6th of July, the disease was generally confined to newly arrived emigrants. Quarantine grounds were immediately established on the main lines of emigrant travel. The ground near the City Hospital was taken for quarantine purposes. The suddenness with which the pestilence came upon the city is shown by the deaths during the first week of July. The total interments from July 1 to July 8, were two hundred and forty-two. During this latter month the mortality among those taken with the epidemic nearly doubled, the deaths occurring being about sixty per day. The death-cart was continually upon the streets. Especially during the 8th and 9th of July were the thoroughfares of the city crowded with hearses. On Sunday the populace became so excited that a grand exodus occurred, many persons going to Milwaukee. Dr. Charles V. Dyer tells the following anecdote with a good deal of zest, relative to some brother practitioners and himself, during the cholera season of 1854: "Deeming it requisite to establish a quarantine, to prevent the introduction of the disease, we organized an amateur Board of Health, and hired a warehouse to be used as a hospital. Hearing that a steamboat was coming into port, with eighteen cases of cholera on board, we went onto the vessel and removed the patients to the improvised hospital. On viewing the sick, nine were decided to be beyond medical assistance, and the remaining moiety were decreed to be favorable subjects for pathological skill; but, unfortunately, the nine upon whom were lavished all the resources of science died, and those who were esteemed to be almost *in articulo mortis* all got well."

MORTUARY REPORT.—The first mortuary report was published in June, 1851, from data furnished the City Clerk by the City Sexton. For several years thereafter the record was prepared from reports furnished the City Sexton by the undertakers. Following will be found a table showing the number of deaths by the principal causes, from 1851 to 1857 inclusive, and the total mortality by years:

Years.	Small-pox.	Fevers.	Con- sumption.	Dysen- tery.	Cholera.	Totals.
1851....	2	49	7	22	216	669
1852....	9	144	116	53	630	1,652
1853....	19	116	176	54	113	1,205
1854....	12	209	216	242	1,424	3,334
1855....	30	86	162	150	147	1,983
1856....	16	135	288	305	1,897
1857....	10	267	255	465	2,170
Totals.....	98	1,006	1,220	1,291	2,430	13,410

HOSPITALS.—The first city hospital established was, as stated, a small-pox hospital, built in 1843, immediately above the present North Avenue, near the lake shore, on ground purchased for a cemetery; this was burned early in 1845, and a second one erected in that year upon the same site.

The first *Insane Asylum* was on Kinzie Street, in 1847, and was controlled by Dr. Edward Mead, but these quarters proving too restricted, Dr. Mead purchased about twenty acres of land two miles north of the city, and, in 1847, a new asylum was ready for occupation. This was a private institution.

The *County Hospital* was first opened March 30, 1847, in the old Tippecanoe Hall, under the direction of the professors of Rush Medical College, and under the especial control and management of Dr. and Mrs. J. J. Van Dalsem. In the Weekly Democrat of December 28, 1847, it is stated that "everything is done for the amelioration of the condition of the patients, and every possible care taken of them during their occupancy of the hospital," but that "the building is entirely inadequate to the requirements of a hospital, there being no regular wards," and in the male department there were forty or fifty patients suffering from various diseases. The reporter also states that "from the crowded condition of the hospital the aroma was pungent and particularly unpleasant." The number of patients present at one time fluctuated from seventy to one hundred; the total number admitted, up to the date of the reportorial visitation, being three hundred and seventeen.

In May, 1849, a temporary hospital for the treatment of cholera patients was located on Eighteenth Street, near the river. The Democrat, of June 12, 1849, also states that "we are informed that there is a house, on Erie street in the Seventh Ward, between Wells Street and the river, on the North Side, which is intended for cholera patients. When our informant was there, the bodies of a man and his son were in a coffin, while on a wretched pallet within sight was the wife and mother. There was but one attendant—a man." Dr. L. D. Boone, hospital physician, however, under date of June 14, 1849, controverts the full force of this assertion, by specifying that "the building is sixteen feet wide, forty feet long and twelve feet high; that it is divided into three rooms;" that the patients were attended by Dr. Hagerman, county physician; that there were two attendants, one "as good a nurse as can be found in the United States." Dr. Boone also states that "this is the second attempt that has been made by the city authorities to provide a place for homeless and friendless persons who might be attacked with cholera in the city, and also the second time that inhuman persons have threatened to demolish it." Two facts are deducible from the allegation and the refutation: that newspapers sometimes made sweeping assertions years ago, and that early residents of the city were just as unreasoning and apprehensive during epidemics as they ever have been in later days. Another communication from P. F. W. Peck, in the same paper, states that the first hospital was on Jackson Street, between State and Clark. This assertion is not verifiable from any extant record of reliable information.

THE ILLINOIS GENERAL HOSPITAL OF THE LAKE was incorporated October 29, 1849, at the second session of the Legislature of that year, the trustees under the incorporation being Hon. Mark Skinner, Hon. Hugh T. Dickey and Dr. John Evans. The Journal of September 24, 1850, contains an announcement that "Dr. N. S. Davis will give a course of five lectures in the City Hall—the free use of which is granted by the City Council—the avails of which are to be expended

in the purchase of furniture;" and Dr. Davis says, under date of September 26, 1850, that "the trustees have engaged a building adequate for the accommodation of fifty patients," but that furniture is required to fit up the hospital for their reception. Dr. Davis inaugurated his course of lectures, but on the Campbell Minstrels coming to the city he canceled his dates, the lectures remaining undelivered; and the Minstrels, then under the management of George A. Kimberly, in recognition of the courtesy of Dr. Davis and the Trustees, gave a complimentary concert for the benefit of the hospital. The course of lectures was thereafter completed, and the hospital was opened in the old Lake House, with beds for twelve invalids, on November 23, 1850, where patients could receive treatment gratis, upon payment of from two to three dollars a week for board and nursing. On November 30, 1850, the Board of Trustees met, adopted a code of by-laws for the government of the hospital, and elected the following officials, viz.: Mark Skinner, president; Dr. John Evans, secretary; Captain R. K. Swift, treasurer; Dr. Daniel Brainard, surgeon; Dr. N. S. Davis, physician; Dr. John Evans, physician to the female wards.

The Sisters of Mercy furnished nurses for the care of the patients from the opening of the hospital; but on the incorporation of the Mercy Hospital, on June 21, 1852, they determined on opening a hospital under the auspices of their order, and in June, 1853, removed to Tippecanoe Hall, and there cared for the county patients. The Illinois general hospital was then discontinued.

THE UNITED STATES MARINE HOSPITAL.—In the *Weekly Democrat* of March 10, 1846, appears an account of a meeting held at the Bethel church in this city, on Tuesday, February 25, 1846, for the purpose of inducing the General Government to establish a Marine hospital in Chicago. Of this meeting Mr. Brainard was chairman and Thomas L. Forrest, secretary. Colonel William B. Snowhook, Redmond Prindiville and Thomas L. Forrest were appointed a committee to submit the report of the meeting to Captain J. McClellan, of the Topographical Corps. Messrs. John Reed, E. Kelly, Henry Courting, James McNeil and Captain Sauly were designated as a committee to draft and circulate a petition asking Congress to locate a marine hospital at this port, for the benefit of sick and disabled seamen; and a vote of thanks was passed to Messrs. William B. Snowhook and Augustus H. Knapp for the interest and zeal they manifested in collecting information contained in the adopted report. The petition was drafted, numerously signed, and presented to Congress; and under

the championship of Hon. John Wentworth, who worked assiduously for the measure, a law was passed locating a United States marine hospital at the port of Chicago. It was built in the years 1850 and 1851 on Michigan Avenue, near the site of old Fort Dearborn, under the superintendence of Lieutenant J. D. Webster, of the Topographical Corps, at a cost of \$50,000, exclusive of the land which belonged to the Government, and was under the charge of Jacob Russell, collector and agent, with Dr. William B. Herrick, physician and surgeon, and C. R. Vandercook, steward.

In 1849, the executive committee of the Hibernian Society met, and, on May 7, passed the following resolution: Resolved, that we thankfully accept the liberal offer made by the faculty of the University of St. Mary of the Lake, of five acres, on the lake shore, north of the city, and that as liberal donations have been promised us, we proceed at once to erect a permanent hospital building. The site was just north of the German settlement. Despite the liberality of the donative and the sanguine temperament of the society, the hospital does not appear to have been erected.

In May, 1854, a temporary cholera hospital was built by the city, on the beach of the lake, in the North Division, and is stated to have been an enlargement of the small-pox building erected in 1845.

In June, 1857, the first permanent City Hospital was completed.

St. James' Hospital was organized in 1853, and incorporated in 1854, with the following officers and directors: Rev. R. H. Clarkson, president; George W. Dole, treasurer; Dr. A. B. Palmer, physician; C. R. Larrabee, secretary. The board of directors were John West, Edwin H. Sheldon, John C. Dodge, William F. Dominick, Walter L. Newberry, S. H. Kerfoot, T. F. Phillips. In the spring of 1854, the hospital was established at No. 79 Illinois Street, and was mainly supported by contributions taken up on the first Sunday in every month in St. James' church, the deficiency unfilled by contributions being supplied by members of the congregation. During the first year of its maintenance it admitted sixty-nine patients and the expenditure was \$1,498.48. The number of beds was something less than twenty, and they were kept occupied by incurable cases; the hospital being maintained more for such cases than for those afflicted with casual and temporary ailments. In 1855, the hospital was removed to No. 111 Ohio Street, and there retained until the establishment of St. Luke's Hospital, in 1858, when the patients were transferred to the latter, and St. James' Hospital was discontinued.

POLITICAL HISTORY.

The vast political influence the State of Illinois has wielded in deciding the destiny of the nation is due in great measure to the geographical location of Chicago within its borders. The result of the elections of 1860 would not have been a Republican victory had the northern boundary line of the State been an extension of the northern boundary line of Indiana, as was at first intended. This would have thrown Chicago and the fourteen northern counties of Illinois into the State of Wisconsin. These were all strong Republican counties, and it was their vote that carried the State for Mr. Lincoln. Without them he could not have carried it, and indeed had they been in Wisconsin it is possible that Mr. Lincoln would never have been a candidate for President at all. Hence it appears that the action of a far-sighted statesman, at the time of the admission of the State of Illinois into the Union, was of vast importance in shaping the ultimate history of the Union, and that action was taken chiefly because of the location of Chicago. The history, therefore, of the admission of the State of Illinois is the beginning of the political history of Chicago, though Chicago as yet was not, and its site was only occupied by a frontier post and a few trading houses.

It was a fortunate thing for Illinois and for the whole country that at the time Illinois applied for admission to the Union, the Territory was represented in Congress by Nathaniel Pope. He was a native of Kentucky, where he was born in 1784. He received a liberal education, and adopted the law as a profession. When the Territory of Illinois was set off from Indiana in 1809, Governor Edwards appointed him Secretary of the Territory and instructed him to proceed to Kaskaskia and inaugurate the new government, which he did prior to the arrival of the Governor. He held the position of Secretary until 1816, when he was elected Delegate to Congress. He served in that capacity until after the admission of the State, when he was appointed Judge of the United States District Court for the District of Illinois, which position he filled with eminent ability until his death at Springfield, June 14, 1850.

In January, 1818, the Territorial Legislature, then in session at Kaskaskia, sent a petition to Congress asking the admission of Illinois into the Union. This petition described the northern boundary line of the State as drawn at the southerly bend of Lake Michigan, being an extension of the northern boundary line of Indiana. The whole northern portion of the Territory was at that time still in the possession of the Indians and was uninhabited, save by the Indians themselves, and by a few frontiersmen and traders. But little importance was ascribed to it, and, besides, it was supposed that the ordinance of 1787 provided that the northern line should be drawn there.

By the fifth article of that celebrated ordinance it was provided that the Northwest Territory should be divided into not less than three, nor more than five States, and it defined the boundaries of three of the States. The western State was to be bounded by the Mississippi, the Ohio and the Wabash rivers; a direct line drawn from the Wabash and Port Vincennes due

north to the territorial line between the United States and Canada, and by the said territorial line to the Lake of the Woods and the Mississippi. It was provided, however, that if Congress should find it expedient they should have authority to form one or two states in that part of said territory which lies north of an east and west line drawn through the southerly bend, or extreme of Lake Michigan.

It was upon this provision that Wisconsin subsequently based her claim to the fourteen northern counties of Illinois.

When the bill came from the committee to be acted on by Congress, Mr. Pope, with a wise and statesman-like forecast, moved to amend the bill by establishing the northern boundary line at the parallel of forty-two degrees and thirty minutes north latitude.

The object of this amendment, Mr. Pope said, was to gain for the proposed State a coast on Lake Michigan. This would afford additional security to the perpetuity of the Union, inasmuch as the State would thereby be connected with the States of Indiana, Ohio, Pennsylvania and New York through the lakes. The facility, too, of opening a canal between Lake Michigan and the Illinois River made it desirable that the port of Chicago should be in the proposed State, so that the canal, when built, should be entirely in one State jurisdiction.

These considerations prevailed, and the bill was amended so as to establish the northern boundary line of the State, as it has since existed.

The bill became a law April 13, 1818, and in pursuance thereof a convention was called at Kaskaskia to form a constitution. The State was formally admitted by Congress December 3, 1818.

Thus it was that Chicago influenced the formation of the great and imperial State of Illinois, binding the North and East by the chain of the great lakes, and the Mississippi River to the South and West, becoming the key-stone in the western arch of States.

But many years were yet to pass before Chicago's influence was to be felt by means of elections.

When Illinois was set off from Indiana in 1809, it was divided into two counties. These were Randolph and St. Clair. The latter comprised the northern portion of the territory. As the population of the State increased new counties were organized, and Chicago has been successively in the counties of St. Clair, Madison, Crawford Clark, Pike, Fulton, Peoria and Cook.

The records of these counties do not recognize Chicago as a place, or a voting precinct, until it was embraced in Fulton County in 1823. The records of that county show that September 2, 1823, an election was ordered to be held at the house of John Kinzie for the purpose of choosing a Major and company officers of the Seventeenth Regiment of Illinois Militia, the election to take place on the last Saturday of September.

If this election was held, it was the first that ever took place at Chicago. No records nor returns of this election are extant, consequently it remains a matter of doubt whether the election called was held or not.

The first official account of an election actually held at Chicago appears in the records of Peoria County. It

was held August 7, 1826, being a gubernatorial and congressional election. The poll-list from the Chicago precinct shows the names of thirty-five persons who voted, as follows:

1. Augustin Banny,
2. Henry Kelley,
3. Daniel Bourrassea,
4. Cole Weeks,
5. Antoine Ouilmette,
6. John Baptiste Secor,
7. Joseph Catie,
8. Benjamin Russell,
9. Basile Desplattes,
10. Francis Laframboise, Sr.,
11. Francis Laframboise, Jr.,
12. Joseph Laframboise,
13. Alexander Larant,
14. Francis Laducier,
15. Peter Chavelle,
16. Claude Laframboise,
17. Jeremiah Clairmore,
18. Peter Junio,
19. John Baptiste Lafortune,
20. John Baptiste Malast,
21. Joseph Pothier,
22. Alexander Robinson,
23. John K. Clark,
24. David McKee,
25. Joseph Anderson,
26. Joseph Pepot,
27. John Baptiste Beaubien,
28. John Kinzie,
29. Archibald Clybourne,
30. Billy Caldwell,
31. Martin Vansicle,
32. Paul Jamboe,
33. Jonas Clybourne,
34. Edward Ament,
35. Samuel Johnson.

The judges were John Kinzie, J. B. Beaubien and Billy Caldwell; clerks, Archibald Clybourne and John K. Clark.

The whole thirty-five cast a solid vote for the following ticket: Ninian Edwards, for Governor; Samuel H. Thompson, for Lieutenant-Governor; and Daniel P. Cook,* for Congressman. On the State vote Edwards was elected by a small majority, but the other two were defeated.

The names of these voters indicate that the large majority of them were French half-breeds, French traders, and others connected with the fort or in the Government employ. They were for the most part employes about the fort, and the trading-houses, and voted precisely as their employers or the officers of the fort dictated. The election was held at the agency-house, on the North Side, the residence of Dr. Alexander Wolcott. As John Quincy Adams was President, it followed that the voters of the Chicago precinct at that time were all Whigs.

DANIEL P. COOK.—The life and services of Daniel P. Cook covered but a brief period of time, but were of enduring value to the great State of Illinois. A Kentuckian by birth, he possessed all the social, genial qualities by which the noted men of that State are marked, and during the twelve years of his residence in his adopted home he developed, to a life-destroying degree, that quality of untiring industry which is a prominent trait of the people of the East. His services during four terms in Congress, not only gained him the admiration and the love of his constituents at home, but the respect of such statesmen of the day as Henry Clay, John C. Calhoun, John Quincy Adams and James Monroe. For the last five years of his short life Mr. Cook labored unceasingly—

* For whom Cook County was named.

and, as regarded his delicate constitution—relentlessly, for that measure of public utility, which accomplished more than all else to build up northern Illinois into one of the most prosperous regions of the earth. The first grant of lands to the Illinois & Michigan Canal in 1827, was the commencement of the up-building of a great commonwealth, and especially of that region whose life and wealth has concentrated, with such grand results, in the county of Cook. It was but a just tribute of remembrance to an earnest, an honest and a useful life, to stamp this region of future power with the name of one who, though cut down in youth, was so much its father and benefactor.

Daniel P. Cook was born of respectable and humble parents, in the county of Scott, Kentucky, in the year 1794. With merely a

D. P. Cook

common school education, and a brief experience in mercantile pursuits, he entered the law office of Hon. John Pope. In 1815, Mr. Cook removed to Kaskaskia, the Territorial seat of Government, to engage in the practice of law, and to strive for the success which was so soon to come to him. "The Illinois Intelligencer," the first paper published in the Territory, had been established six years. That journal had all the Government printing, which was, of itself, quite a profitable monopoly. On account of the sparsely settled state of the county, the practice of law was then at a low ebb, and, in order to add to his scanty income Mr. Cook, soon after settling in Kaskaskia, purchased the "Intelligencer" and formed a partnership with Robert Blackwell. The original proprietor of this paper, and from whom it was purchased by Messrs. Cook & Blackwell, was Matthew Duncan, the brother of Joseph. Joseph Duncan was afterwards a successful competitor for Mr. Cook's seat in Congress and Governor of the State. The paper became at once a political power, Judge Breese acting as one of its editors. Mr. Cook's energy, ability and endearing qualities of disposition, coupled with the influence possessed by Judge Nathaniel Pope, then Secretary of the Territory, soon made themselves felt, and the bright young Kentuckian was elected Clerk of the House of Representatives, at the second session of the Second Territorial Legislature, serving in this capacity until January, 1818, when the last session of the Territorial Legislature adjourned. A portion of this period, also, from January, 1816, to April, 1817, he acted as Auditor of Public Accounts. The next

day after the adjournment of the last Territorial Legislature Mr. Cook became "Judge" Cook, his district in the "Western Circuit" embracing the counties of Bond, Madison, St. Clair, Randolph and Monroe, or a territory comprising about one-third of the present State. He remained in office but a few months, no doubt wishing to give his whole energies to the movement then progressing for the formation of a State Government. In July, 1818, the constitutional convention assembled at Kaskaskia and adjourned in August. The Constitution was approved by Congress in December of that year. Illinois, therefore, did not formally and legally become a State until December 3, 1818. But by virtue of the Constitution adopted by the convention in August, an election for State officers and a Congressional Representative was called for the third Thursday of September. The question of slavery was even then dividing the councils of the young State, and the politicians of the day had separated into two sharply-defined parties, led respectively by Ninian Edwards, last Governor of the Territory, and Shadrach Bond, first Governor of the State. A strong disposition had been evinced by Governor Bond and his party to insert into the new Constitution some provision recognizing slavery as a necessary, because an "established" institution. Although better counsels prevailed and the slavery issue was not recognized as an element in the campaign, Mr. Cook was put forward as a Congressional candidate for the short term expiring March 3, 1819, and as a representative of the Edwards faction; while John McLean, of Shawneetown, also a Kentuckian by birth, and a brilliant and irreproachable member of the Bar from southeastern Illinois was his opponent, and the representative of the Bond party. This campaign, therefore, resolved itself into a personal contest for popularity, waged by two talented and energetic young men, supported by parties of nearly equal strength. As would be expected, the result was close; Mr. McLean was returned by only fourteen majority.

Mr. Bond was inaugurated as Governor October 6, 1818, and upon the organization of the State government in December, Mr. Cook was elected Attorney-General by the Legislature, and held the office until the conclusion of his more successful contest with Mr. McLean in the summer of 1819. The proposed Missouri Compromise had now entered Congress, had become a national issue, and divided the country. During his term of service Mr. McLean had taken his stand with the pro-slavery party and against the restriction of slavery to the future state of Missouri. The second campaign between himself and Mr. Cook was therefore fought on this all-absorbing issue, and was short, sharp and decisive. Mr. Cook was elected by a good majority. He was re-elected to the Seventeenth Congress, his competitor being Hon. E. K. Kane, first Secretary of State, and who was a stubborn representative of the pro-slavery element. It was understood, at the time, that Mr. Cook favored the admission of Missouri as a slave State, merely as a matter of policy. To the surprise and indignation of many of his supporters, at the next session of Congress he voted against the measure. While the bill was before the House of Representatives he frankly admitted that he had changed his mind, and gave as his only reason that the proposed Constitution of the new State was not in conformity with the principles of the Constitution, in that it proposed to bar out free negroes and mulattoes from settling in Missouri, notwithstanding they had the power, and had availed themselves of it, to purchase and hold property. Missouri proposed to pass *ex-post facto* laws—laws impairing the obligation of property contracts which these people had made. Mr. Cook repeated that his "feelings" were in favor of the admission of Missouri—that "both personal and political reasons rendered it a desirable event."

On May 6, 1821, Mr. Cook married Miss Julia C., the eldest daughter of Governor Ninian Edwards, an accomplished, beautiful and loveable woman. One child, John Cook, was born to them, June 12, 1825, in the town of Belleville, St. Clair County. He was afterwards a prominent citizen of Springfield, Sheriff of the county, member of the Legislature, and mayor of the city.

Although Mr. Cook had already made his mark in Congress, among other measures having introduced a bill giving actual settlers on public land the rights of pre-emption, it was reserved for him, during the session of the Eighteenth Congress to commence a work which he lived to see completed, and which was the crowning success of a successful public career. Relying upon the opposition which had been aroused because of Mr. Cook's course on the Missouri question, Mr. McLean led the opposition against his political rival at the general election of 1822. He was defeated by nearly one thousand votes. It was at this session of Congress that, with the earnestness and faithfulness which marked all his efforts, Mr. Cook urged upon that body the justice of granting such aid to the State of Illinois as would insure the construction of the Illinois & Michigan Canal.

Says William H. Brown, in his memoir: "In 1822 this subject was brought directly before Congress. Mr. Cook labored to

secure such aid from the General Government as would enable the state to prosecute this important work. He asked for bread and received a stone. The utmost extension of congressional liberality was a grant of a strip of land, ninety feet wide, through the public domain, from the Illinois River to the lake; and lest, by any means, the Congress of the United States, after such a munificent grant, should be further committed, a saving proviso was added, that the United States should in no wise become liable for any expense incurred by the State 'in surveying or opening said canal.' In the intervening years, from 1822 to 1827, Mr. Cook urged this measure in Congress as a national work, in which other States were as directly interested as his own, and affording to the Government in time of war, great facilities in the movement of troops and transportation of stores. The result of his labors was the passage of the act of March, 1827 (the last session of his congressional career), granting, in fee simple, to the State, and without any reservation, the alternate five sections upon each side of the canal, amounting to more than three hundred thousand acres of land, and embracing the site of the city of Chicago. This act was worthy of a Congress representing a great Nation, and is wonderfully in contrast with that of 1822. But its greater and more enduring value was the precedent for future grants, embracing that for railroad purposes, the effect of which we now feel in the enhancement of the value of property, the increase of business and the general prosperity of the State."

In 1823-24 the State was greatly agitated over the attempt made by the pro-slavery members of the Legislature to have a convention called for the adoption of a new Constitution, legalizing the "institution" within the limits of the commonwealth. Although the proposition was carried by the Legislature, when submitted to the people in 1824 the measure was rejected by 1834 majority, out of a vote of 11,764. The vote of Fulton County, which then comprised Cook, was 5 for and 60 against the resolution for the calling of the convention. Daniel P. Cook, with such men as Governor Coles, Judge Pope, Governor Edwards, William H. Brown, and Samuel D. Lockwood, was found in the front ranks, faithfully fighting the abomination.

Mr. Cook's competitor for Congress in 1824 was ex-Governor Bond, and as it was a close "presidential year" when the election of the National Executive might be thrown into the House of Representatives and even be decided by Illinois, the contest was exciting. Governor Bond was, however, defeated by over three thousand majority. The President was chosen in the House of Representatives, and Mr. Cook cast the vote of the State of Illinois for John Quincy Adams. It is not necessary to vindicate the young congressman from the charge of "broken faith with his constituents," which was brought against him by his political opponents and the warm friends of Mr. Adams' presidential rivals. For an explanation of the pledge he made, and how he kept it, the reader is referred to the best known authority on this subject.* Mr. Cook was a candidate for re-election in 1826, but was defeated by General Joseph Duncan, a resident of Jackson County, and, although still young, a Lieutenant of the War of 1812 and a State legislator of some experience. He went into the canvass with ardor, and his opponent's friends were so confident of their accustomed success that they did not put forth counter efforts. Others were anxious that Mr. Cook should become a candidate for the Senate. He was defeated by a majority of 641. But his term of service both as a congressman and as a man, was gradually approaching its close. The arduous duties which fell upon his shoulders during the session of 1826-27 were too much for his enfeebled constitution, and during the last days of his life at Washington he was confined to his bed. In the spring of 1827, by the advice of his physician, he departed for Cuba, in a vain search for lost health and strength. Early in the month of June, however, he returned to the home of Governor Edwards at Belleville. He gradually went into a consumptive's decline, and, while on a visit to his father, in his native place in Kentucky, he died, October 16, 1827. Thus there passed away from earth, one of those rare, small, frail men of body, who seem inspired from the first with the thought that they must exert their influences and do their work with all their might before that time comes upon them so quickly in which no man can labor. Such men are given to the world as one of its powers of progress, and must be accounted by the Higher Power, as necessary to its onward march, as those men of both physical and intellectual might who, through the ceaseless perseverance of a long life, are accorded the privilege of working out to their conclusion some of their dearest plans for the public good.

The next election of which there is a reliable account was purely local, it being for the election of Justice of the Peace and Constable. It was held July 24, 1830, at the house of James Kinzie, on the West

* History of Illinois and Life of Ninian Edwards, by his son, Ninian W. Edwards.

Side; fifty-six voters turned out. John S. C. Hogan, afterward Postmaster, was the successful candidate for Justice over Archibald Clybourne. It was probably quite an exciting election, as a much larger vote was polled than at the State election held only about a week afterward.

At the State election held August 2, 1830, thirty-two voters exercised their privileges at the Chicago precinct, twenty-two of whom supported the somewhat celebrated John Reynolds for Governor. Reynolds was a Jackson Democrat, and was elected by a triumphant majority. Chicago, unanimously Whig in 1826, was now strongly democratic—two to one—Jackson being the President. This election was held at the house of James Kinzie, on the West Side. The judges of election were: Russel E. Heacock, J. B. Beaubien, and James Kinzie; the clerks were, Madore B. Beaubien and Rev. Jesse Walker.

Prior to the organization of Cook County, in 1831, there was not a sufficient number of voters in Chicago, or in fact in all the region roundabout, to make them even a disturbing element in the politics of the State. What few there were seem to have had no political party predilections whatever, further than to vote with the dominant party, and for several years thereafter party lines were not strictly drawn in the local elections which occurred. In the congressional election held in August, 1832, the county, then embracing the present counties of Lake, McHenry, DuPage and Will, there were cast at the three precincts, one hundred and fourteen votes, of which number ninety-four were for the Democratic candidate for Congress, Joseph Duncan, (of Jacksonville), who was elected. His competitors were Jonathan H. Pugh, Whig, who received nineteen votes, and Archibald Clybourne, who received one vote.

State and county officers were elected at the same time, which show more local or personal than political preference. The votes were: For State Senator—James M. Strode (Galena), eighty-one votes; James W. Stevenson (Galena), twenty-six votes; J. M. Gay, four votes. For State Representative—Benjamin Mills (Galena), one hundred and ten votes. For Sheriff—Stephen Forbes (Chicago), one hundred and six votes; James Kinzie (Chicago), two votes. For Coroner, Elijah Wentworth, Jr. (Chicago), one hundred and four votes. The votes of the different precincts, Chicago, Hickory Creek, and DuPage, are not separately given in the list* from which the above returns are taken. Chicago had been entirely depopulated by a cholera panic in July, and it is not probable that any large part of the vote was cast at that precinct. This was the first general election after the organization of Cook County.†

So far as appears from the votes cast at presidential and congressional elections after 1832, the returns of which will be given further on, Chicago and Cook County seem to have been unswervingly Democratic for the succeeding twenty-two years, during which time, with but a few exceptions when the councils of the party were divided (1840 and 1848), it did not fail to give a majority for the Democratic candidate, whoever he might be, and regardless of all local issues tending to swerve voters from party allegiance. It was not until it had seen buried in oblivion the party which had been its ancient and worthy foe, and its own party disintegrations throughout the nation had become apparent, precipitated, although not caused, by the acts of one of

Chicago's most gifted and idolized citizens, that the Chicago Democracy knew defeat. The following election returns will show the strength of the opposing political parties at the periods designated:

1834—Gubernatorial election, August 4 (Cook County):

FOR GOVERNOR.—William Kinney (of Belleville), Whig, 201; Robert K. McLaughlin (of Vandalia), 10; Joseph Duncan (of Jacksonville), Democrat, 309; James Adams (of Springfield), 8—528.

1836—Presidential election, November (Cook County). FOR PRESIDENT—Martin Van Buren, Democrat, 519 votes; William Henry Harrison, Whig, 524 votes.

1838—Congressional and gubernatorial election, August (Cook County). Congressman—Stephen A. Douglas, Democrat, 1,667 votes; John T. Stuart, Whig, 839 votes. Governor—Thomas Carlin, Democrat, 1,664 votes; Cyrus Edwards, Whig, 832 votes.

This was a most exciting campaign. The recent financial collapse, which had left business in a state of paralysis throughout the country, had been attributed largely to the financial policy of Jackson's and Van Buren's administrations, and the Whig party, with a vigor inspired by high hopes of riding into power on the waves of prevailing discontents, were contesting every election, thus preparing the way for the great presidential campaign of 1840, which resulted in a victory so overwhelming as to endanger the victors by its completeness.

During this campaign Stephen A. Douglas, then a young man of twenty-five years, made his first appearance in Chicago as a political orator. He had been in the State but five years, his home being first in Winchester, a small town some fifteen miles from Jacksonville, and later in Springfield. During this time he had taught school, completed his law studies, been admitted to the Bar, and by his marvelous powers fought himself to a prominent position among the oldest and ablest members of the Illinois Bar. At the age of twenty-two years he was elected by the Legislature as Attorney General of the State; when twenty-three years old he was a member of the Legislature; and a year later his talents received national recognition through his appointment by President Van Buren to the office of Register of the Land Office at Springfield, Ill. In 1838 he received the Democratic nomination for Congress, and with the uncompromising pluck which characterized his whole life canvassed the whole district, holding joint discussions with his opponents or speaking alone, during every evening, except Sundays, for the five months preceding the election. It was at the close of this remarkable campaign that he spoke at Chicago. The meeting was held in the Saloon Building, August 4. The fame of the "Little Giant" had preceded him and the hall was packed with an eager crowd whose curiosity to see and hear the young orator was little less than their interest in the exciting political issues he was to discuss. It is a matter of history that on his *debut* he took the entire crowd by storm. He was applauded to the echo, and a Whig, William L. May, who arose to reply, was hissed down and failed to get a hearing. For sixteen years thereafter Douglas led captive the Democracy of Chicago, and held their destinies in the hollow of his hand. The vote polled at the Congressional election was the largest ever at that time polled in the State, aggregating over 36,000 votes; so close was the contest that the result was not officially declared for several weeks, when the Whig candidate was declared elected by a majority of five votes only.

* See supplement to lecture of Hon. John Wentworth, Fergus's Historic Series, No. 8, p. 43.

† See corporate history of Chicago, and early history elsewhere in this volume.

1840—Presidential election, November 3 (Cook County). FOR PRESIDENT—Martin Van Buren, Democrat, 1,989 votes; William Henry Harrison, Whig, 1,034 votes. (Chicago) FOR PRESIDENT—Van Buren, 807 votes; Harrison, 622 votes.

1842—Gubernatorial election (Cook County). FOR GOVERNOR, Joseph Duncan, Whig, 625 votes; Thomas Ford, Democrat, 1,328 votes; — Hunter, Abolitionist, 37 votes.

1842—Congressional election (Fourth District). Giles Spring, Whig, 891 votes; John Wentworth, Democrat, 1,172 votes. Mr. Wentworth was re-elected in 1842, 1844, and 1846, serving four terms in Congress successively as a Democrat.

1844—Presidential election, November 4 (Cook County). FOR PRESIDENT—James K. Polk, Democrat, 2,027 votes; Henry Clay, Whig, 1,117; James G. Birney, Abolitionist, 317. (Chicago) Polk, 136 votes; Clay, 850 votes; Birney, 209 votes.

1848.—Presidential election, November 7 (Cook County). FOR PRESIDENT—Martin Van Buren, Free-Soil Democrat, 2,120 votes; Lewis Cass, Straight Democrat, 1,622 votes; Zachary Taylor, Whig, 1,708 votes. (Chicago) Van Buren, 1,543 votes; Cass, 1,016 votes; Taylor, 1,283 votes.

1850—Congressional election, (Cook County). For Congressman, R. S. Molony, Democrat, 2,863 votes; Churchill C. Coffing, Whig, 1,880 votes.

1852—Presidential election, November 3 (Cook County.) FOR PRESIDENT—Franklin Pierce, Democrat, 3,767 votes; Winfield Scott, Whig, 2,089 votes; John P. Hale, Free-Soil, 793 votes. (Chicago) Pierce, 2,835 votes; Scott, 1,765 votes; Hale, 424 votes.

1854—Congressional election (Cook County). James H. Woodworth, Free-Soil, 3,448 votes; Turner, Democrat, 1,175 votes.

1856—Presidential election, November 4 (Cook County). FOR PRESIDENT—John C. Fremont, Republican, 9,020 votes; James Buchanan, Democrat, 5,680 votes; Millard Fillmore, Whig, 342. (Chicago) Fremont, 6,370 votes; Buchanan, 4,913 votes; Fillmore, 332 votes.

1856—Congressional election (Cook County). John F. Farnsworth, Republican, 8,993 votes; John Van Nort Wyke, Democrat, 5,572 votes.

1858—Congressional election (Cook County). John F. Farnsworth, Republican, 10,108 votes; Thomas Dyer, Douglas Democrat, 8,278 votes; Robert Blackwell, Administration Democrat, 305 votes.

1860—Presidential election, November 7 (Cook County). FOR PRESIDENT—Abraham Lincoln, Republican, 14,589 votes; Stephen A. Douglas, Democrat, 9,846 votes; John Bell, Straight Whig, 107 votes; John C. Breckenridge, Southern Democrat, 87 votes.

1860—Congressional election (Cook County). Isaac N. Arnold, Republican, 14,663 votes; Augustus Harrington, Douglas Democrat, 9,791 votes.

The returns of such important elections as have been before given are sufficient to indicate to the reader the political status of Chicago and Cook County through the period of the twenty-five years here in review. In 1836 Cook County gave Harrison, Whig, a majority of five votes in a total ballot of 1,041. His vote was largely increased by his being a Western man and in closer sympathy with the frontiersmen than was his Eastern political opponent, Van Buren. Two years after, in 1838, with no such disparity in the popularity of the opposing candidates, the Democrats carried the county by a majority of 828 in a total vote of 2,506; the Democrats outnumbering the Whigs, two to one. In

1840, when the enthusiasm of the hard-cider-Tippecanoe campaign swept the country like a prairie fire, both Cook County and Chicago stood rock-bound against the popular wave, and gave a majority for Van Buren, in spite of Harrison's personal popularity: the county 835, in a total vote of 3,023; the City of Chicago, 185, in a total vote of 1,429.

The Democratic ascendancy remained uninterrupted until 1848. In the presidential election of that year two Democratic candidates were in the field: Cass the regular nominee, and Van Buren, who had been nominated by Northern Democrats, who took issue with their Southern brethren on the admission of Texas as a slave State. The Democratic forces thus being divided and demoralized, the Whig candidate, Zachary Taylor, received a small majority over Cass, both in the city and county. The aggregate vote, however, of both wings, showed that the united Democracy still held the power at the ballot box in a ratio of two to one.

The election of 1850 showed the usual Democratic majority, as did the presidential election of 1852, the majority for Pierce, Democrat, being, the latter year, 646 over the combined vote of the Whigs (for Scott) and the Free-Soilers (for Hale) in the city. In the county the Democratic majority was 885.

Here the Democratic ascendancy, which had been uninterrupted for almost a generation, ceased, and for as many years thereafter the party struggled in a minority, only fitfully broken by some local issue on which a fusion with other opponents of the Republican party brought a temporary or partial victory.

In 1854 the vote for a member of Congress gave to the Republican candidate a majority of 2,273 in a total vote of 4,623, the tables being completely turned, and the ascendancy of the Republicans being now established on the former Democratic ratio of two to one. The reader can trace the subsequent history of political party power and weakness up to 1860 in the preceding pages. The further history of Chicago's career as a Republican stronghold will appear in future volumes.

The decline of Democratic power in Chicago was in a sense attributable to the same causes which destroyed its efficiency and strength as a National party, and in that sense need not here be discussed. The gradual decadence of the old Whig party, which for nearly fifty years had been in constant antagonism to the Democratic party, would have left it undisputed master of the field, but for the evolution of a new party on the issue of slavery or no slavery in the Territorial domain of the Nation. The question of the abolition of slavery was not the basis on which the Republican party was founded, nor was the abhorrence in which the institution was justly held by a large part of the Northern people sufficient to break old party ties or bring into existence a party that could rule the destinies of the Republic. Until the stern necessities of war wrung from that cautious, wise and freedom-loving patriot, Abraham Lincoln, against the protests of many of his trusted advisers, the Emancipation Proclamation, the Republican party, although opposed to the extension of slavery and favoring its restriction to its existing territorial limits, had abjured all sympathy with the formerly decried but now glorified party known as abolitionists. Nevertheless, although their doctrines were repudiated openly, they were, from the beginning, a constant and ever increasing educational power, imbuing the popular heart with their own abhorrence for the cursed institution itself, and preparing it for the great conflict which in good time was to come. It was precious seed they

sowed as they "went forth weeping," and not a few of them lived "to come again rejoicing, bearing their sheaves with them."

The student of Illinois history is conversant with the early history of slavery as it had a bearing on the destinies of the State. He has read of the efforts, well nigh successful, which were made to legalize the institution in Illinois in 1824. As late as 1840, with a view to inducing Southern planters to settle in the State with their slaves, and to insure peace and harmony with the neighboring slave States, many openly advocated the introduction of slavery. Through all the various laws passed by the State Legislature had run a peculiar code which precluded the residence of free negroes in the State, except under conditions but little better than those of actual slavery. They were incompetent witnesses in any case where a white man was the plaintiff or defendant, and except they could show free papers were subject to arrest, imprisonment, and, after due advertisement, no master appearing, the negro so arrested was sold by auction for the costs of his arrest. The sale thus made placed him under as absolute control of his new master as though he had been a born slave in the South. The same penalties were provided for insubordination or other offenses, including that of running away, as for slaves, and throughout the code "slaves" and "servants" (colored) were subject to the same penalties and restrictions.

Under this code of laws, modified, but not repealed until the War of the Rebellion was ended, free negroes had few rights which white men were bound to respect. Among the posthumous papers of the late Zebina Eastman, who, at the time of his death was engaged on this volume, is an exhaustive history in manuscript, of the "Black Code of Illinois," which he in common with other early Abolitionists opposed for nearly half a century before they saw it obliterated. The papers are deposited with the Chicago Historical Society, pending their publication. Mr. Eastman thus sketches the end of class legislation against negroes in Illinois :

"After this there came upon the nation the storm of God's terrible swift judgments, in his thunder and his lightning, and things were not what they seemed before. What had been prayed for by timid women for a generation and unheeded, to remove the curse of our apostacy from the honor of the State, was answered very suddenly at length by the spontaneous action of stern and earnest men. The storm of the Rebellion was a revolution, the most complete ever falling over the fate of a race—to the colored people of the country, bond or free. If the slaves even had become free, real freedom should come to the colored people of Illinois, and their coming here should no longer be a '*High Misdemeanor*' (as the statutes still declared it). There were whisperings that the Black Laws should be repealed. After the emancipation had been effected, John Jones, a mulatto well known in Chicago, a man free-born, yet who came under the ban of the law and filed his certificate of freedom with the Chicago Historical Society, carried a petition through the streets of Chicago, asking for the repeal of these laws. He went to Springfield, backed by influential citizens, and engineered the enterprise. Through his efforts the end came speedily. Through Senator Lansing of McHenry County, first moving early in the session of 1865, for the repeal of these laws, and the steady process of the course through the legal forms, we see, at last, as with a blow, four years after the breaking out of the Rebellion, every vestige of the Black Code swept from the statute book.

Therefore in the laws of 1865, there is the following enactment, with this title abbreviated :

"An act to repeal Section 16, Division 3, Chapter 30, and Chapter 74, of the Revised Laws, etc."—and this is the immortal act :

"SECTION 1. Be it enacted by the people of the State of Illinois by the General Assembly; that Section 16, Division 3, Chapter 30, of the Revised Statutes of the State entitled 'Criminal Jurisprudence;' and Chapter 74 of said Revised Statutes, entitled 'Negroes and Mulattoes,' and an act of the General Assembly of this State approved, February 12, 1853, entitled 'An act to prevent the immigration of free negroes into this State' be, and the same are hereby repealed; also, Section 23, Chapter 40, Revised Statutes, entitled, 'Evidence and Deposition.'

"SECTION 2. This act to be in force from and after its passage." Approved February 7, 1865.

Mr. Eastman with the exultation of a fearless, outspoken, conscientious abolitionist of the old school, who had lived to see the full consummation of his life-long work, and the fruition of his early hopes, thus closes :

"This is one of the *immutable* laws, that stand forever! Every pigeon-hole of the legal archives was ransacked, and every taint of color in our laws searched out and buried forever."

Under these laws negro servants were advertised as runaways in the daily papers of Chicago, and the labor of free negroes sold. The more serious phases of the working of the atrocious laws did not often appear in the northern part of the State. Mr. Eastman's papers, before alluded to, abound in incidents illustrative of the working of the black code. Among them is one having its scene partially laid in Chicago :

One Nicholas Jones, a free-born colored man, born and reared in the South, there married (or rather took to himself, as no marriage like his was valid) a black woman who was a slave. They had several children. All efforts on his part to purchase his family having proved unavailing, he fled with them to the North, and came to Chicago to live. An agent of his wife's owner traced these fugitives to their city of refuge, where, with the co-operation of one Henry Rhines, the whole family, including the free-born husband were arrested, bound, bundled into a carriage and started for the South. Mr. Eastman states that their repeated calls for help along the road were unheeded until they had reached Ottawa, crossed the river, and commenced to cross the prairie beyond. There they were stopped by Sheriff William Reddick, and forced to show their claim to the colored cargo. Under the existing laws their right to the woman and children was established, but Jones himself was set free, and was allowed to return wifeless and childless and broken hearted to Chicago. Jones stated that while he was on his way to Ottawa, he saw Rhines rob his wife of what little money they possessed, which she had concealed about her person. The date of this occurrence is not given. The story is a sad one, but it does not seem to have stirred the unsympathetic heart of either of the then leading political parties.

Below are other incidents in the history of Chicago having a bearing on the early development of anti-slavery sentiment in Chicago.

An advertisement (published in Chicago in 1837, in the Commercial Advertiser, Hooper Warren, publisher,) read :

"ONE CENT REWARD.—Disappeared from my residence, on the morning of the 2d inst., an industrious

Black Girl, named Eliza Ann Thompson, about fourteen years old, rather large of her age, and foxy-looking; a great liar, and would steal some; as she not only has taken away her duds, but some other fixings which she had no right to. As near as I can ascertain, she was persuaded to run away by a bull (!) negro by the name of Joe Abbey, who had been prowling about my house some time for that purpose. I forbid all persons harboring or trusting her on my account, as I will pay no debt or debts of her contracting after this date. The above reward will be given for her delivery, but no charges paid.

"January 3, 1837. JOHN C. HUGUNIN."

In 1842, Edwin Heathcock, a colored man, industrious and well-behaved, and a member of the Chicago Methodist Church, was working in a field on the North Branch of the Chicago River, having hired out as a laborer to earn wages for himself. While so employed, a wordy quarrel arose between himself and employer, or some fellow workman, in which language was used not comporting with the dignity of either white or black, and which came near ending in a more serious affair. In retaliation the white man had the negro arrested on the ground of being in the State of Illinois without free papers or having given bonds. Heathcock was brought before Justice L. C. Kercheval, who had given much attention to the law governing such cases, and he promptly committed the negro to jail. It was impossible to make Heathcock say that he ever had a master or owner, or ever even wanted one. He was put in charge of Sheriff Samuel J. Lowe, in the log jail on the northwest corner of the court-house square; the Grecian-columned brick court-house gracing the eastern corner. He was duly advertised for sale in the "Chicago Democrat," for six weeks, with the constitutional cut of a runaway negro, bare-headed, with a bundle held over his shoulder on a stick. The day of sale was to be Monday, November 14, 1842, if no master came to claim him. On the Saturday night preceding the sale, Mr. Eastman met, on Clark Street, Calvin DeWolf, then a young law student. Together they went to the printing office of the former, where by the dim light of an oil lamp, Mr. Eastman set up in type a little hand-bill headed, "A Man for Sale," giving the date and place of the Monday morning sale, and inviting the citizens of Chicago to be present. DeWolf stood behind the press and rolled, while Eastman pulled. The bills finished, they went out with their paste-pot and pasted them along the board fences that surrounded the court-house square, and pretty well lined the forty yards up and down Clark Street, where the citizens could have a fair chance to encounter them as they passed to and from their places of worship the following day. The bills were a surprise to some, and an offense to others, as was proved by the splashes of mud and tobacco which disfigured some of them, while others were torn from their exalted positions and trampled in the mud of early Chicago. Enough had been seen, however, to draw a crowd on Monday morning that blocked the corner of LaSalle and Randolph streets, and up the latter to the front of the log jail. Sheriff Lowe brought out the man, whom the law had put into his hands for sale. Says Mr. Eastman:

"I believe it was the only slave sale that ever took place in Chicago. Chicago, however, always does justice to her natives. Its first *white settler* was a black man—Jean Baptiste Point De Saible—who preceded John Kinzie in the settlement of Chicago, and who is the black root from which all our glory has sprung—the parent of the half million population; so before they

sold a negro as a slave in 1842, they previously made a precedent by selling a white man; for before this, some time in the thirties, as Judge Caton testifies, a Maryland vagrant (there being nothing here that could be done for him) was sold as a vagrant or vagabond, and was bought by George White, the black crier of auctions and lost children. So the way was justified for this sale by Sheriff Lowe.

"Sheriff Lowe brought out his prisoner, placed him on the sidewalk and offered him for sale, to pay the expenses of his imprisonment. There were people enough there to have invited strong competition for a bargain. Edwin Heathcock seemed to shudder from the effect of the chill air, in contrast with the seething jail, or from the fact that he was passing through a scene to which he was not accustomed. Some of us might have felt a little queer, if we were being sold by the Sheriff, instead of our horse or our dog. Sheriff Lowe tried to be complacent; but being an Englishman, although a good Democrat enough to be Sheriff, he felt himself encumbered with embarrassing circumstances, and he was rather solemn. The people looked on glum and scowling. He offered the man for sale, and called for bids. The offer was answered by expressive silence. He felt called upon to explain that he was only the agent of the law, and that as the man had been committed and had not proved his freedom, neither had any master proved that he was a slave, the law required him to sell the negro to pay expenses—pay for solving that muddle of the law, which itself could not solve; but Sheriff Lowe did not admit that. No bids came in. The auction went on;—'Here is an able bodied man; I am required to sell him for a term of service, for the best price I can get for him, to pay his jail fees. How much am I bid, and so on.' No bids. Said he, 'Gentlemen, this is not a pleasant job. Don't blame me, but the law. I am compelled to do it. If I can get no bid for this man I must return him to jail. The law requires me to sell him; if I get no offer, I must return him to jail, and continue the sale at another time.'

"Still no bid came at these pathetic appeals. Like the Irishman who had joined himself to a potato cask by putting his hand through the bung-hole and grasping a potato, he had got a man on his hands, and he couldn't drop him. Finally the threat of putting the poor man back into that miserable jail prevailed so far that a voice was raised from the opposite side of the street—'I bid twenty-five cents.' This was the voice of the late Mahlon D. Ogden. Appeals were made in the usual manner for an increase of the bid. 'Do I hear no more—only twenty-five cents for this able-bodied man; only a quarter?' But no further bid was made, nor did the good Mr. Ogden raise his, and the man was struck off to Mahlon D. Ogden for twenty-five cents. Mr. Ogden took out a silver quarter and handed it to the Sheriff, in presence of the crowd, who gave a liberal cheer. He then called the man to him. 'Edwin, I have bought you; I have given a quarter for you; you are my man—my slave! Now, you go where you please.'

First Passenger on the Underground Railroad to Chicago.—Mr. Eastman says: "I believe I sent the first passenger on the underground railroad to Chicago, but he had to go *through* Chicago not alone into it to get to freedom." The facts, as given by him, are as follows:

In the fall of 1839, Mr. Eastman was living in the little town of Lowell, on the Vermilion River, in La Salle County. On a very cold morning in October of

that year, a farmer came to him, stating that he had met a very strange person down on the river bank, who upon his approach aimed a shotgun at him with a warning to keep back, and that he believed he was a fugitive of some kind—perhaps a runaway slave. Mr. Eastman asked the farmer to go back, and if it was a black man, tell him he was among friends, and bring him up to him. The farmer soon reappeared with the stranger, whom Mr. Eastman describes as a most strange, famished, terrified negro, clad in rags and skins, and armed with a murderous looking knife extemporized from the end of a scythe, and an equally rough looking gun, both of which he carefully guarded, evidently suspicious that they might be taken from him. Other neighbors joined Mr. Eastman and his companion, and the negro was finally made to believe that even if, as they suspected, he was a runaway, no harm would be done him—that he was among friends. One of the party, whose home was nearest the spot where this interview occurred (Mr. H. L. Dutton, afterward a resident of Hyde Park), took the fugitive to his table, and a good meal had the effect of thawing his reticence and loosening his hitherto silent tongue. It being now understood, although the man did not admit it, that an escaped slave was present, plans were discussed as to his disposal, which was not so easy a matter to determine in 1839 as it might seem to the reader of 1884. Mr. Eastman says:

“We were living in a moral community. On one side of the river, and not a gunshot distance from us was a Congregational church; on the other side was Vermilionville, with a Baptist church, and a Methodist meeting; and the founder of the town named in Peck's Guide Book of Illinois was a leader in the Baptist Church, and a reader of the Chicago Democrat. This man was an exemplary man, but, alas, he was a Democrat! Down the river a little way was another exemplary man, who was an attendant at the Congregational Church; but, alas, he was a Whig! The little party that had determined to engage in the unlawful business of sheltering—perhaps, in the sense of the law, secreting—this runaway property consisted of four; the one who had just fed him was a deacon of the Congregationalist Church; another who had fallen into this bad business was a leader in this Baptist Church of Vermilionville; another was a boisterous millwright who was in for the fun of the thing; and the fourth was myself, who at that time represented the sense of the no offense in hindering us; but there was a grave offense in our hindering that ‘any person,’ who figures so largely in authority in the law. So now, in all this we were willful transgressors. There were enough of us to have made it a ‘conspiracy’ if we had been negroes; and we should have been seditious, and might have been dispersed by proclamation, or treated as rioters by force of arms, and as white men subjected to imprisonment. We knew the penalty to which we made ourselves liable, and therefore added to our other sin that of concealing the crime. We were moral thieves in thus projecting plans, secretly to run that negro into freedom. We knew that the most active man among us, and probably his good wife, had already made themselves liable to a five-hundred-dollar fine in giving that man a breakfast. That Democratic farmer who had left us had already made himself liable by bringing the negro up out of the bushes by the river bank. I had made myself liable by the ‘comfort’ I gave him while standing in the road—he, in the meantime, not permitting me to handle his shotgun. We all began to realize that we were in for it, and might as well ‘be hung for an old sheep as for

a lamb.’ So we resolved to take him over the river to a farmer from New Hampshire, who we knew was a reader of the Bible and Rogers's Herald of Freedom, and there secrete him till he could be sent to Canada. And then we all went stealthily down to the river, not by the common road and the ford, but by a pathway through the bushes, and crossed the river by stepping from stone to stone. As we thus passed along in Indian file, the negro in the midst, we knew that we were breaking the law of Illinois. We were aiding him to escape, and were liable to be indicted. We thought of the good Baptist world at large. Now, as we discussed the matter in the presence of that rabbit-skin-clad negro, we considered how we could possibly protect him, and get him safely off to that land of freedom in *Canada*. At the word *Canada* this stolid man's eyes seemed to kindle up with some expression of intelligence. The thought came over one of the party that if any person might desire to interfere with our intentions, that is, hinder us, it might be necessary for us to ‘hinder’ him, in the language of the law that makes ‘hinder’ an offense, with penalty of imprisonment. Now, there was the Democratic founder of the town, and the good Whig Justice of the Peace, further down, and we would rather have met the devil than either that Whig or Democrat. We thought of the religious community up in that village we must needs pass if we took the common road, and as Fred Douglass said, ‘would rather meet a wolf than a Christian.’

“Skulking along under the shelter of fences and bushes, the party reached the house of the New Hampshire farmer, who ‘read the Bible and Herald of Freedom,’ and found in the ‘bay’ of the old fashioned New England barn a safe hiding-place for the fugitive, who, fairly in the hay almost to his eyes, opened his heart and disclosed the story of his wrongs, his sufferings, and his final escape from the Alabama plantation to the sympathizing circle seated on the railing of the ‘bay.’ He had supposed vaguely that ‘the North’ meant liberty, and that Illinois was a part, at least, of the North, and found out his mistake in geography when, having reached the State, after incredible hardships, he was arrested as a runaway slave and thrown into jail. He was advertised, but no master appearing, was sold to pay jail expenses. After serving his time with his new master, he again started for the land of freedom, which he now knew was Canada, and had reached the little hamlet where Mr. Eastman lived before he found ‘aid or comfort.’ He remained one night in the barn to which he had been taken, and the next night farmer Clark took the first passenger to the nearest station on what became the great ‘underground railroad,’ and which later had so many branches centering in Chicago. The first night the fugitive reached Ottawa, thence on by night stages in farmers' wagons to Northville, then to Plainfield, to Cass, then to Deacon Vial's at Lyons, who brought him to Chicago and deposited him with Dr. Dyer. After caring for him a little while, the good Doctor thought it advisable to give him a chance to see Canada—to reach Canaan at last—and placed him on board the steamer ‘Illinois,’ Captain Blake, with his gun and his knife. Captain Blake, as usual, when several days out, made a tour of discovery to see what he might find on board, and among the firemen he found a ‘new hand,’ at which discovery he was very wroth, and made awful threats in language more forcible than polite. However, his fury ended by the positive determination to ‘kick him off the boat at the first port he came to.’ So as he came into the Detroit River, he made a grand

circuit, as if to show off his fine boat to a circle of admiring Southerners on board, and ran it into a port on the Canada shore, where he had no passengers to leave, but where he furiously dragged the negro from the lower regions and energetically 'kicked him off' into freedom."

Mr. Eastman gives the following as the last slavery disturbance in Chicago:

"In 1845-46 a certain negro was arrested by Henry Rhines by virtue of a writ issuing from the office of Justice Lewis C. Kercheval, and brought before that Justice to answer to the charge of seeming to be free when he was not, and to respond to a claim of ownership by a man residing in Missouri. There was no master or agent in Chicago to look after the interests of this claim, but the negro was brought before the Justice to answer to the charge. It was soon noised abroad that Rhines had "got hold of another nigger, and had him in Kercheval's office." Dr. Dyer, the stanch friend of the then oppressed race, with a score of black friends of the prisoner, and quite a number of "respectable" people besides, soon arrived at the office, where the Justice was engaged in making out the paper of "extradition," and Mr. Kercheval was coldly informed that that case was to be contested. Lawyer Collins was sent for, and as the rumor that "a nigger had been caught" spread abroad, great crowds of people gathered on the street and filled the Justice's office on the second floor of a wooden building on Clark Street. It was very evident there was to be a full trial. Mr. Collins critically examined all the papers that had been prepared in the case, as well as the evidence submitted to prove that this man was a slave of somebody in Missouri. He could find no flaw in Kercheval's decisions through which the man might escape, and suddenly sprung upon him this startling proposition: "This man is charged with being a slave in Missouri; now, I deny that slavery exists in Missouri." The Justice affirmed that the proposition was absurd; that everybody knew that slavery existed there. "I deny it," protested Mr. Collins, "and you can't take as evidence what everybody says; it must be proved before your honor. Your honor's court is of too high a grade to be taking evidence on hearsay." No one could be found who could testify "from personal knowledge" that slavery existed in Missouri. Mr. Collins claimed that it must therefore be proved by the law itself, and it struck the Justice that this was but reasonable and just, and in accordance with proper legal practice.

In the meantime the crowd was getting very dense in front of the building, blocking up Clark Street from Lake to Water, and the little office and stairway was so closely packed that there was great danger of breaking down and being lost in one common muddle.

"It must be proved," says the Justice, and where is the "Stat-tuts of Wisconsin!" Now these "Stattuts" were not in the Justice's office; they were not commonly at hand. A messenger was sent for the "Stat-utes of Wisconsin." Rhines remained on hand to guard his prisoner. It was with great difficulty that the messenger squeezed his way down the office stairs and through the outside crowd on his mission to a neighboring law office to get the required authority, and there was therefore a long and solemn waiting for his return—an ominous pause in the process of administering justice. Suddenly, from his "durance vile," and from before the very presence of the Justice, uprose that "nigger," and somehow, like a bubble, glided over the heads of the throng and down the staircase to the sidewalk. The crowd moved on to follow, and Rhines, like "Jill,"

"came tumbling after." Reaching the sidewalk, he tried to get out his pistol, but the pressure of the crowd forced him to point it past his own nose up to the heavens—an unprofitable direction in which to shoot. The Justice, in the meantime, waited for the arrival of the "statutes," and could have seen—had he looked, as his constable was obliged to see, to his discomfiture, in his utter helplessness on the outside—an eager and excited crowd, a mingling of men, wagons, horses and drays, and in the midst of shouts the negro hoisted onto the highest seat of the best carriage on the street, while the spare room was filled with young men, and then driven by these daring young fellows down Lake Street to Lawyer Collins's office, while an immense crowd followed shouting and cheering the rescued and rescuers. Arriving at the office, the negro ascended to the second story, the young men took out a front window, and the former prisoner, standing upon the sill, thanked the crowd below for his rescue from those whose purpose it was to remand him to slavery.

No prosecutions followed or were even threatened for thus placing obstacles in the way of the distribution of law and justice, although the offenders, who had incurred the penalty of six months' imprisonment by this jolly performance, would have filled half a dozen jails like that of Chicago, and the officers of the law who designed to send this underground-fugitive back to slavery, had to digest their disappointment as best they might.

To Mayor Curtiss, and to many of the good citizens of Chicago, however, this "demonstration" looked somewhat, yea, "very like" a mob, and there was great fear lest the fair fame of Chicago as a "law abiding city" should be tarnished. As a consequence of this anxiety, a proclamation was issued, calling a meeting of law-and-order people of the city in the court-house. The law-and-order people (on both sides) were on hand at the appointed time. Everything had been prepared. Resolutions had been prepared, and were about to be promulgated, that would forever squelch "abolitionism." Somehow, things did not work smoothly for the self-constituted law-protectors, and when J. Young Scammon arose in the rear end of the court-room and proposed a set of resolutions that had been brooded over by another kind of men, great was the consternation. Through much disturbance he was at length permitted to read them. They deprecated all illegal interference with the law, and especially illegal arrests of people who had made Chicago an asylum from oppression, declaring that Chicago was on the side of humanity, and was bound to protect legally the fugitive from oppression. The resolutions were passed by an enthusiastic vote. This was the last slavery excitement under the Black Laws, and Chicago maintained thereafter her well-earned reputation as a law-and-order community.

The murder of Lovejoy at Alton, Ill., in 1837, seems to have been the first incident that aroused the apathetic people of Chicago sufficiently to result in anything like organization or public protest against the enormity of human slavery. Mr. Eastman in his article in Blanchard's History of the Northwest, gives the following account of Chicago's connection with the early anti-slavery days:

"Soon after the murder of Lovejoy, there was a meeting called in Chicago—not to sympathize with the cause of abolitionism, but to condemn this assault on the constitutional right of the freedom of the press. It was called to be held in the Saloon Building, a small public hall on the corner of Clark and Lake streets, on the third floor, and the meeting was held not without

fears that it would be broken up by a mob. There was an abundance of caution used in the calling and holding of the meeting, to avoid any collision 'with the fellows of the baser sort.' Rev. F. Bascom, of the First Presbyterian Church, Dr. C. V. Dyer, Philo Carpenter, Robert Freeman, Calvin DeWolf, and some few members of the Baptist and Methodist churches, were the leading spirits of this meeting. A watch was set to give seasonable warning of any approach of a mob, should any one be sent howling upon the track of these devout men, mourning for Lovejoy, and endeavoring to give voice to a right-minded public opinion. But there was happily no demonstration of mob violence, and the meeting was not a large one, but probably fully represented the interest which Chicago then took in the fate of Lovejoy; the city was at least saved from the disgrace of a mob. It was not then presumed that an abolition press would have fared any better in Chicago than it had at Alton. The public were not prepared to tolerate any such newspapers.

"This was the first anti-slavery meeting, if it may be called such, held in Chicago, of which there is any recollection. The men who were present became prominent afterward in the anti-slavery history of Chicago. The men who were willing to be known as abolitionists, soon after this event, were mainly a nucleus that formed around the First Presbyterian church, embracing a few individuals who were Methodists or Baptists; but in almost every instance they were professing Christians, who were led to take a stand by the death of Lovejoy. Here was the beginning of that anti-slavery sentiment that became a power in Chicago, and made that city distinguished throughout the country as one that proved itself a law-abiding community by sheltering and protecting the fugitive slave against illegal arrest."

The date of this first meeting is not given; probably in 1838.

September 3, 1839, the Chicago Colonization Society was organized.

January 16, 1840, the Chicago Anti-Slavery Society held its first public meeting at the Saloon Building. The officers were: President, Henry Smith; vice-presidents, Ira Miltimore, George Foster, and J. Johnston; secretary, Calvin DeWolf; treasurer, George Manierre. Resolutions were offered, and, with slight amendments, adopted, by Rev. Isaac T. Hinton, Rev. Flavel Bascom and Charles Durant, favoring the adoption of some plan for the peaceable abolition of slavery throughout the world, and denouncing the "Black Code" of Illinois.

December 25, 1840, there was published in the Chicago American, a petition to the State Legislature, praying it to remove from the Illinois statutes those laws known collectively as the "Black Code" which prevented negroes from testifying against whites, and which permitted any white man to cause any black man to be thrown into jail who did not show his papers of freedom.

The Liberty Party (abolitionist) held a State convention at Chicago, May 27, 1842, to nominate candidates for State officers: Governor, Lieutenant-Governor, etc. This was the *first State Convention* ever held in the city.

It does not appear that these early abolition efforts made any perceptible impression on the Democratic majority or the Whig minority until the issue took a national form. But the leaven worked fast. In 1844, when, for the first time the abolitionists had a national ticket in the field Chicago gave 209 votes for Birney, the presidential candidate. Out of a popular vote of

2,615,855, Birney received only 62,263 votes. Of these, the State of Illinois gave 3,570, and the little city of Chicago 209. Numerically the vote was insignificant, but comparatively it stamped Chicago at that early day as a hot-bed of abolitionism, where lived an uncompromising and undismayed set of radicals, whose strength was not to be despised.

The anti-slavery sentiment of the city was still more plainly discernable in the presidential election of 1848, when the Democratic party divided on the issue. Then, the anti-slavery sentiment was expressed by a vote of 1,543 for Van Buren.

The anti-slavery Democrats were again whipped into the party traces in 1848, but the incorrigible anti-slavery sentiment in Chicago and Cook County asserted itself in a vote of 793 in the county and 424 in the city for Hall.

The succeeding four years brought the contest which had heretofore smoldered under the crust of party politics to an eruptional crisis. During the period from 1848 to 1852, the whole nation had become stirred to its utmost political depths by national legislation which made it patent to the Northern mind that the North were not longer to be neutral in the propagandism of slavery in the Republic.

The passage of the fugitive-slave law, a part of the compromise measures of 1850, although accepted by both the old parties as a law to be observed and executed, met a most determined opposition throughout the North, and, although there was no political party, save the little revolutionary knot of abolitionists opposed to the law, it could not be enforced in Chicago, nor in any other considerable city in the North, without a popular outbreak, which showed plainly that a conscientious sense of inherent right was becoming so potent that party discipline could no longer restrain it. There was great excitement in Chicago on the receipt of news that the fugitive slave bill had been passed. (September 18, 1850.)

On October 11, the colored people, in convention assembled resolved, "not to fly to Canada," but, "to remain and defend themselves." On the 21st, the Common Council (a Democratic Council) passed a resolution that "the city police would not be required to aid in the recovery of slaves." On the 22d, a great mass-meeting of citizens was held, which, by resolutions condemned the law, and defied its enforcement in Chicago.

Stephen A. Douglas had been a most ardent supporter of the compromise measures. He had become a resident of Chicago in 1847, and had, through his influence, made the city of his residence the terminus of the Illinois Central system of railroads, thus largely increasing its commercial prosperity and importance. His popularity in Chicago as a citizen and as a politician, was at this time at its height. His power over his home constituency was never shown in a stronger light than at this time. In October, 1850, he returned to Chicago, where he found, even among his political friends, the measures generally unpopular, and, in the Democratic papers, even, assailed with great bitterness. On the 24th of that month he made, in Chicago, what has been deemed the ablest speech of his life, in which he defended the principles of the compromise bill, including the fugitive-slave bill, in a manner so masterly as to silence, if it did not convince the insubordinate elements of his own party. In this speech he enunciated the doctrines on which he framed and defended the Kansas-Nebraska bill, three years later, in the following words:

"These measure are predicated on the great fundamental principle that every people ought to possess the right of framing and regulating their own internal concerns and domestic institutions in their own way. * * * These things are all confided by the Constitution to each State to decide for itself, and I know of no reason why the same principle should not be extended to the Territories."

Through the influence of Douglas, the Chicago Democracy was re-united and solidified (for the last time, as is evinced in the vote of the city and Cook County in 1852, when the united Democracy gave Pierce, the Democratic candidate for President, a vote of two thousand eight hundred and thirty-five in the city, against four hundred and twenty-four for Hall the free-soil candidate.

Douglas's scepter was quite rudely broken before another national election. In 1854, January 30th, Douglas made his great speech in the United States Senate, championing the Kansas-Nebraska bill, which repudiated the compromises which had gone before, and, in the minds of the populace, showed the compromises of 1850, including the hated fugitive-slave law, to have been only designed as a subterfuge of the slave power to gain a foothold for further aggression. Douglas took no backward step. He came to Chicago, as before, to explain to his constituency the questions they did not understand. He found his power gone, and only a small but faithful minority of adherents left. The anti-slavery sentiment had broken all bounds, and could no longer be curbed, even by the eloquence of Douglas. An account of his discomfiture is copied from the Chicago Times, of Sunday, August 19, 1877, it being one of a series of historical articles under the head of "By-Gone Days" which appeared in that paper. Its statements show the extreme color of admiration for the hero of the story, but is, nevertheless, deemed to be essentially correct, and is therefore embodied in the history. It read as follows:

"No man of his time had so many personal friends and so many bitter political enemies as Stephen A. Douglas. The former regarded him almost in the light of a prophet, and under his banner would have undertaken any crusade it might have entered his head to preach. The latter in order to maintain an equilibrium, went quite to the other extreme, and regarded the inventor of squatter sovereignty in the light of a Judas or Beelzebub, devoid of a single pure motive.

"Impartial history has since taken the equation of the Little Giant's character and mental stature, and now declares that he was neither so great as his most enthusiastic friends believed him to be, nor so fickle and insincere as his enemies portrayed him. He was eminently a man of action; a man to exert a powerful influence on his own generation, but as he, by nature, favored compromise principles, had a tendency to trim—not by any means a bad trait in times of public excitement—it was to be expected that he would leave no particular influence behind him. Even the present generation, hearing the old heads talk with abiding interest about Douglas, wonder, when they read his speeches, full of one idea and rather tiring repetition, what there was great in the man to draw other men to him in such magnetic chains; and another generation, still further removed from personal knowledge and oral reminiscences of the man, will wonder even more. It was Douglas's fault that he was ambitious. It is his glory, that in the supreme moment of his life he had the greatness to sink his disappointment in the welfare of his country, and his chief title to greatness rests on

the fact that he was able to conquer himself, and, with a heroic abnegation, place himself by the side of the man who had robbed him of the crown of his consuming ambition, to strengthen his arm in fighting his country's foes. The man who could do this was not small,—he was not without principle—and though it does not prove him a great man as to brains, it testifies most eloquently to his greatness of heart.

"Two causes led to the mobbing of the Little Giant in 1854. Those were Know-nothing days, and the Nebraska excitement—supplemented by the Kansas furore—was coming to a head. That it was a period of turmoil is little matter for wonder. In the one case it was a question between the native and the foreign born element—a question, in fact, whether the adopted citizen had any rights which a native was bound to respect. In the other case it was a struggle between freedom and slavery; a life-and-death, hand-to-hand struggle then begun, and which came to an end only with the surrender of Lee under the apple tree.

"On the Know-nothing question Douglas took noble and even advanced ground. In fact, he was the first to make war on the proscriptive spirit of the native party, and it was he who marshaled the Democratic party against the hosts of intolerance, fanaticism, and political as well as religious bigotry.

"Prior to the throwing of these firebrands into the political establishment of the country, as between Whigs and Democrats, Chicago was strongly Democratic—was a stronghold, in fact. By way of illustrating the Democratic strength of that period, an old settler made the remark: 'If the town pump had been nominated for mayor in those days, on the Democratic ticket, it would have been elected. A nomination was always equivalent to an election, and I remember once when Dr. Kimberly, lately deceased, got the Democratic nomination for clerk of some sort, in the Democratic convention that was held in the little old courthouse that stood in the northeast corner of the square, he fainted dead away; he was so overpowered by it. You see the nomination gave him a sure thing, and a nomination and election coming that way in one fell swoop is calculated to knock over the strongest, as I happen to know, for I have run for office myself once or twice in my life.'

"But the Democratic party got on a terribly ragged edge in 1854. The Whigs went to pieces, but in their place came an indefinable something that was neither fish, flesh, nor fowl, for a time, and went under the name of 'Fusion.' Everybody 'fused' for a time, and 'thused' over it, but the thing didn't last long, and out of this chaos was born the Republican party.

"When Know-nothingism came, it completely paralyzed the Democratic party for a time, and the leaders were afraid to combat it. But Douglas, with his characteristic courage—or more properly speaking, pluck—having been invited to deliver a 4th of July address at Philadelphia, accepted on condition that he be allowed to free his mind, and he did so accordingly. On the one hand he went rough-shod for the Know-nothings, and on the other he spoke with enthusiasm for his squatter sovereignty, and thus had the entire opposition about his ears. On the one hand this speech had the effect of placing the Democratic party in solid opposition to Know-nothingism; but what he had said about the Nebraska question so offended the free-soil element in the party that a goodly proportion sloughed off and joined the incoherency known as Fusionists. It was by this free-soil element that Douglas was most bitterly antagonized thereafter, and it was his former supporters

of this complexion that determined to make it warm for him on his return to Chicago.

"There was at that time a daily paper in Chicago called the Democratic Press. It was edited by John L. Scripps and Hon. William Bross, the latter still surviving. This paper, once Democratic, turned with vindictive vehemence on the "Little Giant," and left no means untried to turn the populace against him. Just at that period the once powerful Democratic party of Chicago was actually scattered to the four winds, and not more than a corporal's guard of true souls could be found to give the little Senator a brave backing.

"But, backing or no backing, the 'Little Giant' determined to face the music, and it was announced that shortly after his arrival in Chicago, after the adjournment of Congress, he would take occasion to address his constituents on the issues of the day, and mayhap make a few personal explanations.

"This was just what the opposition to Douglas dreaded. They knew they had him at an advantage so long as he was a thousand miles away; but face to face, with his persuasive tongue in motion, it was another matter, and they determined at all hazards to thwart his purpose—even though it was at the sacrifice of their own vaunted principle, free speech. Once before, in 1850, Douglas had passed under a cloud, but a single speech by him in explanation of his position had placed him in a greater favor than ever. It was this power his enemies dreaded, were determined to nullify, and made arrangements accordingly.

"Congress adjourned about the 1st of August. Mr. Douglas left Washington soon after, and reached his home in this city on the 25th. When he arrived here he found a most formidable organization opposed to him, determined to crowd him to the wall at all hazards; and determined even that he should under no circumstances have an opportunity to address the people, as it was announced he was prepared to do. In this movement to oppose violence to free speech the clergy took a prominent part, and from numerous orthodox Protestant pulpits, especially of the Methodist and Baptist persuasion, the fiat went forth to the faithful that this anti-Christ must be denied every opportunity to pollute the pure atmosphere of Illinois with his perfidious breath. Not only was this organization and purpose manifest in Chicago, but it was rampant all over the State, and the Know-nothing and free-soil combination was at nearly every point prepared to contest with him the right to address the public, on the plea that he was a public enemy.

"It was on the evening of September 1, 1854, that he was announced to speak at North Market Hall, where now the county building stands. Dan O'Hara says there can be no mistake about the date, because it was his birthday, his thirty-third, and he celebrated it by attending the meeting as one of the "Little Giant's" most ardent admirers.

"As soon as the date was announced earnest preparations began on both sides. On the one hand were incendiary appeals on the part of a reckless, partisan press, calling on the populace to 'thwart the little demagogue's' purpose, while on the other there went forward determined measures on the part of Mr. Douglas's friends to see fair play and give him muscular backing if need be. But this determination was not widespread throughout the party. It was principally confined to personal friends—but these tried and true friends.

"Just before the meeting all manner of reckless reports were given currency by the opposition press, one

being to the effect that Mr. Douglas had selected a body guard of five hundred Irishmen who, with arms in their hands, were to be present and compel the people to silence while he spoke. This story was spread to inflame the Know-nothing element. It is needless to say that it had no foundation in truth, and more's the pity. Such an organization at this time—an organization to maintain free speech—would have been a most creditable thing, and that some of the leaders of that mob were not shot down in their tracks will ever be matter for regret among all liberty-loving and all right-minded folks, even though the mob acted in the abused name of liberty. After the riot, with a view of keeping up the bad blood engendered, a paper declared that terrible times might be expected soon, as the friends of the 'Little Giant' had bought up all the guns and revolvers in the stores of the city, and had given heavy orders for more. All of which was another lie manufactured to suit a particular emergency.

"Judge I. L. Milliken was the Mayor of the period—a Democrat in those days—and he was invited and consented to preside at the meeting. The fact that violence was to take place at the gathering was daily impressed upon the public by the opposition press, but with consummate duplicity it was stated that it would be brought about by Douglas, who intended to overawe all disapproval by armed opposition.

"Under such circumstances as these, assembled the meeting on that September evening. During the afternoon the flags of such shipping as was owned by the most bitter of the Fusionists were hung at half-mast; at dusk the bells of numerous churches tolled with all the doleful solemnity that might be supposed appropriate for some impending calamity. As the evening closed in, crowds flocked to the place of meeting.

"The gathering was on Michigan Street, immediately in front of the old North Market Hall. A great crowd was assembled, and it was plain from the start that a wicked feeling was abroad. A little before 8 o'clock Mr. Douglas began to speak. And still the crowd increased. It completely filled up Michigan Street, east as far as Dearborn, and west as far as Clark. And, besides this, the roofs of opposite houses were covered, and the windows and balconies filled, for the 'Little Giant' had a way of making himself heard at a great distance.

"The Senator had spoken but a few minutes when it became apparent that there was an element present that was not disposed to hear him. On the questioning of some statement of the speaker by a person in the crowd the rumpus began in earnest, and for a matter of two hours a juvenile pandemonium sported at a white rage all around that Old Market Hall. First hisses were in order. The Senator paused until silence was comparatively restored, when he told the meeting that he came there to address his constituents, and he intended to be heard. He was instantly assailed by all manner of epithets. Every name that vile tongue could invent was hurled at him. In a moment he was surrounded by a howling, raging mob, hungry to do him personal injury. But, all undaunted, he fearlessly faced the enemy, at the same time keeping down a little company of friends on the platform, who were all eagerness to resent the insults and affronts so brutally heaped upon their idol. Mr. Douglas appealed to the latter to be calm; to leave him to deal with the mob before him. He boldly denounced the violence exhibited as a pre-concerted thing, and in defiance of yells, groans, cat-calls, and every insulting menace and threat, he read

aloud, so that it was heard above the infernal din, a letter informing him that if he dared to speak he would be maltreated.

"The Senator's biographer, Mr. Sheahan, alludes as follows to the affair: 'We never saw such a scene before, and hope never to see the like again. * * * Until ten o'clock he stood firm and unyielding, bidding the mob defiance, and occasionally getting in a word or two upon the general subject. It was the penalty for his speech in Philadelphia. It was the penalty for having made the first assault upon Know-nothingism. It was the penalty for having dared to assail an order including within its members a vast majority of the allied opposition of the Western States. We have conversed since then with men who were present at that mob; with men who went there as members of the order, pledged to stand by and protect each other; with men who were armed to the teeth in anticipation of a scene of bloody violence, and they have assured us that nothing prevented bloodshed that night but the bold and defiant manner in which Douglas maintained his ground. Had he exhibited fear, he would not have commanded respect; had he been craven, and entreated, his party would in all probability have been assaulted with missiles, leading to violence in return. But, standing there before that vast mob, presenting a determined front and unyielding purpose, he extorted an involuntary admiration from those of his enemies who had the courage to engage in a personal encounter; and that admiration, while it could not overcome the purpose of preventing his being heard, protected him from personal violence. The motive, the great ruling reason, for refusing him the privilege of being heard, was that, as he had in 1850 carried the judgment of the people captive into an indorsement of the fugitive-slave law, so, if allowed to speak in 1854, he would at least rally all Democrats to his support by his defense of the Nebraska bill. The combined fanatics of Chicago feared the power and effect of his argument in the presence and hearing of the people. They therefore resolved that he should not be heard. So far as this occasion was concerned, the object was successfully attained, and if there were any doubts as to the fact that the course agreed upon had been previously concerted, the experience of the following few weeks served to remove all question on that head.'

"It was reported at the time, especially by and among those who were not present, that the 'Little Giant' was pelted with rotten eggs. This feature is now called in question by most trustworthy witnesses, who substitute rotten apples. Perhaps, as between rotten eggs and rotten apples, there is not much choice of flavor, but the Sunday Times historian agrees with Uncle Dan O'Hara that the veracity of history is above every other consideration, and he, having been one of the eye-witnesses aforesaid, falls in line on the rotten-apple side of this controversy.

"It was a brave little band that stood by the side of the 'Little Giant' in that hour of peril, and but for his restraining influence, though but few in numbers, it is more than likely they would have left their mark upon the mob. Some have since gone where it is to be hoped mob spirit is unknown since the rebellion of Satan, but others are still among the living. Of this little band were Hon. Frank C. Sherman, General Hart L. Stewart, Cornelius and William Price, Tom Mackin, Elihu Granger, Dan McElroy, Dan O'Hara, Colonel Dick Hamilton and Elisha Tracy.

"This band clung to the lion-hearted Senator to the last. For two hours they stood like a solid wall back of

him, and when, after a vain and protracted effort to be heard, Mr. Douglas finally succumbed to the inevitable, and prepared to leave the rostrum, they formed a stanch phalanx about his carriage, and proceeded to march with their charge toward the hotel. Hooting and yelling, the mob followed up to Clark-street bridge. It was a fortunate circumstance that as soon as the Douglas party had got across the bridge-tender had sense enough to turn the bridge, and thus the greater part of the mob were unable to continue their pursuit. In time the Senator was safely ensconced in his hotel, the Tremont House.

"A month or two later Mr. Douglas was invited by his political friends in this city to partake of a public dinner, and he accepted the invitation. The 9th of November was selected for the time, and on that evening some two hundred gentlemen sat down to a dinner at the Tremont House. In response to a complimentary sentiment, Mr. Douglas addressed the company in a speech which was substantially the address which he would have made to the people in September, had he not been prevented by the mob.

"After the mob violence encountered in Chicago, Mr. Douglas announced his intention to speak at several points in the State, there being an election for Congressmen and State Treasurer then pending. Everywhere throughout the northern part of the State he was greeted upon his arrival by every possible indignity that could be offered, short of personal violence. Burning effigies, effigies suspended by ropes, banners with all the vulgar mottoes and inscriptions that passion and prejudice could suggest, were displayed at various points. Wherever he attempted to speak, the noisy demonstrations which had proved so successful in Chicago were attempted, but in no place did they succeed in preventing his being heard. At Galena, Freeport, Waukegan, Woodstock, and other points in the very heart of the abolition and Know-nothing portion of the State, he bearded the lion in his den, and soon rode on the topmost wave of public favor once more."

Later, when Douglas in the highest magnificence of his intellectual stature, rose up in indignant and uncompromising protest against the enormities that had grown out of his Kansas bill, and, apostatizing from his former apostasy, again stood for freedom, he came again to be the idol of the city, which now holds his sacred dust, and mourns his untimely death at a time when it seemed that the fires of true patriotism were just breaking in a white heat from his great soul.

From the date of Douglas's rebuff, Chicago never ceased to be on the extreme verge of anti-slavery excitement, and became the center of the Western movement which resulted in making Kansas a free State.

May 31, 1856, that most wonderful combination of everything good and bad which has ever been put in human form—James H. Lane, of Kansas—addressed the whole city in Court Square. His address was the culmination of the anti-slavery sentiment which then broke out in deeds.

An echo comes from Kansas of those early times. In the history of that State published in 1883, is an account of what Chicago did for the struggling settlers of that State in their extreme distress. The account is as follows:

One of the earliest and most enthusiastic Kansas meetings held was at Chicago, Saturday evening, May 31, in court-house square. The Kansas speakers were Colonel James H. Lane and Mr. Hinman, "fresh from the smoking ruins of Lawrence." The Chicago Daily Tribune, June 2, gave a two-column report of the meet-

ing under such head-lines, as these: "Illinois Alive and Awake!" "Ten Thousand Freemen in Council!" "Two Thousand Old Hunkers on Hand!" "Fifteen Thousand Dollars Subscribed for Kansas!!!"

Hon. Norman Judd presided, and made the opening speech. He was followed by Francis A. Hoffman. J. C. Vaughn, in an eloquent speech, presented the claims of Kansas for immediate relief, and offered the following resolutions:

"Resolved, That the people of Illinois will aid the freedom of Kansas.

"Resolved, That they will send a colony of five hundred actual settlers to that Territory, and provision them for one year.*

"Resolved, That these settlers will invade no man's rights, but will maintain their own.

"Resolved, That we recommend the adoption of a similar policy to the people of all of the States of the Union, ready and willing to aid; and also, a thorough concert and co-operation among them, through committees of correspondence, on this subject.

"Resolved, That an executive committee of seven, viz., J. C. Vaughn, Mark Skinner, George W. Dole, I. N. Arnold, N. B. Judd and E. I. Tinkham, be appointed with full powers to carry into execution these resolutions.

"Resolved, That Tuthill King, R. M. Hough, C. B. Waite, J. H. Dunham, Dr. Gibbs, J. T. Ryerson and W. B. Egan be a finance committee to raise and distribute material aid."

Following the reading of the resolutions, they were seconded by Peter Page, and passed amidst the most enthusiastic and prolonged cheering.

Next Hon. W. B. Egan, one of the most eloquent Irish orators of the city, spoke to his Irish fellow-citizens, rousing them to the highest pitch of excitement.

The president then introduced Colonel James M. Lane, of Kansas. As he rose up and came forward, he was greeted with an outburst of applause from the crowd that continued for some minutes, during which time he stood statue-like, with mouth firm set, gazing with those wondrous eyes down into the very heart of the excited throng. Before the applause had subsided sufficiently for his voice to be heard, the fascinating spell of his presence had already seized upon the whole vast audience, and for the next hour he controlled its every emotion—moving to tears, to anger, to laughter, to scorn, to the wildest enthusiasm, at his will. No man of his time possessed such magnetic power over a vast miscellaneous assembly of men as he. With two possible exceptions (Patrick Henry and S. S. Prentiss), no American orator ever equaled him in effective stump-speaking, or in the irresistible power by which he held his audiences in absolute control. On that night he was at his best. It was doubtless the ablest and most effective oratorical effort of his life. No full report of it was given at the time. One of the hundreds of young men made Kansas-crazy by the speech, and who forthwith left all and followed him to Kansas, thus wrote of it twenty years after:†

"He was fresh from the scenes of dispute in the belligerent Territory. He made a characteristic speech, teeming with invective extravagance, impetuosity, denunciation, and eloquence. The grass on the prairie is swayed no more easily by the winds than was this vast assemblage by the utterances of this speaker. They saw the contenting factions in the Territory

* The plan here adopted of sending in emigrants, provisioned for one year, as well as that subsequently adopted of arming them for self-defense, did not originate at this meeting. It was a Southern idea, first conceived early in March, by Major Buford, of South Carolina, adopted by most Southern Emigrant Aid societies in the South, and practically carried out before a company was ever raised, provisioned or armed by any Northern organization. Early in April, Buford's "regiment," as it was called, was in Kansas. Other parties, armed and "provisioned for a year" (nominally so—the promises were not fulfilled) came in during the first half of May from other Southern States. More than half of the military posse organized for the sacking of Lawrence had recently arrived from the South, armed and "promised" "provision for a year," on the sworn allegiance to the slave powers.

† Colonel S. S. Prouty.

through his glasses. The Pro-slavery party appeared like demons and assassins; the Free-state party like heroes and martyrs. He infused them with his warlike spirit and enthusiastic ardor for the practical champions of the freedom. Their response to his appeals for succor for the struggling freemen was immediate and decisive."

It is doubtful if the writer of the above, or any other of the ten thousand hearers of that night, can recall a single sentence of his speech. The emotions aroused were so overwhelming as to entirely obliterate from memory the spoken words. A few broken extracts are preserved below. He began:

"I have been sent by the people of Kansas to plead their cause before the people of the North. Most persons have a very erroneous idea of the people of Kansas. They think they are mostly from Massachusetts. They are really more than nine-tenths from the Northwestern States. There are more men from Ohio, Illinois and Indiana than from all New England and New York combined."

Speaking of the President, he said:

"Of Franklin Pierce I have a right to talk as I please, having made more than one hundred speeches advocating his election, and having also, as one of the electors of Indiana, cast the electoral vote of that State for him. Frank was, in part, the creature of my own hands; and a pretty job they made of it. The one pre-eminent wish of mine now is that Frank may be hurled from the White House; and that the nine memorials sent him from the outraged citizens of Kansas detailing their wrongs, may be dragged out of his iron box."

Of the climate of Kansas, he said:

"Kansas is the Italy of America. The corn and the vine grow there so gloriously that they seem to be glad and to thank the farmers for planting them. It is a climate like that of Illinois, but milder. Invalids, instead of going to Italy, when the country became known, would go to Kansas, to gather new life beneath its fair sky and balmy airs. The wild grapes of Kansas are as large and luscious as those that grow in the vineyards of Southern France."

He alluded to Colonel W. H. Bissell, then the Republican candidate for Governor of Illinois, as follows:

"It is true I was side by side with your gallant and noble Bissell at Buena Vista and in Congress. I wish I could describe to you the scene on the morning preceding that glorious battle. On a ridge stood Clay, Bissell, McKee, Hardin and myself. Before us were twenty thousand armed enemies. It was a beautiful morning, and the sun shone bright upon the polished lances and muskets of the enemy, and their banners waved proudly in the breeze. In our rear the lofty mountains reached skyward, and their bases swarmed with enemies ready to rob the dead and murder the wounded when the battle was over. Around us stood five ragged regiments of volunteers, two from Illinois, two from Indiana, and one from Kentucky; they were bone of your bone, blood of your blood, and it was only when you were near enough to look into their eyes that you could see the d—I was in them. It did not then occur to them that I should be indicted for treason because I loved liberty better than slavery."

He then gave a warm and glowing tribute to Colonel Bissell, his brother-in-arms.

Then followed a most vivid and awful narrative of the outrages perpetrated upon the free-State men by the Missouri ruffians; so vivid that the Ossawatimie murders seemed but merited retaliation, and most sweet revenge to his excited hearers.

"The Missourians [said he] poured over the border in thousands, with bowie knives in their boots, their belts bristling with revolvers, their guns upon their shoulders, and three gallons of whisky per vote in their wagons. When asked where they came from their reply was, 'From Missouri;' when asked, 'What are you here for?' their reply was, 'Come to vote.' If any one should go there and attempt to deny these things, or apologize for them, the Missourians would spit upon him. They claim to own Kansas, to have a right to vote there and to make its laws, and to say what its institutions shall be."

Colonel Lane held up the volume of the statutes of Kansas; then proceeded to read from it, commenting as he read:

"The Legislature first passed acts virtually repealing the larger portion of the Constitution of the United States, and then repealed, as coolly as one would take a chew of tobacco, provisions of the Kansas-Nebraska bill. Of this bill I have a right to speak—God forgive me for so enormous and dreadful a political sin—I voted for the bill. I thought the people were to have the right to form their own institutions, and went to Kansas to organize the Democratic party there, and make the State Democratic, but the Missouri invaders poured in—the ballot boxes were desecrated—the bogus Legislature was elected by armed mobs—you know the rest.

"The pro-slavery fragment of the Democratic party talk much about Know-nothingism. It is their song day and night. Well, these Kansas law-makers have gone to work and repealed at once the clause in the Nebraska bill that gave the right to foreigners to vote in Kansas on declaring their intention to become citizens, and made it requisite for them to have lived in the Territory five years, and to take the final oath; and at the same time they made all Indians who adopted the habits of white men voters at once. And what was the distinguishing habit of white men? Why, it was understood to be drinking whisky. All that was necessary to naturalize a Kansas Indian was to get him drunk. What Know-nothing lodge ever went so far in their nativism as this?—made foreigners in the Territory wait five years to become citizens, and enfranchised the drunken, thieving Indians at once, one and all!

"The pro-slavery fragment of the Democratic party also delights in the term 'nigger-worshiper,' to designate Free-state men. I will show you that these Pro-slavery men are, of all nigger-worshipers, the most abject. According to the Kansas code [Colonel Lane read from the book, giving page and section], if a person kidnaps a white child the utmost penalty is six months in jail—if a nigger baby, the penalty is death. Who worships niggers, and slave nigger babies at that? To kidnap a white child into slavery—six months in jail—to kidnap a nigger into freedom—death!"

He concluded his scathing review of the infamous code as follows:

"Is there an Illinoisan who says enforce these monstrous iniquities called laws? Show me the man! The people of Kansas never will obey them. They are being butchered, and one and all will die first! As for myself, I am going back to Kansas, where there is an indictment pending against me for high treason. Were the rope about my neck, I would say that as to the Kansas code it shall not be enforced—*never!*—NEVER!"

Following, he argued, elaborately and conclusively, the right of Kansas to come into the Union as a free State "now." He closed his speech with a detailed account of the murders and outrages perpetrated upon the free-State settlers, given with a masterly power of

tragic delineation which brought each particular horror, blood-red and distinct, before the eyes of the excited throng. He knew of fourteen cases of tar and feathering—"the most awful and humiliating outrage ever inflicted on man." He told of Dow, shot dead while holding up his hands as a sign of his defenselessness; lying, like a dead dog, in the road all the long day, until in the evening his friends found his body, dabbled in his life blood, and bore it away; Barber, unarmed, shot on the highway, brought dead to Lawrence, where his frantic wife, a childless widow, 'mid shrieks of anguish, kissed the pallid lips that to her were silent evermore; Brown, stabbed, pounded, hacked with a hatchet, bleeding and dying, kicked into the presence of his wife, where in agony he breathed out his life—she, now a maniac."

A voice from the crowd called, "Who was Brown?" Lane continued:

"Brown was as gallant a spirit as ever went to his God! And a Democrat at that—not one of the Pro-slavery fragment, though. For the blood of free men shed on the soil of Kansas—for the blood now flowing in the streets of Lawrence—for every drop which has been shed since the people asked to be admitted as a State, the Administration is responsible. Before God and this people I arraign Frank Pierce as a murderer!

"In conclusion I have only this to say: The people of Kansas have undying faith in the justice of their cause—in the eternal life of the truths maintained—and they ask the people of Illinois to do for them that which seems to them just."

The Chicago Tribune, in its report of the meeting, June 2, says:

"We regret we can only give a meager outline of the eloquent and telling effort of Colonel Lane. He was listened to with the deepest interest and attention by the vast throng, and as he detailed the series of infamous outrages inflicted upon the freemen of Kansas, the people were breathless with mortification and anger, or wild with enthusiasm to avenge those wrongs. During Colonel Lane's address, he was often interrupted by the wildest applause, or by deep groans for Pierce, Douglas, Atchison, and the dough-faces and ruffians who had oppressed Kansas; and by cheers for Sumner, Robinson, and other noble men, who have dared and suffered for liberty. * * * Language is inadequate to give the reader a conception of the effect of the recital of that tale of woe which men from Kansas had to tell; the flashing eyes, the rigid muscles, and the frowning brows told a story to the looker-on that types cannot repeat. From the fact that the immense crowd kept their feet from eight till twelve o'clock, that even then they were unwilling the speakers should cease, or that the contributions should stop; from the fact that workingmen, who have only the wages of the day for the purchase of the day's bread, emptied the contents of their pockets into the general fund; that sailors threw in their earnings; that widows sent up their savings; that boys contributed their pence; that those who had no money gave what they had to spare; that those who had nothing to give offered to go as settlers and do their duty to Freedom on that now consecrated soil; that every bold declaration for liberty, every allusion to the Revolution of 1776, and to the possibility that the battles of that period were to be fought over again in Kansas, were received as those things most to be desired—something of the tone and temper of the meeting may be imagined. * * * The effect of the meeting will be felt in deeds. Be the consequences what they may, the men of Illinois are resolved to act.

* * * Take it with its attending circumstances—the shortness of the notice, the character of the assembled multitude, and the work which was accomplished—it was the most remarkable meeting ever held in the State. We believe it will inaugurate a new era in Illinois. We believe it is the precursor of the liberation of Kansas from the hand of the oppressor, and of an all-pervading political revolution at home.

“About half-past twelve, Sunday having come, the meeting unwilling adjourned, and the crowd reluctantly went home. At a later hour, the Star Spangled Banner and the Marseillaise, sung by bands of men whose hearts were full of the spirit or these magnificent hymns, were the only evidences of the event that we have endeavored to describe.”

The subscriptions in money, given by upward of two hundred different persons and firms, in sums ranging in amount from \$500 down to ten cents—the latter sum being given by a boy, all he had—amounted to over \$15,000. In addition were given the following utensils and supplies, for the use and comfort of the emigrants. The names of the donors and explanatory notes are given, as reported:

F. R. Gardiner, six rifles, three with double barrels, sure at each pop.

Major Van Horn, one sixteen shooter.

C. W. Davenport, one six-shooter, and ten pounds of balls.

An editor and a lawyer, four Sharpe's rifles and themselves.

D. G. Park, one can of dry powder.

C. H. Whitney, one revolver.

J. M. Isaacks, one Sharpe's rifle.

G. M. Jerome, Iowa City, one rifle.

A. S. Clarke, one Sharpe's rifle.

J. A. Barney, one rifle.

H. A. Blakesley, one rifle.

W. H. Clark, one double-barreled rifle and \$10.

J. A. Graves, one Sharpe's rifle.

Frank Hanson, one double-barreled gun and \$25.

A German, one pair of pistols.

J. H. Hughes, one Colt's revolver.

F. M. Chapman, one horse.

Urhlau & Sattler, three revolvers.

This meeting, although not the first of a like character held in the Northwest during that spring, was remarkable as being the first great outburst of enthusiasm, which, breaking local bounds, spread to every town and hamlet from the Mississippi to the Atlantic coast. It was the “little cloud no larger than a man's hand” which forthwith spread over the whole heavens, and out of it came money, and arms, and ammunition, and a ceaseless tide of emigrants and troops of armed men—all setting Kansasward. Out of it came “Lane's Army of the North,” in the imagination of the frightened pro-slavery Kansans and Missourians, “a mighty host, terrible with banners,” coming, in uncertain but irresistible force, by a route indefinitely defined as from the North, to sweep as with the besom of destruction, the Territory clean of the Territorial laws, and every man who had advocated their enforcement. The army proved neither so numerous in numbers nor so terrible in its vengeful visitations on the pro-slavery settlers, as to justify their fearful apprehensions; nevertheless, its heralded approach inspired the free-State settlers with renewed courage, opened a new path of immigration into the Territory, and proved one of the many great moral forces which brought victory and peace at last.

The exciting campaigns of 1858-60 will furnish a fit beginning, in the succeeding volume, to the exciting

period of the Rebellion, and the succeeding years of peace, during which the Republican party held undisputed sway in Chicago, and throughout the Nation.

LOCAL POLITICS.

At the municipal elections, party lines were not always strictly drawn. Through the long uninterrupted predominance of the Democratic party, several Whig mayors were elected, and, in one case a Know-nothing, much to the surprise of both parties. Below is given the names and political affiliations of the mayors of Chicago, from 1837 to 1858:

1837, William B. Ogden, Democrat.

1838, Buckner S. Morris, Whig.

1839, Benjamin W. Raymond, Whig

1840, Alexander Loyd, Democrat.

1841, Francis C. Sherman, Democrat.

1842, Benjamin W. Raymond, Democrat.

1843, Augustus Garrett, Democrat.

1844, Augustus Garrett, Democrat.

1844, Alson S. Sherman. *

1845, Augustus Garrett, Democrat.

1846, John P. Chapin, Whig.

1847, James Curtiss, Democrat.

1848, James H. Woodworth, Democrat.

1849, James H. Woodworth, Democrat.

1850, James Curtiss, Democrat.

1851, Walter S. Gurnee, Democrat.

1852, Walter S. Gurnee, Democrat.

1853, Charles M. Gray, Democrat.

1854, Isaac L. Milliken, Democrat.

1855, Dr. Levi D. Boone, formerly a Democrat, elected on the Know-nothing ticket.

1856, Thomas Dyer, Democrat.

1857, John Wentworth, Republican-Fusionist (so styled), received five thousand nine hundred and thirty-three votes, against four thousand one hundred and thirty-two votes cast for Carver.

There were few local excitements of sufficient importance to be historic. In 1840 the papers noted at the general election, great excitement and many arrests—no bloodshed.

The most notable local political disturbance occurred during the administration of Mayor Boone, the successful Know-nothing candidate. High license for saloons came in that year to intensify the local excitement.

Under the peculiar stress brought upon Dr. Boone and his administration, through the prejudice of foreign voters, and the high license law that was started at that time, he found himself confronted by a mob quite early in his administration. The story was told years after in the Chicago Times, August 5, 1877, as quoted below:

“The riot occurred in 1855, nearly the middle period between the beginning and now. Chronologically it is the great ‘divide,’ at least for the present, but by and by time will lengthen the hither end out of all proportion, and when the last old settler departs, who

“ ‘Was there all the while
At the battle of the Nile.’

this now-famous time would live only in history. But hold! not even there, unless the Sunday Times rescues it from oblivion, which it now proposes doing.

“The records of that affair are now only to be found in the memories of participants. All other data were destroyed by the great fire. By and by these participants will all have disappeared, and then what is left will

* The first municipal election was declared invalid, one of the judges never having been naturalized. At the second election Sherman was declared elected.

be merely, 'What I used to hear my father tell about that affair'—exceedingly unreliable stuff, after passing through one, and, perhaps, even two defective memories.

"Just now reminiscences of that old time ruction, in view of the new, still partly on hand, cannot fail to be read with interest, and it is important that the data should now be gathered while the leading participants are still with unimpaired memories among the living. Dr. L. D. Boone was the Mayor of that period. 'In Mayor Boone's time' is a remark very common among old settlers. It was one of the hottest and most un-reasoning political periods in the history of the country. Passion ran high on all sides. The temperance question was alive; the Catholic question almost precipitated a religious war, and Know-nothingism hung on the outer wall a banner inscribed, 'Put none but Americans on guard.' Each one of these questions was well calculated to rouse the very worst passions, and under this stimulus sprang up a generation of b'hoys that, until the war of the Rebellion, were the terror of all large American cities.

"Venerable Dr. Boone, who now in his mellow old age enjoys a glass of beer when mixed with Thomas's orchestra music, as well as the next man, was the Know-nothing or American party candidate for mayor, and was elected. This event took place in March, 1855. During the preceding winter the Legislature had passed a stringent temperance law, to be submitted to the people for ratification or rejection. Mayor Boone believed—and for this he had apparently the best of reason—that the act would be ratified by a large majority, and appreciating that an abrupt passage from unlimited beer to no beer would be a trial that no well-regulated Teuton could undergo with equanimity, he determined, as a measure for the good of the community to smooth the way by degrees, and thus effect the transition by such easy stages that, metaphorically speaking, the Nord Seite would pass the Rubicon with no more discomfort than it now experiences in crossing the river by way of the LaSalle-street tunnel.

"The historian for the Sunday Times had the pleasure of an interview with Dr. Boone during the past week, in which the ex-Mayor took occasion to remark that his actions at that time were considerably misunderstood, and were still misunderstood, as he had never taken occasion to correct false impressions. The Doctor then stated what has been mentioned, that he believed the temperance law was again to become a fact and what he did he did conscientiously, as he believed, for the good of the whole community, and not on fanatical grounds.

"What he did do was, as soon as he was inducted into the office of Mayor, to recommend to the Council that the license fee be raised from \$50 per annum, to the rate of \$300 per annum, but that no license be issued for a longer period than three months. This he believed to be a wise measure of precaution, since it would root out all the lower class of dives, and leave the business in the hands of the better class of saloon-keepers, who, when the temperance law should go into force, could be rationally dealt with. But the saloon element failed to see this measure by the same candle that Mayor Boone saw it. They regarded the ordinance in the light of oppression and nothing else, and banded together to defeat its object. The city government at this time was completely in the hands of the Native American party, and the Mayor and the Council had no fear of defeat, the more so as the adage, 'to the victor belongs the spoils,' had been so systematically carried

out that every man of the eighty or ninety patrolmen on the force was a native American.

"As soon as the ordinance was passed resistance was agitated. The Nord Seite was in a state of ferment. It was argued, and not without some show of truth, that the boasted equal rights guaranteed by the constitution was a cheat and a fraud, and that if foreigners did not then and there die in the last ditch in behalf of their liberties, there would soon be instituted for the white alien a system of slavery as abject as the negro's servitude on the Southern plantation.

"One need not go over the whole ground to know what was said at that time. The imaginative orator was there, as he is everywhere, and if he failed in his duty it was not for want of a fruitful theme. But he he did not fail, and he fired the Teuton heart to a point where it was literally self-consuming, and other hearts—a la Beecher—such as beat in Irish and Scandinavian bosoms ached in earnest sympathy, though the demonstrations that ensued were principally of Teutonic origin.

"At the period that this stringent and almost prohibitory license ordinance was sought to be enforced, there was also among the municipal regulations a Sunday law, and this dead letter was sought to have the breath of life blown into it at the same time. Accordingly the persecution was of a two-fold character, and the Teuton's cup of bitterness literally overflowed. He determined to rebel. He did rebel. But the revolt was short-lived. Clubs proved trumps.

"Mayor Boone had been running the municipal machine but a few weeks when in the neighborhood of two hundred saloon-keepers were arrested, and some of them 'jugged,' and others held to bail for trial on the charge, either for selling liquor without a license or for violation of the Sunday ordinance. When the saloon interest was attacked, the victims made common cause, and one attorney represented the entire batch. Between this attorney and the City Attorney it was agreed to try a sample case, and let the rest take the course set by that precedent. This case was called on the 21st of April. Squire Henry L. Rucker—a street was named in his honor—was the Police Magistrate of that period, and his court-room was in the court-house proper. About 10 o'clock, a few moments after the case had been called up for trial, at tremendous commotion ensued in and about the court-house. The saloon interest had massed itself in a solid body on the North Side, especially the two hundred under bonds, and having secured a fife and drum, they proceeded to make a forced march on the court-house. With a tremendous racket they entered the sacred precincts of justice. The fife screeched, the drum rattled, beery throats uttered guttural and unintelligible oaths, and there was the deuce to pay generally. This mob was bent on intimidation. Having, as they supposed, exercised a certain amount of 'moral' influence on the court, the mob gathered in force at the intersection of Randolph and Clark streets, and literally obstructed both thoroughfares opposite the Sherman House. C. P. Bradley was Chief of Police at that time, and Darius Knights, now at the head of the sewage department of the city, was the Marshal. Both were men of force and not to be trifled with. Luther Nichols—who came with General Scott in 1832, has been a resident of Chicago ever since, and is now the oldest continuous resident in the city—was the captain of police. When the mob had completely blocked the before-mentioned thoroughfares, Captain Nichols hurried to Mayor Boone for orders. 'What

shall I do?' queried he. 'Clear the streets and disperse the mob,' was Mayor Boone's answer, and the order was obeyed without any serious consequences. Several who made efforts at resistance were arrested. All this happened in the forenoon. The mob having dispersed, quiet reigned 'down town,' but it was one of those calms that precede a storm. Both sides were getting ready for a desperate struggle. While the saloon interest on the North Side were marshaling its forces, for the declared object of rescuing the prisoners in the hands of the officers, Mayor Boone was energetically strengthening his position by swearing into service an extra force of one hundred and fifty policemen, thus placing an effective force of nearly two hundred and fifty men at his command.

"About three o'clock the mob was sufficiently organized to proceed, and accordingly made its way along North Clark Street to the bridge. A part got across, but a considerable portion was cut off by a strategic movement on the part of the bridge-tender. It appears that the rioters became somewhat separated, one part preceded the other a short distance, and as soon as the first batch was across, the tender swung his bridge to an open.

"Then a curious parley ensued. The Teutons raved and swore, and threatened to shoot, while the bridge-tender yelled back that he was acting under orders from the Mayor, and that he could not accommodate his fellow-citizens with a passage until the mayoral order was countermanded. The Mayor was communicated with, and finally word was sent to turn the bridge. Then the mob swarmed across, only to meet a solid phalanx of police. The reason Mayor Boone consented to the turning of the bridge was that he felt confident that his arrangements were equal to any emergency, and so they proved.

"Without much ado the mob and the peelers came into collision. The leaders of the mob cried, 'Pick out the stars!' 'Shoot the police!' Immediately a brisk fire was opened, and for a short time things were exceedingly lively round about the Sherman House. Quite a number of rioters were seriously wounded, but so far as can be definitely ascertained, only one was killed, though a few days later there were several mysterious funerals on the North Side, and it was generally believed that the rioters gave certain victims secret burial, the regulation with reference to permits not being quite as strict then as now.

"A stalwart Teuton leveled a double-barreled shotgun at Officer Hunt, and blew off his left arm. The action was observed by Sheriff Andrews, who directed a young man named Frazer, standing by his side, to return the fire. He did so, and brought down his man. So far as known this was the single fatality of the day. Subsequently those in sympathy with the rioters had Frazer arrested, but the Sheriff put a quietus on that effort by averring that the shot was fired at his express order. Officer Hunt is still a member of the police force. He is at present detailed for special duty in connection with the Comptroller's office, and attends to show-licenses and other matters of that sort. At Mayor Boone's suggestion the City Council voted him the snug sum of \$3,000, and he still, after a lapse of twenty-two years, has that amount on interest, with Dr. Boone as his financial agent.

"The riot was ostensibly set on foot to release certain compatriots from jail. But it turned out to have a contrary effect, and instead of releasing any it added sixty to the number already 'jugged.' The event of the day created intense excitement throughout the

city, and as an aid to the police the military were called out, the said military consisting of an Irish company known as Montgomery Guards—relics of which were maintained up to quite a late period; an American company known as the Chicago Light Guards, a dragoon company, and a battery of two guns under command of the then prominent banker, R. K. Swift. The latter is said to have cut rather a bad figure during the trouble. He responded with his two guns, but was at a loss what to do. Mayor Boone requested him to protect the courthouse with his artillery, but the financial shootist claimed that it could not be done, since he could at the most protect but two sides at the same time. His honor, therefore, drew for him a little diagram, demonstrating that by placing one gun at the corner of La Salle and Washington streets, and the other at the corner of Randolph and Clark, he would be able to command all the approaches to the square. As soon as Swift became aware that the thing was practicable, he washed his hands of the whole affair, and left the guns in charge of his lieutenant, who was really an able officer, and would have thoroughly demonstrated the practicability of the Mayor's views, had the mob given him an opportunity. But the mob kept quiet thereafter. The one dose, well and quickly applied, was all-sufficient. Bad blood was rampant in those days, and street broils were exceedingly common. But Mayor Boone, being a man of nerve and decision, took the riotous bull by the horns, the moment he made his appearance, and knocked the brute insensible at the first blow.

"It was fortunate for Chicago at that trying period that the government was in excellent hands. For putting down a mob few could compare with C. P. Bradley and Darius Knights, men of the stanchest nerve."

Following are personal sketches of the mayors who served the city up to 1858, from the inauguration of city government in 1837:

WILLIAM B. OGDEN.—It has been the good fortune of Chicago to have possessed from the beginning a large number of public spirited citizens, and it is to them in greater measure than is often accorded, that the prosperity of the city is due. Early perceiving its great natural advantages, they supplemented those with the splendid enterprises and works that have made Chicago what it is. In the history of the progress and development of the city, the names of these honored citizens must always hold a foremost place, and chief among them stands the name of William B. Ogden. For nearly half a century, his time, his thought, his wise foresight and his prudent counsel were all given, and cheerfully given, to the building up and development of the great city, which he early saw would be the gateway and exchange of the Northwest. The mere enumeration of the great works and enterprises in which he was engaged, the most of which his mind conceived and his hand executed is enough to daze the ordinary mind. He advocated and helped to construct the Illinois & Michigan Canal. He built the first railroad that entered the city. He projected and constructed thousands of miles of that railway system which pours into the lap of Chicago the wealth and commerce of more than ten States. He possessed in a wonderful degree the American characteristics of hopefulness and self-reliance. Coming to Chicago when still a young man, while as yet the Indian paddled his canoe on Lake Michigan, or chased the deer over the prairies, and the nightly howling of wolves disturbed the repose of Chicago's first settlers, his prescient mind took in the future development of the great Northwest. When he first stood upon the shore of

Lake Michigan, there were scarce five thousand persons between that shore and the Pacific, and he lived to see it teeming with a population of ten million souls. He was a born leader of men. It has been said of General Jackson, that if he was thrown with a number of men and any emergency should arise requiring a commander that all would instinctively turn to him and obey him. Mr. Ogden possessed the same characteristic and was regarded in the same way. He was the first Mayor of Chicago;* the first president of Rush Medical College; the president of the Chicago & Galena Union Railroad; of the National Pacific Railroad Convention held in Philadelphia in 1850; of the Illinois & Wisconsin Railroad Company; of the Buffalo & Mississippi Railroad Company; of the Chicago Branch of the State Bank of Illinois; of the board of sewerage commissioners of the city of Chicago; of the board of trustees of the University of Chicago; and he was the first president of the Union Pacific Railroad Company. Nor was he a mere figure-head in these great enterprises, but to all of them he contributed his time, his thought, his active exertion and his money. He foresaw the vast importance and

W. A. Ogden

value of the reaping machine to the Western prairies; and was early engaged in introducing it into extensive use throughout the West. He became interested with Mr. McCormick in the first large factory for their manufacture, and it was at Mr. Ogden's suggestion that the reaper was sent to England in 1851, which took the prize at the London Exhibition. He was a man of commanding presence, and cast in a mold of generous

* For sketch of Buckner S. Morris, second Mayor of Chicago, see "Bench and Bar."

nobility. All whom he met accorded him at once their respect and confidence. In his commerce with mankind, whether with the high or the humble, he was always a courteous gentleman. He was the contemporary of, and lived on terms of intimacy with, some of the greatest men our country has produced, and though his life was mainly devoted to business, in comprehensive grasp of mind, in nobility of character, in all that goes to make the perfect citizen and the useful man, he was the peer of all. He was born on the 15th of June, 1805, in the town of Walton, Delaware Co., N. Y. His grandfather had been an officer in the Revolutionary War, and belonged to the Ogden family of Eastern New Jersey. Some time after the war he removed with a small colony of other officers and their families to the wild and picturesque region of Delaware County. Here a settlement was formed in the unbroken forest, and though the homes were rude, they were characterized by culture and a genuine hospitality. Amid such surroundings William was born and the first years of his life passed. He was born a pioneer, and he possessed the spirit of adventure and enterprise that belongs to the pioneer. Fond of athletic sports, he early became an adept with the rifle, and his boyhood was spent in learning the mysteries of wood-craft. Nor did he lose his natural taste for books and intellectual pursuits. His father's means warranted him in looking forward to one of the liberal professions for his career in life, and having chosen the law, he commenced his academic studies. But his hopes were rudely shattered by the sudden ill-health and subsequent death of his father, and when little more than sixteen years of age he found himself the mainstay and support of his mother and his younger brother and sisters. From this responsibility he did not shrink, and though the chosen avenue of life was closed to him, he knew that others would open to the faithful, honest and industrious worker. In the busy working-day world he did not intend to be a drone. The first years of his business life were moderately successful, but did not satisfy his ambition, and he began to cast about for other fields of labor, where the reward would be more in proportion to the enterprise. In the meantime, however, he did not cease to take an active interest in the public affairs of his native country, and in 1834 his fellow-citizens elected him to the Legislature of New York. The most notable thing in his legislative career was his advocacy of the New York & Erie Railroad, then lately projected, and which was seeking State aid in its construction. Though he was not thirty years of age, he made a wise and prophetic speech, urging upon the Legislature the importance of timely aid to the great enterprise. Though the measure did not pass at that session the following year the aid was granted. But he still desired a wider theater for his operations and ambition, and in 1835 he removed to Chicago as the representative of a number of Eastern capitalists who, associated under the name of the American Land Company, were making large investments in Chicago town lots, and other Western lands. Here he established a loan and trust agency, and commenced those vast operations and enterprises which resulted in making a small city a great one. His success was not unbroken, and the financial depression of 1837 found him unprepared for the storm, mainly through his attempt to carry others. But he bravely struggled through, and after several years of unwearying exertion, he came out with untarnished name and credit. Those were indeed days of depression, discouragement and gloom. The vision of the future greatness seemed to depart from Chicago forever, and the luckless holders of corner lots loathed

the very sight of their possessions, and could not even give their lots away. Men subsequently became millionaires, because they could not sell their land at any price during those days of desolation and despair. But if many lost faith, Ogden did not, and throughout all those trying years from 1837 to 1843 maintained a bold and courageous front. On the incorporation of the city in 1837 Ogden was elect Mayor, over John H. Kinzie, the Whig candidate. In all matters of public improvement he was untiring and zealous, and where it was possible always sought to place such improvements on a solid and enduring basis. Many street improvements he made at his own or the expense of those associated with him in his town property.

But the several years following 1837 were years of trouble. The prosperity of Chicago received a check, as did that of Illinois and the whole country. Business was prostrated. But worse than that; the State had embarked its credit in a vast system of internal improvement, too costly for the time. The canal was abandoned, work on the railroad ceased; the State could pay no longer and was bankrupt. The debtors were in a vast majority and it was hard to pay debts, much harder to pay taxes. Then went up the coward and despairing cry of "Repudiation"—"Let us have stay laws, relief laws, anything to save us from our bitter enemies, the creditors!" Throughout the city and throughout the State only the wild and senseless clamor of repudiation was heard. In the city a meeting was called by frightened debtors and some demagogues, to take measures looking to the repudiation of the city debt. Inflammatory speeches greatly excited and made desperate many of the crowd, and everything looked as if dishonor would crown the city's brow. In the midst of the excitement Mr. Ogden stepped forward to address the crowd. The sentiment in favor of repudiation appeared to be overwhelming, and it seemed like madness to endeavor to stay the whirlwind of desperation that was determined to sweep all before it. But he was equal to the great occasion. In a few well-chosen sentences he exhorted the citizens not to commit the folly of proclaiming their own dishonor. He besought those who were embarrassed to bear up against adverse circumstances with the courage of men, remembering that no misfortune was so great as personal dishonor. That it were better to conceal misfortune than to proclaim it: that many a fortress had been saved by the courage of its inmates in concealing their weakness. "Above all things, do not tarnish the honor of our infant city." His eloquence prevailed, and to him, more than to any other one man is due the fact that the city's credit was saved. Nay more than that: the example of that time became a guide and a tradition, and to it we owe that high sense of honor and financial integrity which has preserved the city's good name and fame against the schemes of all subsequent repudiators. Mr. Ogden's influence in this respect was felt throughout the State, and the honor of Illinois as well as of Chicago was saved. There can be no brighter page in any man's history than that which contains such a story as this. But this was not the only occasion when Mr. Ogden's power as an orator changed the temper of an angry and excited crowd. It was when he was building one of his Wisconsin railroads. He and others had obtained large stock subscriptions from the farmers and villagers along the line. Hard times came on, the road was not completed, but the subscriptions had all been paid. The people began to think they had been swindled, and Mr. Ogden was denounced as the chief offender. Threats against his life were made if he

should ever show himself in the country again. He heard of these threats, and against the counsel of his friends he called a public meeting and announced that he would address the people. A crowd of excited men gathered together, ready for almost any act of violence. He was received with hisses and groans, and at first could hardly be heard, but he appealed to their sense of fair play so effectively that at last they began to listen. Clearly and cogently he related the facts; spoke of his own losses and sacrifices; how unavoidably the work had been delayed. Then he showed what would be the effect of the completed road; how it would bring a market to every farmer's door, and would treble the value of every farm, and that if they would be patient a little longer all would be well. After he had finished a committee was appointed to wait on him, not to lynch him, but to say: "Mr. Ogden, we are authorized by the farmers and the stockholders along the road, to say, if you wish it, we will double our subscriptions." Another display of his oratory was exhibited on a more pleasing occasion. In 1839 Oliver Newberry built a magnificent steamboat, and called it the Illinois. It was a Chicago steamer, and the citizens of Chicago determined to present it with a splendid flag worthy of such a vessel, and Mr. Ogden was selected to make the presentation speech. It was a beautiful day in summer, and the whole city turned out *en masse* to witness the spectacle. General Scott was present on the occasion. Standing on the deck of the steamer, General Scott by his side, and the commander of the vessel, Captain Blake, and the owner, Mr. Newberry, in front of him, Mr. Ogden commenced by speaking of the "splendid specimen of naval architecture" on which he stood, and of his pleasure in being the organ of presenting the appropriate gift to the steamer bearing the name of our State. He spoke of the wonderful advance our country was making, of the enlarged means of communication between the East and the West, binding together the Hudson, the Great Lakes and the Mississippi. He spoke of the prairie fires as the "Pillar of fire by night" lighting the path of Empire on its Western way. He paid a glowing tribute to the memory of Robert Fulton, but for whose genius the lake and the prairie around it would have still remained in the solitude of nature. Then turning to Captain Blake and unfurling the silken banner, he said: "We present to you our country's flag. To you it is no stranger; under a most valiant chief [bowing to General Scott] whom a grateful people have not forgot to praise, bravely and honorably have you defended it in war. Stand by it in peace. Stand by it forever." To recount the labors of Mr. Ogden in connection with the railroads of the Northwest would be to write a volume. He was called the "Railway King of the West." East, West and South he pressed his railroad enterprises, and it was his desire to bring every farm in the Northwest within reach of a road. It was in April, 1849, that the first locomotive started west from Chicago. It drew a train ten miles from the city. It was the earnest of Chicago's greatness. That road was built by William B. Ogden. The panic of 1857 found Mr. Ogden heavily obligated as endorser for the Chicago, St. Paul & Fond du Lac Railroad Company, but he weathered the storm successfully, without loss, and without assistance from the hosts of friends who tendered him almost unlimited means during those trying times. It was at this time that a Scotch nobleman sent him the following note:

"My dear Mr. Ogden:—I hear you are in trouble. I have placed to your credit in New York £100,000. If you get through I know you will return it; if you don't, Jeanie and I will never miss it."

Although this princely liberality was not accepted, it will always remain a gratifying exhibition of the esteem and confidence which Mr. Ogden inspired in those who knew him. Mr. Ogden was one of the chief organizers of the Chicago & Northwestern Railway Company in 1859, now one of the largest, if not the largest railway corporation in the United States. In 1856 he organized a lumber company on the Peshtigo River in Wisconsin, purchased immense tracts of pine lands, erected extensive mills and factories and built up at the mouth of the river on Green Bay a thriving village. In 1860 he purchased at Brady's Bend, on the Alleghany River, in Pennsylvania, some fivethousand acres of iron and coal land, and organized the Brady's Bend Iron Company, with a capital of \$2,000,000. This company employed over six hundred men in their furnaces and mills and turned out year after year over two hundred tons of rails daily. When the Union Pacific Railroad Company was organized, under the act of Congress in 1862, Mr. Ogden was chosen its first president, but his other enterprises induced him subsequently to retire from the presidency, though he remained a director, and gave what service was possible to the construction of the road. In June, 1868, he retired from the presidency of the Chicago & Northwestern Railway Company, with some of the lines of which he had been connected for a period of twenty-one years. At a meeting of the stockholders on that occasion, this resolution was adopted: "Resolved, That his [W. B. Ogden's] connection with this company dating back for a period of twenty-one years, his disinterested labors in its behalf without fee or reward during the whole time, the benefit he has conferred upon it, and the country demand our grateful acknowledgement, and we hereby tender him our warmest thanks for his long services, and our best wishes for his long continued health and prosperity." Politically he was known as a Democrat. As such he was elected to the New York Legislature, and as Mayor of Chicago. When the slavery question arose, he identified himself with the free-soil party, and in 1848 supported the Van Buren and Adams ticket. In 1860 he supported Mr. Lincoln, and was elected to the Illinois Senate on the same ticket. He favored the war for the Union, but was opposed to the emancipation proclamation and the policy of the administration, and this led him finally to antagonize the Republican party. The later years of his life were spent largely in New York. At his villa of Boscobel, on the Harlem River, he dispensed a noble and generous hospitality. It was here in his retirement and repose from his chief business cares, that news suddenly came upon him—"Chicago is burning." He started at once for the West, and arrived in Chicago on Tuesday, October 10. He found only a mass of black and smoking ruins. The house of his brother, Mahlon D. Ogden, was the only house remaining on the North Side. The following day he received the news of the utter destruction of his immense lumber establishment at Peshtigo, and that many lives had been lost. Remaining in Chicago a few days longer, to instil hope and courage in the hearts of the despairing and stricken citizens, he started for Peshtigo, where he was much more needed. General Strong, who accompanied him, has written a thrilling account of this fire and of the labors of Mr. Ogden during these trying times. After these herculean labors Mr. Ogden again sought the retirement of his favorite villa. Mr. Ogden's social qualities were of a high, a very high order. His mind, enlarged by travel and by extensive reading, sought relaxation from his immense business cares, in art, music and poetry. He was a great lover of nature, and

Bryant was his favorite poet. At his home he entertained with a generous hospitality, his mother and sisters assisting him. He was not married until late in life. In February, 1875, he married Miss Mariana Arnot, a daughter of Judge Arnot, of Elmira, N. Y. This most excellent and highly accomplished lady cheered and solaced the declining years of his life. In his youth he had been separated by death from the one dear heart that he loved, to whose memory he remained ever faithful. Years afterward he would show to his most intimate friends some tenderly cherished relics—a ribbon, a glove, some faded flowers—mementoes of one whom he never could forget. Such fidelity to his youthful love was strikingly characteristic of the man. His nature was sympathetic, and his smile illuminated every circle. To relieve the distressed, to aid the deserving, to encourage the despairing, for these and all good works, he always seemed to have abundant time, and many now prosperous men can look back upon the time when the timely word or aid of William B. Ogden placed them upon the road to that prosperity. The most striking feature of his character was self-reliance. As Emerson says, "He could stay at home in his own mind." He did not pretend to be powerful, he was powerful. He saw his way to the end from the beginning. To a lady whom he was seeking to encourage about her sons, he once said, "I was born close to a saw mill, was early left an orphan, christened in a mill-pond, graduated at a log school house, and at fourteen fancied I could do any thing I turned my hand to, and that nothing was impossible, and ever since, madam, I have been trying to prove it, and with some success." He believed that honest faithful work could accomplish every thing. His conversational power was very great. The artist Healy said of him that in conversation he was a worthy rival of the best three he ever met: Louis Philippe, John Quincy Adams and Doctor Bronson. Guizot, the French historian and statesman, said of him as he looked upon his portrait, "That is the representative American, who is a benefactor of his country, especially the mighty West; he built Chicago." Ogden could indeed say, as he looked over the great West and the great city that he loved, "*et quorum magna pars fui.*" Fortunate in his life, he was also happy in his death. Cheered by the affection of his noble wife, surrounded by loving friends, honored and respected by all his fellow-citizens, sustained and soothed by an unwavering faith in the religion of his fathers, he entered the valley of the shadow of death. On the 3d of August, 1877, he died at his country seat, Boscobel, on the Harlem. His remains repose in Woodlawn Cemetery, near New York. To the citizens of Chicago it should be said, "Would you behold his monument, look around you!"

BENJAMIN W. RAYMOND, the third Mayor of Chicago, was born at Rome, N. Y., in 1801. His early years were passed in Oneida County and St. Lawrence County, N. Y., and he received a good common school education. At the age of nineteen he commenced his business career as an employé for a lumber merchant. Afterward he commenced merchandising, and continued it with more or less success for several years. His mother had died when he was five years old, and his father when he was about twenty-two, so that upon Benjamin was now thrown the care of his younger brothers and sisters. The feeling of responsibility caused by these circumstances created in him habits of economy and industry, and these became to him handmaids of fortune. In 1826, under the influence of the celebrated revivalist, Rev. C. G. Finney, Mr. Raymond

made profession of religion, which he consistently maintained until the end of his life. He also became strongly imbued with strict temperance principles, and gave up the sale of liquor in his store, though it was one of the largest sources of profit to the merchant of those days. As early as 1831 he began to look to the Far West, believing that greater opportunities could be found there for the young business man than could be found in his native country. At this time he formed the acquaintance of Mr. S. N. Dexter, who encouraged him in his Western notions, and offered large financial

assistance. One or two trips into Northern Ohio and part of Michigan not proving very successful, he settled in East Bloomfield, N. Y., and for four years carried on a very successful business. Here, in the year 1835, he married Miss Amelia Porter, with whom he lived happily for almost fifty years, and who still survives him. Two sons were born to this marriage, one of whom is now dead. The other is Professor George W. Raymond of Williams College. His attention was now attracted to Chicago as a point of great future importance, and he determined to make it his future home. He arrived in Chicago in June, 1836, with a large stock of goods, and found the place running over with merchants and merchandise looking for nothing so much as for purchasers. The outlook for legitimate business was by no means favorable, and Mr. Raymond was obliged to look about for other points at which to dispose of his goods. Assisted by his friend Dexter, and in partnership with him, he also made large investments in real estate, and when the hard times of 1837 came upon the country the firm of B. W. Raymond & Co. found its liabilities largely in excess of its assets. But Mr. Dexter had both the ability and the will to assist the struggling firm, and during the years 1837, 1838 and 1839 advanced fully \$20,000, and thus the credit of the house was preserved and it passed safely through the terrible depression. In the year 1839 Mr. Raymond was elected Mayor of the city, on the Whig ticket. Although the Democrats were in the ascendancy, the popularity of Mr. Raymond enabled him to successfully carry the election. The main incident of Mr. Raymond's term of office was an exciting contest between the North and South divisions concerning a bridge over the Chicago River. The bridge had been swept away at Dearborn Street, and the people of the South Side were opposed to its being replaced. There were great jealousies existing at the time between the divisions, and the contest was waged with great bitterness. The Council was evenly divided, and Raymond, who held the casting vote, was a South-sider. Finally he decided that if the North-siders would subscribe \$3,000 toward the erection of the bridge they should have it, and this being agreed to he gave the casting vote in favor of the bridge. It was during his term of office that the canal scrip was largely counterfeited. Mr. Raymond was exceedingly active in putting a stop to it. Several persons were arrested, and two were convicted and punished. The hard times brought great suffering among the laboring classes, and particularly to the "canallers," as the Irish laborers and their families were called, who had been working on the canal until the work was stopped by

the inability of the State to go further. These laborers thrown out of employment poured into the city, where they became only objects of charity. Mr. Raymond bestowed upon them the whole of the salary he received as Mayor. It was during his term of office that the Fort Dearborn reservation was laid out in town lots and sold. It had been expected by the people that the land would be donated by the Government to the city, but the Government was not very rich, and so the order went out for the sale of Fort Dearborn addition. Through the efforts of Mr. Raymond Dearborn Park was reserved to the city, and State Street was laid out one hundred and twenty feet wide instead of sixty. This he accomplished by his personal exertions. In 1842 he was again elected Mayor, much against his own personal wishes. City orders were being hawked about at a large discount, though good times were now returning. Mayor Raymond by a system of rigid economy in the administration of public affairs soon brought the city's credit to par. Mr. Raymond early became interested in railroads, and he was one of the first directors in the Chicago & Galena Union Railroad, the pioneer of the great Northwestern system. He was one of the foremost in many of the great undertakings that have tended to build up Chicago, but he was particularly active in promoting the religious and educational interests of Chicago and the West. He laid out the town of Lake Forest, and was active in securing the charter for its University. He was president of the board of trustees of the University for twelve years. He was one of the trustees of Beloit College, and also of the Rockford Female Seminary, and he gave largely of his time and means to their assistance. He did much for the town of Elgin; built the first woolen mill there, and in 1864 founded the celebrated watch manufactory, and was the first president of the company. For more than forty years he was a ruling elder in the Second Presbyterian Church of Chicago. His later years were passed in retirement and in the enjoyment of that ease his long life of labor had so nobly won. He died on the 6th of April, 1883, full of years and honor.

ALEXANDER LOYD became Mayor in 1840, engaging in business for many years as a builder and con-

tractor, owner of a lumber yard and proprietor of a dry goods and grocery store. The latter was run under the firm name of Loyd & Thomas until after 1857.

FRANCIS C. SHERMAN was one of Chicago's pioneers, coming to this city from Connecticut in 1834. Like most of Chicago's Mayors he was, primarily, a

merchant, being also interested in a brick yard at a later day. Mr. Sherman was Alderman of the First Ward in 1837, County Commissioner from 1840-45,

mayor in 1841, chairman of the Board of Supervisors in 1851, and again filled the Mayor's chair for three terms, commencing 1862.

AUGUSTUS GARRETT, one of the pioneer business men and public-spirited citizens of Chicago, came to the city in 1836. Originally from the State of New York, he had been a successful auctioneer both in Cincinnati and New Orleans, but bad fortune had overtaken him, and when he came to Chicago he was, virtually, a bankrupt. Introducing himself to Rev. Jeremiah Porter, the Church people interested themselves in his case and he soon was upon his feet again, financially. He sent on for his wife, whom he had left with her parents, on the Hudson River (being unable to support her), and the husband and wife were soon together again and settled down as permanent residents of Chicago—one of them, at least (Mrs. Garrett), to make her name blessed to posterity. In the winter of 1839, through the labors of Rev. Peter R. Borein, they were both converted to a belief in the Methodist faith, and became prominent Church members. Mr. Garrett's abilities as a clear-headed and successful business man were at once recognized in a public way. He served as Alderman in 1840 and in 1845 was elected to the mayoralty. His death occurred in December, 1848. Mrs. Garrett survived her husband until November, 1855, having two years previously bestowed the bulk of her husband's large fortune upon that noble institution for the propagation of Christian learning, known as the Garrett Biblical Institute. Mr. and Mrs. Garrett left no children.

ALSON S. SHERMAN was born April 21, 1811, in Barre, Vt., coming to Chicago November 1, 1836. The early portion of his residence in Chicago was spent as a builder and contractor, being engaged from 1845 to 1855 in the marble, stone and milling business, and in the sale of building material. Mr. Sherman was active as a local legislator, the public showing their confidence in him repeatedly. He served one term as Mayor, one term as chief engineer of the fire department, two terms as Alderman, about ten years on the board of water commissioners, and acted for a number of years as city school trustee. In fact, in most of the public enterprises which marked Chicago's early growth, Mr. Sherman took a leading part. He was married February 26, 1833, and has nine children living. Mr. Sherman's residence is Waukegan.

JOHN P. CHAPIN, Mayor of Chicago in 1846, was in business, for many years, as a forwarding and commission merchant. He first established himself alone, and later became a member of the firm of Wadsworth,

John P. Chapin

Dyer & Chapin, who were also large packers, operating a house on the South Branch. In 1844 Mr. Chapin served as Alderman from the First Ward, but was better known as a merchant than as a politician.

JAMES CURTISS, a lawyer by profession and a native

James Curtiss

of New York, came to Chicago in 1835. He held many offices of local trust, being Clerk of the County Court.

State's Attorney, and Alderman for two terms. He was elected Mayor in 1847 and again in 1850.

JAMES H. WOODWORTH acted as Mayor in 1848 and 1849. He was a native of New York, coming to Chicago in 1833, and early becoming a marked public character. Mr. Woodworth engaged in the milling

James H. Woodworth

business, and was part owner of the old Hydraulic Mills for some time. He was elected Alderman in 1845 and again in 1847, and was later a commissioner of water works, while during 1855 and 1857 he was sent to Congress.

WALTER S. GURNEE was born at Haverstraw-on-the-Hudson, N. Y., in 1813. Having lost his father at the age of eight years, he left his home to find another with his uncle, Judge John D. Coe, at Romulus, Seneca Co., N. Y. Here he remained until old enough to take care of himself. Mr. Gurnee's first independent business venture was at Detroit in 1835, and the following year he went to Chicago, where he, at first, started

W. S. Gurnee

in the saddlery business, also carrying a stock of general hardware. Until his retirement from business, was engaged in the leather trade, operating, in early days, one of the largest tanneries in the West. He was one of the original directors of the Board of Trade, and was elected Mayor of Chicago in 1851 and 1852. Mr. Gurnee was always considered one of the most substantial business men of the city, being so confident of its continual growth that he invested in real estate in localities which, at the time, were far beyond its limits. He, with Charles E. Peck, purchased considerable land along the line of the Chicago & Milwaukee road, and founded the present beautiful village of Winnetka. Mr. Gurnee is now a resident of New York city, having removed there in 1863.

CHARLES M. GRAY, Mayor in 1853, was a native of New York, coming to Chicago in 1834. At first he manufactured grain cradles in a small way, and afterward associated himself with Cyrus McCormick in the

Charles M. Gray

manufacture of reapers. He was also engaged in business as a wholesale grocer, and had merely a local name as a public man. He is assistant general freight agent of the Lake Shore and Michigan Southern Railroad.

ISAAC L. MILLIKEN was one of Chicago's early blacksmiths, but being industrious, ambitious and popular, obtained a smattering of law and served the city as

Isaac L. Milliken

Alderman twice and both the city and county in a judicial capacity. He acted as assistant County Judge for a few years, commencing with 1853, and began his service as Police Magistrate in 1856. He became Mayor in 1854.

LEVI D. BOONE was born December 8, 1808, near Lexington, Ky., being a grand-nephew of the noted Daniel Boone and a son of "Squire" Boone, a Baptist minister, and Anna Grubbs, of Virginia. He was the seventh son, and in his tenth year was left fatherless, his mother being poor and burdened with a large family. His early days were spent among Indian outrages, and his first recollections were of the active and brave part taken by both his parents in subduing the savages. His father was killed at the battle of Horseshoe Bend. Growing up amid such scenes, it is quite remarkable that when twenty-one years of age Dr. Boone should have been able to graduate with honors from Transylvania University. In the spring of 1829 he removed to Edwardsville, Ill., to engage in the practice of his profession. Subsequently he settled in Hillsboro, Montgomery County, and upon the breaking out of the Black Hawk War in 1832 responded as the very first man in his county, and served as Captain of a cavalry company. In 1836 Dr. Boone removed to Chicago and at once became identified with its progress. At first he engaged in the insurance business, but the panic of 1837 forced him to return to practice. For a number of years he was western head of the Mutual Life Insurance Company. He served as city physician for a number of years, and his invaluable services during the cholera epidemic of 1848 are still remembered with gratitude by many early residents. Having served three successive terms as Alderman, he was elected Mayor in 1855, and it was during his administration that the "beer riots" were quelled. During the war

Dr. Boone was a faithful Union man, and therefore the following story told of him ever retains its "flavor:" "He was one of the physicians at Camp Douglas during the incarceration of Confederate prisoners, one of whom, a boy named Tom Green, got the good Doctor into a peculiar scrape. Green's mother came to Chicago and immediately set about securing her son's release, aided by a Mrs. Morris. A plan was arranged by which Tom should promenade a certain stretch every day where his mother could view him through a field-glass from the roof of an adjoining building. But Mrs. Green couldn't stay and departed, leaving \$50 for her boy in care of Dr. Boone, which was to be used in buying necessaries. The Doctor placed the amount in his safe in an envelope and labeled it 'Tom Green's money,' and was then called to Washington. Green learned of the money and its location, and secured it through the connivance of a medical student during the Doctor's absence, the student agreeing to let Tom escape for \$30. The bargain was made and Tom proceeded to escape by climbing a fence and—found himself in the Federal ranks, betrayed by the student! The Union soldiers tried in vain to compel Tom to give up the information relating to his attempted escape by moderate means, and only succeeded after stringing him up by the thumbs. Then the youthful

Confederate confessed that the money to purchase his liberty had come from Dr. Boone, and that was all he knew about it. Immediately upon Dr. Boone's return to Chicago he was arrested on a charge of conspiracy to aid in the escape of prisoners of war. No explanations would suffice at that time, and he was placed under arrest by Colonel Joseph Tucker, then in command of Camp Douglas. After a time the Doctor was released on parole, and that parole was still in force when his spirit took its flight." Dr. Boone was the first man in Chicago to advocate the award of private bounty as an inducement for men to enlist in the Federal ranks. For himself he backed the proposition to give a city lot or a farm of forty acres to the widow of the first Chicago volunteer who should fall in defense of the country's honor; and the widow of a gallant soldier under Colonel Mulligan received the Boone bounty as promised. In March, 1833, Dr. Boone was married to Miss Louise M. Smith, daughter of Judge Theophilus W. Smith, of the Illinois Supreme Court. At the time of his death six of their eleven children were left to them—two sons and four daughters. Aside from his public life, Dr. Boone is best known as a pillar of the Michigan-avenue Baptist Church, and as a trustee and valued patron of the Chicago University. His life, in short, was filled with useful works, and his marked success as a man was merited.

THOMAS DYER, an old and respected settler and merchant of Chicago, was born January 13, 1805, at

Canton, Conn. His father was an officer of the Revolutionary War. Young Dyer was brought up as a farmer's son, but developed sterling business traits at an early age. When he was about thirty years old he started for Chicago and the West, and soon engaged in general trade, also erecting a warehouse, and doing business under the firm name of Wadsworth, Dyer & Chapin; Newberry & Dole, and this house were among the very earliest warehouse firms to engage in business in the then young city. Mr. Dyer at once assumed his place as a leading man of affairs in the growing community with which he had cast his lot, being one of the directors of the Galena & Chicago Union road. He also served one term in the Legislature, was president of the Chamber of Commerce in 1848, and Mayor of the city in 1856. His death occurred at Middletown, Conn., on the 6th of June, 1862. Mr. Dyer was twice married—the first time to Adaline Hopkins, the second time to the widow of Elijah K. Hubbard. Clarence H. Dyer, his son, is still a respected business man of this city, being a child about two years old when his father removed to Chicago. Mrs. Dyer resides with Elijah K. Hubbard, Jr., her only surviving child.

JOHN WENTWORTH was born in Sandwich, Strafford Co., N. H., on March 5, 1815, of the Hon. Paul and Lydia (Cogswell) Wentworth. His paternal grandfather was the Hon. John Wentworth, Jr., member of the Continental Congress from New Hampshire, whose name is signed to the original "Articles of Confederation." His maternal grandfather was Colonel Amos Cogswell, who served through the entire Revolutionary War, entering at the same time that General Washington took command of the Revolutionary Army, under the old tree at Cambridge, Mass.; and served through the

entire war, with six brothers, and assisted at the formation of the Society of Cincinnati at the disbanding of the Revolutionary Army. John Wentworth is descended on both sides from the earliest settlers of New England, and there is no blood in his veins of any emigrant, since the year 1700; all his ancestors, after that date, living and dying in New England, and nearly all of them in the State of New Hampshire. The ancestor of his family in 1066 was Reginald Wentworth,—Rynold de Wynterwade—who was proprietor of the fief of Wentworth, in the wapentake of Strafford, West Riding of Yorkshire, as shown by the celebrated Domesday Book; Wentworth means the White Hall, Court or Town. A periodical of years since thus describes the birthplace of John Wentworth: "He was born in that part of New Hampshire known as the Switzerland of America; among those highlands separating those beautiful and picturesque bodies of water, dotted with hundreds of little islands, which are known as Squam and Winnipisseogee Lake. As the traveler from the capital of the State reaches the first of that extensive range of mountains, which he never loses sight of until he arrives at Mount Washington itself, known as the Red Mountain, he beholds a promontory of comparatively low lands, nearly equally divided between hills, vales, and little lakes, jutting up among precipitous and rugged mountains, and from which there seems no outlet, except in the direction of the entrance. At the extreme end of this peninsular strip of land, bounded almost entirely by mountains, with no house, no road, nor any place beyond save the mountain's craggy side; less than a quarter of a mile to the right of the road that now leads through a hardly passable gorge to Thornton, in the town of Sandwich, at the foot of Mount Israel, and at the last cultivated farm thereon, was Colonel Wentworth born, in the sight of almost perpetual snows. Seldom indeed are all those towering peaks that line the town of Sandwich snowless, and few are the fields that miss the frosts for six months in a year. It blights the blossoms in the spring and the unripe fruit in autumn. Few are the agricultural products adapted to its short and cool summers, and to its winters, vieing almost with those of Franconia, known as the coldest place in the Union. The soil is sterile and rocky; and its original settlers, in 1768, declared that they found it a dense mass of rocks and trees, with no bare spot save its lakes and rivers. At the date of the birth of Mr. Wentworth there were no stores, no hotels, and no places of recreation, where one could while away a leisure hour, or which could entice one from the paths of industry. Work was the only recreation and sleep the only rest. The evening shade was the signal for general retirement, and the day-dawn found all breakfasted, and the oxen yoked at the door. Amid such habits, and upon such a theater, was the subject of this sketch born and reared." And so restricted were its mail facilities, that the news of the Battle of New Orleans reached the town on the day of Mr. Wentworth's birth.

The first school attended by John Wentworth was the public school taught by Benjamin G. Willey, at Sandwich, in the winter of 1819–20. He attended the common schools of Sandwich until the winter of 1826–27, when he went to reside with Dr. Asa Crosby (the ancestor of the distinguished family of all the Crosbys in the United States), of Gilmanton, N. H., and attended the academy there under the charge of Asa Emerson Foster. During the summer and fall of 1827, he was a pupil of Rev. James Towner at the Wolfeborough, N. H., Academy, and in the summer of 1828 was at the

New Hampton, N. H., Academy, of which Benjamin F. Farnsworth was principal. On August 12, 1828, the inchoate congressman participated in the annual exhibition, being then thirteen years of age, and declaimed an extract from Webster's eulogy on Adams and Jefferson. In the winter of 1828–29 he attended a school taught by Dudley Leavitt, of Meredith, N. H., the celebrated almanac-maker. In the summer of 1829 and the winter of 1829–30, he attended the New Hampton Academy, under the same preceptor as before; and, on August 13, 1829, at the annual exhibition, took part in a Greek dialogue. He remained at home during the summer of 1830, and returned to the Academy in the winter of 1830–31. At this Academy, in the spring of 1830, he founded the Social Fraternity, which was created by the founder in order to supply the necessity existing for a debating and literary society, other than the Literary Adelphi, an association whose advantages were limited to students of older age than that of Mr. Wentworth. It was a fitting prelude to the life of John Wentworth, editor, mayor and congressman, to find him at the age of fifteen organizing a literary society, to provide students with those educational amenities from which they were debarred because of their age. He remained at this Academy until the winter of 1831–32, participating in the exhibition of August 13, 1831, and there took an original part in the discussion: "Which has conferred the greatest benefit upon mankind, the discovery of the art of printing or the mariner's compass?" During this winter he taught his first school at Simpson Hill, New Hampton, N. H.; and returned to the Academy subsequently and remained until the spring vacation. In the spring of 1832 he attended the Academy of South Berwick, Me., under the charge of Lewis Turner, remaining until the close of the summer term, and there delivered the valedictory address. During his stay there he wrote several articles for the Democratic Press in defense of General Jackson's financial policy, which received high eulogium. Thus, during his adolescence, is John Wentworth noticeable for his prominent literary ability. In the autumn of 1832 he entered Dartmouth College, N. H., from which institution he graduated in 1836. During his second winter in college he taught school in Hanover, about two miles south of the college; during the third winter at college he taught school at Grafton, N. H., and the fourth winter at East Lebanon, N. H. While there he was a substitute for one of the leading men in the school district, a delegate to the county convention, to nominate a democratic candidate for Senator, and was made chairman of the committee on resolutions; his reports and the remarks called forth by the transaction of business received high encomiums from the delegates and the Press. His first and only vote before coming to Chicago was cast for Isaac Hill, Democratic candidate for Governor, and this action likewise manifested the bent of his subsequent career. On Monday, October 3, 1836, he left the paternal roof-tree in Sandwich, N. H., with a general idea of going West and with \$100 in his pocket. The opinions of the prominent men of that time may be inferred from the following letters, given to Mr. Wentworth prior to his departure:

"MOULTONBOROUGH, September 22, 1836.

"HON. JOHN REYNOLDS, *Dear Sir:* Permit me to introduce to your acquaintance Mr. John Wentworth, a young man of good talents, who has just completed his collegiate studies, and visits the West for the purpose of studying and pursuing the practice of the law. As your knowledge and influence will enable you to direct him in the choice of a desirable spot to locate, whatever assistance you may render him will be gratefully received and considered a favor conferred on,

Your friend and obedient servant,

"BENNING M. BEAN."

John Reynolds was Governor and Member of Congress from Illinois, and Mr. Bean was Member of Congress from New Hampshire. The other letter was from Governor Isaac Hill, formerly United States Senator from New Hampshire, to General Henry Dodge, Governor of Wisconsin:

"CONCORD, N. H., September 29, 1836.

'Sir: Permit me to introduce to your friendly attentions Mr. John Wentworth, a graduate of Dartmouth College, of the present year. Mr. Wentworth possesses merit as a scholar and a gentleman, and has already discovered talent as a politician which gives him the first rank among our young men. He goes to the West in pursuit of fortune and fame. Should he take a stand in your Territory, I cannot doubt that he will receive, as he will merit, the patronage and friendship of the pioneers of your flourishing country. I am, with high respect,
Your obedient servant,

"ISAAC HILL."

These letters and the facts recited show how well his dominating characteristics were exhibited in his early life; how the struggles, the difficulties and the encomiums he experienced, seemed to be preparatory to the wider, higher sphere he was ultimately to fill. Upon his journey he traveled by post-coach to Concord, N. H.; thence across the Green Mountains to Troy, N. Y.; thence to Schenectady; thence, for the first time, on the cars to Utica, N. Y.; thence, for the first time, on the canal, to Tonawanda, N. Y.; thence by stage to Niagara Falls; thence on a steamer, for the first time, to Buffalo, thence on the steamboat Columbus, Captain A. Walker, to Detroit, arriving there October 13. He took a pedestrian excursion of some forty miles into the country from Detroit, visiting Ann Arbor and Ypsilanti, and advertising for a position as school teacher, in the Detroit Free Press, but meeting with no response to his advertisement, and not being inspired by the "star of inevitable destiny" otherwise to remain, he returned to Detroit upon the seventeenth, and sent his trunk to Chicago by the brig Manhattan, Captain John Stewart, and took stage for Michigan City, Ind., arriving there on the afternoon of October 22. The ensuing day he set out on foot for Chicago. Several old residents remembered seeing Mr. Wentworth en route to Chicago, tall, dusty, gritty and independent as he strode toward the goal, where he was to win fame and fortune such as are achieved by but few people. He tarried over the night of October 24, at Calumet, now known as South Chicago, and arrived in Chicago on the forenoon of October 25, 1836, and accidentally meeting Matthew S. Moloney, then of the leading mercantile house of Wild, Moloney & Co., formerly of Northfield, N. H., and an old schoolmate of Mr. Wentworth's, that gentleman strongly recommended to him the United States Hotel—previously the Sauganash—kept by the late John Murphy, afterwards well known as an Alderman and leading politician of the city. Since that date John Wentworth dines with Mrs. John Murphy every 25th of October. He determined upon pursuing the study of law, and made the necessary arrangements having that end in view with Henry Moore, a leading lawyer of this city, whose ill-health required him to return to the East, where he died of consumption many years ago. But, on November 23, 1836, he was induced to take editorial charge of the Chicago Democrat. Of the influence of that newspaper upon civic and general politics; of the sturdy denunciation of the wild-cat and other fictitious paper money; its stanch advocacy of "Liberty and Economy;" its stinging and pungent epigrams, the history of those times bears witness. A short time after he took charge of the paper, the mark of this twenty-one years old editor was made in the city of his choice, and many of the prominent citizens of Chicago and propri-

etors of the newspaper, urgently solicited him to remain in charge of the paper, and proffered him every financial assistance necessary for its purchase: so evidently was Mr. Wentworth the right man in the right place. He accordingly made arrangements to take the paper, and within three years the establishment costing \$2,800 was owned by John Wentworth, free from indebtedness. He had earned it by incessant labor and indefatigable application, rigid economy and unremitting attention to business—such attention as his magnificent physique and the stern, persistent daily labor of his early New England home fitted him to endure. In the winter of 1836-37, Mr. Wentworth attended the meetings held in the Saloon Building, to consider whether the Legislature—then in session at Vandalia—should be applied to for a city charter. But very few of those who attended those meetings are now living. He also took an active part in the election of Chicago's first Mayor, William B. Ogden. He was the secretary of the first political meeting ever called in the old First Ward. In 1837, he was appointed by the Council the first corporation printer of Chicago, and early in 1838, was appointed School Inspector, which office, under different names, he held at various times afterward. Mr. Wentworth was one of the earliest, and has ever been one of the most persistent advocates of the common-school system in the West. In 1839, he was appointed one of the "aides-de-camp" of Governor Carlin. In 1840 he commenced making speeches to public assemblages outside the city, and in February, 1840, wrote a letter upon the relation of the banks to the Government and their reciprocal duties. This letter was printed in pamphlet form, and copied into the Administration papers of the day; it received deserved eulogiums, and attracted a great deal of attention to the utterances of the newspaper, whose editor, in such terse, powerful yet elegant phraseology, clearly solved one of the vexed financial and economic questions of the day. During this year, also, he started the Daily Democrat, the first daily Democratic newspaper in the Northwest. Despite these various demands upon his time and mental capacity, he still pursued his legal studies, and early in the spring of 1841 he left Chicago to attend the law lectures at Cambridge, Mass., with the intention of remaining there a year, but hearing that he would probably receive the nomination for Congress, he returned to Chicago late in the autumn of 1841, and was shortly thereafter admitted to the Bar. On May 18, 1843, he was unanimously nominated for Congress by the Democratic convention at Joliet. In consequence of the failure of the Legislature to district the State, the election which should have taken place in 1842 did not occur until August, 1843, when Mr. Wentworth was elected from the Fourth District of Illinois by a large majority, at the early age of twenty-eight, to a seat in the House of Representatives of the Twenty-eighth Congress, the youngest member of that body. In 1844 he was re-nominated, "*nemine contradicente*," and re-elected by a majority of more than three thousand. He was re-nominated in the same manner and re-elected by a majority of over six thousand in 1846. In 1848 he was again nominated and rolled up a majority of three thousand five hundred and fifty-five votes, while in Washington, attending to his Congressional duties, and notwithstanding the cry of rotation in office made by aspirants. As an evidence of Mr. Wentworth's personal popularity it may be remarked that at the time of the antagonism to him, Mr. Polk's majority was, in the same district, only three thousand and eight votes; also, that Mr. Wentworth's majority was greater than that of any

other person in the State whose election was contested by an opposing faction. The Congresses to which he was elected up to this period of his life were the Twenty-eighth, Twenty-ninth, Thirtieth and Thirty-first. Before Mr. Wentworth entered Congress he had never seen a legislative body in session, yet his actions in Congress were such as though he had been engaged in parliamentary debates for years. In fact, his whole life has exhibited a wonderful adaptability of mind and aptitude of manner, with a comprehensiveness of understanding that made all questions readily understood by him. Before his election to Congress there had not been any member who resided on the lake, nor had there been one north of the center of the State of Illinois, and until the admission of Wisconsin as a State he continued to be the sole representative who resided upon the shores of Lake Michigan. His district embraced the counties of Boone, Bureau, Cook, Champagne, DeKalb, DuPage, Grundy, Iroquois, Kane, Kendall, Lake, LaSalle, Livingston, McHenry, McLean, Vermillion and Will, and it extended from the Wisconsin State line on the north to a distance of one hundred miles below the line of the termination of the Illinois & Michigan Canal on the south, and from the Indiana State line on the east to counties touching Rock River on the west. Its area was two hundred and fifty miles by one hundred miles, and comprised the most wealthy and populous portion of the State. Since that time several entirely new counties, and parts of other new counties, have been created out of his old district. Mr. Wentworth was a member of the Baltimore National Convention of 1844, which nominated James K. Polk for the presidency; also of that of 1848, which nominated General Lewis Cass. He was chairman of the committee that called the celebrated National River and Harbor Convention which assembled at Chicago in 1847, and Mr. Wentworth also drafted the address to the people of the United States, urging them to send delegates to the convention. In 1850 he peremptorily declined a renomination to Congress, and retired from his representative duties on March 4, 1851. In November, 1852, he was elected to Congress from a new Congressional district, the Second, made under the census of 1850, comprising the counties of Cook, DeKalb, DuPage, Kane, Lee, Whiteside and Rock Island. His term in the Thirty-third Congress expired on March 4, 1855, and again he refused to accede to the solicitations of his constituents, declining a re-nomination. He thus served two years under Acting-President Tyler; he was present at the inauguration of President Polk and served out his term of office; was present at the inauguration of President Taylor and that of Acting President Fillmore, and served two years under their administrations. He was then out of Congress for two years. He was present at the inauguration of President Pierce, and served two years under his presidency. He was present when John Quincy Adams fell in the House of Representatives, and was one of the committee appointed by Speaker Robert C. Winthrop to take his remains home to Massachusetts. He was elected to the Thirty-ninth Congress from a district composed alone of Cook County, and was upon the Committee of Ways and Means under the administration of Acting-President Andrew Johnson. During this session he was an earnest advocate of the immediate resumption of specie payments, often declaring that every day's delay therein would prove calamitous to the country. He attended the inauguration of Abraham Lincoln and was one of the committee to receive his remains at Chicago. During Mr. Wentworth's occupancy of a seat in Congress,

there was much local legislation requisite for the crescent Chicago of that era, and he worked intelligently and incessantly for those improvements that were necessary for her future greatness. He urged, and accomplished, the improvement of the harbor, the establishment of light-houses and ports of entry, the erection of marine hospitals, etc. He championed the causes of his constituents in contested cases under the pre-emption acts, and was the unpaid agent for numberless claimants for bounty, back-pay, etc., accrued during the Mexican War. He strenuously championed pre-emption, graduation and homestead laws; he was the first Western congressman who introduced a bill advocating the bonded warehouse system, and he was mainly instrumental in passing the land grant bill for the Illinois Central Railroad through the House of Representatives. The remarks of the Democratic Review, made during his congressional career, aptly describe his service: "Colonel Wentworth's political career has been marked by untiring industry and perseverance, by independence of thought, expression and action, by a thorough knowledge of human nature; by a moral courage equal to any crisis; by a self-possession that enables him to avail himself of any chance of success when on the very threshold of defeat; and by a steady devotion to what he believes to be the wishes and interests of those whose representative he is. * * * * Few men of his age, under so many adverse circumstances, have attained to equal success, and still fewer are indebted to accidental circumstances. So many obstacles have been already overcome by him, that he is never daunted by the hopelessness of any enterprise that it may seem desirable to undertake." Wheeler, in his "Biographical and Political History of Congress," Vol. 2, conveys the same idea as to Mr. Wentworth's persistence: "We mark him down as a man of untiring energy, whose mind once fixed upon a project is not apt to be diverted from it, but will make every consideration secondary to its accomplishment. Possessing a good knowledge of parliamentary tactics, and conversant generally with the means of success in any movement he may make, he calculates coolly and afar off, and turns every little circumstance to good account. We have seen him stand up in the face of denunciation and excommunication fierce enough to awe into submission any mind accustomed to acknowledge the obligations of that austere discipline which is characteristic of the Democratic party. If he has winced, we have never seen him. As a good local representative he has few superiors—perhaps none." The value of these criticisms lies in their having been contemporaneous, almost synchronous, with the performance of the legislative duties commented upon. Mr. Wentworth was one of the original stockholders of the Chicago & Galena Railroad, and continued one of its most urgent supporters, and was chairman of the executive committee of the board when the road was consolidated with the North-Western. In 1857, Mr. Wentworth was unanimously nominated, in a convention of delegates from all the old political parties that existed at that time, as a candidate for Mayor. The new party was designated, at that period; the Republican fusion. Upon receipt of the nomination Mr. Wentworth at once stated, in his speech at Metropolitan Hall, that if he was elected he wished it distinctly understood that he was elected to enforce all the laws of the city. This he proposed doing. He stated that he did not desire the salary; that he could not well attend to the duties without encroaching upon the responsibilities of his private business; and that the only consideration that made him a

candidate was, that he believed the great mass of those who ought to take it, were deterred from doing so, from the moral certainty that they would greatly increase the number of their enemies. But, of all considerations, this would have the least weight with John Wentworth. He also explicitly stated that he would defer to the wishes of the people, if they elected him, and serve for one year, but that must be all that he would be expected to serve. In March, 1857, he was elected by over eleven hundred majority. His watchword, while serving the public, was that which dominated his individual business interests; "Liberty and Economy," and to the doctrines implied in that watchword he steadfastly adhered. It may be remarked that, during this term, he introduced the first steam fire-engine into the city, which was named "Long John" in his honor; and his first official act was to call a board of engineers who established the present grade. Mr. Wentworth declined a reelection, but he was again nominated and elected to the mayoralty in 1860. When the Prince of Wales visited Canada in 1860, there was a strong effort made to have him make a tour of the United States, but the Canadian authorities were opposed to this, and wished to take him through the British Provinces, with an idea of enlisting his influence for their development, with reference to the then contemplated Pacific road through the British Provinces. Lord Lyons, then British minister at Washington, was exceedingly anxious to gratify the American people in their wishes, and he suggested that the Governors of the States and the Mayors of the principal cities should meet the Duke of Newcastle upon the arrival of the Prince in Canada, to have a consultation upon the subject. It was understood that the Duke of Newcastle had the movements of the Prince in charge. Mr. Wentworth was one of the large body of prominent men of America who met the Duke at Montreal—but was the only one from Illinois. It was urged by the Canadian authorities that the Prince would not be well received by the masses of the foreign population in the United States, and disturbances might arise, and it was contended that those disturbances would be inaugurated in Chicago. Mr. Wentworth assured the Duke of Newcastle that he had only to make his arrangements through the British Consul at Chicago, and he, as Mayor of the city, would see that they were all carried out. And they were carried out, to the entire satisfaction of the Duke and to the pride of the people of Chicago. Mr. Wentworth in person superintended all the arrangements, and they were so satisfactory, that, after the return of the Prince, the Duke of Newcastle wrote him a very complimentary letter, stating that nowhere were the arrangements made and carried out so satisfactorily as they were at Chicago. He sent to Mr. Wentworth a large portrait of the Prince and also sent to him two Southdown sheep from the Queen's herd for his farm. During this term he introduced two more fire-engines, which were named "Liberty" and "Economy," after the prominent characteristics of his civic rule. Upon each occasion of his assumption of the Mayor's office, he found a large floating debt against the city, but at the termination of each of his tenures of office there was no floating debt, and he left money in the treasury for his successor. Mr. Wentworth positively declined a renomination to the office of Mayor, and, although it was frequently tendered him, has persistently declined it since that time. In 1861 he was elected a delegate to revise the Constitution of the State of Illinois, and during the same year was chosen a member of the Board of Education for three years. In all his official capacities, Mr. Went-

worth wielded all his influence in behalf of the common school system when it was very unpopular; and by his strong, urgent and sensible articles in the "Democrat," he was extremely influential in causing the first brick public school building to be erected in Chicago, called the Dearborn school; on the north side of Madison Street, east of Dearborn Street; it was always his favorite school, and at the time of the fire he was on the special committee in charge of it. In later years, when failing banks became largely in default to the school fund, his energy, both upon the board and in his newspaper, saved a large portion of those funds that, at one time, were considered lost; and had he been sustained by the action of a majority of the board, every dollar that was finally lost, by what he believed an unjust compromise with the banks, would have been saved. In 1863 he was appointed a police commissioner to fill a vacancy in the term, which expired in November, 1864. It was during this term as police commissioner that the raid by the Rebels upon Camp Douglas was to have been attempted, and he was all the time in private consultation with Colonel Sweet, in charge of Camp Douglas. Francis C. Sherman, the Mayor of the city, had authorized Mr. Wentworth to take entire charge of the police in case of any emergency; and during the entire night wherein Colonel Sweet made the arrests which caused such a sensation throughout the country, Mr. Wentworth was in a private room, with a man from each police station in the city, awaiting any suggestions that might be made by Colonel Sweet. While sitting there a messenger arrived from Colonel Sweet, bringing, with the Colonel's compliments, several pistols which he had just taken from the traitors outside the camp, and were so soon to have been used in liberating the prisoners. It was also during this period that, as police commissioner, he preserved order in the courthouse yard while the notorious Clement L. Vallandigham addressed the people. At the close of his remarks Mr. Wentworth took his place upon the court-house steps and made that ever memorable speech in reply to him; and when a disturbance was attempted, Mr. Wentworth called the attention of the crowd to the fact that Mr. Vallandigham could never have uttered his sentiments in the loyal city of Chicago but for the protection of the Chicago police, acting under his orders. He then asked of Mr. Vallandigham's friends the same courtesy while replying that he had extended to Mr. Vallandigham. Mr. Vallandigham's friends saw the point and gave Mr. Wentworth an attentive hearing. In 1868 he was again elected a member of the Board of Education for four years. One phase of his political career has been unnoticed hitherto in this article—the change from old-time Democracy to Republicanism, and his action upon the slavery question. Of these two matters, Zebina Eastman, the war-horse of abolitionism, thus wrote in 1857: "In politics Colonel Wentworth has ever acted with the old-line Democratic party; but when the old parties became split up, by making the slavery extension question a test, he went, with such other Democrats as Hamlin, Wilmot, King, Trumbull, Fremont, Blair, and others, into what is known as the Republican movement. To the success of this movement Colonel Wentworth has, by public speeches, by writing in his newspaper, and by efforts in every other way, bent all his energies. And if there is any truth in the old adage, that the tree which bears the best fruit is always known by its receiving the greatest number of clubs, Colonel Wentworth is singled out as one of the most effective laborers in the ranks of the opposition to slavery extension. It is not only in his own immediate

neighborhood, but from the most distant parts of the Northwest, and from the extreme Eastern Press, Colonel Wentworth receives flattering testimonials of the effectiveness of his labors in the Republican cause, which he has espoused, by the violent personal abuse he receives from its opponents. No idiot, no drone, could receive the notice he daily does from the Press. Each day bears witness to the great fact that, if he is not hard at work, his enemies, at least, think he is, and are cautioning their party friends to beware of his efforts, and be prepared to counteract his movements. Of the services that Mr. Wentworth has rendered to his fellow-citizens, the late Hon. Thomas Hoyne—who came to Chicago a few months after Mr. Wentworth, and was intimately associated with him during his entire life in Chicago, a period of over forty-five years—thus eloquently speaks, in a set of resolutions adopted by the Chicago Historical Society, May 21, 1882:

"WHEREAS, This Society recognizes the long career of public service which has made the life of Hon. John Wentworth contemporaneous with the first organization of our municipal government and the entire history of Chicago since the year 1836. He was the first member of Congress from this district when it comprehended seventeen counties from Northern Illinois, of which he was the representative for many years. He was the Mayor and chief magistrate of the city, twice chosen at two different periods by the people, and his administration of city affairs is remembered to this day for its inflexible character, its economical expenditure of public money, its rigid execution of all laws and ordinances, the suppression of all vice and corruption, and the stern and impartial exposure and punishment of all crimes and criminals. He was the publisher and proprietor of the first newspaper ever printed in Chicago, and his name stood at the head of the Press of this State for a quarter of a century. His more recent labors, in the compilation of accurate historic material in respect to the early settlement and progress of the city, the personal reminiscences of a public life prolonged through one of the most eventful periods of American public history, and his recent lectures before this society, have all inspired a general public interest in the knowledge which he has accumulated; and this society, recognizing the value which his early contemporaries and the community at large attach to so signal a public life and career, do hereby, as a token of respect,

"Resolve, That the president and secretary be instructed to request of Hon. John Wentworth that he will procure a portrait likeness of himself to be taken so that it may be hung upon the walls of this institution, and remain as a memorial to posterity of the conspicuous position he occupied, and the public labors and services which he accomplished during a long and distinguished career, marked by the most extraordinary development in the rise and progress of this city, and his participation in the most momentous events of American public history." [Portrait by John Phillips, of New York, presented September 1, 1882.]

The Calumet Club also adopted the following expressive preamble on October 8, 1881, in asking Mr. Wentworth to sit for his life-sized portrait for the club:

"WHEREAS, The directors of the Calumet Club appreciate in the life career and world-wide celebrity of the Hon. John Wentworth a great and noble example of what may be attained by force of character, strength and purity of purpose and public spirit, combined with generosity and kindness of heart, and recognize in his personality an incarnation of the spirit of Chicago—his own life history being virtually that of the settlement, growth and prosperity of the city, as well as a prominent part of the history of the Nation."

While he has written for the public as much as any other man in Chicago, no man has addressed more popular assemblages than he has, and his meetings have been essentially his own, being called in his own name and having no presiding officer. He speaks frankly his sentiments and takes the responsibility, and he has never failed to fill the house.

On November 13, 1844, Mr. Wentworth was married at Troy, N. Y., by Rev. Nathan S. S. Beman, D. D., to Roxanna Marie, only child of Hon. Riley and Roxanna (Atwater) Loomis, of Troy, who, after many years of delicate health, died February 5, 1870. They

had five children, all of whom died young, except Miss Roxanna Atwater Wentworth, now living.

Since serving his last term in Congress, Mr. Wentworth has bestowed his time and attention upon his enormous stock-farm of about five thousand acres, at Summit, Cook Co., Ill., from which, like Cincinnatus, he was so often summoned to serve his countrymen. Mr. Wentworth's father was one of the largest real-estate holders in the State where he lived, and Mr. Wentworth's domestic early life was passed among the most distinguished of New Hampshire's agriculturists; and, in his public life, Mr. Wentworth had learned that nearly all the prominent men of this country had passed their later years upon large country estates. Mr. Wentworth had visited the farm of General Washington at Mount Vernon, and of the Adamses at Quincy, and more particularly was he pleased with a visit paid by him to ex-President Van Buren upon his farm at Lindenwood, N. Y.; and he had also heard of the Hermitage estate of General Jackson, of the Monticello estate of President Jefferson, and the Montpelier estate of President Madison, and had also talked of their estates, at Ashland and Marshfield, with those singularly great orators, Clay and Webster. These incentives made Mr. Wentworth determine upon emulating their example, and he selected the Summit as the location for his estate. This spot is noted as a dividing line between the streams that empty into Lake Michigan and pass out to the Gulf of St. Lawrence, and those that empty into the Illinois River and pass out into the Gulf of Mexico. Mr. Wentworth retains his interest in politics and is active in those pertaining to Chicago, but persistently refuses all proffers of nomination to office. In 1867 his Alma Mater, Dartmouth College, conferred upon him the degree of LL. D. (*Legum Doctor*), and on July 2, 1873, he was elected president of the Alumni of the New Hampton Academical Institution, and in 1882 and 1883 he was elected president of the Alumni Association of Dartmouth College, for each of those years. In June, 1880, Mr. Wentworth was a vice-president of the Republican National Convention, being a delegate from the First District, but was declared ineligible by the majority report which confirmed congressional district representation. This, however, did not prevent his earnestly working for the nomination of U. S. Grant, and subsequently for the nominee of the convention, James A. Garfield. Mr. Wentworth grieves over the irreparable loss of his manuscripts and papers through the Chicago fire. He had kept a journal of all the great events that transpired while he was in public life, making entries therein almost every day, after the style of John Quincy Adams. He also had a complete file of the Daily and Weekly Chicago Democrat, from his first connection with the paper to its close, a period of twenty-five years. Mr. Wentworth is an active member of the Chicago Historical Society, and is especially interested in matters relating to Early Chicago, of which he has tacitly become the acknowledged depositary, and whereon he is conceded authority. His essays upon this subject are the classics of Chicago historiography. There is no man living that can so familiarly shake the hands of so many of the settlers of northern Illinois prior to 1850, male or female, as John Wentworth. He has likewise paid much attention to New England history, more particularly to the history of his native State, New Hampshire. The newspapers of that State frequently quote him as authority upon matters appertaining to its early history. He has been, for nearly a quarter of a century, vice-president of the New England Historic Genealogical

Society; and has been a frequent contributor to the columns of its recognized organ, the *New England Historic Genealogical Register*; a full set of which volumes he has presented to the Chicago Historical Society, together with many other valuable and rare works. Mr. Wentworth is also the author of the *Wentworth Genealogy*, in three volumes, conceded by critics to be the most complete and most perfectly indexed of any of that class of work published, and which is recognized in England and the United States as a standard work, and has been highly eulogized by many prominent literary men of both countries. Its collaboration occupied years of careful and cosmopolitan research.

"The *Hamptonia*," a quarterly published by the literati of New Hampton Academy, thus truthfully summarizes the life of this gentleman: "Mr. Wentworth, all through his editorial and official life, has shown himself not only a man of decided convictions, but has proved on many notable occasions that he had, under the most adverse circumstances, the courage to follow them. He has ever looked upon parties as only necessary organizations for the accomplishment of desirable ends, and he has no party attachments beyond his assurance of right, always having principles which he wished sustained by the legislation of his country, and always seeking political organization which would best promote this object. Mr. Wentworth has been remarkable, as a writer and speaker, for conveying his ideas in the fewest possible words, and for his success

in commanding the closest attention of promiscuous audiences; also for his habits of untiring industry, and for keeping such control of his private business that he has ever been personally independent of political results." Judge James B. Bradwell, who has been an intimate friend of Mr. Wentworth ever since his arrival in Chicago, thus condenses his estimate of the latter gentleman: "Few men in the nation have the intellectual capacity of Mr. Wentworth. He is strong in whatever he undertakes, and does it in his own peculiar way. He has been a power in this State and Nation. The old settlers know what influence he exercised in Congress and in the old *Chicago Democrat* for many years. The short and pointed paragraphs of the *Democrat* were a terror to the enemies of Mr. Wentworth. The influence of this paper in politics and the development of this country cannot be appreciated by those who were not here then."

Mr. Wentworth was one of the earliest Masons and Odd Fellows in Chicago. He stands six feet six inches high and weighs three hundred pounds, and has the reputation of being one of the most healthy and industrious men, and possessed of the greatest endurance of any in the city.

His full-size portrait, painted by the renowned George P. A. Healey, can be seen at the rooms of the Calumet Club, corner of Michigan Avenue and Twentieth Street, where his friends, the old settlers of Chicago, have their annual assemblage in May of every year.

OLD BLOCK HOUSE AND LIGHT HOUSE IN 1857 —THE LAST OF FORT DEARBORN.

WOLF POINT AND EARLY HOTELS.

The few travelers and emigrants who came to the site of Chicago prior to 1831 had more difficulty in finding the true town than at present. The fort could be seen, and from a distance might be taken for the nucleus of the coming village, but its forbidding inclosure showed, on nearer approach, that it was exclusive property and no village or even place of temporary sojourn for the weary traveler, except as the guest of the officers of the garrison. That was not the village of Chicago at that time. In the fall of 1829, among others looking for a place to stop "over night" was the family of Elijah Wentworth. It consisted of himself, wife and two daughters, Zebiah, then nineteen years old; Susan, eighteen years of age, and George, then a child of

ARCHIBALD CALDWELL.

four years old. Whether Elijah, Jr., then twenty-six years old, came with his father, is a matter of doubt. He came soon afterward, if he was not at that time of the emigrant party. Elijah had come up from the Wabash country with three yoke of oxen, two covered wagons, containing all his household goods and earthly possessions, and, homesick, was trying to get back to Maine, where he was born. He was looking for Chicago as a point on the lake from which he might embark for the East. He arrived in October, 1829, and put up at the only tavern then having a sign-post. It was owned by James Kinzie who had built it the year before, and was then kept by Archibald Caldwell, who,

by virtue of his license, granted December 8 by the Commissioners of Peoria County, was, without doubt, the first landlord who ever legally kept tavern in Chicago.

The family found refuge at this tavern. It came on prematurely cold that year, and it was certain that the family must winter at Chicago. The oxen could not be sold here, and were accordingly sent back to the "Wabash country" to winter. The family rented a small log-house owned by Mr. Kinzie, standing on the shore of the South Branch some little distance south of Caldwell's tavern, at \$5 per month, and moved into it as a temporary home. While living there, Caldwell dissolved with Kinzie, left the hotel and removed to near Green Bay, Wis. Mr. Wentworth, in January or February, rented the hotel of Mr. Kinzie at \$300 per year and became its landlord. Here he remained until the fall of 1830, when he gave up his lease and took a claim eight miles north, near what is now the Jefferson Station on the Chicago & North-Western Railroad. There he kept a hotel uninterruptedly, except during the spring and summer of 1832, when for a few weeks he took refuge in the fort fearing Indian depredations. When Scott came with the cholera, he returned to his house with many other families who, like him, became panic stricken by the pestilence.

Who kept the tavern afterward known as the Wolf Tavern ("the forks" had been known as Wolf Point long before) during the year 1831, is not specially determined by the traditions or records of the period.

In addition to this first tavern there was another in 1830, kept by Samuel Miller. It stood on the east side of the North Branch, nearly opposite Wentworth's. He with his brother was living there in 1829, and kept a small store, besides entertaining such strangers as came along. In 1830, he having enlarged it materially, his place became known as a tavern, and he was the principal competitor of the "Forks Tavern" on the opposite side. He ran a ferry at that time to accommodate the travel and help along his own trade.* There was at that time no bridge. Mr. Miller kept the hotel until the death of his wife, in 1832, when he sold out and moved away. It was never known as a hotel after Miller left it; various families lived in it temporarily, and at one time it was used as a store.

Mark Beaubien had his log house, also a tavern, on the South Side, on the point made by the junction of the two branches. It was not at that time a pretentious hostelry. He afterward added to it and kept one of the most famous hotels in the city, known as the Sauganash.

These three hotels, connected only by a primitive ferry, with a few scattering buildings on the West Side, made the only pretense of a village at Chicago in 1830, and was known as "The Forks" and as Wolf Point. The origin of the name is buried in oblivion. Mrs. Juliette A. Kinzie, authoress of "Waubun," came here in the winter of 1831, and, at that early day discussed the origin of the name as shrouded in mystery, then too old to be traced to its genesis. She states that at that

* The county, in 1831, when Mark Beaubien took the ferry established by law, bought Miller's saw. See Colbert's History, p. 5.

time (1831) it was known as Wolf Point, and suggested some quite plausible origins for the name; among others, that it was the former residence of an Indian chief, whose name, translated into English, means "Wolf." The value of Mrs. Kinzie's testimony lies, not in her fanciful legend, but in the historic fact that at that time the land lying about "the forks" was known as "Wolf Point," and that the origin of the name was at that early day not known. As to the name and many other facts concerning Wolf Point, and the early taverns, Mr. Gurdon S. Hubbard, the oldest living citizen of Chicago, wrote the following letter to Rufus Blanchard, which is embodied in his *History of the Northwest*. See pp. 757-59.

what was then called the Forks. About this date Samuel Miller bought a small log cabin on the opposite side of the river from Wentworth's, and south of the present Kinzie-street bridge, to which he added a two-story log building, finishing the outside with split clapboards. These two public houses were the first Chicago could boast of. Miller by his influence and enterprise, erected a bridge built wholly of logs, across the North Branch, just north of his tavern. He and Wentworth being competitors for public favor, the Forks house getting the most patronage, James and Robert Kinzie built stores there, and here resorted some of the officers of the fort daily for social intercourse and 'drinks' at Wentworth's bar. Wolves were in those days quite numerous; one had the audacity to enter in the day time Wentworth's meat-house, and was by him killed. His house had for a sign a tall sapling topped off just above a prominent branch; it extended some distance above the top of the roof, and was a conspicuous notice, to be seen from the prairie and surroundings, that 'here was food for man

WOLF POINT IN 1830

"CHICAGO, October 13, 1880.

" RUFUS BLANCHARD :

" *My Dear Sir*—Your favor of 11th is at hand, and I most cheerfully give you what information I possess on the subject matter of your note.

" Prior to 1800 the North Branch of the Chicago River was called by the Indian traders and voyageurs 'River Guarie,' and the South Branch 'Portage River.' On the west side of the North Branch a man by the name of Guarie had a trading-house, situated on the bank of the river about where Fulton Street now is. This house was inclosed by pickets. He located there prior to 1778. This tradition I received from Messrs. Antoine Deschamps and Antoine Beson, who, from about 1778, had passed from Lake Michigan to the Illinois River yearly; they were old men when I first knew them in 1818. This tradition was corroborated by other old voyagers. The evidences of this trading-house were pointed out to me by Mr. DesChamps; the corn hills adjoining were distinctly traceable, though grown over with grass.

" I am of opinion that these branches retained their names until about the time of the location of the first Fort Dearborn, and were afterwards known as the North and South branches.

" My impression is that Elijah Wentworth opened his tavern on the West Side, near the present West Kinzie Street, in 1830, at

and beast; it lacked, however, something to hang to the branch projection, to give it character; how to obtain a proper emblem puzzled the good landlord, as there was no carpenter or paint shop, or citizen artist; a happy thought struck him, that Lieutenant Allen might condescend to supply the deficiency, if properly approached; this was effected through a mutual friend. The boards of a dry-goods box were obtained, from which was put in shape, under the superintendence of Lieutenant James Allen, a well-proportioned sign, the Indian Agency blacksmith putting to it hinges, when Lieutenant Allen took it in hand again, producing and presenting to Wentworth the picture of the slethy wolf, which was to serve not only an attractive painting, but a memorial of the landlord's valor in the killing alone and unaided, of a ferocious wolf. Officers and citizens received invitations to be present at the hanging of the sign; the day and hour arriving, found assembled a majority of the people; the sign was brought forth, duly veiled with a blanket, was attached to the branch of the pole, the veil removed, and it swung gracefully, and was greeted with hurrahs from those present; in turn something else greeted the hoarse throats of friends. Thus was produced and baptized the name of 'Wolf Point.'

" Besides Wolf Point was a place called Hard Scrabble, of early historic interest.

" Mrs. John H. Kinzie in her book, 'Waubun,' correctly

describes the location as 'Lee's Place.' Mack & Conant, extensive merchants at Detroit, in the Indian trade, became the owners of this property about the year 1816. They sent Mr. John Craft with a large supply of Indian goods to take possession of it, and establish a branch of their house there, the principal object being to sell goods to such traders as they could residing throughout this country, without interfering with the interests of those traders who purchased goods from him.

Mr Craft repaired the dilapidated building, adding thereto, and erecting others necessary for the convenience of business. He, I think, named it 'Hard Scrabble;' whether he or some one else, it bore that name in 1818.

At the organization of the American Fur Company, 1816, Mr. Astor's plan was to control the entire trade by absorbing other companies doing an Indian business. He succeeded in buying out the Southwest Company, whose headquarters were at Mackinaw, but failed in his efforts to buy out Mack & Conant.

entitled to more than ordinary credence. The honesty of the writer is not questioned, and his own desire to vindicate the truth of history is shown in the following corrections made with his assent, after an interview with him on February 3, 1884, at which time the letter was read to him. The corrections made were on the following basis of conflicting facts: (1) Mr. Wentworth was not keeping the tavern after the close of 1831; (2) Lieutenant James Allen, as appears from the records and his letters now on file with the Chicago Historical Society, was not here until May 14, 1833. Hence, either Mr. Allen did not paint the sign, or Mr. Wentworth was not the landlord at the time it was painted. It was decided, as probable, that the sign was not

DEARBORN STREET DRAWBRIDGE, BUILT IN 1834.

Mr. James Abbott, however, their agent at Detroit, succeeded in buying them out in 1820 or 1821, and they withdrew from the Indian trade, transferring their Indian goods, posts and good will to the American Fur, who constituted Mr. Craft their agent here, he removing his quarters from 'Hard Scrabble' to the company's warehouse, located north of, and adjoining, the military burying-ground. They enlarged it and built a log warehouse, besides; J. B. Beaubien, who had previously occupied it, removing to the 'Factor House,' adjoining Fort Dearborn. Craft died in the fall of 1826 and Mr. John Kinzie succeeded him. William W. Wallace (who was one of Astor's men on his expedition to Columbia River) took possession of 'Hard Scrabble' after Mr. Craft had left the place, and died there during the winter of 1827-28. From that time till the land title passed from the Government, it was occupied by several families, temporarily, among whom were the Lawtons, for a short time, and James Galloway, the father of Mrs. Archibald Clybourne.

Yours truly,

G. S. HUBBARD."

The foregoing letter gives a circumstantial account of the painting and raising of the wolf sign at the old Wentworth tavern. The letter is of great historical value, and from the known reliability of its author is

painted or hung until 1833, at which time either Charles Taylor, or his successor, William Wattles, was the landlord. That a sign bearing the image of a wolf, rudely painted, once swung from the pole of the old Wentworth tavern, can scarcely be doubted, but it is also quite certain that it was not put up until long after Wentworth left the hotel—probably in 1833. Zebiah Wentworth (Estes), still living, remembers nothing of the sign; John Bates, still living, remembers a rough board sign, put up some time after he came here in the fall of 1832. So the wolf sign, the Wolf tavern, and the accompanying picture which lacks the sign afterward put up, become historically reconciled. In 1830, there was no sign at either of the taverns at Wolf Point, and no bridges—only a ferry.* In 1833, there was a sign of a wolf swung

* A valuable thread of testimony was presented, too late for publication in its proper connection with the article concerning early bridges. It embodies the result of a meeting of the old settlers whose names appear, held late in the fall of 1883, and was presented to the editors by John Bates, one of the signers. It reads as follows:

"We all agree that the first bridge across the North Branch of the Chicago River was built in the winter of 1831 and 1832. The first bridge across the

from the sign-post of the old Wentworth tavern, and bridges across both the North and South branches.

These three taverns and Kinzie's store made Wolf Point the site of the real Chicago of 1830. The sale of the canal lots, the improvement of the harbor, the erection of warehouses, and, in fact, the evolution of a great city on the lake shore, changed the center of the town from Wolf Point to a region before not believed to be habitable, and that location lost its importance, which waned as its taverns died, and strangers sought board

the house again changed hands, William W. Wattles becoming its proprietor and landlord. In November, he sold out to Chester Ingersoll, who ran it an uncertain length of time, first as the "Traveller's Home," and afterward as the Western Stage House. It went out of sight as a hotel in 1834.

With the wane of the hotel interest on the Point, its importance fell off, and with the great impulse of growing trade at the new town, with the erection of a first-class hotel, the Lake House, and the removal of the

Mr. Kinzie and family boarding with them in part payment for the rent. This was in 1832. In 1833,

South Branch was built in the winter of 1832 and 1833; and that both bridges were built on abutments and two 'bents.' The abutments were built of logs in the shallow water near the banks. The bents were of four heavy logs, resting on the bottom, in deeper water, stringers of heavy logs stretched from the abutments to the bents, and between the bents. On these stringers puncheons or split logs were laid for a floor. These bridges were about ten feet wide and without railings, for the first few years, after which guards, or railings, were added. These were both wagon bridges, and were about six feet above the water, so that teams passed under them on the ice freely. The bridge on the South Branch stood till the spring of 1837, when it was gone; it was there in the fall of 1836 (Caton). Afterwards in 1837 to the foot bridge they lashed some heavy timbers, which formed a floating bridge, only wide enough for foot passengers, or a well trained saddle-horse.

"Cleave remembers driving across the first bridge over the North Branch; it was a wagon bridge, ten or twelve feet wide.

the great city absorbed all the various hamlets in one great whole, is traced by the building and success of the various early hotels. Following is a sketch of the early hotels other than the two Wolf Point taverns already sketched, which, by their success, marked the location and growth of the great city in its early days.

Mark Beaubien, whose name is inseparably linked with almost every chapter of Chicago's early history, was a famous hotel-keeper in his day. He came here in 1826, from Detroit. In 1831 he built, as he claimed, the first frame house in Chicago, the Sauganash Hotel. It is related that while he was at work on his house, Billy Caldwell (Sauganash) one day said to Beaubien, "I suppose you will name your new hotel after some great man?" "Yes," replied Beaubien, "I will. I

shall call it the 'Sauganash.' He kept his word; the house became famous, and its name has gone into history as for years being the largest and finest hotel in Chicago. Mark, as is well known, was a jolly host; after having given his guests the best his larder afforded, he would of evenings tune up his violin, on which he was, for those days at least, a skilled performer, and often, till late at night, amuse and entertain them with his melody. Dancing, too, generally formed no small feature of these sports; and so the Sauganash became popular through the character of its proprietor as a musician as well as for its excellence as a hotel. This house was situated on the south side of Lake Street, at the corner of Market, though one or two old settlers have given the impression that it fronted as much on Market as on Lake. The accompanying illustration of the building, showing it as it appeared in 1833, has been pronounced by Hon. John Wentworth and by Charles R. Vandercook, who were in that year boarders at the hotel, a most excellent representation of it as it then was. It seems, too, that the cabin which Mr. Beaubien built when he came here stood on the site where, a few years later, he built the Sauganash Hotel. Mrs. Harriet Murphy, whose husband John Murphy was at different

Harriet A. Murphy

John Murphy

times proprietor of the hotel, states that the frame part was an addition built on to the cabin; and a writer who was at the hotel in the winter of 1833-34 says this room in the cabin, which was then weather-boarded on the outside, was the warmest and most comfortable place in town. Mr. Beaubien kept the Sauganash until 1834, when he left it, and in January, 1835, a Mr. Davis assumed control. Mr. Beaubien had meanwhile built a new house on the northwest corner of Wells and Lake streets. In August of 1834, Mr. and Mrs. Murphy took charge of this new hotel, which they christened the Exchange Coffee House. They remained there until 1836, when they removed to the old Sauganash, the name of which they changed to United States Hotel. Mr. Murphy continued business there until the following year, when he removed to the West Side, where he opened a new hotel under the same name he had given the old Sauganash, which was then converted into a theater—the first in Chicago. In 1839 the Sauganash was once more occupied as a hotel, being kept by Jesse Seymour until in 1840, when Mr. Murphy having leased his new West Side hotel, again became the proprietor of it. He remained there about a year and a half, when he again returned to the West Side to the United States Hotel, Mr. Smith having surrendered his lease. A man by the name of Davis next took the Sauganash but failing to make it pay, Mr. Murphy once more assumed its management, at the earnest solicitation of its owner, Augustus Garrett. Just how long he continued to run the house this time is not known, but it was probably in 1843 when he moved out. The next proprietor of the Sauganash was Jeduthan Brown, and he was succeeded in 1844 by L. M. Osterhaut, who kept it for several years, when it passed into the control of M. & G. Walrod, who were its proprietors until 1848. From the

directory of that year it appears that Newell Stratton had control, and in 1851 B. S. Foster was in charge at the time it was destroyed by fire. The conflagration which swept from existence, save in the memories only of those who had known for years this historic building, occurred at half-past 3 o'clock Tuesday morning, March 4, 1851; the following account of which is found in the Gem of the Prairie of March 8, 1851:

"At about half-past three o'clock last Tuesday morning flames were discovered issuing from the roof of the Sauganash Hotel on Market Street, between Lake and Randolph streets, and so rapid was their progress among the combustible materials in that vicinity that nine buildings were destroyed, before being finally subdued by the firemen. The buildings destroyed were owned by the Garrett estate."

The account then mentions the occupants, and among the rest says, "Sauganash Hotel, B. S. Foster." Concerning the origin of the fire the article concludes

"It is supposed that the fire was the work of an incendiary. The supposition is strengthened by the fact that while the fire Monday evening was raging at the corner of Lake Street and Wabash Avenue, an unoccupied building adjoining the Sauganash Hotel was set on fire in an upper story, but was discovered and put out before making any considerable progress."

Thus ends the history of this notable building, which for so long was a prominent mark of interest in Chicago's early days.

Another hotel and scarcely less noted in its time was the Green Tree Tavern, which stood on the northeast corner of Canal and Lake streets. It was built by James Kinzie in 1833, and opened for business by David Clock, who in a short time relinquished his proprietorship to Edward Parsons. The next proprietors were two young men, Snow and Spear, who kept it until 1838, when John Gray managed it until 1841. He sold out to George W. Rogers, who was its owner until 1845. During his time the house was known as the Chicago Hotel. The following year he was succeeded by F. A. McIntyre. From the directory of 1848 it is learned that J. W. Noyes was then running it under the name of Noyes Hotel. In the next year it again changed hands and names, being called the Rail Road House, which title it held until 1851, when it became the Atlantic Hotel. Shortly after that year, Fred Meher took charge of the house and, in 1854, changed its name to the (West) Lake Street House. He continued to run it until 1859. Afterward it became a tenement house, having, however, a saloon in the lower front part. It remained standing at the corner of West Lake and Canal streets until 1880, when it was removed to Nos. 33, 35 and 37 Milwaukee Avenue, in order to make room for the American Iron Company's buildings which now occupy its former site. At this time (1884) the house still stands at the above numbers, and perhaps scarcely one among the thousands who pass it daily are aware of its historic character or that it is one of the oldest buildings in existence in the city. There stands to-day on the southeast corner of Canal and Randolph streets a small two-story frame building, sadly dinged by age and exposure to the weather, for which the claim is made that it was the first frame house built on the West Side. In years now long since past it was known as the Western Hotel, and was built in 1835, as near as can be learned, by W. H. Stow, who came to Chicago in 1833. Mr. Stow was by trade an iron founder, and at one time had his shops on the rear end of the lot on which he later built his hotel. As he employed a number of men, his house was more of a boarding-house for local custom than for the accommodation of the transient public. Mr. Stow kept the house until 1852, at which time he rented it to Martin Dodge and

William R. Irish, who, under the firm name of Dodge and Irish, conducted it until the following year, when Irish retired from the firm, being succeeded by A. P. Collar. The name of the house was, on the retirement of Mr. Stow from its management, changed to Commercial Hotel. Dodge & Collar remained the proprietors until early in 1854, when the building was partially destroyed by fire. After this it was rebuilt and in the years 1855-56 appears in the city directories as the Wilson House, kept by T. O. Wilson. With this terminated its career as a hotel or boarding-house. It is now occupied as a saloon, which is kept and owned by a son of the man who originally built and owned the house.

Chicago did, however, have a really grand hotel as early as 1835; this was the Lake House, located on the

\$10,000. William Rickards was the next manager in 1844, and remained in charge several years, finally, however, leaving there to take control of the Sherman House. In 1854 the house was remodeled, inside, an additional story, with a handsome cupola added, and was opened as a first-class hotel by James E. Hays and M. M. Smalley. This firm remained the proprietors until in 1856, when Mr. Boardman took it and ran it until 1858. After repeated experiments to make it a financial success, all of which proved failures, the house was converted into residence flats and was so used until destroyed in the great fire of 1871.

From 1849 to 1852, Edward H. Aiken kept a hotel called the Lake Street House, situated at Nos. 135 and 137 Lake Street. In 1852 this house was destroyed by fire, and Mr. Aiken became the proprietor of the Gar-

THE GREEN TREE HOTEL.

corners of Kinzie, Rush and Michigan streets, fronting on the latter. This hotel, which was built of brick, was three stories and a basement in height, was elegantly furnished throughout, and cost its owners nearly \$100,000. The men whose enterprise led them into building a house which for those days was far in advance of the needs of the town, were Gurdon S. Hubbard, General David S. Hunter, John H. Kinzie, Dr. W. B. Egan and Major James B. Campbell. The hotel was completed and thrown open to the public in the autumn of 1836, Jacob Russel, of Middleton, Conn., assuming control of its management. In 1839 Mr. Russel left the Lake House to take charge of the City Hotel (the predecessor of the Sherman House) which had just been opened to the public, and George E. Shelley, of Baltimore, became the proprietor of the Lake House. Mr. Shelley introduced a French cook, printed bills of fare, and various other innovations in the management of the house. The following year Daniel S. Griswold succeeded Mr. Shelley in the management of the Lake House, and some years after this it was sold under a foreclosure of mortgage, by Hon. Isaac N. Arnold, attorney for the mortgagees, to Hon. Thomas Dyer, for

den City House, which then stood on the corner of Madison and Market streets. Mr. Aiken remained there until in 1855. The house then passed into the hands of R. and G. W. Storrs, who were its owners until 1859. Robert Hill next became its proprietor. Afterward the house was taken by Mr. Throop, the man who built it, and was conducted by him until it was, a few years later, destroyed by fire. The large wholesale house of Marshall Field & Co. now (1884) occupies the corner where it formerly stood.

The Mansion House was built in 1831 by Dexter Graves; it stood on Lake near Dearborn and almost opposite the old Tremont House. As originally built, the Mansion House was situated some little distance back from the street, but two years later Mr. Graves erected a frame addition in the front, which came out to a line with the street. About this time he sold it to a Mr. Haddock, his son-in-law, who kept it until 1835 when it passed into the hands of Abram A. Markle, who, for two years thereafter accommodated and entertained many of Chicago's early residents, and travelers coming this way to take an observation of the "town lying in the mud."

In 1837 it was kept by Jason Gurley and two years later by Asher Rossiter. In 1844 Charles Skinner and J. F. Smith were its proprietors. The directory of 1845 shows it to have been in the hands of C. W. Cook. In 1848 Jacob R. Bates took it. Two years later the greater part of the house was removed to the northwest corner of Lake Street and Michigan Avenue, and was fitted up as a hotel under the name of the Dearborn House.

Among the minor houses in the year 1845 was the Eagle Tavern at Dearborn and South Water streets, the Farmer's Exchange on Lake Street near Wabash Avenue, and the Illinois Exchange, corner Wells and Lake streets.

There were in 1839 the following minor taverns: the Columbian House, on the corner of Wells and South Water streets; the Shakespeare Hotel, corner of Kinzie and Rush streets; the Southern Hotel, corner of State and Twelfth streets; the Buffalo Hotel, on South Water Street; the Lake Street Coffee House, corner of Lake and Wells streets; the Ohio House, on LaSalle Street, and Myrick's Tavern (the Bull's Head) on Cottage Grove Avenue, near Twenty-ninth Street.

These hotels, which in the English sense, might more appropriately be called inns, were establishments which met a demand for modest accommodations, peculiarly active in young and growing towns.

The New York House was built in 1834 and opened to the public the following year by Lathrop Johnson and George Stevens, who conducted it until the fall of 1839, when they were succeeded by L. M. Osterhoudt. He remained its keeper until 1843.

In 1849-50 W. R. Green and B. H. Skinner kept a hotel, known as the New York House, at 211 and 213 Randolph Street. A few years later the firm became Smith & Tiernan. In 1858 the house was still kept as a hotel by J. F. Smith, formerly of the firm of Smith & Tiernan.

The United States Hotel, which has been mentioned so frequently in the account of the old Sauganash, was built by Mr. Murphy; it stood on Canal Street, near Randolph. The house changed hands often during its career, and at the time it burned, in 1852, was kept by David L. Rogers.

The Vermont House, which stood on Market Street, between Lake and Kandolph streets, flourished in the days of the old Sauganash and was kept for years, in fact until 1864, by Joshua Bell.

The American Temperance House, situated on the northwest corner of Lake Street and Wabash Avenue, was built by Asher Rossetter in 1840, and opened to the public in the spring of the following year. Charles W. Cook was its first proprietor, and kept it for a number of years, being succeeded by Jeduthan Brown; later Jason Gurley purchased an interest and the firm in 1845 was Brown & Gurley. Then A. J. Douglass took control, conducting the house until 1849, when it passed into the hands of Milton Barney, who continued its proprietor until 1852. In this year Mr. Rossetter took charge, changing the name to the American House,* omitting the word "temperance." In the directory of 1854 "A. Rossetter & Co." are put down as proprietors; and it was probably at this time that John M. King had managing charge of the house. In the fall of 1854 W. R. Irish, who, it will be remembered, at one time kept the old Western Hotel, became the proprietor, conducting it until 1856. In the fall of that year, William Church and Charles Bissel took the house until 1858, when it again changed hands, L. P. Hill taking

* See Udall & Hopkins' City Directory for 1852-53

control; he continued its proprietor until, in 1861, the house was torn down to make room for a business block which occupied its site until the fire of 1871.

The City Hotel, subsequently the Sherman House, was built in 1836-37 by Francis C. Sherman. Jacob Russel was its first proprietor, taking possession in December, 1837. In 1844, Mr. Sherman remodeled the house, added two stories, making it five stories high, and changed its name to the Sherman House. Two years later Mr. Russel retired from its management and was succeeded by James Williamson and A. H. Squier; the next year Mr. Williamson retired from

Wm Rickards

the firm, William Rickards purchasing his interest. This firm, Rickards & Squier, retained the proprietorship of the house until in 1851, when they sold out to Brown & Tuttle, late of the City Hotel, a building which then stood on Lake Street, near Wabash Avenue, and was formerly the Farmer's Exchange. In February of 1854, Mr. Brown sold his interest to A. H. Patmor, and until 1859 the firm was Tuttle & Patmor. In 1858 the proprietors were Martin Dodge and Hiram Longly.

In 1833, the first Tremont House, situated then on the northwest corner of Lake and Dearborn streets, was built by Alanson Sweet. It was kept as a saloon and boarding-house by him and a man from Canada, named Darwin. Then the Couch brothers purchased the property and Ira Couch opened it as a hotel. He ran it until 1836, when his brother James took control, and was managing it at the time it burned, October 27, 1839. In December of the same year the erection of

Ira Couch

the new house was begun, on the corner where the present Tremont stands, and on the 20th of May, 1840, the building was completed. Both of these structures were of wood and far different in style and cost of construction from the costly edifice which to-day ranks among Chicago's leading hotels. The house, however, did a large business and prospered finely until July 21, 1849, when it was destroyed by fire. Its proprietors, however, immediately set to work rebuilding, this time a brick structure, which was opened in October, 1850. Ira Couch remained the proprietor until 1853, when the house passed into the hands of the Gage brothers, David A. and George W. Two years later John Drake, now of the Grand Pacific, was associated with them, and

James Couch

in 1858 Gage Bros. & Drake were its proprietors. Speaking of the house in its earlier days, James Couch says that oftentimes they were so crowded that not only all the beds, but every available space of floor room,

would at night be occupied by travelers, who were glad enough to get even a pallet on the floor. A single boat would bring two and three hundred passengers at a trip, and as the Tremont was a popular hotel, it was on such occasions taxed to its utmost for their accommodation.

The Steamboat Hotel, on North Water Street, near Kinzie, was kept in 1835 by John Davis, and from 1836 to 1839 by William McCorrister, as the American Hotel.

The Chicago Temperance House in 1839 stood on La Salle Street, near Lake, and until 1844 was kept by

by fire, and Mr. Barker removed to the corner of Wells and Randolph streets, taking charge of a hotel, then newly built, which he also christened the Baltic House. This house he kept until 1855, when O. V. Colby took it, changing its name to the Colby House. Mr. Colby remained there until in 1856-57, when the house was torn down and a new building, the Metropolitan Hotel, was erected in its stead.

For some years previous to the building of the Metropolitan, Isaac Speer, a worthy citizen, by trade a jeweler, conducted an extensive establishment at 77

FRINK & WALKER'S STAGE OFFICE.

David L. Roberts. In the following year it was taken by Augustus Dickinson, who kept it until 1849, when it was probably torn down or was no longer used as a hotel.

The new City Hotel, which stood on the corner of Lake and State streets, was erected in 1848. Before this, for some years, a wooden building under the same name occupied the same ground. When the new house was built, Jeduthan Brown was its proprietor, and the next year A. H. Tuttle became a partner. They conducted the house until 1851, when they went to the Sherman House. In 1856 the City Hotel was kept by John H. Thom and William F. Orcott, the next year by Orcott & Sutherland, and in 1858 by Richard Somers & Co.

In 1848 Peleg A. Barker kept the Baltic House, situated on the southwest corner of Dearborn and Randolph streets. Two years later this house was destroyed

Lake Street. He had in his employ a man named Howgate, in whom he reposed every confidence. At the end of the year 1853 Mr. Speer was astonished on balancing his books to discover that, notwithstanding a brisk trade and an apparent prosperous business, he was losing money. The mystery was wholly unexplainable. He, however, kept on, and the three years following showed precisely the same results; at this time, he found himself on the verge of bankruptcy, but with no satisfactory reasons apparent for his affairs being in so deplorable a condition. While he was thus lamenting his troubles, the news reached here that the detectives of St. Louis had unearthed, in that city, a lot of stolen jewelry, which bore the trade mark of Mr. Speer. Investigation followed, and the fact was disclosed that Howgate had been systematically robbing him for years, and mainly with the proceeds of his thefts, had commenced the erection of the Metropolitan

Hotel on the site formerly occupied by the Baltic. Howgate was apprehended, brought to trial, and the matter finally settled by Mr. Speer receiving the new hotel, in reparation for the losses he had sustained. In 1857 the Metropolitan was kept by John Mason and a man named Goodman.

The Matteson House was built in 1850 by C. H. Bissell, immediately following the destruction of the old Baltic, already mentioned. It was completed and opened to the public, with W. L. Pearce as proprietor, in the month of August of the following year. Mr. Pearce kept the house until 1854, when it passed into the hands of Herrick Stevens and J. P. Willard, who, under the firm name of Stevens & Willard, were its proprietors until 1859. In that year Charles H. Bissell and William S. Goodrich took it, and a few years later it was purchased by Robert Hill, who kept it until it was destroyed in the fire of 1871.

In 1854, besides the hotels already mentioned, there were the following: The Bissell House, at 224 Lake Street, P. Bissell & Son, proprietors; the Bradley House, corner of Van Buren and Sherman streets, by Boyington & Turley; the Bull's Head, by H. Hopkins, at the head of Madison Street, where is now situated the Washingtonian Home; the Breman House, by C. Nockin, at 245 South Clark Street; Doty's Hotel, by Theodoris Doty, at 64 and 66 Randolph Street; the Foster House, by Geiselman & Bro., Kinzie, corner of Clark; Hamilton House, by J. F. Draper & Co., at 14 North Clark; the Lake View House, by J. H. Rees, on the north lake shore; the McCardel House, McCardel & Crane, 17, 19 and 21 Dearborn; Merchant's, La Salle Street near South Water, by E. Moore; Naperville House, at 191 Randolph, by A. Schall; National Hotel, Randolph, near Peoria, by Brown & Crout; the New England House, at 40 Kinzie, by Briggs & Felthousen; the Philadelphia House, Washington, corner of Franklin, by Buest & Bunn; the Planter's House, by J. McDonald, Randolph, corner Wells; the Rock Island House, south end Clark Street, H. Longley; the Yorkshire House, J. Watson, Wells, near Randolph.

From this time up to 1859 the hotels of minor importance multiplied rapidly. Those of any prominence or worthy of mention, erected during this period, were: The Audubon House, Nos. 68 and 70 West Lake Street; the Boardman House, corner Clark and Harrison; the Briggs House, Randolph and Wells, built in 1854 by William Briggs and kept by John Floyd & George H. French, who were still its proprietors in 1857; the Cleveland House, also new, kept by A. Cleveland, at Nos. 46, 48, 50 and 52 West Lake; the Richmond House, corner South Water and Michigan Avenue; and the Young America, which stood on the southeast corner of Randolph and Dearborn, near Rice's theater. Of perhaps a score, the names of which have not been mentioned, it is only necessary to say that they were boarding houses, transitory, many of them, in their character, and not living long enough to become fixed or permanent houses of public entertainment.

FAMILY OF ELIJAH WENTWORTH.—The following sketch of the family of Elijah Wentworth is compiled from the very authentic and elaborate work of John Wentworth, LL. D., entitled "The Wentworth Genealogy, English and American," published in 1878, in three volumes. Some additions and unimportant emendations have been made from the statements of Mrs. Zebiah Wentworth (Estes), given during the summer of 1883.

ELIJAH WENTWORTH, son of Elijah and Rebecca

(Capen) Wentworth, was born in Stoughton, Mass., September 25, 1776. He married, in 1798 or 1799, Lucy Walker, of Hampden, Maine, and, after his marriage, removed to Duck Trap, Maine. In 1817, with his family, he emigrated West; first to Kentucky; thence to Illinois, and thence to Dodgeville, Wis. He came to Chicago, in the fall of 1829.*

In January, 1830, he opened the Wolf Point Hotel, which he rented of Mr. Kinzie and which he kept until late in the fall of that year, when he removed to a claim he had taken, eight miles northwest of the city, near where

Elijah Wentworth

Jefferson Station, on the Chicago & Northwestern Railroad, now is. Here he built quite a large log house and opened another tavern, which he kept uninterruptedly (except during a short time when driven into refuge at Fort Dearborn during the Black Hawk War, in 1832), for many years. His wife died of cholera in Chicago, July 22, 1849. He died at the residence of his daughter, Mrs. Sweet, at St. Joseph, Mich. in November, 1863. He was buried in Chicago.

Their children were

Hiram, born in Vassalborough, Maine, April 22, 1800.

ELIJAH WENTWORTH, JR., was born in Lincolnville, Maine, March 30, 1803. He came to Chicago either in 1830 or 1831. He was elected, by a unanimous vote, the first Coroner of Cook County. He afterwards removed to Lyons, Cook County, where he kept the well-known Black Horn tavern. He was Postmaster for a while (1844). In 1875 he was living in Galesburg,

* This date is given by Zebiah Wentworth.

Knox Co., Ill. He married, January 15, 1832, Eliza Jane Weed, Plainfield, Will Co., Ill. She died in Chicago, June 24, 1836; (2) he married Angelina, daughter of Demas Colton, Middletown, Conn. She died at East Hartford, Conn., July 25, 1858. (3) He married at Galesburg, June 13, 1864, Mrs. Elmira L. Myers (widow). He died at Galesburg, November 18, 1875.

Eliza died young in Illinois.

Lucy, born in Lincolnville, Maine, October 25, 1807; married October 12, 1827, in Jo Daviess County, Ill., John Ray, Willow Springs, Wis. She died April 24, 1864.

Mary Wilson, born October 19, 1808; married (1) William Clark, Lewiston, Fulton Co., Ill. He died at Fort Winnebago, Wis., 1831. (2) John Holcomb. She

died in 1834, at Pekin, Ill. Ruth Whitney, died in infancy in Lexington, Ky.

Zebiah Walker (Estes), born in Hampden, Maine, April 19, 1810; married Elijah S. Estes, now of Bay View, Wis., September 4, 1836, where (January, 1884), she is still living.

Susan, born in Hampden, Maine, July 12, 1811; married (1) July 1, William Anderson; (2) Charles Sweet. February 16, 1836, moved to St. Joseph, Mich., where she died, March 25, 1882.

Isaac died in infancy in Ohio, about 1813.

George H., born September 9, 1815, near Lexington, Ky. Now, 1884, living in the town of Lake, Wis.

VIEW ON CLARK STREET IN 1857.

CHRONOLOGICAL INDEX.

	Page		Page
1603—Samuel Champlain first arrives on the St. Lawrence River.....	38	1682—Tonty passes through Chicago on his route from the Mississippi River to Mackinac.....	64
